- In Five-Element theory, one treats deficiency syndromes by tonifying the “mother” organ to strengthen the “son” organ. For example, in the case of Liver deficiency, one can tonify the Kidney (water element, mother organ) to indirectly tonify the Liver (wood element, son organ). In the case of Lung deficiency, one can tonify the Spleen (earth element, mother organ) to indirectly tonify the Lung (metal element, son organ).
- Lastly, one theory posits the importance of tonifying the Kidney and Spleen to treat deficiency syndromes. The basis for this theory is that since Kidney *jing* (essence) is the source of prenatal health, and Spleen qi is the source of postnatal health, tonification of these organs will support the normal health and functioning of all the other organs.

~
Historically, qi and
blood tonifying formulas
have been used to
treat pregnancy-related
disorders.
~

SUBCATEGORIES OF ACTION

Tonic formulas are divided into six subcategories based on function:

1. Qi-Tonifying Formulas

These formulas primarily treat Spleen and Lung qi deficiencies. Common clinical manifestations of qi deficiency include lassitude, general weakness, weak extremities, shortness of breath, hurried respiration with mild physical exertion, a low voice, a pale

Chapter 8 — Overview

face, loose stools, diarrhea, lack of appetite, spontaneous sweating, a pale tongue, and a weak or deficient, big pulse. In severe cases, there may be prolapse of organs such as the stomach, uterus, or rectum.

Qi-tonifying herbs, such as *Ren Shen* (Radix et Rhizoma Ginseng), *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) are of primary importance in these formulas. Representative formulas include *Si Jun Zi Tang* (Four-Gentlemen Decoction), *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), and *Sheng Mai San* (Generate the Pulse Powder).

2. Blood-Tonifying Formulas

These formulas contain blood-tonifying herbs to treat blood deficiency syndromes, which often affect the Heart and Liver. Common clinical manifestations of blood deficiency include dizziness, blurred vision, a pale face with sallow complexion, pale lips, dry and dull nails, palpitations, insomnia, dry stools, a pale and slightly red tongue with a slippery and/or dry tongue coating, and a pulse that is either fine and rapid or fine and rough. Women with blood deficiency may experience delayed menstruation, with pale, scanty menstrual discharge.

Herbs commonly used to tonify the blood include *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *E Jiao* (Colla Corii Asini). Representative formulas include *Si Wu Tang* (Four-Substance Decoction), *Gui Pi Tang* (Restore the Spleen Decoction), and *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood).

Because qi, blood, yin and yang are mutually dependent, and the *zang fu* closely connected, deficiencies usually do not occur independently: deficiency of one often affects another.

3. Qi- and Blood-Tonifying Formulas

These formulas use qi- and blood-tonifying herbs to treat qi and blood deficiencies simultaneously. Clinical manifestations of qi and blood deficiencies include dizziness, vertigo, palpitations, shortness of breath, poor appetite, fatigue, weak extremities, a pale face, a pale tongue with a thin, white tongue coating, and a deficient, fine pulse.

Qi- and blood-tonifying formulas incorporate both qi-tonifying herbs such as *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and blood-tonifying herbs such as *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Gui* (Radix Angelicae Sinensis), and *Bai Shao* (Radix Paeoniae Alba). Representative formulas include *Ba Zhen Tang* (Eight-Treasure Decoction), *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), and *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi).

4. Yin-Tonifying Formulas

These formulas treat yin deficiency syndromes with yin-tonifying herbs. Yin deficiency is often associated with the Liver and Kidney, and involves common clinical manifestations such as emaciated appearance of the face and body, a dry throat and mouth, *wu xin re* (five-center heat), insomnia, dry stools, scanty and yellow urine, steaming bones sensation, night sweats, dry cough with no sputum, tidal fever, red cheeks, seminal emissions, soreness of the back and waist, a red tongue with a scanty and dry tongue coating, and a deep, fine and rapid pulse.

Herbs commonly used to treat yin deficiency include *Shu Di Huang* (Radix Rehmanniae Praeparata), *Mai Dong* (Radix Ophiopogonis), and *Tian Dong* (Radix Asparagi). Representative formulas include *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), *Zuo Gui Wan* (Restore the Left [Kidney] Pill), *Da Bu Yin Wan* (Great Tonify the Yin Pill), and *Bu Fei E Jiao Tang* (Tonify the Lung Decoction with Ass-Hide Gelatin).

5. Yang-Tonifying Formulas

These formulas use yang-tonifying herbs to treat Kidney yang deficiency. Common clinical manifestations of Kidney yang deficiency include soreness and pain of the lower back and knees, weakness

Chapter 8 — Overview

and soreness of the extremities, a feeling of coldness and pain in the lower extremities, scanty or frequent urination, impotence or premature ejaculation in men, infertility in women, and a deep, fine or deep, hidden pulse at the *chi* position.

Herbs that are commonly used to tonify yang include *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), *Du Zhong* (Cortex Eucommiae), *Ba Ji Tian* (Radix Morindae Officinalis), and *Bu Gu Zhi* (Fructus Psoraleae). Representative formulas include *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet) and *You Gui Wan* (Restore the Right [Kidney] Pill).

6. Yin- and Yang-Tonifying Formulas

These formulas treat concurrent yin and yang deficiencies. Clinical signs and symptoms include dizziness, vertigo, soreness and weakness of the lower back and knees, impotence, seminal emissions, aversion to cold, cold extremities, spontaneous or night sweats, and tidal fever.

Herbs that tonify yin include *Shu Di Huang* (Radix Rehmanniae Praeparata), *Mai Dong* (Radix Ophiopogonis), *Tian Dong* (Radix Asparagi), *Gui Ban* (Plastrum Testudinis), and *Zhi Mu* (Rhizoma Anemarrhenae). Herbs commonly used to tonify yang include *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), *Du Zhong* (Cortex Eucommiae), *Ba Ji Tian* (Radix Morindae Officinalis), and *Bu Gu Zhi* (Fructus Psoraleae). Representative formulas that tonify both yin and yang include *Di Huang Yin Zi* (Rehmannia Decoction) and *Gui Lu Er Xian Jiao* (Tortoise Shell and Deer Antler Syrup).

CAUTIONS / CONTRAINDICATIONS

- It is important to differentiate between deficient and excess conditions when considering the use of tonic herbs. While tonic herbs are prescribed to supplement deficiencies, clearing or draining herbs are used to eliminate excess conditions. Tonic herbs should **not** be used in excess conditions, as they will only worsen the condition. Clearing or draining herbs must **not** be used in cases of deficiency, as they will aggravate the condition by draining vital substances.
- Frequent or long-term use of tonic herbs may create stagnation. Therefore, tonic herbs should be combined with herbs that strengthen the Spleen, harmonize the Stomach, and move qi, and blood to ensure minimal side effects.
- Tonic formulas are most effective when taken on an empty stomach, or before meals, for better absorption.

Most tonic formulas are cooked longer, at low temperatures, for complete extraction of ingredients.

PROCESSING

Most tonic herbs and formulas are cooked for a longer period of time than other types of herbs, at low temperatures, to ensure complete extraction of the active ingredients.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Tonic formulas are divided into six subcategories based on their traditional therapeutic actions. These six subcategories have contrasting pharmacological effects and clinical applications.

1. **Qi-tonifying formulas** mainly treat Spleen and Lung qi deficiencies. Although they are certainly effective, there is little clinical research on general symptoms of qi deficiency such as lassitude, general weakness, and weak extremities. Instead, most of the research focuses on treatment of specific biomedical disorders affecting the gastrointestinal system, such as gastritis, peptic ulcer, colitis, and irritable bowel syndrome.

Many of these formulas are now used in cancer treatment, since they have demonstrated remarkable effects in alleviating the side effects associated with chemotherapy and radiation. Some formulas have antineoplastic effects based on performance during *in vitro* and *in vivo* studies.

- **Gastrointestinal disorders:** Qi-tonifying formulas treat a wide variety of gastrointestinal disorders. Pharmacologically, they exert significant influence on the stomach and intestines, including but not limited to gastroprotective,¹ antiulcer,² a prokinetic action on gastric emptying,³ and a regulatory effect on the intestines to either increase or decrease peristalsis.^{4,5,6,7,8} Clinically, *Si Jun Zi*

Chapter 8 — Overview

Tang (Four-Gentlemen Decoction) has been used to treat chronic gastritis,⁹ peptic ulcer,^{10,11} ulcerative colitis,¹² irritable bowel syndrome,¹³ and epigastric or abdominal pain.¹⁴ *Liu Jun Zi Tang* (Six-Gentlemen Decoction) has been used to treat abdominal pain,¹⁵ gastritis,¹⁶ duodenal ulcer,¹⁷ indigestion,¹⁸ and stomatitis.¹⁹ *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder) has been used to address chronic colitis,²⁰ irritable bowel syndrome,²¹ diarrhea,²² and superficial gastritis.²³ Lastly, *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) treats gastritis,²⁴ constipation,²⁵ and diarrhea.²⁶

- **Morning sickness:** Three qi-tonifying formulas have been shown to treat nausea and vomiting. *Liu Jun Zi Tang* (Six-Gentlemen Decoction) is effective for morning sickness.²⁷ *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum) successfully treats morning sickness and anorexia.^{28,29} *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) relieves nausea and vomiting.³⁰

- **Chronic fatigue syndrome:** *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) has been used successfully to treat chronic fatigue syndrome.³¹

- **Supportive treatment for chemoprotective and radioprotective effect:** Many qi-tonifying formulas demonstrate beneficial effects to alleviate the side effects associated with chemotherapy and radiation. For example, *Si Jun Zi Tang* (Four-Gentlemen Decoction) has a hematopoietic effect to increase both white and red blood cell counts in subjects treated with radiation.^{32,33} *Liu Jun Zi Tang* (Six-Gentlemen Decoction) has shown *in vitro* antineoplastic effect by inhibiting the growth of cancer cells in mice.³⁴ *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder) has been used successfully to relieve nausea and vomiting associated with chemotherapy and radiation.^{35,36} Lastly, *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) treats immunosuppression induced by mitomycin C, and leukopenia induced by cyclophosphamide.^{37,38}

- **Cancer:** Most qi-tonifying formulas are used as supportive therapy during chemotherapy and radiation, as discussed above. However, some formulas also have direct antineoplastic effects. *Si Jun Zi Tang* (Four-Gentlemen Decoction) has been shown to inhibit the growth of tumor cells in mice with esophageal and lung cancer.³⁹ *Liu Jun Zi Tang* (Six-Gentlemen Decoction) has been shown to inhibit the growth of cancer cells in mice by increasing macrophages and natural killer cells.⁴⁰ Lastly, *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) exerts antineoplastic effects by enhancing natural killer cell activity, and suppressing the proliferation of certain cancer cells.^{41,42}

2. Blood-tonifying formulas commonly treat a wide variety of disorders, including hematological, gynecological, obstetric, and dermatological disorders.

- **Hematological disorders:** As the name implies, blood-tonifying formulas treat blood-related disorders, such as anemia,^{43,44} leucopenia,^{45,46} and thrombopenic purpura.^{47,48} The mechanism of these effects is attributed primarily to hematopoietic effects that increase blood cell production.^{49,50} Formulas commonly used to treat hematological disorders include *Gui Pi Tang* (Restore the Spleen Decoction) and *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood).

- **Menstrual disorders:** Blood-tonifying formulas are very effective in treating a wide variety of menstrual disorders. *Si Wu Tang* (Four-Substance Decoction) has been shown to treat menstrual pain,⁵¹ irregular menstruation,⁵² and *beng lou* (flooding and spotting).⁵³ *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit) has been shown to treat dysmenorrhea.⁵⁴ *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood) has been used to treat amenorrhea.⁵⁵ *Gui Pi Tang* (Restore the Spleen Decoction) has been used to treat uterine bleeding,⁵⁶ *beng lou* (flooding and spotting),⁵⁷ and menopause.⁵⁸ Lastly, *Dang Gui Shao Yao San* (Tangkuei and Peony Powder) has been shown to treat uterine bleeding,⁵⁹ menopause,⁶⁰ and dysmenorrhea.^{61,62} The general mechanisms of action are attributed to the regulatory effects on hormone production. The exact mechanisms, however, vary depending on the formulas and indications.

- **Gynecological disorders:** Blood-tonifying formulas address various gynecological disorders, including but not limited to endometriosis,⁶³ uterine myoma,⁶⁴ adnexitis,⁶⁵ pelvic inflammatory

Many tonic formulas alleviate side effects of chemotherapy and radiation. Others are antineoplastic.

Chapter 8 — Overview

disease,^{66,67} and dysmenorrhea in endometriotic and adenomyotic individuals.⁶⁸ Representative formulas include *Si Wu Tang* (Four-Substance Decoction) and *Dang Gui Shao Yao San* (Tangkuei and Peony Powder).

- **Obstetrics:** Several blood-tonifying formulas have been used to treat various pregnancy-related disorders and/or complications. For example, breech presentation may be corrected with *Si Wu Tang* (Four-Substance Decoction) and *Dang Gui Shao Yao San* (Tangkuei and Peony Powder).^{69,70} Habitual miscarriage may be prevented with a combination of *Dang Gui Shao Yao San* (Tangkuei and Peony Powder) and *Chai Ling Tang* (Bupleurum and Poria Decoction).^{71,72}
- **Infertility:** According to clinical studies, blood-tonifying formulas have been used successfully to treat infertility from various causes. Representative formulas include *Si Wu Tang* (Four-Substance Decoction),⁷³ *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit),⁷⁴ and *Dang Gui Shao Yao San* (Tangkuei and Peony Powder).⁷⁵
- **Dermatological disorders:** Many skin disorders have been treated successfully with blood-tonifying formulas. The clinical applications include itching,^{76,77} psoriasis,^{78,79,80} urticaria,^{81,82} eczema, acne,⁸³ and chloasma.⁸⁴ Furthermore, some formulas have also been shown to effectively treat dermatitis induced by cosmetics and penicillin.^{85,86} Representative formulas include *Si Wu Tang* (Four-Substance Decoction), *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), and *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), as they have antipruritic and anti-inflammatory effects to relieve itching and inflammation of the skin.^{87,88}
- **Headache:** Many blood-tonifying formulas have been shown to effectively treat various types of headache, such as neurogenic headache,⁸⁹ vascular headache,⁹⁰ and headache due to trauma.^{91,92} Two representative formulas are *Si Wu Tang* (Four-Substance Decoction) and *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit).
- **Others:** Blood-tonifying formulas may also be used for other conditions, such as cardiovascular disease (arrhythmia, angina pectoris, and hypotension),^{93,94,95} ophthalmic disorders (optic nerve atrophy, optic neuritis, and cataract),^{96,97,98} hepatitis,⁹⁹ and many others.

3. **Qi- and blood-tonifying formulas** are composed of herbs that supplement qi and blood. The pharmacological effects of these formulas include those already mentioned above for qi-tonifying and blood-tonifying formulas, such as gastrointestinal disorders, hematological disorders, menstrual disorders, and gynecological disorders. Historically, these formulas have been used to treat pregnancy-related disorders, such as infertility,¹⁰⁰ habitual miscarriage,^{101,102} morning sickness,¹⁰³ breech presentation,¹⁰⁴ and postpartum care.¹⁰⁵

Today, several of these formulas have been shown to have marked chemoprotective and radioprotective effects, and are now commonly used as supportive treatments for patients with cancer.^{106,107} These, however, are just some of the many clinical applications of qi- and blood-tonifying formulas. Representative formulas include *Ba Zhen Tang* (Eight-Treasure Decoction), *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), and *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi).

4. **Yin-tonifying formulas** tonify yin and generate body fluids; they primarily treat disorders associated with Kidney, Liver, Lung, and Stomach yin deficiencies. These formulas treat an extremely wide range and variety of disorders, and the summary below is only a brief attempt to identify the most common and significant applications.

- **Reproductive disorders:** Many yin-tonifying formulas have marked influence on the reproductive system, and have been used successfully to treat sexual and reproductive disorders, such as sexual dysfunction,^{108,109} male infertility,^{110,111} and female infertility.^{112,113} The mechanisms of action vary, but have been attributed in part to the stimulation and regulation of both male and female sex hormones.^{114,115} Exemplar formulas include *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), *Zuo Gui Wan* (Restore the Left [Kidney] Pill), and *Er Xian Tang* (Two-Immortal Decoction).
- **Gynecological disorders:** Many yin-tonifying formulas have marked effects in treating gynecological disorders. For example, menopausal symptoms may be alleviated with *Liu Wei Di Huang Wan*

Chapter 8 — Overview

(Six-Ingredient Pill with Rehmannia),¹¹⁶ *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill),¹¹⁷ and *Er Xian Tang* (Two-Immortal Decoction).¹¹⁸ Premenstrual syndrome may be alleviated with *Yi Guan Jian* (Linking Decoction).¹¹⁹ Uterine bleeding and amenorrhea may be treated with *Zuo Gui Wan* (Restore the Left [Kidney] Pill).^{120,121}

- **Respiratory disorders:** Some yin-tonifying formulas have been used effectively to treat lung disorders. For example, *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) has been used for bronchial asthma,¹²² *Da Bu Yin Wan* (Great Tonify the Yin Pill) has been used for pulmonary tuberculosis,¹²³ and *Bu Fei E Jiao Tang* (Tonify the Lung Decoction with Ass-Hide Gelatin) has been used to treat cough due to various causes, such as asthma, bronchiectasis, bronchitis, pulmonary tuberculosis, and whooping cough.¹²⁴
- **Gastrointestinal disorders:** Some yin-tonifying formulas have been used successfully to treat gastrointestinal disorders, such as atrophic gastritis,^{125,126} peptic ulcer,¹²⁷ and chronic esophagitis.¹²⁸ The mechanism of action has been attributed in part to enhanced protection of the gastric mucosa.¹²⁹ Exemplar formulas include *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) and *Yi Guan Jian* (Linking Decoction).
- **Diabetes mellitus:** Many yin-tonifying formulas successfully treat diabetes mellitus. Pharmacologically, these formulas effectively decrease plasma glucose levels.¹³⁰ Furthermore, some of these formulas continue to exert hypoglycemic effects in cases in which the pancreas has been surgically removed.¹³¹ Clinically, formulas that have been used successfully in the treatment of diabetes mellitus include *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia),¹³² *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill),¹³³ and *Mai Wei Di Huang Wan* (Ophiopogonis, Schisandra, and Rehmannia Pill).¹³⁴
- **Hypertension:** Many yin-tonifying formulas have a marked influence on the cardiovascular system. Specifically, formulas that have been used to treat hypertension include *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia),¹³⁵ *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill),¹³⁶ *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill),^{137,138} and *Yi Guan Jian* (Linking Decoction).¹³⁹
- **Kidney disorders:** Some yin-tonifying formulas have shown nephroprotective effects, such as increasing blood perfusion to the kidneys, improving kidney function, and reducing the presence of protein and uric acid in the urine.¹⁴⁰ Clinically, *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) has been used to treat chronic nephritis,¹⁴¹ nephrotic syndrome,¹⁴² chronic renal failure,¹⁴³ and periodic paralysis.¹⁴⁴ *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill) has been used to treat nephrotic syndrome.¹⁴⁵ *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill) has been used to treat chronic nephritis.¹⁴⁶
- **Liver disorders:** Some yin-tonifying formulas have hepatoprotective effects against damage induced by such substances as carbon tetrachloride, thioacetamide, and prednisolone.^{147,148,149} Clinically, *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) has been used to treat chronic hepatitis,¹⁵⁰ *Er Zhi Wan* (Two-Ultimate Pill) for hepatitis B,¹⁵¹ and *Yi Guan Jian* (Linking Decoction) for liver disease such as hepatitis, liver cirrhosis, and liver cancer.^{152,153}
- **Thyroid disorders:** *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) has been used successfully to treat hyperthyroidism and thyroid adenoma.^{154,155} *Yi Guan Jian* (Linking Decoction) has been used to treat hyperthyroidism.¹⁵⁶

5. Yang-tonifying formulas mainly treat sexual, reproductive, prostate, and kidney disorders.

- **Sexual and reproductive disorders:** Many yang-tonifying formulas have marked effects in treating sexual and reproductive disorders including sexual dysfunction,¹⁵⁷ male infertility,^{158,159} and female infertility.^{160,161} The pharmacological effects have been attributed in part to the stimulation and regulation of both male and female sex hormones.¹⁶² Exemplar formulas include *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia), *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living), and *Zuo Gui Wan* (Restore the Left [Kidney] Pill).

Chapter 8 — Overview

- **Prostate disorders:** Prostatic hypertrophy has been treated successfully with Kidney yang tonic formulas, such as *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet) and *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).^{163,164,165}
- **Urinary disorders:** Yang-tonifying formulas are effective in treating urinary disorders (with or without enlarged prostate), such as dysuria,¹⁶⁶ frequent urination,¹⁶⁷ and urinary incontinence.¹⁶⁸ Representative formulas include *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet) and *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).
- **Kidney disorders:** Some yang-tonifying formulas treat kidney disorders. *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet) has been used to treat chronic glomerulonephritis.¹⁶⁹ *You Gui Dan* (Restore the Right [Kidney] Pill) and *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living) have been used to treat nephrotic syndrome.^{170,171}

6. Yin- and yang-tonifying formulas, as the name implies, treat concurrent yin and yang deficiencies. Two exemplar formulas, *Gui Lu Er Xian Jiao* (Tortoise Shell and Deer Antler Syrup) and *Qi Bao Mei Ran Dan* (Seven-Treasure Special Pill for Beautiful Whiskers), treat a wide variety of disorders of yin and yang deficiencies, such as impotence,¹⁷² male infertility,¹⁷³ and osteoporosis.^{174,175}

Section 1

补气剂

— Qi-Tonifying Formulas

Sì Jūn Zǐ Tāng (Four-Gentlemen Decoction)

四君子湯

四君子汤

Pinyin Name: *Si Jun Zi Tang*

Literal Name: Four-Gentlemen Decoction

Alternate Names: *Szu Chun Tzu Tang*, *Si Jung Zi Tang*, Four Major Herb Decoction, Major Four Herb CombinationOriginal Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	[9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	[9g]
<i>Fu Ling</i> (Poria)	[9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	[6g]

DOSAGE / PREPARATION / ADMINISTRATION

Grind equal amounts of the ingredients into a fine powder. Cook 6g of the powder in one large bowl of water until the liquid is reduced to 70%. The decoction may be taken any time during the day with an additional small pinch of salt. A small amount of *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) may also be added to harmonize the formula.¹ Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi
2. Strengthens the Spleen

CLINICAL MANIFESTATIONS

Spleen and Stomach qi deficiencies: a pale face, a sallow complexion, a low voice, lassitude, weakness of the extremities, poor appetite, loose stools, a pale tongue, and a fine, moderate pulse.

CLINICAL APPLICATIONS

Chronic fatigue syndrome, chronic gastritis, peptic ulcer disease, gastroptosis, ulcerative colitis, irritable bowel syndrome, epigastric or abdominal pain, premenstrual

syndrome, menstrual bleeding, chronic tonsillitis, and chronic hepatitis.

EXPLANATION

The Spleen and Stomach are the source of postnatal qi, as they are the most important organs for extracting nutrients and producing qi and blood. However, the Spleen and Stomach may be injured by an inappropriate diet or overwork. If these two organs become deficient and their digestive functions are affected, then the amount of qi produced would not be adequate. Lack of nourishment and qi deficiency render the face pale, produce a low voice, and bring about lassitude. Poor appetite is the result of an impaired digestive system. Loose stools are the result of the Spleen's inability to direct clear yang and water fluid to the upper *jiao*. Since the Spleen is related to the muscles, Spleen deficiency can result in weakness of the extremities. A pale tongue and a fine, moderate pulse are common signs of qi deficiency.

Si Jun Zi Tang (Four-Gentlemen Decoction) contains *Ren Shen* (Radix et Rhizoma Ginseng) as the chief herb because it greatly tonifies *yuan* (source) *qi*, strengthens the Spleen, and nourishes the Stomach. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), the deputy herb, tonifies

Sì Jūn Zǐ Tāng (Four-Gentlemen Decoction)

Si Jun Zi Tang (Four-Gentlemen Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spleen and Stomach qi deficiencies	<ul style="list-style-type: none"> Pale face, a sallow complexion, a low voice, and lassitude: Spleen and Stomach qi deficiencies and lack of nourishment Loose stools: Spleen unable to guide clear yang upward Pale tongue and a fine, moderate pulse: qi deficiency 	<ul style="list-style-type: none"> Tonifies qi Strengthens the Spleen 	<ul style="list-style-type: none"> <i>Ren Shen</i> (Radix et Rhizoma Ginseng) greatly tonifies <i>yuan</i> (source) <i>qi</i>, strengthens the Spleen, and nourishes the Stomach. <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) tonifies Spleen qi and dries dampness in the middle <i>jiao</i>. <i>Fu Ling</i> (Poria) tonifies the middle <i>jiao</i> and dispels dampness. <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies Spleen qi and harmonizes the herbs.

Spleen qi and dries dampness in the middle *jiao*. *Fu Ling* (Poria), the assistant, tonifies the middle *jiao* and dispels dampness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), the envoy herb, tonifies Spleen qi and harmonizes the herbs.

Si Jun Zi Tang is a simple, yet extremely effective formula to tonify qi. It serves as the foundation for many qi-tonifying formulas that tonify the Spleen and nourish the Stomach to enable the production of qi and blood.

MODIFICATIONS

- For severe Spleen and Stomach qi deficiencies, add *Huang Qi* (Radix Astragali) and *Shan Yao* (Rhizoma Dioscoreae).
- If there is tidal fever due to Spleen deficiency, add *Chai Hu* (Radix Bupleuri) and *Bai Shao* (Radix Paeoniae Alba).
- With insomnia due to fear and fright, add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Suan Zao Ren* (Semen Ziziphi Spinosa).
- With constipation due to qi deficiency, add *Dang Gui* (Radix Angelicae Sinensis) and *Huo Ma Ren* (Fructus Cannabis).
- With diarrhea due to deficiency and cold in the middle *jiao*, add *Li Zhong Tang* (Regulate the Middle Decoction).
- With postpartum diarrhea, add *Wu Mei* (Fructus Mume) and *Chen Pi* (Pericarpium Citri Reticulatae).
- With constant loose stools or diarrhea, add *He Zi* (Fructus Chebulae).
- For hemorrhoids, add *Huang Qi* (Radix Astragali) and *Bai Bian Dou* (Semen Lablab Album).
- With low-grade fever due to chronic illness and deficiency, add *Gui Zhi* (Ramulus Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With edema due to Spleen deficiency, add *Yi Yi Ren* (Semen Coicis), *Ze Xie* (Rhizoma Alismatis), and *Gui Zhi* (Ramulus Cinnamomi).

- With qi and blood deficiencies, combine with *Si Wu Tang* (Four-Substance Decoction).
- For *gan ji* (infantile malnutrition) caused by yin deficiency, add *Gou Qi Zi* (Fructus Lycii) and *Nu Zhen Zi* (Fructus Ligustri Lucidi).
- For *gan ji* (infantile malnutrition) caused by food stagnation, add *Mai Ya* (Fructus Hordei Germinatus).

CAUTIONS / CONTRAINDICATIONS

- Si Jun Zi Tang*, while gentle, is slightly warm. Long-term use of this formula may cause a dry mouth, dry tongue, thirst, or irritability.
- This formula should be used with caution, or avoid in patients who have high fever, yin-deficient heat, excess heat, qi stagnation, body fluid deficiency, irritability, thirst, or constipation.

PHARMACOLOGICAL EFFECTS

- General:** Administration of *Si Jun Zi Tang* has been associated with a general effect to improve the health and well being of animal subjects. In mice with artificially-induced "Spleen deficiency" characterized by such symptoms as low body temperature, weight loss, decreased food intake, diarrhea, and inability to tolerate cold, ingestion of the formula reversed the symptoms and improved the overall health.²
- Gastrointestinal:** According to laboratory experiments in rabbits, administration of *Si Jun Zi Tang* was associated with a regulatory effect on the intestines. Depending on the condition of the subject, it either increased or decreased intestinal peristalsis.³
- Immunostimulant:** Administration of *Si Jun Zi Tang* was associated with an increase in T-lymphocytes, NK cells, and phagocytic activity of the macrophages.^{4,5,6}
- Antineoplastic:** Administration of *Si Jun Zi Tang* was associated with an inhibitory effect on tumor cells in mice with esophageal and lung cancer.⁷

Sì Jūn Zǐ Tāng (Four-Gentlemen Decoction)

5. **Hematopoietic:** Administration of *Si Jun Zi Tang* in decoction for one week was associated with an increase in both white and red blood cells in rats.⁸
6. **Radioprotective:** One study reported recovery of the hematopoietic system in whole-body irradiated mice using *Si Jun Zi Tang*. Specific beneficial effects included an increase of leukocytes, erythrocytes, thrombocytes, and hematocrit. Moreover, the radioprotective function was more effective for leukocytes and thrombocytes than other hematocytes.⁹

CLINICAL STUDIES AND RESEARCH

1. **Chronic gastritis:** In one clinical study, 32 patients with chronic superficial gastritis were treated with modified *Si Jun Zi Tang* with good results. Out of 32 patients, 24 reported resolution of symptoms within 10 days, and 8 within 20 days. The formula used included the addition of *Zhi Qiao* (Fructus Aurantii), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Huang Qi* (Radix Astragali), and others as deemed necessary.¹⁰
2. **Peptic ulcer disease:** One study of 126 peptic ulcer patients reported 97.6% effectiveness using *Si Jun Zi Tang* plus *Huang Qi* (Radix Astragali), *San Leng* (Rhizoma Sparganii), and *Hai Piao Xiao* (Endoconcha Sepiae) as the base formula, with the addition of *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba), and *Zhi Zi* (Fructus Gardeniae) for Liver stagnation with Spleen deficiency; and *Si Ni San* (Frigid Extremities Powder) for Liver and Stomach disharmony. The treatment protocol was to give the herbs in decoction twice daily for 4-8 weeks per course of treatment.¹¹ In another report, 115 patients with peptic ulcer characterized by Spleen deficiency were treated with *Si Jun Zi Tang* with satisfactory results. *Fu Long Gan* (Terra Flava Usta) and *Bai Ji* (Rhizoma Bletillae) were added for individuals with bleeding ulcer. The overall effectiveness was 92.8%.¹²
3. **Ulcerative colitis:** Sixty patients with chronic ulcerative colitis were treated with herbs with complete recovery in 40 patients, significant improvement in 13 patients, moderate improvement in 5 patients, and no effect in 2 patients. The herbal treatment included *Si Jun Zi Tang* plus *Huang Qi* (Radix Astragali), *Dang Gui* (Radix Angelicae Sinensis), *Yan Hu Suo* (Rhizoma Corydalis), and others as deemed necessary. The herbs were made into pills, and were given three times daily.¹³
4. **Irritable bowel syndrome (IBS):** One study reported 92.9% effectiveness using modified *Si Jun Zi Tang* to treat irritable bowel syndrome. Of 57 patients, the study reported significant improvement in 39 patients, moderate improvement in 14 patients, and no change in 4 patients. The base herbal formula included *Si Jun Zi Tang* plus *Pao Jiang* (Rhizoma Zingiberis Praeparatum), *Qin Pi* (Cortex Fraxini), and *Mu Xiang* (Radix Aucklandiae). Modifications were made by adding *Bai Shao* (Radix Paeoniae Alba) and *Yan Hu Suo* (Rhizoma Corydalis) for abdominal pain; *Chen Pi* (Pericarpium Citri Reticulatae) and dry-fried *Fang Feng* (Radix Saposhnikoviae) for abdominal pain causing urgent bowel movements; *Da Fu Pi* (Pericarpium Arecae) and *Zhi Qiao* (Fructus Aurantii) for feeling of incomplete evacuation after defecation; *Bai Tou Weng* (Radix Pulsatillae) and *Da Xue Teng* (Caulis Sargentodoxae) for mucus in the stools; *Cang Zhu* (Rhizoma Atractylodis) for profuse white mucus; *Di Yu* (Radix Sanguisorbae) and charred *Jin Yin Hua* (Flos Lonicerae Japonicae) for hematochezia; *Bu Gu Zhi* (Fructus Psoraleae) and *Rou Dou Kou* (Semen Myristicae) for 5 a.m. diarrhea; *Wu Bei Zi* (Galla Chinensis) and roasted *He Zi* (Fructus Chebulae) for frequent bowel movements with loose stools; *Rou Cong Rong* (Herba Cistanches) for constipation with yang deficiency; and *Shi Xiao San* (Sudden Smile Powder) for blood stagnation. The treatment protocol was to cook the herbs in water, and drink the decoction in three equally-divided doses daily.¹⁴
5. **Epigastric or abdominal pain:** Patients with epigastric or abdominal pain characterized by Spleen qi deficiency were treated with *Si Jun Zi Tang*. Out of 125 patients, the study reported recovery in 86 patients, significant improvement in 22 patients, and slight improvement in 17 patients.¹⁵
6. **Premenstrual syndrome (PMS):** In one report, 50 patients with PMS were treated with modified *Si Jun Zi Tang* with significant results in 31 patients, moderate results in 15 patients, slight improvement in 2 patients, and no effect in 2 patients. The treatment protocol was to administer the herbs in decoction daily before and during menstruation. The formula included the addition of *Huang Qi* (Radix Astragali) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).¹⁶
7. **Menstrual bleeding:** In one case report, a patient with a two-year history of profuse menstrual bleeding due to qi deficiency responded well to herbal treatment. The herbs included *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Huang Qi* (Radix Astragali). *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) were used at a larger dose.¹⁷
8. **Chronic tonsillitis:** Twenty children with chronic tonsillitis were treated with modified *Si Jun Zi Tang* with recovery in 12 patients, significant improvement in 6 patients, slight improvement in 1 case, and no effect in 1 case. The average length of treatment was 5 days. The formula included the addition of *Huang Qi* (Radix Astragali) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).¹⁸
9. **Chronic hepatitis:** One hundred patients with chronic hepatitis were treated with complete recovery in 61 patients,

Sì Jūn Zǐ Tāng (Four-Gentlemen Decoction)

improvement in 31 patients, and no benefit in 8 patients. The treatment protocol was to administer 40-60 packs of herbs in decoction. The herbal formulas included *Si Jun Zi Tang* plus *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Chai Hu* (Radix Bupleuri), and others as follows: *Huang Qi* (Radix Astragali) for qi deficiency; *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and charred *Mai Ya* (Fructus Hordei Germinatus) for indigestion and poor appetite; *Lian Zi* (Semen Nelumbinis), *Shan Yao* (Rhizoma Dioscoreae), and *Ze Xie* (Rhizoma Alismatis) for loose stools; *Yan Hu Suo* (Rhizoma Corydalis) and *Yu Jin* (Radix Curcumae) for hypochondriac pain; *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Bie Jia* (Carapax Trionycis) for splenomegaly and hepatomegaly; *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Yi Mu Cao* (Herba Leonuri) for blood stagnation; *Fo Shou* (Fructus Citri Sarcodactylis) and *Xiang Yuan* (Fructus Citri) for qi stagnation; *Yin Chen* (Herba Artemisiae Scopariae) for jaundice; and *Shi Hu* (Caulis Dendrobii), *Yu Zhu* (Rhizoma Polygonati Odorati), and *Xuan Shen* (Radix Scrophulariae) for yin deficiency.¹⁹

RELATED FORMULAS

Yi Gong San (Extraordinary Merit Powder)

異功散
异功散

Pinyin Name: Yi Gong San

Literal Name: Extraordinary Merit Powder

Original Source: *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns) by Qian Yi in 1119

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	[6-9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	[6-9g]
<i>Fu Ling</i> (Poria)	[6-9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	[3-6g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	[6-9g]

The source text states to grind equal amounts of the ingredients into a fine powder. Cook 6g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 2 pieces of *Da Zao* (Fructus Jujubae) in one large bowl of water until the liquid is reduced to 70%. Take the warm, strained decoction before meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Yi Gong San (Extraordinary Merit Powder) is composed of *Si Jun Zi Tang* plus *Chen Pi* (Pericarpium Citri Reticulatae). This formula tonifies and regulates qi, strengthens the Spleen, and harmonizes the Stomach. It is often

used for patients with Spleen and Stomach deficiencies accompanied by qi stagnation, and characterized by such symptoms as poor appetite, fullness and discomfort of the chest and epigastrium, vomiting, and diarrhea.

Bǎo Yuán Tāng (Preserve the Basal Decoction)

保元湯

保元汤

Pinyin Name: Bao Yuan Tang

Literal Name: Preserve the Basal Decoction

Original Source: *Bo Ai Xin Jian* (Manual of Universal Lover from the Heart) by Wei Zhi in 1525

<i>Huang Qi</i> (Radix Astragali)	6-9g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6-9g
<i>Rou Gui</i> (Cortex Cinnamomi)	1.5-2.1g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	3g

Cook the herbs with 1 slice of *Sheng Jiang* (Rhizoma Zingiberis Recens) in water. Take the strained decoction while warm.

Bao Yuan Tang (Preserve the Basal Decoction) tonifies qi and warms yang. This formula is generally used for patients with Spleen and Stomach qi deficiencies, accompanied by the presence of cold and insufficiency of yang. Clinically, this formula also may be prescribed for children with chicken pox characterized by yang and *yuan* (source) qi deficiencies, with symptoms such as lethargy, weakness, and intolerance to cold.

Bao Yuan Tang may be literally translated as "Preserve the Basal Decoction" or "Preserve the *Yuan* (Source) Qi Decoction." *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) are used to effectively tonify *zhong* (central) qi and *yuan* (source) qi. *Rou Gui* (Cortex Cinnamomi) is added to warm yang, dispel cold, and enhance the overall qi-tonifying effect.

AUTHORS' COMMENTS

Si Jun Zi Tang is the representative formula for tonifying Spleen and Stomach qi deficiencies. It treats Spleen and Stomach qi deficiencies due to various causes or with various complications, as long as it is modified accordingly.

Si Jun Zi Tang tonifies qi to treat signs and symptoms such as pale and sallow complexion, feeble voice, weak extremities, and a weak pulse. This formula uses *Ren Shen* (Radix et Rhizoma Ginseng), a warm and sweet herb, to tonify Spleen and Stomach qi. *Bai Zhu* (Rhizoma Atractylodis

Si Jūn Zǐ Tāng (Four-Gentlemen Decoction)

Macrocephalae) and *Fu Ling* (Poria) tonify Spleen and drains dampness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) is warm and sweet, and has functions to harmonize the middle *jiao* and tonify the qi. These four herbs have gentle properties, they are not too hot, not too dry, and are unlikely to create any side effects or adverse reactions, hence the name, Four Gentlemen.

Spleen and Stomach is the root of post-natal qi, and the origin of qi and blood genesis. Only if these two organs are strong with good digestive function, can all organs, and the rest of the body be nourished, healthy, and be free of illnesses. Therefore, *Si Jun Zi Tang* can be modified according to different conditions of cold, heat, excess or deficiency to tonify Spleen and Stomach qi, for the purpose of promoting overall bodily functions. Therefore, *Si Jun Zi Tang* is the basic formula for tonifying qi.

Si Jun Zi Tang and *Li Zhong Wan* (Regulate the Middle Pill) both treat Spleen qi deficiency with poor appetite, diarrhea, and other signs and symptoms. Both formulas contain qi-tonifying herbs such as *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle). Although similar, their differences are as follows:

- *Si Jun Zi Tang* is indicated for Spleen qi deficiency, characterized by a sallow complexion, poor appetite, decreased food intake, fatigue, a pale tongue, and a fine, moderate pulse.
- *Li Zhong Wan* is for deficiency and cold of the middle *jiao* (Spleen and Stomach), characterized by abdominal pain,

vomiting, diarrhea, polyuria, cold limbs, intolerance to cold, and a deep and fine pulse.²⁰

Liu Jūn Zǐ Tāng (Six-Gentlemen Decoction)

六君子湯

六君子汤

Pinyin Name: *Liu Jun Zi Tang*

Literal Name: Six-Gentlemen Decoction

Alternate Names: *Liu Chun Tzu Tang* (Wan), Six Major Herb Decoction (Pill), Six Gentlemen Decoction (Pill), Major Six Herb Combination

Original Source: *Fu Ren Liang Fang* (Fine Formulas for Women) by Chen Zi-Ming in 1237

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6g [9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	6g [9g]
<i>Fu Ling</i> (Poria)	6g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	3g [6g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	3g [9g]
<i>Ban Xia</i> (Rhizoma Pinelliae)	3g [12g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction with the addition of small amounts of *Sheng Jiang* (Rhizoma Zingiberis Recens) (3 slices) and *Da Zao* (Fructus Jujubae) (2 pieces). Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen and Stomach
2. Regulates qi and stops vomiting

CLINICAL MANIFESTATIONS

Spleen and Stomach qi deficiencies accompanied by dampness and phlegm: lack of appetite, loose stools, nausea, vomiting, a feeling of oppression and distention in the chest and epigastrium, coughing, and profuse, white, watery phlegm.

CLINICAL APPLICATIONS

Gastrointestinal disorders, abdominal pain, gastritis, chronic gastritis, gastric ulcer, duodenal ulcer, stomach prolapse, gastroptosis, indigestion, diarrhea, nausea, vomiting, morning sickness, stomach cancer, supportive treatment during chemotherapy, chronic bronchitis, stomatitis, pain in liver cancer, stress and depression, and neurasthenia.

EXPLANATION

Liu Jun Zi Tang (Six-Gentlemen Decoction) is derived from *Si Jun Zi Tang* (Four-Gentlemen Decoction) with the addition of *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae). It treats Spleen and Stomach deficiencies accompanied by damp and phlegm accumulation. Spleen and Stomach deficiencies may cause indigestion, leading to loss of appetite and loose stools.

Liu Jun Zi Tang (Six-Gentlemen Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spleen and Stomach qi deficiencies accompanied by dampness and phlegm	<ul style="list-style-type: none">• Indigestion, loss of appetite, and loose stools: Spleen and Stomach deficiencies• Nausea and vomiting: reversed Stomach qi circulation due to damp accumulation• Coughing, and oppression and distention in the chest and epigastrium: obstructed Lung qi circulation due to damp accumulation• Profuse, white, watery phlegm: damp and phlegm accumulation	<ul style="list-style-type: none">• Strengthens the Spleen and Stomach• Regulates qi and stops vomiting	<ul style="list-style-type: none">• <i>Si Jun Zi Tang</i> (Four-Gentlemen Decoction) tonifies qi and strengthens the Spleen and Stomach.• <i>Chen Pi</i> (Pericarpium Citri Reticulatae) dries dampness and regulates Lung qi to reduce profuse phlegm.• <i>Ban Xia</i> (Rhizoma Pinelliae) breaks up qi stagnation to relieve chest stuffiness, and redirects rebellious Stomach qi to relieve nausea and vomiting.

Liù Jūn Zǐ Tāng (Six-Gentlemen Decoction)

Damp accumulation may block the normal descension of Stomach qi and cause qi reversal, manifesting as nausea and vomiting. When the Spleen produces dampness, it is stored in the Lung. If dampness stagnates in the chest and interrupts the flow of Lung qi, coughing and oppression and distention in the chest and epigastrium may occur. Profuse, white, watery phlegm indicates damp and phlegm accumulation inside the body.

Ren Shen (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify Spleen and Stomach qi, as explained in the section on *Si Jun Zi Tang* (Four-Gentlemen Decoction). *Chen Pi* (Pericarpium Citri Reticulatae) dries dampness and regulates Lung qi to reduce the profuse phlegm. *Ban Xia* (Rhizoma Pinelliae) breaks up qi stagnation to relieve chest stuffiness, and redirects rebellious Stomach qi to relieve nausea and vomiting.

MODIFICATIONS

- For deficiency and cold of the Spleen and Stomach, add *Wu Zhu Yu* (Fructus Evodiae), *Pao Jiang* (Rhizoma Zingiberis Praeparatum), and *Rou Gui* (Cortex Cinnamomi).
- If there is yang deficiency of the Spleen and Kidney, add *Bu Gu Zhi* (Fructus Psoraleae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- For diarrhea due to Spleen deficiency, add *Shan Yao* (Rhizoma Dioscoreae) and *Qian Shi* (Semen Euryales).
- For diarrhea caused by deficiency and cold in the middle jiao, add *Li Zhong Tang* (Regulate the Middle Decoction).
- For hemorrhoids, add *Huang Qi* (Radix Astragali) and *Bai Bian Dou* (Semen Lablab Album).
- With mucus in the stools, add *Ge Gen* (Radix Puerariae Lobatae), *Bai Shao* (Radix Paeoniae Alba), and *Mu Xiang* (Radix Aucklandiae).
- With abdominal pain and cramps due to Spleen deficiency, add *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba), and *Dang Gui* (Radix Angelicae Sinensis).
- If there is lack of appetite, add *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Mai Ya* (Fructus Hordei Germinatus).
- If there are exterior signs and symptoms, add *Fang Feng* (Radix Saposhnikoviae) and *Zi Su Ye* (Folium Perillae).
- With generalized blood deficiency in women, add *Si Wu Tang* (Four-Substance Decoction).
- With generalized deficiency after recovery from an illness, combine with *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).
- For *gan ji* (infantile malnutrition) caused by yin deficiency, add *Gou Qi Zi* (Fructus Lycii) and *Nu Zhen Zi* (Fructus Ligustri Lucidi).

- For *gan ji* (infantile malnutrition) caused by food stagnation, add *Mai Ya* (Fructus Hordei Germinatus).

CAUTIONS / CONTRAINDICATIONS

- *Liu Jun Zi Tang*, although gentle, is slightly warm. Long-term use of this formula may cause dry mouth, dry tongue, thirst, or irritability.
- This formula should be used with caution, or avoid in patients who have high fever, yin-deficient heat, excess heat, qi stagnation, body fluid deficiency, irritability, thirst, or constipation.
- Avoid cold or raw, pungent or spicy, and oily or greasy foods while taking this formula.¹

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** According to laboratory experiments in rabbits, administration of *Liu Jun Zi Tang* was associated with regulatory effects on the intestines. Depending on the condition of the subject, it will either increase or decrease intestinal peristalsis.² According to another study, *Liu Jun Zi Tang* promoted adaptive relaxation and provided symptom relief in patients with functional dyspepsia.³ Lastly, one study reported *Liu Jun Zi Tang* to have a prokinetic action on gastric emptying to treat chronic dyspepsia.⁴ In regards to plasma levels of gut-regulated peptide, administration of *Liu Jun Zi Tang* caused significant increases in plasma somatostatin and gastrin levels at 60 to 240 minutes compared with a placebo group.⁵
2. **Gastroprotective:** In one study in rats, use of *Liu Jun Zi Tang* had a dose-dependent effect and significantly inhibited gastric mucosal damage caused by absolute ethanol at doses over 500 mg/kg. The mechanism of this gastroprotective effect occurred partly through nitric oxide, not through prostaglandins or sulfhydryls.⁶
3. **Antineoplastic:** Subcutaneous injection of a modified *Liu Jun Zi Tang* preparation, followed by oral ingestion for 20 days was determined to have an inhibitory effect on the growth of cancer cells in mice. The mechanisms of action were attributed to an increase of macrophages and natural killer (NK) cells.⁷

CLINICAL STUDIES AND RESEARCH

1. **Abdominal pain:** Patients with abdominal pain were treated with modified *Liu Jun Zi Tang* for 20 days. The causes of abdominal pain included chronic gastritis, gastric ulcer, and duodenal ulcer. The formula included the addition of *Yan Hu Suo* (Rhizoma Corydalis) and *Bai Shao* (Radix Paeoniae Alba). Out of 123 patients, the study reported significant improvement in 49 patients, moderate improvement in 65 patients, and no effect in 9 patients. The overall efficacy rate reported was 92.7%.⁸

Liù Jūn Zǐ Tāng (Six-Gentlemen Decoction)

2. **Morning sickness:** In one report, 93 pregnant women with nausea and vomiting were treated with good results using *Liu Jun Zi Tang* with the addition of *Sheng Jiang* (Rhizoma Zingiberis Recens), *Zhu Ru* (Caulis Bambusae in Taenia), and *Zi Su Geng* (Caulis Perillae). Most patients experienced relief with 2-4 packs of herbs, with some needing up to 14 packs.⁹
3. **Gastritis:** According to one study, administration of *Liu Jun Zi Tang* to 207 patients with acute or chronic gastritis was associated with significant improvement in 62.9% and moderate improvement in 82.3% of patients. The treatment protocol was to administer 2.5g of the herbs in powder form, three times a day before meals.¹⁰
4. **Bitter taste in chronic gastritis:** Administration of *Liu Jun Zi Tang* was found to be effective in relieving a bitter taste in the mouth in patients diagnosed with chronic gastritis. The herbal therapy was very effective in 12 (80%) of 15 patients, with improvement noted in the other 3 patients. The average duration of treatment was 24.7 days for the 12 patients who responded. The study indicated that this formula may be a good remedy for the symptom of a bitter taste in the mouth in patients with chronic gastritis.¹¹
5. **Duodenal ulcer:** Administration of modified *Liu Jun Zi Tang* was effective in treating 31 patients with duodenal ulcer. The herbal treatment contained *Liu Jun Zi Tang* plus *Yan Hu Suo* (Rhizoma Corydalis), *Hai Piao Xiao* (Endoconcha Sepiae), and *Bai Zhi* (Radix Angelicae Dahuricae) as the base formula. Additional modifications were made as follows: *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) for severe pain; *Huang Lian* (Rhizoma Coptidis) for acid reflux and belching; *Zuo Jin Wan* (Left Metal Pill) for a bitter taste in the mouth, dry mouth, and acid reflux; *Si Ni San* (Frigid Extremities Powder) for hypochondriac pain; *Zhi Shi* (Fructus Aurantii Immaturus) for epigastric fullness and distention; and *Di Yu* (Radix Sanguisorbae) for hematochezia. The duration of treatment was 30 days per course of treatment. Of 31 patients, 9 had complete recovery, 11 had significant improvement, 8 had moderate improvement, and 3 had no improvement. The overall rate of effectiveness was 90.3%.¹²
6. **Stomatitis:** Administration of modified *Liu Jun Zi Tang* was associated with 96.16% effectiveness in treating 130 patients with stomatitis. The treatment protocol was to administer the herbs in decoction daily, with duration of treatment ranging from 6-30 packs of herbs. In addition to the base formula, the herbal formula was modified as follows: *Huang Qi* (Radix Astragali) and *Sha Shen* (Radix Glehniae seu Adenophorae) were added for Stomach yin deficiency; charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), charred *Mai Ya* (Fructus Hordei Germinatus), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), and *Fo Shou* (Fructus Citri Sarcodactylis) for food stagnation in the middle *jiao* with acid reflux, nausea, and vomiting; *Bai Shao* (Radix Paeoniae Alba), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Mu Li* (Concha Ostreae) for severe pain with a dry mouth and bad breath; *Dang Gui* (Radix Angelicae Sinensis), *Rou Cong Rong* (Herba Cistanches), and *Che Qian Zi* (Semen Plantaginis) for dysuria and constipation; and *Huang Lian* (Rhizoma Coptidis), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Xuan Shen* (Radix Scrophulariae) for Heart fire rising. Of 130 patients, the study reported complete recovery in 84 patients, improvement in 41 patients, and no change in 5 patients.¹³
7. **Indigestion:** One study reported 90.0% rate of effectiveness using modified *Liu Jun Zi Tang* to treat indigestion in 60 patients. In addition to the base formula, herbs were added as follows: *Wu Yao* (Radix Linderae), *Mu Xiang* (Radix Aucklandiae), and *Sha Ren* (Fructus Amomi) for qi stagnation; *Zhu Ru* (Caulis Bambusae in Taenia), *Huang Lian* (Rhizoma Coptidis), and *Pu Gong Ying* (Herba Taraxaci) for damp-heat; *Chi Shao* (Radix Paeoniae Rubra), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Dang Gui Wei* (Extremities Radix Angelicae Sinensis) for chronic illness with blood stagnation, and processed *Huang Qi* (Radix Astragali) for qi deficiency. The duration of treatment was 30 days per course of treatment, for 2 courses total. Of 60 patients, the study reported complete recovery in 13 patients, significant improvement in 21 patients, moderate improvement in 14 patients, slight improvement in 6 patients, and no change in 6 patients.¹⁴
8. **Gastrointestinal disorder:** The use of *Liu Jun Zi Tang* has been associated with numerous benefits in treating gastrointestinal disorders, such as stomach prolapse, gastric pain, diarrhea, gastritis, and peptic ulcer.¹⁵
9. **Chronic bronchitis:** *Liu Jun Zi Tang* plus *Tu Si Zi* (Semen Cuscutae), *Wu Ling Zhi* (Faeces Troglodyteris), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) effectively treated chronic bronchitis characterized by Spleen deficiency and phlegm obstruction in the Lung. The patients received 1 pack of herbs per day for a month, for a total of 30 packs. Of 30 patients, the study reported 93.3% rate of effectiveness.¹⁶
10. **Pain from liver cancer:** One study reported 87.7% effectiveness in relieving pain in 65 patients with liver cancer. The herbal formula contained *Liu Jun Zi Tang* plus *Hou Po* (Cortex Magnoliae Officinalis), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Tu Bie Chong* (Eupolyphaga seu Steleophaga), *Shui Zhi* (Hirudo), *Wu Gong* (Scolopendra) and *Ma Qian Zi* (Semen Strychni).¹⁷
11. **Stress and depression:** One study evaluated the clinical usefulness of *Liu Jun Zi Tang* in the treatment of stress and depression by examining the modulatory effects of

Liù Jūn Zǐ Tāng (Six-Gentlemen Decoction)

the herbs on the hypothalamo-pituitary-adrenal axis and autonomic nervous functions. Of several formulas tested, three were found to affect plasma ACTH and cortisol levels under stress. The study stated that the modulatory effects of these formulas might be beneficial in treating stress-related disease. The three formulas that were found to be effective were *Liu Jun Zi Tang*, *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium), and *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction).¹⁸

HERB-DRUG INTERACTION

- **Chemotherapy-induced side effects:** Administration of *Liu Jun Zi Tang* showed effectiveness in alleviating gastrointestinal side effects associated with chemotherapy. The base formula included *Liu Jun Zi Tang* plus *Shen Qu* (Massa Fermentata), *Hou Po* (Cortex Magnoliae Officinalis), and *Shan Yao* (Rhizoma Dioscoreae). Modifications include the addition of *Huang Lian* (Rhizoma Coptidis), *Zhu Ru* (Caulis Bambusae in Taenia), and *Sheng Jiang* (Rhizoma Zingiberis Recens) for continuous nausea and vomiting; *Cang Zhu* (Rhizoma Atractylodis), *Pei Lan* (Herba Eupatorii), and *Zhi Qiao* (Fructus Aurantii) for a thick, greasy tongue coating; and *Huang Qi* (Radix Astragali), *Ji Xue Teng* (Caulis Spatholobi), and *Yin Yang Huo* (Herba Epimedii) for qi deficiency, fatigue, and low white blood cell count. Patients were given herbs three times daily until the end of their chemotherapy treatment. Of 74 patients, the study reported complete relief in 49 patients, improvement in 24 patients, and no effect in 1 case. The rate of effectiveness was 98.6%.¹⁹ In another study involving 110 patients on chemotherapy, use of *Liu Jun Zi Tang* plus *Huang Qi* (Radix Astragali) and *Yi Yi Ren* (Semen Coicis) was associated with relieving nausea and vomiting, and increased white blood cell count.²⁰
- **Levofloxacin:** In a study of 8 healthy subjects, co-administrations of levofloxacin and *Liu Jun Zi Tang* did not cause any significant differences in any pharmacokinetic parameters, urinary recovery and renal clearance of levofloxacin. The study concluded that *Liu Jun Zi Tang* did not have a significant effect on the rate and extent of bioavailability, or renal excretion of levofloxacin.²¹
- **Ofloxacin:** A study of 7 volunteers in an open, random crossover fashion found no significant effect on the rate and extent of bioavailability of ofloxacin with co-administrations of *Liu Jun Zi Tang*, *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), or *Chai Ling Tang* (Bupleurum and Poria Decoction).²²

TOXICOLOGY

Use of *Liu Jun Zi Tang* has been associated with one case of pneumonitis in a 79-year-old woman who complained

of dry cough and dyspnea on exertion after taking the herbs. At the time of publication, this is the only case of pulmonary hypersensitivity due to *Liu Jun Zi Tang* reported in the world.²³

Xiāng Shā Liù Jūn Zǐ Tāng

(Six-Gentlemen Decoction with Aucklandia and Amomum)

香砂六君子湯

香砂六君子湯

Pinyin Name: *Xiang Sha Liu Jun Zi Tang*

Literal Name: Six-Gentlemen Decoction with Aucklandia and Amomum

Alternate Names: *Hsiang Sha Liu Chun Tzu Tang*, Aucklandia and Amomum Gentlemen Decoction, Saussurea and Six-Major-Herb Decoction, Vladimiria and Cardamon Combination, Saussurea and Cardamon Combination

Original Source: *Gu Jin Ming Fang* (Famous Classic and Contemporary Formulas) by Luo Mei in 1675

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	3g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	6g
<i>Fu Ling</i> (Poria)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	2.1g
<i>Ban Xia</i> (Rhizoma Pinelliae)	3g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	2.4g
<i>Mu Xiang</i> (Radix Aucklandiae)	2.1g
<i>Sha Ren</i> (Fructus Amomi)	2.4g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction with 6g of *Sheng Jiang* (Rhizoma Zingiberis Recens).

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi, strengthens the Spleen, and harmonizes the Stomach
2. Regulates qi and warms the middle *jiao*

CLINICAL MANIFESTATIONS

Spleen and Stomach qi deficiencies accompanied by cold and damp stagnation in the middle *jiao*: loss of appetite, belching, fullness and/or pain of the abdomen and epigastrium, vomiting, and loose stools.

CLINICAL APPLICATIONS

Gastritis, chronic gastritis, gastric and duodenal ulcer, gastroenteritis, gastroparesis, chronic atrophic gastritis, irritable bowel syndrome, stomatitis, post-surgical diarrhea, morning sickness, anorexia, liver cirrhosis, bronchitis, and bronchiectasis.

EXPLANATION

Xiang Sha Liu Jun Zi Tang (Six-Gentlemen Decoction with Aucklandia and Amomum) combines *Liu Jun Zi Tang* (Six-Gentlemen Decoction) with *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi) to treat deficiency of the middle *jiao* with cold and damp stagnation. Spleen and Stomach deficiencies weaken the digestive system, causing loss of appetite, belching, and general weakness. Damp accumulation and cold stagnation cause fullness

and pain in the abdomen and epigastrium. In addition, dampness and cold block Stomach qi from descending properly, causing vomiting. Moreover, as a result of Spleen deficiency, the normally ascending qi of the Spleen actually descends, resulting in loose stools or diarrhea.

Ren Shen (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), four herbs from *Si Jun Zi Tang* (Four-Gentlemen Decoction), tonify Spleen and Stomach qi. *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae) break up qi and damp stagnation, and correct the reversed flow of Stomach qi. *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi) warm the middle *jiao* and activate qi circulation to dissolve damp accumulation and relieve fullness and pain.

MODIFICATIONS

- With lack of appetite, add *Mai Ya* (Fructus Hordei Germinatus) and *Shan Zha* (Fructus Crataegi).
- If there is abdominal fullness due to deficiency and cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis).
- For Spleen and Stomach qi deficiencies, add *Huang Qi* (Radix Astragali) and *Shan Yao* (Rhizoma Dioscoreae).
- With nausea, vomiting, and food retention, add *Huo Xiang* (Herba Agastaches) and *Zhu Ru* (Caulis Bambusae in Taenia).
- With hot phlegm and qi deficiency, add ginger-processed *Huang Lian* (Rhizoma Coptidis).

Spleen and Stomach qi deficiencies accompanied by cold and damp stagnation in the middle <i>jiao</i>	<ul style="list-style-type: none">• Loss of appetite, belching, loose stools, and general weakness: Spleen and Stomach deficiencies• Chest pain and fullness: cold and damp accumulation in the Lung• Nausea and vomiting: cold and damp stagnation in the Stomach	<ul style="list-style-type: none">• Tonifies qi, strengthens the Spleen, and harmonizes the Stomach• Regulates qi and warms the middle <i>jiao</i>	<ul style="list-style-type: none">• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>Fu Ling</i> (Poria), and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify Spleen and Stomach qi.• <i>Ban Xia</i> (Rhizoma Pinelliae) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) break up qi and damp stagnation and correct the reversed flow of qi.• <i>Mu Xiang</i> (Radix Aucklandiae) and <i>Sha Ren</i> (Fructus Amomi) warm the middle <i>jiao</i>, activate qi circulation, and relieve fullness and pain.

- With cold phlegm and qi deficiency, add *Pao Jiang* (Rhizoma Zingiberis Praeparatum).
- With vomiting and diarrhea, combine with *Ping Wei San* (Calm the Stomach Powder).
- With vomiting and diarrhea due to summer-heat, combine with *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium).
- With vomiting and diarrhea due to deficiency and cold, combine with *Li Zhong Tang* (Regulate the Middle Decoction).

CAUTIONS / CONTRAINDICATIONS

Individuals taking *Xiang Sha Liu Jun Zi Tang* should avoid raw and cold foods.¹

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** According to laboratory experiments in rabbits, administration of *Xiang Sha Liu Jun Zi Tang* was associated with a regulatory effect on the intestines. Depending on the condition of the subject, it either increased or decreased intestinal peristalsis.²
2. **Antiulcer:** Administration of *Xiang Sha Liu Jun Zi Tang* was associated with a marked effect in preventing and treating stomach ulcer in rats. The mechanisms of action were attributed to promotion of normal stomach mucosa, and decreased production of gastric acid.³
3. **Immunostimulant:** Administration of *Xiang Sha Liu Jun Zi Tang* was associated with an increase of IgM, IgA, and T cells.^{4,5}

CLINICAL STUDIES AND RESEARCH

1. **Chronic atrophic gastritis:** *Xiang Sha Liu Jun Zi Tang* was used to treat patients with chronic atrophic gastritis characterized by deficiency and cold. Out of 25 cases, the study reported significant improvement with resolution of the symptoms in 18 cases, and moderate improvement

with slight pain in 7 cases.⁶ In another study, use of *Xiang Sha Liu Jun Zi Tang* plus *Shan Yao* (Rhizoma Dioscoreae) daily was associated with complete recovery in 12 of 14 patients with chronic atrophic gastritis characterized by Spleen qi deficiency.⁷

2. **Gastritis:** Use of *Xiang Sha Liu Jun Zi Tang* daily for 4 weeks per course of treatment was associated with marked effect to treat chronic gastritis in elderly patients. Of 23 patients, the study reported complete recovery in 9 cases, marked improvement in 12 cases, and no effect in 2 cases. The overall effectiveness was 91.3%.⁸
3. **Irritable bowel syndrome (IBS):** In one study, 40 patients with irritable bowel syndrome were treated with marked improvement in 18 cases, moderate improvement in 16 cases, and no effect in 6 cases. The herbal treatment included this formula plus *Yan Hu Suo* (Rhizoma Corydalis), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha). Furthermore, *Xiang Fu* (Rhizoma Cyperi) and *Yu Jin* (Radix Curcumae) were added for emotional distress; and *Pu Huang* (Pollen Typhae) and *Wu Ling Zhi* (Faeces Troglodyteri) were added for menstrual pain. The treatment protocol was to administer the herbs for 2 weeks per course of treatment, for 1-3 courses total.⁹
4. **Stomatitis:** In one report, 30 patients with recurrent stomatitis were treated with modified *Xiang Sha Liu Jun Zi Tang* in decoction with complete recovery in all patients. The length of treatment varied from 4-20 packs of herbs. The herbal treatment contained *Xiang Sha Liu Jun Zi Tang*, with the addition of *Zhi Zi* (Fructus Gardeniae) for diarrhea with preference for warm drinks; *Huang Lian* (Rhizoma Coptidis), *Zhu Ye* (Herba Phyllostachys), and *Di Huang* (Radix Rehmanniae) for red tongue tip from Heart fire rising; and the addition of *Mu Dan Pi* (Cortex Moutan) and removal of *Ren Shen* (Radix et Rhizoma Ginseng) for dry throat with a bitter taste in the mouth.¹⁰

Xiāng Shā Liù Jūn Zǐ Tāng

(Six-Gentlemen Decoction with Aucklandia and Amomum)

5. **Post-surgical diarrhea:** Administration of modified *Xiang Sha Liu Jun Zi Tang* was associated with 90.25% effectiveness in treating 113 patients with post-surgical diarrhea. The herbs were given in decoction daily for 2 weeks per course of treatment.¹¹
6. **Morning sickness:** Modified *Xiang Sha Liu Jun Zi Tang* was used to treat pregnant women with nausea and vomiting with good results. Out of 52 cases, the study reported complete recovery in 42 cases, improvement in 9 cases, and no benefit in 1 case. Most patients responded within 1-3 days of herbal therapy.¹²
7. **Anorexia:** Modified *Xiang Sha Liu Jun Zi Tang* was used to treat 33 children with anorexia with 94% effectiveness. The herbal treatment included this formula plus *Bing Lang* (Semen Arecae), *Lai Fu Zi* (Semen Raphani), charred *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), and charred *Shan Zha* (Fructus Crataegi). The treatment protocol was to administer the herbs daily, with 8 packs of herbs per course of treatment, followed by 3-5 days of rest, and then a second 8-pack course. Of 33 patients, the study reported marked effectiveness in 19 cases, moderate effectiveness in 12 cases, and no effect in 2 cases.¹³

TOXICOLOGY

In an acute toxicology study, oral ingestion of *Xiang Sha Liu Jun Zi Tang* in decoction at 0.4 mL/10g (equivalent to 80 g/kg of raw herbs) twice daily for 7 days did not cause any abnormal behavior in animal subjects. In fact, some subjects had an increase in body weight. The dose given to the subjects was equivalent to 434 times the normal adult dose in humans.¹⁴

RELATED FORMULA

<i>Ban Xia</i> (Rhizoma Pinelliae)	3g

Xiang Fu (Rhizoma Cyperi) 6g

Sha Ren (Fructus Amomi) 6g

This formula is composed by adding *Xiang Fu* (Rhizoma Cyperi) and *Sha Ren* (Fructus Amomi) to *Liu Jun Zi Tang* (Six-Gentlemen Decoction). This formula strengthens the Spleen, harmonizes the Stomach, regulates qi circulation, and stops pain. It treats Spleen and Stomach qi deficiencies accompanied by accumulation of cold and dampness in the middle *jiao*.

These two formulas above have identical Chinese characters and pinyin names. They also have very similar ingredients, doses, and functions.

- In the primary formula, “*Xiang*” refers to *Mu Xiang* (Radix Aucklandiae), a qi-regulating herb that treats qi stagnation of the Spleen and Stomach. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) is used to tonify qi and harmonize the formula.
- In the related formula, “*Xiang*” refers to *Xiang Fu* (Rhizoma Cyperi), a qi-regulating herb that treats qi stagnation in the Liver and *San Jiao*. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) is used to strongly tonify qi and harmonize the formula.

Shēn Líng Bái Zhú Sǎn

(Ginseng, Poria, and Atractylodes Macrocephala Powder)

參苓白朮散
参苓白朮散

Pinyin Name: *Shen Ling Bai Zhu San*

Literal Name: Ginseng, Poria, and Atractylodes Macrocephala Powder

Alternate Names: *Shen Ling Pai Chu San*, Ginseng, Poria and Bighead Atractylodes Powder; Ginseng and Atractylodes Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	960g [15g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	960g [15g]
<i>Fu Ling</i> (Poria)	960g [15g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae), <i>chao</i> (dry-fried)	960g [9g]
<i>Shan Yao</i> (Rhizoma Dioscoreae)	960g [15g]
<i>Lian Zi</i> (Semen Nelumbinis)	480g [9g]
<i>Bai Bian Dou</i> (Semen Lablab Album), <i>jin</i> (soaked) in ginger juice and <i>chao</i> (dry-fried)	720g [12g]
<i>Yi Yi Ren</i> (Semen Coicis)	480g [9g]
<i>Sha Ren</i> (Fructus Amomi)	480g [6g]
<i>Jie Geng</i> (Radix Platycodonis), <i>chao</i> (dry-fried) to dark brown	480g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder. Take 6g of the powder per dose with a decoction made from *Da Zao* (Fructus Jujubae). Adjust the dose accordingly for children. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and strengthens the Spleen
2. Resolves dampness and stops diarrhea

CLINICAL MANIFESTATIONS

Spleen and Stomach deficiencies with dampness: loose stools or diarrhea, vomiting, borborygmus, decreased

Shēn Líng Bái Zhú Sǎn

(Ginseng, Poria, and Atractylodes Macrocephala Powder)

appetite, weak extremities, weight loss, a sallow facial appearance, epigastric or chest fullness and a stifling sensation, a pale red tongue with a white tongue coating, and a fine, moderate or deficient, moderate pulse.

and distention. Dampness can also obstruct Stomach qi, causing nausea and vomiting. The tongue and pulse both suggest deficiency in the body.

CLINICAL APPLICATIONS

Superficial gastritis, chronic gastroenteritis, chronic diarrhea, infantile diarrhea, dyspepsia, duodenal ulcer, gastroptosis, chronic colitis, irritable bowel syndrome, proctitis, nephritis, hepatitis and liver cirrhosis, compromised immune system, supportive therapy for chemotherapy and radiation, debility after chronic illness, cognitive impairment, rhinitis, edema, and abnormal vaginal discharge.

EXPLANATION

Shen Ling Bai Zhu San (Ginseng, Poria, and Atractylodes Macrocephala Powder) treats Spleen and Stomach deficiencies with damp accumulation. The Spleen and Stomach are in charge of transforming and transporting nutrients; deficiency in these two organs weakens the digestive function. As a result, food travels quickly through the body without being properly digested or absorbed, hence giving rise to loose stools or diarrhea. A weak digestive system may result in decreased appetite, weak extremities, weight loss, and a sallow facial appearance. Spleen deficiency usually causes damp accumulation, which in turn obstructs Lung qi, causing epigastric or chest fullness

Ren Shen (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify qi and strengthen the Spleen and Stomach. *Shan Yao* (Rhizoma Dioscoreae) and *Lian Zi* (Semen Nelumbinis) treat diarrhea by assisting *Ren Shen* (Radix et Rhizoma Ginseng) in strengthening the Spleen and tonifying qi. *Bai Bian Dou* (Semen Lablab Album) and *Yi Yi Ren* (Semen Coicis) help *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) strengthen the Spleen and dispel dampness. *Sha Ren* (Fructus Amomi) awakens the Spleen and harmonizes the Stomach to regulate qi and resolve stagnation. *Jie Geng* (Radix Platycodonis) relieves chest fullness, and has an ascending function to help counteract diarrhea. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes both the middle *jiao* and the formula.

MODIFICATIONS

- For loose stools with abdominal pain due to cold, add *Gan Jiang* (Rhizoma Zingiberis) and *Rou Gui* (Cortex Cinnamomi).
- For loose stools with damp-heat, add *Huang Lian* (Rhizoma Coptidis), *Che Qian Zi* (Semen Plantaginis), and *Ze Xie* (Rhizoma Alismatis).

Shen Ling Bai Zhu San (Ginseng, Poria, and Atractylodes Macrocephala Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spleen and Stomach deficiencies with dampness	<ul style="list-style-type: none">• Diarrhea, borborygmus, decreased appetite, and a sallow facial appearance: Spleen and Stomach qi deficiencies• Weak extremities and weight loss: Spleen and Stomach qi deficiencies unable to nourish the body and limbs• Epigastric or chest fullness and distention: damp accumulation blocking Lung qi circulation• Nausea and vomiting: damp accumulation obstructing Stomach qi circulation• Pale tongue with white tongue coating: qi deficiency• Fine, moderate or deficient, moderate pulse: qi deficiency	<ul style="list-style-type: none">• Tonifies qi and strengthens the Spleen• Resolves dampness and stops diarrhea	<ul style="list-style-type: none">• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>Fu Ling</i> (Poria), and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify qi and strengthen the Spleen and Stomach.• <i>Shan Yao</i> (Rhizoma Dioscoreae) and <i>Lian Zi</i> (Semen Nelumbinis) strengthen the Spleen, tonify qi, and stop diarrhea.• <i>Bai Bian Dou</i> (Semen Lablab Album) and <i>Yi Yi Ren</i> (Semen Coicis) strengthen the Spleen and dispel dampness.• <i>Sha Ren</i> (Fructus Amomi) awakens the Spleen and harmonizes the Stomach to regulate qi and resolve stagnation.• <i>Jie Geng</i> (Radix Platycodonis) ventilates the Lung and relieves chest fullness.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the middle <i>jiao</i> and all the herbs.

Shēn Líng Bái Zhú Sǎn

(Ginseng, Poria, and Atractylodes Macrocephala Powder)

- With phlegm accumulation, add *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae).
- For constant diarrhea, add *Qian Shi* (Semen Euryales) and *Mu Xiang* (Radix Aucklandiae).
- With frequent urination, add *Yi Zhi* (Fructus Alpiniae Oxyphyllae).
- For food retention, vomiting, and diarrhea, combine with *Ping Wei San* (Calm the Stomach Powder).
- For indigestion in children, add dry-fried *Mai Ya* (Fructus Hordei Germinatus), *Shan Zha* (Fructus Crataegi), and *Shen Qu* (Massa Fermentata).

CAUTIONS / CONTRAINDICATIONS

- *Shen Ling Bai Zhu San* should be used with caution in the following conditions: yin-deficient fire and yin deficiency.
- Since this formula is slightly drying and warm in nature, it should be used with caution during pregnancy, and in patients with exterior or interior heat conditions.¹

PHARMACOLOGICAL EFFECTS

Gastrointestinal: According to laboratory experiments in rabbits, administration of *Shen Ling Bai Zhu San* was associated with a regulatory effect on the intestines. Depending on the condition of the subject, it either increased or decreased the intestinal peristalsis.²

CLINICAL STUDIES AND RESEARCH

1. **Superficial gastritis:** Use of modified *Shen Ling Bai Zhu San* in 32 patients with superficial gastritis was associated with 96.7% effectiveness. The herbal treatment contained *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Shan Yao* (Rhizoma Dioscoreae), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Bai Bian Dou* (Semen Lablab Album), *Bai Shao* (Radix Paeoniae Alba), *Yan Hu Suo* (Rhizoma Corydalis), *Yi Yi Ren* (Semen Coicis), *Sha Ren* (Fructus Amomi), *Ying Su Ke* (Pericarpium Papaveris), and *Bai Ji* (Rhizoma Bletillae). Furthermore, modifications were made by adding *Wu Zhu Yu* (Fructus Evodiae) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) for cold; *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), and *Huang Lian* (Rhizoma Coptidis) for Stomach heat; *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi) for deficiency and cold; *Shen Qu* (Massa Fermentata), *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus) for food stagnation; *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi) and *Dou Kou* (Fructus Amomi Rotundus) for qi stagnation; and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Mo Yao* (Myrrha), and *E Zhu* (Rhizoma Curcumae) for blood stagnation. Of 32 cases, the study reported complete recovery in 15 cases, significant improvement in 9 cases, moderate improvement in 7 cases, and no effect in 1 case.³
2. **Diarrhea:** In one clinical study, 95 patients with diarrhea (negative for microorganism infection) were treated with modified *Shen Ling Bai Zhu San*. In addition to this formula, *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) was given to patients with Spleen qi deficiency; *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle) for Spleen yang deficiency; and *Si Shen Wan* (Four-Miracle Pill) for Spleen and Kidney yang deficiency. Out of 95 cases, the study reported significant improvement in 27 cases, moderate improvement in 41 cases, and no effect in 27 cases. The overall rate of effectiveness was 71.6%.⁴
3. **Chronic colitis:** Use of modified *Shen Ling Bai Zhu San* one time daily in decoction showed good results in treating chronic colitis characterized by Spleen deficiency and dampness. Modifications to the base formula included addition of *Mu Xiang* (Radix Aucklandiae), dry-fried *Zhi Qiao* (Fructus Aurantii), and dry-fried *Lai Fu Zi* (Semen Raphani) for qi stagnation; dry-fried *Gu Ya* (Fructus Setariae Germinatus), dry-fried *Mai Ya* (Fructus Hordei Germinatus), dry-fried *Shen Qu* (Massa Fermentata), and charred *Shan Zha* (Fructus Crataegi) for diarrhea; *Xiang Fu* (Rhizoma Cyperi), *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), and vinegar-fried *Yan Hu Suo* (Rhizoma Corydalis) for abdominal pain; *Bu Gu Zhi* (Fructus Psoraleae), roasted *Rou Dou Kou* (Semen Myristicae), and salt-fried *Wu Zhu Yu* (Fructus Evodiae) for deficiency and cold of the Spleen and Kidney; and *Huang Qi* (Radix Astragali), *Chai Hu* (Radix Bupleuri), and *Sheng Ma* (Rhizoma Cimicifugae) for diarrhea and rectal prolapse due to qi collapse. Out of 60 cases, the study reported complete recovery in 38 cases, significant improvement in 14 cases, slight improvement in 6 cases, and no effect in 2 cases. The overall rate of effectiveness was 97%.⁵
4. **Irritable bowel syndrome (IBS):** Use of modified *Shen Ling Bai Zhu San* in 52 patients with irritable bowel syndrome was associated with 96.2% effectiveness. In addition to the base formula, modifications included addition of *Huang Qi* (Radix Astragali) and *He Zi* (Fructus Chebulae) for deficiency and weakness of the Spleen and Stomach; *Chai Hu* (Radix Bupleuri), *Yu Jin* (Radix Curcumae), and *Yan Hu Suo* (Rhizoma Corydalis) for Liver qi stagnation and Spleen deficiency; *Huang Lian* (Rhizoma Coptidis), *Pei Lan* (Herba Eupatorii), and *Bai Tou Weng* (Radix Pulsatillae) for Spleen deficiency with damp-heat; and *Bu Gu Zhi* (Fructus Psoraleae), *Rou Dou Kou* (Semen Myristicae), and *Wu Zhu Yu* (Fructus Evodiae)

Shēn Líng Bái Zhú Sǎn

(Ginseng, Poria, and Atractylodes Macrocephala Powder)

for Spleen and Kidney yang deficiency. The herbs were given in decoction daily, with duration of treatment ranging from 5-30 days (average of 18.1 days). Of 52 patients, the study reported complete recovery in 40 cases, improvement in 10 cases, and no effect in 2 cases.⁶

5. **Proctitis:** In one study, 12 patients with chronic proctitis were treated with *Shen Ling Bai Zhu San*, with complete recovery in 2 cases, remission in 4 cases, improvement in 5 cases, and no effect in 1 case. The overall rate of effectiveness was 91.67%. The herbal treatment contained *Shen Ling Bai Zhu San* plus *Sheng Ma* (Rhizoma Cimicifugae), *He Zi* (Fructus Chebulae), *Lian Zi* (Semen Nelumbinis), and *Wu Mei* (Fructus Mume). The treatment protocol was to cook the herbs and administer the decoction daily for 4 weeks.⁷
6. **Nephritis:** Administration of modified *Shen Ling Bai Zhu San* to 15 patients with nephritis was associated with significant improvement in 2 cases, moderate improvement in 4 cases, slight improvement in 2 cases, and no effect in 7 cases. Modifications to the original formula included the addition of *Di Huang* (Radix Rehmanniae), *Nu Zhen Zi* (Fructus Ligustri Lucidi), and *Gou Qi Zi* (Fructus Lycii) for nephritis characterized by Kidney yin deficiency; *Bai Mao Gen* (Rhizoma Imperatae), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Chi Shao* (Radix Paeoniae Rubra), *Chuan Xiong* (Rhizoma Chuanxiong), and *Yi Mu Cao* (Herba Leonuri) for hematuria; and *Jin Yin Hua* (Flos Lonicerae Japonicae), *Huang Qin* (Radix Scutellariae), *Yu Xing Cao* (Herba Houttuyniae), *Pu Gong Ying* (Herba Taraxaci), and *Da Qing Ye* (Folium Isatidis) for upper respiratory tract infection characterized by damp-heat. The herbs were cooked in water, and the decoction taken in two equally-divided doses daily.⁸
7. **Compromised immune system:** One study reported good results using modified *Shen Ling Bai Zhu San* to treat 48 patients with compromised immunity. In addition to the base formula, *Huang Qi* (Radix Astragali) was added for qi deficiency, *Chen Pi* (Pericarpium Citri Reticulatae) for qi stagnation, and *Yin Chen* (Herba Artemisiae Scopariae) for damp-heat. The treatment protocol was to administer the herbs in decoction one time daily, delivering 20 packs of herbs per course of treatment, for 1-3 courses total. The study reported gradual improvement over the courses of treatment, based on better tongue coating and normal pulse.⁹ (Note: Specific details were unavailable on rate of effectiveness, and subjective and objective improvements.)
8. **Cognitive impairment:** Use of modified *Shen Ling Bai Zhu San* was associated with improvement in 33 of 47 children (32 males and 15 females, between 1-5 years of age) with slow mental development. The herbal treatment contained this formula plus *Bu Gu Zhi* (Fructus Psoraleae), *Yi Zhi* (Fructus Alpiniae Oxyphyllae), *He Shou Wu* (Radix Polygoni Multiflori), and *Rou Cong Rong* (Herba Cistanches). The treatment protocol was to cook the herbs in water and administer the decoction daily, for 4 packs of herbs per course of treatment, for 1-3 courses.¹⁰
9. **Rhinitis:** Administration of modified *Shen Ling Bai Zhu San* was associated with 92.7% effectiveness in treating 68 children with chronic rhinitis. The herbal treatment contained this formula plus *Huang Qi* (Radix Astragali), *Cang Er Zi* (Fructus Xanthii), and *Bai Zhi* (Radix Angelicae Dahuricae). Furthermore, modifications were made by adding *Huang Qi* (Radix Astragali) and *Jin Yin Hua* (Flos Lonicerae Japonicae) for profuse, yellow, and sticky nasal discharge; *Xin Yi Hua* (Flos Magnoliae) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii) for severe nasal obstruction; *Tian Zhu Huang* (Concretio Silicea Bambusae), *Bai Jie Zi* (Semen Sinapis), and *Chen Pi* (Pericarpium Citri Reticulatae) for profuse sputum; *Fang Feng* (Radix Saposhnikoviae) for frequent infection; *Mai Ya* (Fructus Hordei Germinatus), *Gu Ya* (Fructus Setariae Germinatus), and *Shen Qu* (Massa Fermentata) for poor appetite and diarrhea; *Bai Mao Gen* (Rhizoma Imperatae), *Ce Bai Ye* (Cacumen Platycladi), and *Xian He Cao* (Herba Agrimoniae) for nosebleeds; and others as needed. Herbs were given in decoction daily for 10 days per course of treatment. Of 68 patients, the study reported complete recovery in 18 patients, marked improvement in 25 patients, moderate improvement in 20 patients, and no effect in 5 patients.¹¹
10. **Xiao ke (wasting and thirsting) syndrome:** Administration of modified *Shen Ling Bai Zhu San* in 30 patients with *xiao ke* (wasting and thirsting) syndrome was associated with recovery in 11 patients, improvement in 17 patients, and no effect in 2 patients. In addition to the formula, modifications included the addition of *Shi Hu* (Caulis Dendrobii) for excessive thirst with a dry tongue and a white tongue coating; *Ze Xie* (Rhizoma Alismatis) and *Che Qian Zi* (Semen Plantaginis) for a white, greasy tongue coating and reduced frequency of urination; and *Shan Zhu Yu* (Fructus Corni) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) for increased frequency of urination. The herbs were cooked in water, and the decoction was taken in two equally-divided doses daily for 1 month per course of treatment. All patients were instructed to control their diet. Those with a prescription for diabetes were instructed to continue using the drugs.¹²
11. **Edema:** Administration of *Shen Ling Bai Zhu San* was associated with complete recovery or significant improvement in 47 of 50 patients (10 males and 40 females, between 30-45 years of age) with edema. The treatment

Shēn Líng Bái Zhú Sǎn

(Ginseng, Poria, and Atractylodes Macrocephala Powder)

protocol was to cook the herbs in water, and administer the decoction in three equally-divided doses daily for 1 week per course of treatment, for 1-2 courses total.¹³

HERB-DRUG INTERACTION

Supportive therapy for chemotherapy and radiation:

Shen Ling Bai Zhu San alleviated gastrointestinal side effects associated with chemotherapy and radiation treatments among 96 patients with mid-to-severe stages of cancer. Of 96 cases, the study reported significant effect in 33 cases, moderate effect in 46 cases, and no effect in 17 cases.¹⁴

The source text states to grind the ingredients into powder, and cook 9g of the powder in water to make a decoction. This formula strengthens the Spleen, stops diarrhea, and resolves dampness.

Qi Wei Bai Zhu San (Seven-Ingredient Powder with Atractylodes Macrocephala) treats patients who have Spleen and Stomach deficiencies, with symptoms such as frequent and recurring diarrhea and vomiting, and abdominal fullness and pain.

Ren Shen (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify the Spleen and Stomach and dispel dampness. *Huo Xiang* (Herba

Agastaches) dispels dampness, harmonizes the middle *jiao*, and stops vomiting. *Mu Xiang* (Radix Aucklandiae) promotes qi circulation and relieves pain. *Ge Gen* (Radix Puerariae Lobatae) causes Stomach qi to ascend and stops diarrhea.

Gan Cao (Radix et Rhizoma Glycyrrhizae)

Bai Zhu (Rhizoma Atractylodis Macrocephalae)

Shan Yao (Rhizoma Dioscoreae)

Huang Qi (Radix Astragali)

Shen Ling San (Ginseng and Poria Powder) tonifies the Spleen and Stomach and reinforces *wei* (defensive) *qi*. Individuals with chronic deficiencies often have *wei qi* deficiency, and are more susceptible to exterior wind-cold or wind-heat invasion. The addition of *Huang Qi* (Radix Astragali) to this formula helps tonify *wei qi* and increase protection against *liu yin* (six exogenous factors).

AUTHORS' COMMENTS

Shen Ling Bai Zhu San is based on *Si Jun Zi Tang* (Four-Gentlemen Decoction), with the addition of *Shan Yao* (Rhizoma Dioscoreae), *Bai Bian Dou* (Semen Lablab Album), *Lian Zi* (Semen Nelumbinis), *Yi Yi Ren* (Semen Coicis), *Sha Ren* (Fructus Amomi), and *Jie Geng* (Radix Platycodonis).

Shen Ling Bai Zhu San is a harmonious formula that is not too warm nor too dry; it tonifies without creating stagnation, and drains dampness without injuring qi. It tonifies both the Lung and the Spleen, illustrating the concept of tonifying the metal element by strengthening the earth element. The following are differences between *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Shen Ling Bai Zhu San*:

Shēn Líng Bái Zhú Sǎn

(Ginseng, Poria, and Atractylodes Macrocephala Powder)

- *Si Jun Zi Tang* has a moderate qi-tonifying effect, and treats Spleen and Stomach qi deficiencies.
- *Shen Ling Bai Zhu San* has a strong qi-tonifying effect, and also harmonizes digestion and dissolves stagnation. It treats Spleen and Stomach qi deficiencies with accumulation of dampness.¹⁵

Shen Ling Bai Zhu San, *Si Shen Wan* (Four-Miracle Pill), and *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea) all bind the Intestines to treat diarrhea. The differences are as follows:

- *Shen Ling Bai Zhu San* is indicated for diarrhea characterized by Spleen qi deficiency with damp accumulation manifesting as fatigue, weakness of the limbs, and poor appetite.
- *Si Shen Wan* warms and tonifies Spleen and Kidney yang to stop chronic diarrhea. It is designed for severe diarrhea that occurs in the early morning and is watery or contains undigested food.
- *Tong Xie Yao Fang* tonifies the Spleen and spreads Liver qi. This formula stops stress-related diarrhea. Patients often complain of gas, bloating, or abdominal pain that is relieved with diarrhea.¹⁶

Qǐ Pí Wán (Guide the Spleen Pill)

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder, and mix with honey to form pills. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 20-30 pills per dose with rice water on an empty stomach.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen and Stomach
2. Promotes normal digestion
3. Relieves diarrhea and vomiting

CLINICAL MANIFESTATIONS

Indigestion and food stagnation caused by Spleen and Stomach deficiencies: decreased appetite, diarrhea, abdominal pain, nausea, and vomiting.

CLINICAL APPLICATIONS

Indigestion, chronic gastroenteritis, chronic diarrhea, intestinal tuberculosis, and infantile malnutrition.

EXPLANATION

Qi Pi Wan (Guide the Spleen Pill) treats patients with chronic Spleen and Stomach deficiencies, giving rise to various complaints of the digestive system, such as decreased appetite, nausea and vomiting, indigestion, abdominal pain, and diarrhea. In addition to digestive

disorders, fatigue and lack of energy may be present due to poor absorption of nutrients.

Si Jun Zi Tang (Four-Gentlemen Decoction) is the foundation of this formula; its four constituents, *Ren Shen* (Radix et Rhizoma Ginseng), *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), strengthen the Spleen and Stomach and restore normal digestive functions. The addition of *Shan Zha* (Fructus Crataegi) and *Chen Pi* (Pericarpium Citri Reticulatae) regulate qi and promote normal appetite and digestion. *Lian Zi* (Semen Nelumbinis) strengthens the Spleen and relieves diarrhea. *Ze Xie* (Rhizoma Alismatis) resolves dampness. *Shan Yao* (Rhizoma Dioscoreae) tonifies the body and relieves thirst and diarrhea.

MODIFICATIONS

- For poor appetite, add *Mai Ya* (Fructus Hordei Germinatus) and *Shen Qu* (Massa Fermentata).
- With more nausea, vomiting, and epigastric fullness, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Ban Xia* (Rhizoma Pinelliae).
- With more abdominal pain and diarrhea, add *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi).
- For diarrhea caused by wind-cold, add *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).

(Tonify the Middle and Augment the Qi Decoction)

補中益氣湯

补中益气汤

Pinyin Name: *Bu Zhong Yi Qi Tang*

Literal Name: Tonify the Middle and Augment the Qi Decoction

Alternate Names: *Pu Chung I Chi Tang (Wan)*, *Bu Zhong Yi Chi Tang (Wan)*, Interior-Nourishing and Qi-Increasing Decoction (Pill), Middle-Reinforcing and Qi-Benefiting Decoction, Ginseng and Astragalus Combination

Original Source: *Pi Wei Lun* (Discussion of the Spleen and Stomach) by Li Gao in 1249

COMPOSITION

<i>Huang Qi</i> (Radix Astragali)	1.5-3g [15-30g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	0.9g [9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	0.9g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	1.5g [15g]
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>bei</i> (stone-baked) with liquor	0.6g [6g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	0.6-0.9g [6-9g]
<i>Chai Hu</i> (Radix Bupleuri)	0.6-0.9g [6-9g]
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	0.6-0.9g [6-9g]

DOSAGE / PREPARATION / ADMINISTRATION

Coarsely grind the ingredients into powder and cook it in 2 large bowls of water and reduce it to 1 large bowl. Take the warm, strained decoction between meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets. It may also be administered as pills, by taking 10-15g of pills two to three times a day with warm, boiled water or ginger soup.

compromised immunity, chronic bronchitis, common cold, dysuria, frequent urination, incontinence, seizure and epilepsy, myasthenia gravis, depression, uterine bleeding, excessive menstrual bleeding, leukorrhea, pernicious anemia, recurrent miscarriage, postpartum illnesses, postpartum anuria, male infertility, tinnitus, allergic rhinitis, cataract, chronic hepatitis, hepatoma, and hepatocellular carcinoma.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the middle *jiao* and benefits qi
2. Causes the yang qi to ascend and lifts prolapsed organs

CLINICAL MANIFESTATIONS

1. Spleen and Stomach qi deficiencies: a warm sensation in the body, spontaneous sweating, thirst with preference for warm drinks, shortness of breath, no desire to speak, fatigue, weakness of the extremities, a pale complexion, loose stools, a pale tongue with a thin, white coating, and a surging, forceless pulse.
2. Qi deficiency with prolapse of organs: prolapse of the rectum or uterus, chronic diarrhea or dysentery, *beng lou* (flooding and spotting), and conditions characterized by inability of yang qi to ascend.

CLINICAL APPLICATIONS

Weakness and debility after a severe illness, chronic fatigue syndrome, gastric prolapse, rectal prolapse, uterine prolapse, nephroptosis (renal ptosis), gastritis, nausea and vomiting, constipation, diarrhea, fever, leukopenia,

EXPLANATION

The Spleen and Stomach, which are responsible for the transformation and transportation of food, are the source of qi and blood production. When these two organs become deficient and cannot carry out their normal functions, there will be fatigue, weakness of the extremities, shortness of breath, lack of desire to speak, and a pale face and tongue. Because of qi deficiency, the clear yang cannot ascend, leading to loose stools, diarrhea, and dysentery.

In severe cases of Spleen and Stomach deficiencies, yang qi may be unable to hold the organs in their normal position, leading to prolapse of such internal organs as the stomach, uterus, and rectum. Furthermore, as yang qi, unable to ascend, sinks into yin, it causes feverish sensations, spontaneous sweating, and a surging, forceless pulse. Thirst is the result of qi deficiency not being able to transport fluids to the upper parts of the body. Thirst with preference for warm drinks indicates deficiency, which differentiates this condition from thirst caused by heat.

Bǔ Zhōng Yì Qì Tāng

(Tonify the Middle and Augment the Qí Decoction)

Bu Zhong Yi Qi Tang (Tonify the Middle and Augment the Qi Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spleen and Stomach qi deficiencies with prolapse of yang qi	<ul style="list-style-type: none"> • Fatigue, weakness of the extremities, shortness of breath, lack of desire to speak, and a pale face and tongue: Spleen and Stomach qi deficiencies • Loose stools, diarrhea, and dysentery: qi deficiency with failure of clear yang qi to ascend • Prolapse of internal organs such as the stomach, uterus, and rectum: yang qi deficiency unable to lift internal organs • Pale complexion, a pale tongue with a thin, white coating: Spleen and Stomach qi deficiencies 	<ul style="list-style-type: none"> • Tonifies the middle <i>jiao</i> and benefits qi • Causes yang qi to ascend and lifts prolapsed organs 	<ul style="list-style-type: none"> • <i>Huang Qi</i> (Radix Astragali) tonifies <i>zhong</i> (central) <i>qi</i>, causes yang qi to ascend, and strengthens <i>wei</i> (defensive) <i>qi</i>. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthen the Spleen, benefit qi, and tonify the middle <i>jiao</i>. • <i>Dang Gui</i> (Radix Angelicae Sinensis) tonifies the blood. • <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulates qi and harmonizes the Stomach. • <i>Chai Hu</i> (Radix Bupleuri) and <i>Sheng Ma</i> (Rhizoma Cimicifugae) cause yang qi to ascend and lift prolapsed organs.

Bu Zhong Yi Qi Tang (Tonify the Middle and Augment the Qi Decoction) uses *Huang Qi* (Radix Astragali) as the chief herb because it tonifies *zhong* (central) *qi* and causes the yang qi to ascend. It also strengthens *wei* (defensive) *qi* and protects the exterior. *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthen the Spleen, benefit qi, and tonify the middle *jiao*. *Dang Gui* (Radix Angelicae Sinensis) tonifies the blood and enhances the production of qi. *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi and harmonizes the Stomach. It also prevents the tonic herbs from creating stagnation in the middle *jiao*. *Chai Hu* (Radix Bupleuri) and *Sheng Ma* (Rhizoma Cimicifugae) cause yang qi to ascend and lift prolapsed organs.

MODIFICATIONS

- For chronic prolapse of the rectum or uterus, add *Chi Shi Zhi* (Holloysitum Rubrum).
- With headache and vertigo, add *Chuan Xiong* (Radix Chuanxiong) and *Man Jing Zi* (Fructus Vitis).
- With headache due to common cold or flu, add *Gao Ben* (Rhizoma et Radix Ligustici) and *Xi Xin* (Herba Cum Radice Asari).
- With abdominal fullness, distention, and pain, add *Huang Qin* (Radix Scutellariae Baicalensis) and *Bai Shao* (Radix Paeoniae Alba).
- With hypochondriac pain, add *Xiang Fu* (Rhizoma Cyperi).
- If there is a stifling sensation in the chest, add *Qing Pi* (Pericarpium Citri Reticulatae Viride).

- With pain in the extremities, add *Fang Feng* (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- If there is more leukorrhea, add *Fu Ling* (Poria) and *Che Qian Zi* (Semen Plantaginis).
- With intolerance to cold and pain, add *Rou Gui* (Cortex Cinnamomi).
- With a heavy sensation in the body caused by dampness, add *Wu Ling San* (Five-Ingredient Powder with Poria).

CAUTIONS / CONTRAINDICATIONS

- *Bu Zhong Yi Qi Tang* is contraindicated in patients with yin deficiency or interior heat.
- As a general rule, the dose of this formula should be small. This formula consists of sweet and warm tonic herbs, which tend to be heavy and immobile in nature. Thus, a large dose of this formula may actually defeat the purpose of causing yang qi to ascend. For the individual ingredients, it is important keep the dose of *Huang Qi* (Radix Astragali) high to tonify qi, and the doses of *Chai Hu* (Radix Bupleuri) and *Sheng Ma* (Rhizoma Cimicifugae) should be just sufficient to raise yang qi.

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** According to laboratory experiments in rabbits, administration of *Bu Zhong Yi Qi Tang* was associated with a regulatory effect on the intestines. Depending on the condition of the subject, it will either increase or decrease intestinal peristalsis.¹
2. **Influence on gastric acid secretion:** Administration of *Bu Zhong Yi Qi Tang* has a dose-dependent effect on the

Bǔ Zhōng Yì Qì Tāng

(Tonify the Middle and Augment the Qi Decoction)

secretion of gastric acid. A small dose of the herb has little or no benefit on the secretion of gastric acid, while a large dose will significantly increase both gastric acid production and release.²

3. **Adaptogenic:** Administration of *Bu Zhong Yi Qi Tang* has been shown to increase the ability of animals to adapt to physical stress. In one experiment, administration of herbs for seven days increased the ability of mice to tread water longer when threatened with drowning. It was also noted that the subjects responded better to decoction than to pills.³
4. **Antiaaging:** Administration of *Bu Zhong Yi Qi Tang* in mice was associated with a dose-dependent effect to improve endurance, learning, memory, neuromuscular coordination, and changes in the levels of monoamines (dopamine and noradrenaline) in the brain.⁴
5. **Immunostimulant:** Administration of *Bu Zhong Yi Qi Tang* has been associated with an immune-enhancing effect. According to one study, use of the formula was linked with increased T-lymphocyte count, elevated levels of IFN and IL-2, and increased NK cells and macrophage activity.⁵ According to another study, *Bu Zhong Yi Qi Tang* enhances interleukin-18-induced cell-mediated immunity and may enhance host defense mechanisms against pathogens.⁶
6. **Antiallergic:** Administration of *Bu Zhong Yi Qi Tang* was associated with good results in treating allergies by suppressing IgE antibody production and inhibiting histamine release in type I allergic reactions in mice immunized with ovalbumin.⁷ According to another study, the antiallergic effect was attributed mainly to inhibition of Th2 cell responses.⁸
7. **Anticancer:** In one study, use of *Bu Zhong Yi Qi Tang* was associated with a dose-dependent effect to inhibit the proliferation of human hepatoma cell lines (Hep3B, HepG2, and HA22T), but not normal human hepatocytes (Chang liver, CCL-13). The mechanism of this anticancer effect was attributed to the formula's ability to suppress the proliferation of hepatoma cells by inducing apoptosis via G0/G1 arrest.⁹ Another study reported a marked prophylactic antitumor effect by enhancing the natural killer cell activity.¹⁰
8. **Radioprotective:** One study reported marked protective effects using *Bu Zhong Yi Qi Tang* in mice irradiated with high and low doses of gamma-rays. *Bu Zhong Yi Qi Tang* protected the jejunal crypts ($p < 0.0001$), increased the formation of the endogenous spleen colony ($p < 0.05$), and reduced the frequency of radiation-induced apoptosis ($p < 0.05$). The study also noted that while the individual ingredients also have radioprotective effects, the formula as a whole is much more effective. The study concluded

that *Bu Zhong Yi Qi Tang* is a useful radioprotector, especially because it is a relatively non-toxic natural product.¹¹

9. **Antibiotic:** Administration of *Bu Zhong Yi Qi Tang* was associated with marked effects to treat gastroduodenal diseases associated with *Helicobacter pylori* (*H. pylori*) infection. *Bu Zhong Yi Qi Tang* was found to be effective against *H. pylori* both *in vitro* and *in vivo*, and inhibited the growth of antibiotic-resistant strains of *H. pylori* as well as antibiotic-sensitive strains. In addition, concurrent use of *Bu Zhong Yi Qi Tang* and antibiotics completely eradicated the bacteria in mice. The antibiotic effect of *Bu Zhong Yi Qi Tang* was attributed partly to the induction of interferon.¹²
10. **Antiviral:** Administration of *Bu Zhong Yi Qi Tang* was associated with antiviral effects to treat mice infected with influenza virus. The mechanism of this antiviral effect was attributed to the enhancement of host immune responses, as the herbs do not have any inhibitory effect on the growth of influenza virus *in vitro*.¹³
11. **Effect on bone loss:** One study used *Bu Zhong Yi Qi Tang* and evaluated its effect on bone mass density in ovariectomized female rats at age 35 weeks. The subjects were given the formula by gastric tube for 8 weeks. The study reported that treatments using *Bu Zhong Yi Qi Tang* suppressed the ovariectomy-induced reduction of the bone mineral density in the whole and metaphysis of tibia. Furthermore, the study noted that there was a slight increase in serum levels of estradiol and progesterone maintaining bone mineral density values similar to that in the estradiol-treated ovariectomized rats, as well as the intact control rats. Based on this finding, the study suggested that *Bu Zhong Yi Qi Tang* prevented bone loss in ovariectomized rats because it elevated the serum levels of ovarian hormones slightly.¹⁴
12. **Antidepressive and antinociceptive:** Administration of *Bu Zhong Yi Qi Tang*, *Yi Gan San* (Restrain the Liver Powder), or *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction) for 14 consecutive days showed both antidepressive and antinociceptive properties in mice.¹⁵

CLINICAL STUDIES AND RESEARCH

1. **Chronic fatigue syndrome:** *Bu Zhong Yi Qi Tang* was used to treat patients with chronic fatigue syndrome. Out of 50 patients, the study reported marked improvement in 2 patients, moderate improvement in 24 patients, and slight improvement in 24 patients.¹⁶
2. **Gastric prolapse:** In one study, 40 patients with stomach prolapse characterized by Spleen and Stomach deficiencies were treated with modified *Bu Zhong Yi Qi Tang* with

Bǔ Zhōng Yì Qì Tāng

(Tonify the Middle and Augment the Qi Decoction)

complete recovery in 21 patients, marked improvement in 16 patients, and no benefit in 3 patients. The herbal treatment contained *Bu Zhong Yi Qi Tang* with modifications as needed. With Liver and qi stagnation, *Dang Shen* (Radix Codonopsis) was removed and *Fo Shou* (Fructus Citri Sarcodactylis), *Xiang Fu* (Rhizoma Cyperi), and *Zi Su Geng* (Caulis Perillae) were added. With food stagnation, *Dang Gui* (Radix Angelicae Sinensis) was removed, and charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), charred *Mai Ya* (Fructus Hordei Germinatus), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), and dry-fried *Lai Fu Zi* (Semen Raphani) were added. With Stomach heat, *Dang Shen* (Radix Codonopsis) was removed, and dry-fried *Huang Lian* (Rhizoma Coptidis), *Pu Gong Ying* (Herba Taraxaci), and *Da Huang* (Radix et Rhizoma Rhei) were added. For Stomach cold, *Dang Gui* (Radix Angelicae Sinensis) was removed, and *Gan Jiang* (Rhizoma Zingiberis) and *Rou Gui* (Cortex Cinnamomi) were added. For Stomach yin deficiency, *Chai Hu* (Radix Bupleuri) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were removed, and *Sha Shen* (Radix Glehniae seu Adenophorae) and *Mai Dong* (Radix Ophiopogonis) were added. With blood stagnation, *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were removed, and *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) were added.¹⁷ In another study, modified *Bu Zhong Yi Qi Tang* was used to treat patients with stomach prolapse with good success. Out of 40 patients, the study reported complete recovery in 30 patients, improvement in 8 patients, and no benefit in 2 patients. The overall effectiveness rate was 95%.¹⁸

3. **Rectal prolapse:** Use of modified *Bu Zhong Yi Qi Tang* was successful in treating rectal prolapse in 68 patients with 3 months to 15 years history of illness. The herbal formula contained *Huang Qi* (Radix Astragali) 30g, *Ren Shen* (Radix et Rhizoma Ginseng) 20g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 5g, *Sheng Ma* (Rhizoma Cimicifugae) 5g, and *Chai Hu* (Radix Bupleuri) 5g. Modifications were made as follows: for frequent bowel movements with mucus and blood, add *Huang Lian* (Rhizoma Coptidis) 10g, *Chi Shi Zhi* (Haloysitum Rubrum) 10g, *Ying Su Ke* (Pericarpium Papaveris) 10g, and *Jin Ying Zi* (Fructus Rosae Laevigatae) 10g; for stubborn cough, add *Wu Wei Zi* (Fructus Schisandrae Chinensis) 15g, *Wu Bei Zi* (Galla Chinensis) 10g, and *Sang Bai Pi* (Cortex Mori) 10g; for constipation, add *Huo Ma Ren* (Fructus Cannabis) 15g and *Yu Li Ren* (Semen Pruni) 10g; for chronic illness with dry mouth and deficiency of body fluids, add *Shu Di Huang* (Radix Rehmanniae Praeparata) 15g, *Sha Shen* (Radix Glehniae seu Adenophorae)

15g, *Tian Dong* (Radix Asparagi) 15g, and *Yu Zhu* (Rhizoma Polygonati Odorati) 15g; and for profuse bleeding in the stools, add *Huai Hua* (Flos Sophorae) 10g, *Di Yu* (Radix Sanguisorbae) 15g, and *Ce Bai Ye* (Cacumen Platycladi) 15g.¹⁹ Another study reported 94% effectiveness using modified *Bu Zhong Yi Qi Tang* to treat rectal prolapse. Modifications included the addition of *Wu Mei* (Fructus Mume), *Wu Bei Zi* (Galla Chinensis), and others as needed. Of 56 patients, the study reported significant improvement in 29 patients, moderate improvement in 24 patients, and no benefit in 3 patients.²⁰

4. **Uterine prolapse:** One study reported good results using modified *Bu Zhong Yi Qi Tang* to treat 14 patients with prolapse of uterus. The herbal treatment contained *Bu Zhong Yi Qi Tang* as the base formula, with the addition of large doses of *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; *Xu Duan* (Radix Dipsaci) and *Du Zhong* (Cortex Eucommiae) for low back pain and frequent urination; and a large dose of *Zhi Qiao* (Fructus Aurantii) for those who did not respond well. After 9-18 packs of herbs, the study reported recovery in all 14 patients.²¹
5. **Nephroptosis (renal ptosis):** Use of *Bu Zhong Yi Qi Tang* was effective in treating a 59-year-old woman with bilateral renal ptosis (a 6 cm decrease in position of the right kidney and a 5 cm decrease of the left kidney). The treatment protocol was to administer this formula at 7.5 g/day. The study reported relief of dull pain in the low back after 6 months, and improvement of nephroptosis (3 cm increase in the position of both kidneys) after 8 months. The study concluded that *Bu Zhong Yi Qi Tang* may be useful as a conservative therapy for nephroptosis.²²
6. **Gastritis:** Gastritis due to regurgitation of bile acid in 89 patients was treated with complete recovery in 19 patients, marked improvement in 32 patients, moderate improvement in 30 patients, and no benefit in 8 patients. The overall effectiveness was 90%. In addition to *Bu Zhong Yi Qi Tang* as the base formula, modifications included addition of *Zuo Jin Wan* (Left Metal Pill) for acid reflux; *Ban Xia* (Rhizoma Pinelliae) for belching; *Fu Ling* (Poria) and *Shan Yao* (Rhizoma Dioscoreae) for loose stools; *Da Huang* (Radix et Rhizoma Rhei) for constipation; and *Bai Shao* (Radix Paeoniae Alba) for stomach pain.²³
7. **Nausea and vomiting:** In one report, 26 out of 30 patients with nausea and vomiting were treated with good results using modified *Bu Zhong Yi Qi Tang*.²⁴
8. **Constipation:** Modified *Bu Zhong Yi Qi Tang* successfully treated constipation in geriatric patients with qi deficiency, postpartum women with qi and blood deficiency, and pregnant women.²⁵

Bǔ Zhōng Yì Qì Tāng

(Tonify the Middle and Augment the Qi Decoction)

9. **Diarrhea:** One study reported good results using *Bu Zhong Yi Qi Tang* to treat geriatric patients with diarrhea characterized by Spleen deficiency. Out of the 33 patients, 16 were male and 17 were female, between 51-67 years of age, with 6 months to 15 years of illness. Patients were instructed to take herbs continuously for 1-1.5 months. The study reported complete recovery in 30 of 33 patients.²⁶
10. **Fever:** Use of *Bu Zhong Yi Qi Tang* was effective in reducing fever secondary to chronic illness or postpartum weakness with qi and blood deficiencies. Of 20 patients treated, most reported a reduction of body temperature within 5 doses.²⁷ Another study on fever in 30 post-surgical patients reported 93.3% effectiveness using modified *Bu Zhong Yi Qi Tang* to reduce body temperature.²⁸
11. **Leukopenia:** One study reported good results using modified *Bu Zhong Yi Qi Tang* in 80 patients (32 male, 48 female) with low white blood cell count due to various causes. In addition to the base formula, modifications included *Gu Ya* (Fructus Setariae Germinatus) and *Mai Ya* (Fructus Hordei Germinatus) for poor appetite; *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) for palpitations; and *Cang Zhu* (Rhizoma Atractylodis) for damp. The herbs were cooked in water, and the decoction was taken in two equally-divided doses daily. Of 80 patients, the study reported a marked effect in 70 patients ($> 2.0 \times 10^9/L$ increase of WBC in 2 weeks); moderate improvement in 4 patients ($1.0-1.9 \times 10^9/L$ increase of WBC in 2 weeks), and no benefit in 6 patients ($< 0.9 \times 10^9/L$ increase of WBC in 2 weeks).²⁹
12. **Compromised immunity in elderly persons:** Administration of *Bu Zhong Yi Qi Tang* was effective in improving immunological capacity in a group of elderly patients. Clinical improvements included significantly enhanced natural killer (NK) activity and serum IFN-gamma level. The treatment protocol was to administer 7.5g of the formula daily for at least 120 days.³⁰
13. **Common cold:** In one report, 50 geriatric patients with constitutional deficiencies and common cold were treated successfully with modified *Bu Zhong Yi Qi Tang*. The modifications were as follows: *Jing Jie* (Herba Schizonepetae) was added for aversion to cold; *Fang Feng* (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii) for body ache; *Bai Zhi* (Radix Angelicae Dahuricae) was added for headache; *Bo He* (Herba Menthae) for dizziness; *Ju Hua* (Flos Chrysanthemi) for blurred vision; and *Yu Ping Feng San* (Jade Windscreen Powder) after the resolution of exterior symptoms. The average length of treatment was 37.5 days. Out of 50 patients, the study reported complete recovery in 48 patients (complete resolution of all symptoms without recurrence for 1 year).³¹
14. **MRSA infection:** One study reported a marked effect using 5g per day of *Bu Zhong Yi Qi Tang* to treat 5 patients with MRSA infection. Prior to the herbal treatment, these 5 patients were bedridden with cerebrovascular disorder, dementia, and, in two patients, bed sores, and had resistance to several antibacterial drugs. After the herbal therapy, the study noted disappearance of MRSA, improvement in their general conditions, and no side effects. The study states that *Bu Zhong Yi Qi Tang* may be a useful drug for MRSA-infected patients.³² According to another study, administration of *Bu Zhong Yi Qi Tang* in 34 patients with asymptomatic MRSA bacteriuria was associated with successful eradication of urine MRSA in 12 patients, and reduction of bacterial counts in urine culture to 10(2) CFU/mL or less in 10 patients. The treatment protocol was daily administration of 7.5g for at least 24 weeks.³³ Note: *Bu Zhong Yi Qi Tang* is not a “heat-clearing formula,” nor has it shown antibiotic effects. There are two proposed theories on the successful use of this formula in treating MRSA infection. First, *Bu Zhong Yi Qi Tang* improves prognostic nutritional index, and subsequently assists the recovery of bio-defense function against these pathogens.³⁴ Second, *Bu Zhong Yi Qi Tang* helps to enhance defense against bacteria by up-regulating TLR4 (human toll-like receptor 4) surface expression in THP-1 cells (human monocytic cell line), both dose- and time-dependently. By enhancing their recognition, *Bu Zhong Yi Qi Tang* enhances defense against these gram-negative pathogens.³⁵
15. **Hypertension:** One study used *Bu Zhong Yi Qi Tang* to treat hypertension characterized by qi deficiency. The background of the 15 patients were as follows: 9 males and 6 females; between 45-49 years of age, with 3-10 years history of illness. After continuous herbal treatment for 1-3 months, the study reported stabilization of blood pressure and relief of symptoms in 13 patients, and no benefit in 2 patients.³⁶
16. **Dysuria:** Modified *Bu Zhong Yi Qi Tang* was used with good results in treating 27 patients with postpartum dysuria. The modification included the addition of *Dong Kui Zi* (Semen Malvae), *Fu Ling* (Poria), and *Che Qian Zi* (Semen Plantaginis). The treatment duration was 1-3 days.³⁷
17. **Frequent urination:** In one report, pregnant women with frequent urination were treated with great success using *Bu Zhong Yi Qi Tang* with the addition of *Xu Duan* (Radix Dipsaci), dry-fried *Bai Shao* (Radix Paeoniae Alba), *Di Huang* (Radix Rehmanniae), *Huang Qin* (Radix Scutellariae), and *Shan Yao* (Rhizoma Dioscoreae). Pregnancy continued smoothly with no complications or side effects.³⁸

Bǔ Zhōng Yì Qì Tāng

(Tonify the Middle and Augment the Qì Decoction)

18. **Incontinence:** Modified *Bu Zhong Yi Qi Tang* was used with good results in treating 57 patients with incontinence due to postpartum or post-surgical procedures. Modifications included the addition of a large dose of *Huang Qi* (Radix Astragali), as well as the addition of *Yi Zhi* (Fructus Alpiniae Oxyphyllae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Fu Pen Zi* (Fructus Rubi), *Sang Piao Xiao* (Ootheca Mantidis), and calcined *Long Gu* (Os Draconis). Out of 57 patients, the study reported recovery in 45 patients and improvement in 12 patients.³⁹
19. **Seizures and epilepsy:** In one report, 54 patients with seizures were treated with good results using concurrent herb and drug therapy. The treatment protocol was to administer modified *Bu Zhong Yi Qi Tang* daily, for a duration ranging from 6 to 112 packs of herbal decoctions. The drugs were discontinued or reduced in dose only when the patients were stabilized. During the follow-up interviews, 35 patients had no recurrence within 1 year, 11 patients had no recurrence within 2 years, and 16 had reduced number of seizures. There was no benefit in 2 patients.⁴⁰
20. **Myasthenia gravis:** One hundred patients with myasthenia gravis were treated with an 86% effective rate using *Bu Zhong Yi Qi Tang* combined with general Kidney tonics.⁴¹
21. **Depression:** In one report, 50 patients with depression characterized by qi deficiency were treated with modified *Bu Zhong Yi Qi Tang*, with recovery in 28 patients, marked improvement in 17 patients, and slight improvement in 5 patients.⁴²
22. **Menstrual bleeding:** Fifty patients with profuse menstrual bleeding treated with *Bu Zhong Yi Qi Tang* experienced 90% effectiveness.⁴³
23. **Male infertility:** Use of *Bu Zhong Yi Qi Tang* was 51.1% effective in improving sperm count and motility in a group of 45 men.⁴⁴ In another study involving 55 men, the formula was 67.3% effective in improving the sperm count, and 74.5% effective in improving the sperm motility.⁴⁵ Furthermore, use of this formula showed improved semen quality in 22 idiopathic infertile patients.⁴⁶ Lastly, one study reported favorable results (higher sperm motility) using *Bu Zhong Yi Qi Tang* to treat 14 patients with unexplained male infertility.⁴⁷
24. **Tinnitus:** Modified *Bu Zhong Yi Qi Tang* in decoction successfully treated 30 patients with tinnitus. Modifications included the addition of *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Shen* (Radix Codonopsis), and *Huang Qi* (Radix Astragali) for qi and blood deficiencies; *Gou Qi Zi* (Fructus Lycii) and *Tu Si Zi* (Semen Cuscutae) for Kidney deficiency; *Bu Gu Zhi* (Fructus Psoraleae) and *Ba Ji Tian* (Radix Morindae Officinalis) for Kidney yang deficiency; *Long Dan* (Radix et Rhizoma Gentianae) and *Zhi Zi* (Fructus Gardeniae) for Liver and Gallbladder fire; and *Wu Ling Zhi* (Faeces Troglodyti), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Chi Shao* (Radix Paeoniae Rubra) for blood stagnation. The treatment protocol was to take the decoction one time daily for 5 days per course of treatment, for a total of 3 courses. Out of 30 patients, the study reported recovery in 23 patients, marked improvement in 2 patients, slight improvement in 3 patients, and no benefit in 2 patients.⁴⁸
25. **Allergic rhinitis:** *Bu Zhong Yi Qi Tang* can be combined with *Yu Ping Feng San* (Jade Windscreen Powder) or *Xin Yi San* (Magnolia Flower Powder) to effectively treat allergic rhinitis within 2 months.⁴⁹
26. **Cataract:** Use of modified *Bu Zhong Yi Qi Tang* to treat 18 geriatric patients with cataracts was associated with 90.6% effectiveness. The base formula contained *Bu Zhong Yi Qi Tang* plus *Gou Qi Zi* (Fructus Lycii) and *Shu Di Huang* (Radix Rehmanniae Praeparata). The treatment protocol was to administer the herbs in decoction daily, for 6 days per course of treatment, followed by 1 day of rest, for 1 month.⁵⁰
27. **Chronic hepatitis:** In a clinical study, modified *Bu Zhong Yi Qi Tang* was used to treat patients with chronic hepatitis characterized by Spleen qi deficiency or accumulation of dampness affecting the Spleen. The modification included the addition of *Yin Chen* (Herba Artemisiae Scopariae), *Cang Zhu* (Rhizoma Atractylodis), *Zhi Zi* (Fructus Gardeniae), *Zhu Ling* (Polyporus), *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), *Huang Lian* (Rhizoma Coptidis), and *Hua Shi* (Talcum). The study reported significant results in 80 patients and moderate results in 2 patients.⁵¹
28. **Hepatoma:** Administration of *Bu Zhong Yi Qi Tang* had a dose-dependent effect to inhibit the proliferation of human hepatoma cell lines (Hep3B, HepG2 and HA22T). The same formula, however, did not significantly inhibit the proliferation of normal human hepatocytes (Chang liver, CCL-13) at a concentration under 5,000 mcg/mL. The mechanism of this action was attributed to suppressed proliferation of hepatoma cells via G0/G1 cell cycle arrest and inhibition of DNA synthesis followed by apoptosis.⁵²
29. **Hepatocellular carcinoma:** One study evaluated the cellular physiology of *Bu Zhong Yi Qi Tang* for the treatment of hepatocellular carcinoma. *In vitro* studies have shown that *Bu Zhong Yi Qi Tang* is capable of increasing granulocyte colony-stimulating-factor (G-CSF) and tumor necrosis factor-alpha (TNF-alpha) production by peripheral blood mononuclear cells. This effect was observed in both healthy volunteers and patients with hepatocellular carcinoma. Because of this unique effect to stimulate the production of TNF-alpha and G-CSF and activate the biological defensive mechanism, the researchers stated

Bǔ Zhōng Yì Qì Tāng

(Tonify the Middle and Augment the Qi Decoction)

that *Bu Zhong Yi Qi Tang* may be beneficial for patients with hepatocellular carcinoma.⁵³

HERB-DRUG INTERACTION

- **Mitomycin C-induced immunosuppression:** Administration of mitomycin C, a chemotherapy agent for cancer, is often associated with immunosuppression and infectious diseases. One study reported that *Bu Zhong Yi Qi Tang* had beneficial effects in mice, with improvements in spleen weight, number of colonies of granulocytes and macrophages forming in the bone-marrow cells, natural killer activity in splenocytes, and in susceptibility to lethal herpes simplex virus type-1 infection. The researchers concluded *Bu Zhong Yi Qi Tang* may be beneficial in immunocompromised patients receiving chemotherapeutic drugs.⁵⁴
- **Cyclophosphamide-induced leukopenia:** Administration of *Bu Zhong Yi Qi Tang* (1,000 mg/kg) in mice treated with cyclophosphamide significantly prevented leukopenia. *Bu Zhong Yi Qi Tang* enhanced the production of hematopoietic lymphokines, stimulated the proliferation of hematopoietic progenitor cells, and consequently accelerated recovery from leukopenia. *Bu Zhong Yi Qi Tang* also contributed a protective effect against bacterial infection by activating phagocyte cells.⁵⁵
- **Radiation-induced hypotension:** According to one study, 30 patients between 25-50 years of age, who had worked in areas with high exposure to radiation, were treated for hypotension. The average blood pressure was 25 mmHg below normal. The patients were divided into three groups according to diagnosis of Spleen qi deficiency, qi and yang deficiencies, and qi and yin deficiencies. Patients in all three groups received *Bu Zhong Yi Qi Tang* as the base formula. *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Yin Yang Huo* (Herba Epimedii) were added for those who had qi and yang deficiencies. *Sheng Mai San* (Generate the Pulse Powder) was added for those who had qi and yin deficiencies. After 5 days of treatment, the study reported marked improvement in 47% of patients, moderate improvement in 40%, and no improvement in 13%. Marked improvement was defined as subjective improvement of symptoms according to the patients with an objective increase in blood pressure of 15-24 mmHg, and moderate improvement was defined as no significant changes in subjective symptoms, but an increase of 15 mmHg of blood pressure.⁵⁶
- **Liver metabolism:** One study on the metabolic activity of different cytochrome P450 (CYP) isoforms reported *Bu Zhong Yi Qi Tang* to be a competitive inhibitor of CYP3A4 (Ki value of 0.65 mg/mL) and CYP2C9 (Ki value of 0.7-0.8 mg/mL), but not CYP2D6. The study concluded

that because of this inhibitory effect on liver metabolism, care should be taken with concurrent use of *Bu Zhong Yi Qi Tang* and drugs.⁵⁷

TOXICOLOGY

In an acute toxicology study, no fatality or abnormal reactions were noted in mice following oral ingestion of the formula at the dose of 166 g/kg twice daily for 3 days.⁵⁸

RELATED FORMULAS

Jǔ Yuán Jiān (Lift the Source Decoction)

舉元煎

举元煎

Pinyin Name: *Ju Yuan Jian*

Literal Name: Lift the Source Decoction

Original Source: *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9-15g
<i>Huang Qi</i> (Radix Astragali), <i>zhi</i> (fried with liquid)	9-15g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	
Praeparata cum Melle)	3-6g
<i>Sheng Ma</i> (Rhizoma Cimicifugae),	
<i>chao</i> (dry-fried)	1.5-2.1g
<i>Bai Zhu</i> (Rhizoma Atractylodis	
Macrocephalae), <i>chao</i> (dry-fried)	3-6g

Prepare the ingredients by cooking the herbs in 1.5 large bowls of water until the liquid is reduced to 70-80%. Take the strained decoction while warm. This formula tonifies qi and causes yang to ascend. Clinically, it is used for patients who have severe qi deficiency with near-collapse of yang qi and profuse bleeding, with such symptoms as prolapsed organs, and continuous menstrual bleeding in women.

Ju Yuan Jian (Lift the Source Decoction) is modified from *Bu Zhong Yi Qi Tang*, with the removal of *Chen Pi* (Pericarpium Citri Reticulatae), *Dang Gui* (Radix Angelicae Sinensis), and *Chai Hu* (Radix Bupleuri). *Ju Yuan Jian* uses a higher dose of *Ren Shen* (Radix et Rhizoma Ginseng), and is thus more suitable than *Bu Zhong Yi Qi Tang* for patients with severe *yuan* (source) qi deficiency.

This formula may be modified as follows: for cold and yang qi deficiency, add *Rou Gui* (Cortex Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gan Jiang* (Rhizoma Zingiberis); and for loss of body fluids, add *Wu Mei* (Fructus Mume) or *Wen Ge* (Meretrix).

Bǔ Zhōng Yì Qì Tāng

(Tonify the Middle and Augment the Qì Decoction)

Shēng Xiàn Tāng (Raise the Sinking Decoction)

升陷湯

升陷汤

Pinyin Name: *Sheng Xian Tang*

Literal Name: Raise the Sinking Decoction

Original Source: *Yi Xue Zhong Zhong Can Xi Lu* (Records of Heart-Felt Experiences in Medicine with Reference to the West) by Zhang Xi-Chun in 1918-34

<i>Huang Qi</i> (Radix Astragali)	18g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	9g
<i>Chai Hu</i> (Radix Bupleuri)	4.5g
<i>Jie Geng</i> (Radix Platycodonis)	4.5g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	3g

The source text states to cook the herbs three times, and consume the decoction within one day. This formula tonifies qì, lifts prolapse, and raises sunken qì in the chest. Clinically, this formula is used for patients who have severe qì depression in the chest with symptoms such as rapid respiration, shortness of breath, severe dyspnea, and a deep, slow and weak pulse.

Sheng Xian Tang (Raise the Sinking Decoction) uses the same principles as *Bu Zhong Yi Qi Tang* to treat deficiency and sinking of qì in the chest. *Huang Qi* (Radix Astragali), the chief herb, tonifies Lung qì. *Jie Geng* (Radix Platycodonis) regulates Lung qì. *Sheng Ma* (Rhizoma Cimicifugae) and *Chai Hu* (Radix Bupleuri) ascend to lift sunken qì. *Zhi Mu* (Rhizoma Anemarrhenae) is bitter and cold, and neutralizes the warm tendency of *Huang Qi* (Radix Astragali) to prevent unwanted side effects.

AUTHORS' COMMENTS

It is often asked that if *Bu Zhong Yi Qi Tang* treats prolapsed organs, why are *Sheng Ma* (Rhizoma Cimicifugae) and *Chai Hu* (Radix Bupleuri) not used as chief herbs at larger doses to maximize the effects? There are two reasons why a large dose of these two herbs is inappropriate:

- First, the prolapse is caused by qì deficiency, so tonic herbs such as *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) must be used to treat the underlying deficiency, which is the root of the condition.
- Second, the primary function of *Chai Hu* (Radix Bupleuri) and *Sheng Ma* (Rhizoma Cimicifugae) is to release the exterior, and their secondary function is to lift prolapsed organs. If they are used at larger doses, their dispersing and

exterior-releasing functions would override their lifting effect and injure the *zheng* (upright) qì of the body.⁵⁹

Huang Qi (Radix Astragali) is the main ingredient in three important formulas, but with slightly different purposes:

- *Bu Zhong Yi Qi Tang* contains *Huang Qi* (Radix Astragali) to tonify qì and cause yang to ascend. It treats Spleen and Stomach qì deficiencies with prolapsed organs. Patients will exhibit fatigue, poor appetite, decreased dietary intake, feverish sensation, chronic diarrhea, and spontaneous sweating.
- *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood) contains *Huang Qi* (Radix Astragali) at a dose five times higher than *Dang Gui* (Radix Angelicae Sinensis) to boost qì and generate blood. It is mainly used for blood deficiency with deficiency-heat signs of heat sensation, flushed face, spontaneous sweating, and a surging, big and deficient pulse.
- *Dang Gui Liu Huang Tang* (Tangkuei and Six-Yellow Decoction) uses *Huang Qi* (Radix Astragali) to tonify qì, consolidate *wei* (defensive) qì, and stop sweating. It mainly treats yin deficiency with flaring fire manifesting in spontaneous or night sweats, thirst, and a red tongue body with a yellow coating.⁶⁰

Yì Qì Cōng Míng Tāng (Augment the Qi and Increase Acuity Decoction)

益氣聰明湯 益氣聰明湯

Pinyin Name: *Yì Qì Cōng Míng Tāng*

Literal Name: Augment the Qi and Increase Acuity Decoction

Alternate Names: *Yì Qì Cōng Míng Tāng*, *Yì Qì Cōng Míng Tāng*, Ginseng, Astragalus and Pueraria Decoction; Ginseng, Astragalus and Pueraria Combination

Original Source: *Dong Heng Shi Xiao Fang* (Tested and Effective Formulas by Dong Heng) by Li Gao (also known as Li Dong-Heng) in 1266

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	15g
<i>Huang Qi</i> (Radix Astragali)	15g
<i>Ge Gen</i> (Radix Puerariae Lobatae)	9g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	9g
<i>Man Jing Zi</i> (Fructus Viticis)	4.5g
<i>Bai Shao</i> (Radix Paeoniae Alba)	3g
<i>Huang Bo</i> (Cortex Phellodendri Chinensis), <i>zhi</i> (fried with liquor) and <i>chao</i> (dry-fried) till yellow	3g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the herbs into a coarse powder, and cook 9g in two bowls of water until it is reduced to one bowl. Take the strained decoction while warm.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and blood
2. Lifts yang qi and benefits the eyes and ears

CLINICAL MANIFESTATIONS

Compromised visual and auditory functions: diminished acuity of eyes and ears, blurred vision, dizziness, light-headedness, decreased appetite, spontaneous sweating, and chronic diarrhea.

CLINICAL APPLICATIONS

Cognitive dysfunction, cerebral arteriosclerosis, tinnitus, deafness, diminished vision, cataract, vertigo, otitis media, and ulcerative colitis.

EXPLANATION

Yì Qì Cōng Míng Tāng (Augment the Qi and Increase Acuity Decoction) treats compromised functioning and deterioration of the eyes and ears. It may be used to reverse deterioration, or preventively to maintain the acuity of both ears and eyes.

Ren Shen (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali) tonify qi and strengthen the Spleen and Stomach. *Ge Gen* (Radix Puerariae Lobatae), *Sheng Ma* (Rhizoma Cimicifugae), and *Man Jing Zi* (Fructus Viticis) have an ascending function to lift yang qi and treat disorders of the upper parts of the body. When sufficient qi rises to the head, the normal functions of the eyes and ears will be restored. *Bai Shao* (Radix Paeoniae Alba) nourishes yin and harmonizes the blood. *Huang Bo* (Cortex Phellodendri Chinensis) controls deficiency fire. Lastly, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the middle *jiao* and the other herbs in the formula.

Yi Qi Cōng Míng Tāng (Augment the Qi and Increase Acuity Decoction)

Yi Qi Cong Ming Tang (Augment the Qi and Increase Acuity Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deteriora- tion of eye and ear functions	Diminished acuity of the eyes and ears, light-headedness, dizziness, decreased appetite, spontaneous sweating, and chronic diarrhea: qi and blood deficiencies	<ul style="list-style-type: none">• Tonifies qi and blood• Lifts yang qi and benefits the eyes and ears	<ul style="list-style-type: none">• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Huang Qi</i> (Radix Astragali) tonify qi and strengthen the Spleen and Stomach.• <i>Ge Gen</i> (Radix Puerariae Lobatae), <i>Sheng Ma</i> (Rhizoma Cimicifugae), and <i>Man Jing Zi</i> (Fructus Viticis) lift yang qi.• <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes yin and harmonizes the blood.• <i>Huang Bo</i> (Cortex Phellodendri Chinensis) controls deficiency fire.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

MODIFICATIONS

- With blurred vision and dizziness, add *Ju Hua* (Flos Chrysanthemi) and *Gou Qi Zi* (Fructus Lycii).
- With tinnitus due to Kidney deficiency, add *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill).

CAUTIONS / CONTRAINDICATIONS

- *Yi Qi Cong Ming Tang* is designed to treat compromised visual and auditory functions due to overall deterioration and deficiency. It should not be used if the eye and ear disorders are due to excess, such as Liver fire rising or damp-heat in the Liver and Gallbladder channels.¹
- While taking this herbal formula, patients should avoid exposure to smoke and fire, and refrain from eating sour, cold, raw, oily or greasy foods.²

CLINICAL STUDIES AND RESEARCH

1. **Memory and cognition:** *Yi Qi Cong Ming Tang* has been used with satisfactory effect in treating geriatric patients with gradual deterioration of cognitive functions. In another study, use of modified *Yi Qi Cong Ming Tang* was associated with both subjective and objective improvements memory and cognitive performance in 30 geriatric patients with cerebral arteriosclerosis. The herbal treatment contained this formula plus *Tai Zi Shen* (Radix Pseudostellariae) and *Chi Shao* (Radix Paeoniae Rubra). The mechanism of action was attributed in part to the increased blood perfusion to the brain.³
2. **Tinnitus:** One study reported 96% effectiveness in the treatment of tinnitus characterized by Spleen deficiency using modified *Yi Qi Cong Ming Tang*. The herbal treatment contained the following ingredients: processed *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis),

dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Sheng Ma* (Rhizoma Cimicifugae), *Ge Gen* (Radix Puerariae Lobatae), *Man Jing Zi* (Fructus Viticis), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Sha Ren* (Fructus Amomi), dry-fried *Bai Shao* (Radix Paeoniae Alba), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), dry-fried *Huang Bo* (Cortex Phellodendri Chinensis), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle). Furthermore, modifications were made by adding dry-fried *Shan Yao* (Rhizoma Dioscoreae) and *Che Qian Zi* (Semen Plantaginis) for loose stools; and replacing *Dang Shen* (Radix Codonopsis) with *Ren Shen* (Radix et Rhizoma Ginseng) for *zhong* (central) *qi* deficiency. The treatment protocol was to cook the herbs 3 separate times, mix the 3 resulting decoctions together (the total amount should be approximately 450-600 mL), and administer in three equally-divided doses daily while warm, 2 hours after meals. The duration of treatment ranged from 1-7 days. Of 50 patients, the study reported complete recovery in 46 patients, improvement in 2 patients, and no benefit in 2 patients.⁴

3. **Vertigo:** Modified *Yi Qi Cong Ming Tang* was used to treat 52 geriatric patients with vertigo, with the history of illness ranging from 6 months to 3 years. The herbal treatment contained *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), processed *Sheng Ma* (Rhizoma Cimicifugae), *Ge Gen* (Radix Puerariae Lobatae), *Man Jing Zi* (Fructus Viticis), *Huang Bo* (Cortex Phellodendri Chinensis), *Bai Shao* (Radix Paeoniae Alba), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), *Tian Ma* (Rhizoma Gastrodiae), *Ban Xia* (Rhizoma Pinelliae), *Du Zhong* (Cortex Eucommiae), and *Niu Xi* (Radix Achyranthis Bidentatae). The treatment protocol was to cook the herbs in water, and administer the decoction in

Yi Qi Cōng Míng Tāng (Augment the Qi and Increase Acuity Decoction)

three equally-divided doses. Of 52 patients, the study reported complete recovery in 28 patients, improvement in 20 patients, and no benefit in 4 patients. The overall rate of effectiveness was 92.3%.⁵

4. **Otitis media:** One study reported good results for the treatment of suppurative otitis media using modified *Yi Qi Cong Ming Tang*. The herbal formula contained *Huang Qi* (Radix Astragali) 15g, *Ren Shen* (Radix et Rhizoma Ginseng) 15g, *Man Jing Zi* (Fructus Viticis) 9g, *Ge Gen* (Radix Puerariae Lobatae) 9g, *Bai Shao* (Radix Paeoniae Alba) 9g, *Huang Bo* (Cortex Phellodendri Chinensis) 6g, *Sheng Ma* (Rhizoma Cimicifugae) 6g, and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 6g. The herbs were given in decoction daily. Of 21 geriatric patients, the study reported complete recovery in 13 patients, moderate improvement in 6 patients, and no benefit in 2 patients.⁶
5. **Ulcerative colitis:** In a clinical trial on ulcerative colitis, patients were divided into two groups with one receiving herbs and the other receiving salicylazosulfapyridine. Patients in the herb group received the following formula: *Dang Shen* (Radix Codonopsis) 20-30g, *Ge Gen* (Radix Puerariae Lobatae) 20-30g, *Huang Qi* (Radix Astragali) 20-30g, dry-fried *Bai Shao* (Radix Paeoniae Alba) 12-18g, honey-fried *Sheng Ma* (Rhizoma Cimicifugae) 6-10g, dry-fried *Huang Bo* (Cortex Phellodendri Chinensis) 6-10g, *Man Jing Zi* (Fructus Viticis) 6-10g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3-6g. Furthermore, *Shan Yao* (Rhizoma Dioscoreae) 30g and dry-fried *Bai Bian Dou* (Semen Lablab Album) 10g were added for Spleen and Stomach deficiencies; dry-fried *Cang Zhu* (Rhizoma Atractylodis) 10g and *Yi Yi Ren* (Semen Coicis) 20g were added for more damp; *Ma Chi Xian* (Herba Portulacae) 20g and *Huang Lian* (Rhizoma Coptidis) 6g were added

for heat; *Shen Qu* (Massa Fermentata) 10g and dry-fried *Shan Zha* (Fructus Crataegi) 10g were added for food stagnation; *Bu Gu Zhi* (Fructus Psoraleae) 10g and *Fu Zi Zi* (Radix Aconiti Lateralis Praeparata) 10g were added for deficiency of *ming men* (life gate) fire; *Rou Dou Kou* (Semen Myristicae) 6-10g, *Ying Su Ke* (Pericarpium Papaveris) 6-10g, and dry-fried *Zhi Zi* (Fructus Gardeniae) 6-10g were added for constant diarrhea. Patients in the herb group received the herbs in decoction one time daily. Patients in the drug group received 4-6g of salicylazosulfapyridine daily. Corticosteroids were also given if needed. The duration of treatment was 1-2 months for both groups. At the end of treatment, the study reported that out of 45 patients in the herb group, there was marked improvement in 28 patients, moderate improvement in 10 patients, and no benefit in 7 patients. Out of 38 patients in the drug group, the study reported marked improvement in 7 patients, moderate improvement in 15 patients, and no benefit in 15 patients. The overall effectiveness rate was 84.4% in the herb group, and 60.6% in the drug group.⁷

Shēng Mài Sǎn (Generate the Pulse Powder)

生脈散
生脉散

Pinyin Name: *Sheng Mai San*
Literal Name: Generate the Pulse Powder
Alternate Names: *Sheng Mai Yin* (Generate the Pulse Decoction), Ginseng and Ophiopogon Formula
Original Source: *Nei Wai Shang Bian Huo Lun* (Clarifying Doubts about Injury from Internal and External Causes) by Li Gao in 1247

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	1.5g [10g]
<i>Mai Dong</i> (Radix Ophiopogonis)	1.5g [10-15g]
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	7 seeds [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction. It may be taken at any time of the day. Today, this formula is prepared by using larger doses of the ingredients, provided in brackets above, and cooking the herbs three times, and consuming the decoction within one day.

CHINESE THERAPEUTIC ACTIONS

- 1. Tonifies qi and promotes body fluid secretion
- 2. Astringes yin and stops perspiration

CLINICAL MANIFESTATIONS

- 1. Damaged qi and body fluids due to summer-heat and profuse sweating: a dry throat, thirst, irritability, lethargy, shortness of breath, and a fine, weak pulse.
- 2. Damaged qi and yin due to chronic coughing: coughing with scanty sputum, shortness of breath, spontaneous perspiration, a dry mouth and tongue with a dry, thin tongue coating, and a deficient, rapid or deficient, fine pulse.

CLINICAL APPLICATIONS

Shock, coronary artery disease, angina pectoris, myocardial infarction, cardiac failure, congestive heart failure,

arrhythmia, viral myocarditis, myocarditis, hypotension, cerebral infarction, Alzheimer’s disease, leukopenia, chronic cough, pulmonary tuberculosis, chronic bronchitis, infertility, and diabetes mellitus.

EXPLANATION

Sheng Mai San (Generate the Pulse Powder) treats deficiencies of qi and yin, which may be caused by summer-heat inducing profuse sweating and damaging qi and body fluids. Damaged qi and yin may also occur from chronic coughing. Qi deficiency is characterized by spontaneous perspiration, lethargy, and shortness of breath. Yin deficiency is characterized by a dry mouth, thirst, irritability, coughing with scanty sputum, and a dry tongue with a thin, dry tongue coating.

Ren Shen (Radix et Rhizoma Ginseng), the chief herb, tonifies *yuan* (source) *qi* and strengthens the Lung. *Mai Dong* (Radix Ophiopogonis) nourishes yin, replenishes body fluids lost through perspiration, and relieves thirst and dry mouth. These two tonic herbs treat the root of the condition by replenishing what is lost and deficient. Lastly, *Wu Wei Zi* (Fructus Schisandrae Chinensis) astringes the Lung to stop sweating and arrest coughing.

Sheng Mai San (Generate the Pulse Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Shēng Mài Sǎn (Generate the Pulse Powder)

MODIFICATIONS

- If there is more yin deficiency, use *Xi Yang Shen* (*Radix Panacis Quinquefolii*) instead of *Ren Shen* (*Radix et Rhizoma Ginseng*).
- With irritability and insomnia due to neurasthenia, add *Suan Zao Ren* (*Semen Ziziphi Spinosa*) and *Bai Zi Ren* (*Semen Platycladi*).
- If there is a faint pulse and increased risk of shock, add a large dose of *Ren Shen* (*Radix et Rhizoma Ginseng*).
- For qi and yin deficiencies due to febrile disorder, add *Xuan Shen* (*Radix Scrophulariae*) and *Di Huang* (*Radix Rehmanniae*).
- For chronic respiratory disorder with cough, dyspnea, and sputum, add *Ku Xing Ren* (*Semen Armeniacae Amarum*) and *Chen Pi* (*Pericarpium Citri Reticulatae*).
- For chronic heart disorder with yin and yang deficiencies, add *Huang Qi* (*Radix Astragali*) and *Gan Cao* (*Radix et Rhizoma Glycyrrhizae*).
- For pulmonary tuberculosis, add *Shan Yao* (*Rhizoma Dioscoreae*) and *Bai Bu* (*Radix Stemonae*).

CAUTIONS / CONTRAINDICATIONS

- *Sheng Mai San* has an astringent action, and is contraindicated in patients with exterior syndromes or interior heat conditions.
- This formula is not recommended for chronic cough with Lung deficiency accompanied by an exterior syndrome.

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** Administration of *Sheng Mai San* was associated with a marked effect on the cardiovascular system. In rabbits, it has a cardiotonic effect to increase the contractile force of heart tissues. It also prevents arrhythmia as demonstrated in laboratory experiments in rats. In addition, it increases blood perfusion to the coronary artery and the peripheral parts of the body.¹
2. **Cardioprotective:** *Sheng Mai San* has a cardioprotective effect against post-ischemic myocardial dysfunction by opening the mitochondrial KATP channels.² It also reduces myocardial infarct size by activating protein kinase C and opening the mitochondrial KATP channel.³ The lignan of *Wu Wei Zi* (*Fructus Schisandrae Chinensis*) is believed to be the major myocardial protective component in this formula.⁴
3. **Immunostimulant:** In mice, injection of *Sheng Mai San* at 0.4 mL per day for 5 days was associated with an increase in white blood cells and T-lymphocytes.⁵
4. **Central nervous system:** Administration of *Sheng Mai San* has a mild sedative effect on the central nervous system. It counters caffeine's stimulating effect.⁶
5. **Anti-inflammatory:** Administration of *Sheng Mai San* was associated with reduced swelling and inflammation

in rats. The effect was attributed to the increased glucocorticoids production, because the formula had no benefit in subjects whose adrenal glands had been removed.⁷

CLINICAL STUDIES AND RESEARCH

1. **Coronary artery disease:** In one report, 41 patients with coronary artery disease were treated with *Sheng Mai San* with subjective improvement noted in 78% of patients, and ECG improvement in 14.5% of patients.⁸ Another study reported 66.7% effectiveness in 35 patients with coronary artery disease using 20 mL of *Sheng Mai San* in liquid form three times daily for 3 weeks per course of treatment.⁹
2. **Angina pectoris:** Patients with angina characterized by qi and yin deficiencies were treated with intravenous injection of *Sheng Mai San* for 14 days per course of treatment with good results. Of 53 patients, the study reported marked effect in 12 patients, improvement in 35 patients, and no benefit in 6 patients. The overall rate of effectiveness was 88.6%.¹⁰
3. **Myocardial infarction:** Twelve patients with acute myocardial infarction were treated with oral ingestion of *Sheng Mai San* plus *Dang Gui* (*Radix Angelicae Sinensis*), *Yan Hu Suo* (*Rhizoma Corydalis*), *Chi Shao* (*Radix Paeoniae Rubra*), *Huang Qi* (*Radix Astragali*), *Bai Zhu* (*Rhizoma Atractylodis Macrocephalae*), *Fu Ling* (*Poria*), *Tao Ren* (*Semen Persicae*), and *Hong Hua* (*Flos Carthami*). Out of 12 patients, the study reported complete recovery in 4 patients, improvement in 6 patients, and no benefit in 2 patients.¹¹
4. **Cerebral infarction:** Intravenous injection of *Sheng Mai San* was used to treat 96 patients with cerebral infarct (9 with complete paralysis, 72 with hemiparalysis, 16 with unconsciousness, 84 with deviation of the eyes and mouth, and 54 with speech difficulties). After treatment, the study reported complete recovery in 57 patients, marked improvement in 17 patients, moderate improvement in 14 patients, and no benefit in 8 patients. The overall rate of effectiveness was 91.7%.¹²
5. **Coronary heart disease:** One study reported marked results using *Sheng Mai San* to treat patients with coronary heart disease (30 with angina pectoris and 68 with acute myocardial infarction). The administration of the herbs was found to increase the levels of superoxide dismutase (SOD) and decreased glutathione peroxidase (GSH-Px) and malondialdehyde (MDA) in blood. By acting as an effective free radical scavenger in minimizing the lipid peroxidation damage, *Sheng Mai San* was considered effective for prevention and treatment of coronary heart disease.¹³
6. **Arrhythmia:** In one study, 36 patients with arrhythmia characterized by qi and yin deficiencies were treated first

Shēng Mài Sǎn (Generate the Pulse Powder)

by intravenous injection, followed by oral ingestion, of *Sheng Mai San*. The study reported an overall effectiveness rate of 83.4%.¹⁴ In another study, *Sheng Mai San* was associated with 85.7% effectiveness in treating 21 patients with chronic bradyarrhythmia.¹⁵

7. **Viral myocarditis:** Sixty-three patients with viral myocarditis were treated with good results using *Sheng Mai San* plus *Chi Shao* (*Radix Paeoniae Rubra*), *Long Gu* (*Os Draconis*), and *Mu Li* (*Concha Ostreae*). The treatment protocol was to administer the herbs in decoction daily for 15 days per course of treatment, for 1-2 courses total. The overall rate of effectiveness was 90%.¹⁶
8. **Myocarditis:** Twenty patients with myocarditis (15 were refractory to drug treatment) were treated with both *Sheng Mai San* and *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction). Out of 20 patients, the study reported marked improvement in 6 patients, moderate improvement in 10 patients, and no benefit in 4 patients.¹⁷
9. **Hypotension:** One study reported 97.32% effectiveness using *Sheng Mai San* plus *Dang Gui* (*Radix Angelicae Sinensis*), *Gui Zhi* (*Ramulus Cinnamomi*), and *E Jiao* (*Colla Corii Asini*) to treat hypotension. Of 112 patients, the study reported complete recovery in 78 patients, marked improvement in 23 patients, and slight improvement in 8 patients. The treatment protocol was to cook the herbs in water and drink the decoction in three equally-divided doses. The duration of treatment was 3 courses, with 10 days per course.¹⁸ According to another study, 15 patients with primary hypotension were treated with *Sheng Mai San*. The study noted that the blood pressure began to increase after one week. After 4 weeks of treatment, the average increase in blood pressure was 14 mmHg for systolic and 6.7 mmHg for diastolic.¹⁹
10. **Shock:** In one report, 17 patients with shock due to infection were treated with an injection of *Sheng Mai San* with an overall 88.2% effectiveness.²⁰ In another report, 8 patients with shock due to excessive loss of blood were treated with *Sheng Mai San* with excellent effect in 5 patients, improvement in 2 patients, and no benefit in 1 patient.²¹
11. **Alzheimer's disease:** One study reported good results in 14 patients with Alzheimer's disease using *Sheng Mai San* as a replacement for tea on a daily basis for 2 months.²⁷
12. **Leukopenia:** Thirty-nine patients (21 males and 18 females, between 39-70 years of age) with leukopenia were treated with *Sheng Mai San* plus *Yu Zhu* (*Rhizoma Polygonati Odorati*), *Shi Hu* (*Caulis Dendrobii*), *Dang Gui* (*Radix Angelicae Sinensis*), and others as needed. The treatment protocol was to administer the herbs daily in decoction for 10 days per course of treatment, for 2-3 courses total. Of 39 patients, the study reported marked improvement in 14 patients, moderate improvement in 23

patients, and no benefit in 2 patients.²²

13. **Infertility:** *Sheng Mai San* successfully treated infertility due to anovulation. The duration of treatment ranged from 1-6 months. Of 78 patients, the study reported pregnancy in 21 patients, normal ovulation in 17 patients, and no change in 40 patients.²³
14. **Diabetes mellitus:** Twenty-one patients with diabetes were treated with 85.9% effectiveness using *Sheng Mai San* and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with *Rehmannia*).²⁴

TOXICOLOGY

In an acute toxicology study, no fatality or abnormal reactions were reported following intravenous injection at the dose of 0.4 g/20g. The LD₅₀ was determined as 34.64 g/kg via injection.²⁵ In a chronic toxicology study, intravenous injection of the formula at 20 mL/kg/day for 15 days did not cause any abnormal reaction.²⁶

AUTHORS' COMMENTS

Sheng Mai San consists of *Ren Shen* (*Radix et Rhizoma Ginseng*), *Mai Dong* (*Radix Ophiopogonis*), and *Wu Wei Zi* (*Fructus Schisandrae Chinensis*). Its primary functions are to tonify qi, generate fluids, astringe yin and generate pulse. *Ren Shen* (*Radix et Rhizoma Ginseng*) is the main and an essential ingredient in this formula because it is the most effective herb to warm the Heart, nourish *ying* (nutritive) level, and generate the pulse.

According to Dr. Chang Wei-Yen, *Sheng Mai San* can be combined with *Ba Zhen Tang* (Eight-Treasure Decoction) and *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart) to treat headaches with dizziness, palpitations, frequent dreams, and coldness of the limbs caused by blood deficiency. In addition, *Sheng Mai San*, *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi), and *Yu Ping Feng San* (Jade Windscreen Powder) can be combined to enhance the immune system of those individuals who catch colds frequently.

Please refer to *Bu Fei E Jiao Tang* (Tonify the Lung Decoction with Ass-Hide Gelatin) for a comparison and contrast with *Da Bu Yin Wan* (Great Tonify the Yin Pill) and *Sheng Mai San*.

Rén Shēn Gé Jiè Sǎn (Ginseng and Gecko Powder)

人參蛤蚧散
人參蛤蚧散

Pinyin Name: Ren Shen Ge Jie San

Literal Name: Ginseng and Gecko Powder

Alternate Name: Ginseng and Gecko Combination

Original Source: *Wei Sheng Bao Jian* (Precious Mirror of Health) by Luo Tian-Yi in the Yuan Dynasty

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	60g
<i>Ge Jie</i> (Gecko)	1 pair
<i>Fu Ling</i> (Poria)	60g
<i>Sang Bai Pi</i> (Cortex Mori)	60g
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum), <i>chao</i> (dry-fried)	150g
<i>Bei Mu</i> (Bulbus Fritillariae)	60g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	60g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	150g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into a fine powder and store it in a porcelain container. Take the powdered formula with a small amount of water daily. Today, it is usually prepared as a powder. Take 6g with water on an empty stomach in the morning and evening.

Note: The source text specifies that *Ge Jie* (Gecko) should be processed first to remove its odor; this is done by soaking it in river water, and renewing the water daily, for five days. It is then fried until it turns yellow and crisp. Today, it is usually processed by washing and cleaning it with

Rén Shēn Gé Jiè Sǎn (Ginseng and Gecko Powder)

liquor. Then, bake it using mild heat until it turns dry and crisp, and then grind it into a fine powder.

CHINESE THERAPEUTIC ACTIONS

- 1. Tonifies qi and clears the Lung
- 2. Arrests cough and relieves wheezing

CLINICAL MANIFESTATIONS

Chronic consumptive Lung disease due to deficiency heat: chronic cough, wheezing, dyspnea, thick, yellow sputum with or without blood and pus, a feeling of irritability and heat sensation in the chest, weight loss with or without facial edema, chronic lung atrophy, and a superficial, deficient pulse at the *cun* position.

CLINICAL APPLICATIONS

Chronic asthma, bronchial asthma, chronic bronchitis, tuberculosis, emphysema, and chronic respiratory tract infection.

EXPLANATION

Ren Shen Ge Jie San (Ginseng and Gecko Powder) treats chronic consumptive Lung disease due to deficiency heat. This syndrome usually originates from chronic coughing, which may weaken the qi and lead to weight loss. The Lung controls the distribution of water throughout the body. When the Lung is deficient and cannot properly distribute water, water stagnates, and dampness and phlegm begin to accumulate. Damp and phlegm accumulation causes facial edema and coughing with sputum. Chronic coughing and heat may also damage the blood

vessels, leading to bloody sputum. Damp and phlegm accumulation over time can create interior heat, which produces thick, yellow sputum and give rise to fidgeting. A superficial, deficient pulse at the *cun* position indicates severe Lung qi deficiency.

Ren Shen (Radix et Rhizoma Ginseng) tonifies *yuan* (source) *qi*, strengthens the Lung to improve respiration, and benefits the Spleen to eliminate dampness and phlegm. *Ge Jie* (Gecko), which enters the Lung and Kidney channels, tonifies the Lung to facilitate breathing, and benefits the Kidney to grasp qi downward. Tonifying the Lung and Kidney is absolutely necessary in chronic coughing syndromes, which involve deficiency of both organs. *Fu Ling* (Poria) strengthens the Spleen, dispels dampness and phlegm, and relieves facial edema. *Sang Bai Pi* (Cortex Mori) and *Ku Xing Ren* (Semen Armeniacae Amarum) correct the reversed flow of Lung qi to stop coughing and wheezing. *Bei Mu* (Bulbus Fritillariae) clears Lung heat, dispels phlegm, and stops coughing. *Zhi Mu* (Rhizoma Anemarrhenae) clears Lung heat and nourishes the Kidney to assist in grasping the qi downward. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi and harmonizes the herbs.

MODIFICATIONS

- For more Lung and Kidney deficiencies, add *Dong Chong Xia Cao* (Cordyceps).
- With more phlegm accumulation, add *Lai Fu Zi* (Semen Raphani) and *Bai Jie Zi* (Semen Sinapis).
- With yin deficiency, add *Mai Dong* (Radix Ophiopogonis).

Rén Shēn Gé Jiè Sǎn (Ginseng and Gecko Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Chronic consumptive Lung disease	<ul style="list-style-type: none">• Chronic coughing with thick, yellow sputum: damp and phlegm accumulation affecting Lung qi circulation• Facial edema: Lung deficiency unable to distribute water evenly• Bloody sputum: chronic coughing and heat damaging the blood vessels• Superficial, deficient pulse: Lung qi deficiency	<ul style="list-style-type: none">• Tonifies qi and clears the Lung• Arrests cough and relieves wheezing	<ul style="list-style-type: none">• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) strengthens the Lung and tonifies <i>yuan</i> (source) <i>qi</i>.• <i>Ge Jie</i> (Gecko) tonifies the Lung and Kidney to improve breathing.• <i>Fu Ling</i> (Poria) strengthens the Spleen.• <i>Sang Bai Pi</i> (Cortex Mori) and <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) correct the reversed flow of Lung qi to stop coughing and wheezing.• <i>Bei Mu</i> (Bulbus Fritillariae) clears Lung heat, dispels phlegm, and stops coughing.• <i>Zhi Mu</i> (Rhizoma Anemarrhenae) clears Lung heat and nourishes the Kidney.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi and harmonizes the herbs.

Rén Shēn Gé Jiè Sǎn (Ginseng and Gecko Powder)

- With profuse bleeding with or without pus, add *Bai Mao Gen* (Rhizoma Imperatae), charred *Di Yu* (Radix Sanguisorbae) and charred *Ce Bai Ye* (Cacumen Platycladi).
- For acute asthma attack due to heat, combine with *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- For acute asthma attack due to cold, combine with *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction).
- For chronic cough without heat signs, remove *Sang Bai Pi* (Cortex Mori) and *Zhi Mu* (Rhizoma Anemarrhenae).

CAUTIONS / CONTRAINDICATIONS

Ren Shen Ge Jie San is contraindicated in cases of cough and dyspnea caused by exterior conditions.

CLINICAL STUDIES AND RESEARCH

Respiratory disorders: In one report, 30 geriatric patients with chronic respiratory disorders (asthma, chronic bronchitis, bronchial asthma) characterized by deficiency and cold were treated with modified *Ren Shen Ge Jie San* with good results. The modified formula contained *Ren Shen* (Radix et Rhizoma Ginseng) 20g, *San Qi* (Radix et Rhizoma Notoginseng) 20g, *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) 30g, and *Ge Jie* (Gecko) 2 pieces. The formula was given as a fine powder, 1.5-2.0g per dose, two to three times daily. The study noted that the herbs effectively reduced or prevented asthma attacks in these patients.¹

RELATED FORMULAS

Rén Shēn Hú Táo Tāng (Ginseng and Walnut Decoction)

人參胡桃湯
人參胡桃湯

Pinyin Name: *Ren Shen Hu Tao Tang*

Literal Name: Ginseng and Walnut Decoction

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

Ren Shen (Radix et Rhizoma Ginseng),

qi (sliced) 1 piece [9g]

Hu Tao Ren (Semen Juglandis) 5 nuts [9g]

The source text states to cook the ingredients with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in a small bowl of water until the liquid is reduced to 70%. Take the strained, warm decoction before bedtime. Today, cook the herbs and take the decoction in three equally-divided doses on an empty stomach three times a day in the morning, noon, and evening.

Ren Shen Hu Tao Tang (Ginseng and Walnut Decoction) tonifies Lung and Kidney and relieves wheezing and

dyspnea. Clinically, this formula may be used to treat patients who cannot sleep due to coughing and wheezing characterized by Lung and Kidney deficiencies.

(Ginseng and Cordyceps Decoction)

人參蟲草湯
人參蟲草湯

Pinyin Name: *Ren Shen Chong Cao Tang*

Literal Name: Ginseng and Cordyceps Decoction

Original Source: *An Hui Zhong Yi Xue Yuan* (Anhui University School of Medicine) in 1990

Ren Shen (Radix et Rhizoma Ginseng)

Dong Chong Xia Cao (Cordyceps)

Huang Qi (Radix Astragali)

Ren Shen Chong Cao Tang (Ginseng and Cordyceps Decoction) tonifies Lung qi and Kidney yang, and is most effective in treating cough, wheezing, and dyspnea caused by Lung qi and Kidney yang deficiencies. This formula may also be taken on a long-term basis as a maintenance formula for asthma.

AUTHORS' COMMENTS

Ren Shen Ge Jie San and *Ren Shen Hu Tao Tang* (Ginseng and Walnut Decoction) both use *Ren Shen* (Radix et Rhizoma Ginseng) to tonify *yuan* (source) *qi* to treat asthma or cough due to deficiency. Their differences are:

- *Ren Shen Ge Jie San* is a stronger formula that is cold in nature, and is more suitable for prominent coughing and wheezing due to deficiency and heat. In this formula, *Ge Jie* (Gecko) and *Ren Shen* (Radix et Rhizoma Ginseng) tonify the Lung and Kidney to help the Kidney grasp the *qi*. *Sang Bai Pi* (Cortex Mori), *Bei Mu* (Bulbus Fritillariae), and *Ku Xing Ren* (Semen Armeniacae Amarum) clear and sedate the Lung to arrest wheezing and cough. *Fu Ling* (Poria) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) strengthen the Spleen, dispel dampness, and indirectly benefit Kidney *qi*. This formula is indicated for Kidney and Lung deficiencies, with dampness blocking the Kidney from grasping the *qi* downward.
- *Ren Shen Hu Tao Tang* is a gentler formula that is slightly warm in nature, and is more suitable for coughing and wheezing due to deficiency and cold. Warm herbs, such as *Ren Shen* (Radix et Rhizoma Ginseng), *Hu Tao Ren* (Semen Juglandis), and *Sheng Jiang* (Rhizoma Zingiberis Recens), tonify the Lung and Kidney.²

<i>Sang Bai Pi</i> (Cortex Mori)	12g
<i>Zi Wan</i> (Radix et Rhizoma Asteris)	9g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	6g
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	24g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare this formula as a decoction.

CHINESE THERAPEUTIC ACTIONS

- 1. Tonifies Lung qi
- 2. Strengthens *wei* (defensive) *qi*

CLINICAL MANIFESTATIONS

Lung qi deficiency: cough, dyspnea, wheezing, low energy, a low and weak voice, chills, intolerance of cold, spontaneous perspiration, a pale face, and a pale tongue with a thin, white coating.

CLINICAL APPLICATIONS

Chronic cough, asthma, and pulmonary tuberculosis.

EXPLANATION

Bu Fei Tang (Tonify the Lung Decoction) treats Lung qi deficiency characterized by wheezing and dyspnea.

Patients with weak Lung qi are unable to control rhythmic respiration, and thus they have symptoms such as wheezing, dyspnea, shortness of breath, and a low and weak voice. Wheezing and dyspnea may be due in part to Kidney deficiency, and its subsequent inability to grasp the qi. Deficient Lung qi is often accompanied by deficient *wei* (defensive) *qi*, which results in the body's inability to protect its exterior level. Consequently, patients usually present with chills, aversion to cold, and spontaneous perspiration. *Wei* (defensive) *qi* deficiency enables exterior cold factors to easily penetrate and constrict the Lung, causing cough, wheezing, and dyspnea. A pale face and a pale tongue with a thin, white coating are indicative of qi deficiency.

Huang Qi (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng) address the root of the illness by tonifying qi and strengthening *wei* (defensive) *qi*. *Sang Bai Pi* (Cortex Mori) guides Lung qi downward to relieve

Bu Fei Tang (Tonify the Lung Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Lung qi deficiency	<ul style="list-style-type: none">• Wheezing, dyspnea, shortness of breath, and a low and weak voice: Lung qi deficiency• Chills, intolerance to cold, and spontaneous perspiration: <i>wei</i> (defensive) <i>qi</i> deficiency• Pale face and a pale tongue: qi deficiency	<ul style="list-style-type: none">• Tonifies Lung qi• Strengthens <i>wei</i> (defensive) <i>qi</i>	<ul style="list-style-type: none">• <i>Huang Qi</i> (Radix Astragali) and <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonify qi and strengthen <i>wei</i> (defensive) <i>qi</i>.• <i>Sang Bai Pi</i> (Cortex Mori) guides Lung qi downward to relieve wheezing and dyspnea.• <i>Zi Wan</i> (Radix et Rhizoma Asteris) moistens the Lung to relieve cough.• <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) constricts Lung qi and stops spontaneous perspiration.• <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) tonifies the Kidney and enhances its function to grasp the qi downward.

Bǔ Fèi Tāng (Tonify the Lung Decoction)

wheezing and dyspnea. *Zi Wan* (Radix et Rhizoma Asteris) moistens the Lung to relieve cough. *Wu Wei Zi* (Fructus Schisandrae Chinensis) astringes Lung qi and stops spontaneous perspiration. *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Shu Di Huang* (Radix Rehmanniae Praeparata) tonify the Kidney and enhance its function of grasping qi downward.

MODIFICATIONS

- If there is severe qi deficiency, add *Si Jun Zi Tang* (Four-Gentlemen Decoction).
- With Kidney deficiency, add *Ren Shen Ge Jie San* (Ginseng and Gecko Powder).

CAUTIONS / CONTRAINDICATIONS

Avoid raw, uncooked, and cold types of foods while taking *Bu Fei Tang*.

Section 2

补血剂

— Blood-Tonifying Formulas

Sì Wù Tāng (Four-Substance Decoction)

四物湯

四物汤

Pinyin Name: *Sì Wù Tāng***Literal Name:** Four-Substance Decoction**Alternate Names:** *Szu Wu Tang*, Four Component Decoction, Four Herbs Decoction, Tangkuei Four Combination**Original Source:** *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85**COMPOSITION***Shu Di Huang* (Radix Rehmanniae Praeparata), *zheng* (steamed) with liquor [12g]*Dang Gui* (Radix Angelicae Sinensis), *jin* (soaked) and *chao* (dry-fried) with liquor [9-12g]*Bai Shao* (Radix Paeoniae Alba) [9-12g]*Chuan Xiong* (Rhizoma Chuanxiong) [6-9g]**DOSAGE / PREPARATION / ADMINISTRATION**

The source text states to coarsely grind equal amounts of the ingredients. Cook 9g of the powder in 1.5 large bowls of water and reduce it to 80%. Take the warm, strained decoction on an empty stomach. The source text mentions that *Ai Ye* (Folium Artemisiae Argyi) and *E Jiao* (Colla Corii Asini) may be added for conditions such as restless fetus, lochioschesis, *beng lou* (flooding and spotting), and profuse menstrual bleeding. Today, it is usually prepared as a decoction with the doses suggested in brackets. Take the decoction in three equally-divided doses three times daily (morning, noon and evening).

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the blood
2. Regulates blood circulation

CLINICAL MANIFESTATIONS

1. General blood deficiency: a pale face, pale lips, pale fingernails, a sallow appearance, dizziness, blurry vision, palpitations, insomnia, a pale tongue with a white tongue coating, and a fine, deficient or fine, wiry pulse.
2. Deficiency and injury of the *chong* (thoroughfare) and *ren* (conception) channels: irregular menstruation, hypomenorrhea or hypermenorrhea, delayed menstruation or

amenorrhea, trickling of blood with pale red color, hard abdominal mass from blood stasis, and pain around the umbilicus and lower abdomen.

3. Gestational and postpartum disorders: unstable fetus with bleeding, postpartum uterine bleeding with lower abdominal pain, chills and fever.

CLINICAL APPLICATIONS

Anemia, postpartum anemia, menstrual pain, irregular menstruation, abnormal vaginal discharge, breech presentation, threatened abortion, ectopic pregnancy, endometriosis, infertility, pelvic inflammatory disease, headache, neurogenic headache, vascular headache, headache due to trauma, insomnia, chronic nephritis, lumbago, sciatica, peri arthritis of the shoulder, itching, dermatitis, psoriasis, urticaria, and allergic rhinitis.

EXPLANATION

Blood deficiency, which usually manifests in the areas of menstruation and pregnancy in women, may also manifest in other aspects. A pale face, pale lips, pale fingernails, and a sallow appearance are the results of the blood's inability to nourish the skin. The Liver stores blood; thus, insufficient blood in the Liver causes lack of nourishment in the upper body, leading to dizziness, blurry vision and

Sì Wù Tāng (Four-Substance Decoction)

Si Wu Tang (Four-Substance Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood deficiency	<ul style="list-style-type: none"> • Pale face, pale lips, pale fingernails, a sallow appearance, dizziness, blurry vision, a pale tongue with a white tongue coating, and a fine, deficient pulse: blood deficiency • Palpitations and insomnia: blood deficiency unable to nourish the Heart • Irregular menstruation (hypomenorrhea, delayed menstruation, amenorrhea, hypermenorrhea and hard abdominal mass from blood stasis): deficiency and injury of the <i>chong</i> (thoroughfare) and <i>ren</i> (conception) channels 	<ul style="list-style-type: none"> • Nourishes the blood • Regulates blood circulation 	<ul style="list-style-type: none"> • <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) tonifies yin and promotes blood production. • <i>Dang Gui</i> (Radix Angelicae Sinensis) tonifies the blood, activates blood circulation, and regulates the menses. • <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes the blood, consolidates yin, and harmonizes the blood. • <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activates and regulates blood circulation.

tinnitus. The Heart dominates the blood, and deficiency of blood leads to lack of nourishment to the *shen* (spirit), causing palpitations and insomnia. A pale tongue with a white tongue coating is typical of blood deficiency, as is also the case with a fine pulse.

Si Wu Tang (Four-Substance Decoction) is indicated for deficiency or injury of the *chong* (thoroughfare) and *ren* (conception) channels with blood deficiency. The *chong* (thoroughfare) and *ren* (conception) channels are closely related to the blood and uterus, and deficiency of these two channels may cause delayed menstruation with scanty amount of blood (hypomenorrhea). Pale red menstruation suggests deficiency of blood. In severe cases, amenorrhea may occur. In addition to blood deficiency, there may be other complications. If the Spleen becomes very deficient and fails to keep the blood circulating within the vessels, hypermenorrhea may occur. If the Kidney becomes deficient, trickling of blood may occur. If there is coldness inside the body, qi and blood may stagnate, causing pain around the umbilicus and the lower abdomen. Since the *ren* (conception) channel dominates the uterus, deficiency or injury of the *ren* channel may result in lack of nourishment to the fetus, causing it to become unstable.

All of the herbs in this formula enter the *xue* (blood) level. *Shu Di Huang* (Radix Rehmanniae Praeparata), the chief herb, tonifies the blood. It also tonifies the Kidney, which generates the marrow necessary for increased blood production. When tonifying blood, it is essential to also move blood to prevent stagnation. *Dang Gui* (Radix Angelicae Sinensis) both tonifies blood and activates blood circulation. It nourishes the Liver and regulates

the menses. *Bai Shao* (Radix Paeoniae Alba) nourishes the blood and consolidates yin. It harmonizes the blood in the *ying* (nutritive) level. *Chuan Xiong* (Rhizoma Chuanxiong) activates and regulates blood circulation and prevents the tonic herbs from causing stagnation in the body.

MODIFICATIONS

- If there is profuse menstrual bleeding, add *Ai Ye* (Folium Artemisiae Argyi) and *E Jiao* (Colla Corii Asini).
- For irregular menstruation, add *E Jiao* (Colla Corii Asini), *Ai Ye* (Folium Artemisiae Argyi), and *Xiang Fu* (Rhizoma Cyperi).
- For dysmenorrhea due to qi stagnation and blood deficiency, add *Xiang Fu* (Rhizoma Cyperi) and *Yan Hu Suo* (Rhizoma Corydalis).
- For hypermenorrhea, add *Huang Qin* (Radix Scutellariae) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- With severe qi deficiency, combine with *Si Jun Zi Tang* (Four-Gentlemen Decoction).
- With qi stagnation, add *Zhi Shi* (Fructus Aurantii Immaturus), *Hou Po* (Cortex Magnoliae Officinalis), *Xiang Fu* (Rhizoma Cyperi), and *Yu Jin* (Radix Curcumae).
- With tidal fever from blood deficiency, add *Mu Dan Pi* (Cortex Moutan) and *Di Gu Pi* (Cortex Lycii).
- With headache due to blood deficiency, add *Ju Hua* (Flos Chrysanthemi), *Gao Ben* (Rhizoma et Radix Ligustici), and *Gou Teng* (Ramulus Uncariae cum Uncis).
- With dizziness and vertigo, add *Qin Jiao* (Radix Gentianae Macrophyllae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).

Sì Wù Tāng (Four-Substance Decoction)

- With vomiting of blood or nosebleeds, add *Ce Bai Ye* (Cacumen Platycladi) and *Qian Cao* (Radix et Rhizoma Rubiae).
- For the presence of phlegm in an overweight person, add *Ban Xia* (Rhizoma Pinelliae) and *Ju Hong* (Exocarpium Citri Reticulatae).
- For the presence of phlegm in an underweight person, add charred *Zhi Zi* (Fructus Gardeniae), *Zhi Mu* (Rhizoma Anemarrhenae), and *Huang Bo* (Cortex Phellodendri Chinensis).
- With abdominal pain, slight perspiration, and aversion to wind, add *Rou Gui* (Cortex Cinnamomi) and *Pao Jiang* (Rhizoma Zingiberis Praeparatum).
- If there is white or blood-streaked vaginal discharge, add *Xiang Fu* (Rhizoma Cyperi) and *Gui Zhi* (Ramulus Cinnamomi).

CAUTIONS / CONTRAINDICATIONS

- *Si Wu Tang* should be used with caution in patients with deficiency of the Spleen and Stomach, because the stagnating nature of *Shu Di Huang* (Radix Rehmanniae Praeparata) could affect digestion.
- Although this formula treats blood deficiency, it is not suitable for patients who suffer from blood or qi collapse, yin deficiency with heat, or those with middle *jiao* deficiency manifesting in diarrhea.
- This formula should be used with caution during pregnancy and at low doses in infants.¹

PHARMACOLOGICAL EFFECTS

1. **Hematopoietic:** *Si Wu Tang*, *Si Jun Zi Tang* (Four-Gentlemen Decoction), and *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), were given orally to mice to evaluate their effect for treatment of anemia. The study concluded that *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) was most effective, followed by *Si Wu Tang*, and *Si Jun Zi Tang* (Four-Gentlemen Decoction).² The mechanism of action was attributed to increased activity of CSF.³
2. **Antiplatelet:** Administration of *Si Wu Tang* in mice was associated with a preventative effect on the formation of blood clots. The mechanism of action was attributed to its antiplatelet effect.^{4,5}
3. **Radioprotective:** Administration of *Si Wu Tang* 5-120 minutes prior to exposure to X-ray was beneficial in minimizing the related side effects. Administration of the herbs afterwards, however, was not associated with any benefit. The protective effect of the herbs against radiation was attributed to its regulating effect on the immune system.⁶ Another study reported significant protective effect against high and low dose of gamma-irradiation. Protective effects included reduced frequency of radia-

tion-induced apoptosis ($p < 0.05$) and increased formation of endogenous spleen colonies ($p < 0.05$).⁷

4. **Cognitive:** Administration of *Si Wu Tang* was associated with a dose dependant effect to improve memory and cognitive functions in rats. The dose given ranged from 0.5 to 1.0 g/kg of the dried herbs.⁸
5. **Antioxidant:** One study reports *Si Wu Tang* to have marked antioxidant and antiaging effects.⁹
6. **Cardiovascular:** According to one study on 7 healthy adult males (age, 22.3 +/- 1.8 years old), administration of *Si Wu Tang* induced an increase of diastolic blood pressure and mean blood pressure.¹⁰
7. **Antipruritic and anti-inflammatory:** One study reported *Si Wu Tang* to have marked antipruritic and anti-inflammatory effects for treatment of cutaneous pruritus, chronic inflammation, and other diseases. The mechanism of action was attributed to the inhibition of histamine release from mast cells in a concentration-dependent fashion.¹¹
8. **Antitumor:** Administration of *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) was associated with a preventive effect on endometrial carcinogenesis in mice. The antitumor effects of *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) was attributed in part to the contents of *Si Wu Tang*, as the administration of these four herbs was found to have an inhibitory effect on estrogen-induced expression of c-fos, interleukin (IL)-1alpha and tumor necrosis factor (TNF)-alpha in uteri of ovariectomized mice.¹²

CLINICAL STUDIES AND RESEARCH

1. **Menstrual pain:** Many studies have shown that menstrual pain can be treated effectively with *Si Wu Tang*. In one study, 57 patients with menstrual pain were treated effectively using *Si Wu Tang* plus *Bai Zhi* (Radix Angelicae Dahuricae), *Mu Xiang* (Radix Aucklandiae), *Xiang Fu* (Rhizoma Cyperi), and others as the base formula. Further modifications were made as follows: for qi and blood stagnation, *Niu Xi* (Radix Achyranthis Bidentatae) and *Yi Mu Cao* (Herba Leonuri) were added; for stagnation of cold and dampness, *Ai Ye* (Folium Artemisiae Argyi) and *Rou Gui* (Cortex Cinnamomi) were added; for qi and blood deficiencies, *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) were added; for Liver qi stagnation, *Chai Hu* (Radix Bupleuri) and *Chuan Lian Zi* (Fructus Toosendan) were added; for Liver and Kidney yin deficiencies, *Gou Qi Zi* (Fructus Lycii) and *Nu Zhen Zi* (Fructus Ligustri Lucidi) were added; for severe menstrual pain, *Xue Jie* (Sanguis Draconis), *Su Mu* (Lignum Sappan), and *Tu Bie Chong* (Eupolyphaga seu Steleophaga) were added; and for abnormal development of the uterus, *Zi Shi Ying* (Fluoritum) and *Yin Yang Huo* (Herba Epimedii) were added. Of 57 patients, the study

Sì Wù Tāng (Four-Substance Decoction)

reported significant improvement in 25 patients, moderate improvement in 25 patients, and no improvement in 7 patients.¹³ Another study of 62 patients with menstrual pain reported 95.1% effectiveness using an herbal formula that contained *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), *Bai Shao* (Radix Paeoniae Alba), *Xiang Fu* (Rhizoma Cyperi), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and others. The treatment protocol was to take the herbs daily for approximately 7 days before the period, and discontinue when the period begins.¹⁴ Lastly, in one report, patients with severe menstrual pain were treated successfully with *Si Wu Tang* with addition of *Shi Xiao San* (Sudden Smile Powder), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Xiang Fu* (Rhizoma Cyperi), and *Yan Hu Suo* (Rhizoma Corydalis). The treatment protocol was to begin the herbal therapy for 3-5 days, starting 5-7 days prior to the menstruation, and continue for 3 months.¹⁵

2. **Irregular menstruation:** In one study, 174 of 180 women with irregular menstruation had complete recovery after herbal treatment. The base formula included *Si Wu Tang* plus *Xiang Fu* (Rhizoma Cyperi), *Fu Shen* (Poria Paradicis), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). *Huang Qin* (Radix Scutellariae) and *Zhi Zi* (Fructus Gardeniae) were added for heat in the *xue* (blood) level before the period; and *Huang Qi* (Radix Astragali) and *Gan Jiang* (Rhizoma Zingiberis) were added for cold in the *xue* (blood) level after the period. *Yan Hu Suo* (Rhizoma Corydalis) and *Qing Pi* (Pericarpium Citri Reticulatae Viride) were added for blood stagnation with scanty menstrual discharge; and *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added for qi deficiency with profuse menstrual discharge.¹⁶ According to another study, 40 women with irregular and painful menstruation were treated with modified *Si Wu Tang* with marked improvement in 24 patients, moderate improvement in 12 patients, and no benefit in 4 patients.¹⁷
3. **Beng lou (flooding and spotting):** One study reported satisfactory results using modified *Si Wu Tang* to treat 27 women with *beng lou* (flooding and spotting). In addition to *Si Wu Tang* as the base formula, other herbs were added based on such differential diagnosis as heat in the *xue* (blood) level, qi deficiency, and Kidney deficiency.¹⁸
4. **Breech presentation:** Modified *Si Wu Tang* was used to treat 80 women with breech presentation. The herbal treatment was based on *Si Wu Tang*, with removal of *Shu Di Huang* (Radix Rehmanniae Praeparata) and addition of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria). The herbs were given daily for 3 doses per course of treatment. The presentation was corrected in 20 out of 22 women who were between 7-8 months pregnant, and 55 out of 58 women who were more than 8 months

pregnant. The overall effectiveness rate was 93.75%.¹⁹ Another study of 155 patients of breech presentation reported 78.2% effectiveness using an herbal formula that contained *Si Wu Tang* plus *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Huang Qi* (Radix Astragali), and *Zhi Qiao* (Fructus Aurantii).²⁰

5. **Endometriosis:** One study used modified *Si Wu Tang* to treat 51 women with endometriosis and reported complete recovery in 40 patients (79.4%) and improvement in 11 patients (21.6%). The treatment included *Si Wu Tang* plus *Chi Shao* (Radix Paeoniae Rubra), *Yi Mu Cao* (Herba Leonuri) and *Huang Qi* (Radix Astragali) as the base formula. Modifications were made by adding *Ze Lan* (Herba Lycopi) and *Shui Zhi* (Hirudo) for severe blood stagnation; *Di Gu Pi* (Cortex Lycii) and *Lian Qiao* (Fructus Forsythiae) for yin-deficient heat; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and a large dose of *Huang Qi* (Radix Astragali) for qi deficiency; *He Shou Wu* (Radix Polygoni Multiflori) and *E Jiao* (Colla Corii Asini) for blood deficiency; *Ai Ye* (Folium Artemisiae Argyi) and *Rou Gui* (Cortex Cinnamomi) for cold in the uterus; and *Xia Ku Cao* (Spica Prunellae) and *Zhe Shi* (Haematitum) for Liver qi rising.²¹
6. **Infertility:** Use of modified *Si Wu Tang* was associated with good results to treat infertility. In addition to the base formula, *Zi Shi Ying* (Fluoritum), *Xian Mao* (Rhizoma Curculiginis), *Yin Yang Huo* (Herba Epimedii), *Tu Si Zi* (Semen Cuscutae), and *Fu Pen Zi* (Fructus Rubi) were added for Kidney yang deficiency; and *Nu Zhen Zi* (Fructus Ligustri Lucidi), *Mo Han Lian* (Herba Ecliptae), *Gou Qi Zi* (Fructus Lycii), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Xuan Shen* (Radix Scrophulariae), and *Mai Dong* (Radix Ophiopogonis) were added for Kidney yin deficiency. Each menstrual cycle was considered as one course of treatment (20 +/- 2 days). Herbs were not given during the period or if pregnancy was achieved. Successful pregnancy was reported once in 19 of 27 women. The average duration of treatment was 45 packs of herbs.²²
7. **Pelvic inflammatory disease:** According to one study, 154 patients with pelvic inflammatory disease were treated with complete recovery in 89 patients, marked improvement in 46 patients, moderate improvement in 8 patients, and no benefit in 11 patients. The overall effectiveness was 92.9%. The herbal treatment contained *Si Wu Tang* plus *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), and *Zi Hua Di Ding* (Herba Violae) as the base formula. Additional modifications were made when necessary. For fever, *Dang Gui* (Radix Angelicae Sinensis) was removed and *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae) were added. For abdominal pain, *Yan Hu Suo* (Rhizoma Corydalis) and *Pu*

Si Wu Tang (Four-Substance Decoction)

Huang (Pollen Typhae) were added. For poor appetite and diarrhea, *Shu Di Huang* (Radix Rehmanniae Praeparata) was removed, and *Sha Ren* (Fructus Amomi) and *Mai Ya* (Fructus Hordei Germinatus) were added.²³

8. **Insomnia:** Ten patients with insomnia were treated with herbs resulting in complete recovery in 6 patients (6-7 hours of sleep), moderate improvement in 3 patients (5-6 hours of sleep), and slight improvement in 1 patient. The herbal treatment combined *Si Wu Tang* with other herbs that invigorate blood circulation. The duration of treatment was one month or less.²⁴
9. **Chronic nephritis:** It has been reported that patients with chronic nephritis characterized by proteinuria and hematuria responded well to the combination of *Si Wu Tang* and *Wu Ling San* (Five-Ingredient Powder with Poria). In a case report, two patients were successfully treated with herbs without recurrence for 5-7 years.²⁵
10. **Lumbago:** In one study, 135 women with low back pain characterized by “deficiency” were treated with herbs resulting in complete recovery in 37 patients, marked improvement in 82 patients, and no benefit in 16 patients. The herbs used included *Si Wu Tang* and *Li Zhong Tang* (Regulate the Middle Decoction). The average duration of treatment was 6.52 days.²⁶
11. **Sciatica:** Modified *Si Wu Tang* was used to treat 112 patients with sciatica (history of 6 months to 15 years) with significant improvement in 61 patients, moderate improvement in 44 patients, and no benefit in 7 patients. The overall effective rate was 93.8%. The base formula contained *Si Wu Tang* plus *Wu Gong* (Scolopendra) and *Wu Shao She* (Zaocys). Modifications included the addition of *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi) for *tong bi* (extremely painful obstruction); *Du Huo* (Radix Angelicae Pubescentis), *Qin Jiao* (Radix Gentianae Macrophyllae), and *Fang Feng* (Radix Saposhnikoviae) for *xing bi* (mobile painful obstruction); and *Fu Ling* (Poria), *Yi Yi Ren* (Semen Coicis) and *Cang Zhu* (Rhizoma Atractylodis) for *zhuo bi* (fixed painful obstruction).²⁷
12. **Periarthritis of the shoulder:** One study reported marked effects in treating periarthritis of the shoulder using *Si Wu Tang* plus *Du Zhong* (Cortex Eucommiae), *Jiang Huang* (Rhizoma Curcumae Longae), *Xi Xin* (Radix et Rhizoma Asari), *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati), and others. Strategies for modifications included addition of *Fang Feng* (Radix Saposhnikoviae) for wind; *Zhi Chuan Wu* (Radix Aconiti Praeparata) for cold; *Dan Nan Xing* (Arisaema cum Bile) for dampness, and *Dang Shen* (Radix Codonopsis) for qi deficiency. Of 215 patients, the study reported complete recovery in 93 patients, improvement in 104 patients, and no benefit in 18 patients.²⁸

13. **Neurogenic headache:** *Si Wu Tang* has been shown in numerous studies to effectively treat headache. According to one study, 44 patients with neurogenic headache were treated with modified *Si Wu Tang* with complete recovery in 23 patients, significant improvement in 13 patients, moderate improvement in 7 patients, and no benefit in 1 case. Modifications included addition of *Sang Ye* (Folium Mori) and *Ju Hua* (Flos Chrysanthemi) for dizziness due to Liver fire rising; *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) for sharp, stabbing headache; and *Gou Qi Zi* (Fructus Lycii) and *He Shou Wu* (Radix Polygoni Multiflori) for dizziness and pain.²⁹ According to another study, 20 of 24 patients with neurogenic headache had complete recovery after treatment with a formula that contained *Si Wu Tang* plus *Tian Ma* (Rhizoma Gastrodiae), *Jiang Can* (Bombyx Batryticatus), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Da Zao* (Fructus Jujubae), *Shi Jue Ming* (Concha Halitidis), and *Wu Gong* (Scolopendra).³⁰
14. **Vascular headache:** One hundred and four patients with vascular headache were treated with modified *Si Wu Tang* with complete recovery in 80 patients, marked improvement in 16 patients, improvement in 6 patients, and no benefit in 2 patients. The base formula included *Si Wu Tang* plus *Yan Hu Suo* (Rhizoma Corydalis), *Xi Xin* (Radix et Rhizoma Asari) and *Shi Jue Ming* (Concha Halitidis). Modifications included the addition of *Xia Ku Cao* (Spica Prunellae) and *Ju Hua* (Flos Chrysanthemi) for heat; *Gui Zhi* (Ramulus Cinnamomi) for cold; *Bai Zhi* (Radix Angelicae Dahuricae) for frontal headache; *Qiang Huo* (Rhizoma et Radix Notopterygii) for occipital headache; *Gao Ben* (Rhizoma et Radix Ligustici) for vertex headache; and others as needed. The duration of treatment was 7 days per course of treatment. The overall rate of effectiveness was 98%.³¹
15. **Headache due to trauma:** One study reported 96.2% effectiveness in treating 80 patients with headache due to trauma with an herbal formula that contained *Si Wu Tang*, *Huang Qi* (Radix Astragalus), *Gui Zhi* (Ramulus Cinnamomi), *Wu Tang* (Astragalus and Cinnamon Twig Five-Substance Decoction), and others. Modifications included addition of *Xi Xin* (Radix et Rhizoma Asari) for severe pain; *Dang Shen* (Radix Codonopsis) for qi deficiency; *Bei Sha Shen* (Radix Glehniae) for yin deficiency; *Yin Yang Huo* (Herba Epimedii) for yang deficiency; and dry-fried *Shan Zha* (Fructus Crataegi) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for poor appetite. Out of 80 patients, the study reported complete recovery in 48 patients, improvement in 29 patients, and no benefit in 3 patients.³²
16. **Itching:** One study of 134 patients with skin itching reported 91.8% effectiveness when treated with *Si Wu*

Sì Wù Tāng (Four-Substance Decoction)

Tang plus *He Shou Wu* (Radix Polygoni Multiflori), *Wu Shao She* (Zaocys), and *Ji Li* (Fructus Tribuli).³³

17. Psoriasis: One study consisting of 10 psoriasis patients reported successful results using as treatment *Si Wu Tang*, *Ma Huang Tang* (Ephedra Decoction), *Wu Shao She* (Zaocys), *Tu Bie Chong* (Eupolyphaga seu Steleophaga), *Qiang Huo* (Rhizoma et Radix Notopterygii), and others as needed.³⁴ According to another study, 13 patients with psoriasis were treated with complete recovery in 8 patients, improvement in 2 patients, and no benefit in 3 patients. The herbal formula included *Si Wu Tang* plus *Bai Xian Pi* (Cortex Dictamni), *Ku Shen* (Radix Sophorae Flavescentsis), and *Da Zao* (Fructus Jujubae).³⁵

18. Urticaria: Administration of a modified *Si Wu Tang* formula was found to be effective in treating both acute and chronic urticaria. The herbal formula contained *Si Wu Tang* plus *Chan Tui* (Periostracum Cicadae), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Jiang Can* (Bombyx Batryticatus), and *Wu Shao She* (Zaocys). The treatment protocol was to administer the herbs in decoction, for 7-10 packs of herbs per course of treatment. Of 185 patients, the study reported complete recovery in 161 patients, improvement in 20 patients, and no benefit in 4 patients. Among 161 patients who had complete recovery, only 4 had recurrence within 1 year of follow-up.³⁶

19. Allergic rhinitis: Forty-two patients with allergic rhinitis were treated with modified *Si Wu Tang* with good results. The herbs used included *Si Wu Tang* with additions such as *Cang Er Zi* (Fructus Xanthii), *Xin Yi Hua* (Flos Magnoliae), and *Xu Chang Qing* (Radix et Rhizoma Cynanchi Paniculati). *Ju Hua* (Flos Chrysanthemi) and *Bai Zhi* (Radix Angelicae Dahuricae) were added for headache; and *Yu Ping Feng San* (Jade Windscreen Powder) was added for *wei* (defensive) *qi* deficiency. The treatment protocol was to administer the herbs in decoction for 15 days per course of treatment, for a total of 2-4 courses. Out of 42 patients, the study reported complete recovery in 23 patients, marked improvement in 13 patients, and no benefit in 6 patients. The overall rate of effectiveness was 87.5%.³⁷

HERB-DRUG INTERACTION

- **Penicillin-induced dermatitis:** Ten patients with dermatitis caused by penicillin were treated with herbs with complete recovery in 7 patients and improvement in 3 patients. The study also noted that the time required for recovery and improvement were shorter when treated with herbs in comparison with no treatment. The herbs used included *Si Wu Tang*, *Xie Bai San* (Drain the White Powder), and others as deemed necessary.³⁸
- **Scopolamine-induced spatial cognitive deficits:** Administration of *Si Wu Tang* has a dose-dependent effect to

reverse scopolamine-induced impairments in radial maze performance in mice.³⁹

TOXICOLOGY

In acute toxicology studies in mice, oral administration of water or methyl alcohol extract at 2 g/kg did not cause any fatality. No fatality was associated with intraperitoneal injection at 2 g/kg for the methyl alcohol extract, or 0.5 g/kg for the water extract. However, 60% fatality was reported with intraperitoneal injection at 1 g/kg for the water extract. The study concluded that the water extract of this formula is slightly more toxic than the alcohol extract.⁴⁰

RELATED FORMULAS

Shèng Yù Tāng (Sage-Like Healing Decoction)

聖愈湯
圣愈汤

Pinyin Name: Sheng Yu Tang

Literal Name: Sage-Like Healing Decoction

Alternate Name: Tangkuei Four Plus Combination

Original Source: *Lan Shi Mi Cang* (Secrets from the Orchid Chamber) by Li Gao in 1336

<i>Di Huang</i> (Radix Rehmanniae)	0.9g
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	0.9g

<i>zhi</i> (fried with liquid)	15g [18g]

Sì Wù Tāng (Four-Substance Decoction)

The source text states to prepare this formula as a decoction. Today, *Ren Shen* (Radix et Rhizoma Ginseng) is usually replaced with 20g of *Dang Shen* (Radix Codonopsis), and this formula may be prepared as a decoction with the doses suggested indicated in brackets. This formula tonifies qi and blood, and is clinically applicable for female patients with symptoms of both qi and blood deficiencies, manifesting with early menstruation, excessive menstrual bleeding that is light in color, lethargy, weakness of the limbs, and low energy.

Xu Duan (Radix Dipsaci)

Zhuang Jin Tang (Strengthen the Tendon Decoction) treats chronic and long-term musculoskeletal disorders characterized by atrophy and wasting of muscles, tendons and ligaments, decreased range of motion and mobility of the joints, and generalized weakness, soreness and pain. The composition of this formula follows the general principles of *Si Wu Tang* (Four-Substance Decoction) to tonify the blood and activate blood circulation. In addition, it contains herbs that open the channels and collaterals and strengthen the muscles and tendons.

These four formulas regulate menstruation and treat female infertility.

- *Tiao Jing Yi Hao* (Regulate Menses Formula One) addresses the menstrual phase of the cycle. It contains herbs to move qi and blood to ensure the smooth flow of the period.
- *Tiao Jing Er Hao* (Regulate Menses Formula Two) is used during the follicular phase. It contains herbs to tonify the blood to ensure that the essential nutrients and substances of the body are properly replenished so that the body is ready for conception.
- *Tiao Jing San Hao* (Regulate Menses Formula Three) is used during the ovulatory phase. It contains herbs to tonify Kidney yang to help the eggs mature and promote ovulation.
- *Tiao Jing Si Hao* (Regulate Menses Formula Four) is used during the luteal phase to address premenstrual syndrome. It contains herbs to regulate qi and calm the *shen* (spirit).

AUTHORS' COMMENTS

The ancient tradition observes the four seasons as a natural cycle of genesis (spring), growth (summer), harvest (autumn) and storing (winter), respectively. Similarly, *Si Wu Tang* is formulated following the same principles. *Dang Gui* (Radix Angelicae Sinensis), sweet, warm and nourishing, represents genesis of blood like the spring sun. *Chuan Xiong* (Rhizoma Chuanxiong), acrid, warm and dispersing, corresponds to the growth and prospering energy of summer. *Bai Shao* (Radix Paeoniae Alba), sour and astringent, represents harvest in the autumn. Lastly, *Shu Di Huang* (Radix Rehmanniae Praeparata), rich and tonifying, implies storage of blood in winter. These four substances balance each other similarly to the way that seasons are balanced in nature.

Si Wu Tang is considered to be the representative formula for tonifying the blood. Although the source text states to use equal amounts of all four ingredients, the doses may be modified depending on the condition of the individual patient. General guidelines for modifications are as follows:

- In patients with blood stagnation, *Bai Shao* (Radix Paeoniae Alba) should be replaced with *Chi Shao* (Radix Paeoniae Rubra).
- In patients with heat, *Shu Di Huang* (Radix Rehmanniae Praeparata) should be replaced with *Di Huang* (Radix Rehmanniae).
- In patients in which *Shu Di Huang* (Radix Rehmanniae Praeparata) is not used because of its cloying nature, the dose of *Bai Shao* (Radix Paeoniae Alba) should be higher than that of *Dang Gui* (Radix Angelicae Sinensis). This is

Si Wù Tāng (Four-Substance Decoction)

the general principle in balancing tonics: adjust the individual dose of the herbs to balance the herbal temperature so that the formula is not too warm or cold.

Si Wu Tang is one of the most commonly used formulas to regulate menstruation. Modifications to enhance its efficacy in regulating menstruation are as follows:

- Presence of heat before the period: add *Mu Dan Pi* (Cortex Moutan) and *Huang Qin* (Radix Scutellariae).
- Yin deficiency before the period: add *Di Gu Pi* (Cortex Lycii), *Huang Bo* (Cortex Phellodendri Chinensis), and *Zhi Mu* (Rhizoma Anemarrhenae); and use *Di Huang* (Radix Rehmanniae) instead of *Shu Di Huang* (Radix Rehmanniae Praeparata).
- Cold stagnation after the period: use *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit) plus *Shi Xiao San* (Sudden Smile Powder).
- Scanty menstruation due to qi and blood stagnation: add *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Shi Xiao San* (Sudden Smile Powder).
- Scanty menstruation due to qi and blood deficiencies: add *Si Jun Zi Tang* (Four-Gentlemen Decoction), *Xiang Fu* (Rhizoma Cyperi), *Huang Qi* (Radix Astragali), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae).
- Scanty menstruation due to Liver and Kidney yin deficiencies: add *Mai Dong* (Radix Ophiopogonis) and *He Shou Wu* (Radix Polygoni Multiflori).

(Four-Substance Decoction with Safflower and Peach Pit)

桃紅四物湯

桃红四物汤

Pinyin Name: *Tao Hong Si Wu Tang*

Literal Name: Four-Substance Decoction with Safflower and Peach Pit

Alternate Names: *Tao Hung Szu Wu Tang*, Persica, Carthamus and Tang-kuei Decoction; Peach Kernel and Safflower plus Four Herbs; Tangkuei Four and Persica Carthamus Combination

Original Source: *Yi Zong Jin Jian* (Golden Mirror of the Medical Tradition) by Wu Qian in 1742

COMPOSITION

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	6g [15g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	6g [12g]
<i>Bai Shao</i> (Radix Paeoniae Alba), <i>chao</i> (dry-fried)	6g [10g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	3g [8g]
<i>Tao Ren</i> (Semen Persicae)	6g [6g]
<i>Hong Hua</i> (Flos Carthami)	3g [4g]

DOSAGE / PREPARATION / ADMINISTRATION

Prepare this formula as a decoction, and take three times a day, making sure to finish within one day. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the blood
2. Regulates blood circulation
3. Eliminates blood stasis

CLINICAL MANIFESTATIONS

Blood deficiency with blood stagnation: early menstruation; excessive menstrual bleeding that is thick, sticky and purplish in color, or bleeding with blood clots; and abdominal fullness and pain.

CLINICAL APPLICATIONS

Dysmenorrhea, irregular menstruation, infertility, chronic pelvic inflammation, cerebral infarction, sequelae of stroke, hypertension, hyperlipidemia, diabetic neuropathy, headache, migraine, bone fractures, post-herpetic neuralgia,

allergic rhinitis, optic nerve atrophy, optic neuritis, cataract, glaucoma, urticaria, itching, eczema, psoriasis, and chloasma.

EXPLANATION

Tao Hong Si Wu Tang (Four-Substance Decoction with Safflower and Peach Pit) contains *Si Wu Tang* (Four-Substance Decoction) plus *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami). The addition of these two herbs enables this formula to dispel blood stagnation in addition to tonifying the blood and regulating blood circulation. Historically, it has been used for female patients who have early menstruation with excessive bleeding that is thick, sticky, and purplish in color, or bleeding with blood clots, and abdominal fullness and pain. Today, its clinical application has been extended to include many disorders characterized by both blood deficiency and blood stagnation.

Tao Hong Si Wu Tang is an ideal formula to tonify the blood, regulate blood circulation, and remove blood stagnation. It should be kept in mind, however, that

Tao Hong Si Wu Tang (Four-Substance Decoction with Safflower and Peach Pit)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood deficiency with blood stagnation	<ul style="list-style-type: none"> • Pale face, pale lips, pale fingernails, a sallow appearance, and dizziness: blood deficiency • Abdominal fullness and pain, menstrual bleeding that is thick, sticky and purplish in color, or bleeding with blood clots: blood stagnation 	<ul style="list-style-type: none"> • Nourishes the blood • Regulates blood circulation • Eliminates blood stasis 	<ul style="list-style-type: none"> • <i>Si Wu Tang</i> (Four-Substance Decoction) tonifies the blood and regulates blood circulation. • <i>Tao Ren</i> (Semen Persicae) and <i>Hong Hua</i> (Flos Carthami) regulate blood circulation and eliminate blood stagnation.

Táo Hóng Sì Wù Tāng

(Four-Substance Decoction with Safflower and Peach Pit)

because it moves the blood, it could cause excessive menstrual bleeding in some patients if used too frequently or if used longer than necessary.

MODIFICATIONS

- If there are more signs of stagnation and heat, add *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae).
- With abdominal distention and pain during menstruation, add *Xiang Fu* (Rhizoma Cyperi) and *Yan Hu Suo* (Rhizoma Corydalis).
- With more blood stasis, add *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- For cerebrovascular accidents and complications, add *Huang Qi* (Radix Astragali), *Di Long* (Pheretima), *Niu Xi* (Radix Achyranthis Bidentatae), and *Gou Teng* (Ramulus Uncariae cum Uncis).
- For vascular headache, add *Gou Teng* (Ramulus Uncariae cum Uncis) and *Ji Li* (Fructus Tribuli).
- For optic nerve atrophy, add *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Chong Wei Zi* (Fructus Leonuri), *Xia Ku Cao* (Spica Prunellae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- For amenorrhea, add *Yi Mu Cao* (Herba Leonuri), *Ze Lan* (Herba Lycopi), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle).
- For psoriasis, add *Huang Qi* (Radix Astragali), *Fang Feng* (Radix Saposhnikoviae), *Bai Xian Pi* (Cortex Dictamni), *Chan Tui* (Periostracum Cicadae), and *Ku Shen* (Radix Sophorae Flavescentis).
- For injuries to tendons and ligaments, add *Ji Xue Teng* (Caulis Spatholobi) and *Niu Xi* (Radix Achyranthis Bidentatae).

CAUTIONS / CONTRAINDICATIONS

- *Tao Hong Si Wu Tang* should be used with caution in patients with digestive weakness.
- This formula should also be used with caution in anemic patients with coldness, since this formula is cool by nature.
- Since this formula has strong actions to regulate blood circulation and eliminate blood stasis, it should be discontinued once the desired effects are achieved to avoid profuse bleeding.
- This formula is contraindicated during pregnancy.
- This formula should be used with caution in menstrual disorders in women with underlying qi and blood deficiencies.¹

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** In an *in vitro* study, use of *Tao Hong Si Wu Tang* was shown to dilate the coronary artery and increase blood perfusion to cardiac muscles.²

2. **Antihyperlipidemic:** Administration of *Tao Hong Si Wu Tang* at 16 g/kg in rats was shown to decrease both total cholesterol and triglyceride levels.³

3. **Anti-inflammatory:** According to an *in vitro* study, oral administration of *Tao Hong Si Wu Tang* in rats at 8 g/kg and 16 g/kg was associated with marked anti-inflammatory effects similar to hydrocortisone 50 mg/kg. The study noted that the mechanisms of action of the herbs and the drug are very different. *Tao Hong Si Wu Tang* does not contribute to the negative feedback inhibition or the atrophy of the thymus or adrenal glands.⁴

CLINICAL STUDIES AND RESEARCH

1. **Dysmenorrhea:** The combination of *Tao Hong Si Wu Tang* plus *Shi Xiao San* (Sudden Smile Powder) was shown in one study to be effective in treating dysmenorrhea characterized by stagnation. In addition to these two formulas, *Chai Hu* (Radix Bupleuri), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Xiang Fu* (Rhizoma Cyperi) were added for qi stagnation; *Xiao Hui Xiang* (Fructus Foeniculi), *Rou Gui* (Cortex Cinnamomi), and *Wu Zhu Yu* (Fructus Evodiae) for blood stagnation with interior cold; *Chuan Niu Xi* (Radix Cyathulae) and *Yan Hu Suo* (Rhizoma Corydalis) for severe pain. The herbs were given starting the fifth day of the menstrual cycle, for 20 days per course of treatment. Of 60 patients, the study reported complete recovery in 28 patients, improvement in 24 patients, and no benefit in 8 patients. The overall rate of effectiveness was 84.7%.⁵
2. **Infertility:** Use of modified *Tao Hong Si Wu Tang* was effective in treating female infertility caused by blocked fallopian tubes. The herbal treatment consisted of *Tao Hong Si Wu Tang* plus *Xiang Fu* (Rhizoma Cyperi), *Shui Zhi* (Hirudo), *Lu Lu Tong* (Fructus Liquidambaris), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *San Qi* (Radix et Rhizoma Notoginseng) powder, and others. For Kidney deficiency, *Sang Shen* (Fructus Mori) and *Xu Duan* (Radix Dipsaci) are added. For dampness and phlegm, *Cang Zhu* (Rhizoma Atractylodis), *Chen Pi* (Pericarpium Citri Reticulatae), and *Ban Xia* (Rhizoma Pinelliae) were added, and *Shu Di Huang* (Radix Rehmanniae Praeparata) was removed. For damp-heat, *Huang Bo* (Cortex Phellodendri Chinensis), *Yi Yi Ren* (Semen Coicis), *Tu Fu Ling* (Rhizoma Smilacis Glabrae), and *Pu Gong Ying* (Herba Taraxaci) were added, and *Shu Di Huang* (Radix Rehmanniae Praeparata) was removed. Of 60 women, the study reported successful pregnancy in 31 patients, normal flow of egg in the fallopian tubes in 7 patients, and ectopic pregnancy in 1 patient. The overall rate of effectiveness was 80%.⁶

Táo Hóng Sì Wù Tāng

(Four-Substance Decoction with Safflower and Peach Pit)

3. **Cerebral infarction:** Thirty-two patients with cerebral infarction were treated with complete recovery in 10 patients, significant improvement in 11 patients, moderate improvement in 9 patients, and no benefit in 2 patients. The herbal treatment contained *Tao Hong Si Wu Tang* plus *Ge Gen* (Radix Puerariae Lobatae), *Shui Zhi* (Hirudo) and *Huang Qi* (Radix Astragali).⁷
4. **Diabetic neuropathy:** Use of modified *Tao Hong Si Wu Tang* was associated with 96.4% effectiveness in treating peripheral neuropathy in 28 diabetic patients (22 with more than 5 years of illness, and 6 with less than 5 years of illness). The base formula contained *Tao Hong Si Wu Tang* plus *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), *Huang Jing* (Rhizoma Polygonati) and *Gou Qi Zi* (Fructus Lycii). Additional modifications included *Xuan Shen* (Radix Scrophulariae) and *Huang Lian* (Rhizoma Coptidis) for irritability, thirst, polyphagia and polydipsia; and *Di Gu Pi* (Cortex Lycii) for *wu xin re* (five-center heat). Of 28 patients, the study reported complete recovery in 15 patients, moderate improvement in 9 patients, slight improvement in 3 patients, and no benefit in 1 patient.⁸
5. **Headache:** Vascular headache in 30 patients was treated with complete recovery in 13 patients and improvement in 17 patients using *Tao Hong Si Wu Tang* plus *Gao Ben* (Rhizoma et Radix Ligustici), *Bai Zhi* (Radix Angelicae Dahuricae), and *Xi Xin* (Radix et Rhizoma Asari).⁹
6. **Bone fractures:** Administration of an herbal formula was effective in reducing swelling and pain, and facilitating the recovery process. The herbal formula contained *Tao Hong Si Wu Tang* plus *Gu Sui Bu* (Rhizoma Drynariae), *Xu Duan* (Radix Dipsaci), *Zi Ran Tong* (Pyritum), *Tu Bie Chong* (Eupolyphaga seu Steleophaga), *Mu Xiang* (Radix Aucklandiae), and others as needed. Additional modifications included *Huang Bo* (Cortex Phellodendri Chinensis) for heat; unprocessed *Cao Wu* (Radix Aconiti Kusnezoffii) for cold; *Sang Zhi* (Ramulus Mori) for bone fractures in the upper extremities; and *Niu Xi* (Radix Achyranthis Bidentatae) for bone fractures in the lower extremities.¹⁰
7. **Allergic rhinitis:** Use of modified *Tao Hong Si Wu Tang* was shown to be effective in treating allergic rhinitis in 42 patients. The base formula contained *Tao Hong Si Wu Tang* plus *Cang Er Zi* (Fructus Xanthii), *Huang Qi* (Radix Astragali), *Fang Feng* (Radix Saposhnikovia), and *Xin Yi Hua* (Flos Magnoliae). Modifications included addition of *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Radix et Rhizoma Asari) for stuffy nose, frequent sneezing, and profuse watery nasal discharge; *Huang Qin* (Radix Scutellariae) and *Mu Dan Pi* (Cortex Moutan) for profuse yellow nasal discharge; *Fu Ling* (Poria), *Shan Yao* (Rhizoma Dioscoreae), and dry-fried *Bai Bian Dou* (Semen Lablab Album) for Spleen deficiency with poor appetite; *Nu Zhen Zi* (Fructus Ligustri Lucidi) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) for Kidney deficiency; and *Jing Jie* (Herba Schizonepetae) and *Chan Tui* (Periostracum Cicadae) for itchy nose. The duration of treatment ranged between 6-20 days. Of 42 patients, the study reported complete recovery in 31 patients, improvement in 9 patients, and no benefit in 2 patients.¹¹
8. **Optic nerve atrophy:** Twenty-eight patients (34 affected eyes) with glaucoma and atrophy of the optic nerve were treated with good results using the combination of herbs and vasodilators. The herbal treatment contained *Tao Hong Si Wu Tang* plus *Gou Qi Zi* (Fructus Lycii), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Ju Hua* (Flos Chrysanthemi). The average duration of treatment was 69 packs of herbs.¹²
9. **Optic neuritis:** One study reported beneficial effect in 32 patients with optic neuritis using *Tao Hong Si Wu Tang* plus *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Zhi Qiao* (Fructus Aurantii), *Fu Ling* (Poria), *Tong Cao* (Medulla Tetrapanacis), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The herbs were given in decoction daily.¹³
10. **Cataract:** One study reported 98.4% effectiveness using modified *Tao Hong Si Wu Tang* to treat 200 patients (381 affected eyes) with cataract. The herbal treatment contained this formula plus *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Gou Qi Zi* (Fructus Lycii), *Ju Hua* (Flos Chrysanthemi), *Ji Li* (Fructus Tribuli), *Chan Tui* (Periostracum Cicadae), *Ye Ming Sha* (Faeces Vespertilionis Murini), *Qing Xiang Zi* (Semen Celosiae), *Jue Ming Zi* (Semen Cassiae), *Ci Shi* (Magnetitum), *Shen Qu* (Massa Fermentata), *Sang Shen* (Fructus Mori), and *Chen Pi* (Pericarpium Citri Reticulatae). Effectiveness was defined as improvement of visual acuity.¹⁴
11. **Glaucoma:** Twelve patients (19 affected eyes) with glaucoma characterized by Liver stagnation were treated with recovery in 7 eyes, significant improvement in 4 eyes, moderate improvement in 5 eyes, and no benefit in 3 eyes. The herbal formula contained *Tao Hong Si Wu Tang* plus *Su Mu* (Lignum Sappan), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Bu Gu Zhi* (Fructus Psoraleae), *Hua Shi* (Talcum), *Jie Geng* (Radix Platycodonis), *Zhi Qiao* (Fructus Aurantii), *Da Huang* (Radix et Rhizoma Rhei), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).¹⁵
12. **Urticaria:** One study reported 85.8% effectiveness using modified *Tao Hong Si Wu Tang* to treat chronic urticaria. The herbal treatment contained this formula plus *Jing Jie* (Herba Schizonepetae), *He Shou Wu* (Radix Polygoni Multiflori), *Zao Jiao Ci* (Spina Gleditsiae), *Chan Tui* (Periostracum Cicadae), and others as needed. Of 42

Táo Hóng Sì Wù Tāng

(Four-Substance Decoction with Safflower and Peach Pit)

patients, the study reported recovery in 20 patients, significant improvement in 10 patients, moderate improvement in 6 patients, and no benefit in 6 patients.¹⁶ In another study, use of modified *Tao Hong Si Wu Tang* to treat 24 patients with stubborn urticaria was associated with complete recovery in all 24 patients. The herbal treatment contained this formula plus *Jiang Can* (*Bombyx Batryticatus*) and *Chan Tui* (*Periostracum Cicadae*) as the base formula, with addition of others as needed. The duration of treatment ranged from 7 to 15 packs of herbs.¹⁷

13.Itching: One study reported 93.5% effectiveness using modified *Tao Hong Si Wu Tang* to treat itching. The herbal treatment contained this formula plus *He Shou Wu* (*Radix Polygoni Multiflori*), *Di Fu Zi* (*Fructus Kochiae*), *Bai Xian Pi* (*Cortex Dictamni*), and *Ji Li* (*Fructus Tribuli*). Of 92 patients, the study reported complete recovery in 53 patients, moderate improvement in 33 patients, and no benefit in 6 patients.¹⁸

14.Eczema: Administration of *Tao Hong Si Wu Tang* plus *Dan Shen* (*Radix et Rhizoma Salviae Miltiorrhizae*), *Chi Shao* (*Radix Paeoniae Rubra*), and *Mu Dan Pi* (*Cortex Moutan*) in 64 patients with eczema was associated with complete recovery in 53 patients, significant improvement in 5 patients, and slight improvement in 6 patients.¹⁹

15.Psoriasis: Administration of modified *Tao Hong Si Wu Tang* was associated with 93.7% effectiveness in treating 32 patients with psoriasis. In addition to this formula, modifications were made by adding *Jin Yin Hua* (*Flos Lonicerae Japonicae*), *Lian Qiao* (*Fructus Forsythiae*), *Pu Gong Ying* (*Herba Taraxaci*), *Zi Cao* (*Radix Arnebiae*), *Xuan Shen* (*Radix Scrophulariae*), and *Ban Lan Gen* (*Radix Isatidis*) for damaged skin with spots; *Fu Ling* (*Poria*), *Che Qian Zi* (*Semen Plantaginis*), *Bai Xian Pi* (*Cortex Dictamni*) and *Ku Shen* (*Radix Sophorae Flavescentis*) for damaged skin with geographic appearance; *Jin Yin Hua* (*Flos Lonicerae Japonicae*), *Lian Qiao* (*Fructus Forsythiae*), *Pu Gong Ying* (*Herba Taraxaci*), *Zi Cao* (*Radix Arnebiae*), *Fu Ling* (*Poria*), *Che Qian Zi* (*Semen Plantaginis*), *Bai Xian Pi* (*Cortex Dictamni*), and *Yi Yi Ren* (*Semen Coicis*) for psoriatic arthritis; *Jin Yin Hua* (*Flos Lonicerae Japonicae*), *Pu Gong Ying* (*Herba Taraxaci*), *Zi Cao* (*Radix Arnebiae*), and *Xuan Shen* (*Radix Scrophulariae*) for psoriasis with sores; and *Xuan Shen* (*Radix Scrophulariae*), *Sha Shen* (*Radix Glehniae seu Adenophorae*), *Mai Dong* (*Radix Ophiopogonis*), *Mu Dan Pi* (*Cortex Moutan*), *Bai Xian Pi* (*Cortex Dictamni*), *Ku Shen* (*Radix Sophorae Flavescentis*), *Fang Feng* (*Radix Saposhnikovia*), *Chan Tui* (*Periostracum Cicadae*), *Wu Shao She* (*Zaocys*) and *Quan Xie* (*Scorpio*) during the remission period. Of 32 patients, the study reported complete recovery in 23 patients, improvement in 7 patients, and no benefit in 2 patients.²⁰

16.Chloasma: One study reported 73% effectiveness using modified *Tao Hong Si Wu Tang* to treat 30 women with irregular shape and size of brown patches on the face or other parts of the body. The base formula contained *Tao Hong Si Wu Tang* plus *Gui Zhi* (*Ramulus Cinnamomi*) and *Jiang Can* (*Bombyx Batryticatus*). Modifications were made as follows: *Yan Hu Suo* (*Rhizoma Corydalis*), *Wu Yao* (*Radix Linderae*), and *Chuan Lian Zi* (*Fructus Toosendan*) for painful menstruation; *San Leng* (*Rhizoma Sparganii*), *E Zhu* (*Rhizoma Curcumae*), *Dan Shen* (*Radix et Rhizoma Salviae Miltiorrhizae*), *Yi Mu Cao* (*Herba Leonuri*) and *Kun Bu* (*Thallus Eckloniae*) for amenorrhea or formation of nodules; *Cang Zhu* (*Rhizoma Atractylodis*), *Bai Zhu* (*Rhizoma Atractylodis Macrocephalae*), *Fu Ling* (*Poria*), and *Chun Pi* (*Cortex Ailanthi*) for profuse leukorrhea; *Chai Hu* (*Radix Bupleuri*), *Xiang Fu* (*Rhizoma Cyperi*), *Tu Si Zi* (*Semen Cuscutae*), and *Gou Qi Zi* (*Fructus Lycii*) for irregular menstruation; addition of *Mu Dan Pi* (*Cortex Moutan*) and *Huang Qi* (*Radix Astragali*) and removal of *Tao Ren* (*Semen Persicae*) and *Hong Hua* (*Flos Carthami*) before the period; and the addition of *Rou Gui* (*Cortex Cinnamomi*) and *Pao Jiang* (*Rhizoma Zingiberis Praeparatum*) after the period. The duration of treatment was 10 days per course, for 4-6 courses total. Of 30 patients, the study reported complete recovery in 7 patients, significant improvement in 11 patients, moderate improvement in 4 patients, and no benefit in 8 patients.²¹

HERB-DRUG INTERACTION

Cosmetics-induced dermatitis: One study reported good results in the treatment of dermatitis associated with the use of cosmetics using *Tao Hong Si Wu Tang* plus *Fang Feng* (*Radix Saposhnikovia*), *Pu Gong Ying* (*Herba Taraxaci*), *Zi Hua Di Ding* (*Herba Violae*), and others. The herbs were given in decoction for 10 days per course of treatment. Most patients responded within 3-5 days, while some with severe conditions required up to 3 courses of treatment.²²

AUTHORS' COMMENTS

Tao Hong Si Wu Tang is designed to treat gynecological disorders characterized by blood deficiency with blood stagnation. The emphasis of the formula is to tonify the blood and eliminate blood stasis. To potentiate the effects of the formula, *Bai Shao* (*Radix Paeoniae Alba*) can be replaced with *Chi Shao* (*Radix Paeoniae Rubra*) to enhance the blood-activating effect, and *Shu Di Huang* (*Radix Rehmanniae Praeparata*) can be replaced with *Di Huang* (*Radix Rehmanniae*) to nourish the blood without creating more stagnation.

Alternate Names: *Wen Ching Yin* (Warming and Clearing Drink), *Wen Qing San* (Warming and Clearing Powder), Tangkuei and Gardenia Combination
Original Source: *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) by Gong Ting-Xian in 1587

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	4.5g
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	4.5g
<i>Bai Shao</i> (Radix Paeoniae Alba)	4.5g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	4.5g
<i>Huang Lian</i> (Rhizoma Coptidis)	4.5g
<i>Huang Qin</i> (Radix Scutellariae)	4.5g
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	4.5g
<i>Zhi Zi</i> (Fructus Gardeniae)	4.5g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the herbs into powder, and cook the powder in water to make a decoction. Take the warm, strained decoction on an empty stomach.

CHINESE THERAPEUTIC ACTIONS

- 1. Warms the menses
- 2. Cools the blood
- 3. Clears heat and eliminates toxins

CLINICAL MANIFESTATIONS

Gynecological disorders characterized by blood deficiency and heat: irregular menstruation with profuse bleeding, abdominal pain, fever, irritability, mood swings, thirst, a sallow facial appearance, alternating chills and fever, itchy skin, and emaciation.

Wēn Qīng Yīn (Warming and Clearing Decoction)

CLINICAL APPLICATIONS

Uterine bleeding, excessive menstrual bleeding, leukorrhea, infertility, urinary tract infection, cystitis, uteritis, menopause and other gynecological disorders. Other uses include aphtha, neurodermatitis, lupus erythematosus, gastric ulcer, occult bleeding, pruritus, dermatitis, eczema, urticaria, and tinea.

EXPLANATION

Wen Qing Yin (Warming and Clearing Decoction) treats gynecological disorders complicated by both deficiency and excess. Irregular menstruation and profuse menstrual bleeding often indicate an underlying blood deficiency condition. Because the blood is deficient, many parts of the body cannot be nourished properly, leading to dry and itchy skin, a sallow facial appearance, and emaciation. Unfortunately, blood deficiency in this case is complicated by excess heat, as evident by symptoms such as fever, irritability, and mood swings. Lastly, due to the combination of both deficiency and excess, patients may also have alternating chills and fever.

This formula combines the principles of two formulas to address concurrent deficiency and excess. The herbs in *Si Wu Tang* (Four-Substance Decoction) - *Dang Gui* (Radix Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Praeparata), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) - tonify the blood and warm the menses. The herbs in *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Huang Bo* (Cortex Phellodendri Chinensis), and *Zhi Zi* (Fructus Gardeniae) clear heat and eliminate toxins from the body. Because this formula has dual functions to “warm” the menses and “clear” heat, it is called “Warming and Clearing Decoction.” This formula can also be used in men who have bleeding accompanied by a sallow facial appearance and emaciation.

MODIFICATIONS

- With profuse menstrual bleeding, add *E Jiao* (Colla Corii Asini) and *Ai Ye* (Folium Artemisiae Argyi).
- With leukorrhea and an itching sensation in the genital region, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Che Qian Zi* (Semen Plantaginis).
- If there is menstrual pain, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Xiang Fu* (Rhizoma Cyperi).

PHARMACOLOGICAL EFFECTS

1. **Antiulcer:** Administration of *Wen Qing Yin* was associated with inhibiting the release of gastric acid in mice. Of two forms used, the decoction was associated with 51.8-65.9% effectiveness, and the capsule form was associated with 46.3-52.3% effectiveness.¹
2. **Analgesic and anti-inflammatory:** Administration of *Wen Qing Yin* in both decoction and capsule forms was associated with relieving pain and reducing inflammation. The therapeutic effect was noted 30 minutes after administration, and lasted for 2-4 hours.² *Wen Qing Yin* is believed to exert its anti-inflammatory effects mainly on the early stages of inflammation, when increased capillary permeability and migration of leucocytes occur.³
3. **Antipruritic:** *Wen Qing Yin* has a marked antipruritic effect, and has been used successfully to inhibit substance P-induced scratching in mice. The mechanism of this antipruritic effect was attributed to the inhibition of cutaneous nitric oxide synthase 1 expression and nitric oxide production.⁴
4. **Dermatological:** One study reported *Wen Qing Yin* to be effective in treating acne vulgaris, by suppressing propionibacterium acnes lipase in seborrheic dermatitis.⁵ *Wen Qing Yin* also has an inhibitory effect on rheologically-activated neutrophils, and has also been used successfully in treating other skin diseases, such as Behcet's disease, palmoplantar pustulosis and psoriasis vulgaris.⁶
5. **Immunosuppressant:** Administration of *Wen Qing Yin* was associated with inhibiting the induction phase of

various kinds of delayed hypersensitivity and local graft-versus-host reactions in experimental animals. Of the 8 herbs in this formula, *Huang Bo* (Cortex Phellodendri Chinensis) was determined to have the most potent suppressive effect on the cellular immune response.⁷

6. **Radioprotective:** Intraperitoneal injection of *Wen Qing Yin* was associated with a marked protective effect in mice against skin injury induced by irradiation.⁸

CLINICAL STUDIES AND RESEARCH

1. **Gynecological disorders:** *Wen Qing Yin* has been used to treat various types of gynecological disorders characterized by blood deficiency and heat. Clinically, *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) were added to this formula in many cases. The duration of treatment was 1 month or more. Clinical applications included, but were not limited to, uterine bleeding, excessive menstrual bleeding, leukorrhea, infertility, urinary tract infection, cystitis, uteritis, and menopause.⁹
2. **Aphtha:** In one clinical study, 63 patients with aphtha were divided into two groups. Group one received *Wen Qing Yin* in decoction form and group two in capsules. Out of 19 patients in the decoction group, 15 showed a marked improvement and 4 showed no improvement (79% effectiveness). Out of 27 patients in the capsule group, 20 showed marked improvement and 7 showed no improvement (74% effectiveness).¹⁰
3. **Dermatological disorders:** *Wen Qing Yin* has been evaluated for its effectiveness in treating various dermatological disorders, including but not limited to psoriasis, pruritus, dermatitis, eczema, urticaria, and tinea. Most studies used *Wen Qing Yin* with minor modifications, with effectiveness ranging between 50-80%.^{11,12,13}

TOXICOLOGY

In acute toxicology studies in mice, no abnormal reactions were observed following ingestion of *Wen Qing Yin*. The herbal formula was given in capsules at doses 50-100 times the normal adult human dose for 2 weeks.¹⁴

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 2 bowls of water until it is reduced to 1 bowl. Take the warm, strained decoction before meals.

CHINESE THERAPEUTIC ACTIONS

- 1. Activates qi and blood circulation
- 2. Removes qi stagnation and blood stasis
- 3. Regulates the menstrual cycle

CLINICAL MANIFESTATIONS

Irregular menstruation caused by qi and blood stagnation: delayed menstruation or scanty menstruation, dark purplish menstrual flow with clots, distention and pain in the lower abdominal region that increase with pressure and decrease with the passage of clots, swelling and edema of the lower extremities, a feeling of oppression in the chest and epigastric region, a dry mouth, and a red or dark purple tongue body.

Guò Qí Yīn (Delayed Menstruation Decoction)

CLINICAL APPLICATIONS

Delayed menstruation, dysmenorrhea, scanty menstruation with dark purplish clots, pelvic inflammatory disease.

EXPLANATION

Guo Qi Yin (Delayed Menstruation Decoction) treats irregular menstruation characterized by qi and blood stagnation. Clinically, patients will have delayed menstruation or scanty menstruation. Since blood stagnation is the predominant factor in this case, the menstrual flow will be dark and purplish with blood clots. Additionally, blood stasis in the lower abdominal region will cause distention and pain, which increase with pressure and decrease with the passage of clots. Since blood stagnation often is accompanied by qi stagnation, patients may experience a feeling of oppression in the chest and epigastric region. Lastly, a dark purplish tongue body indicates blood stagnation.

This formula focuses on activating qi and blood circulation, removing blood stasis, and regulating the menstrual cycle. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba) and *Chuan Xiong* (Rhizoma Chuanxiong), the four herbs in *Si Wu Tang* (Four-Substance Decoction),

tonify the blood, activate blood circulation, and regulate menstruation. *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) activate blood circulation and remove blood stasis. These two herbs have synergistic actions and are commonly used together. *Xiang Fu* (Rhizoma Cyperi), *Mu Tong* (Caulis Akebiae), and *E Zhu* (Rhizoma Curcumae) activate qi and blood circulation and eliminate qi and blood stagnation. *Rou Gui* (Cortex Cinnamomi) warms the Spleen and Kidney to dispel cold and relieve pain. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

MODIFICATIONS

- With irritability and thirst due to heat, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- With leukorrhea and abdominal pain, combine with *Ba Wei Dai Xia Fang* (Eight-Ingredient Formula for Leukorrhea).
- With itching and pain caused by dampness and heat, combine with *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- If there is dizziness due to deficiency fire, combine with *Nu Ke Bai Zi Ren Wan* (Platycladus Seed Pill for Females).

CAUTIONS / CONTRAINDICATIONS

Guo Qi Yin is contraindicated during pregnancy.

Dāng Guī Bǔ Xuè Tāng (Tangkuei Decoction to Tonify the Blood)

當歸補血湯

当归补血汤

Pinyin Name: *Dang Gui Bu Xue Tang*
Literal Name: Tangkuei Decoction to Tonify the Blood
Alternate Names: *Tang Kuei Pu Hsieh Tang*, Tang-kuei Blood-Nourishing Decoction, Chinese Angelica Blood-Tonifying Decoction, Tangkuei and Astragalus Combination
Original Source: *Nei Wai Shang Bian Huo Lun* (Clarifying Doubts about Injury from Internal and External Causes) by Li Gao in 1247

COMPOSITION

Huang Qi (Radix Astragali)30g

Dang Gui (Radix Angelicae Sinensis), *xi* (washed) with liquor6g

DOSAGE / PREPARATION / ADMINISTRATION EXPLANATION

The source text states to coarsely grind the ingredients and cook the powder in water to make a decoction. Take the warm, strained decoction before meals on an empty stomach. Today, it is usually prepared as a decoction by cooking the herbs three times. The decoction is taken in three equally-divided doses, three times daily in the morning, noon and evening.

Dang Gui Bu Xue Tang (Tangkuei Decoction to Tonify the Blood) is designed to treat exertion-induced qi and blood deficiencies. Over-exertion and overwork may damage qi and blood in the body, and lead to the floating of yang toward the exterior parts of the body. Clinical presentations include symptoms such as warm sensations at the skin and muscle layers, a red face, irritability, and thirst with a desire to drink warm water. Since qi is deficient and the body is exhausted, wound healing is slow and the tongue is pale. A surging, big and deficient pulse indicates floating of yang and deficiency of qi and blood. In women, there may be hypermenorrhea and excessive bleeding after labor, since qi is deficient and cannot properly control the blood.

CHINESE THERAPEUTIC ACTIONS
Tonifies qi and generates blood production

CLINICAL MANIFESTATIONS
Qi and blood deficiencies due to overexertion: warm sensations at the skin and muscle layers, a red face, irritability, thirst with a desire to drink warm water, slow healing of wounds, a pale tongue, and a surging, big and deficient pulse. In women during menstruation or after labor, there may be hypermenorrhea, excessive loss of blood after labor, a feverish sensation, and headache.

CLINICAL APPLICATIONS
Anemia, thrombopenic purpura, amenorrhea, functional uterine bleeding, leucopenia, supportive therapy during radiation treatment, ulcerative colitis, insufficient lactation, heel pain, arthritis, and neurasthenia.

The production of qi and blood is interdependent. Thus, both qi and blood tonics are used for optimal effect when treating deficiency. *Huang Qi* (Radix Astragali) and *Dang Gui* (Radix Angelicae Sinensis) tonify qi and blood. The dose of *Huang Qi* (Radix Astragali) is five times greater than *Dang Gui* (Radix Angelicae Sinensis) to greatly tonify *yuan* (source) *qi*, strengthen the Spleen, and ensure adequate production of blood. *Huang Qi* (Radix Astragali) also prevents the further leaking of yang and promotes the healing of wounds.

Dang Gui Bu Xue Tang (Tangkuei Decoction to Tonify the Blood)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Qi and blood deficiencies due to over-exertion	<ul style="list-style-type: none">• Irritability and thirst with a desire to drink warm water: deficiencies of qi, blood and body fluids• Slow wound healing: qi and blood deficiencies• Pale tongue and a surging, big and deficient pulse: qi and blood deficiencies with yang floating to the exterior	<ul style="list-style-type: none">• Tonifies qi• Generates production of blood	<ul style="list-style-type: none">• <i>Huang Qi</i> (Radix Astragali) tonifies qi.• <i>Dang Gui</i> (Radix Angelicae Sinensis) tonifies the blood.

Dāng Guī Bǔ Xuè Tāng (Tangkuei Decoction to Tonify the Blood)

MODIFICATIONS

- For common cold or influenza with fever and headache during menstruation or postpartum, add *Cong Bai* (Bulbus Allii Fistulosi), *Dan Dou Chi* (Semen Sojae Praeparatum), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae).
- For allergic purpura, add *Jiang Can* (Bombyx Batryticatus) and *Niu Xi* (Radix Achyranthis Bidentatae).
- For general blood deficiency, add *Shu Di Huang* (Radix Rehmanniae Praeparata), *He Shou Wu* (Radix Polygoni Multiflori), *Sang Ji Sheng* (Herba Taxilli), and *Bai Shao* (Radix Paeoniae Alba).
- If there is hypermenorrhea, add *Di Yu* (Radix Sanguisorbae), charred *Huang Qin* (Radix Scutellariae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- For tachycardia, add *Sheng Mai San* (Generate the Pulse Powder).
- For ulcerated sores that do not heal, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Tian Hua Fen* (Radix Trichosanthis).
- For continuous bleeding, add calcined *Long Gu* (Os Draconis), *Shan Zhu Yu* (Fructus Corni), and *E Jiao* (Colla Corii Asini).

CAUTIONS / CONTRAINDICATIONS

Dang Gui Bu Xue Tang is contraindicated in patients with excess heat or yin-deficient heat with tidal fever.

PHARMACOLOGICAL EFFECTS

1. **Hematopoietic:** In experiments in mice, administration of *Dang Gui Bu Xue Tang* was associated with an increased red blood cell count.¹ It was noted that the formula was more effective than administering *Huang Qi* (Radix Astragali) or *Dang Gui* (Radix Angelicae Sinensis) individually with the same dose, implying that the formula has synergistic effect. Also, it was found that the herbs were more effective in increasing red blood cell count (but not white blood cells) when decocted for 90 minutes in comparison to 45 minutes.²
2. **Antiplatelet:** Use of *Dang Gui Bu Xue Tang* was found to be effective in blocking the aggregation of platelets and preventing the formation of blood clots.^{3,4}
3. **Hepatoprotective:** Administration of *Dang Gui Bu Xue Tang* was associated with hepatoprotective effects against carbon tetrachloride in mice. The effects were attributed to increased blood circulation and increased regeneration of liver cells.⁵
4. **Immunostimulant:** In laboratory experiments in mice, the use of *Dang Gui Bu Xue Tang* was associated with an increase of phagocytic activities by macrophages. The effects of the herbs lasted up to 24 hours.⁶

CLINICAL STUDIES AND RESEARCH

1. **Thrombopenic purpura:** Twenty-four patients with thrombopenic purpura were treated with modified *Dang Gui Bu Xue Tang* with recovery in 7 patients, marked improvement in 12 patients, and slight improvement in 5 patients. The average length of treatment was 64 days. The herbal treatment contained *Dang Gui Bu Xue Tang* plus *Xue Yu Tan* (Crinis Carbonisatus), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Xian He Cao* (Herba Agrimoniae) as the base formula. Additional modifications were made accordingly for qi deficiency, blood deficiency, yin deficiency, and yang deficiency.⁷
2. **Amenorrhea:** Thirty-seven women with amenorrhea due to abnormal development of the uterus were treated with the following herbal prescription with 91.89% effectiveness. The herbal treatment contained *Dang Gui Bu Xue Tang* plus *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcuma), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) as the base formula. Additional modifications were made if necessary. The duration of treatment was 6 months. Of 37 patients, the study reported marked improvement in 23 patients, moderate improvement in 11 patients, and no benefit in 3 patients.⁸
3. **Leucopenia:** Twenty patients with leucopenia were treated with modified *Dang Gui Bu Xue Tang* with marked effect in 8 patients, moderate effect in 11 patients, and no effect in 1 patient. The formula contained *Dang Gui* (Radix Angelicae Sinensis), *Huang Qi* (Radix Astragali), *San Leng* (Rhizoma Sparganii), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The treatment protocol was to administer the herbs one time daily for 3-4 weeks.⁹
4. **Ulcerative colitis:** One study reported a 90% rate of effectiveness in 31 patients with chronic ulcerative colitis when treated with *Dang Gui Bu Xue Tang* plus *Jiao Gu Lan* (Rhizoma seu Herba Gynostemmatis), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Chuan Xiong* (Rhizoma Chuanxiong), *Xiang Fu* (Rhizoma Cyperi), and others. In addition, *Bai Tou Weng* (Radix Pulsatillae) was added for damp-heat; *Gan Jiang* (Rhizoma Zingiberis) for Spleen deficiency; and *San Qi* (Radix et Rhizoma Notoginseng) for hematochezia.¹⁰
5. **Insufficient lactation:** Use of modified *Dang Gui Bu Xue Tang* was successful in promoting lactation in 96 women within 3 months after delivery. The herbal treatment contained this formula plus *Ren Shen* (Radix et Rhizoma Ginseng). Furthermore, *Shi Gao* (Gypsum Fibrosum) was added in summer and *Gui Zhi* (Cortex Rarus Cinnamomi) was added in winter. The study reported 100% effectiveness, with most noticeable success when treatment began within one month of delivery.¹¹
6. **Heel pain:** One study reported good results using modified *Dang Gui Bu Xue Tang* to treat 30 patients with heel

Dāng Guī Bǔ Xuè Tāng (Tangkuei Decoction to Tonify the Blood)

pain. The herbal formula contained *Dang Gui Bu Xue Tang* plus *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), and *Gou Ji* (Rhizoma Cibotii), with addition of other herbs as needed for Liver and Kidney yin deficiencies, or Spleen and Kidney yang deficiencies. Of 30 patients, the study reported significant improvement in 18 patients, moderate improvement in 9 patients, and slight improvement in 3 patients.¹²

7. **Arthritis:** In one study, 51 patients with various presentations of arthritis were treated with modified *Dang Gui Bu Xue Tang* with good results. The base formula included *Dang Gui* (Radix Angelicae Sinensis), *Huang Qi* (Radix Astragali), *Gui Zhi* (Ramulus Cinnamomi), *Hai Feng Teng* (Caulis Piperis Kadsurae), *Qin Jiao* (Radix Gentianae Macrophyllae), and *Zhi Chuan Wu* (Radix Aconiti Praeparata). The modifications included the addition of *Fang Feng* (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii) for *xing bi* (mobile painful obstruction); *Fang Ji* (Radix Stephaniae Tetrandrae) and *Yi Yi Ren* (Semen Coicis) for *zhuo bi* (fixed painful obstruction); *Zhi Mu* (Rhizoma Anemarrhenae), *Shi Gao* (Gypsum Fibrosum), and *Ren Dong Teng* (Caulis Lonicerae Japonicae) for *re bi* (heat painful obstruction); and *Xi Xin* (Radix et Rhizoma Asari) for *tong bi* (extremely painful obstruction). The treatment protocol was to administer the herbs on a daily basis for 10 days per course of treatment, for a duration of 10-45 days. Out of 51 patients, the study reported recovery in 36 patients, improvement in 10 patients, and no benefit in 5 patients. The study noted that the formula was most effective for *tong bi* (extremely painful obstruction) and *zhuo bi* (fixed painful obstruction), and less effective for *re bi* (heat painful obstruction).¹³

HERB-DRUG INTERACTION

Chemotherapy- and radiation-induced leucopenia: One study reported 90.2% effectiveness using modified *Dang Gui Bu Xue Tang* to treat 102 patients with leucopenia due to chemotherapy and radiation. The herbal treatment contained this formula plus *Gou Qi Zi* (Fructus Lycii) and *Gu Sui Bu* (Rhizoma Drynariae). The average increase in white blood cell count was $1.665 \times 10^9/L$, from $2.939 \times 10^9/L$ before herbal treatment to $4.600 \times 10^9/L$ after the treatment. Of 102 patients, the study reported significant improvement in 39 patients, moderate improvement in 53 patients, and no benefit in 10 patients.¹⁴

AUTHORS' COMMENTS

It is often asked that if *Dang Gui Bu Xue Tang* is a blood-tonifying formula, why is the dose of *Huang Qi* (Radix Astragali), which is a qi tonic, five times greater than that of *Dang Gui* (Radix Angelicae Sinensis), which is a blood

tonic? The answer is that the production of blood is directly dependent on an adequate supply of qi. In other words, to effectively tonify blood, qi must be tonified first. That is why *Huang Qi* (Radix Astragali) is used at a dose five times greater than *Dang Gui* (Radix Angelicae Sinensis).¹⁵

Heat sensation is a symptom that is ascribed to both *Bai Hu Tang* (White Tiger Decoction) and *Dang Gui Bu Xue Tang*. It is crucial to diagnose correctly the cause of this heat sensation, since in one condition the heat arises from excess and in the other is caused by deficiency. One key difference is that the patient for which *Bai Hu Tang* (White Tiger Decoction) is appropriate will be thirsty with a desire to drink cold beverages. This is an indication of excess heat. Moreover, the patient will exhibit high fever and profuse sweating. In *Dang Gui Bu Xue Tang* syndrome, thirst is also present but the patient prefers warm drinks. A feverish sensation is present, but there is no perspiration. The pulse is surging, big and forceful in *Bai Hu Tang* on all three levels of pressure, while in *Dang Gui Bu Xue Tang*, the pulse is surging, big and deficient and forceless upon pressure.

Huang Qi (Radix Astragali) is the main ingredient in three important formulas with slightly different purposes:

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) uses *Huang Qi* (Radix Astragali) to tonify qi and lift yang. It treats Spleen and Stomach qi deficiencies with prolapsed organs. Patients will exhibit fatigue, poor appetite, decreased dietary intake, a feverish sensation, chronic diarrhea, and spontaneous sweating.
- *Dang Gui Bu Xue Tang* contains *Huang Qi* (Radix Astragali) at a dose five times greater than that of *Dang Gui* (Radix Angelicae Sinensis) to boost qi and generate blood. It treats blood deficiency with deficiency-heat signs of heat sensations, a flushed face, spontaneous sweating, and a surging, big and deficient pulse that is forceless upon pressure.
- *Dang Gui Liu Huang Tang* (Tangkuei and Six-Yellow Decoction) uses *Huang Qi* (Radix Astragali) to tonify qi, consolidate *wei* (defensive) qi, and stop sweating. It mainly treats yin deficiency with flaring fire manifesting in spontaneous or night sweating, thirst, and a red tongue with a yellow coating.¹⁶

Guī Pí Tāng (Restore the Spleen Decoction)

歸脾湯

归脾汤

Pinyin Name: *Gui Pi Tang*

Literal Name: Restore the Spleen Decoction

Alternate Names: *Kuei Pi Tang*, Back to the Spleen Decoction, Ginseng and Longan Decoction, Ginseng and Longan Combination

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	15g [6g]
<i>Huang Qi</i> (Radix Astragali)	30g [12g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	30g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	7.5g [3g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	3g [9g]
<i>Long Yan Rou</i> (Arillus Longan)	30g [12g]
<i>Fu Shen</i> (Poria Paradicis)	30g [9g]
<i>Yuan Zhi</i> (Radix Polygalae), <i>mi zhi</i> (fried with honey)	3g [6g]
<i>Suan Zao Ren</i> (Semen Ziziphi Spinosa), <i>chao</i> (dry-fried)	30g [12g]
<i>Mu Xiang</i> (Radix Aucklandiae), do not expose to heat	15g [6g]

Note: *Dang Gui* (Radix Angelicae Sinensis) and *Yuan Zhi* (Radix Polygalae) were not listed in the source text; they were added by Bi Li-Zhai in the 16th century in *Jiao Zhu Fu Ren Liang Fang* (Revised Fine Formulas for Women).

on an empty stomach three times daily with warm, boiled water. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients coarsely. Cook 12g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 1.5 large bowls of water until it is reduced to 70%. Take the warm, strained decoction at any time of the day. This formula may also be prepared as pills by mixing the powdered herbs with honey. Take 15g of pills per dose

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and nourishes the blood
2. Strengthens the Spleen and nourishes the Heart

CLINICAL MANIFESTATIONS

1. Heart and Spleen deficiencies due to over-thinking and excessive worrying: palpitations, forgetfulness, insomnia, night sweats, deficiency heat, low appetite, lassitude, a sallow facial complexion, a pale tongue with a thin, white tongue coating, and a fine, moderate pulse.

Guī Pí Tāng (Restore the Spleen Decoction)

2. A deficient Spleen unable to keep the blood circulating within the vessels: hematochezia, scanty or massive uterine bleeding, early menstruation, hypermenorrhea of pale blood, prolonged menstrual period, and thick, white vaginal discharge.

CLINICAL APPLICATIONS

Anemia, thrombocytopenia, thrombopenic purpura, allergic purpura, gastric and duodenal ulcer, myasthenia gravis, congestive heart disease, supraventricular tachycardia, insomnia, dizziness, headache, neurasthenia, personality disorders, neurological disorders, menopause, functional endometorrhagia, uterine bleeding, menstrual bleeding, choroidopathy, hepatitis, addiction, and benzene poisoning.

EXPLANATION

Gui Pi Tang (Restore the Spleen Decoction) is renowned for treating Heart (blood) and Spleen (qi) deficiencies. The common cause of this syndrome is over-thinking or excessive worrying, which consumes the blood and injures qi. Symptoms of Heart (blood) deficiency include palpitations, forgetfulness, and insomnia. Symptoms of Spleen (qi) deficiency include low appetite, lassitude, and a sallow facial complexion. A pale tongue with a thin, white tongue coating and a fine, moderate pulse indicate qi and blood deficiencies.

This formula is also indicated for patients in which the Spleen fails to hold blood inside the vessels because of Spleen qi deficiency. Symptoms of bleeding, such as hematochezia, may occur. Women may have symptoms of uterine bleeding, early menstruation, and hypermenorrhea

with pale blood and no clots. If the Spleen is deficient and dampness ensues, then thick, white vaginal discharge may occur as a result of dampness descending to the lower parts of the body.

Ren Shen (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) warm and tonify Spleen qi. *Dang Gui* (Radix Angelicae Sinensis) and *Long Yan Rou* (Arillus Longan) nourish the Liver, tonify Heart blood, and regulate blood circulation. *Fu Shen* (Poria Paradicis), *Yuan Zhi* (Radix Polygalae) and *Suan Zao Ren* (Semen Ziziphi Spinosae) nourish the Heart and calm the *shen* (spirit). *Mu Xiang* (Radix Aucklandiae) moves qi and prevents the stagnating nature of the tonic herbs from impairing the Spleen and Stomach. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the middle *jiao*. In short, this formula nourishes the Heart, strengthens the Spleen, and tonifies qi and blood.

MODIFICATIONS

- If there is fever, add *Chai Hu* (Radix Bupleuri) and *Zhi Zi* (Fructus Gardeniae).
- For insomnia due to fear and fright, add *Gou Teng* (Ramulus Uncariae cum Uncis) and *Bai Zi Ren* (Semen Platycladi).
- With poor appetite, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae).
- With fatigue and decreased intake of food, add *Sha Ren* (Fructus Amomi) and *Cang Zhu* (Rhizoma Atractylodis).
- If there is cough, add *Zi Wan* (Radix et Rhizoma Asteris) and *Jie Geng* (Radix Platycodonis).

Gui Pi Tang (Restore the Spleen Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heart and Spleen deficiencies	<ul style="list-style-type: none">• Palpitations, forgetfulness, and insomnia: Heart blood deficiency• Low appetite, lassitude, and a sallow facial complexion: Spleen qi deficiency• Pale tongue with a thin, white tongue coating: qi and blood deficiencies• Fine, moderate pulse: qi and blood deficiencies	<ul style="list-style-type: none">• Tonifies qi and nourishes the blood• Strengthens the Spleen and nourishes the Heart	<ul style="list-style-type: none">• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Huang Qi</i> (Radix Astragali), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) warm and tonify Spleen qi.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Long Yan Rou</i> (Arillus Longan) nourish the Liver, tonify Heart blood, and regulate blood circulation.• <i>Fu Shen</i> (Poria Paradicis), <i>Yuan Zhi</i> (Radix Polygalae) and <i>Suan Zao Ren</i> (Semen Ziziphi Spinosae) nourish the Heart to calm the <i>shen</i> (spirit).• <i>Mu Xiang</i> (Radix Aucklandiae) moves qi and moderates the stagnating nature of the tonic herbs.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize the middle <i>jiao</i>.

Guī Pí Tāng (Restore the Spleen Decoction)

- With the presence of blood during coughing, add *Xiao Ji* (Herba Cirsii) and *Ou Jie* (Nodus Nelumbinis Rhizomatis).
- For irregular amount of menstrual bleeding, add *Shan Zhu Yu* (Fructus Corni) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- To tonify blood and stop bleeding, add *Shu Di Huang* (Radix Rehmanniae Praeparata) and *E Jiao* (Colla Corii Asini).
- For uterine bleeding, add *E Jiao* (Colla Corii Asini), *Ai Ye* (Folium Artemisiae Argyi), and *Bai Shao* (Radix Paeoniae Alba).
- If there is profuse menstrual bleeding, add *Di Yu* (Radix Sanguisorbae) and *E Jiao* (Colla Corii Asini).
- For *beng lou* (flooding and spotting) due to cold and deficiency, add *Ai Ye* (Folium Artemisiae Argyi), *Pao Jiang* (Rhizoma Zingiberis Praeparatum), *Xue Yu Tan* (Crinis Carbonisatus), and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- For *beng lou* (flooding and spotting) due to heat, add charred *Di Huang* (Radix Rehmanniae) and *E Jiao* (Colla Corii Asini).

CAUTIONS / CONTRAINDICATIONS

- *Gui Pi Tang* is contraindicated in cases of interior heat or yin deficiency with a rapid pulse.
- *Gui Pi Tang* is relatively neutral in property and usually does not produce side effects even with long-term use. However, should one feel dryness (e.g., a dry mouth, dry nose and constipation) after taking this formula, consume diluted salt water to offset the dryness.¹
- While taking this formula, avoid excessive thinking and worrying, refrain from physical exhaustion, and cease eating foods that are raw and cold in nature.²

PHARMACOLOGICAL EFFECTS

1. **Antiulcer:** Use of *Gui Pi Tang* was effective in preventing stress-induced ulcer in mice. The mechanism of action was attributed to the regulatory effect of the herbs on the central nervous system to reduce the production and secretion of gastric acid.³
2. **Cognitive:** Use of *Gui Pi Tang* was effective in improving cognition in mice with impaired memory due to drugs, electric shock, or aging.⁴

CLINICAL STUDIES AND RESEARCH

1. **Hepatitis:** In one report, 9 patients with hepatitis and thrombopenia were treated with modified *Gui Pi Tang* with recovery in 5 patients (asymptomatic with no recurrence within 2 years), improvement in 2 patients, and no benefit in 2 patients. Most patients began to notice improvement within 14-21 days of treatment.⁵

2. **Headache and dizziness:** Modified *Gui Pi Tang* was used with good success to treat 22 patients with headache and dizziness due to intrathecal injection of anesthetics that did not respond to drug treatment. Complete relief of the symptoms was reported in 17 patients within 3 doses, 2 patients within 4-6 doses, and 3 patients within 8-10 doses.⁶
3. **Dizziness:** Twenty-five patients with dizziness were treated for an average of 30 days (ranges of 12-60 days) with complete recovery in 12 patients, marked improvement in 8 patients, slight improvement in 4 patients, and no benefit in 1 patient. The overall rate of effectiveness was 96%. The causes of dizziness included neurasthenia, menopause, anemia, and cervical hyperosteoecy.⁷
4. **Neurasthenia:** In one study, 200 patients with history of neurasthenia of 2-15 years were treated with modified *Gui Pi Tang* with good results. The formula used included *Chai Hu* (Radix Bupleuri), *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), *Dang Gui* (Radix Angelicae Sinensis), dry-fried *Bai Shao* (Radix Paeoniae Alba), *Di Huang* (Radix Rehmanniae), *Yin Chen* (Herba Artemisiae Scopariae), dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Mu Xiang* (Radix Aucklandiae), *Suan Zao Ren* (Semen Ziziphi Spinosae), processed *Yuan Zhi* (Radix Polygalae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *She Xiang* (Moschus), *Bo He* (Herba Menthae), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Feng Mi* (Mel). The treatment protocol was to take 15g of herbs as pills three times daily for 20 days per course of treatment. Out of 200 patients, the study reported recovery in 128 patients (asymptomatic with no recurrence within 1 year), marked effect in 48 patients (asymptomatic with no recurrence within 6 months), slight improvement in 19 patients, and no benefit in 5 patients. The overall rate of effectiveness was 97.5%.⁸ Another study involving 100 patients with neurasthenia reported 91% effectiveness, with improvement such as resolution of tinnitus, fatigue, and insomnia.⁹
5. **Insomnia:** In one study, 450 patients with histories of severe insomnia for 7 days to 5 years were treated with modified *Gui Pi Tang* and acupuncture with good results. The formula used included *Ren Shen* (Radix et Rhizoma Ginseng) 15g, *Huang Qi* (Radix Astragali) 15-30g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10-20g, *Fu Ling* (Poria) 10-20g, *Suan Zao Ren* (Semen Ziziphi Spinosae) 15-25g, *Yuan Zhi* (Radix Polygalae) 15-25g, *Dang Gui* (Radix Angelicae Sinensis) 15-25g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10g, and *Mu Xiang* (Radix Aucklandiae) 10g. *Long Dan* (Radix et Rhizoma Gentianae), *Chai Hu* (Radix Bupleuri), and *Zhi Zi* (Fructus Gardeniae) were added for Liver fire; *Ban Xia* (Rhizoma

Guī Pí Tāng (Restore the Spleen Decoction)

Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae) were added for hot phlegm; *Xuan Shen* (Radix Scrophulariae), *Zhi Mu* (Rhizoma Anemarrhenae), and *Mai Dong* (Radix Ophiopogonis) were added for yin-deficient heat. The herbs were given as a decoction one time daily. Out of 45 patients, the study reported recovery in 18 patients (over 6 hours of sleep for 2 weeks), marked effect in 10 patients (over 4 hours of sleep for 2 weeks), slight improvement in 7 patients, and no benefit in 5 patients. The overall rate of effectiveness was 87.5%.¹⁰ In another study, modified *Gui Pi Tang* was used to treat 31 patients with insomnia with an 80.6% rate of effectiveness. In addition to the base formula, modifications included addition of *Bai Zi Ren* (Semen Platycladi) and *Shu Di Huang* (Radix Rehmanniae Praeparata) for Heart and Spleen deficiencies; *Huang Lian* (Rhizoma Coptidis), *Zhi Zi* (Fructus Gardeniae) and *Di Huang* (Radix Rehmanniae) for yin-deficient fire; and *Zhu Ru* (Caulis Bambusae in Taenia), *Huang Lian* (Rhizoma Coptidis), and *Chen Pi* (Pericarpium Citri Reticulatae) for Spleen deficiency with hot phlegm.¹¹

6. **Anemia:** In one study, 19 patients with anemia due to iron deficiency were treated with 79% effectiveness within one month.¹² In another study, 20 patients with anemia due to hemorrhage were treated for an average of 24 doses (ranges from 5-49 doses) of decoction with good results.¹³ Lastly, its effectiveness is documented in patients with compromised kidney function with anemia and leucopenia.¹⁴
7. **Thrombopenic purpura:** In one study, 46 patients with primary thrombopenic purpura were treated with modified *Gui Pi Tang* with good results. The formula included *Huang Qi* (Radix Astragali) 15-30g, *Dang Gui* (Radix Angelicae Sinensis) 10-15g, *Di Huang* (Radix Rehmanniae) 10-30g, *Ce Bai Ye* (Cacumen Platycladi) 15-30g, *He Ye* (Folium Nelumbinis) 10-15g, dry-fried *Huai Hua* (Flos Sophorae) 10-15g, *Shan Zhu Yu* (Fructus Corni) 10-30g, *San Qi* (Radix et Rhizoma Notoginseng) 2-6g given in powder separately, *Xian He Cao* (Herba Agrimoniae) 30g, *E Jiao* (Colla Corii Asini) 10-15g dissolved in decoction immediately before ingestion, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10g. The treatment protocol was to administer the herbs in decoction one time daily for one month per course of treatment. The average length of treatment was three courses. Out of 46 patients, the study reported marked effect in 11 patients (asymptomatic with normal platelet count for at least 3 months), improvement in 15 patients (asymptomatic with normal platelet count for at least 2 months), slight improvement in 11 patients (slight subjective and objective improvement) and no benefit in 9 patients. The overall rate of effectiveness was 80.4%.¹⁵

8. **Menopause:** Eighteen patients with menopausal symptoms were treated with excellent results using *Gui Pi Tang* with addition of *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae). The duration of treatment was between 6-27 packs of herbs.¹⁶

9. **Uterine bleeding:** In one report, 11 patients with profuse uterine bleeding characterized by Spleen deficiency were treated with 3-9 doses. The study reported that bleeding stopped in all patients.¹⁷ Another study of 135 patients with uterine bleeding reported marked results using *Gui Pi Tang*.¹⁸

10. **Beng lou (flooding and spotting):** One study reported 91.3% effectiveness using modified *Gui Pi Tang* to treat 46 patients with *beng lou* (flooding and spotting). The modifications included removal of *Dang Gui* (Radix Angelicae Sinensis), *Yuan Zhi* (Radix Polygalae) and *Mu Xiang* (Radix Aucklandiae), and addition of *Xian He Cao* (Herba Agrimoniae), *Shu Di Huang* (Radix Rehmanniae Praeparata), and others as needed.¹⁹

11. **Choroidopathy:** Use of modified *Gui Pi Tang* in 57 patients with fluid accumulation under the retina was associated with complete recovery in 35 patients, improvement in 18 patients, and no benefit in 4 patients. The herbal treatment was based on *Gui Pi Tang*, with the removal of *Yuan Zhi* (Radix Polygalae) and *Long Yan Rou* (Arillus Longan), and the addition of *Gou Qi Zi* (Fructus Lycii), *Gu Jing Cao* (Flos Eriocauli), *Mi Meng Hua* (Flos Buddlejae), and others. Modifications were made as follows: for Liver and Kidney yin deficiencies, *Tai Zi Shen* (Radix Pseudostellariae), *Shan Zhu Yu* (Fructus Corni), *Di Huang* (Radix Rehmanniae), *Mu Dan Pi* (Cortex Moutan), and *Ju Hua* (Flos Chrysanthemi) were added, and *Dang Shen* (Radix Codonopsis) and *Mu Xiang* (Radix Aucklandiae) were removed; and for Liver qi stagnation, *Chai Hu* (Radix Bupleuri), *Yu Jin* (Radix Curcumae), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) were added, and *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) were removed.²⁰

12. **Addiction:** One study reported good results using *Gui Pi Tang* as a supportive therapy in individuals with a recent history of substance abuse to control spontaneous perspiration, insomnia, and loss of appetite. The duration of herbal therapy was 3 months.²¹

13. **Benzene poisoning:** Twenty-seven patients with chronic benzene poisoning were treated with good results using modified *Gui Pi Tang* with the addition of such herbs as *Huang Qi* (Radix Astragali), *E Jiao* (Colla Corii Asini), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), or *Bai Shao* (Radix Paeoniae Alba) as needed. Of 27 patients, the study reported recovery in 6 patients and improvement in 21 patients.²²

Guī Pí Tāng (Restore the Spleen Decoction)

RELATED FORMULA

Guī Pí Ān Shén Tāng

(Restore the Spleen and Tranquelize the Spirit Decoction)

歸脾安神湯

归脾安神汤

Pinyin Name: *Gui Pi An Shen Tang*

Literal Name: Restore the Spleen and Tranquelize the Spirit Decoction

Original Source: *Guang An Men Yi Yuan* (Guang An Men Hospital) in 1990

Dang Gui (Radix Angelicae Sinensis)

Sheng Jiang (Rhizoma Zingiberis Recens)

Da Zao (Fructus Jujubae)

Gui Pi An Shen Tang (Restore the Spleen and Tranquelize the Spirit Decoction) tonifies qi, nourishes the blood, and calms the *shen* (spirit). It commonly treats insomnia due to Heart and Spleen deficiencies, which arise from over-thinking and excessive worrying.

AUTHORS' COMMENTS

Gui Pi Tang, literally “Restore the Spleen Decoction,” has an important function to tonify qi, generate blood, and restore and normalize transportation and transformation functions of the Spleen. It is vital to ensure that Spleen functions properly, as it is the root of post-natal qi, and the origin of qi and blood.

Although *Dang Gui* (Radix Angelicae Sinensis) and *Yuan Zhi* (Radix Polygalae) were not used in the original formulation of *Gui Pi Tang*, they are generally used today as *Dang Gui* (Radix Angelicae Sinensis) greatly enhances the effect to tonify blood, and *Yuan Zhi* (Radix Polygalae) strongly increases the efficacy to nourish the Heart and tranquilize the mind.

Gui Pi Tang is one of the most commonly used formulas for treating Heart (blood) and Spleen (qi) deficiencies. *Gui Pi Tang* and *Si Wu Tang* (Four-Substance Decoction)

both nourish and produce blood, as well as treat irregular menstruation, abnormal uterine bleeding, and other gynecological disorders. Their differences are as follows:

- *Gui Pi Tang* mainly strengthens the Spleen and tonifies qi. It also tonifies the blood and nourishes Heart *shen* (spirit) to treat Spleen and Heart deficiency patterns that manifest in symptoms such as forgetfulness, palpitations, insomnia, night sweats, hot flashes, poor appetite, fatigue, a sallow complexion, a pale tongue with a thin tongue coating, and a fine, moderate pulse. Because the Spleen is responsible for holding blood in the vessels, this formula is effective for uterine bleeding, early menstruation, profuse menstrual bleeding, or trickling of blood due to Spleen deficiency.
- *Si Wu Tang* tonifies and moves the blood at the same time. It also treats abdominal pain, restless fetus, post-partum bleeding, and mass accumulation.²³

Gui Pi Tang and *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart) both nourish the Heart and calm the *shen* (spirit) to treat palpitations, forgetfulness, and insomnia.

- *Gui Pi Tang* is designed for individuals who worry excessively, leading to qi and blood deficiencies of the Spleen and Heart. Other than *shen* disturbance signs, patients will exhibit poor appetite, decreased dietary intake, lassitude, shortness of breath, spontaneous sweating, and other Spleen deficiency signs. In addition to tranquilizing herbs such as *Suan Zao Ren* (Semen Ziziphi Spinosae), *Fu Shen* (Poria Paradicis), *Long Yan Rou* (Arillus Longan), and *Yuan Zhi* (Radix Polygalae), this formula contains Spleen tonic herbs, such as *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- *Tian Wang Bu Xin Dan* is indicated for disharmony of the Heart and Kidney, with Kidney yin and blood deficiencies unable to nourish the Heart, leading to Heart fire. Besides blood deficiency signs of palpitations, forgetfulness and insomnia, there will be symptoms of Heart fire, such as irritability, night sweats, nocturnal emissions, ulcers on the tongue, and dry stools or constipation. This formula uses herbs that nourish yin and blood and have tranquilizing and calming effects, such as *Suan Zao Ren* (Semen Ziziphi Spinosae), *Bai Zi Ren* (Semen Platycladi), *Yuan Zhi* (Radix Polygalae), *Tian Dong* (Radix Asparagi), and *Mai Dong* (Radix Ophiopogonis).²⁴

Gui Pi Tang, *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), and *Suan Zao Ren Tang* (Sour Jujube Decoction) all nourish and calm the *shen* (spirit) to treat palpitations, forgetfulness, insomnia, and associated symptoms and signs.

Guī Pí Tāng (Restore the Spleen Decoction)

- *Gui Pi Tang* tonifies qi and blood and strengthens the Spleen. The two organs involved are the Spleen and Heart. Symptoms include poor appetite, fatigue, lassitude, possible blood in the stool or uterine bleeding. *Gui Pi Tang* is suitable for individuals who think and worry excessively, and who have poor appetite.
- *Tian Wang Bu Xin Dan* nourishes yin and blood to tonify the Heart and calm the *shen*. Key organs involved are the Heart and Kidney. In addition to *shen* disturbance signs, symptoms of yin and blood deficiencies include dry stools, a red tongue body with a scanty coating, and a fine, rapid pulse. Most patients who suffer from Heart and Kidney deficiencies are usually older and have the key sign of forgetfulness.
- *Suan Zao Ren Tang* nourishes the blood, calms the *shen*, clears heat, and relieves irritability. It treats Liver blood deficiency with flaring of deficiency fire causing *shen* disturbance. The key organ involved is the Liver, with signs of dizziness, vertigo, irritability, and a fine, wiry pulse. Individuals who tend to have *Suan Zao Ren Tang* syndrome are mostly women who are under stress for a prolonged period of time and have depleted their Liver blood.²⁵

Gui Pi Tang and *Gu Jing Wan* (Stabilize the Menses Pill) both treat hypermenorrhea and *beng lou* (flooding and spotting).

- *Gui Pi Tang* tonifies the Spleen and Heart, and treats menstrual bleeding that is light in color. It is most suitable for individuals with qi and blood deficiencies, with accompanying symptoms such as weakness, poor appetite, insomnia, and palpitations.
- *Gu Jing Wan* nourishes yin, clears heat, and treats excessive menstrual bleeding that is dark red in color, with or without clots. The tongue body is red and the pulse is wiry, rapid.²⁶

Gui Pi Tang and *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) both use *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) to tonify qi and strengthen the Spleen. The difference is:

- The other herbs in *Gui Pi Tang* focus on nourishing the *shen* (spirit) and tonifying the blood. This formula is mainly used for *shen* disturbance or bleeding.

- The other herbs in *Bu Zhong Yi Qi Tang* lift yang and treat prolapse. This formula is mainly used for qi deficiency leading to organ prolapse.

Zhì Gān Cǎo Tāng (Honey-Fried Licorice Decoction)

炙甘草湯 炙甘草汤

Pinyin Name: *Zhi Gan Cao Tang*

Literal Name: Honey-Fried Licorice Decoction

Alternate Names: *Fu Mai Tang* (Restore the Pulse Decoction), *Chih Kan Tsao Tang*, Baked Licorice Decoction, Roasted Licorice Decoction, Licorice Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-jing in the Eastern Han Dynasty

COMPOSITION

<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	12g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	30 pieces [5-10 pieces]
<i>Di Huang</i> (Radix Rehmanniae)	48g [30g]
<i>Mai Dong</i> (Radix Ophiopogonis)	0.5 cup [9g]
<i>E Jiao</i> (Colla Corii Asini)	6g
<i>Huo Ma Ren</i> (Fructus Cannabis)	0.5 cup [9g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	9g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients, except *E Jiao* (Colla Corii Asini), in approximately 7 cups [1,400 mL] of grain-based liquor and 8 cups [1,600 mL] of water until it is reduced to 3 cups [600 mL]. Add *E Jiao* (Colla Corii Asini) to the warm, strained decoction and allow it to completely dissolve. Take 1 cup [200 mL] of the warm decoction three times a day. Today, this formula is usually prepared by cooking the ingredients in water to obtain a decoction. Use the doses suggested in brackets above. Add 10 mL of grain-based liquor to the warm, strained decoction. Separately dissolve *E Jiao* (Colla Corii Asini) in boiling water, and add it to the warm, strained decoction. Take the decoction in three equally-divided doses and finish it within one day.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and nourishes yin
2. Tonifies the blood and restores the pulse

CLINICAL MANIFESTATIONS

1. Qi and blood deficiencies: a bound or intermittent pulse, palpitations, arrhythmia, weak physical condition, shortness of breath, and a pale tongue with a mirror-like dry surface.
2. Lung atrophy due to deficiency and consumption: dry coughing with little or no sputum, bloody streaks in the sputum, shortness of breath, fidgeting, disturbed sleep, spontaneous perspiration or night sweats, a skinny appearance, an occasional feeling of warm sensation, a dry throat and tongue, difficult defecation, and a deficient, rapid pulse.

CLINICAL APPLICATIONS

Coronary heart disease, rheumatic heart disease, arrhythmia, angina pectoris, viral myocarditis, hypotension, endocarditis, hyperthyroidism, and hyperactivity of the sympathetic nervous system.

EXPLANATION

Zhi Gan Cao Tang (Honey-Fried Licorice Decoction) treats bound or intermittent pulse due to qi and blood deficiencies. In this condition, qi is deficient and cannot flow freely, and blood is deficient and cannot nourish the Heart. A weak physical condition, shortness of breath, spontaneous sweating, and a skinny appearance indicate qi deficiency. Palpitations, insomnia, and a dry, mirror-like tongue surface indicate yin and blood deficiencies. Dry coughing with little or no sputum, the presence of blood in the sputum, night sweats, and a dry throat and tongue suggest yin and body fluid deficiencies.

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), *Ren Shen* (Radix et Rhizoma Ginseng), and *Da Zao* (Fructus Jujubae) tonify Heart and Spleen qi. *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis), *E Jiao* (Colla Corii Asini), and *Huo Ma Ren* (Fructus Cannabis) tonify Heart blood, nourish Lung yin, and replenish body fluids. *Sheng Jiang* (Rhizoma Zingiberis Recens), *Gui Zhi* (Ramulus Cinnamomi), and the grain-based alcohol activate yang and qi flow to restore the pulse.

Zhì Gān Cǎo Tāng (Honey-Fried Licorice Decoction)

Zhi Gan Cao Tang (Honey-Fried Licorice Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Bound or intermittent pulse with qi and blood deficiencies	<ul style="list-style-type: none"> Bound or intermittent pulse with palpitations and arrhythmia: qi deficiency unable to flow freely, and blood deficiency unable to nourish the Heart Weak physical condition, shortness of breath, spontaneous sweating, and a skinny appearance: qi deficiency Palpitations, insomnia, and a dry, mirror-like tongue surface: yin and blood deficiencies Dry coughing with little or no sputum, the presence of blood in the sputum, night sweats, and a dry throat and tongue: yin and body fluid deficiencies 	<ul style="list-style-type: none"> Tonifies qi and nourishes yin Tonifies the blood and restores the pulse 	<ul style="list-style-type: none"> <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Da Zao</i> (Fructus Jujubae) tonify Heart and Spleen qi. <i>Di Huang</i> (Radix Rehmanniae), <i>Mai Dong</i> (Radix Ophiopogonis), <i>E Jiao</i> (Colla Corii Asini), and <i>Huo Ma Ren</i> (Fructus Cannabis) tonify Heart blood, nourish Lung yin, and replenish body fluids. <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>Gui Zhi</i> (Ramulus Cinnamomi), and grain-based alcohol activate yang and qi flow to restore the pulse.

This formula also can be used to treat Lung atrophy due to deficiency and consumption. This condition is characterized by Lung yin deficiency, with symptoms such as dry coughing with little or no sputum, fidgeting, and night sweats. However, if there are severe symptoms of yin deficiency, the doses of *Sheng Jiang* (Rhizoma Zingiberis Recens), *Gui Zhi* (Ramulus Cinnamomi) and grain-based alcohol should be decreased.

MODIFICATIONS

- If there is qi deficiency, add *Huang Qi* (Radix Astragali).
- If there is yang deficiency, add *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With insomnia, add *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Bai Zi Ren* (Semen Platycladi).
- With generalized fatigue and deficiency, add *Tian Dong* (Radix Asparagi) and *Shu Di Huang* (Radix Rehmanniae Praeparata).
- With poor appetite, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae).
- With cough due to Lung atrophy, add *Jie Geng* (Radix Platycodonis) and *Zhi Shi* (Fructus Aurantii Immaturus).
- If there is a feeling of chest congestion and oppression, add *Fu Ling* (Poria) and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With irritability and fright, add *Huang Qi* (Radix Astragali) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With nausea and vomiting, add *Wen Dan Tang* (Warm the Gallbladder Decoction).
- For edema, add *Fu Ling* (Poria) and *Che Qian Zi* (Semen Plantaginis).

CAUTIONS / CONTRAINDICATIONS

- *Zhi Gan Cao Tang* is not appropriate for individuals with severe edema or a fine pulse.
- This formula has a slight moistening and lubricating effect on the intestines. Therefore, it should be used with caution in patients with diarrhea and dysentery.¹

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** Injection of a preparation of *Zhi Gan Cao Tang* was associated with an inhibitory effect on the cardiac tissues to lower the heart rate, reduce the contractile force of the heart, and decrease the blood perfusion to the coronary artery. Its inhibitory effect also counters the stimulating effect of adrenalin.² Additionally, administration of this formula was shown to have a protective effect against ischemia of the cardiac muscles.³
2. **Antiarrhythmic:** *Zhi Gan Cao Tang* has been shown in many studies to be beneficial in treating arrhythmia due to various causes. In one report, administration of the formula in many different animal subjects was effective in treating arrhythmia induced by drugs such as aconitine, CaCl₂, and adrenalin.⁴

CLINICAL STUDIES AND RESEARCH

1. **Arrhythmia:** In a clinical study, patients with coronary heart disease and arrhythmia were divided into two groups. The first group of 23 patients received the normal dose of the herbs decocted in water and alcohol. The second group of 23 patients received only 25% the normal dose of the herbs decocted in water without alcohol. All patients were monitored for their signs (ECG) and symptoms (palpitations, shortness of breath, fatigue, and chest

Zhì Gān Cǎo Tāng (Honey-Fried Licorice Decoction)

congestion). At the end of treatment, the study reported that out of 23 patients in the first group, 16 patients had complete recovery, 4 had marked improvement, and 3 showed no change. In comparison with the second group of 23 patients, 6 patients had complete recovery, 9 had marked improvement, and 8 showed no change. The overall rate of effectiveness was 87.1% in the first group, and 65.2% in the second group.⁵

2. **Angina pectoris:** One hundred and fifty patients with angina pectoris and coronary heart disease were treated with modified *Zhi Gan Cao Tang* with marked effect in 48 patients, improvement in 90 patients, and no change in 12 patients. The overall rate of effectiveness was 92%. Most patients began to notice improvement within 1-3 weeks. The herbal formula was based on *Zhi Gan Cao Tang*, with elimination of *Huo Ma Ren* (Fructus Cannabis) and *Sheng Jiang* (Rhizoma Zingiberis Recens), and the addition of *Gui Ban* (Plastrum Testudinis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Ji Xue Teng* (Caulis Spatholobi).⁶
3. **Viral myocarditis:** Use of *Zhi Gan Cao Tang* in 38 patients with viral myocarditis was associated with complete recovery in 30 patients, improvement in 4 patients, no change in 2 patients, and fatality in 2 patients.⁷ Another report stated 87.5% effectiveness (21 of 24 patients) using this formula to treat viral myocarditis.⁸
4. **Hypotension:** Fifty patients with low blood pressure were treated with good results using modified *Zhi Gan Cao Tang*. Most patients responded within 1-2 weeks, while some needed up to 1 month of herbal therapy. The average length of treatment was 15.8 days.⁹

RELATED FORMULA

Jiā Jiǎn Fù Mài Tāng

(Modified Restore the Pulse Decoction)

加減復脈湯

加減復脈湯

Pinyin Name: *Jia Jian Fu Mai Tang*

Literal Name: Modified Restore the Pulse Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae

Præparata cum Melle) 18g

Di Huang (Radix Rehmanniae) 18g

Bai Shao (Radix Paeoniae Alba) 18g

Mai Dong (Radix Ophiopogonis) 15g

E Jiao (Colla Corii Asini) 9g

Huo Ma Ren (Fructus Cannabis) 9g

Cook the ingredients in 8 bowls of water until the liquid is reduced to 80%. Take the warm, strained decoction

on an empty stomach in three equally-divided doses in the morning, afternoon, and at night. *E Jiao* (Colla Corii Asini) is prepared according to the same instructions specified in *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction).

Jia Jian Fu Mai Tang (Modified Restore the Pulse Decoction) nourishes the blood, astringes yin, generates body fluids, and moistens dryness. Clinically, this formula is often used for patients who have *yangming fu* (hollow organs) excess syndrome, in which the excess heat has been cleared, but the interior deficiency still persists. Patients may show a deficient, big pulse with warm palms and soles, which indicate yin deficiency and possibly some deficiency heat. Successful treatment in this case requires tonifying interior deficiencies without generating heat. Using *Zhi Gan Cao Tang* as a base formula, this formula adds *Bai Shao* (Radix Paeoniae Alba) to enhance the overall functions of tonifying blood, yin, and body fluids. On the other hand, *Ren Shen* (Radix et Rhizoma Ginseng), *Da Zao* (Fructus Jujubae), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Gui Zhi* (Ramulus Cinnamomi) are removed to prevent possible heat formation or other side effects.

AUTHORS' COMMENTS

Zhi Gan Cao Tang has excellent function to tonify qi, replenish blood, nourish yin and warm yang. Historically, it is considered to be the most effective formula to treat irregular heart beat characterized as a bound pulse (結脈 *jie mai*, also translated as a knotted pulse, is a slow pulse with pulses at irregular intervals) and intermittent pulse (代脈 *dai mai*, is a pulse interspersed with more relatively regular pauses). Because of its ability to restore normal rhythmic pulse, *Zhi Gan Cao Tang* is also known as *Fu Mai Tang* (Restore the Pulse Decoction).

Zhi Gan Cao Tang and *Sheng Mai San* (Generate the Pulse Powder) both treat "pulse" disorders, but have the following similarities and differences:

- *Zhi Gan Cao Tang* treats a bound and intermittent, or a deficient and rapid pulse caused by qi and blood deficiencies and their subsequent inability to nourish Heart *shen* (spirit). Additional signs and symptoms include palpitations, shortness of breath, and a pale tongue with a scanty tongue coating. *Zhi Gan Cao Tang* nourishes Heart blood and tonifies Heart yang to "restore pulse."
- *Sheng Mai San* treats a deficient, fine pulse caused by heat injuring qi and yin. Additional symptoms include profuse sweating, fatigue, shortness of breath, a dry throat, and thirst. *Sheng Mai San* tonifies qi, promotes the production of body fluids, and astringes yin to "generate pulse."¹⁰

Zhì Gān Cǎo Tāng (Honey-Fried Licorice Decoction)

Zhi Gan Cao Tang and *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart) both nourish yin and blood to treat palpitations, anxiety, insomnia, and dry stools.

- *Zhi Gan Cao Tang* involves qi and blood deficiencies. Insufficiency of blood fails to nourish the Heart. When qi is deficient, the yang is weak and cannot generate the pulse, which leads to a bound or intermittent pulse. Thus, qi tonics must be used in conjunction with yin and blood tonics to generate the pulse. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Sheng Jiang* (Rhizoma Zingiberis Recens), *E Jiao* (Colla Corii Asini), *Mai Dong* (Radix Ophiopogonis), and *Da Zao* (Fructus Jujubae) nourish yin and blood. *Ren Shen* (Radix et Rhizoma Ginseng) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) warm and tonify qi. *Gui Zhi* (Ramulus Cinnamomi) and *Sheng Jiang* (Rhizoma Zingiberis Recens) assist Heart yang to restore the pulse.
- *Tian Wang Bu Xin Dan* is suitable for Heart yin and blood deficiencies, with excess Heart yang flaring. Anxiety, decreased sleep, palpitations, a withered *shen* (spirit),

nocturnal emissions, and nervousness are the results of the *shen* not being nourished. Thus, nourishing herbs and *shen*-calming herbs are used together.¹¹

Nǚ Kē Bǎi Zǐ Rén Wán (Platycladus Seed Pill for Females)

女科柏子仁丸

Pinyin Name: Nu Ke Bai Zi Ren Wan

Literal Name: Platycladus Seed Pill for Females

Alternate Names: Bai Zi Ren Wan (Platycladus Seed Pill), Biota and Cyathula Formula

Original Source: *Fu Ren Liang Fang* (Fine Formulas for Women) by Chen Zi-Ming in 1237

COMPOSITION

<i>Bai Zi Ren</i> (Semen Platycladi), <i>cuo</i> (grated)	15g
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	90g
<i>Xu Duan</i> (Radix Dipsaci)	60g
<i>Niu Xi</i> (Radix Achyranthis Bidentatae)	15g
<i>Juan Bai</i> (Herba Selaginellae)	15g
<i>Ze Lan</i> (Herba Lycopi)	60g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into a fine powder and mix with honey to form pills. The pills should resemble the size of

Wu Tong Zi (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 30 pills with rice water on an empty stomach.

Nǚ Kē Bǎi Zǐ Rén Wán (Platycladus Seed Pill for Females)

CHINESE THERAPEUTIC ACTIONS

Tonifies the blood and nourishes yin

CLINICAL MANIFESTATIONS

Irregular menstruation and amenorrhea due to blood and yin deficiencies: anxiety, soreness and pain of the abdomen and lower back, dizziness and light-headedness, and tidal fever.

CLINICAL APPLICATIONS

Irregular menstruation, amenorrhea, and menstrual disorders.

EXPLANATION

Nu Ke Bai Zi Ren Wan (Platycladus Seed Pill for Females) is often prescribed in the treatment of irregular menstruation and amenorrhea due to blood and yin deficiencies. If untreated, chronic blood and yin deficiencies can lead to the complication of deficiency heat rising upward. Clinically, the symptoms and signs of underlying deficiency include soreness and pain of the abdomen and lower back, dizziness and light-headedness; and those of deficiency heat include anxiety and tidal fever.

The aim of this formula is to tonify the blood, nourish yin, and restore normal menstruation. *Bai Zi Ren* (Semen

Platycladi) nourishes the Heart and calms the *shen* (spirit) to relieve irritability and anxiety secondary to deficiency heat. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Xu Duan* (Radix Dipsaci), and *Niu Xi* (Radix Achyranthis Bidentatae) tonify the Liver and Kidney and benefit the *chong* (thoroughfare) and *ren* (conception) channels. Together, they treat the underlying deficiencies of the body. *Juan Bai* (Herba Selaginellae) and *Ze Lan* (Herba Lycopi) restore normal menstruation by activating blood circulation and opening the channels and collaterals.

MODIFICATIONS

- With headache due to blood deficiency, add *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong).
- If there is low back pain due to qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- With abdominal pain due to blood stagnation, add *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami).
- For amenorrhea due to blood deficiency, add *Si Wu Tang* (Four-Substance Decoction).
- For amenorrhea due to blood stagnation, add *Tao Ren Cheng Qi Tang* (Peach Pit Decoction to Order the Qi).
- For amenorrhea due to overexertion, add *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).

Nu Ke Bai Zi Ren Wan (Platycladus Seed Pill for Females)

Irregular menstruation and amenorrhea due to blood and yin deficiencies	<ul style="list-style-type: none"> • Soreness and pain of the abdomen and lower back, dizziness and light-headedness: blood and yin deficiencies • Anxiety and tidal fever: deficiency heat 	Tonifies the blood and nourishes yin	<ul style="list-style-type: none"> • <i>Bai Zi Ren</i> (Semen Platycladi) nourishes the Heart and calms the <i>shen</i> (spirit) to relieve irritability and anxiety. • <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>Xu Duan</i> (Radix Dipsaci), and <i>Niu Xi</i> (Radix Achyranthis Bidentatae) tonify the Liver and Kidney and benefit the <i>chong</i> (thoroughfare) and <i>ren</i> (conception) channels. • <i>Juan Bai</i> (Herba Selaginellae) and <i>Ze Lan</i> (Herba Lycopi) restore normal menstruation by activating blood circulation and opening the channels and collaterals.

Dāng Guī Sháo Yào Sǎn (Tangkuei and Peony Powder)

當歸芍藥散 当归芍药散

Pinyin Name: *Dang Gui Shao Yao San*

Literal Name: Tangkuei and Peony Powder

Alternate Names: *Tang Kuei Shao Yao San*, Tang-kuei and Peony Formula, Tangkuei and Peony Formula

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	24g [9g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	48g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	12g
<i>Fu Ling</i> (Poria)	12g
<i>Ze Xie</i> (Rhizoma Alismatis)	24g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder. Take 6g of powder per dose with a grain-based liquor three times daily. Today, this formula can also be given in decoction twice daily, with the dose of *Chuan Xiong* (Rhizoma Chuanxiong) suggested in brackets. Note: The source text states to use 24g of *Chuan Xiong* (Rhizoma Chuanxiong). Today, most practitioners and commercial products use only 9g.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the blood to soften the Liver
2. Strengthens the Spleen and resolves dampness

CLINICAL MANIFESTATIONS

Abdominal pain with edema during pregnancy due to blood deficiency and abnormal water circulation: continuous cramping pain in the abdomen, anemia, a pale face, palpitations, dizziness, vertigo, tinnitus, fatigue, lack of energy, sore back, extreme coldness of the hands and feet, and edema.

CLINICAL APPLICATIONS

Dysmenorrhea, menstrual irregularity, uterine bleeding, abdominal pain and cramps, leukorrhea, hypochromic anemia, luteal insufficiency, infertility, habitual miscarriage, unstable pregnancy, breech presentation, gestational hypertension, abdominal pain during pregnancy, adnexitis, pelvic inflammatory disease, menopause, anemia, dizziness, vertigo, palpitations, chloasma, acne, chronic nephritis, beriberi, and angina.

EXPLANATION

Dang Gui Shao Yao San (Tangkuei and Peony Powder) treats abdominal pain and edema during pregnancy

characterized by blood deficiency and abnormal water circulation. Abdominal pain is generally considered to be the main indication for this formula. Due to the deficient nature of the illness, the abdominal pain is characterized as dull, cramping, and continuous but not severe. It is generally accompanied by a feeling of coldness in the body, hands, and feet. Since there is blood deficiency, patients could present with anemia, palpitations, dizziness, and vertigo. With abnormal water circulation, patients may experience edema and a heavy sensation. Edema, which occurs most frequently in the lower extremities, is a sign of water accumulation; and the heavy sensation, which is most prominent in the head, is a sign of damp accumulation.

Dang Gui (Radix Angelicae Sinensis) tonifies the blood and activates blood circulation. It regulates menstruation, treats anemia, and relieves abdominal pain. *Chuan Xiong* (Rhizoma Chuanxiong) activates and regulates blood circulation. *Bai Shao* (Radix Paeoniae Alba) nourishes the blood and consolidates yin. In addition, *Bai Shao* (Radix Paeoniae Alba) has an excellent effect to relieve spasms and cramps of both the skeletal and smooth muscles. It is commonly used in large quantities to relieve abdominal pain and cramps. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) strengthen the Spleen and resolve dampness. *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis) have a diuretic action to relieve edema.

MODIFICATIONS

- For unstable pregnancy, add *Sha Ren* (Fructus Amomi), *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), *Ai Ye* (Folium Artemisiae Argyi), and *Huang Qin* (Radix Scutellariae).

Dāng Guī Sháo Yào Sǎn (Tangkuei and Peony Powder)

Dang Gui Shao Yao San (Tangkuei and Peony Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Abdominal pain with edema due to blood deficiency and abnormal water metabolism	<ul style="list-style-type: none"> Anemia, palpitations, dizziness, vertigo and feeling of coldness in the body, hands, and feet: blood deficiency Edema and a heavy sensation: abnormal water metabolism with damp accumulation 	<ul style="list-style-type: none"> Nourishes the blood to soften the Liver Strengthens the Spleen to regulate water metabolism 	<ul style="list-style-type: none"> <i>Dang Gui</i> (Radix Angelicae Sinensis) tonifies the blood and activates blood circulation. <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activates and regulates blood circulation. <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes the blood and consolidates yin. <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Fu Ling</i> (Poria) strengthen the Spleen and resolve dampness. <i>Fu Ling</i> (Poria) and <i>Ze Xie</i> (Rhizoma Alismatis) relieve edema.

- For amenorrhea with severe edema due to dampness, combine with *Wu Ling San* (Five-Ingredient Powder with Poria).
- If there is severe abdominal pain, add *Xiang Fu* (Rhizoma Cyperi) and *Ai Ye* (Folium Artemisiae Argyi).
- With dizziness and headache, add *Bai Zhi* (Radix Angelicae Dahuricae), *Huang Qi* (Radix Astragali), and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- With irritability and thirst, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- If there are more signs and symptoms of cold, add *Wu Zhu Yu* (Fructus Evodiae) and *Gui Zhi* (Ramulus Cinnamomi).

PHARMACOLOGICAL EFFECTS

1. **Endocrine:** Administration of *Dang Gui Shao Yao San* has a stimulating effect on the production and secretion of hormones.¹ One *in vitro* study reported that *Dang Gui Shao Yao San* stimulated preovulatory follicles before a luteinizing hormone (LH) surge to secrete progesterone, but it suppressed estradiol-17 beta secretion by growing preovulatory follicles before a LH surge.²
2. **Ovulatory:** Administration of *Dang Gui Shao Yao San* has marked effects on the endocrine system and the ovaries. In one experiment, the use of *Dang Gui Shao Yao San* at 0.5 g/kg successfully induced ovulation in 30% of the mice. In contrast, the use of gonadotropin-releasing hormone was associated with a 65% success rate in promoting ovulation. Lastly, the combination of herbs and drugs were 90% effective in inducing ovulation. The study suggested that the formula has either a direct or an indirect stimulating effect on the endocrine system.³ Another study stated that *Dang Gui Shao Yao San* may treat ovulatory disorders by stimulating both steroidogenesis and the ovulatory process.⁴
3. **Effect on uterus:** Administration of *Dang Gui Shao Yao San* was associated with an increased uterine weight in rats. This effect is voided if the ovaries were surgically removed.⁵ Other studies suggested that this formula is beneficial in fertility by promoting implantation and early growth.⁶
4. **Hemodynamic:** Administration of *Dang Gui Shao Yao San* was associated with a dual effect on the hemodynamics of the blood. In one study, continuous administration of the formula at 0.5 g/kg for 17 days was associated with decreased viscosity of the blood in pregnant rats. In another study, it was noted that the formula was effective at stopping bleeding in mice and reduces the amount of blood loss during an injury.⁷
5. **Immunostimulant:** Administration of *Dang Gui Shao Yao San* was associated with a significant increase in lymphocyte proliferation in aged rats. It also showed an antagonizing effect against the inhibition of isoprel on lymphocyte proliferation.⁸
6. **Radioprotective:** One study evaluated the protective effect of *Dang Gui Shao Yao San* in mice treated with single X-irradiation. The study found that this formula had a dose-dependent effect that protected mice and prevented hematopoietic injury from sublethal effects of radiation. *Dang Gui Shao Yao San* was given at doses of 10 and 20 mg/20g body weight, for 7 consecutive days before irradiation. Pretreatment of *Dang Gui Shao Yao San* increased the number of femoral spleen colony-forming units (CFU-S) that survived irradiation, and significantly ameliorated leukopenia, thrombocytopenia and the degression of hematocrits after irradiation.⁹
7. **Antioxidant:** In one study in rats, administration of *Dang Gui Shao Yao San* was associated with free radical scavenging activity, which contributed to its prophylactic effect against free radical-mediated neurological diseases associated with aging.¹⁰

Dāng Guī Shāo Yào Sǎn (Tangkuei and Peony Powder)

CLINICAL STUDIES AND RESEARCH

- 1. Abdominal pain during pregnancy:** One study reported 96.5% effectiveness using *Dang Gui Shao Yao San* to treat 86 pregnant women with abdominal pain. The duration of treatment ranged from 3-14 days.¹¹
- 2. Gestational hypertension:** Administration of *Dang Gui Shao Yao San* was effective in controlling gestational hypertension in 46 women. The herbal formula did not affect the normal development of the fetus, and did not contribute to excess bleeding during labor (loss of blood did not exceed 400 mL in all cases). In addition, the hypertension did not become permanent in any of the 46 women.¹² In another study, administration of modified *Dang Gui Shao Yao San* in 52 women with moderate severity of gestational hypertension showed excellent effects. Improvements included increased volume of urination, reduction of edema, and lowered blood pressure. Furthermore, there were no complications with labor or bleeding during delivery. There were no adverse reactions in any of the women or their babies.¹³
- 3. Breech presentation:** In one study, 217 pregnant women with breech presentation were treated with *Dang Gui Shao Yao San* with excellent results. Breech presentation was corrected within 3-6 doses in all 87 women (100%) with first pregnancy, and 128 out of 130 women (98.5%) with previous pregnancy. The herbal formula contained *Dang Gui Shao Yao San* plus *Xu Duan* (Radix Dipsaci), *Sang Ji Sheng* (Herba Taxilli), and others.¹⁴ According to another study, use of *Dang Gui Shao Yao San* was associated with successful correction of breech presentation in 217 of 239 patients (90.8% rate of success).¹⁵
- 4. Infertility:** Twenty women with infertility were treated with *Dang Gui Shao Yao San* with a 100% success rate. All 20 women became pregnant and had normal pregnancy and delivery. According to other references, the success rate of the formula is approximately 55%.¹⁶
- 5. Uterine bleeding:** Modified *Dang Gui Shao Yao San* showed 91.3% effectiveness in treating 437 patients with uterine bleeding due to various causes. Modifications included addition of *Di Yu* (Radix Sanguisorbae), *Hai Piao Xiao* (Endoconcha Sepiae), and dry-fried *Pu Huang* (Pollen Typhae) for profuse bleeding; *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) for qi deficiency; and *Qian Cao* (Radix et Rhizoma Rubiae) and *Wu Ling Zhi* (Faeces Troglodyteri) for severe abdominal pain. The study reported relief for most patients within 1-3 packs of herbs.¹⁷ According to another study, 99 patients with uterine bleeding due to various causes were treated with *Dang Gui Shao Yao San* with an overall effectiveness rate of 91%.¹⁸
- 6. Habitual miscarriage:** Two studies reported that use of *Dang Gui Shao Yao San* and *Chai Ling Tang* (Bupleurum and Poria Decoction) helped to prevent autoimmunity-related recurrent miscarriage by correcting T helper-1/T helper-2 balance.^{19,20}
- 7. Luteal insufficiency:** Administration of *Dang Gui Shao Yao San* in women with luteal insufficiency was found to be effective in improving luteal insufficiency as determined by daily measurement of basal body temperature and plasma progesterone levels. In women with normal menstrual cycles, use of the formula did not cause any adverse effects on hormonal levels such as prolactin, gonadotropins, steroids, estrogens, pregnanediol and luteinizing hormone (LH). No side effects were reported. The researchers concluded that *Dang Gui Shao Yao San* improves luteal insufficiency in women but does not affect the hormonal levels of women with normal menstrual cycles.²¹
- 8. Dysmenorrhea:** One double-blind study evaluated the therapeutic effect of *Dang Gui Shao Yao San* versus placebo for treatment of primary dysmenorrhea characterized by "a combination of 'deficiency of yin,' 'cold,' and 'stagnant blood' syndromes." The patients were treated with herbs or placebo during 2 menstrual cycles and were followed for 2 additional cycles. At the end of the study, it was noted that women who received *Dang Gui Shao Yao San* had a significant alleviation of dysmenorrhea in comparison to those treated with placebo.²²
- 9. Dysmenorrhea:** Seventeen patients with dysmenorrhea (including recurrent endometriotic and adenomyotic patients) obtained complete relief within three months when treated with the following cyclic therapy. The treatment protocol was to alternate giving *Dang Gui Shao Yao San* and *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction) within the menstrual cycle. Clinical improvements included relief of pain, biphasic changes in basal body temperature patterns, improved level of estradiol, and successful pregnancy and delivery in one case. The study concluded that this cyclic therapy of two herbal formulas can be a conservative antidysmenorrhea therapy for endometriotic and adenomyotic patients who desire pregnancy.²³
- 10. Menopause:** Administration of *Dang Gui Shao Yao San* has been shown to have marked effects in alleviating menopausal symptoms. In one study involving 24 women, the formula was extremely effective in 2 cases, moderately effective in 16 cases, and not effective in 6 cases. The formula contained *Fu Ling* (Poria), *Cang Zhu* (Rhizoma Atractylodis), *Bai Shao* (Radix Paeoniae Alba), *Ze Xie* (Rhizoma Alismatis), *Dang Gui* (Radix Angelicae Sinensis), and *Chuan Xiong* (Rhizoma Chuanxiong). The herbs were given in extract form, 2.5g twice daily before meals for 2 months.²⁴ In another study involving 13 women with menopause induced by hysterectomy, the

Dāng Guī Sháo Yào Sǎn (Tangkuei and Peony Powder)

formula was extremely effective in 4 women, moderately effective in 5 women, and had no effect in 4 women.²⁵

11. **Hypochromic anemia in uterine myoma:** One study compared the therapeutic benefits of *Dang Gui Shao Yao San* and an oral iron preparation in the treatment of hypochromic anemia in cases of uterine myoma. Out of 25 patients, 10 were treated with herbs and 15 with iron, for a total of 8 weeks. The study reported that the iron group had improvement in blood counts and the laboratory parameters of anemia, while the herb group had improvement in the signs and symptoms of anemia, such as facial pallor, spoon-shaped nails and dizziness. Side effects were observed in 80% of the oral iron group, but no significant side effects were observed in the herb group. The study concluded that *Dang Gui Shao Yao San* may be useful in resolving the symptoms of mild or moderate anemia associated with uterine myoma.²⁵
12. **Adnexitis:** Administration of modified *Dang Gui Shao Yao San* in 49 patients with adnexitis was associated with complete recovery in 34 patients, improvement in 11 patients, and no effect in 4 patients. The rate of effectiveness was 91.8%. The herbal treatment contained *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Ze Xie* (Rhizoma Alismatis) in the following ratios (1:5.6:2.7:1.3:1.3:2.7). The treatment protocol was to administer 5 capsules (0.4g of herb powder per capsule) three times daily for 15 days per course of treatment.²⁷
13. **Pelvic inflammatory disease:** Use of modified *Dang Gui Shao Yao San* in 160 patients with chronic pelvic inflammatory disease was associated with complete recovery in 99 patients, significant improvement in 42 patients, moderate improvement in 15 patients, and no effect in 4 patients. The effectiveness was 97.50%. The herbal treatment contained *Dang Gui Shao Yao San* plus *Bai Hua She She Cao* (Herba Hedyotis), *Da Xue Teng* (Caulis Sargentodoxae), and *Yi Yi Ren* (Semen Coicis) as the base formula. *Di Huang* (Radix Rehmanniae) and *Mu Dan Pi* (Cortex Moutan) were added for the presence of damp-heat; *Tao Ren* (Semen Persicae) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for qi and blood stagnation; and *Xiao Hui Xiang* (Fructus Foeniculi) and *Rou Gui* (Cortex Cinnamomi) for cold stagnation in the womb.²⁸
14. **Chloasma:** Use of modified *Dang Gui Shao Yao San* was associated with 91.1% effectiveness in treating 235 patients with irregular brownish or blackish spots, especially on the face. The herbal treatment contained *Dang Gui Shao Yao San* plus *Yi Yi Ren* (Semen Coicis) and *Bai Zhi* (Radix Angelicae Dahuricae) as the base formula, with addition of *Chai Hu* (Radix Bupleuri) and *Xiang Fu*

- (Rhizoma Cyperi) for Liver qi stagnation; *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Ze Lan* (Herba Lycopi) for blood stagnation; *Mu Dan Pi* (Cortex Moutan) and dry-fried *Zhi Zi* (Fructus Gardeniae) for heat in the blood; processed *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; *E Jiao* (Colla Corii Asini) and *Ji Xue Teng* (Caulis Spatholobi) for blood deficiency; *Cang Zhu* (Rhizoma Atractylodis), *Zhu Ling* (Polyporus), and *Ze Xie* (Rhizoma Alismatis) for accumulation of dampness; *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi) for Kidney yang deficiency; and *Di Huang* (Radix Rehmanniae) and *Shi Hu* (Caulis Dendrobii) for Kidney yin deficiency. An herbal preparation was also applied topically to the affected area. Composition of the topical preparation was unavailable at the time of publication. Of 235 patients, the study reported complete recovery in 58 patients, significant improvement in 69 patients, moderate improvement in 87 patients, and no change in 21 patients.²⁹
15. **Acne:** One study reported that *Dang Gui Shao Yao San* effectively suppressed acne rashes as well as incidental symptoms. In contrast, suppression of incidental symptoms could not be achieved with antimicrobial drugs, suggesting that the herbs may have other mechanisms of action.³⁰
16. **Angina:** Ninety-six patients with angina due to decreased blood perfusion were treated with modified *Dang Gui Shao Yao San* with significant improvement in 27 patients, moderate improvement in 52 patients, mild improvement in 11 patients, and no effect in 6 patients. The treatment protocol was to administer the herbs in decoction twice daily, in the morning and at night. The base formula contained *Dang Gui* (Radix Angelicae Sinensis) 10-12g, *Chi Shao* (Radix Paeoniae Rubra) 10-12g, *Fu Ling* (Poria) 10-12g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10-12g, *Ze Xie* (Rhizoma Alismatis) 10-12g, *Chuan Xiong* (Rhizoma Chuanxiong) 10-12g, *Tai Zi Shen* (Radix Pseudostellariae) 20-40g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 10-30g, and *Shui Zhi* (Hirudo) 10-30g. Herbs were added based on the condition of the individual patient. *Ren Shen* (Radix et Rhizoma Ginseng) 10g was added for qi deficiency. *Bai Jie Zi* (Semen Sinapis) 10g, *Dan Nan Xing* (Arisaema cum Bile) 10g, and *Gua Lou* (Fructus Trichosanthis) 30g were added for phlegm stagnation. *Chuan Xiong* (Rhizoma Chuanxiong) 30-60g and *Shui Zhi* (Hirudo) 30-60g were added for severe blood stagnation.³¹
17. **Dizziness and vertigo:** Twenty patients with dizziness and vertigo were treated with *Dang Gui Shao Yao San* with complete recovery in 12 patients and moderate improvement in 8 patients.³² It has been suggested that this formula has a marked regulating effect on blood pressure, and

Dāng Guī Sháo Yào Sǎn (Tangkuei and Peony Powder)

therefore could benefit patients with hypertension or hypotension characterized by deficiency.³³

HERB-DRUG INTERACTION

- **Colchicine-induced learning impairment:** Concurrent administration of *Dang Gui Shao Yao San* and colchicine was associated with improvement in learning acquisition deficit induced by colchicine in rats. The action mechanism of *Dang Gui Shao Yao San* may be involved in the increase in the level of superoxide dismutase.³⁴
- **Drug-induced menopause:** One study evaluated the therapeutic effects of certain herbal medicines on menopausal symptoms induced by gonadotropin-releasing hormone agonist therapy in Japanese women with endometriosis, adenomyosis, or leiomyoma. According to this study, menopausal symptoms induced by gonadotropin-releasing hormone agonist therapy in 13 patients were successfully treated with *Dang Gui Shao Yao San*, *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), *Jia Wei Xiao Yao San* (Augmented Rambling Powder), *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi), or *Gui Zhi Tang* (Cinnamon Twig Decoction). Of 11 patients with hot flashes, *Dang Gui Shao Yao San* provided some relief in all 11 patients, and total relief in 4 patients. Most importantly, there were no significant changes in serum estradiol levels after treatment with these herbal medicines. The researchers concluded that these herbal medicines can be recommended for menopausal symptoms induced by gonadotropin-releasing hormone agonists without a negative effect on serum estradiol levels.³⁵

TOXICOLOGY

This formula has little toxicity. No fatality was reported following oral ingestion of the formula at 8-10 g/kg in mice. Moreover, no abnormalities were observed in the fetus following oral administration of the formula at 8 g/kg/day for 7-17 days in pregnant rats.³⁶

RELATED FORMULA

Ren Shen Dang Shao San (Ginseng, Tangkuei, and Peony Powder) is a modification of *Dang Gui Shao Yao San* with the addition of *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Rou Gui* (Cortex Cinnamomi). This formula tonifies qi and blood, strengthens the Spleen, and warms yang. Clinically, this formula is used to treat various disorders characterized by qi, blood and yang deficiencies, such as irregular menstruation, dysmenorrhea, infertility, unstable pregnancy, and postpartum care.

AUTHORS' COMMENTS

Dang Gui Shao Yao San was originally designed to treat abdominal pain with edema during pregnancy. Today, its clinical applications have been greatly expanded to include various menstrual, gestational and postpartum disorders characterized by blood deficiency and abnormal water circulation.

Sháo Yào Gān Cǎo Tāng (Peony and Licorice Decoction)

芍藥甘草湯

芍药甘草汤

Pinyin Name: *Shao Yao Gan Cao Tang*

Literal Name: Peony and Licorice Decoction

Alternate Names: *Shao Yao Kan Tsao Tang*, Peony and Licorice Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Bai Shao</i> (Radix Paeoniae Alba)	12g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	12g

DOSAGE / PREPARATION / ADMINISTRATION

Cook both herbs in 3 cups [600 mL] of water and reduce it to 1.5 cups [300 mL]. Take the warm, strained decoction in two equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies yin and blood
2. Replenishes body fluids

Sháo Yào Gān Cǎo Tāng (Peony and Licorice Decoction)

CLINICAL MANIFESTATIONS

Spasms and cramps due to yin, blood and body fluid deficiencies: smooth or skeletal muscle spasms and cramps in various parts of the body, and tightness of the tendons and ligaments.

CLINICAL APPLICATIONS

Spasms, cramps, convulsions, stomach and intestinal cramps, trigeminal neuralgia, neuralgia, sciatica, frozen shoulder, systemma, restless leg syndrome, acute back pain, heel pain, chronic atrophic gastritis, peptic ulcer disease, gastric and abdominal pain, colitis, constipation, pain associated with cholelithiasis or urolithiasis, diabetes mellitus, hyperosteogeny, dysmenorrhea, perimenopause with uterine leiomyomas, and drug-induced menopause.

EXPLANATION

Shao Yao Gan Cao Tang (Peony and Licorice Decoction) can relieve various pains, spasms, or cramps due to deficiencies of yin, blood, and body fluids. This condition may arise as a result of excessive sweating, high fever, or excessive use of exterior-releasing herbs.

Bai Shao (Radix Paeoniae Alba) nourishes yin, tonifies the blood, and replenishes body fluids. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthens the Spleen and tonifies qi. Together, they relieve spasms and cramps due to deficiencies of yin, blood, and body fluids.

MODIFICATIONS

- For spasms and cramps of the extremities, add *Xi Xin* (Radix et Rhizoma Asari) and *Gan Jiang* (Rhizoma Zingiberis).
- If there is dysuria, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).
- With back pain, add *Du Zhong* (Cortex Eucommiae), *Niu Xi* (Radix Achyranthis Bidentatae), and *Yan Hu Suo* (Rhizoma Corydalis).
- With neck and shoulder pain, add *Ge Gen* (Radix Puerariae Lobatae) or *Ge Gen Tang* (Kudzu Decoction).
- With severe pain, add *Yan Hu Suo* (Rhizoma Corydalis).

- For traumatic injuries involving bone fractures, add *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha), or *Zheng Gu Zi Jin Dan* (Purple and Gold Pill for Righteous Bones).
- For dysmenorrhea, add *Xiang Fu* (Rhizoma Cyperi) and *Shi Xiao San* (Sudden Smile Powder).
- For pain from kidney stones, add *Zhu Ling Tang* (Polyporus Decoction), *Hai Jin Sha* (Spora Lygodii), *Jin Qian Cao* (Herba Lysimachiae), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

CAUTIONS / CONTRAINDICATIONS

- Use *Shao Yao Gan Cao Tang* with caution in patients with hypertension, since this formula contains a high dose of *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and may cause water retention.
- Avoid cold or raw, pungent or spicy, and oily or greasy foods while taking this formula.¹

PHARMACOLOGICAL EFFECTS

1. **Effect on the smooth muscles:** Administration of the formula had a marked inhibitory effect on the smooth muscles of the intestines in rabbits.²
2. **Effect on the skeletal muscles:** Administration of the formula had a marked effect to relax the skeletal muscles. Though the exact mechanism is not clear, part of the function is attributed to the lowered permeability of calcium and potassium across the cell membrane.³
3. **Analgesic:** In animal studies, *Shao Yao Gan Cao Tang* was very effective in relieving pain. In human studies, the formula was only slightly effective in relieving pain. The effectiveness increased significantly, however, when combined with acupuncture.⁴

CLINICAL STUDIES AND RESEARCH

1. **Trigeminal neuralgia:** In one study, 42 patients with trigeminal neuralgia were treated with modified *Shao Yao Gan Cao Tang* for 7-25 packs of herbs with relief of pain in all patients. In a follow up one year later, 30 patients experienced no recurrences, while 12 patients experienced a relapse of neuralgia six months after the conclusion of herbal treatment that was less frequent and less severe.

Shao Yao Gan Cao Tang (Peony and Licorice Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spasms and cramps	Spasms or cramps: deficiencies of yin, blood and body fluids	<ul style="list-style-type: none"> • Tonifies yin and blood • Replenishes body fluids 	<ul style="list-style-type: none"> • <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes yin, tonifies blood, and replenishes body fluids. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthens the Spleen and tonifies qi.

Sháo Yào Gān Cǎo Tāng (Peony and Licorice Decoction)

The formula was modified by adding *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Mu Gua* (Fructus Chaenomelis).⁵

2. **Neuralgia:** One study reported relief of neuralgia in all 59 patients when they were treated with *Shao Yao Gan Cao Tang* using *Bai Shao* (Radix Paeoniae Alba) 50g and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 30g. The duration of treatment ranged from 3-24 packs of herbs. In follow-up exams one year later, 42 of 59 patients did not have any recurrences. However, recurrences reported in the other 17 patients were at lower frequency and severity of pain.⁶
3. **Systremma:** Administration of *Shao Yao Gan Cao Tang* plus *Gui Zhi* (Ramulus Cinnamomi) and *Mu Gua* (Fructus Chaenomelis) was effective in treating all 85 patients with leg cramps in the calf characterized by Liver yin and blood deficiencies. The patients were given the herbs in decoction, for a total of 3-5 packs.⁷
4. **Restless leg syndrome:** In one study, 21 patients with restless leg syndrome were treated with modified *Shao Yao Gan Cao Tang* for 6-25 doses with complete recovery in all patients.⁸ Another study reported 100% effectiveness among 54 patients (33 males and 21 females with 1 month to 11 years history of illness) with restless leg syndrome using *Shao Yao Gan Cao Tang* administered as tea three times daily for 2-9 packs of herbs. The herbal formula contained 15 grams each of *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The treatment protocol was to cook the herbs in 3 cups of water to yield 1 cup of decoction, which was then taken in two equally-divided doses.⁹
5. **Acute back pain:** In one study, 68 patients with acute back sprain were treated with *Shao Yao Gan Cao Tang* with complete recovery in 61 patients, moderate improvement in 6 patients, and no improvement in 1 patient. The herbal formula contained *Bai Shao* (Radix Paeoniae Alba) 20g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 20g, and *San Qi* (Radix et Rhizoma Notoginseng) 6g. The herbs were given in decoction twice daily for 5 days.¹⁰
6. **Heel pain:** One study reported 98% effectiveness using *Shao Yao Gan Cao Tang* to treat heel pain. Of 300 patients with this condition, the study reported complete recovery in 165 patients within 3 packs of herbs, complete recovery in 108 patients within 6 packs of herbs, improvement in 21 patients after 7 packs of herbs, and no effect in 6 patients.¹¹
7. **Muscle cramps in hemodialysis:** In a preliminary study, administration of *Shao Yao Gan Cao Tang* at 6 g/day for 4 weeks was effective in treating muscle cramps in maintenance hemodialysis patients. Of 5 patients, 2 had complete resolution of skeletal muscle cramps and 2 had decreased frequency and severity. No serious side effects were reported. The researchers concluded that *Shao Yao Gan Cao Tan* is a safe, effective treatment for preventing muscle cramps in patients undergoing hemodialysis.¹²
8. **Chronic atrophic gastritis:** In one study, 82 patients with chronic atrophic gastritis were treated with 98.77% effectiveness using *Chi Shao* (Radix Paeoniae Rubra) 24g and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g as the base formula. Modifications were made by adding *Huang Lian* (Rhizoma Coptidis) and *Mu Dan Pi* (Cortex Moutan) for feelings of epigastric burning and pain; *Tian Hua Fen* (Radix Trichosanthis) for thirst; *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae) for hypochondriac fullness and pain; *Pu Huang* (Pollen Typhae) and *Wu Ling Zhi* (Faeces Troglodyteri) for distention and pain after meals; *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Mu Dan Pi* (Cortex Moutan) for insomnia and irritability; and *Xuan Fu Hua* (Flos Inulae) and *Zhe Shi* (Haematitum) for belching. The average duration of treatment was approximately 60 days. Of 82 patients, the study reported complete recovery in 79 patients, improvement in 2 patients, and no change in 1 patient.¹³ Another study reported 91.7% effectiveness using modified *Shao Yao Gan Cao Tang* to treat 36 patients with chronic atrophic gastritis.¹⁴
9. **Peptic ulcer disease:** In one study, 120 patients with peptic ulcer were treated with *Shao Yao Gan Cao Tang* with some success. The success rate was 63.5% for those diagnosed with deficiency and cold of the Spleen and Stomach, 74.4% for those diagnosed with Stomach yin deficiency, 84.6% for patients with qi and blood stagnation, and 66% for patients with Liver and Stomach disharmony.¹⁵
10. **Colitis:** One study reported 90.6% effectiveness in the treatment of chronic colitis using *Shao Yao Gan Cao Tang* as a base formula, plus *Hua Jiao* (Pericarpium Zanthoxyli), *Da Xue Teng* (Caulis Sargentodoxae) and others. Modifications included addition of *Wu Zhu Yu* (Fructus Evodiae) and *Pao Jiang* (Rhizoma Zingiberis Praeparatum) for damp-cold; *Huang Lian* (Rhizoma Coptidis) and *Yi Yi Ren* (Semen Coicis) for damp-heat; *Da Huang* (Radix et Rhizoma Rhei) for constipation; *Wu Mei* (Fructus Mume) for diarrhea; and *Huai Hua* (Flos Sophorae) for hematochezia. Of 32 patients, 17 had significant improvement, 12 had moderate improvement, and 3 had no benefit.¹⁶
11. **Constipation:** Sixty patients with habitual constipation were treated with modified *Shao Yao Gan Cao Tang* with good results. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) was added for qi deficiency. *Fu Zi* (Radix Aconiti Lateralis Praeparata) was added for cold.¹⁷
12. **Gastric and abdominal pain:** In one study, 171 patients with gastric and abdominal pain due to various causes were treated with injection of the formula that contained a 4:1 ratio of *Bai Shao* (Radix Paeoniae Alba) and *Gan*

Sháo Yào Gān Cǎo Tāng (Peony and Licorice Decoction)

Cao (Radix et Rhizoma Glycyrrhizae). The treatment was successful in 105 out of 120 patients with pain characterized by deficiency, and 26 out of 51 patients with pain characterized by excess.¹⁸

13. **Cholecystitis:** In one study, 36 patients with cholecystitis were treated with a large dose of *Shao Yao Gan Cao Tang* with good success. The formula contained 60-90g of *Bai Shao* (Radix Paeoniae Alba) and 15-30g of *Gan Cao* (Radix et Rhizoma Glycyrrhizae). *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), and *Long Dan* (Radix et Rhizoma Gentianae) were added for alternation of fever and chills. *Da Huang* (Radix et Rhizoma Rhei), *Di Huang* (Radix Rehmanniae) and *Xuan Shen* (Radix Scrophulariae) were added for constipation. *Chuan Lian Zi* (Fructus Toosendan), *Yu Jin* (Radix Curcumae), and *Yan Hu Suo* (Rhizoma Corydalis) were added for pain. *Tian Hua Fen* (Radix Trichosanthis) and *Mu Dan Pi* (Cortex Moutan) were added if there was a bitter taste in the mouth. *Mai Ya* (Fructus Hordei Germinatus) and *Shan Zha* (Fructus Crataegi) were added for poor appetite. *Huo Xiang* (Herba Agastaches), *Zhu Ru* (Caulis Bambusae in Taenia), and *Ban Xia* (Rhizoma Pinelliae) were added for nausea and vomiting. *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Qiao* (Fructus Aurantii) were added for abdominal fullness. *Wu Mei Wan* (Mume Pill) was added for the presence of parasites. *Yin Chen* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae) were added for jaundice. The treatment protocol was to cook the herbs in decoction, and administer the decoction one time daily for 5 days per course of treatment. Out of 36 patients, the study reported complete recovery in 26 patients, moderate improvement in 8 patients, and no change in 2 patients.¹⁹
14. **Urolithiasis:** One study reported moderate success in the treatment of urinary stones using *Shao Yao Gan Cao Tang* plus *Dong Kui Zi* (Semen Malvae), *Hua Shi* (Talcum), *Che Qian Zi* (Semen Plantaginis), and others as the base formula. Of the 30 patients, 19 had kidney stones, 1 had bladder stones, and 19 had stones in the ureter. The study reported complete recovery in 19 patients, effectiveness in 10 patients, and no effect in 1 patient.²⁰
15. **Diabetes mellitus:** In one clinical study, 36 patients with diabetes mellitus were treated with the formula with marked effect in 15 patients, moderate effect in 10 patients, and no effect in 11 patients. The study also noted that the effectiveness increased with prolonged duration of the treatment.²¹
16. **Hyperosteogeny:** One hundred and sixty patients of hyperosteogeny were treated with varying degrees of success using *Shao Yao Gan Cao Tang* with the addition of *Ji Xue Teng* (Caulis Spatholobi) and *Wei Ling Xian* (Radix et Rhizoma Clematidis).²²

17. **Menstrual pain:** Sixteen patients with severe menstrual pain were treated with complete recovery in 14 patients using *Shao Yao Gan Cao Tang* with addition of *Yan Hu Suo* (Rhizoma Corydalis) and *Xiang Fu* (Rhizoma Cyperi).²³

18. **Perimenopause with uterine leiomyomas:** One study investigated the treatment of uterine leiomyomas in 30 perimenopausal women using Chinese herbal medicines and synthetic analogs of gonadotropin-releasing hormone. The Chinese herbs used included *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill) and *Shao Yao Gan Cao Tang*. The drugs used included buserelin and nafarelin given via intranasal administration. The study reported a reduction in leiomyomas (less than 60%) along with decreases in the serum levels of luteinizing hormone, follicle-stimulating hormone, estradiol, and the tumor marker CA-125. Side effects noted included slight bone loss, hypermenorrhea, and/or dysmenorrhea. The study concluded that this combination of drugs and herbs could be beneficial for treatment of uterine leiomyomas in perimenopausal patients.²⁴

19. **Dysmenorrhea:** In one study, 17 patients with dysmenorrhea, including recurrent endometriotic and adenomyotic patients, obtained complete relief within three months when treated with the following cyclic therapy. The treatment protocol was to alternate giving *Dang Gui Shao Yao San* (Tangkuei and Peony Powder) and *Shao Yao Gan Cao Tang* within the menstrual cycle. Clinical improvements included relief of pain, biphasic changes in basal body temperature patterns, improved levels of estradiol, and successful pregnancy and delivery in one patient. The study concluded that cyclic therapy of these two herbal formulas can be a conservative antidysmenorrhea therapy for endometriotic and adenomyotic patients who desire pregnancy.²⁵

HERB-DRUG INTERACTION

- **Neuroleptic-induced hyperprolactinemia:** According to a preliminary report, 11 schizophrenic patients with neuroleptic-induced hyperprolactinemia were treated with good success using *Shao Yao Gan Cao Tang*. After 4 weeks of herbal treatment, the mean plasma prolactin level decreased significantly from 28.9 +/- 14.5 ng/mL at baseline to 22.0 +/- 15.2 ng/mL. The potassium levels did not change significantly, and there were no adverse reactions or exacerbation of psychosis.²⁶
- **Paclitaxel-induced myalgia/arthritis:** Administration of both L-glutamine and *Shao Yao Gan Cao Tang* showed effects to decrease paclitaxel-induced myalgia/arthritis.²⁷
- **Drug-induced menopause:** One study evaluated the therapeutic effects of certain herbal medicines on menopausal symptoms induced by gonadotropin-releasing hormone

Sháo Yào Gān Cǎo Tāng (Peony and Licorice Decoction)

agonist therapy in Japanese women with endometriosis, adenomyosis, or leiomyoma. According to this study, menopausal symptoms induced by gonadotropin-releasing hormone agonist therapy in 13 patients were successfully treated using *Shao Yao Gan Cao Tang, Dang Gui Shao Yao San* (Tangkuai and Peony Powder), *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), *Jia Wei Xiao Yao San* (Augmented Rambling Powder), *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi) or *Gui Zhi Tang* (Cinnamon Twig Decoction). Most importantly, there were no significant change in serum estradiol levels after treatment with these herbal medicines. The researchers concluded that these herbal medicines can be recommended for menopausal symptoms induced by gonadotropin-releasing hormone agonists without a negative effect on serum estradiol levels.²⁸

TOXICOLOGY

According to toxicology studies in mice, the use of the formula created less side effects than the use of the herbs individually.²⁹

气血两补剂

— Qi- and Blood-Tonifying Formulas

Bā Zhēn Tāng (Eight-Treasure Decoction)

八珍湯

八珍汤

Pinyin Name: *Ba Zhen Tang***Literal Name:** Eight-Treasure Decoction**Alternate Names:** *Pa Chen Tang* (Wan), *Ba Zhen Tang* (Wan), Eight Jewel Decoction (Pill), Eight Treasures Decoction (Pill), Tangkuei and Ginseng Eight Combination**Original Source:** *Zheng Ti Lei Yao* (Catalogued Essentials for Correcting the Body) by Bi Li-Zhai (Ji) in 1529**COMPOSITION**

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	3g [3g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>chao</i> (dry-fried)	3g [10g]
<i>Fu Ling</i> (Poria)	3g [8g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), <i>chao</i> (dry-fried)	1.5g [5g]
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>ban</i> (blended) with liquor	3g [15g]
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>ban</i> (blended) with liquor	3g [10g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	3g [8g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	3g [5g]

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 2 pieces of *Da Zao* (Fructus Jujubae) in 2 bowls of water until the liquid is reduced to 80%. Take the decoction before meals. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Tonifies qi and blood

CLINICAL MANIFESTATIONS

Qi and blood deficiencies: a pale or sallow facial appearance, weakness of the limbs, shortness of breath, lack of desire to speak, poor appetite, palpitations, dizziness, a pale tongue with a thin, white coating, and a thin, deficient pulse.

CLINICAL APPLICATIONS

Anemia, thrombopenic purpura, headache, Sheehan's disease, atrophic gastritis, itching, orbital optic neuritis,

peripheral neuritis, corneal ulcer, coronary artery disease, recovery from chronic illness, weakness during convalescence, post-surgical recovery, irregular menstruation, uterine bleeding, lumbago in women, prevention of miscarriage, and breech presentation.

EXPLANATION

Ba Zhen Tang (Eight-Treasure Decoction) was originally designed to treat qi and blood deficiencies caused by excessive bleeding. Today, however, this formula can be used in any condition involving qi and blood deficiencies, such as from chronic illnesses, or following the inappropriate use of clearing or draining herbs. A pale face and a sallow facial complexion are signs of blood deficiency. Weak limbs, shortness of breath, and low appetite are all due to qi deficiency. Palpitations and dizziness are signs of blood deficiency unable to nourish the *shen* (spirit). The tongue and pulse conditions described above indicate deficiencies of qi and blood.

Bā Zhēn Tāng (Eight-Treasure Decoction)

Ba Zhen Tang (Eight-Treasure Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Qi and blood deficiencies	<ul style="list-style-type: none"> Weak limbs, shortness of breath, and low appetite: qi deficiency Pale face, a sallow facial complexion, palpitations, and dizziness: blood deficiency Pale tongue with a thin, white coating, and a thin, deficient pulse: deficiency condition 	Tonifies qi and blood	<ul style="list-style-type: none"> <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>Fu Ling</i> (Poria) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi. <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) nourish the blood. <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize the middle <i>jiao</i> to strengthen the Spleen and Stomach.

Ba Zhen Tang (Eight-Treasure Decoction) combines *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Si Wu Tang* (Four-Substance Decoction). *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) nourish the blood. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the middle *jiao* to strengthen the Spleen and Stomach and to counteract the potentially stagnating effect of the tonics.

Please refer to *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Si Wu Tang* (Four-Substance Decoction) for detailed explanations of these two formulas.

MODIFICATIONS

- With weakness and pain of the lower back, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Du Zhong* (Cortex Eucommiae).
- For poor appetite, add *Shan Yao* (Rhizoma Dioscoreae), *Chen Pi* (Pericarpium Citri Reticulatae), and *Qian Shi* (Semen Euryales).
- For deficiencies of qi, blood, and yang, add *Huang Qi* (Radix Astragali) and *Rou Gui* (Cortex Cinnamomi).
- To regulate menstruation, add *Yi Mu Cao* (Herba Leonuri).
- For habitual miscarriage or to prevent miscarriage, add *Sha Ren* (Fructus Amomi) and *Zi Su Ye* (Folium Perillae).
- If there is abnormal uterine bleeding, add *E Jiao* (Colla Corii Asini) and *Ai Ye* (Folium Artemisiae Argyi).
- For constipation during pregnancy or vomiting and nausea, add *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).

CAUTIONS / CONTRAINDICATIONS

- Avoid physical exhaustion and exposure to cold environments. Refrain from excessive sexual activity. Cease eating foods that are pungent and spicy.¹
- *Ba Zhen Tang* is contraindicated in patients with heat or excess conditions.²

PHARMACOLOGICAL EFFECTS

1. **Hematopoietic:** In one experiment, it was determined that the administration of *Ba Zhen Tang* had a positive effect in treating mice with anemia due to profuse loss of blood. In comparison with the placebo group which did not receive any herbs, the mice that received the herbs for 10 days showed a significant increase of red blood cells. The study also noted that in normal subjects, use of *Ba Zhen Tang* caused only minor changes to the red blood cells and white blood cells.³
2. **Immunostimulant:** In one experiment, oral administration of *Ba Zhen Tang* daily for 7 days was associated with an increase in phagocytic activities by macrophages in mice.⁴
3. **Lymphatic:** In one laboratory experiment using mice, it was found that administration of *Ba Zhen Tang* was effective in countering the suppression of lymphocyte growth induced by hydrocortisone.⁵

CLINICAL STUDIES AND RESEARCH

1. **Anemia:** In a clinical study, 102 patients with anemia characterized by qi and blood deficiencies were treated with *Ba Zhen Tang* with recovery in 8 patients, marked improvement in 45 patients, moderate improvement in 42 patients, and no change in 7 patients. The overall effectiveness was 93.1%. The evaluation of effectiveness was based on both subjective and objective findings.⁶ According to another study, anemia due to bleeding ulcer was effectively treated using *Ba Zhen Tang* plus *Zi He Che*

Bā Zhēn Tāng (Eight-Treasure Decoction)

(Placenta Hominis), *E Jiao* (Colla Corii Asini), *Sha Ren* (Fructus Amomi), *Mu Xiang* (Radix Aucklandiae), and *Chen Pi* (Pericarpium Citri Reticulatae). Of 40 patients, the study reported complete recovery in 29 patients (72.5%), significant improvement in 10 patients (25%), and slight improvement in 1 patient (2.5%).⁷

2. **Thrombopenic purpura:** Modified *Ba Zhen Tang* was used to treat 42 patients (22 males and 20 females) with thrombopenic purpura. The causes of the illness included upper respiratory tract infection, enteritis, septicemia, and pyogenic otitis media. Out of 42 patients, the study reported recovery in 30 patients and improvement in 12 patients. Most patients responded within 5-6 days.⁸
3. **Post-surgical recovery:** In one study, 32 patients were divided into two groups for evaluation of post-surgical recovery. Group I received *Ba Zhen Tang*, and group II received standard antibiotic therapy. After treatment, the study reported the following findings: Patients in group I regained their appetite after approximately 24-28 hours, in comparison to the 48-52 hours for group II; and patients in group I felt normal 7-12 days after the surgery, in comparison to 8-25 days for patients in group II. In addition, all patients in group I had normal body temperature by day 5, but 3 patients in group II still had fever on the same date.⁹
4. **Prevention of miscarriage:** The effect of *Ba Zhen Tang* was evaluated for stabilization of pregnancy in 38 women (ages between 25-30 years) who had history of 2-5 miscarriages. The herbal formula included *Ba Zhen Tang* with addition of *Sha Ren* (Fructus Amomi) and *Zi Su Ye* (Folium Perillae). The study reported a 100% success rate in stabilizing the pregnancy to full term.¹⁰
5. **Breech presentation:** Modified *Ba Zhen Tang* was used to treat breech presentation in women who were more than 30 weeks pregnant. Modifications included addition of *Huang Qi* (Radix Astragali) and *Xu Duan* (Radix Dipsaci), and removal of *Fu Ling* (Poria). The herbs were given for 3-6 days. Out of 56 patients, the study reported corrected position in 45 patients (80.3% success rate).¹¹ In another study of 126 women with breech presentation, use of modified *Ba Zhen Tang* was associated with an 83.3% rate of effectiveness. The herbal formula given was modified by removing *Fu Ling* (Poria) and adding *Zhi Qiao* (Fructus Aurantii) and *Xu Duan* (Radix Dipsaci).¹²
6. **Sheehan's disease:** Satisfactory results were reported in 7 women who received modified *Ba Zhen Tang* for treatment of Sheehan's disease, a condition characterized by necrosis of the pituitary gland and hypopituitarism caused by postpartum hemorrhage. All 7 women were middle-aged, and had suffered profuse postpartum bleeding, hair loss in the axillary and genital areas, low libido, and general fatigue and weakness.¹³
7. **Headache:** One study evaluated *Ba Zhen Tang*'s effectiveness in treating headache in 88 patients (29 males and 59 females). The age of the patients ranged from 16 to 79 years of age. The clinical presentations included headache, dizziness, fatigue, palpitations, and shortness of breath. *Ba Zhen Tang* was used as the base formula, with minor modifications if deemed necessary. The average duration of treatment was 20 packs of herbs given in decoction. Out of 88 patients, the study reported marked effect in 33 patients, improvement in 49 patients, and no change in 6 patients. The overall rate of effectiveness was 93.2%.¹⁴
8. **Atrophic gastritis:** Patients with chronic atrophic gastritis were treated with modified *Ba Zhen Tang* with 98.15% effectiveness. Herbal formulas were modified according to the condition of the patients. *Chai Hu* (Radix Bupleuri) and *Zhi Qiao* (Fructus Aurantii) were added for qi stagnation of the Liver and Stomach. *Huang Qi* (Radix Astragali) was added for qi deficiency of the Spleen and Stomach. *Sha Shen* (Radix Glehniae seu Adenophorae) and *Shi Hu* (Caulis Dendrobii) were added for yin deficiency with heat of the Stomach. *Bai Hua She She Cao* (Herba Hedyotis) and *Tu Fu Ling* (Rhizoma Smilacis Glabrae) were added for damp-heat accumulation in the middle *jiao*. The treatment protocol was to administer the herbs in decoction one time daily, for 6 months per course of treatment.¹⁵
9. **Itching:** Use of modified *Ba Zhen Tang* was effective in treating geriatric patients with constant skin itching. The formula contained *Ba Zhen Tang* with removal of *Ren Shen* (Radix et Rhizoma Ginseng), and addition of *Huang Qi* (Radix Astragali), *Chan Tui* (Periostracum Cicadae), *She Chuang Zi* (Fructus Cnidii), *Di Fu Zi* (Fructus Kochiae), *Bai Xian Pi* (Cortex Dictamni), and others as deemed necessary. Modifications included addition of *Nu Zhen Zi* (Fructus Ligustri Lucidi) for red tongue; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for chronic illness; and *Che Qian Zi* (Semen Plantaginis) for thick tongue coating. Of 36 patients, the study reported complete recovery in 20 patients (55.56%), improvement in 14 patients (38.89%) and no change in 2 patients (5.56%). The overall rate of effectiveness was 94.45%.¹⁶
10. **Coronary artery disease:** Administration of *Ba Zhen Tang* was associated with 95.8% effectiveness in 48 patients with coronary artery disease. Treatment was considered effective if there was either improvement of subjective symptoms or stabilization of ECG.¹⁷
11. **Corneal ulcer:** Thirty-six geriatric patients with corneal ulcer were treated with 88.9% effectiveness using modified *Ba Zhen Tang* plus antibiotic drugs. The herbal treatment used *Ba Zhen Tang* as the base, and added *Qian Shi* (Semen Euryales) and *Yi Yi Ren* (Semen Coicis) for Spleen qi deficiency; *He Shou Wu* (Radix Polygoni Multiflori),

Bā Zhēn Tāng (Eight-Treasure Decoction)

Gou Qi Zi (Fructus Lycii), *Shan Zhu Yu* (Fructus Corni), and *Shu Di Huang* (Radix Rehmanniae Praeparata) for Liver and Kidney deficiencies; and *Yi Zhi* (Fructus Alpiniae Oxyphyllae), *Ba Ji Tian* (Radix Morindae Officinalis), *Yin Yang Huo* (Herba Epimedii), and *Xian Mao* (Rhizoma Curculiginis) for Kidney qi deficiency. Antibiotic drugs were given locally and systemically. Of 36 patients, the study reported marked improvement in 12 patients, improvement in 20 patients, and no change in 4 patients.¹⁸

12. Orbital optic neuritis: *Ba Zhen Tang* effectively treated 14 patients with orbital optic neuritis. The average duration of treatment was 25.3 days.¹⁹

13. Peripheral neuritis: Thirteen patients with peripheral neuritis were treated with modified *Ba Zhen Tang*. The clinical presentation included numbness and pain of the upper and/or lower extremities. The modifications included addition of *Du Huo* (Radix Angelicae Pubescentis) and *Qiang Huo* (Rhizoma et Radix Notopterygii) for neuritis in the upper extremities; *Mu Gua* (Fructus Chaenomelis) and *Niu Xi* (Radix Achyranthis Bidentatae) for neuritis in the lower extremities; and elimination of *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) if there was fullness in the abdominal area with indigestion. Out of 13 patients, the study reported complete recovery in 11 patients and improvement in 2 patients. The average duration of treatment was 24 packs of the raw herbs in decoction (ranges from 12-36).²⁰

14. Organophosphorus-induced peripheral neuritis: In one study, peripheral neuritis associated with acute organophosphorus poisoning was treated effectively using modified *Ba Zhen Tang*. The herbal treatment included *Ba Zhen Tang* plus *Gui Zhi* (Ramulus Cinnamomi) as the base formula. In addition, *Chi Shao* (Radix Paeoniae Rubra), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami) were added for numbness of the extremities with dark blue/purple tongue; *Sang Zhi* (Ramulus Mori) for a feeling of heaviness in the upper extremities; *Niu Xi* (Radix Achyranthis Bidentatae) for a feeling of heaviness in the lower extremities; *Cang Zhu* (Rhizoma Atractylodis), *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae), *Huang Bo* (Cortex Phellodendri Chinensis), *Fang Ji* (Radix Stephaniae Tetrandrae), and *Mu Gua* (Fructus Chaenomelis) for a feeling of heaviness in the body and extremities; *Huang Bo* (Cortex Phellodendri Chinensis) and *Zhi Zi* (Fructus Gardeniae) for fever, a feeling of burning sensation and pain, irritability, and a red tongue; and *Gui Ban* (Plastrum Testudinis), *Mai Dong* (Radix Ophiopogonis), and *Zhi Mu* (Rhizoma Anemarrhenae) for tidal fever and night sweats. Out of 22 patients, 5

patients had complete recovery in 1 month, 5 patients had complete recovery in 2 months, 8 patients in 3 months, and 4 patients after 3 months.²¹

TOXICOLOGY

In an acute toxicology study, oral administration of the formula in decoction at 50 g/kg as a single dose did not cause any significant side effect in rats. In a chronic toxicology study, daily administration of the formula in decoction at 20 g/kg for 8 days did not cause any adverse reaction to the body weight, liver, adrenal glands, heart, uterus, or testicles. There was, however, a slight increase in the weight of the spleen.²²

AUTHORS' COMMENTS

Ba Zhen Tang, *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), and *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi) are three formulas that tonify qi and blood. All three formulas tonify Spleen qi with *Ren Shen* (Radix et Rhizoma Ginseng), *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and nourish the blood with *Dang Gui* (Radix Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Bai Shao* (Radix Paeoniae Alba). Their differences are as follows:

- *Ba Zhen Tang* combines *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Si Wu Tang* (Four-Substance Decoction) with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae). It is a neutral-temperature tonic that treats qi and blood deficiencies. Clinical manifestations include a sallow complexion, poor appetite, fatigue, shortness of breath, dizziness, blurred vision, palpitations, a pale tongue, and a thin, deficient pulse.
- *Shi Quan Da Bu Tang* combines *Ba Zhen Tang* with *Huang Qi* (Radix Astragali) and *Rou Gui* (Cortex Cinnamomi). The addition of these two single herbs changes the property of the formula from neutral to warm, making it more suitable for deficiency and cold conditions. Chief manifestations include qi and blood deficiencies with cough, poor appetite, seminal emissions, knee weakness, slow healing sores, and uterine bleeding.
- *Ren Shen Yang Ying Tang* is *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) with the removal of *Chuan Xiong* (Rhizoma Chuanxiong), and the addition of *Chen Pi* (Pericarpium Citri Reticulatae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Yuan Zhi* (Radix Polygalae). *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Ren Shen* (Radix et Rhizoma Ginseng), and *Huang Qi* (Radix Astragali) consolidate the exterior and prevent sweating. *Yuan Zhi* (Radix Polygalae) calms the *shen* (spirit), and resolves phlegm to benefit the production of

Bā Zhēn Tāng (Eight-Treasure Decoction)

qi and blood. This formula is more suitable for patients with qi and blood deficiencies with an unstable *shen*. Clinical manifestations include shortness of breath upon exertion, palpitations, a dry throat and lips. This formula does not create heat nor stagnation, when compared to other warm or heavy tonic formulas.²³

According to Dr. Chang Wei-Yen, headaches with dizziness, palpitations, frequent dreams, and coldness of the limbs caused by blood deficiency can be treated effectively with *Ba Zhen Tang*, *Sheng Mai San* (Generate the Pulse Powder), and *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart).

Shí Quán Dà Bǔ Tāng (All-Inclusive Great Tonifying Decoction)

十全大補湯 十全大补汤

Pinyin Name: *Shi Quan Da Bu Tang*

Literal Name: All-Inclusive Great Tonifying Decoction

Alternate Names: *Shih Chuan Ta Pu Tang (Wan)*, *Shi Quan Da Bu Tang (Wan)*, Complete Nourishment Decoction (Pill), Ten Strong Tonic Herbs Decoction (Pill), Ginseng and Tangkuei Ten Combination

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	[8g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>bei</i> (stone-baked)	[10g]
<i>Fu Ling</i> (Poria), <i>bei</i> (stone-baked)	[8g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	[5g]
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>xi</i> (washed) with liquor, <i>zheng</i> (steamed) and <i>bei</i> (stone-baked)	[8-15g]
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>xi</i> (washed)	[10g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	[8g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	[5g]
<i>Huang Qi</i> (Radix Astragali)	[15g]
<i>Rou Gui</i> (Cortex Cinnamomi), do not expose to heat	[8g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the ingredients into a coarse powder. Cook 6g of the powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 2 pieces of *Da Zao* (Fructus Jujubae) in 1 large bowl of water until the liquid is reduced to 70%. Take the warm decoction at any time during the day. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Warms and tonifies qi and blood

CLINICAL MANIFESTATIONS

1. Deficiencies of qi and blood accompanied by yang deficiency and cold manifestations: lassitude, low appetite, a pale face, palpitations, insomnia, dizziness, intolerance to cold, and seminal emissions.
2. General deficiency of the body: deficient cough, poor appetite, a sallow appearance, weakness of the legs and knees, chronic ulcers or prolonged healing of wounds, and seminal emissions in men and *beng lou* (flooding and spotting) in women.

CLINICAL APPLICATIONS

Anemia, neutropenia, cancer, supportive therapy for chemotherapy and/or radiation, chronic atrophic gastritis, gastric prolapse, post-surgical recovery, Shwachman syndrome, Meniere's syndrome, and Sheehan's syndrome.

EXPLANATION

Shi Quan Da Bu Tang (All-Inclusive Great Tonifying Decoction) treats general deficiency and weakness of the body, conditions that may be caused by over-exertion, injuries, and chronic illnesses. The original text states that this formula has a wide range of effects and can be used to treat a variety of syndromes marked by qi and blood deficiencies.

This formula consists of *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Si Wu Tang* (Four-Substance Decoction), plus *Huang Qi* (Radix Astragali) and *Rou Gui* (Cortex Cinnamomi). *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) nourish the blood. *Huang Qi* (Radix Astragali) tonifies qi and lifts yang qi to improve the general body condition. This herb also helps to speed the healing of wounds. *Rou Gui* (Cortex Cinnamomi) warms yang and dispels cold.

Please refer to *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Si Wu Tang* (Four-Substance Decoction) for detailed explanation of these two formulas.

Shí Quán Dà Bǔ Tāng (All-Inclusive Great Tonifying Decoction)

Shi Quan Da Bu Tang (All-Inclusive Great Tonifying Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiencies of qi and blood accompanied by yang deficiency and cold manifestations	<ul style="list-style-type: none">• Lassitude and low appetite: qi deficiency• Pale face, palpitations, insomnia, and dizziness: blood deficiency• Intolerance to cold: yang deficiency	Warms and tonifies qi and blood	<ul style="list-style-type: none">• <i>Si Jun Zi Tang</i> (Four-Gentlemen Decoction) tonifies qi.• <i>Si Wu Tang</i> (Four-Substance Decoction) tonifies blood.• <i>Huang Qi</i> (Radix Astragali) tonifies qi and lifts yang.• <i>Rou Gui</i> (Cortex Cinnamomi) warms yang and dispels cold.

MODIFICATIONS

- For malnutrition, and emaciation with poor appetite: add *Shan Yao* (Rhizoma Dioscoreae) and *Qian Shi* (Semen Euryales).
- With sores and abscesses caused by qi and blood deficiencies, add *Zhi Qiao* (Fructus Aurantii), *Xiang Fu* (Rhizoma Cyperi), and *Lian Qiao* (Fructus Forsythiae).
- With spermatorrhea and nocturnal emissions, add *Shan Zhu Yu* (Fructus Corni), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Mai Dong* (Radix Ophiopogonis), and *Shan Yao* (Rhizoma Dioscoreae).
- If there is steaming bones sensation, add *Chai Hu* (Radix Bupleuri), *Yin Chai Hu* (Radix Stellariae), *Qing Hao* (Herba Artemisiae Annuae), and *Bie Jia* (Carapax Trionycis).
- With fatigue and general ache and pain, add *Gui Zhi* (Ramulus Cinnamomi) and *Ban Xia* (Rhizoma Pinelliae).
- With general weakness and deficiency, combine with *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction).
- With fatigue due to Spleen deficiency, combine with *Gui Pi Tang* (Restore the Spleen Decoction).
- With palpitations, fear, and fright, combine with *Yang Xin Tang* (Nourish the Heart Decoction).
- For menopause symptoms that do not respond to herbs that clear deficiency heat and nourish yin, add *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- For *bi zheng* (painful obstruction syndrome), add *Niu Xi* (Radix Achyranthis Bidentatae) and *Xu Duan* (Radix Dipsaci).

CAUTIONS / CONTRAINDICATIONS

Because *Shi Quan Da Bu Tang* is a warm formula, it is contraindicated in patients with heat or excess conditions.

PHARMACOLOGICAL EFFECTS

1. **Immunostimulant:** Administration of *Shi Quan Da Bu Tang* was associated with immune-enhancing effects because it increases the number and/or the activities of

the macrophages, B-lymphocytes, T-lymphocytes, and natural killer (NK) cells.¹

2. **Hematopoietic:** In one study, the administration of *Shi Quan Da Bu Tang* for up to 10 days effectively treated mice with anemia caused by profuse blood loss. The use of this formula was associated with an increase in hemoglobin and red blood cells.² In another study, *Si Wu Tang* (Four-Substance Decoction), *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Shi Quan Da Bu Tang* were given orally to mice to evaluate their effect for treatment of anemia. The study concluded that *Shi Quan Da Bu Tang* was most effective, followed by *Si Wu Tang* and *Si Jun Zi Tang*.³ The mechanism of action was attributed to increased activity of CSF.⁴

3. **Antineoplastic:** In one study in mice, the administration of *Shi Quan Da Bu Tang* was associated with an inhibitory effect on the growth of cancer cells. The mice that received the herbs survived longer in comparison with the control group. Also, it was noted that the use of herbs also minimized the side effects associated with chemotherapy treatments.⁵

4. **Antitumor and antimetastatic:** According to one *in vivo* study, use of *Shi Quan Da Bu Tang* was associated with marked antitumor and antimetastatic activities. Proposed mechanism of this action included enhancement of phagocytosis, cytokine induction, antibody production, and induction of the mitogenic activity of spleen cells. As a complement to western medical treatment, *Shi Quan Da Bu Tang* showed antitumor effects when combined with surgical excision, antitumor effects with or without other drugs, and protection against the deleterious effects of anticancer drugs as well as radiation-induced immunosuppression and bone marrow toxicity.⁶ Specifically, in liver metastasis, one study reported that administration of *Shi Quan Da Bu Tang* had a dose-dependent inhibition of liver tumor colonies and significant enhancement of survival rate, without side effects, as compared with the untreated control.⁷

Shí Quán Dà Bǔ Tāng (All-Inclusive Great Tonifying Decoction)

5. **Anticancer:** One study reported a promising preventative effect for endometrial cancers with use of *Shi Quan Da Bu Tang*. According to this study, this formula suppressed estradiol-17 beta (E2)-induced expression of c-fos/jun in uterine corpus and inhibited N-methyl-N-nitrosourea and E2-induced endometrial carcinogenesis in mice.⁸ According to another study, *Shi Quan Da Bu Tang* suppressed primary melanocytic tumors through potentiation of T-cell-mediated antitumor cytotoxic immunity *in vivo*.⁹
6. **Antitumor:** Administration of *Shi Quan Da Bu Tang* was associated with a preventive effect on endometrial carcinogenesis in mice. The antitumor effect of *Shi Quan Da Bu Tang* was attributed in part to the contents of *Si Wu Tang*, as the administration of these four herbs was found to have an inhibitory effect on estrogen-induced expression of c-fos, interleukin (IL)-1alpha and tumor necrosis factor (TNF)-alpha in uteri of ovariectomized mice.¹⁰
7. **Antiaging:** One study found this formula to have marked anti-aging effects to prolong life expectancy in mice.¹¹
8. **Effect on bone mass density:** Administration of *Shi Quan Da Bu Tang* for 19 weeks was effective in the prevention and treatment of osteoporosis in mice whose ovaries had been removed. In comparison with control groups (one receiving placebo and the other estradiol), *Shi Quan Da Bu Tang* was determined to be comparable in effect to estradiol, and significantly more effective than the placebo for prevention and treatment of osteoporosis.¹² This efficacy on prevention and treatment of osteoporosis was reproduced in another study that administered herbs for 49 days to rats with ovariectomy. In comparison with sham-operated rats, the bone mineral density (BMD) of tibia in ovariectomized rats decreased by 20%, but the BMD was unaffected in rats treated with *Shi Quan Da Bu Tang* or 17-beta-estradiol. The study concluded that *Shi Quan Da Bu Tang* is as effective as 17-beta-estradiol in preventing the development of bone loss induced by ovariectomy by preserving the fine particle surface of the bone.¹³
9. **Hepatoprotective:** Administration of *Shi Quan Da Bu Tang* was effective in treating N-nitrosomorpholine-induced hepatocarcinogenesis in male rats. The mechanism of action was attributed to the activation of the immune system.¹⁴
10. **Sinensis), *Shu Di Huang* (Radix Rehmanniae Praeparata), *Chuan Xiong* (Rhizoma Chuanxiong), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Sha Ren* (Fructus Amomi), *San Leng* (Rhizoma Sparganii), *Mo Yao* (Myrrha), *Wu Yao* (Radix Linderae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). In addition, *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added for qi deficiency of the Spleen and Stomach. *Zhi Qiao* (Fructus Aurantii) and *Chai Hu* (Radix Bupleuri) were added for qi stagnation of the Spleen and Stomach. *Sha Shen* (Radix Glehniae seu Adenophorae) and *Shi Hu* (Caulis Dendrobii) were added for yin-deficient heat in the Stomach. *Bai Hua She She Cao* (Herba Hedyotis) and *Tu Fu Ling* (Rhizoma Smilacis Glabrae) were added for damp-heat accumulation in the middle jiao. The treatment protocol was to administer the herbs in decoction twice daily in the morning and at night. The treatment period was 6 months for one course of treatment. The overall effectiveness rate was 98.15%.¹⁵**
2. **Gastric prolapse:** Concurrent treatment using acupuncture and herbs was found to be very effective in the treatment of gastric prolapse characterized by deficiencies of qi and blood with *zhong* (central) *qi* collapse. The treatment protocol for herbs was to administer *Shi Quan Da Bu Tang* for a total of 70 doses. Out of 15 patients, the study reported complete recovery in 4 patients, improvement in 10 patients, and no benefit in 1 patient.¹⁶
3. **Post-surgical recovery:** Administration of *Shi Quan Da Bu Tang* has marked beneficial effects on gastric cancer patients during the post-operative recovery by improving interleukin 2 reactivity, natural killer activity, nutritional index, and bone mineral indices.¹⁷
4. **Cancer:** According to one report that screened and evaluated 116 herbal formulas for treatment of cancer, *Shi Quan Da Bu Tang* was determined to be the most effective as a potent biological response modifier. Clinical benefits of *Shi Quan Da Bu Tang* included extremely low toxicity, self-regulatory and synergistic actions of its components in immunomodulatory and immunopotentiating effects, enhanced therapeutic activity in chemotherapy and radiotherapy, inhibited recurrence of malignancies, prolonged survival, and reduced adverse toxicities of many anticancer drugs.¹⁸
5. **Anemia:** Administration of *Shi Quan Da Bu Tang* effectively increased hemoglobin, red blood cells, and platelets in 41 patients with post-surgical proteinemia.¹⁹
6. **Meniere's syndrome:** In one study, 27 patients with Meniere's syndrome were treated with modified *Shi Quan Da Bu Tang* with good results. The formula included *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Shu Di Huang* (Radix Rehmanniae Praeparata), *Huang Qi* (Radix Astragali), *Bai*

CLINICAL STUDIES AND RESEARCH

1. **Chronic atrophic gastritis:** Modified *Shi Quan Da Bu Tang* was used to treat 54 patients of chronic atrophic gastritis with good success. The formula included *Tai Zi Shen* (Radix Pseudostellariae), *Fu Ling* (Poria), *Bai Shao* (Radix Paeoniae Alba), *Dang Gui* (Radix Angelicae

Shí Quán Dà Bǔ Tāng (All-Inclusive Great Tonifying Decoction)

Shao (Radix Paeoniae Alba), *Dang Gui* (Radix Angelicae Sinensis), *Tian Ma* (Rhizoma Gastrodiae), *Ban Xia* (Rhizoma Pinelliae), *Chuan Xiong* (Rhizoma Chuanxiong), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and *Rou Gui* (Cortex Cinnamomi). The treatment protocol was to administer the herbs in decoction one time daily, for a total of 6-24 doses. Out of 27 patients, the study reported recovery in 23 patients (asymptomatic with no recurrences for 6 months), marked effect in 3 patients, and no benefit in 1 patient.²⁰

7. **Sheehan's syndrome:** Continuous administration of modified *Shi Quan Da Bu Tang* for 2 months was effective in alleviating signs and symptoms in 7 patients with Sheehan's syndrome. The herbal treatment was based on *Shi Quan Da Bu Tang*, with addition of *Yi Mu Cao* (Herba Leonuri), *Yin Yang Huo* (Herba Epimedii) and *Zi He Che* (Placenta Hominis) and the removal of *Huang Qi* (Radix Astragali).²¹
8. **Shwachman syndrome:** Use of *Shi Quan Da Bu Tang* was associated with beneficial effects in patients with Shwachman syndrome, a rare disease characterized by decreased ability to digest food because the cells of the pancreas do not work properly.²²

HERB-DRUG INTERACTION

- **Chemotherapy- and radiation-induced toxicities:** *Shi Quan Da Bu Tang* was shown in one study to have a marked protective effect against chemotherapy and radiation in cancer patients, including but not limited to such drugs as mitomycin, cisplatin, carboplatin, cyclophosphamide, and 5-fluorouracil.²³ Moreover, many journals reported that *Shi Quan Da Bu Tang* demonstrated effectiveness as a supportive therapy for cancer patients treated with chemotherapy and/or radiation. In one study, 50 patients with cancer (stomach, large intestine and breast) who were treated with chemotherapeutic agents (FT-207, 5-FU, UFT, MMC, CDDP, and ADM) and this herbal formula for one month showed good tolerance for the treatments. In another report, 30 women with malignant cancer of the uterus and ovaries were treated with the herbal formula with marked improvement such as more energy, better appetite, and warmer extremities. Use of the formula has also shown effect to reverse bone marrow suppression induced by such drugs as MMC, Ara-C, and MTX. In one study with 26 patients, the use of the herbal formula inhibited the reduction of white blood cells and red blood cells associated with the drugs. It was noted in another study that the use of the herbal formula had a protective effect for white blood cells, red blood cells, and platelets against radiation treatment in 15 cancer patients. Lastly, administration of *Shi Quan Da Bu Tang* starting one week before chemotherapy was associated with 88% effectiveness in alleviating nausea and vomiting

associated with EAP treatment (adriamycin, cisplatin and etoposide) for stomach and pancreatic cancer.²⁴

- **Chemotherapy-induced toxicities:** One study reported significant benefits using *Shi Quan Da Bu Tang* in cancer patients treated with chemotherapeutic agents. *Shi Quan Da Bu Tang* potentiates the therapeutic effect of many anticancer drugs, such as mitomycin, cisplatin, cyclophosphamide and fluorouracil. It also counteracts adverse side effects of these anticancer drugs, such as gastrointestinal disturbances such as anorexia, nausea, vomiting, hepatotoxicity, immunosuppression, leukopenia, thrombocytopenia, anemia, and nephropathy.²⁵
- **Chemotherapy- and radiation-induced neutropenia:** One study reported 84.32% effectiveness using *Shi Quan Da Bu Tang* to treat decreased white blood cell count induced by chemotherapy and/or radiation in 134 patients (39 with stomach cancer, 28 with lung cancer, 17 with breast cancer, 13 with rectal cancer, 12 with lymphatic cancer, 12 with liver cancer, 7 with bladder cancer, and others).²⁶
- **Cyclophosphamide- or prednisolone-induced immunosuppression:** One study demonstrated that use of *Shi Quan Da Bu Tang* and *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi) effectively prolonged survival rate and life span in mice with candida infection associated with immunosuppression induced by cyclophosphamide or prednisolone.²⁷
- **Carboplatin- or cisplatin-induced myelosuppression:** One study reported that administration of *Shi Quan Da Bu Tang* was effective in mice to prevent myelosuppression induced by nine-times intraperitoneal administration of 15 mg/kg carboplatin or 3.0 mg/kg cisplatin, without affecting the antitumor activities of these agents.²⁸
- **Cisplatin-induced toxicities:** According to another study, daily administration of *Shi Quan Da Bu Tang* in mice was effective to protect against nephrotoxicity, immunosuppression, hepatic toxicity, and gastrointestinal toxicity caused by intraperitoneal administration of 3.0 mg/kg cisplatin nine times (on days 3, 4, 5, 6, 7, 8, 10, 11, and 12). Furthermore, the antitumor effect of cisplatin was not reduced.²⁹
- **Cis-diamminedichloroplatinum-induced nephrotoxicity and bone marrow toxicity:** Administration of *Shi Quan Da Bu Tang* was effective in treating nephrotoxicity and bone marrow toxicity caused by intraperitoneal administration of cis-diamminedichloroplatinum (CDDP), a chemotherapeutic agent. Furthermore, use of the herbs did not affect the antitumor activity of CDDP. This beneficial effect is attributed in part to *Dang Gui* (Radix Angelicae Sinensis) and its constituent sodium L-malate.³⁰
- **Interferon-induced toxicities:** One study reported a synergistic effect to potentiate the antitumor effect and

Shí Quán Dà Bǔ Tāng (All-Inclusive Great Tonifying Decoction)

decrease the toxicity using interferon-alpha and *Shi Quan Da Bu Tang* for treatment of lung metastasis of murine renal cell carcinoma. Interferon-alpha has been shown to significantly inhibit the metastasis of cancer cells, but is also associated with marked loss of body weight. This study demonstrated that the combination treatment of suboptimal doses of interferon-alpha and *Shi Quan Da Bu Tang* has marked effects to augment the antimetastatic effect without causing any loss of body weight, as compared to either treatment alone.³¹

- **Rifampin-induced neutropenia:** Administration of modified *Shi Quan Da Bu Tang* in 11 patients was effective in reversing neutropenia induced by rifampin within 7 days. The white blood cell count was below 3,000 cells/mcl in 4 patients, and between 3,000-4,000 cells/mcl in 7 patients.³²
- **Levofloxacin:** In a study of 8 healthy volunteers in an open, random crossover fashion, co-administrations of levofloxacin and *Shi Quan Da Bu Tang* did not cause any significant differences in any pharmacokinetic parameters, urinary recovery and renal clearance of levofloxacin. The study concluded that *Shi Quan Da Bu Tang* does not have a significant effect on the rate and extent of bioavailability or renal excretion of levofloxacin.³³

TOXICOLOGY

In a toxicology study, the LD₅₀ for the oral administration of the formula in herbal extract was 15 g/kg in mice. The herbal extract was prepared by cooking 1.5g of *Gan Cao* (*Radix et Rhizoma Glycyrrhizae*) and 3.0g of the other 9 herbs in 285 mL of water for 1 hour to yield 2.3g of herbal extract. The study concluded that the formula has very little toxicity.³⁴

Da Zao (*Fructus Jujubae*)

Da Bu Tang (Great Tonifying Decoction) tonifies qi, blood, yin, and yang. It is formulated using the general principles of *Si Jun Zi Tang* (Four-Gentlemen Decoction) to tonify qi, and *Si Wu Tang* (Four-Substance Decoction) to tonify blood. In addition, it contains the following herbs: *Gui Xin* (*Cortex Rarus Cinnamomi*) to warm yang, *Huang Qi* (*Radix Astragali*) to tonify qi, *Shan Yao* (*Rhizoma Dioscoreae*) to nourish yin, and *Wu Wei Zi* (*Fructus Schisandrae Chinensis*) to consolidate body fluids. *Sheng Jiang* (*Rhizoma Zingiberis Recens*) and *Da Zao* (*Fructus Jujubae*) strengthen the middle *jiao* and enhance the absorption of the tonic herbs. Clinically, this formula is used to treat generalized weakness and deficiency characterized by depletion of qi, blood, yin, and yang.

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	30g [6g]
<i>Huang Qi</i> (Radix Astragali)	30g [12g]
<i>Bai Zhu</i> (Rhizoma <i>Atractylodis Macrocephalae</i>), <i>wei</i> (roasted)	30g [6g]
<i>Shu Di Huang</i> (Radix <i>Rehmanniae Praeparata</i>), <i>zhi</i> (prepared)	22.5g [9g]
<i>Dang Gui</i> (Radix <i>Angelicae Sinensis</i>)	30g [9g]
<i>Bai Shao</i> (Radix <i>Paeoniae Alba</i>)	90g [18g]
<i>Wu Wei Zi</i> (Fructus <i>Schisandrae Chinensis</i>)	22.5g [4g]
<i>Fu Ling</i> (<i>Poria</i>)	22.5g [4g]
<i>Yuan Zhi</i> (Radix <i>Polygalae</i>), <i>chao</i> (dry-fried)	15g [6g]
<i>Chen Pi</i> (Pericarpium <i>Citri Reticulatae</i>)	30g [6g]
<i>Gui Xin</i> (Cortex <i>Rasus Cinnamomi</i>)	30g [3g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma <i>Glycyrrhizae Praeparata cum Melle</i>)	30g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder. Cook 12g of the powder with 3 slices of *Sheng Jiang* (Rhizoma *Zingiberis Recens*) and 2 pieces of *Da Zao* (Fructus *Jujubae*) in 1.5 bowls of water until the liquid is reduced to 70%. Take the strained decoction while warm. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies both qi and blood
2. Nourishes the Heart and calms the *shen* (spirit)

CLINICAL MANIFESTATIONS

Exhaustion of the body due to consumptive diseases: lassitude, weakness, a sallow complexion, shortness of

Rén Shēn Yǎng Yíng Tāng

(Ginseng Decoction to Nourish the Nutritive Qi)

breath, dyspnea upon mild exertion, dizziness, palpitations, tendency to being easily frightened, insomnia, and a dry throat and lips.

CLINICAL APPLICATIONS

Anemia, chronic fatigue syndrome, emaciation, insomnia, connective tissue diseases, Raynaud’s disease, micturition syncope, nephritis, male infertility, irregular menstruation, uterine bleeding, hepatitis C, cancer, and lung carcinoma.

EXPLANATION

Ren Shen Yang Ying Tang (Ginseng Decoction to Nourish the Nutritive Qi) treats qi and blood deficiencies accompanied by Heart instability. This syndrome usually follows exhaustion of the body from chronic consumptive diseases, in which both the qi and the blood are depleted. Qi deficiency may lead to lassitude, weakness, and shortness of breath. Blood deficiency leading to lack of nourishment to the Heart may cause dizziness, palpitations, and insomnia. Depletion of blood may lead to yin or blood deficiency, which causes the dry throat and lips.

Ren Shen (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) tonify qi. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Gui* (Radix Angelicae Sinensis), and *Bai Shao* (Radix Paeoniae Alba) tonify the blood. *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Fu Ling* (Poria), and *Yuan Zhi* (Radix Polygalae) nourish the Heart and calm the *shen* (spirit). *Chen Pi* (Pericarpium Citri Reticulatae)

regulates qi flow and counteracts the stagnating properties of the tonic herbs. *Gui Xin* (Cortex Rasmus Cinnamomi) tonifies yang and helps the regeneration of qi and blood. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi and harmonizes the herbs. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) regulate the middle *jiao* and tonify qi and blood.

MODIFICATIONS

- With poor appetite, add *Cang Zhu* (Rhizoma Atractylodis) and *Hou Po* (Cortex Magnoliae Officinalis).
- With cough due to Lung deficiency, add *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With a dry mouth and tongue, add *Mai Dong* (Radix Ophiopogonis) or *Tian Hua Fen* (Radix Trichosanthis).
- If there is spermatorrhea or nocturnal emissions, add *Long Gu* (Os Draconis) or *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence).
- With palpitations, fear, and fright, combine with *Yang Xin Tang* (Nourish the Heart Decoction).
- With fatigue due to Spleen deficiency, combine with *Gui Pi Tang* (Restore the Spleen Decoction).

PHARMACOLOGICAL EFFECTS

1. **Immunostimulant:** Administration of *Ren Shen Yang Ying Tang* in healthy male volunteers was associated with an increase in natural killer (NK) cells of up to 11% compared to the control group that did not receive any herbs.¹ In

Ren Shen Yang Ying Tang (Ginseng Decoction to Nourish the Nutritive Qi)

Rén Shēn Yǎng Yíng Tāng

(Ginseng Decoction to Nourish the Nutritive Qi)

another study, administration of this formula at 15g/day for one week to healthy people was associated with an increase of NK cells activity. This study suggested that *Ren Shen Yang Ying Tang* may be useful in the prevention of carcinogenesis.² It also significantly (P less than 0.01) augmented the production of granulocyte-macrophage colony-stimulating factor (GM-CSF).³

2. **Antihyperlipidemic:** Administration of *Ren Shen Yang Ying Tang* was associated with a reduction of plasma triglyceride levels.⁴

CLINICAL STUDIES AND RESEARCH

1. **Anemia:** In one study, 30 anemic patients (between age 30-55) were treated with iron supplements and *Ren Shen Yang Ying Tang* with satisfactory results.⁵
2. **Chronic fatigue syndrome:** *Ren Shen Yang Ying Tang* was used to treat 35 patients with chronic fatigue syndrome for over 6 months. The patients were treated for a total of 1-9 months. Out of 35 patients, the study reported improvement in 26 patients. No side effect or abnormal reactions were reported in the liver and kidneys.⁶
3. **Connective tissue diseases:** *Ren Shen Yang Ying Tang* was used to treat Raynaud's disease, scleroderma, mixed connective tissue disease (MCTD), and systemic lupus erythematosus (SLE). The treatment protocol was to administer 9g of the formula in extract daily for 4 weeks per course of treatment.⁷
4. **Raynaud's disease:** An extract of *Ren Shen Yang Ying Tang* successfully treated 39 patients with Raynaud's disease. Resolution of overall symptoms and increased temperature was reported in 16 patients, and alleviation of dryness in 2 patients. Five patients, however, experienced side effects, such as decreased appetite and abdominal pain.⁸
5. **Micturition syncope:** Administration of *Ren Shen Yang Ying Tang* was effective in treating micturition syncope. Of 25 patients, the study reported complete recovery in 20 patients, marked improvement in 3 patients, improvement in 1 patient, and no change in 1 patient.⁹
6. **Nephritis:** One study reported 74% effectiveness (71 out of 94 patients) in using *Ren Shen Yang Ying Tang* to treat nephritis. Improvements included the gradual resolution of symptoms such as edema, thirst, fever, and dysuria.¹⁰
7. **Male infertility:** Concurrent use of *Ren Shen Yang Ying Tang* and *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill) for 3 months effectively treated male infertility in 19 patients by increasing sperm count, concentration, and motility.¹¹
8. **Hepatitis C:** One study reported *Ren Shen Yang Ying Tang* to be very effective in treating chronic hepatitis C. The mechanism of this effect was attributed to an inhibitory effect on hepatitis C virus infection, and also from the

protective effect on immunological hepatopathy. *Wu Wei Zi* (*Fructus Schisandrae Chinensis*) contains gomisin A, which is believed to be the most active herbal component of this formula for this indication.¹²

9. **Cancer:** In one study, 35 patients with cancer of the genitourinary tract were treated with integrative medicine. Following surgery and/or chemotherapy, all patients were given a liquid extract of *Ren Shen Yang Ying Tang* for 4-12 weeks. The study reported that the herbs enhanced recovery and minimized the side effects of standard surgery and/or chemotherapy treatments.¹³
10. **Lung carcinoma:** Administration of *Ren Shen Yang Ying Tang* had a positive effect on life expectancy for patients with lung carcinoma. It decreased tumor marker levels (CEA and CA19-9), relieved cough, and improved appetite. The treatment protocol was to administer 15g of extract per day for 7 weeks.¹⁴

HERB-DRUG INTERACTION

- **Cyclophosphamide- or 5-fluorouracil-induced leukopenia:** One study compared the effect of *Ren Shen Yang Ying Tang* and recombinant human granulocyte-colony stimulating factor (rhuG-CSF) on leukopenia induced by cyclophosphamide (CY) or 5-fluorouracil (5-FU). Leukopenia was induced by subcutaneous injection of 200 mg/kg of CY or 5-FU, and severe reduction of leukocyte numbers in the peripheral blood was observed. Treatment protocol was daily administration of *Ren Shen Yang Ying Tang* (1 g/kg/day) and rhuG-CSF (2 mcg/mouse/day). The study reported that administration of *Ren Shen Yang Ying Tang* and rhuG-CSF decreased the number of colony-forming units in the spleen (CFU-S) in drug-treated mice. *Ren Shen Yang Ying Tang* was more effective for improving host resistance against 5-FU, and rhuG-CSF was more effective against CY.¹⁵
- **Cyclophosphamide- or prednisolone-induced immunosuppression:** One study demonstrated that *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) and *Ren Shen Yang Ying Tang* effectively prolonged survival rate and life span in mice with candida infection associated with immunosuppression induced by cyclophosphamide or prednisolone.¹⁶
- **Scopolamine:** One study reported that *Ren Shen Yang Ying Tang* was associated with improvement in scopolamine-induced impairment of passive avoidance response in mice by enhancing the cholinergic system.¹⁷

AUTHORS' COMMENTS

Ren Shen Yang Ying Tang is one of the preferred tonic formulas for deficient patients, since its thermal nature is neutral and will not create heat nor cold in patients when

Rén Shēn Yǎng Yíng Tāng

(Ginseng Decoction to Nourish the Nutritive Qi)

taken over a long period of time. Also, it does not cause stagnation like many heavy tonics.

Ren Shen Yang Ying Tang, *Sheng Mai San* (Generate the Pulse Powder), and *Yu Ping Feng San* (Jade Windscreen Powder) can be used together to enhance the immune system of individuals who catch colds frequently.

Tài Shān Pán Shí Sǎn (Powder that Gives the Stability of Mount Tai)

泰山磐石散

Pinyin Name: *Tai Shan Pan Shi San*

Literat Name: Powder that Gives the Stability of Mount Tai

Original Source: *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	3g [5g]
<i>Huang Qi</i> (Radix Astragali)	3g [15g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	6g [10g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	1.5g [4g]
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	2.4g [10g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	3g [8g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	2.4g [6g]
<i>Xu Duan</i> (Radix Dipsaci)	3g [5g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	2.4g [4g]
<i>Huang Qin</i> (Radix Scutellariae)	3g [5g]
<i>Sha Ren</i> (Fructus Amomi)	1.5g [4g]
<i>Nuo Mi</i> (Oryza Glutinosa)	a pinch [5g]

Tài Shān Pán Shí Sǎn (Powder that Gives the Stability of Mount Tai)

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends to cook the ingredients in 1.5 bowls of water and reduce the liquid to 70%. Take the decoction between meals. During the first trimester of pregnancy, administer only one dose every 3 to 5 days. From the fourth months of pregnancy onward, this formula may be used safely without concerns. Today, the decoction may be prepared using the doses suggested in brackets. Take the decoction on an empty stomach in three equally-divided doses in the morning, afternoon, and at night.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and strengthens the Spleen
2. Nourishes the blood and stabilizes the fetus

CLINICAL MANIFESTATIONS

Qi and blood deficiencies during pregnancy: restless fetus, history of miscarriage or threatened miscarriage, a pale face, lassitude, general weakness, lack of appetite, a pale tongue with a thin, white tongue coating, and a slippery, forceless or deep, weak pulse.

CLINICAL APPLICATIONS

Pernicious vomiting, unstable pregnancy, painful menstruation, amenorrhea.

EXPLANATION

Tai Shan Pan Shi San (Powder that Gives the Stability of Mount Tai) treats instability of the fetus during pregnancy due to qi and blood deficiencies. A pale face, lassitude, general weakness, and lack of appetite are common signs

of qi and blood deficiencies. A slippery, forceless pulse indicates pregnancy and underlying deficiency, and a deep, weak pulse indicates serious deficiency of qi and blood.

Ren Shen (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi and strengthen the Spleen. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Xu Duan* (Radix Dipsaci) nourish the blood and tonify the Liver and Kidney. *Chuan Xiong* (Rhizoma Chuanxiong) regulates qi and blood circulation. *Huang Qin* (Radix Scutellariae) is combined with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to clear heat, strengthen the Spleen, and stabilize the fetus. *Sha Ren* (Fructus Amomi) regulates qi, harmonizes the middle jiao, and stabilizes the fetus. *Nuo Mi* (Oryza Glutinosa) nourishes the Spleen and Stomach to ensure a healthy digestive system.

Tai Shan Pan Shi San is a modified version of *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction). *Rou Gui* (Cortex Cinnamomi) is removed because its warm property may disturb the fetus, and *Fu Ling* (Poria) is taken out because its downward draining effect is undesirable during pregnancy. *Xu Duan* (Radix Dipsaci), *Huang Qin* (Radix Scutellariae), *Sha Ren* (Fructus Amomi), and *Nuo Mi* (Oryza Glutinosa) are added as they all can stabilize the fetus.

Tai Shan Pan Shi San (Powder that Gives the Stability of Mount Tai)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Qi and blood deficiencies during pregnancy	<ul style="list-style-type: none">• Restless fetus: unstable pregnancy• Pale face, lassitude, general weakness, and lack of appetite: qi and blood deficiency• Pale tongue with a thin white tongue coating, and a slippery, forceless or deep, weak pulse: deficiency condition	<ul style="list-style-type: none">• Tonifies qi and strengthens the Spleen• Nourishes the blood and stabilizes the fetus	<ul style="list-style-type: none">• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Huang Qi</i> (Radix Astragali), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi and strengthen the Spleen.• <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Xu Duan</i> (Radix Dipsaci) nourish the blood and tonify the Liver and Kidney.• <i>Chuan Xiong</i> (Rhizoma Chuanxiong) regulates qi and blood circulation.• <i>Huang Qin</i> (Radix Scutellariae), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Sha Ren</i> (Fructus Amomi) stabilize the fetus.• <i>Nuo Mi</i> (Oryza Glutinosa) nourishes the Spleen and Stomach.

Tai Shān Pán Shí Sǎn (Powder that Gives the Stability of Mount Tai)

MODIFICATIONS

- With severe vomiting, add *Zhu Ru* (Caulis Bambusae in Taenia), *Pi Pa Ye* (Folium Eriobotryae), *Ban Xia* (Rhizoma Pinelliae), and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- With vomiting of yellow or green fluids, add *Huang Lian* (Rhizoma Coptidis).
- With depletion of body fluids, add *Xuan Shen* (Radix Scrophulariae) and *Mai Dong* (Radix Ophiopogonis).
- With unstable pregnancy, add *Du Zhong* (Cortex Eucommiae) and *E Jiao* (Colla Corii Asini).
- With more heat, increase the dose of *Huang Qin* (Radix Scutellariae) and decrease the dose of *Sha Ren* (Fructus Amomi).
- With Stomach deficiency, increase the dose of *Sha Ren* (Fructus Amomi) and decrease the dose of *Huang Qin* (Radix Scutellariae).
- With palpitations and insomnia, add *Suan Zao Ren* (Semen Ziziphi Spinosa), *Long Yan Rou* (Arillus Longan), and *Shou Wu Teng* (Caulis Polygoni Multiflori).
- With soreness and pain of the lower back, add *Du Zhong* (Cortex Eucommiae) and *Tu Si Zi* (Semen Cuscutae).
- When there are warning signs of miscarriage, such as vaginal bleeding and downward movement of the fetus, add *E Jiao* (Colla Corii Asini) and *Ai Ye* (Folium Artemisiae Argyi).

CAUTIONS / CONTRAINDICATIONS

While *Tai Shan Pan Shi San* is formulated specifically for pregnant women, it is not without risks. Herbs should be used for pregnant women only when the benefits outweigh the risks.

CLINICAL STUDIES AND RESEARCH

1. **Pernicious vomiting:** Modified *Tai Shan Pan Shi San* successfully treated vomiting during pregnancy. The formula included 7.5g each of *Dang Shen* (Radix Codonopsis), *Huang Qin* (Radix Scutellariae), *Bai Shao* (Radix Paeoniae Alba), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle); 15g of *Huang Qi* (Radix Astragali); 10g each of *Dang Gui* (Radix Angelicae Sinensis), *Xu Duan* (Radix Dipsaci), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae); 5g each of *Chuan Xiong* (Rhizoma Chuanxiong), *Sha Ren* (Fructus Amomi), and *Geng Mi* (Semen Oryzae), and 20g of *Shu Di Huang* (Radix Rehmanniae Praeparata). *Zhu Ru* (Caulis Bambusae in Taenia), *Pi Pa Ye* (Folium Eriobotryae), *Ban Xia* (Rhizoma Pinelliae), and *Sheng Jiang* (Rhizoma Zingiberis Recens) were added for severe vomiting. *Huang Lian* (Rhizoma Coptidis) was added for vomiting of yellow or green fluids. *Xuan Shen* (Radix Scrophulariae) and *Mai Dong* (Radix Ophiopogonis) were added for depletion of body fluids. *Du Zhong* (Cortex Eucommiae) and *E Jiao*

(Colla Corii Asini) were added for unstable pregnancy. *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali) were added for qi deficiency. The formulas were given as warm decoctions. Out of 88 patients, the study reported cessation of vomiting in 85 patients. Most patients responded within 1-6 doses of herbs.¹

2. **Prevention of miscarriage:** Two studies have reported beneficial effects using *Tai Shan Pan Shi San* to prevent miscarriage in women with unstable pregnancy characterized by fatigue, poor appetite, abnormal bleeding, and other signs and symptoms of qi and blood deficiency.^{2,3}

AUTHORS' COMMENTS

Today, *Tai Shan Pan Shi San* is used widely during pregnancy to prevent miscarriages. The standard protocol is to begin herbal therapy two months after conception. Take one dose of herbs in decoction form per week, for 2-3 months, for optimal effect.

Tai Shan Pan Shi San and *Ba Zhen Tang* (Eight-Treasure Decoction) both tonify qi and blood, but have the following differences:

- *Tai Shan Pan Shi San* is a qi and blood tonic that calms the fetus to treat unstable pregnancy and prevent habitual miscarriage due to deficiency.
- *Ba Zhen Tang* is a neutral-temperature tonic. It is mostly used for convalescing patients with qi and blood deficiencies, or those with sudden, profuse blood loss manifesting in dizziness, palpitations, shortness of breath, and lack of desire to speak.⁴

Tai Shan Pan Shi San and *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) both use *Si Wu Tang* (Four-Substance Decoction) as the foundation to tonify the blood. They have the following differences:

- *Tai Shan Pan Shi San* is a qi and blood tonic that stabilizes the fetus; it contains *Xu Duan* (Radix Dipsaci), *Huang Qin* (Radix Scutellariae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Sha Ren* (Fructus Amomi). Clinical manifestations include qi and blood deficiencies with restless fetus or threatened miscarriage, a pale complexion, fatigue, poor appetite, a pale tongue, and a slippery, forceless or deep, weak pulse.
- *Shi Quan Da Bu Tang* is a warm tonic that replenishes qi and blood. Chief manifestations include chronic cough, poor appetite, weakness of the knees and back, non-healing ulcers, and chronic uterine bleeding, all due to qi and blood deficiencies.⁵

<i>Jing Jie</i> (Herba Schizonepetae), <i>chao</i> (dry-fried) till black	2.4g
<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	1.5g
<i>Tu Si Zi</i> (Semen Cuscutae), <i>chao</i> (dry-fried) with liquor	4.2g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in water to make a decoction. To preserve pregnancy, take the decoction while warm 3-5 times per month. To facilitate delivery, take the decoction while hot to induce labor.

CHINESE THERAPEUTIC ACTIONS

1. Benefits qi and nourishes the blood
2. Calms the fetus and stabilizes pregnancy
3. Induces labor before delivery

CLINICAL MANIFESTATIONS

Qi and blood deficiencies during pregnancy: nausea, vomiting, morning sickness, general weakness, soreness and pain of the lower back, abdominal pain, and general weakness. This formula can also be used to stabilize

pregnancy in women with a prior history of miscarriage. It also facilitates labor and minimizes complications if taken immediately before delivery.

CLINICAL APPLICATIONS

Maintenance therapy during pregnancy, prevention of miscarriage, stabilization of pregnancy, and prevention of difficult labor.

EXPLANATION

Bao Chan Wu You Fang (Preserve Pregnancy and Care-Free Decoction) is designed specifically for women during pregnancy, with clinical applications such as stabilization of pregnancy, maintenance therapy during pregnancy, prevention of miscarriage, and facilitation of labor. Miscarriages or unstable pregnancies are generally caused

Diagnosis	Signs and Symptoms	Treatment	Herbs
Qi and blood deficiencies during pregnancy	Nausea, vomiting, general weakness, soreness and pain of the lower back, abdominal pain, and general weakness: qi and blood deficiencies	<ul style="list-style-type: none">• Benefits qi and nourishes the blood• Calms the fetus and stabilizes pregnancy	<ul style="list-style-type: none">• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Radix Ligustici) and <i>Bai Shao</i> (Radix Paeoniae Lactiflorae) nourish the blood.• <i>Hou Po</i> (Cortex Magnoliae Officinalis) regulates qi circulation.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Officinalis Recens) harmonizes the middle <i>jiao</i> and warms the Spleen and Stomach.• <i>Zhi Qiao</i> (Fructus Citri Aurantii) and <i>Chuan Bei Mu</i> (Bulbus Fritillariae Cirrhosae) resolve stagnation and phlegm.• <i>Huang Qi</i> (Radix Astragali Membranacei) and <i>Ai Ye</i> (Folium Artemisiae Argyi) tonify qi and stop uterine bleeding.• <i>Jing Jie</i> (Herba Schizonepetae) stops bleeding.• <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii) relieves pain.• <i>Tu Si Zi</i> (Semen Cuscutae Chinensis) tonifies Kidney yin and yang.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

by qi and blood deficiencies. Deficiency of qi leads to the inability of the mother to hold the fetus in a safe and stable position, and deficiency of blood leads to inadequate nourishment of the fetus. This formula may also be used from the seventh month of pregnancy until labor to ensure a safe pregnancy and minimize complications. Finally, it can be used at the time of labor to induce contraction of the uterus and prevent difficult labor.

Dang Gui (Radix Angelicae Sinensis), *Chuan Xiong* (Radix Ligustici), and *Bai Shao* (Radix Paeoniae Lactiflorae) nourish the blood. *Hou Po* (Cortex Magnoliae Officinalis) regulates qi circulation. *Sheng Jiang* (Rhizoma Zingiberis Officinalis Recens) harmonizes the middle *jiao* and warms the Spleen and Stomach. Together, *Hou Po* (Cortex Magnoliae Officinalis) and *Sheng Jiang* (Rhizoma Zingiberis Recens) relieve nausea, vomiting, and morning sickness. *Zhi Qiao* (Fructus Citri Aurantii) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) resolve stagnation and phlegm. *Huang Qi* (Radix Astragali Membranacei) and *Ai Ye* (Folium Artemisiae Argyi) treat unstable pregnancy by tonifying qi and stopping uterine bleeding. *Jing Jie* (Herba Schizonepetae) stops bleeding. *Qiang Huo* (Rhizoma et Radix Notopterygii) relieves pain. *Tu Si Zi* (Semen Cus-

cutae Chinensis) tonifies Kidney yin and yang. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

MODIFICATIONS

- If there is restless fetus, add *Huang Qin* (Radix Scutellariae Baicalensis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- For unstable pregnancy with pain in the lower back, add *Xu Duan* (Radix Dipsaci Asperi) and *Du Zhong* (Cortex Eucommiae Ulmoidis).
- For unstable pregnancy with uterine bleeding, add *E Jiao* (Gelatinum Corii Asini), charred *Sheng Jiang* (Rhizoma Zingiberis Officinalis Recens), and *Di Huang* (Radix Rehmanniae Glutinosae).
- For unstable pregnancy with dizziness and vertigo, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Bai Zhi* (Radix Angelicae Dahuricae).

CAUTIONS / CONTRAINDICATIONS

Although *Bao Chan Wu You Fang* is formulated specifically for pregnant women, it is not without risks. Herbs should be used for pregnant women only when the benefits outweigh the risks.

Bǎo Chǎn Wú Yōu Fāng

(Preserve Pregnancy and Care-Free Decoction)

AUTHORS' COMMENTS

Tai Shan Pan Shi San (Powder that Gives the Stability of Mount Tai) and *Bao Chan Wu You Fang* both treat restless fetus and habitual miscarriage. The differences are as follows:

- *Tai Shan Pan Shi San* is stronger in tonifying qi and blood, strengthening the Spleen, and stabilizing pregnancy.
- *Bao Chan Wu You Fang* tonifies qi and blood, calms the fetus, and stabilizes pregnancy. It also promotes smooth delivery during labor.

Dāng Guī Sǎn (Tangkuei Powder)

當歸散

当归散

Pinyin Name: *Dang Gui San*

Literal Name: Tangkuei Powder

Alternate Name: Tangkuei Formula

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-jing in the Eastern Han Dynasty

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	48g
<i>Bai Shao</i> (Radix Paeoniae Alba)	48g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	48g
<i>Huang Qin</i> (Radix Scutellariae)	48g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	24g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into a fine powder. Take 1 spoonful (6g) of powder per dose with a grain-based liquor two times daily.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the blood
2. Stabilizes pregnancy

CLINICAL MANIFESTATIONS

Blood deficiency during pregnancy: history of habitual miscarriage, unstable pregnancy, difficult labor, and postpartum weakness and anemia. Other indications of this formula include sore back and abdominal pain, hysteria, tidal fever with dryness, and thirst.

CLINICAL APPLICATIONS

Habitual miscarriage, unstable pregnancy, restless fetus, difficult labor, and general postpartum disorders.

EXPLANATION

Dang Gui San (Tangkuei Powder) treats general obstetric and gynecological problems associated with pregnancy.

Clinically, it is used to stabilize pregnancy and to prevent early labor and miscarriages. It can also treat postpartum disorders, such as weakness, anemia, sore back and abdominal pain, and tidal fever with dryness and thirst. The main diagnostic criterion, according to traditional Chinese medicine, is blood deficiency.

Dang Gui (Radix Angelicae Sinensis) tonifies the blood and activates blood circulation. *Bai Shao* (Radix Paeoniae Alba) nourishes the blood and consolidates yin. *Chuan Xiong* (Rhizoma Chuanxiong) regulates blood circulation. *Huang Qin* (Radix Scutellariae) clears heat and cools the blood to calm the fetus. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and benefits the blood. This is a well-balanced formula because it is neither stagnating nor drying in nature, and it is not cold in property.

MODIFICATIONS

- With headache due to wind-cold, add *Gui Zhi* (Ramulus Cinnamomi) and *Chai Hu* (Radix Bupleuri).
- With sore back and abdominal pain, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Xiang Fu* (Rhizoma Cyperi).

- Gan Jiang* (Rhizoma Zingiberis), *chao* (dry-fried) to black

Xiōng Guī Tiáo Xuè Yǐn

(Cnidium and Tangkuei Decoction to Regulate Blood)

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 1 slice of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae). Take the strained decoction while warm. For postpartum care, take this formula with a small amount of warm, grain-based liquor and *Tong Bian* (Infantis Urina). Note: The source text did not specify the doses of the herbs.

CHINESE THERAPEUTIC ACTIONS

- 1. Tonifies qi and blood
- 2. Harmonizes the Liver and Spleen
- 3. Regulates menstruation

CLINICAL MANIFESTATIONS

Postpartum complications: profuse bleeding, excessive loss of blood, spontaneous perspiration, a dry mouth, dizziness, light-headedness, tinnitus, emotional instability, fullness and distention of the hypochondrium, delirium, irritability, epigastric and abdominal pain, poor appetite, fever, and aversion to cold.

CLINICAL APPLICATIONS

Supportive treatment for various types of postpartum complications, such as anemia, retention of lochia, irregular menstruation, insufficient lactation, functional uterine bleeding, nausea, vomiting, and erratic behavior.

EXPLANATION

Xiong Gui Tiao Xue Yin (Cnidium and Tangkuei Decoction to Regulate Blood) treats various types of postpartum complications, including bleeding, qi and blood deficiencies, and disharmony of the Liver, Spleen, and Stomach. Due to postpartum bleeding, patients are likely to have both qi and blood deficiencies, with symptoms and signs such as spontaneous perspiration, a dry mouth, dizziness, light-headedness, and tinnitus. With Liver qi stagnation, patients experience emotional instability, fullness and distention of the hypochondrium, delirium, and irritability. If Liver qi overacts on the Spleen and Stomach, epigastric and abdominal pain and poor appetite will occur. Lastly, because the condition is both excess and deficient in nature, patients also may experience both fever and aversion to cold.

Dang Gui (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Shu Di Huang* (Radix Rehmanniae Praeparata) tonify the blood and regulate blood circulation. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) strengthen the Spleen and tonify qi. Together, they nourish underlying qi and blood deficiencies in postpartum women. *Chen Pi* (Pericarpium Citri Reticulatae), *Wu Yao* (Radix Linderae), and *Xiang Fu* (Rhizoma Cyperi) regulate qi circulation and unblock

Diagnosis	Signs and Symptoms	Treatment	Herbs
Postpartum complications	<ul style="list-style-type: none">• Postpartum bleeding with spontaneous perspiration, a dry mouth, dizziness, light-headedness and tinnitus: qi and blood deficiencies• Emotional instability, hypochondriac fullness and distention, delirium, and irritability: Liver qi stagnation• Epigastric and abdominal pain and poor appetite: Liver qi overacts on the Spleen and Stomach	<ul style="list-style-type: none">• Tonifies qi and blood• Harmonizes the Liver and Spleen	<ul style="list-style-type: none">• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong) and <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) tonify the blood and regulate blood circulation.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>Fu Ling</i> (Poria) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) strengthen the Spleen and tonify qi.• <i>Chen Pi</i> (Pericarpium Citri Reticulatae), <i>Wu Yao</i> (Radix Linderae) and <i>Xiang Fu</i> (Rhizoma Cyperi) regulate qi circulation and unblock Liver qi stagnation.• <i>Mu Dan Pi</i> (Cortex Moutan) and <i>Yi Mu Cao</i> (Herba Leonuri) cool the blood and stop bleeding.• <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the interior and dispels cold.• <i>Da Zao</i> (Fructus Jujubae), <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) strengthen the middle <i>jiao</i> and harmonize the herbs.

Xiōng Guī Tiáo Xuè Yīn

(Cnidium and Tangkuei Decoction to Regulate Blood)

Liver qi stagnation. *Mu Dan Pi* (Cortex Moutan) and *Yi Mu Cao* (Herba Leonuri) cool the blood and stop bleeding. *Gan Jiang* (Rhizoma Zingiberis) warms the interior and dispels cold. *Da Zao* (Fructus Jujubae), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Sheng Jiang* (Rhizoma Zingiberis Recens) strengthen the middle *jiao* and harmonize the herbs. In short, this is an excellent formula for both treating and preventing various postpartum complications.

MODIFICATIONS

- With profuse and continuous bleeding, increase the dose of *Yi Mu Cao* (Herba Leonuri) and *Mu Dan Pi* (Cortex Moutan).
- With epigastric and abdominal fullness due to food stagnation, add *Zhi Shi* (Fructus Aurantii Immaturus), *Hou Po* (Cortex Magnoliae Officinalis), *Shan Zha* (Fructus Crataegi), and *Sha Ren* (Fructus Amomi).
- With pain in the lower abdomen, add *Yan Hu Suo* (Rhizoma Corydalis), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Su Mu* (Lignum Sappan).
- With severe qi and blood deficiencies, add *Huang Qi* (Radix Astragali), or combine with *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood).
- With irritability, thirst, and dryness, add *Di Huang* (Radix Rehmanniae) and *Huang Qin* (Radix Scutellariae).

- With headache and vertigo, add *Bai Zhi* (Radix Angelicae Dahuricae) and *Huang Qi* (Radix Astragali).
- For *shen* (spirit) disturbance in which the patient becomes easily scared or frightened, add *Suan Zao Ren* (Semen Ziziphi Spinosae), *Yuan Zhi* (Radix Polygalae), and *Mai Dong* (Radix Ophiopogonis).

CLINICAL STUDIES AND RESEARCH

Postpartum recovery: One study compared the effects of herbs and drugs on postpartum recovery and healing. The study enrolled 171 women who had normal deliveries, and randomly assigned them to the following two groups: 85 women who received *Xiong Gui Tiao Xue Yin* at a dose of 6.0 g/day, and 86 women who received ergometrine (methylethergometrine maleate) at a dose of 0.375 mg/day. Overall, the study reported marked beneficial effects of this formula on physical recovery in the postpartum period, although its biopharmacological properties are not known.¹

补阴剂

— Yin-Tonifying Formulas

Lìu Wèi Dì Huáng Wán (Six-Ingredient Pill with Rehmannia)

六味地黄丸

六味地黄丸

Pinyin Name: *Liu Wei Di Huang Wan*

Literal Name: Six-Ingredient Pill with Rehmannia

Alternate Names: *Liu Wei Ti Huang Wan*, *Di Huang Wan*, Six-Flavour Rehmannia Pill, Rehmannia Bolus with Six Herbs, Rehmannia Six Pill, Rehmannia Six Formula

Original Source: *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns) by Qian Yi in 1119

COMPOSITION

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	240g [24g]
<i>Shan Zhu Yu</i> (Fructus Corni)	120g [12g]
<i>Shan Yao</i> (Rhizoma Dioscoreae)	120g [12g]
<i>Ze Xie</i> (Rhizoma Alismatis)	90g [9g]
<i>Mu Dan Pi</i> (Cortex Moutan)	90g [9g]
<i>Fu Ling</i> (Poria)	90g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and form into small pills with honey. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take the pills on an empty stomach three times daily with warm water. Today, it is usually prepared in pill form by mixing the powdered herbs with honey. Each pill should weigh approximately 15g. Take 1 pill three times daily on an empty stomach with warm, boiled water. This formula may also be prepared and administered in decoction form using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Nourishes Liver and Kidney yin

CLINICAL MANIFESTATIONS

1. Liver and Kidney yin deficiencies: dizziness, vertigo, tinnitus, deafness, blurred vision, soreness and weakness of the lower back and knees, seminal emissions, night sweats, and delayed closing or unclosed fontanel in infants.

2. Yin-deficient heat: steaming bones sensations, heat sensations in the palm and soles, tidal fever, thirst, toothache, a dry mouth and throat, a red tongue body with a scanty tongue coating, and a fine, rapid pulse. Can also be used for *xiao ke* (wasting and thirsting) syndrome.

CLINICAL APPLICATIONS

Diabetes mellitus, menopause, coronary heart disease, hypertension, hyperthyroidism, hypothyroidism, thyroid adenoma, bronchial asthma, atrophic gastritis, esophagitis, chronic nephritis, nephrotic syndrome, chronic renal failure, periodic paralysis, miscarriage, chronic hepatitis, stroke sequelae, chronic prostatitis, male or female infertility, impotence, frequent urination, galacturia, side effects of chemotherapy, heel pain, lumbago, retarded growth in children, optic neuritis, and central retinitis.

EXPLANATION

The Kidney dominates the bone and produces marrow, and because the brain is considered "the sea of the marrow," Kidney deficiency can affect the brain, causing dizziness

Liù Wèi Dì Huáng Wán (Six-Ingredient Pill with Rehmannia)

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver and Kidney yin deficiencies	<ul style="list-style-type: none"> Soreness and weakness of the lower back and knees, dizziness, vertigo, tinnitus, deafness, and blurred vision: Liver and Kidney yin deficiencies Tidal fever, heat sensations in the palms and soles, thirst, toothache, a dry mouth and throat: yin-deficient fire rising Red tongue body with a scanty tongue coating and a fine, rapid pulse: yin-deficient fire 	Nourishes Liver and Kidney yin	<ul style="list-style-type: none"> <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) tonifies Kidney yin and <i>jing</i> (essence). <i>Shan Zhu Yu</i> (Fructus Corni) nourishes the Liver and Kidney. <i>Shan Yao</i> (Rhizoma Dioscoreae) tonifies the Spleen and Kidney. <i>Ze Xie</i> (Rhizoma Alismatis) sedates the Kidney and causes turbidity to descend. <i>Mu Dan Pi</i> (Cortex Moutan) sedates deficiency fire of the Liver. <i>Fu Ling</i> (Poria) strengthens the Spleen and resolves dampness.

and vertigo. Weakness of the knees and lower back and loose teeth are due to Kidney yin deficiency, since the Kidney resides in the lower back and controls the bones. The ear is the sensory organ that belongs to the Kidney, and tinnitus and deafness may occur as a result of Kidney deficiency. Blurred vision is mainly caused by Liver deficiency, since the Liver opens into the eyes. The Kidney stores *jing* (essence), and when the Kidney becomes deficient, *jing* leaks out of the body causing seminal emissions. Deficiency fire resulting from yin deficiency causes symptoms such as tidal fever, night sweating, heat sensations in the palm and soles, thirst, toothache, and a dry mouth and throat. Delayed closing of the fontanel or unclosed fontanel in infants suggests a possible delay in development, which signifies prenatal *jing* deficiency and inadequate generation of marrow and bones. A red tongue body with a scanty coating suggests yin deficiency with fire. A fine, rapid pulse is typical of deficiency fire.

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia) consists of three tonic and three sedative herbs. *Shu Di Huang* (Radix Rehmanniae Praeparata), the chief herb, tonifies Kidney yin and *jing* (essence), and fills the marrow. *Shan Zhu Yu* (Fructus Corni) nourishes the Liver and Kidney and astringes *jing*. *Shan Yao* (Rhizoma Dioscoreae) tonifies the Spleen and Kidney and consolidates *jing*. Together, these three tonic herbs address deficiencies in the Kidney, Liver, and Spleen. *Ze Xie* (Rhizoma Alismatis) sedates the Kidney, causes turbidity to descend, and controls the stagnating effect of *Shu Di Huang* (Radix Rehmanniae Praeparata). *Mu Dan Pi* (Cortex Moutan) sedates deficiency fire of the Liver, as well as balances the astringent property of *Shan Zhu Yu* (Fructus Corni). *Fu Ling* (Poria) strengthens the Spleen, resolves dampness, and balances *Shan Yao* (Rhizoma Dioscoreae).

One significant characteristic of this formula is that it sedates and tonifies at the same time. The purpose of sedation is to eradicate the turbidity and to prevent the stagnant properties of the tonic herbs from harming the body. The overall purpose of this formula, however, is to tonify, not to sedate. Therefore, the dose of the sedating herbs is less than that of the tonic herbs.

MODIFICATIONS

- With yin-deficient fire, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis).
- With Spleen qi deficiency with qi stagnation, add dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Sha Ren* (Fructus Amomi), and *Chen Pi* (Pericarpium Citri Reticulatae).
- For *xiao ke* (wasting and thirsting) syndrome, add *Tian Hua Fen* (Radix Trichosanthis).
- For hypertension, add *Sang Ye* (Folium Mori), *Di Long* (Pheretima), and *Niu Xi* (Radix Achyranthis Bidentatae).
- For chronic nephritis, add *Yi Mu Cao* (Herba Leonuri), *Tian Hua Fen* (Radix Trichosanthis), and *Dan Zhu Ye* (Herba Lophatheri).
- For irregular menstruation, add *Xiang Fu* (Rhizoma Cyperi) and *Ai Ye* (Folium Artemisiae Argyi).
- With insomnia or neurasthenia, add *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Bai Zi Ren* (Semen Platycladi).
- With weakness and pain of the lower back and knees, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Du Zhong* (Cortex Eucommiae).
- With nocturnal emissions, combine with *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence).
- For tuberculosis of the kidney, add *Bai Ji* (Rhizoma Bletillae) and *San Qi* (Radix et Rhizoma Notoginseng).

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia)

CAUTIONS / CONTRAINDICATIONS

- *Liu Wei Di Huang Wan* should be used with caution in humid areas where diseases are predominantly caused by dampness.
- Because this formula is greasy in nature, patients who have Spleen and Stomach deficiencies should use it with caution, as it may cause loose stools.
- This formula is contraindicated in patients of yang deficiency, exterior conditions, high fever, or alternating chills and fever.

PHARMACOLOGICAL EFFECTS

1. **Reproductive:** In laboratory experiments, the use of *Liu Wei Di Huang Wan* was associated with an increase in the weight of the sex organs, such as the ovaries, uterus, and testicles. There was also an increase in sperm counts in the male subjects. In addition, after ingestion of the herbs for 10 days, there was an increase in sexual activity by up to 40%.¹
2. **Metabolic:** In laboratory experiments, the use of *Liu Wei Di Huang Wan* for 6 weeks lowered plasma cholesterol and triglycerides significantly in rats with elevated levels. In addition, there was an increase of HDL. However, the formula had little effect on plasma cholesterol and triglyceride levels in healthy rats.² It was noted that the three herbs with "sedating effects," namely *Ze Xie* (*Rhizoma Alismatis*), *Mu Dan Pi* (*Cortex Moutan*), and *Fu Ling* (*Poria*), were effective in reducing the cholesterol levels. On the other hand, the three herbs with "tonic effects," namely *Shu Di Huang* (*Radix Rehmanniae Praeparata*), *Shan Zhu Yu* (*Fructus Corni*), and *Shan Yao* (*Rhizoma Dioscoreae*), were not effective in reducing the cholesterol levels.³
3. **Hypoglycemic:** In rats with diabetes, the use of *Liu Wei Di Huang Wan* lowered plasma glucose levels.⁴ In follow-up studies, it was determined that the formula was effective in reducing plasma glucose levels even if the pancreas was surgically removed. Therefore, it was concluded that the hypoglycemic effect of *Liu Wei Di Huang Wan* was not dependant on pancreas function.⁵
4. **Immunostimulant:** Use of *Liu Wei Di Huang Wan* was associated with an increase in white blood cell count and activity.⁶ Moreover, use of this formula reversed the immune suppression induced by dexamethasone.⁷
5. **Adaptogenic:** Administration of *Liu Wei Di Huang Wan* improved the physical performances of mice. After ingesting the herbs orally for 2 weeks, the mice were able to swim for 14.9 minutes, compared to 11.5 minutes for the placebo group that did not receive herbs.⁸
6. **Hepatoprotective and nephroprotective:** Administration of *Liu Wei Di Huang Wan* had protective effects on both the liver and kidneys. It has a hepatoprotective effect

against damages induced by such substances as carbon tetrachloride, thioacetamide, and prednisolone.⁹ It also increased blood perfusion to the kidneys, improved the kidney function, and reduced protein and uric acid in the urine.¹⁰

7. **Antiarrhythmic:** In laboratory experiments in rats, an extract of *Liu Wei Di Huang Wan* was found to be effective in treating arrhythmia induced by chloroform, aconitine, ouabain, and adrenalin.¹¹
8. **Hypotensive:** In anesthetized rats, intraduodenal administration of *Liu Wei Di Huang Wan* in decoction was effective in reducing blood pressure within 15 minutes. The mechanism of action was attributed to dilation of the blood vessels and reduction of peripheral resistance. The herbs did not affect the heart rate nor the contractile force of the heart.¹²

CLINICAL STUDIES AND RESEARCH

1. **Diabetes mellitus:** *Liu Wei Di Huang Wan* is one of the most effective formulas for treating diabetes mellitus. One study reported 93.55% effectiveness using modified *Liu Wei Di Huang Wan* to treat 62 patients with non-insulin dependant diabetes. The herbal treatment was based on *Liu Wei Di Huang Wan* plus *Ge Gen* (*Radix Puerariae Lobatae*) and *Li Zhi He* (*Semen Litchi*) as the base formula. Modifications varied depending on the presentation of diabetes and its complications, and were made as follows: for hunger and increased food intake, add *Shi Gao* (*Gypsum Fibrosum*) and *Yu Zhu* (*Rhizoma Polygonati Odorati*); for thirst and increased water intake, add *Sha Shen* (*Radix Glehniae seu Adenophorae*) and *Tian Hua Fen* (*Radix Trichosanthis*); for shortness of breath and spontaneous sweating, add *Huang Qi* (*Radix Astragali*) and *Tai Zi Shen* (*Radix Pseudostellariae*); for clear urine with increased volume, add *Sang Piao Xiao* (*Ootheca Mantidis*), *Ba Ji Tian* (*Radix Morindae Officinalis*), and *Rou Gui* (*Cortex Cinnamomi*); cloudy urine and night sweats, add *Zhi Mu* (*Rhizoma Anemarrhenae*) and *Huang Bo* (*Cortex Phellodendri Chinensis*); for dizziness and swelling of the head, add *Gou Teng* (*Ramulus Uncariae cum Uncis*), *Bai Shao* (*Radix Paeoniae Alba*), and *Niu Xi* (*Radix Achyranthis Bidentatae*); for chest oppression and palpitations, add *Dan Shen* (*Radix et Rhizoma Salviae Miltiorrhizae*), *Yu Jin* (*Radix Curcumae*), and *Shi Chang Pu* (*Rhizoma Acori Tatarinowii*); for obesity, add *Pei Lan* (*Herba Eupatorii*) and *He Ye* (*Folium Nelumbinis*); for blurred vision, add *Gu Jing Cao* (*Flos Eriocauli*) and *Qing Xiang Zi* (*Semen Celosiae*); and for severe blood stagnation, add *Tao Ren* (*Semen Persicae*), *Hong Hua* (*Flos Carthami*), and *Shui Zhi* (*Hirudo*). The patients were given the herbs for 30 days per course of treatment. Of 62 patients, the study reported complete recovery in 17 patients, improvement

Liù Wèi Dì Huáng Wán (Six-Ingredient Pill with Rehmannia)

in 41 patients, and no benefit in 4 patients.¹³ In another study, 20 patients with adult-onset diabetes were treated with *Liu Wei Di Huang Wan* for 3-6 months with stabilization in 12 patients and improvement in 8 patients.¹⁴ In another study, modified *Liu Wei Di Huang Wan* was used for 20 days to treat 53 patients with diabetes, with marked improvement in 46 patients, improvement in 5 patients, and no benefit in 2 patients.¹⁵ In addition, the use of herbs stabilized blood glucose in conjunction with insulin injection.¹⁶ Lastly, one study reported that use of modified *Liu Wei Di Huang Wan* was associated with 89.2% effectiveness in 65 patients with non-insulin dependant diabetes mellitus.¹⁷

2. **Menopause:** In one clinical study, 23 patients with menopausal symptoms were treated with *Liu Wei Di Huang Wan* and experienced marked improvement in 9 patients (39.1%), and moderate improvement in 14 patients (60.9%). The treatment protocol was to administer this formula in pills, 9 grams twice daily, in the morning and at night, for 3 months. Clinical improvements included relief of hot flashes, tidal fever, perspiration, palpitations, anxiety, restlessness, insomnia, forgetfulness, and others. In addition, after taking the herbs continuously for one year, it was noted that there was a decrease in FSH and an increase of estradiol. The mechanism of action was attributed to the formula's stimulating effect on the endocrine system.¹⁸
3. **Coronary heart disease:** Modified *Liu Wei Di Huang Wan* was used to treat patients with coronary heart disease characterized by Kidney deficiency with symptoms such as soreness of the lower back, weakness of the knees, and tinnitus. The formula used included the addition of *Bai Shao* (Radix Paeoniae Alba), *He Shou Wu* (Radix Polygoni Multiflori), and others. Out of 48 patients, the study reported symptomatic improvement in 24 patients, ECG improvement in 12 patients, and reduction of plasma cholesterol in 12 patients.¹⁹
4. **Hypertension:** Administration of 5-10 packs of *Liu Wei Di Huang Wan* effectively reduced blood pressure in all 31 patients with primary hypertension. In follow-up visits one year later, 23 patients had normal blood pressure, and 8 still had hypertension.²⁰ In one patient report, a patient with hypertension was treated with modified *Liu Wei Di Huang Wan* for 20 doses with good results. Blood pressure reduced from 160-180/110-120 mmHg to 140/90 mmHg. The patient continued to take the herbs for 6 months. The blood pressure did not elevate in any follow-up appointments up to 3 years later.²¹
5. **Hyperthyroidism:** Modified *Liu Wei Di Huang Wan* was used to treat patients with hyperthyroidism. Out of 31 patients, 28 had enlargement of the thyroid gland, 13 had protruding of the eyes, 29 had significant weight loss, and 28 had increased heart rate. After 15-20 doses

of herbal treatment, the study reported symptomatic improvement in most patients.²²

6. **Thyroid adenoma:** In one study, 48 patients with a history of thyroid adenoma from 6 months to 8 years were treated with modified *Liu Wei Di Huang Wan* with good results. The base formula included *Shu Di Huang* (Radix Rehmanniae Praeparata) 30g, *Xuan Shen* (Radix Scrophulariae) 30g, *Mu Li* (Concha Ostreae) 30g pre-decocted, *Shan Yao* (Rhizoma Dioscoreae) 15g, *Fu Ling* (Poria) 15g, *Shan Zhu Yu* (Fructus Corni) 15g, *Xia Ku Cao* (Spica Prunellae) 15g, *Mu Dan Pi* (Cortex Moutan) 12g, *Ze Xie* (Rhizoma Alismatis) 12g, *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) 12g, and *Jiang Can* (Bombyx Batryticatus) 12g. Modifications included the addition of *Bie Jia* (Carapax Trionycis) for yin-deficient heat, *Tai Zi Shen* (Radix Pseudostellariae) for qi deficiency, *Chai Hu* (Radix Bupleuri) for qi stagnation, and *He Shou Wu* (Radix Polygoni Multiflori) for blood deficiency. The treatment protocol was to administer the herbs in decoction one time daily for 1-2 months. Out of 48 patients, the study reported recovery based on relief of symptoms in 26 patients, improvement in 21 patients, and no benefit in 1 patient. The overall effectiveness rate was 98%.²³
7. **Bronchial asthma:** In one report, 64 patients with bronchial asthma characterized by Kidney deficiency were treated with *Liu Wei Di Huang Wan* with good results.²⁴
8. **Atrophic gastritis:** Patients with a history of chronic atrophic gastritis for 6 months to 2 years were treated with modified *Liu Wei Di Huang Wan* for 6 months to 1 year with a 94% effectiveness rate. Out of 50 patients, the study reported recovery in 35 patients, moderate improvement in 10 patients, slight improvement in 2 patients, and no benefit in 3 patients.²⁵
9. **Esophagitis:** Administration of large doses of *Liu Wei Di Huang Wan* in 98 patients with chronic esophagitis was associated with marked improvement in 86 patients and no benefit in 12 patients. The treatment protocol was to take 30 pills three times daily for 30 days per course of treatment, for 3-4 courses total.²⁶
10. **Chronic nephritis:** Use of *Liu Wei Di Huang Wan* plus *Yu Mi Xu* (Stigma Maydis) was reported in one study to be effective in treating patients with chronic nephritis with hypertension and proteinuria.²⁷ The study found that administration of *Liu Wei Di Huang Wan* plus *Yu Mi Xu* (Stigma Maydis) in decoction daily for 3-24 months in 77 patients with chronic nephritis was associated with complete recovery in 22 patients, near-complete recovery in 36 patients, partial recovery in 13 patients, and no benefit in 6 patients. The study noted that most patients with chronic nephritis had underlying Kidney yin deficiency and damp-heat.²⁸

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia)

11. **Nephrotic syndrome:** Six patients with edema and proteinuria due to nephrotic syndrome were treated with modified *Liu Wei Di Huang Wan* for 50 days with good results. The study reported that edema and proteinuria were resolved in all patients.²⁹
12. **Chronic renal failure:** In one study, 12 patients with chronic renal failure (8 with chronic nephritis, 2 with chronic glomerulonephritis, 1 with renal failure due to systemic lupus erythematosus, and 1 with renal failure due to atypical hemorrhagic fever) were treated with modified *Liu Wei Di Huang Wan* for 30-60 days with complete recovery in 8 patients, marked improvement in 3 patients, and slight improvement in 1 patient. A modification to the original formula used a higher dose of *Shan Zhu Yu* (Fructus Corni).³⁰
13. **Periodic paralysis:** In one study, 58 patients (54 had hypokalemia) with periodic paralysis were effectively treated using *Liu Wei Di Huang Wan*. Of 58 patients, the study reported complete recovery in 46 patients, improvement in 10 patients, and no benefit in 2 patients. The treatment protocol was to administer the herbs in decoction daily for 15 days per course of treatment.³¹
14. **Miscarriage:** In one study, 55 women with history of miscarriage were treated with modified *Liu Wei Di Huang Wan* with great success. The formula included *Shu Di Huang* (Radix Rehmanniae Praeparata) 12g, *Shan Yao* (Rhizoma Dioscoreae) 15g, *Mu Dan Pi* (Cortex Moutan) 10g, *Shan Zhu Yu* (Fructus Corni) 10g, *Ze Xie* (Rhizoma Alismatis) 10g, and *Fu Ling* (Poria) 10g. Modifications included the addition of *Xian He Cao* (Herba Agrimoniae) 15g, *E Jiao* (Colla Corii Asini) 10g, and charred *Ai Ye* (Folium Artemisiae Argyi) 30g for bleeding; and *Du Zhong* (Cortex Eucommiae) 10g, *Sang Ji Sheng* (Herba Taxilli) 10g, and *Xu Duan* (Radix Dipsaci) 15g for soreness of the low back. The treatment was to administer the herbs in decoction one time daily for 7 days per course of treatment. The study reported full-term delivery in 53 out of 55 patients (96.4% success rate).³²
15. **Chronic hepatitis:** Use of modified *Liu Wei Di Huang Wan* in 65 patients with chronic hepatitis was associated with significant effect in 12 patients, improvement in 49 patients, and no benefit in 4 patients. The treatment protocol was to use *Liu Wei Di Huang Wan* plus *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Lian Zi* (Fructus Toosendan) as the base formula. For hypochondriac pain due to Liver qi stagnation, *Yan Hu Suo* (Rhizoma Corydalis), *Yu Jin* (Radix Curcumae), and *Chai Hu* (Radix Bupleuri) were added. For poor appetite, *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Shan Zha* (Fructus Crataegi), and *Shen Qu* (Massa Fermentata) were added. For a bitter taste in the mouth with a yellow tongue coating, *Zhi Zi* (Fructus Gardeniae) and *Huang Qin* (Radix Scutellariae) were added. For a red tongue body with a dry mouth, *Xuan Shen* (Radix Scrophulariae) and *Shi Hu* (Caulis Dendrobii) were added. For soreness and weakness of the lower back and knees, *Gou Qi Zi* (Fructus Lycii) and *Du Zhong* (Cortex Eucommiae) were added. For enlargement of the Liver and/or Spleen, *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Bie Jia* (Carapax Trionycis) were added. Lastly, for accumulation of water in the abdomen, *Shu Di Huang* (Radix Rehmanniae Praeparata) was removed, and *Bai Mao Gen* (Rhizoma Imperatae) and *Da Fu Pi* (Pericarpium Arecae) were added.³³
16. **Stroke sequelae:** Modified *Liu Wei Di Huang Wan* showed success in treating post-stroke patients in one study. The treatment protocol used this formula as the base, and added *Dang Gui Wei* (Extremities Radix Angelicae Sinensis), *Huang Qi* (Radix Astragali), and *Di Long* (Pheretima) for qi deficiency and hemiplegia; *Du Zhong* (Cortex Eucommiae), *Sang Ji Sheng* (Herba Taxilli), and *Mai Dong* (Radix Ophiopogonis) for Liver and Kidney deficiencies; and *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Shi Chang Pu* (Rhizoma Acori Tatarinowii) for wind-phlegm obstruction. Out of 20 patients, the study reported complete recovery in 6 patients, improvement in 12 patients, and no benefit in 2 patients. The overall rate of effectiveness was 90%.³⁴
17. **Infertility:** Modified *Liu Wei Di Huang Wan* was used to treat infertility in 42 patients (16 males and 26 females between the ages of 22 to 37). The duration of marriage of the patients ranged from 1-14 years. The treatment included the addition of *Rou Cong Rong* (Herba Cistanches), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Tu Si Zi* (Semen Cuscutae), *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae), and others as deemed necessary. After 3-6 months of herbal treatment, the study reported marked results in 31 patients, moderate results in 9 patients, and no benefit in 2 patients. (Note: Criteria for evaluation was not given.)³⁵
18. **Male infertility:** One study reported 83.3% effectiveness using modified *Liu Wei Di Huang Wan* to treat 30 male patients with infertility. The herbal treatment included *Liu Wei Di Huang Wan* plus *Dang Gui* (Radix Angelicae Sinensis), *Tu Si Zi* (Semen Cuscutae), *Gou Qi Zi* (Fructus Lycii), and others as the base formula. *Bie Jia* (Carapax Trionycis), *He Shou Wu* (Radix Polygoni Multiflori), and a larger dose of *Shu Di Huang* (Radix Rehmanniae Praeparata) were used for severe Kidney deficiency; *Xian Mao* (Rhizoma Curculiginis), *Yin Yang Huo* (Herba Epimedii), and *Ba Ji Tian* (Radix Morindae Officinalis) were added for Kidney yang deficiency; *Hai Ma* (Hippocampus) and *Lu Jiao* (Cornu Cervi) were added for low sperm count; and *Huang Bo* (Cortex Phellodendri Chinensis), *Tao Ren*

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia)

(Semen Persicae), and *Ji Xue Teng* (Caulis Spatholobi) were added for semen that liquefied slowly. Other modifications were made if deemed necessary. The treatment protocol was to administer the herbs in decoction for 20 days per course of treatment, followed by 1 week of rest, and continuation of treatment if necessary. Of 30 patients, 19 had complete recovery (4 with 1 course of treatment, 6 after 2 courses, 9 after 3 courses), 6 had improvement, and 1 had no benefit. The overall rate of effectiveness was 83.3%.³⁶

19. Impotence: One study of 18 impotent patients reported complete recovery in 12 patients, improvement in 4 patients, and no benefit in 2 patients using modified *Liu Wei Di Huang Wan*. The treatment protocol was to administer the herbs twice daily with 6g of salt in warm water. The duration of treatment ranged from 15-37 packs of herbs. The herbal treatment contained *Liu Wei Di Huang Wan* plus *Zhi Mu* (Rhizoma Anemarrhenae), *Rou Gui* (Cortex Cinnamomi), *Du Zhong* (Cortex Eucommiae), and *He Shou Wu* (Radix Polygoni Multiflori) as the base formula. In addition, a small amount of *Fu Zi* (Radix Aconiti Lateralis Praeparata) was added for cold extremities with frequent urination at night; *Qian Shi* (Semen Euryales) and *Jin Ying Zi* (Fructus Rosae Laevigatae) were added for spermatorrhea or nocturnal emissions; *Huang Qi* (Radix Astragali) and *Gou Qi Zi* (Fructus Lycii) were added for severe dizziness; *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) were added for palpitations and insomnia; and *Gui Ban* (Plastrum Testudinis) and *Huang Bo* (Cortex Phellodendri Chinensis) were added for tidal fever and red cheeks.³⁷

20. Chronic prostatitis: In one study, 153 patients with chronic non-bacterial prostatitis were treated with modified *Liu Wei Di Huang Wan* with good results. In addition to this base formula, modifications were made as follows: for Kidney qi and *jing* (essence) deficiencies, *Rou Cong Rong* (Herba Cistanches), *Jin Ying Zi* (Fructus Rosae Laevigatae), and *Wu Wei Zi* (Fructus Schisandrae Chinensis) were added; for burning sensations and pain during urination, *Zhi Mu* (Rhizoma Anemarrhenae), *Che Qian Zi* (Semen Plantaginis), and *Bai Hua She She Cao* (Herba Hedyotis) were added; for burning sensations and pain during urination with seminal emissions and premature ejaculation, *Huang Bo* (Cortex Phellodendri Chinensis) and *Che Qian Zi* (Semen Plantaginis) were added; and for low back pain with dark tongue body and purple spots, *Wang Bu Liu Xing* (Semen Vaccariae), *Tao Ren* (Semen Persicae), and *Wu Gong* (Scolopendra) were added. The patients were given the herbs for 20 days per course of treatment. Out of 153 patients, the study reported complete recovery in 141 patients, improvement in 10 patients, and

no benefit in 2 patients.³⁸ In another study, administration of *Liu Wei Di Huang Wan* in 30 patients with chronic prostatitis was associated with complete recovery in 9 patients, marked improvement in 12 patients, slight improvement in 7 patients, and no benefit in 2 patients. The treatment protocol was to administer the herbs in decoction daily for 1 month per course of treatment, for 1-3 courses total. In addition, patients were instructed to sit in hot water for 15-20 minutes, twice daily, during the entire treatment period.³⁹

21. Frequent urination: One study reported effectiveness in treating 46 of 47 children with frequent urination using modified *Liu Wei Di Huang Wan* as decoction one time daily. The duration of treatment ranged from 3-6 days.⁴⁰

22. Galacturia: One study reported marked success using modified *Liu Wei Di Huang Wan* to treat 20 patients with galacturia. In addition to *Liu Wei Di Huang Wan*, *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added for Spleen deficiency; *Du Zhong* (Cortex Eucommiae) and *Niu Xi* (Radix Achyranthis Bidentatae) were added for soreness and pain of the lower back and knees; *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis) for yin-deficient fire; *Mo Han Lian* (Herba Ecliptae) and *Xiao Ji* (Herba Cirsii) for hematuria; *Huang Bo* (Cortex Phellodendri Chinensis), *Bian Xu* (Herba Polygoni Avicularis), and *Qu Mai* (Herba Dianthi) for damp-heat in the lower jiao; *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Ci Shi* (Magnetitum) for tinnitus, deafness, and vertigo; *Tu Si Zi* (Semen Cuscutae), *Yin Yang Huo* (Herba Epimedii), and *Ba Ji Tian* (Radix Morindae Officinalis) for Kidney yang deficiency; and the addition of *Yi Zhi* (Fructus Alpiniae Oxyphyllae) and *Sang Piao Xiao* (Ootheca Mantidis), and removal of *Ze Xie* (Rhizoma Alismatis), for frequent urination.⁴¹

23. Heel pain: One study reported 88.5% effectiveness using modified *Liu Wei Di Huang Wan* to treat 185 patients with heel pain. In addition to *Liu Wei Di Huang Wan*, modifications were made as follows: for Liver and Kidney deficiencies, *Gou Qi Zi* (Fructus Lycii) and *Gu Sui Bu* (Rhizoma Drynariae) were added; for qi and blood stagnation, *Tao Ren* (Semen Persicae), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Di Long* (Pheretima) were added; for obstruction of wind-cold, *Zhi Chuan Wu* (Radix Aconiti Praeparata) and *Wei Ling Xian* (Radix et Rhizoma Clematidis) were added; and for obstruction of damp-heat, *Huang Bo* (Cortex Phellodendri Chinensis), *Cang Zhu* (Rhizoma Atractylodis), and *Zhi Zi* (Fructus Gardeniae) were added. The duration of treatment ranged from 38 to 120 packs of herbs, with an average of 60 packs.⁴²

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia)

HERB-DRUG INTERACTION

Chemotherapy-induced toxicities: One study reported marked improvement in patients treated with *Liu Wei Di Huang Wan* as an adjunct to chemotherapy. Clinical benefits included relief of nausea and vomiting, a decrease of hair loss and stomatitis, an improvement in appetite, and an increase in white blood cells, red blood cells, platelets, T-lymphocytes, and natural killer (NK) cells.⁴³

TOXICOLOGY

According to one study, no abnormalities were noted in pregnant mice that received *Liu Wei Di Huang Wan* continuously throughout the third trimester.⁴⁴

RELATED FORMULAS

Er Long Zuo Ci Wan

(Pill for Deafness that Is Kind to the Left [Kidney])

耳聾左慈丸

耳聾左慈丸

Pinyin Name: *Er Long Zuo Ci Wan*

Literal Name: Pill for Deafness that Is Kind to the Left [Kidney]

Original Source: *Guang Wen Yi Lun* (Discussion of Widespread Warm Epidemics) by Dai Tian-Zhang in 1722

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	240g
<i>Shan Zhu Yu</i> (Fructus Corni)	120g
<i>Shan Yao</i> (Rhizoma Dioscoreae)	120g
<i>Fu Ling</i> (Poria)	90g
<i>Mu Dan Pi</i> (Cortex Moutan)	90g
<i>Ze Xie</i> (Rhizoma Alismatis)	90g
<i>Ci Shi</i> (Magnetitum), <i>duan</i> (calcined)	60g
<i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii)	45g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	15g

Grind the herbs into a fine powder, and mix with honey to make pills. Take 9g of pills with lightly-salted water.

Er Long Zuo Ci Wan (Pill for Deafness that Is Kind to the Left [Kidney]) tonifies Liver and Kidney yin, and opens the sensory orifices (ear). It is based on *Liu Wei Di Huang Wan* with the addition of *Ci Shi* (Magnetitum), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), and *Wu Wei Zi* (Fructus Schisandrae Chinensis). *Ci Shi* (Magnetitum) is commonly used to improve hearing. *Shi Chang Pu* (Rhizoma Acori Tatarinowii) opens the orifices and dispels phlegm that may be blocking the senses. *Wu Wei Zi* (Fructus Schisandrae Chinensis) prevents the leakage of *jing* (essence). Clinically, this formula treats tinnitus, impaired or diminished hearing, and deafness arising from Kidney deficiency. It also treats dizziness, red eyes, blurred vision, and a dry mouth and throat.

Ming Mu Di Huang Wan

(Improve Vision Pill with Rehmannia)

明目地黄丸

明目地黄丸

Pinyin Name: *Ming Mu Di Huang Wan*

Literal Name: Improve Vision Pill with Rehmannia

Alternate Name: Rehmannia Vision Formula

Original Source: *Shen Shi Yao Han* (Scrutiny of the Priceless Jade Patient) by Fu Ren-Yu in 1644

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	120g
<i>Di Huang</i> (Radix Rehmanniae), <i>xi</i> (washed) with liquor	60g
<i>Shan Yao</i> (Rhizoma Dioscoreae)	60g
<i>Ze Xie</i> (Rhizoma Alismatis)	60g
<i>Shan Zhu Yu</i> (Fructus Corni), <i>xi</i> (washed) with liquor	60g
<i>Mu Dan Pi</i> (Cortex Moutan), <i>xi</i> (washed) with liquor	60g
<i>Chai Hu</i> (Radix Bupleuri)	60g
<i>Fu Shen</i> (Poria Paradicis), <i>zheng</i> (steamed) with milk	60g
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>xi</i> (washed) with liquor	60g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	60g

Grind the herbs into a fine powder, and mix with honey to make pills. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 9g of pills per dose on an empty stomach with lightly-salted water.

Ming Mu Di Huang Wan (Improve Vision Pill with Rehmannia) tonifies the Liver and Kidney and brightens vision. Clinically, it is used for blurred or diminished vision. This formula is based on *Liu Wei Di Huang Wan* with the addition of *Di Huang* (Radix Rehmanniae), *Chai Hu* (Radix Bupleuri), *Dang Gui* (Radix Angelicae Sinensis), *Fu Shen* (Poria Paradicis), and *Wu Wei Zi* (Fructus Schisandrae Chinensis). *Di Huang* (Radix Rehmanniae) clears deficiency heat caused by yin deficiency. *Chai Hu* (Radix Bupleuri) acts as a channel-guiding herb to the Liver, which opens to the eyes. *Dang Gui* (Radix Angelicae Sinensis) nourishes Liver blood to treat visual disorders. *Fu Shen* (Poria Paradicis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) calm the *shen* (spirit).

Ming Mu Di Huang Wan

(Improve Vision Pill with Rehmannia)

明目地黄丸

明目地黄丸

Pinyin Name: *Ming Mu Di Huang Wan*

Literal Name: Improve Vision Pill with Rehmannia

Alternate Name: Rehmannia Vision Formula

Liú Wèi Dì Huáng Wán (Six-Ingredient Pill with Rehmannia)

Original Source: *Zhong Hua Ren Min Gong He Guo Yao Dian* (Pharmacopoeia of People's Republic of China) in 2005

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	160g
<i>Mu Dan Pi</i> (Cortex Moutan)	60g
<i>Fu Ling</i> (Poria)	60g
<i>Gou Qi Zi</i> (Fructus Lycii)	60g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	60g
<i>Ji Li</i> (Fructus Tribuli)	60g
<i>Shan Zhu Yu</i> (Fructus Corni), <i>zhi</i> (fried with liquid)	80g
<i>Shan Yao</i> (Rhizoma Dioscoreae)	80g
<i>Ze Xie</i> (Rhizoma Alismatis)	60g
<i>Ju Hua</i> (Flos Chrysanthemi)	60g
<i>Bai Shao</i> (Radix Paeoniae Alba)	60g
<i>Shi Jue Ming</i> (Concha Haliotidis), <i>duan</i> (calcined)	80g

Grind the herbs into a fine powder, and mix with 35-50g of honey per 100g of powdered herbs to make pills. This is the contemporary version of *Ming Mu Di Huang Wan* (Improve Vision Pill with Rehmannia). It has functions to tonify Liver and Kidney yin, clear Liver heat, and brighten the eyes. It is generally used to treat blurred vision, photophobia, and excessive tearing with exposure to wind.

These two formulas have identical names, but are derived from different sources and have slightly different functions:

- *Ming Mu Di Huang Wan* from *Shen Shi Yao Han* (Scrutiny of the Priceless Jade Patient) by Fu Ren-Yu improves vision by tonifying Liver and Kidney yin.
- *Ming Mu Di Huang Wan* from *Zhong Hua Ren Min Gong He Guo Yao Dian* (Pharmacopoeia of People's Republic of China) improves vision by tonifying Liver and Kidney yin, and has added function to clear Liver heat.

AUTHORS' COMMENTS

Liu Wei Di Huang Wan is the representative formula to tonify Liver and Kidney yin, and is one of the most frequently prescribed formulas. Many herbal formulas that tonify Kidney yin are based on *Liu Wei Di Huang Wan*. Below are the key similarities and differences among these yin tonic formulas:

- *Liu Wei Di Huang Wan* is the most basic Kidney and Liver yin tonic formula.
- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill) contains *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis) to nourish yin and clear deficiency fire.
- *Mai Wei Di Huang Wan* (Ophiopogonis, Schisandra and Rehmannia Pill) is formulated with the addition of *Mai*

Dong (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). It nourishes yin, astringes the Lung, redirects the reversed flow of Lung qi, and arrests wheezing.

- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill) has *Gou Qi Zi* (Fructus Lycii) and *Ju Hua* (Flos Chrysanthemi); it nourishes Kidney and Liver yin and benefits the eyes to brighten vision.⁴⁵

There are many herbal formulas that tonify Liver and Kidney yin. Their similarities and differences are as follows:

- *Liu Wei Di Huang Wan* is the most representative formula for tonifying yin. It nourishes and tonifies the Liver, Kidney, and Spleen.
- *Zuo Gui Wan* (Restore the Left [Kidney] Pill) replenishes Kidney *jing* (essence) and treats depleted *jing* and marrow. It is a pure yin tonic formula without any sedating herbs to offset the heavy tonic effects. It has a stronger yin-tonifying effect than *Liu Wei Di Huang Wan*. However, because of its stagnating nature, it is usually not taken for a prolonged period of time.
- *Da Bu Yin Wan* (Great Tonify the Yin Pill) nourishes yin, sedates fire, anchors yang, and is best for Kidney water depletion with deficiency heat flaring that manifests in steaming bones sensation, tidal fever, cough with blood, and vomiting of blood.
- *Hu Qian Wan* (Hidden Tiger Pill) nourishes yin, sedates fire, and strengthens the bones and tendons. It is best for atrophy or degeneration of the bones and tendons caused by Kidney yin deficiency with heat.
- *Er Zhi Wan* (Two-Ultimate Pill) is a balanced yin tonic formula, not too warm or too cold, that mainly treats Kidney yin deficiency with dizziness and blurred vision.
- *Yi Guan Jian* (Linking Decoction) nourishes the middle *jiao* and smoothes Liver qi. It treats Liver and Kidney deficiencies with Liver qi stagnation causing chest and hypochondriac pain, acid regurgitation, a bitter taste in the mouth, and a dry mouth and throat.
- *Shi Hu Ye Guang Wan* (Dendrobium Pill for Night Vision) causes Liver yang and wind to descend, nourishes yin, and brightens the eyes. It is best for visual disorders caused by Liver and Kidney yin deficiencies with blood deficiency.
- *Gui Lu Er Xian Jiao* (Tortoise Shell and Deer Antler Syrup) tonifies Kidney yin and yang, *jing* (essence), and blood of the *du* (governing) and *ren* (conception) channels.
- *Qi Bao Mei Ran Dan* (Seven-Treasure Special Pill for Beautiful Whiskers) nourishes Kidney yin, tonifies Liver blood, and mainly treats hair disorders, such as hair loss, premature gray hair, and dry or brittle hair.⁴⁶

Zhī Bǎi Dì Huáng Wán
(Anemarrhena, Phellodendron, and Rehmannia Pill)

知柏地黄丸
知柏地黄丸

Pinyin Name: Zhi Bai Di Huang Wan
Literal Name: Anemarrhena, Phellodendron, and Rehmannia Pill
Alternate Names: Zhi Bo Di Huang Wan, Zi Bo Di Huang Wan, Zhi Bai Ba Wei Wan, Chih Po Ti Huang Wan, Eight-Ingredient Pill with Anemarrhena and Phellodendron, Anemarrhena, Phellodendron and Rehmannia Formula
Original Source: *Yi Zong Jin Jian* (Golden Mirror of the Medical Tradition) by Wu Qian in 1742

COMPOSITION

Shu Di Huang (Radix Rehmanniae Praeparata)	240g [24g]
Shan Zhu Yu (Fructus Corni)	120g [12g]
Shan Yao (Rhizoma Dioscoreae)	120g [12g]
Ze Xie (Rhizoma Alismatis)	90g [9g]
Mu Dan Pi (Cortex Moutan)	90g [9g]
Fu Ling (Poria)	90g [9g]
Zhi Mu (Rhizoma Anemarrhenae)	60g [6g]
Huang Bo (Cortex Phellodendri Chinensis)	60g [6g]

Zhī Bǎi Dì Huáng Wán

(Anemarrhena, Phellodendron, and Rehmannia Pill)

DOSAGE / PREPARATION / ADMINISTRATION

Prepare and administer this formula as honey pills or in decoction form. The instructions for preparation and administration for this formula are the same as *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia). For decoction, use the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Liver and Kidney yin
2. Clears yin-deficient fire

CLINICAL MANIFESTATIONS

Yin-deficient fire of the Liver and Kidney: steaming bones sensation, tidal fever, night sweats, irritability, soreness of the lower back and knees, and seminal emissions.

CLINICAL APPLICATIONS

Menopause, male infertility, hemospermia, diabetes mellitus, nephrotic syndrome, hypertension, tinnitus, epistaxis, dryness in geriatric patients, chronic neuritis, spontaneous perspiration, and gouty arthritis.

EXPLANATION

Zhi Bai Di Huang Wan (Anemarrhena, Phellodendron, and Rehmannia Pill) nourishes Liver and Kidney yin, and clears yin-deficient heat. This formula has similar actions as *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) to tonify yin; however, it has a much stronger effect to clear yin-deficient fire of the Liver and Kidney, making it more effective for relieving steaming bones sensation, tidal fever, night sweats, and irritability.

This formula consists of the six herbs of *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), which nourish Liver and Kidney yin, plus *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis). *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis) are excellent for

sedating yin-deficient fire of the Liver and Kidney. For a more detailed explanation of the clinical manifestations and the functions of each herb in this formula, please refer to *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

MODIFICATIONS

- With a dry mouth and sore throat, add *Xuan Shen* (Radix Scrophulariae) and *Jie Geng* (Radix Platycodonis).
- For thirst and irritability, add *Huang Qi* (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng).
- If there is more soreness of the lower back, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Du Zhong* (Cortex Eucommiae).

CAUTIONS / CONTRAINDICATIONS

Please refer to *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

CLINICAL STUDIES AND RESEARCH

1. **Male infertility:** Use of modified *Zhi Bai Di Huang Wan* was associated with 92.2% effectiveness in treating 220 men with infertility. The herbal treatment contained this formula plus *Bai Hua She She Cao* (Herba Hedyotis), *Pu Gong Ying* (Herba Taraxaci), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae), *Mu Li* (Concha Ostreae), *Niu Xi* (Radix Achyranthis Bidentatae), and *Shi Chang Pu* (Rhizoma Acori Tatarinowii) as the base formula. Additional modifications were made as necessary according to the condition of the patients. For Kidney yin deficiency, *Di Huang* (Radix Rehmanniae) and *Mu Dan Pi* (Cortex Moutan) were removed, and *Ba Ji Tian* (Radix Morindae Officinalis), *Rou Cong Rong* (Herba Cistanches), *Yin Yang Huo* (Herba Epimedii), *Huang Qi* (Radix Astragali), and *Gou Qi Zi* (Fructus Lycii) were added. For more damp-heat, *Da Huang* (Radix et Rhizoma Rhei) and *Mu Tong* (Caulis Akebiae) were added. For stagnation, *Wang Bu*

Zhi Bai Di Huang Wan (Anemarrhena, Phellodendron, and Rehmannia Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Yin-deficient fire of the Liver and Kidney	<ul style="list-style-type: none"> • Dizziness, vertigo, tinnitus, deafness, blurred vision, soreness and weakness of the lower back and knees, night sweats, seminal emissions, tidal fever, heat sensations in the palm and soles, thirst, and a dry mouth and throat: Liver and Kidney yin deficiency • Steaming bones sensation, tidal fever, and irritability: yin-deficient fire 	<ul style="list-style-type: none"> • Nourishes Liver and Kidney yin • Clears yin-deficient fire 	<ul style="list-style-type: none"> • <i>Liu Wei Di Huang Wan</i> (Six-Ingredient Pill with Rehmannia) nourishes Liver and Kidney yin. • <i>Zhi Mu</i> (Rhizoma Anemarrhenae) and <i>Huang Bo</i> (Cortex Phellodendri Chinensis) sedate yin-deficient fire of the Liver and Kidney.

Zhī Bǎi Dì Huáng Wán

(Anemarrhena, Phellodendron, and Rehmannia Pill)

Liu Xing (Semen Vaccariae), *Chi Shao* (Radix Paeoniae Rubra), and processed *Chuan Shan Jia* (Squama Manis) were added. For Liver qi stagnation, *Chai Hu* (Radix Bupleuri) and *Yu Jin* (Radix Curcumae) were added. Of 220 cases, the study reported pregnancy in their partners in 171 cases, improvement in 32 cases, and no benefit in 17 cases.¹

2. Hemospermia: Administration of modified *Zhi Bai Di Huang Wan* was effective in treating blood in the semen in 108 patients. The herbal treatment contained the formula plus *Bai Mao Gen* (Rhizoma Imperatae), *Ou Jie* (Nodus Nelumbinis Rhizomatis), and *Mo Han Lian* (Herba Ecliptae) as the base formula. Additional modifications were made as needed. For more damp-heat causing a yellow, greasy tongue coating and painful urination, *Cang Zhu* (Rhizoma Atractylodis), *Hu Po* (Succinum), and *Liu Yi San* (Six-to-One Powder) were added, and *Shan Zhu Yu* (Fructus Corni) and *Shan Yao* (Rhizoma Dioscoreae) were removed. For heat and toxins in the interior leading to painful ejaculation, *Pu Gong Ying* (Herba Taraxaci) and *Bai Jiang Cao* (Herba cum Radice Patriniae) were added. For brown discoloration of the semen, *Da Huang* (Radix et Rhizoma Rhei) and *Chi Shao* (Radix Paeoniae Rubra) were added. For the presence of bright red blood in the semen, *Xian He Cao* (Herba Agrimoniae) and *Zi Zhu* (Folium Callicarpae) were added. For pale red blood in the semen with dizziness and fatigue, *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) were added, and *Bai Mao Gen* (Rhizoma Imperatae) and *Ze Xie* (Rhizoma Alismatis) were removed. Of 108 cases, the study reported complete recovery in 82 cases, improvement in 16 cases, and no benefit in 10 cases. The overall rate of effectiveness was 90.7%.²

3. Diabetes mellitus: Administration of modified *Zhi Bai Di Huang Wan* in 80 patients with type II diabetes mellitus was associated with normalization in 15 cases, significant improvement in 45 cases, slight improvement in 15 cases, and no benefit in 5 cases. The herbal formula contained *Zhi Bai Di Huang Wan*, with the elimination of *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis), and the addition of *Jiao Gu Lan* (Rhizoma seu Herba Gynostemmatis), *Sha Shen* (Radix Glehniae seu Adenophorae), *Gou Qi Zi* (Fructus Lycii), *Shi Hu* (Caulis Dendrobii), *Shi Gao* (Gypsum Fibrosum), and others as needed.³ In another study, 22 patients with diabetes were treated with modified *Zhi Bai Di Huang Wan*. In addition to diabetes, 8 patients had other complications, such as urinary tract infections, hypertension, coronary heart disease, and conjunctivitis. The patients were instructed to make dietary changes and take herbs on a daily basis. Out of 22 cases, the study

reported a marked effect in 15 cases, moderate improvement in 6 cases, and no benefit in 1 case.⁴

4. Nephrotic syndrome: In one study, 30 patients with nephrotic syndrome were treated with modified *Zhi Bai Di Huang Wan*. The age of the patients ranged from 15-61 years of age, with a history of kidney disorder from 3 days to 17 years. All patients received herbal treatment and dietary changes. Out of 30 cases, the study reported marked improvement in 18 cases, moderate improvement in 11 cases, and no benefit in 1 case. The herbal treatment contained this formula plus *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Yi Yi Ren* (Semen Coicis), *Xuan Shen* (Radix Scrophulariae), and *Yi Mu Cao* (Herba Leonuri). Additional modifications were made as needed. For Lung qi deficiency with frequent infection, *Yu Ping Feng San* (Jade Windscreen Powder) with a larger dose of *Huang Qi* (Radix Astragali) was added. For Spleen deficiency with dampness, *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Zhu Ling* (Polyporus), and *Che Qian Zi* (Semen Plantaginis) were added. For Liver yang rising, *Ju Hua* (Flos Chrysanthemi) and *Gou Teng* (Ramulus Uncariae cum Uncis) were added. For Liver and Kidney yin deficiencies, *Di Huang* (Radix Rehmanniae), *Gou Qi Zi* (Fructus Lycii), and *Mai Dong* (Radix Ophiopogonis) were added. For soreness and pain of the throat, *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis) and *She Gan* (Rhizoma Belamcandae) were added. For severe hematuria, *Pu Huang* (Pollen Typhae), charred *Huang Qin* (Radix Scutellariae), charred *Da Huang* (Radix et Rhizoma Rhei), and a large dose of *Bai Mao Gen* (Rhizoma Imperatae) were added. For seminal emissions, calcined *Long Gu* (Os Draconis), *Qian Shi* (Semen Euryales), and *Jin Ying Zi* (Fructus Rosae Laevigatae) were added. For dry stools and constipation, *He Shou Wu* (Radix Polygoni Multiflori), *Dang Gui* (Radix Angelicae Sinensis), *Rou Cong Rong* (Herba Cistanches), *Sang Shen* (Fructus Mori), and *Da Huang* (Radix et Rhizoma Rhei) were added. For edema, *Da Fu Pi* (Pericarpium Arecae) and *Che Qian Zi* (Semen Plantaginis) were added.⁵

5. Hypertension: In one study, 40 patients with hypertension were diagnosed and treated with *Zhi Bai Di Huang Wan*. Out of 40 patients, 30 were diagnosed with secondary hypertension and 10 with primary hypertension. All patients were evaluated for both objective and subjective improvement, including blood pressure, headache, dizziness, feeling increased pressure in the head, insomnia, a bitter taste in the mouth, irritability, and a feeling of warmth in the palms and soles. Out of 10 patients with primary hypertension, the study reported improvement in 6 cases and no benefit in 4 cases after 8-9 weeks of treatment. Out of 30 cases of secondary hypertension, the study reported

Zhī Bái Dì Huáng Wán

(Anemarrhena, Phellodendron, and Rehmannia Pill)

improvement in 24 cases and no benefit in 6 cases after 4-5 weeks of treatment.⁶

6. **Epistaxis:** One study of 30 patients with stubborn nosebleeds reported good results using modified *Zhi Bai Di Huang Wan*. The herbal treatment contained the formula plus *Huang Qin* (Radix Scutellariae) and *Xiao Ji* (Herba Cirsii) as the base formula, with the addition of other herbs as needed. For wind-cold, *Fang Feng* (Radix Saposhnikovia) and *Niu Xi* (Radix Achyranthis Bidentatae) were added. For wind-heat, *Sang Bai Pi* (Cortex Mori) and *Ju Hua* (Flos Chrysanthemi) were added. For Stomach fire rising, *Shi Hu* (Caulis Dendrobii) and *Mai Dong* (Radix Ophiopogonis) were added. For Liver fire rising, *Chai Hu* (Radix Bupleuri) and *Zi Wan* (Radix et Rhizoma Asteris) were added. For Liver and Kidney yin deficiencies with deficiency fire, *Gou Qi Zi* (Fructus Lycii) and *Di Gu Pi* (Cortex Lycii) were added. For Spleen deficiency and its inability to control blood circulation, *Huang Qi* (Radix Astragali) and *Tai Zi Shen* (Radix Pseudostellariae) were added. After 10 days of herbal treatment, the study reported complete recovery without recurrence for one year in 15 cases, improvement in 12 cases, and no benefit in 3 cases.⁷

7. **Dryness in geriatric patients:** Use of modified *Zhi Bai Di Huang Wan* showed good results in treating 24 geriatric patients with various complaints of dryness, such as a dry mouth, dry nose, constipation, etc.⁸

8. **Spontaneous perspiration:** Use of modified *Zhi Bai Di Huang Wan* in 16 patients with spontaneous perspiration was associated with recovery in 8 cases after 2 packs of herbs, in 3 cases after 3 packs of herbs, in another 3 cases after 4 packs of herbs, and 2 cases after 5 packs of herbs. The herbal treatment contained this formula plus *Gou Qi Zi* (Fructus Lycii), *Huang Qi* (Radix Astragali), and *Fu Xiao Mai* (Fructus Triticis Levis) as the base formula. Modifications include the addition of *Xia Ku Cao* (Spica Prunellae) and *Shi Jue Ming* (Concha Halotidis) for hypertension; and *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Bai Zi Ren* (Semen Platycladi) for palpitations. After the relief of spontaneous perspiration, the patients were switched to either *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) or *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill) for consolidation.⁹

9. **Gouty arthritis:** Use of modified *Zhi Bai Di Huang Wan* plus topical application of an herbal paste was associated with recovery from gouty arthritis in 43 of 50 patients. The herbal formula contained *Zhi Bai Di Huang Wan* plus *Jin Qian Cao* (Herba Lysimachiae), *Che Qian Zi* (Semen Plantaginis), *Huang Qi* (Radix Astragali), *Niu Xi* (Radix

Achyranthis Bidentatae), and *Chi Shao* (Radix Paeoniae Rubra).¹⁰

HERB-DRUG INTERACTION

Streptomycin-induced toxicities: Administration of *Zhi Bai Di Huang Wan* showed effectiveness in treating streptomycin-induced toxicities in 39 patients between 10-73 years of age. Within 3-8 days following streptomycin injection, toxicities appeared, such as dizziness, tinnitus, deafness, muscle spasms and cramps, loss of balance when walking, nausea, vomiting, thirst, a dry mouth and throat, irritability, quick to anger, fatigue, poor appetite, night sweats, and dry stools. The treatment protocol was to administer modified *Zhi Bai Di Huang Wan* daily. The duration of treatment ranged from 10 to 116 days, with an average of 63 days. Of 39 cases, the study reported complete recovery in 30 cases, marked improvement in 6 cases, and moderate improvement in 3 cases. The study also noted that patients who responded the most were ones who sought treatment immediately after experiencing streptomycin toxicities.¹¹

TOXICOLOGY

In an acute toxicology study, it was determined that the LD₅₀ for a preparation of *Zhi Bai Di Huang Wan* was 13.31 g/kg via intraperitoneal injection in mice. The study concluded that the formula had very little toxicity.¹²

<i>Ju Hua</i> (Flos Chrysanthemi)	90g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

Prepare and administer this formula as honey pills or in decoction form. The instructions for preparation and administration for this formula are the same as *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia). For decoction, use the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Nourishes Liver and Kidney yin

CLINICAL MANIFESTATIONS

Liver and Kidney yin deficiencies with eye disorders: blurred vision, dry eyes, tearing of the eyes with exposure to wind; dizziness, vertigo, tinnitus, and soreness of the lower back and knees.

CLINICAL APPLICATIONS

Retrobulbar neuritis, retinitis, optic nerve atrophy, vitreous opacity, photosensitivity, photophobia, redness, swelling

Qǐ Jú Dì Huáng Wán

(Lycium Fruit, Chrysanthemum, and Rehmannia Pill)

and pain of eyes, blurry vision, excessive tearing with exposure to wind, chronic glaucoma, general visual disturbance, hypertension, diabetes mellitus, hyperemia, and menopause.

EXPLANATION

Qi Ju Di Huang Wan (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), derived from *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), tonifies Kidney and Liver yin, brightens the eyes, and improves vision. Compared to *Liu Wei Di Huang Wan*, this formula more strongly nourishes the Liver and benefits the eyes. The main clinical indication for this formula is deteriorated vision caused by Liver and Kidney yin deficiencies.

This formula consists of *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) plus *Gou Qi Zi* (Fructus Lycii) and *Ju Hua* (Flos Chrysanthemi). *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) tonifies Liver and Kidney yin. *Gou Qi Zi* (Fructus Lycii) and *Ju Hua* (Flos Chrysanthemi) improve vision and treat various eye disorders. For more information, please refer to *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

MODIFICATIONS

- For red eyes with swelling and pain, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis).
- With diminished and dimmed vision, add *Dang Gui* (Radix Angelicae Sinensis) and *Huang Qi* (Radix Astragali).
- For more tearing with exposure to wind, add *Sheng Ma* (Rhizoma Cimicifugae) and *Ge Gen* (Radix Puerariae Lobatae).

CAUTIONS / CONTRAINDICATIONS

Please refer to *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

PHARMACOLOGICAL EFFECTS

1. **Immunostimulant:** One study reported a mild immunostimulant effect associated with the use of *Qi Ju Di Huang Wan* in mice. It increased phagocytic activities of macrophages.¹
2. **Hypoglycemic:** Administration of *Qi Ju Di Huang Wan* was associated with reduced plasma glucose levels and decreased daily intake of water. The treatment protocol was to administer 2.5 g/kg and 5.0 g/kg of the formula via oral ingestion one time daily for 4 months.²

CLINICAL STUDIES AND RESEARCH

1. **Retinitis:** Use of *Qi Ju Di Huang Wan* in 140 patients with retinitis was associated with complete recovery in 22 patients, significant improvement in 21 patients, moderate improvement in 70 patients, and no benefit in 27 patients. The treatment protocol was to administer the herbs in decoction daily, for 3 weeks per course of treatment. The duration of treatment ranged from 30 to 118 days, with an average of 57 days.³
2. **Vitreous opacity:** One study reported success using modified *Qi Ju Di Huang Wan* to treat vitreous opacity in 34 patients (21 males and 13 females, between 38-76 years of age). The herbal formula contained *Gou Qi Zi* (Fructus Lycii) 15g, *Ju Hua* (Flos Chrysanthemi) 15g, *Shan Yao* (Rhizoma Dioscoreae) 15g, *Shan Zhu Yu* (Fructus Corni) 15g, *Shu Di Huang* (Radix Rehmanniae Praeparata) 20g, *Fu Ling* (Poria) 10g, *Ze Xie* (Rhizoma Alismatis) 10g, *Mu Dan Pi* (Cortex Moutan) 10g, *Tu Si Zi* (Semen Cuscutae) 10g, *Nu Zhen Zi* (Fructus Ligustri Lucidi) 10g, and *Jue Ming Zi* (Semen Cassiae) 10g. The treatment protocol was to cook the herbs in water, and administer the decoction in 2 equally-divided doses, two times daily for 30 days. Of 34 patients, the study reported significant improvement in 18 patients, moderate improvement in 11 patients, and no benefit in 5 patients. The overall rate of effectiveness was 85.29%.⁴

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver and Kidney yin deficiencies with eye disorders	<ul style="list-style-type: none">• Dizziness, vertigo, tinnitus, deafness, blurred vision, soreness and weakness of the lower back and knees, night sweats, seminal emissions, tidal fever, heat sensations in the palm and soles, thirst and a dry mouth and throat: Liver and Kidney yin deficiency• Blurred vision and dry eyes: Liver and Kidney yin deficiencies unable to nourish the eyes	<ul style="list-style-type: none">• Nourishes Liver and Kidney yin• Nourishes the eyes and improve visual functions	<ul style="list-style-type: none">• <i>Liu Wei Di Huang Wan</i> (Six-Ingredient Pill with Rehmannia) nourishes Liver and Kidney yin.• <i>Gou Qi Zi</i> (Fructus Lycii) and <i>Ju Hua</i> (Flos Chrysanthemi) improve vision and treat various visual disorders.

Qǐ Jú Dì Huáng Wán

(Lycium Fruit, Chrysanthemum, and Rehmannia Pill)

3. **Hypertension:** Two studies have shown that administration of *Qǐ Jú Dì Huáng Wán* was effective in treating primary hypertension characterized by Kidney yin deficiency. The duration of treatment was 8-12 weeks per course of treatment. Clinical results included reduction of blood pressure and resolution of subjective symptoms.^{5,6}
4. **Menopause:** In one study, 144 women with menopausal symptoms were treated effectively with *Qǐ Jú Dì Huáng Wán* as the base formula. Modifications were made by adding *Huang Lian* (Rhizoma Coptidis), *Bai Shao* (Radix Paeoniae Alba), and *Zhi Mu* (Rhizoma Anemarrhenae) for deficiency heat with a dry mouth and tongue, constipation, and irritability; *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Dang Shen* (Radix Codonopsis), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for Heart and Kidney yang deficiencies with palpitations and edema; and *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix

Astragali) for Heart and Spleen deficiencies with poor appetite, excessive worries, and lack of desire to speak. Of 144 patients, the study reported complete recovery in 12 patients, significant improvement in 48 patients, moderate improvement in 32 patients, and no benefit in 52 patients.⁷

Mài Wèi Dì Huáng Wán

(Ophiopogonis, Schisandra, and Rehmannia Pill)

麥味地黃丸

麦味地黄丸

Pinyin Name: *Mai Wei Di Huang Wan*

Literal Name: Ophiopogonis, Schisandra, and Rehmannia Pill

Alternate Names: *Ba Xian Chang Shou Wan* (Eight-Immortal Pill for Longevity), *Mai Wei Ti Huang Wan* (Ophiopogon-Flavoured Rehmannia Pill)

Original Source: *Yi Ji* (Levels of Medicine)

COMPOSITION

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	240g [24g]
<i>Shan Zhu Yu</i> (Fructus Corni)	120g [12g]
<i>Shan Yao</i> (Rhizoma Dioscoreae)	120g [12g]
<i>Ze Xie</i> (Rhizoma Alismatis)	90g [9g]
<i>Mu Dan Pi</i> (Cortex Moutan)	90g [9g]
<i>Fu Ling</i> (Poria)	90g [9g]
<i>Mai Dong</i> (Radix Ophiopogonis)	90g [9g]
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	60g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

Prepare and administer this formula as honey pills or in decoction form. The instructions for preparation and

administration for this formula are the same as *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia). For decoction, use the doses suggested in brackets.

Mài Wèi Dì Huáng Wán

(Ophiopogonis, Schisandra, and Rehmannia Pill)

CHINESE THERAPEUTIC ACTIONS

- 1. Nourishes Liver and Kidney yin
- 2. Astringes Lung qi and nourishes Lung yin

CLINICAL MANIFESTATIONS

Kidney and Lung yin deficiencies: coughing, shortness of breath, tidal fever, night sweats, plus the clinical manifestations of yin deficiency found in *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

CLINICAL APPLICATIONS

Diabetes mellitus, asthma, tidal fever, and night perspiration.

EXPLANATION

Mai Wei Di Huang Wan (Ophiopogonis, Schisandra and Rehmannia Pill) is a variation of *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), with the addition of *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) tonifies Liver and Kidney yin. *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) tonify Lung yin and stop coughing and shortness of breath.

PHARMACOLOGICAL EFFECTS

Hypoglycemic: In laboratory experiments, the use of *Mai Wei Di Huang Wan* had marked hypoglycemic effect if the plasma glucose level was between 180-350 mg/dL. However, it had little effect when the plasma glucose level was above 350 mg/dL.¹ While the exact mechanism of this

hypoglycemic effect is not well understood, it has been determined that administration of this formula does not increase plasma insulin levels, and that it still had marked hypoglycemic effect in dogs whose pancreas had been surgically removed.²

CLINICAL STUDIES AND RESEARCH

- 1. **Diabetes mellitus:** One study reported satisfactory results using *Mai Wei Di Huang Wan* to treat 20 patients with diabetes mellitus with elevated blood glucose levels (180-410 mg/dL), glucose in the urine (++ to +++), and ketone in the urine (in 8 of 20 patients).³
- 2. **Tidal fever and night perspiration:** In one study, 150 patients with tidal fever and night sweats associated with pulmonary tuberculosis were treated with good results. The herbal treatment contained *Mai Wei Di Huang Wan* plus *Sha Shen* (Radix Glehniae seu Adenophorae), *Bai He* (Bulbus Lilii), and *Yu Zhu* (Rhizoma Polygonati Odorati) as the base formula. *Huang Qi* (Radix Astragali) was added for qi deficiency; *Zi Wan* (Radix et Rhizoma Asteris) was added for dry cough, and *Shan Zhu Yu* (Fructus Corni) for severe night sweats. Of 150 patients, the study reported resolution of tidal fever and night sweats in 146 patients, and no effect in 4 patients.⁴

<i>Fu Ling</i> (Poria)	90g [9g]
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	60g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

Prepare and administer this formula as honey pills or in decoction form. For decoction, use the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Nourishes Kidney yin
- 2. Facilitates normal respiration

CLINICAL MANIFESTATIONS

Kidney yin deficiency accompanied by coughing and wheezing; dizziness, tinnitus, sore back, weak knees, coughing, and wheezing.

CLINICAL APPLICATIONS

Asthma, bronchial asthma, pulmonary emphysema, and pulmonary tuberculosis.

EXPLANATION

Du Qi Wan (Capital Qi Pill) is derived from *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia). Besides tonifying Kidney yin, this formula improves

respiration by invigorating Kidney qi. The Kidney assists Lung qi to descend in normal inspiration. If the Kidney is deficient, it is unable to grasp the qi and bring it down, giving rise to respiratory disorders. In addition to coughing and wheezing, other symptoms of Kidney yin deficiency, such as dizziness, tinnitus, sore back, and weak knees, might be present.

This formula consists of the six herbs of *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) plus *Wu Wei Zi* (Fructus Schisandrae Chinensis). *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) nourishes Liver and Kidney yin. *Wu Wei Zi* (Fructus Schisandrae Chinensis), a sour herb, tonifies the Kidney and astringes Lung qi to relieve coughing and wheezing. For more information on the functions of each individual herb in this formula, please refer to *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

CAUTIONS / CONTRAINDICATIONS

Please refer to *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

<i>Chuan Niu Xi</i> (Radix Cyathulae), <i>xi</i> (washed) with liquor and <i>zheng</i> (steamed)	90g [9g]
<i>Shan Yao</i> (Rhizoma Dioscoreae), <i>chao</i> (dry-fried)	120g [12g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text's instructions are to first steam *Shu Di Huang* (Radix Rehmanniae Praeparata) and smash it into a paste. Grind the other ingredients into powder, and mix it with the paste and honey to form small pills. Take one hundred or more pills with salted or boiled water before meals. Today, it is prepared by mixing the powdered herbs with honey to form pills, with each pill weighing about 15g. Take one pill on an empty stomach in the morning and at night with lightly-salted water. This formula may also be prepared as a decoction using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and replenishes marrow and *jing* (essence)
2. Tonifies the Kidney

CLINICAL MANIFESTATIONS

Kidney yin deficiency with depletion of marrow and *jing* (essence): dizziness, vertigo, tinnitus, soreness and weakness of the lower back and knees, night and/or spontaneous sweating, seminal emissions and/or spermatorrhea, dribbling of urine, thirst with desire to drink, a dry mouth and throat, a mirror-like tongue surface with little coating, and a fine or rapid pulse.

CLINICAL APPLICATIONS

Male sexual dysfunction, impotence, seminal emissions, spermatorrhea, infertility due to premature ovarian failure, uterine bleeding, amenorrhea, multiple neuritis, and polyneuritis.

EXPLANATION

Zuo Gui Wan (Restore the Left [Kidney] Pill) is designed to tonify Kidney yin and replenish marrow and *jing* (essence). Because the brain is the sea of marrow, marrow deficiency may result in dizziness and vertigo. Kidney deficiency often causes deficiency of the lower body, leading to weak knees and sore back. Night and spontaneous sweating occur as deficiency heat forces body fluids outward, while a dry mouth and throat and thirst indicate general yin deficiency and insufficiency of body fluids. Seminal emissions and/or spermatorrhea are the result of deficiency fire causing the *jing* to leak out. A mirror-like tongue surface with little coating indicates severe yin deficiency. A fine pulse is a typical sign of yin deficiency.

This formula contains *Shu Di Huang* (Radix Rehmanniae Praeparata) to tonify the Kidney, nourish yin and replenish *jing* (essence). *Gou Qi Zi* (Fructus Lycii) nourishes the Liver, tonifies the Kidney, and improves vision. *Shan Zhu Yu* (Fructus Corni) has a sour taste, and astringes yin and body fluids to prevent further loss. *Gui Ban Jiao* (Gelatinum Plastrum Testudinis) and *Lu Jiao Jiao* (Colla Cornus Cervi) are two animal substances that have a very strong effect in nourishing the Kidney and tonifying the yin, yang and *jing* (essence). *Tu Si Zi* (Semen Cuscutae) combines with *Chuan Niu Xi* (Radix Cyathulae) to tonify the Kidney and strengthen the lower body to relieve sore low back and weak knees. *Shan Yao* (Rhizoma Dioscoreae) tonifies the Kidney and strengthens the Spleen.

Zuǒ Guī Wán (Restore the Left [Kidney] Pill)

Zuo Gui Wan (Restore the Left [Kidney] Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Kidney yin deficiency with depletion of marrow and <i>jing</i> (essence)	<ul style="list-style-type: none"> • Dizziness and vertigo: marrow deficiency of the brain • Weak knees, sore back, night sweats, a dry mouth and throat, and thirst: yin deficiency • Seminal emissions and/or spermatorrhea: deficiency fire pushing <i>jing</i> outward • Mirror-like tongue surface with little coating, and a fine pulse: severe yin deficiency 	<ul style="list-style-type: none"> • Nourishes yin • Tonifies the Kidney 	<ul style="list-style-type: none"> • <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) tonifies the Kidney, nourishes yin, and replenishes <i>jing</i>. • <i>Gou Qi Zi</i> (Fructus Lycii) nourishes the Liver, tonifies the Kidney, and improves vision. • <i>Shan Zhu Yu</i> (Fructus Corni) astringes yin and body fluids. • <i>Gui Ban Jiao</i> (Gelatinum Plastrum Testudinis) and <i>Lu Jiao Jiao</i> (Colla Cornus Cervi) nourish the Kidney and tonify yin, yang and <i>jing</i> (essence). • <i>Tu Si Zi</i> (Semen Cuscutae) and <i>Chuan Niu Xi</i> (Radix Cyathulae) tonify the Kidney and strengthen the lower body to relieve sore back and weak knees. • <i>Shan Yao</i> (Rhizoma Dioscoreae) tonifies the Kidney and strengthens the Spleen.

MODIFICATIONS

- For dry cough with scanty sputum, add *Bai He* (Bulbus Lilii).
- With tidal fever and steaming bones sensations, add *He Shou Wu* (Radix Polygoni Multiflori).
- With steaming bones sensations with fever at night, add *Di Gu Pi* (Cortex Lycii).
- With blood deficiency, add *He Shou Wu* (Radix Polygoni Multiflori) and *Huang Jing* (Rhizoma Polygonati).
- With qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- With flaring of deficiency fire, remove *Gou Qi Zi* (Fructus Lycii) and *Lu Jiao Jiao* (Colla Cornus Cervi), and add *Nu Zhen Zi* (Fructus Ligustri Lucidi) and *Mai Dong* (Radix Ophiopogonis).
- With dry stools, remove *Tu Si Zi* (Semen Cuscutae) and add *Rou Cong Rong* (Herba Cistanches).
- For irritability arising from Lung heat, add *Mai Dong* (Radix Ophiopogonis).
- If there is dryness caused by Heart heat, add *Xuan Shen* (Radix Scrophulariae).

CAUTIONS / CONTRAINDICATIONS

- *Zuo Gui Wan* mostly consists of stagnating herbs that could produce dampness inside the body, causing symptoms such as an uncomfortable sensation in the epigastrium, indigestion, and poor appetite. For patients with Spleen qi deficiency, qi-activating herbs such as *Sha Ren* (Fructus Amomi) and *Chen Pi* (Pericarpium Citri Reticulatae) can be added to prevent damp accumulation.
- This formula is not recommended for prolonged use, since most of the herbs are yin tonics that are stagnating in nature, and may impair Spleen and Stomach functions

and cause diarrhea or loose stools. *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) is a more balanced and more suitable yin tonic for long-term use.

PHARMACOLOGICAL EFFECTS

Reproductive: Administration of *Zuo Gui Wan* in male mice had a dose-dependant effect to increase plasma testosterone levels and weight of the testicles.¹

CLINICAL STUDIES AND RESEARCH

1. **Male sexual dysfunction:** Administration of *Zuo Gui Wan* effectively treated 7 men with sexual dysfunction characterized by Kidney deficiency with symptoms such as dizziness, tinnitus, soreness and weakness of the lower back and knees, night perspiration, seminal emissions, spermatorrhea, a dry mouth and tongue, a feeling of warmth at the center of the palms and soles, and decreased levels of testosterone. After herbal therapy, the study reported relief of signs and symptoms, and normalization of plasma testosterone levels.²
2. **Infertility due to premature ovarian failure:** According to one case report, a woman with premature ovarian failure and secondary amenorrhea for 8 years was treated with good results. The patient began to ovulate 3 months after treatment with modified *Zuo Gui Wan*. The patient then switched to clomiphene citrate. During the eight-month treatment with clomiphene citrate, there was no ovulation or conception, and the concentrations of follicle stimulating hormone and luteinizing hormone were still in the postmenopausal range. The patient then switched back to modified *Zuo Gui Wan*, and pregnancy was reported in one month. Based on this finding, the researchers suggested that *Zuo Gui Wan* may restore ovarian function

Zuǒ Guī Wán (Restore the Left [Kidney] Pill)

effectively and promptly, and offers another option for treating infertility in patients with premature ovarian failure. Note: Modified *Zuo Gui Wan* used in this report contained *Shu Di Huang* (Radix Rehmanniae Praeparata), *Shan Yao* (Rhizoma Dioscoreae), *Gou Qi Zi* (Fructus Lycii), *Shan Zhu Yu* (Fructus Corni), *Chuan Niu Xi* (Radix Cyathulae), *Tu Si Zi* (Semen Cuscutae), *Lu Jiao Jiao* (Colla Cornus Cervi), *Gui Ban Jiao* (Gelatinum Plastrum Testudinis), *Yin Yang Huo* (Herba Epimedii), and *Ba Ji Tian* (Radix Morindae Officinalis).³

3. **Uterine bleeding:** One study reported significant improvement in 17 of 22 patients using modified *Zuo Gui Wan* to treat uterine bleeding characterized by Kidney yin and/or yang deficiencies.⁴ In another study, use of modified *Zuo Gui Wan* was associated with complete recovery in 38 of 45 patients with uterine bleeding. Modifications included the addition of *Er Zhi Wan* (Two-Ultimate Pill) for profuse bleeding due to yin deficiency and heat in the blood; *Bei Sha Shen* (Radix Glehniae) and *Huang Qi* (Radix Astragali) for qi deficiency; and the addition of *E Jiao* (Colla Corii Asini) and *Bai Shao* (Radix Paeoniae Alba), with the removal of *Lu Jiao Jiao* (Colla Cornus Cervi), for blood deficiency.⁵
4. **Amenorrhea:** Use of modified *Zuo Gui Wan* was effective in treating 9 of 14 patients with amenorrhea caused by Kidney yin deficiency. The duration of treatment was one month per course of treatment, for 2-3 courses.⁶
5. **Multiple neuritis:** In one study, 56 patients (between 15-58 years of age) with multiple neuritis were treated with modified *Zuo Gui Wan*. The history of illness ranged from 2 months to 1 year. The formula included *Shu Di Huang* (Radix Rehmanniae Praeparata) 20g, *Shan Yao* (Rhizoma Dioscoreae) 20g, *Sang Ji Sheng* (Herba Taxilli) 20g, *Shan Zhu Yu* (Fructus Corni) 15g, *Tu Si Zi* (Semen Cuscutae) 15g, *Gou Qi Zi* (Fructus Lycii) 15g, *Chuan Niu Xi* (Radix Cyathulae) 15g, *Du Zhong* (Cortex Eucommiae) 15g, *Wei Ling Xian* (Radix et Rhizoma Clematidis) 15g, *Qin Jiao* (Radix Gentianae Macrophyllae) 15g, *Dang Gui* (Radix Angelicae Sinensis) 15g, and *Chuan Xiong* (Rhizoma Chuanxiong) 10g. Other modifications were made if deemed necessary. The treatment protocol was to administer the herbs in decoction twice daily in the morning and at night. Out of 56 patients, the study reported recovery in 42 cases and improvement in 14 cases.⁷
6. **Polyneuritis:** Administration of modified *Zuo Gui Wan* in 56 patients with polyneuritis was associated with complete recovery in 42 cases and improvement in 14 cases. For Liver and Kidney deficiencies, *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) were removed, and *Zhi Mu* (Rhizoma Anemarrhenae) and *Gui Ban* (Plastrum Testudinis) were added. For Spleen and Stomach deficiencies, *Shu Di Huang* (Radix Rehmanniae

Praeparata) and *Shan Zhu Yu* (Fructus Corni) were removed, and *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), and *Fu Ling* (Poria) were added.⁸

The source text states to cook the ingredients with two bowls of water until the liquid is reduced to 70%. Take the decoction between meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Zuo Gui Yin (Restore the Left [Kidney] Decoction) tonifies and benefits Kidney yin. Clinical manifestations include soreness of the lower back, seminal emissions and/or spermatorrhea, night sweats, a dry mouth and throat, thirst with desire to drink, a red tongue body with a mirror-like appearance, and a fine, rapid pulse.

Zuo Gui Wan (Restore the Left [Kidney] Pill) and *Zuo Gui Yin* (Restore the Left [Kidney] Decoction) have similar compositions and functions to treat Kidney yin deficiency.

- *Zuo Gui Wan* is a stronger formula, and is used for severe cases of Kidney yin deficiency.
- *Zuo Gui Yin* is less potent, and is used for mild to moderate cases of Kidney yin deficiency.

Tu Si Zi (Semen Cuscutae)

Mo Han Lian (Herba Ecliptae)

Sang Shen (Fructus Mori)

Huang Jing (Rhizoma Polygonati)

Nu Zhen Zi (Fructus Ligustri Lucidi)

Gan Cao (Radix et Rhizoma Glycyrrhizae)

Jia Wei Zuo Gui Wan (Augmented Restore the Left [Kidney] Pill) is a slight variation of the original *Zuo Gui Wan* (Restore the Left [Kidney] Pill). In addition to tonifying Kidney yin, *Jia Wei Zuo Gui Wan* (Augmented Restore the Left [Kidney] Pill) also nourishes Lung and Liver yin. This formula is most useful for patients with chronic illnesses who exhibit yin deficiency of the Kidney, Liver and Lung.

AUTHORS' COMMENTS

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia) and *Zuo Gui Wan* are both designed to nourish yin, especially Kidney yin manifesting in soreness and weakness of the back and knees, dizziness, a dry mouth and dry throat, seminal emissions, night sweats, a red tongue body with a scanty tongue coating, and a fine pulse. Both formulas contain *Shu Di Huang* (Radix Rehmanniae Praeparata), *Shan Yao* (Rhizoma Dioscoreae), and *Shan Zhu Yu* (Fructus Corni) to nourish the Liver and strengthen the Spleen. Their differences are as follows:

- *Liu Wei Di Huang Wan* is a moderate Kidney yin tonic. It contains three tonic herbs, listed above, and three sedating herbs: *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), and *Mu Dan Pi* (Cortex Moutan), which clear turbid water from the Kidney, promote water excretion, and clear heat respectively. They prevent the tonics from creating stagnating side effects. *Liu Wei Di Huang Wan* has a proper balance of tonifying and sedating herbs to prevent stagnation. This is a more harmonious and balanced formula that can be taken for a long period of time.
- *Zuo Gui Wan* is a very strong Kidney tonic, and is used for depletion of yin and *jing* (essence). It contains *Shu Di Huang* (Radix Rehmanniae Praeparata) at double the dose in *Liu Wei Di Huang Wan* (Six-Ingredient Pill with

Rehmannia), making *Zuo Gui Wan* richer. Most of the herbs in this formula are Kidney yin and *jing* tonics with no sedating herbs: *Tu Si Zi* (Semen Cuscutae), *Chuan Niu Xi* (Radix Cyathulae), *Gou Qi Zi* (Fructus Lycii), *Lu Jiao Jiao* (Colla Cornus Cervi), and *Gui Ban Jiao* (Gelatinum Plastrum Testudinis). Therefore, it should be used to immediately boost depleted yin and *jing*. However, this formula is not suitable for long-term use.⁹

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia) differs from *Zuo Gui Wan* (Restore the Left [Kidney] Pill) in the same way *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia) differs from *You Gui Wan* (Restore the Right [Kidney] Pill).

- *Zuo Gui Wan* and *You Gui Wan* both tonify the Kidney without sedation. Thus, they have a more potent and immediate tonifying effect, and are more suitable for treating acute and severe cases.
- *Liu Wei Di Huang Wan* and *Ba Wei Di Huang Wan* tonify and sedate the Kidney at the same time. They have a moderate tonifying effect, and are suitable for long-term use to treat chronic deficiency.

Zuo Gui Wan (Restore the Left [Kidney] Pill) and *You Gui Wan* (Restore the Right [Kidney] Pill) have similar names and functions. These formulas may be used singularly, or in combination.

- *Zuo Gui Wan* tonifies Kidney yin.
- *You Gui Wan* tonifies Kidney yang.

Dà Bǔ Yīn Wán (Great Tonify the Yin Pill)

大補陰丸
大补阴丸

Pinyin Name: *Da Bu Yin Wan*

Literal Name: Great Tonify the Yin Pill

Alternate Names: *Da Bu Wan* (Great Tonify Pill), *Ta Pu Yin Wan*, Major Yin-Nourishing Pill, Rehmannia Combination

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>zheng</i> (steamed) with liquor	180g [18g]
<i>Gui Ban</i> (Plastrum Testudinis), <i>zhi</i> (fried with liquid) till crisp	180g [18g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis), <i>chao</i> (dry-fried) to brown	120g [12g]
<i>Zhi Mu</i> (Rhizoma Anemarrhenae), <i>jin</i> (soaked) in liquor and <i>chao</i> (dry-fried)	120g [12g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into powder, mix with honey and bone marrow from pigs' vertebrae, and form into pills. Take 70 pills with salted water on an empty stomach. Today, this formula is usually prepared by grinding all of the ingredients into a fine powder. Steam the bone marrow from the pigs' vertebrae until it is fully cooked, and then smash it into a paste. Mix the powdered herbs, marrow paste, and honey and form into pills. The pills should weigh 15g each. Take 1 pill in the morning and at night with lightly-salted water. Today, this formula may be prepared as a decoction using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Nourishes yin and clears deficiency fire

CLINICAL MANIFESTATIONS

Liver and Kidney yin deficiencies with deficiency fire rising upward: steaming bones sensation, tidal fever,

night sweats, seminal emissions, atrophy and weakness of the knees and legs, coughing with or without blood, fidgeting, irritability, a short temper, decreased sleep with frequent dreams, nocturnal emissions, a red tongue body with a scanty coating, and a rapid, forceful pulse at the *chi* position.

CLINICAL APPLICATIONS

Diabetes mellitus, hyperthyroidism, bronchiectasis, seminal emissions, epididymitis, urinary tract infection, and tuberculosis of the lungs, kidneys, and bones.

EXPLANATION

Da Bu Yin Wan (Great Tonify the Yin Pill) is designed to treat Liver and Kidney yin deficiencies with deficiency fire rising upward. Yin deficiency may lead to deficiency fire rising, causing symptoms such as steaming bones sensation, tidal fever, night sweats, and seminal emissions. Atrophy and weakness of the knees and legs are caused by Liver and Kidney yin deficiencies. If deficiency fire flares

Da Bu Yin Wan (Great Tonify the Yin Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver and Kidney yin deficiencies with deficiency fire rising upward	<ul style="list-style-type: none">• Steaming bones sensation, tidal fever, night sweats, and seminal emissions: yin-deficient fire rising• Atrophy and weakness of the knees and legs: Liver and Kidney yin deficiencies unable to nourish the bones and tendons• Fidgeting, irritability, a short temper, decreased sleep with frequent dreams: yin-deficient fire disturbing the Heart• Red tongue body with a scanty coating and a rapid, forceful pulse: yin-deficient fire rising	Nourishes yin and clears deficient fire	<ul style="list-style-type: none">• <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) tonifies yin and replenishes <i>jing</i> (essence).• <i>Gui Ban</i> (Plastrum Testudinis) nourishes yin and anchors yang to control deficiency fire.• <i>Huang Bo</i> (Cortex Phellodendri Chinensis) strongly sedates deficiency fire.• <i>Zhi Mu</i> (Rhizoma Anemarrhenae) clears deficiency fire and moistens the Lung and Kidney.

Dà Bǔ Yīn Wán (Great Tonify the Yin Pill)

up to affect the Lung, coughing may occur. Bleeding can also accompany the cough if the deficiency fire damages the vessels. Similarly, if the deficiency fire flares up to affect the Heart, fidgeting, irritability and sleep disturbance may occur. A red tongue body with a scanty coating is representative of yin deficiency. A rapid, forceful pulse may be present if the deficiency fire flares up and causes acute symptoms. The rapid, forceful pulse at the *chi* position indicates the severity of the deficiency fire.

Shu Di Huang (Radix Rehmanniae Praeparata) tonifies yin and replenishes *jing* (essence). *Gui Ban* (Plastrum Testudinis) nourishes yin and anchors yang to control deficiency fire. Both greatly tonify the true yin of the body and thus help control the rising of deficiency fire. *Huang Bo* (Cortex Phellodendri Chinensis) strongly sedates deficiency fire. *Zhi Mu* (Rhizoma Anemarrhenae) clears deficiency fire and moistens the Lung and Kidney. Indeed, this formula consists of strong tonics to nourish Liver and Kidney yin, and sedating herbs to control the rising of deficiency fire. Bone marrow and honey nourish yin, replenish *jing*, and generate body fluids.

MODIFICATIONS

- If there is more yin deficiency, add *Mai Dong* (Radix Ophiopogonis) and *Tian Dong* (Radix Asparagi).
- With night sweats, add *Fu Xiao Mai* (Fructus Triticis Levis) and calcined *Mu Li* (Concha Ostreae).
- For spermatorrhea or nocturnal emissions, add *Jin Ying Zi* (Fructus Rosae Laevigatae), *Qian Shi* (Semen Euryales), and *Sang Piao Xiao* (Ootheca Mantidis).
- With sputum that is difficult to expectorate, add *Bai Bu* (Radix Stemonae) and *Kuan Dong Hua* (Flos Farfarae).
- With cough with sputum that is difficult to expectorate, add *Bai Bu* (Radix Stemonae) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).
- With cough or vomiting with blood, add *Xian He Cao* (Herba Agrimoniae), *Bai Mao Gen* (Rhizoma Imperatae), and *Ce Bai Ye* (Cacumen Platycladi).

CAUTIONS / CONTRAINDICATIONS

- *Da Bu Yin Wan* is contraindicated in Spleen and/or Stomach deficiencies with loose stools and poor appetite.
- This formula is contraindicated in patients with excess heat and fire.
- Avoid foods that are pungent and spicy.¹

CLINICAL STUDIES AND RESEARCH

1. **Pulmonary tuberculosis:** In one study, modified *Da Bu Yin Wan* was used to treat 10 patients with coughing of blood due to pulmonary tuberculosis. The diagnosis according to traditional Chinese medicine was Lung and

Kidney yin deficiencies leading to deficiency fire attacking the Lung. The herbal formula included *Di Huang* (Radix Rehmanniae) 12g, *Shu Di Huang* (Radix Rehmanniae Praeparata) 12g, charred *Zhi Zi* (Fructus Gardeniae) 6g, *Zhi Mu* (Rhizoma Anemarrhenae) 6g, *Gui Ban* (Plastrum Testudinis) 30g, *Mai Dong* (Radix Ophiopogonis) 15g, *Niu Xi* (Radix Achyranthis Bidentatae) 9g, *Pi Pa Ye* (Folium Eriobotryae) 9g, *Ce Bai Ye* (Cacumen Platycladi) 30g, and *Mo Han Lian* (Herba Ecliptae) 30g. Out of 10 patients, the study reported successful cessation of bleeding in 9 patients.²

2. **Epididymitis:** In one study, 18 patients with acute or chronic epididymitis were treated with modified *Da Bu Yin Wan* with good results. The formula included *Da Bu Yin Wan* with the addition of *Jin Yin Hua* (Flos Lonicerae Japonicae) 30g and *Li Zhi He* (Semen Litchi) 20g. In addition, *Xuan Shen* (Radix Scrophulariae) 30g, *Hai Zao* (Sargassum) 15g, and *Mu Dan Pi* (Cortex Moutan) 5g were added for swelling and pain of the testicles. *Chuan Lian Zi* (Fructus Toosendan) 6g and *Yan Hu Suo* (Rhizoma Corydalis) 6g were added for pain radiating to the abdomen and lower back. *Hai Zao* (Sargassum) 15g and *Chuan Lian Zi* (Fructus Toosendan) 20g were added for swelling, pain, and hardness in the affected area. Lastly, *Bai Jiang Cao* (Herba cum Radice Patriniae) 30g was added for fever. Treatment lasted from 5-55 days. The study reported recovery in all patients, with testicle size returning to normal. No recurrences were reported in any of the 10 patients who returned for a follow-up one year later.³
3. **Urinary tract infection:** In one study, modified *Da Bu Yin Wan* effectively treated urinary tract infection. Modifications to the formula included the addition of *Qu Mai* (Herba Dianthi) and *Che Qian Zi* (Semen Plantaginis) for painful urination; *Zhi Qiao* (Fructus Aurantii) for lower abdominal distention and urinary urgency; *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) and *Yi Yi Ren* (Semen Coicis) for hematuria; *Xuan Shen* (Radix Scrophulariae) and *Shi Hu* (Caulis Dendrobii) for a red tongue body and lack of fluids; and injection of *Chai Hu* (Radix Bupleuri) for high fever. The study reported a 77.7% success rate (70 out of 90 patients) in treating urinary tract infection.⁴

AUTHORS' COMMENTS

Da Bu Yin Wan is an important formula that nourishes Liver and Kidney yin and clears deficiency fire. The key signs and symptoms include steaming bones sensation, tidal fever, night sweats, a red tongue body with a scanty coating, and a fine, rapid pulse.

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia) and *Da Bu Yin Wan* both nourish yin.

Dà Bǔ Yīn Wán (Great Tonify the Yīn Pill)

- *Liu Wei Di Huang Wan* is a more neutral tonic to replenish Kidney yin.
- *Da Bu Yin Wan* strongly sedates deficiency fire with depletion of yin.⁵

Please refer to *Bu Fei E Jiao Tang* (Tonify the Lung Decoction with Ass-Hide Gelatin) for a comparative analysis with *Da Bu Yin Wan* and *Sheng Mai San* (Generate the Pulse Powder).

Hǔ Qián Wán (Hidden Tiger Pill)

虎潛丸
虎潜丸

Pinyin Name: *Hu Qian Wan*

Literal Name: Hidden Tiger Pill

Alternate Name: Phellodendron Formula

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Huang Bo</i> (Cortex Phellodendri Chinensis), <i>chao</i> (dry-fried) with liquor	240g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae), <i>chao</i> (dry-fried) with liquor	60g
<i>Gui Ban</i> (Plastrum Testudinis), <i>zhi</i> (fried) with liquor	120g
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	60g
<i>Bai Shao</i> (Radix Paeoniae Alba)	60g
<i>Hu Gu</i> (Os Tigris), <i>zhi</i> (fried) with liquid	30g
<i>Suo Yang</i> (Herba Cynomorii)	45g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	60g
<i>Gan Jiang</i> (Rhizoma Zingiberis)	15g

Note: *Hu Gu* (Os Tigris) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with *Zhu Gu* (Os Porcus) which has similar functions.

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and form into pills with grain-based alcohol. Today, this formula is usually prepared by mixing the powdered herbs with honey to form pills, which should weigh 10g each. Take 1 pill in the morning and at night with lightly-salted water or warm water.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin, and lowers and clears deficiency fire
2. Strengthens sinews and bones

CLINICAL MANIFESTATIONS

Weakness and atrophy of the bones and tendons associated with Liver and Kidney yin-deficient fire: weakness and soreness of the lower back, legs, and knees; weakness of the sinews and bones; atrophy of the muscles, sinews, and bones in the extremities; a red tongue body with little coating, and a fine, weak pulse.

CLINICAL APPLICATIONS

Sequelae of polio or stroke with numbness, weakness, and atrophy of the extremities; atrophy and degeneration of the nervous system, atrophy and degeneration of

Hǔ Qián Wán (Hidden Tiger Pill)

the reproductive system, lumbago, tuberculosis of the knee, muscle atrophy, flaccidity of muscles and bones, post-stroke complications, chronic arthritis, lateral spinal sclerosis, and hypocalcemia.

EXPLANATION

Hu Qian Wan (Hidden Tiger Pill) treats *wei zheng* (atrophy syndrome) with severe weakness and atrophy of the sinews and bones arising from Kidney yin deficiency, Liver blood deficiency, and yin-deficient fire. The Kidney controls the bones, and the Liver controls the sinews and tendons. If the Kidney and Liver are deficient, the bones and tendons may become weak and deficient as well. Deficiency fire dries yin and blood, causing malnourishment of the sinews. Prolonged lack of nourishment of the sinews leads to stiffness and spasms of the sinews, which can eventually progress to atrophy. Weak bones and tendons may lead to soreness of the lower back and knees, as well as weak legs and weakening of the leg muscles. A red tongue body with little coating indicates deficiency fire, and a fine, weak pulse suggests that the bones and tendons are becoming deficient.

Huang Bo (Cortex *Phellodendri Chinensis*) and *Zhi Mu* (Rhizoma *Anemarrhenae*) clear deficiency fire and strengthen yin of the lower *jiao*. *Gui Ban* (Plastrum *Testudinis*) nourishes Kidney yin, and replenishes *jing* (essence) and marrow. *Shu Di Huang* (Radix *Rehmanniae Praeparata*) and *Bai Shao* (Radix *Paeoniae Alba*) nourish yin and tonify the blood. *Hu Gu* (Os *Tigris*) strengthens the sinews and bones. *Suo Yang* (Herba *Cynomorii*) nourishes Kidney yang and *jing*. *Chen Pi* (Pericarpium *Citri Reticulatae*) and *Gan Jiang* (Rhizoma *Zingiberis*) strengthen the Spleen and harmonize the middle *jiao* to

prevent the cold and stagnating herbs from damaging the digestive system.

MODIFICATIONS

- If there is more deficiency heat, use *Di Huang* (Radix *Rehmanniae*) instead of *Shu Di Huang* (Radix *Rehmanniae Praeparata*).
- With atrophy and weakness of the muscles due to blood deficiency, add *Chuan Xiong* (Rhizoma *Chuanxiong*) and *Du Zhong* (Cortex *Eucommiae*).
- With atrophy and weakness of the muscles due to qi deficiency, add *Ren Shen* (Radix et Rhizoma *Ginseng*) and *Huang Qi* (Radix *Astragali*).
- With atrophy and weakness of the muscles due to *jing* (essence) deficiency, add *Lu Jiao Shuang* (Cornu *Cervi Degelatinatum*) and *Rou Cong Rong* (Herba *Cistanches*).
- For seminal emissions, add *Long Gu* (Os *Draconis*) and *Mu Li* (Concha *Ostreae*).

CAUTIONS / CONTRAINDICATIONS

Hu Qian Wan is contraindicated in patients with atrophy caused by damp-heat invasion.

CLINICAL STUDIES AND RESEARCH

1. **Muscle atrophy and lateral spinal sclerosis:** It has been reported that *Hu Qian Wan* plus *Ren Shen* (Radix et Rhizoma *Ginseng*) and *Huang Qi* (Radix *Astragali*) is effective in treating muscle atrophy and lateral spinal sclerosis, especially if the conditions are characterized by yin and yang deficiencies.¹
2. **Hypocalcemia:** Use of modified *Hu Qian Wan* was associated with good therapeutic effect in treating 15 patients with low plasma calcium levels following thyroidectomy. The formula contained *Huang Bo* (Cortex *Phellodendri*

Hu Qian Wan (Hidden Tiger Pill)

Chinensis) 12g, *Zhi Mu* (Rhizoma Anemarrhenae) 6g, *Suo Yang* (Herba Cynomorii) 6g, *Shu Di Huang* (Radix Rehmanniae Praeparata) 9g, *Bai Shao* (Radix Paeoniae Alba) 9g, *Gui Ban* (Plastrum Testudinis) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Gan Jiang* (Rhizoma Zingiberis) 15g, *Long Gu* (Os Draconis) 18g, *Mu Li* (Concha Ostreae) 30g, *E Jiao* (Colla Corii Asini) 30g, and lamb 15g. Additional modifications were made if necessary. Of 15 cases, the study reported complete recovery in 8 cases, improvement in 4 cases, and no change in 3 cases.²

RELATED FORMULA

Hǔ Qián Wán (Hidden Tiger Pill)

虎潜丸
虎潜丸

Pinyin Name: *Hu Qian Wan*

Literal Name: Hidden Tiger Pill

Original Source: *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682

<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	[240g]
<i>Gui Ban</i> (Plastrum Testudinis)	[120g]
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	[60g]
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	[60g]
<i>Niu Xi</i> (Radix Achyranthis Bidentatae)	[60g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	[60g]
<i>Suo Yang</i> (Herba Cynomorii)	[45g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	[60g]
<i>Hu Gu</i> (Os Tigris)	[30g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	[15g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	[45g]

Note: *Hu Gu* (Os Tigris) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with *Zhu Gu* (Os Porcus) which has similar functions.

The source text states to grind the ingredients into powder and form into pills with lamb. Take the pills with lightly-salted water. This formula nourishes yin, tonifies blood, and lowers and clears deficiency fire. It treats weakness and atrophy of the bones and tendons associated with Liver and Kidney yin-deficient fire.

Huang Bo (Cortex Phellodendri Chinensis) and *Zhi Mu* (Rhizoma Anemarrhenae) clear deficiency fire and strengthens yin of the lower *jiao*. *Gui Ban* (Plastrum Testudinis) nourishes yin and lamb strengthens yang.

Shu Di Huang (Radix Rehmanniae Praeparata) and *Bai Shao* (Radix Paeoniae Alba) nourish yin, and *Dang Gui* (Radix Angelicae Sinensis) tonifies blood. *Hu Gu* (Os Tigris) strengthens the sinews and bones. *Suo Yang* (Herba Cynomorii) nourishes Kidney yang and *jing* (essence). *Chen Pi* (Pericarpium Citri Reticulatae) and *Gan Jiang* (Rhizoma Zingiberis) strengthen the Spleen and harmonize the middle *jiao* to prevent the cold and stagnating herbs from damaging the digestive system. Lastly, *Niu Xi* (Radix Achyranthis Bidentatae) strengthens the tendons and bones, and guides the formula downwards to the affected areas.

These two formulas have the same names and similar ingredients.

- *Hu Qian Wan* from *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) is considered to be the original formula, since it was formulated approximately 200 years earlier.
- *Hu Qian Wan* from *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) is more commonly used today, as it is a more balanced and more effective formula. It contains additional herbs, such as lamb to strengthen yang, *Dang Gui* (Radix Angelicae Sinensis) to tonify blood, and *Niu Xi* (Radix Achyranthis Bidentatae) to guide the formula to the affected areas.

AUTHORS' COMMENTS

Hu Qian Wan, a formula designed to treat Liver and Kidney yin deficiencies with weakness of the bones and tendons, uses *Gan Jiang* (Rhizoma Zingiberis) for three important reasons:

- *Gan Jiang* (Rhizoma Zingiberis) counters the bitter and cold effects of *Huang Bo* (Cortex Phellodendri Chinensis).
- *Gan Jiang* (Rhizoma Zingiberis) assists *Chen Pi* (Pericarpium Citri Reticulatae) in warming the middle *jiao*, strengthening the Spleen, regulating qi, and harmonizing the Stomach. Together, these two herbs prevent the yin tonics from creating stagnation in the middle *jiao*.
- *Gan Jiang* (Rhizoma Zingiberis) facilitates the generation of blood. According to Master Zhu Dan-Xi, it enters the Lung to benefit Lung qi, and enters the Liver channel to assist blood tonics in generating blood.³

Hu Qian Wan and *Da Bu Yin Wan* (Great Tonify the Yin Pill) both tonify Kidney yin, sedate fire, and contain *Shu Di Huang* (Radix Rehmanniae Praeparata), *Gui Ban* (Plastrum Testudinis), *Huang Bo* (Cortex Phellodendri Chinensis), and *Zhi Mu* (Rhizoma Anemarrhenae). Their differences are:

- *Hu Qian Wan* nourishes yin, sedates fire, and strengthens tendons and bones to treat yin-deficient heat in the Liver

Hǔ Qián Wán (Hidden Tiger Pill)

and Kidney, with *jing* (essence) and blood deficiencies causing atrophy or degeneration of the bones, tendons, and connective tissues.

- **Da Bu Yin Wan** treats Liver and Kidney yin deficiencies with deficiency fire symptoms of steaming bones sensation, tidal fever, cough with blood, a red tongue body with a scanty tongue coating, and a rapid, forceful pulse.⁴

Èr Zhì Wán (Two-Ultimate Pill)

二至丸

Pinyin Name: *Er Zhi Wan*

Literal Name: Two-Ultimate Pill

Alternate Name: Ligustrum and Eclipta Combination

Original Source: *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682

COMPOSITION

Nu Zhen Zi (Fructus Ligustri Lucidi)

500g

Mo Han Lian (Herba Ecliptae)

500g

DOSAGE / PREPARATION / ADMINISTRATION

The source text specifies that *Nu Zhen Zi* (Fructus Ligustri Lucidi) should be picked at the winter solstice, and *Mo Han Lian* (Herba Ecliptae) at the summer solstice. Blend *Nu Zhen Zi* (Fructus Ligustri Lucidi) with honey and liquor and steam until it is fully cooked. Allow it to dry in a cool place without direct exposure to sunlight, then grind it into a fine powder, and filter it through a sieve. Cook *Mo Han Lian* (Herba Ecliptae) with *Sang Shen* (Fructus Mori) in water three times, discard the herb residue, and then cook the strained decoction further until it becomes a thick paste. Mix the *Nu Zhen Zi* (Fructus Ligustri Lucidi) powder and the *Mo Han Lian* (Herba Ecliptae) paste with honey to form pills, which should weigh 15g each. Take 1 pill in the morning and 1 at night with warm, boiled water.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney and nourishes the Liver
2. Nourishes yin and blood

CLINICAL MANIFESTATIONS

Kidney and Liver yin deficiencies: dizziness, blurred vision, a bitter taste in mouth, a dry throat, insomnia, excessive dreams, soreness and weakness of the lower back and knees, gradual atrophy of the lower limbs, nocturnal emissions, premature graying of hair, and hypermenorrhea.

CLINICAL APPLICATIONS

Chronic nephritis, aplastic anemia, hepatitis B, threatened miscarriage, neurasthenia, insomnia, palpitations, and bleeding disorders (hemoptysis, hematochezia, hematuria, and excessive menstrual bleeding).

EXPLANATION

Er Zhi Wan (Two-Ultimate Pill) treats Kidney and Liver yin deficiencies. Because the Liver opens to the eyes, Liver yin deficiency may cause dizziness and blurred vision. The Kidney channel reaches to the throat and tongue area, which may become dry as a result of Kidney yin and blood deficiencies. Kidney yin deficiency could lead to instability of yang, which would then affect the *shen* (spirit) to cause insomnia and excessive dreams. Yang instability could also give rise to leakage of essence, which manifests as nocturnal emissions. Since the Kidney is located in the lower back, Kidney deficiency may lead to weakness and soreness of the lower back and knees. Atrophy of the lower limbs is due to Kidney *jing* (essence) deficiency and lack of nourishment.

Nu Zhen Zi (Fructus Ligustri Lucidi) tonifies both Liver and Kidney yin and brightens the eyes. *Mo Han Lian* (Herba Ecliptae) is sweet, sour, and cold. It nourishes yin and consolidates *jing* (essence). *Sang Shen* (Fructus Mori)

Èr Zhì Wán (Two-Ultimate Pill)

Er Zhi Wan (Two-Ultimate Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Kidney and Liver yin deficiencies	<ul style="list-style-type: none"> • Dizziness, blurred vision, premature gray hair, soreness and weakness of the lower back and knees, atrophy of the lower limbs: Kidney and Liver yin deficiencies • Insomnia and excessive dreaming: deficiency heat disturbing the <i>shen</i> (spirit) • Nocturnal emissions and hypermenorrhea: leakage of body fluids 	<ul style="list-style-type: none"> • Tonifies the Kidney and nourishes the Liver • Nourishes yin and blood 	<ul style="list-style-type: none"> • <i>Nu Zhen Zi</i> (Fructus Ligustri Lucidi) tonifies both Liver and Kidney yin. • <i>Mo Han Lian</i> (Herba Ecliptae) nourishes yin and consolidates <i>jing</i> (essence). • <i>Sang Shen</i> (Fructus Mori) nourishes yin and tonifies the blood.

nourishes yin and tonifies the blood, and strengthens the overall effect of the formula.

CAUTIONS / CONTRAINDICATIONS

- *Er Zhi Wan* is contraindicated in patients with atrophy caused by damp-heat invasion.
- This formula should be used with caution in individuals with diarrhea caused by deficiency and cold of the Spleen and Stomach.¹

PHARMACOLOGICAL EFFECTS

1. **Immunostimulant:** Administration of *Er Zhi Wan* was associated with an immune-enhancing effect by increasing white blood cell and T-lymphocyte counts.² Use of the herbs was also effective in reversing immune-suppression induced by hydrocortisone.³
2. **Metabolic:** Administration of *Er Zhi Wan* at 20g per day for 60 days in rabbits was associated with a reduction in plasma cholesterol and triglyceride levels.⁴
3. **Antiplatelet and anticoagulant:** Administration of *Er Zhi Wan* in decoction was associated with both antiplatelet and anticoagulant effects in rabbits.⁵
4. **Hypoglycemic:** Administration of *Er Zhi Wan* was associated with a reduction in plasma glucose levels in mice. It significantly decreased the rise in plasma glucose levels associated with adrenalin.⁶
5. **Hepatoprotective:** Use of *Er Zhi Wan* was associated with marked hepatoprotective effects. In laboratory experiments in mice, it lowered liver enzyme levels and minimized liver damage induced by carbon tetrachloride.⁷

CLINICAL STUDIES AND RESEARCH

1. **Chronic nephritis:** Sixteen patients with chronic nephritis characterized by Liver and Kidney yin deficiencies with heat in the *xue* (blood) level were successfully treated with modified *Er Zhi Wan* and *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill). Modifications were made as follows: *Gui Ban* (Plastrum Testudinis)

and *Mai Dong* (Radix Ophiopogonis) for severe yin deficiency; *Long Dan* (Radix et Rhizoma Gentianae), *Xia Ku Cao* (Spica Prunellae), and *Huang Qin* (Radix Scutellariae) for Liver yang rising; and *Xian Mao* (Rhizoma Curculiginis) and *Yin Yang Huo* (Herba Epimedii) for yin and yang deficiencies. Out of 16 patients, the study reported recovery in 2 patients, improvement in 6 patients, slight improvement in 6 patients, and no improvement in 2 patients.⁸

2. **Aplastic anemia:** In one study, 74 patients with aplastic anemia were treated with modified *Er Zhi Wan* with a 71.7% rate of effectiveness. Treatments were modified as follows: *Ren Shen* (Radix et Rhizoma Ginseng), *E Jiao* (Colla Corii Asini), and *Huang Qi* (Radix Astragali) were added for qi and yin deficiencies; *Shu Di Huang* (Radix Rehmanniae Praeparata), *Tu Si Zi* (Semen Cuscutae), and *Dang Gui* (Radix Angelicae Sinensis) were added for Liver and Kidney yin deficiencies; and various herbs to tonify Spleen and Kidney yang were added if needed. In addition, pharmaceutical drugs were added for symptomatic treatment if necessary. Out of 74 patients, the study reported complete recovery in 11 patients, marked improvement in 27 patients, improvement in 15 patients, and no benefit in 21 patients.⁹
3. **Hepatitis B:** Modified *Er Zhi Wan* was used with good results to treat 80 patients with chronic hepatitis B characterized by Liver and Kidney yin deficiencies. The herbal treatments were modified as follows: *Yin Chen* (Herba Artemisiae Scopariae), *Chui Pen Cao* (Herba Sedi), and *Tu Fu Ling* (Rhizoma Smilacis Glabrae) were added for damp-heat; *Ban Lan Gen* (Radix Isatidis) and *Pu Gong Ying* (Herba Taraxaci) were added for heat; processed *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and dry-fried *Gu Ya* (Fructus Setariae Germinatus) were added for poor appetite; and *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati) and processed *Da Huang* (Radix et Rhizoma Rhei) were added for constipation. At the conclusion of the study, 93.7% of patients had

Èr Zhì Wán (Two-Ultimate Pill)

symptomatic improvement and 91.2% showed improvement in liver function.¹⁰

4. **Threatened miscarriage:** Use of modified *Er Zhi Wan* successfully prevented miscarriages in 119 of 131 patients with threatened miscarriage. The base formula included *Er Zhi Wan* plus *Du Zhong* (Cortex Eucommiae), *Sang Ji Sheng* (Herba Taxilli), *Huo Xiang* (Herba Agastaches), *Zi Su Geng* (Caulis Perillae), and *Lu Jiao Shuang* (Cornu Cervi Degelatinatum). *Tai Zi Shen* (Radix Pseudostellariae) and *Huang Qi* (Radix Astragali) were added for qi deficiency; *Rou Cong Rong* (Herba Cistanches), *Ba Ji Tian* (Radix Morindae Officinalis), and *Zi He Che* (Placenta Hominis) were added for yang deficiency; *Di Huang* (Radix Rehmanniae), *Sang Ye* (Folium Mori), *Huang Qin* (Radix Scutellariae), and *Zhu Ru* (Caulis Bambusae in Taenia) were added for yin deficiency; *Gou Qi Zi* (Fructus Lycii) and *Lu Dou Yi* (Pericarpium Glycine Max) were added for blood deficiency; *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi) for qi stagnation; calcined *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) with *Xue Yu Tan* (Crinis Carbonisatus) for profuse bleeding; *Xuan Shen* (Radix Scrophulariae), *Huo Ma Ren* (Fructus Cannabis), and *Qian Hu* (Radix Peucedani) for constipation with dry stool; and others as needed. Out of 131 patients, 119 showed positive responses with alleviation of symptoms, termination of bleeding, and no reports of abnormal development of the fetus upon delivery.¹¹

TOXICOLOGY

In a toxicology report, no fatality or poisoning was observed following oral administration of *Er Zhi Wan* at 80 g/kg in mice. Using intraperitoneal injection, the LD₅₀ of the formula was 13.84 g/kg.¹²

RELATED FORMULA

Sāng Má Wán (Mulberry Leaf and Sesame Seed Pill)

桑麻丸

Pinyin Name: *Sang Ma Wan*

Literal Name: Mulberry Leaf and Sesame Seed Pill

Original Source: *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682

<i>Sang Ye</i> (Folium Mori)	300g
<i>Hei Zhi Ma</i> (Semen Sesami Nigrum)	120g
<i>Feng Mi</i> (Mel)	300g

Crush *Hei Zhi Ma* (Semen Sesami Nigrum) open, and cook it with honey to obtain a thick paste. Grind *Sang Ye* (Folium Mori) into a fine powder. Mix the paste and the powder to form pills, which should weigh 10g each. Take 1 pill in the morning with salted water, and 1 pill in the evening with a grain-based liquor.

Sang Ma Wan (Mulberry Leaf and Sesame Seed Pill) nourishes Liver and Kidney yin, clears the head, and brightens the eyes. Clinically, patients might show yin and blood deficiencies, characterized by symptoms such as dizziness, blurred vision, chronic coughing, constipation, dry stools, dry skin and skin itching.

AUTHORS' COMMENTS

Most tonic formulas cannot be taken for long periods of time because of their stagnating character. However, *Er Zhi Wan* is a mild and non-stagnating tonic formula, and can be taken for a long period of time if necessary.

Yī Guàn Jiān (Linking Decoction)

一貫煎
一貫煎

Pinyin Name: *Yi Guan Jian*

Literal Name: Linking Decoction

Original Source: *Xu Ming Yi Lei An* (Continuation of Famous Physicians' Patients Organized by Categories) in *Liu Zhou Yi Hua* (Medical Dialogues from Liuzhou) by Wei Zhi-Xiu in the mid-16th century

COMPOSITION

<i>Di Huang</i> (Radix Rehmanniae)	18-45 [30g]
<i>Bei Sha Shen</i> (Radix Glehniae)	9g [10g]
<i>Mai Dong</i> (Radix Ophiopogonis)	9g [10g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g [10g]
<i>Gou Qi Zi</i> (Fructus Lycii)	9-18g [12g]
<i>Chuan Lian Zi</i> (Fructus Toosendan)	4.5g [5g]

DOSAGE / PREPARATION / ADMINISTRATION

Prepare and administer this formula as a warm, strained decoction. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Kidney and Liver yin
2. Regulates Liver qi

CLINICAL MANIFESTATIONS

Liver and Kidney yin deficiencies accompanied by qi stagnation and blood dryness: pain in the chest, epigastric and hypochondriac regions, acid regurgitation, a sore throat, a dry mouth, a red tongue body with little moisture, and a pulse that is fine and weak or deficient and wiry. Occasionally, there may also be a hernia or mass.

CLINICAL APPLICATIONS

Atrophic gastritis, chronic gastritis, gastric and duodenal ulcers, gastric neurosis, premenstrual syndrome (PMS),

ovarian dysfunction, gestational hypertension, hepatitis, liver cirrhosis, liver cancer, hypochondriac neuralgia, hyperthyroidism, and restless leg syndrome.

EXPLANATION

Yi Guan Jian (Linking Decoction) treats Kidney and Liver yin deficiencies accompanied by Liver qi stagnation and blood dryness. The Liver smoothes the qi flow and disperses stagnation in the body. Chronic illness, deficiency, excessive sexual activity, and frequent or prolonged intake of aromatic herbs may all cause yin deficiency and blood dryness. If Liver yin is deficient and the Liver becomes malnourished, Liver qi may become stagnant and invasive. Liver qi stagnation can lead to pain in the chest, epigastric and hypochondriac regions. If Liver qi overacts on the Stomach, acid reflux may occur. A sore throat, a dry mouth, and a red tongue body with little moisture are the results of yin deficiency and its inability to reach and moisten the upper parts of the body. Occasionally, there could be a hernia as a result of qi stagnation in the Liver

Yi Guan Jian (Linking Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver and Kidney yin deficiencies accompanied by qi stagnation and blood dryness	<ul style="list-style-type: none">• Chest and hypochondriac pain, hernia or mass: Liver qi stagnation• Acid regurgitation: Liver qi overacting on the Stomach• Sore throat, a dry mouth and a red tongue body with little moisture: yin deficiency unable to reach the upper parts of the body• Fine, weak pulse: yin deficiency• Deficient, wiry pulse: yin deficiency with pain	<ul style="list-style-type: none">• Nourishes Kidney and Liver yin• Regulates Liver qi	<ul style="list-style-type: none">• <i>Di Huang</i> (Radix Rehmanniae) tonifies Liver and Kidney yin and nourishes the blood.• <i>Bei Sha Shen</i> (Radix Glehniae), <i>Mai Dong</i> (Radix Ophiopogonis), <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Gou Qi Zi</i> (Fructus Lycii) tonify yin, nourish the blood, generate body fluids, and soften the Liver.• <i>Chuan Lian Zi</i> (Fructus Toosendan) smoothes Liver qi and relieves pain.

Yī Guān Jiān (Linking Decoction)

channel, which passes through the inguinal region. In severe cases of stagnation, masses may form. A fine, weak pulse suggests yin deficiency, and a deficient, wiry pulse suggests yin deficiency and pain.

This formula contains *Di Huang* (Radix Rehmanniae) as the chief herb to tonify Liver and Kidney yin and nourish the blood. *Bei Sha Shen* (Radix Glehniae), *Mai Dong* (Radix Ophiopogonis), *Dang Gui* (Radix Angelicae Sinensis), and *Gou Qi Zi* (Fructus Lycii) are the deputy herbs that tonify yin, nourish the blood, generate body fluids, and soften the Liver. *Chuan Lian Zi* (Fructus Toosendan) serves as both assistant and envoy herb. It smoothes Liver qi circulation, and guides the rest of the herbs to the Liver channel. Since *Chuan Lian Zi* (Fructus Toosendan) is bitter and cold and may consume yin and blood, only a small amount is used.

MODIFICATIONS

- With a dry throat and a bitter taste in the mouth, add *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), and *Tian Hua Fen* (Radix Trichosanthis).
- If there is constipation, add *Gua Lou Zi* (Semen Trichosanthis), *Huo Ma Ren* (Fructus Cannabis), and *Yu Li Ren* (Semen Pruni).
- With insomnia, add *Bai Zi Ren* (Semen Platycladi), *Suan Zao Ren* (Semen Ziziphi Spinosa), and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With perspiration caused by deficiency heat, add *Shi Hu* (Caulis Dendrobii) and *Di Gu Pi* (Cortex Lycii).
- If there is more phlegm, add *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Gua Lou Zi* (Semen Trichosanthis).
- With abdominal pain, add *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With irritability and thirst, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Shi Gao* (Gypsum Fibrosum).
- With weakness of the legs, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Yi Yi Ren* (Semen Coicis).

CAUTIONS / CONTRAINDICATIONS

- *Yi Guan Jian* is contraindicated in individuals with hypochondriac pain caused by Liver fire rising without underlying deficiency.
- This formula is inappropriate for patients with qi and blood stagnation or phlegm accumulation, since it contains many tonics that can create more stagnation or produce more dampness and phlegm.

PHARMACOLOGICAL EFFECTS

1. **Hepatoprotective:** In laboratory experiments in mice, the use of *Yi Guan Jian* was effective in reducing liver damage caused by carbon tetrachloride.¹

2. **Antilulcer:** According to laboratory experiments in mice, administration of *Yi Guan Jian* was associated with a marked effect for treating gastric and duodenal ulcer. The mechanism of action is attributed to enhancing the protective effect of the gastric mucosa, as the formula did not inhibit or neutralize the stomach acid.²
3. **Adaptogenic:** In one experiment, daily administration of *Yi Guan Jian* for 7 days was effective at significantly increasing physical performance in mice.³

CLINICAL STUDIES AND RESEARCH

1. **Atrophic gastritis:** In one study, 45 patients with atrophic gastritis were treated with *Yi Guan Jian* plus *Bai Hua She She Cao* (Herba Hedyotis). The age of the patients ranged from 28-64 years. The history of illness was between 6 months to 8 years. The traditional Chinese medicine diagnoses were Stomach yin deficiency (31 patients) and Liver and Stomach disharmony (14 patients). Out of 45 patients, the study reported marked improvement in 12 patients, improvement in 30 patients, and no benefit in 3 patients. Patients with Stomach yin deficiency responded better to the treatment.⁴ Another study reported 94.92% effectiveness using modified *Yi Guan Jian* to treat atrophic gastritis characterized by Stomach yin deficiency. The herbal formula contained *Yi Guan Jian* plus *Bai Shao* (Radix Paeoniae Alba), *Wu Mei* (Fructus Mume), *E Zhu* (Rhizoma Curcumae), and others. Of 118 patients, the study reported significant improvement in 63 patients, moderate improvement in 49 patients, and no benefit in 6 patients.⁵
2. **Gastric and duodenal ulcers:** In one study, 18 patients with gastrointestinal disorders (10 with gastric ulcer and 8 with duodenal ulcer) were treated with modified *Yi Guan Jian* for 90 days with complete recovery in 8 patients, improvement in 7 patients, and no benefit in 3 patients. The overall effectiveness rate was 83.2%.⁶
3. **Premenstrual syndrome (PMS):** Modified *Yi Guan Jian* was used to treat 36 women with PMS between ages of 25-40. The clinical presentations included irritability, anger, insomnia, dizziness, headache, breast distention and pain, joint soreness and pain, edema, and abdominal discomfort. Out of 36 patients, the study reported marked improvement in 26 patients and moderate improvement in 10 patients.⁷
4. **Ovarian dysfunction:** Modified *Yi Guan Jian* was used to treat women with abnormal ovarian functions. The base formula included *Yi Guan Jian* plus *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba), *Nu Zhen Zi* (Fructus Ligustri Lucidi), and *Mu Dan Pi* (Cortex Moutan). In addition, *Da Huang* (Radix et Rhizoma Rhei), *Shui Zhi* (Hirudo), and *Niu Xi* (Radix Achyranthis Bidentatae) were added for amenorrhea; processed *He Shou Wu* (Radix

Yi Guàn Jiān (Linking Decoction)

Polygoni Multiflori) and *E Jiao* (Colla Corii Asini) were added for decreased menstrual discharge with insomnia; *Yi Mu Cao* (Herba Leonuri) and *Wu Yao* (Radix Linderae) for abdominal pain with menstruation; *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci) were added for low back pain; and *Shan Zha* (Fructus Crataegi), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Shan Yao* (Rhizoma Dioscoreae) were added for lack of appetite due to Spleen deficiency. Out of 38 patients, the study reported complete recovery of ovarian function in 26 patients, marked improvement in 8 patients, improvement in 3 patients, and no benefit in one patient.⁸

5. **Gestational hypertension:** In one study, 74 pregnant women with hypertension were treated with modified *Yi Guan Jian*, with marked reduction in blood pressure and edema. The formula used *Yi Guan Jian* as the base formula. *Sang Ji Sheng* (Herba Taxilli), *Bai Shao* (Radix Paeoniae Alba), *Shi Jue Ming* (Concha Haliotidis), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) were added for Liver and Stomach yin deficiencies (70 patients). *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling Pi* (Cortex Poria), *Da Fu Pi* (Pericarpium Arecae), and *Chen Pi* (Pericarpium Citri Reticulatae) were added for Spleen deficiency with Liver excess (4 patients). Out of 74 patients, the study reported marked improvement in 47 patients, moderate improvement in 24 patients, and no benefit in 3 patients. Clinical improvements included marked reduction in blood pressure and edema. However, there was only slight improvement in proteinuria.⁹
6. **Liver diseases:** Modifications of *Yi Guan Jian* have been used in numerous studies to treat liver diseases, such as hepatitis, liver cirrhosis, and liver cancer. In one study, 50 patients with chronic hepatitis were treated with good results using modified *Yi Guan Jian* with the addition of *Bai Shao* (Radix Paeoniae Alba) and *Yu Jin* (Radix Curcumae).¹⁰ In another study, 85 patients with liver cirrhosis were treated with modified *Yi Guan Jian* with 81.1% effectiveness.¹¹
7. **Liver cancer:** In one study, 41 patients with liver cancer characterized by Liver and Kidney yin deficiencies were treated with good results using *Yi Guan Jian* plus *Zhi Mu* (Rhizoma Anemarrhenae) and *Gui Ban* (Plastrum Testudinis) as the base formula. In addition, *Du Zhong* (Cortex Eucommiae), *Sang Ji Sheng* (Herba Taxilli), and *He Shou Wu* (Radix Polygoni Multiflori) were added for dizziness and tinnitus; *Zhi Zi* (Fructus Gardeniae) and *Yin Chen* (Herba Artemisiae Scopariae) were added for jaundice; *Ze Xie* (Rhizoma Alismatis), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Yu Jin* (Radix Curcumae) were added for ascites; and *Gu Ya* (Fructus Setariae Germinatus), *Mai Ya* (Fructus Hordei Germinatus), and *Shan Zha* (Fructus Crataegi) were added for poor

appetite. Out of 41 patients, the study reported marked improvement in 7 patients, moderate improvement in 30 patients, and no improvement in 4 patients.¹²

8. **Fever during late-stage liver cancer:** Modified *Yi Guan Jian* showed effectiveness in treating liver cancer with fever. The formula was modified as follows: *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) were added for marked hypochondriac pain; *Che Qian Zi* (Semen Plantaginis), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis) were added for edema, ascites, and decreased urination; *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added for nausea, poor appetite, and fatigue; and *Yin Chen* (Herba Artemisiae Scopariae) and *Che Qian Zi* (Semen Plantaginis) were added for jaundice. Out of 28 patients, the study reported a marked effect in 15 patients, moderate effect in 9 patients, and no effect in 4 patients.¹³
9. **Hyperthyroidism:** In one study, 40 patients with hyperthyroidism were treated with modified *Yi Guan Jian* with good results. The herbal treatment was modified as follows: *Hai Zao* (Sargassum), *Kun Bu* (Thallus Eckloniae), and *Niu Xi* (Radix Achyranthis Bidentatae) were added for thyroid gland enlargement; *Zhi Mu* (Rhizoma Anemarrhenae) and *Shi Gao* (Gypsum Fibrosum) were added for restlessness, irritability and a dry mouth; *Xuan Shen* (Radix Scrophulariae), charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), and charred *Mai Ya* (Fructus Hordei Germinatus) for poor appetite and abdominal pain; *Huang Qi* (Radix Astragali) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) were added for shortness of breath and profuse perspiration; and *Che Qian Zi* (Semen Plantaginis), *Ze Xie* (Rhizoma Alismatis), *Da Fu Pi* (Pericarpium Arecae), and *Gui Zhi* (Ramulus Cinnamomi) were added for edema and hypertension. Out of 40 patients, the study reported recovery in 20 patients, marked improvement in 12 patients, and slight improvement in 8 patients.¹⁴
10. **Restless leg syndrome:** In one study, 20 patients with restless legs were treated with an herbal formula for 15 days per course of treatment with good results. The formula contained *Yi Guan Jian* with *Gou Teng* (Ramulus Uncariae cum Uncis) and fresh *Mu Li* (Concha Ostreae). Out of 20 patients, the study reported complete recovery in 13 patients, improvement in 5 patients, and no benefit in 2 patients.¹⁵

TOXICOLOGY

No abnormal reaction was observed following oral ingestion at 50 g/kg of *Yi Guan Jian* as a bolus dose in mice.¹⁶

Yī Guān Jiān (Linking Decoction)

AUTHORS' COMMENTS

The following question is sometimes raised: if *Yi Guan Jian* treats chest, epigastric, and hypochondriac pain characterized by Liver qi stagnation, why are yin and blood tonics used instead of qi-regulating herbs such as *Zhi Shi* (Fructus Aurantii Immaturus) or *Chai Hu* (Radix Bupleuri)? The answer is that *Yi Guan Jian* is designed for individuals who have both Liver qi stagnation and Kidney and Liver yin deficiencies. Because there is yin deficiency, it is not suitable to use *Zhi Shi* (Fructus Aurantii Immaturus) or *Chai Hu* (Radix Bupleuri), since they are both drying herbs that deplete yin and will further exacerbate the yin deficiency.¹⁷

Yi Guan Jian, a yin tonic formula, uses *Chuan Lian Zi* (Fructus Toosendan), a bitter and cold herb that may damage yin, for the following reasons:

- *Chuan Lian Zi* (Fructus Toosendan) regulates Liver qi, sedates Liver heat, and prevents fire from forming. It prevents the yin and blood tonic herbs from causing stagnation in the middle *jiao*.
- While bitter and cold herbs, such as *Chuan Lian Zi* (Fructus Toosendan), can dry yin, this is not a concern in this patient because *Yi Guan Jian* contains many sweet and cold herbs, such as *Bei Sha Shen* (Radix Glehniae), *Mai Dong* (Radix Ophiopogonis), *Di Huang* (Radix Rehmanniae), *Gou Qi Zi* (Fructus Lycii), and *Dang Gui* (Radix Angelicae Sinensis). The sweet and cold herbs outnumber *Chuan Lian Zi* (Fructus Toosendan) and control its potentially adverse effects.¹⁸

Yi Guan Jian and *Xiao Yao San* (Rambling Powder) both treat hypochondriac distention and pain, but the etiologies contributing to this condition and the focus of the two formulas are quite different.

- *Yi Guan Jian* treats Liver and Kidney yin deficiencies with Liver qi stagnation. It nourishes yin and regulates Liver qi to treat a dry mouth, sore throat, acid regurgitation, mass accumulation, and hernias.
- *Xiao Yao San* addresses Liver qi stagnation with blood and Spleen deficiencies. It is considered a harmonizing formula. Symptoms include breast tenderness, headache, dizziness, alternating chills and fever, a dry mouth, irregular

menstruation, stress, a withered *shen* (spirit), and decreased dietary intake. *Xiao Yao San* regulates Liver qi, spreads stagnation, strengthens the Spleen, and nourishes the blood.¹⁹

Yi Guan Jian and *Si Ni San* (Frigid Extremities Powder) both treat hypochondriac pain.

- *Yi Guan Jian* treats hypochondriac pain caused by Kidney and Liver yin deficiencies.
- *Si Ni San* treats epigastric, abdominal, or hypochondriac pain caused by Liver qi stagnation with yang qi pent up in the body.²⁰

Shí Hú Yè Guāng Wán (Dendrobium Pill for Night Vision)

石斛夜光丸

Pinyin Name: *Shi Hu Ye Guang Wan*

Literal Name: Dendrobium Pill for Night Vision

Alternate Name: Night Vision Formula

Original Source: *Yuan Ji Qi Wei* (Explanation of the Subtitles of the Original Mechanism) by Ni Wei-De in 1370

COMPOSITION

<i>Shi Hu</i> (Caulis Dendrobii)	15g
<i>Mai Dong</i> (Radix Ophiopogonis)	30g
<i>Tian Dong</i> (Radix Asparagi), <i>bei</i> (stone-baked)	60g
<i>Di Huang</i> (Radix Rehmanniae)	30g
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	30g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis), <i>chao</i> (dry-fried)	15g
<i>Tu Si Zi</i> (Semen Cuscutae), <i>jin</i> (soaked) in liquor	21g
<i>Gou Qi Zi</i> (Fructus Lycii)	21g
<i>Niu Xi</i> (Radix Achyranthis Bidentatae), <i>jin</i> (soaked) in liquor	23g
<i>Rou Cong Rong</i> (Herba Cistanches)	15g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	60g
<i>Fu Ling</i> (Poria)	60g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g
<i>Shan Yao</i> (Rhizoma Dioscoreae)	21g
<i>Zhi Qiao</i> (Fructus Citri Aurantii), <i>chao</i> (dry-fried) with bran	15g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	15g
<i>Ju Hua</i> (Flos Chrysanthemi)	21g
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	23g
<i>Fang Feng</i> (Radix Saposhnikoviae)	15g
<i>Jue Ming Zi</i> (Semen Cassiae)	24g
<i>Ji Li</i> (Fructus Tribuli)	15g
<i>Qing Xiang Zi</i> (Semen Celosiae)	15g
<i>Huang Lian</i> (Rhizoma Coptidis)	15g
<i>Xi Jiao</i> (Cornu Rhinoceri), thin slices	15g
<i>Ling Yang Jiao</i> (Cornu Saigae Tataricae), thin slices	15g

Note: *Xi Jiao* (Cornu Rhinoceri) and *Ling Yang Jiao* (Cornu Saigae Tataricae) are derived from endangered animals, and are rarely used as medicinal substances today. The discussion here is included primarily for academic purposes, to reflect the historical use of these substances in their original formulations. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions.

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and filter it through a sieve. Mix the powdered herbs with honey to form pills. Take 30-50 pills with salted water or warm grain-based liquor. Today, this formula is prepared by mixing the powdered herbs with honey to form pills, each weighing 10g. Take 1 pill in the morning and at night with lightly-salted water.

CHINESE THERAPEUTIC ACTIONS

1. Soothes the Liver and calms Liver wind
2. Nourishes yin and brightens vision

CLINICAL MANIFESTATIONS

Liver and Kidney yin deficiencies leading to rising internal fire and wind: dilated pupils, blurred vision, photophobia, excess tearing with exposure to sunlight, dizziness, and vertigo.

CLINICAL APPLICATIONS

Glaucoma, cataract, retinitis, tinnitus, deafness, neurogenic headache, hypertension, and menopause.

EXPLANATION

Shi Hu Ye Guang Wan (Dendrobium Pill for Night Vision) treats Liver and Kidney yin deficiencies complicated by internal fire and wind. Liver and Kidney yin deficiencies

Shí Hú Yè Guāng Wán (Dendrobium Pill for Night Vision)

Shi Hu Ye Guang Wan (Dendrobium Pill for Night Vision)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver and Kidney yin deficiencies leading to rising internal fire and wind	<ul style="list-style-type: none"> Dilated pupils and blurred vision: Liver and Kidney yin deficiencies unable to nourish the eyes Photophobia and excessive tearing: Liver and Kidney yin deficiencies with rising of internal fire and wind 	<ul style="list-style-type: none"> Soothes the Liver and calms Liver wind Nourishes yin and brightens vision 	<ul style="list-style-type: none"> <i>Shi Hu</i> (Caulis Dendrobii), <i>Mai Dong</i> (Radix Ophiopogonis), <i>Tian Dong</i> (Radix Asparagi), <i>Di Huang</i> (Radix Rehmanniae), <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) and <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) nourish the blood and produce body fluids. <i>Tu Si Zi</i> (Semen Cuscutae), <i>Gou Qi Zi</i> (Fructus Lycii), <i>Niu Xi</i> (Radix Achyranthis Bidentatae) and <i>Rou Cong Rong</i> (Herba Cistanches) nourish yin and tonify the Liver and Kidney. <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Fu Ling</i> (Poria), <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Shan Yao</i> (Rhizoma Dioscoreae) tonify the Spleen and Lung. <i>Zhi Qiao</i> (Fructus Aurantii), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), <i>Ju Hua</i> (Flos Chrysanthemi), <i>Ku Xing Ren</i> (Semen Armeniacae Amarum), <i>Fang Feng</i> (Radix Saposhnikoviae), <i>Jue Ming Zi</i> (Semen Cassiae), <i>Ji Li</i> (Fructus Tribuli) and <i>Qing Xiang Zi</i> (Semen Celosiae) clear heat and calm wind. <i>Huang Lian</i> (Rhizoma Coptidis), <i>Xi Jiao</i> (Cornu Rhinoceri), and <i>Ling Yang Jiao</i> (Cornu Saigae Tataricae) soothe the Liver, purge the Heart, and cool the blood.

lead to an inability to nourish the eyes, resulting in dilated pupils and blurred vision. Liver and Kidney yin deficiencies are often accompanied by deficiency fire, which may cause photophobia and excessive tearing. Clinically, this formula can be used to treat various eye disorders, such as glaucoma, cataract, and retinitis.

This formula consists of 25 herbs, which may be grouped into five different categories of functions: nourish the blood and body fluids; tonify Liver and Kidney yin; tonify Lung and Spleen; calm wind and clear heat; and calm the Liver and purge the Heart. *Shi Hu* (Caulis Dendrobii), *Mai Dong* (Radix Ophiopogonis), *Tian Dong* (Radix Asparagi), *Di Huang* (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Wu Wei Zi* (Fructus Schisandrae Chinensis) nourish the blood and generate body fluids. *Tu Si Zi* (Semen Cuscutae), *Gou Qi Zi* (Fructus Lycii), *Niu Xi* (Radix Achyranthis Bidentatae), and *Rou Cong Rong* (Herba Cistanches) nourish yin and tonify the Liver and Kidney. Because *gu* (food) *qi* constantly replenishes Kidney *jing* (essence), the Spleen and Lung should be tonified to ensure proper digestion and absorption.

The four herbs that tonify the Spleen and Lung are *Ren Shen* (Radix et Rhizoma Ginseng), *Fu Ling* (Poria), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and *Shan Yao* (Rhizoma Dioscoreae). Liver and Kidney yin and blood deficiencies can give rise to internal wind and heat. To sedate heat and clear wind, this formula uses *Zhi Qiao* (Fructus Aurantii), *Chuan Xiong* (Rhizoma Chuanxiong), *Ju Hua* (Flos Chrysanthemi), *Ku Xing Ren* (Semen Armeniacae Amarum), *Fang Feng* (Radix Saposhnikoviae), *Jue Ming Zi* (Semen Cassiae), *Ji Li* (Fructus Tribuli), and *Qing Xiang Zi* (Semen Celosiae). Finally, *Huang Lian* (Rhizoma Coptidis), *Xi Jiao* (Cornu Rhinoceri), and *Ling Yang Jiao* (Cornu Saigae Tataricae) soothe the Liver, purge the Heart, and cool the blood.

CAUTIONS / CONTRAINDICATIONS

Avoid pungent and spicy foods while taking *Shi Hu Ye Guang Wan*.¹

Zi Yin Di Huang Wan (Rehmannia Pill to Nourish Yin)

滋陰地黃丸
滋阴地黄丸

Pinyin Name: Zi Yin Di Huang Wan
Literal Name: Rehmannia Pill to Nourish Yin
Alternate Names: Chih Yin Ti Huang Wan (Yin-Nourishing Rehmannia Pill), Shou Gan Di Huang Wan (Cooked and Dried Rehmannia Pill); Rehmannia, Bupleurum and Scute Formula
Original Source: Yi Fang Ji Jie (Analytical Collection of Medical Formulas) by Wang Ang in 1682

COMPOSITION

- Di Huang (Radix Rehmanniae)
- Shu Di Huang (Radix Rehmanniae Praeparata)
- Dang Gui (Radix Angelicae Sinensis)
- Tian Dong (Radix Asparagi)
- Ren Shen (Radix et Rhizoma Ginseng)
- Gan Cao (Radix et Rhizoma Glycyrrhizae)
- Huang Lian (Rhizoma Coptidis)
- Huang Qin (Radix Scutellariae)
- Di Gu Pi (Cortex Lycii)
- Chai Hu (Radix Bupleuri)
- Zhi Qiao (Fructus Aurantii)
- Wu Wei Zi (Fructus Schisandrae Chinensis)

DOSAGE / PREPARATION / ADMINISTRATION

This formula is prepared and administered as pills.

CLINICAL MANIFESTATIONS

Blurred and impaired vision: blurred vision, red eyes, dilated pupils, and increased sensitivity to light.

CHINESE THERAPEUTIC ACTIONS

- 1. Nourishes yin
- 2. Tonifies qi and blood
- 3. Purges fire

EXPLANATION

Zi Yin Di Huang Wan (Rehmannia Pill to Nourish Yin) treats blurred and impaired vision caused by Liver fire

Zi Yin Di Huang Wan (Rehmannia Pill to Nourish Yin)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blurred and impaired vision	<ul style="list-style-type: none">• Red eyes, dilated pupils, and increased sensitivity to light: Liver fire• Blurred vision and generalized weakness: qi, blood and yin deficiencies	<ul style="list-style-type: none">• Nourishes yin• Tonifies qi and blood• Purges fire	<ul style="list-style-type: none">• Di Huang (Radix Rehmanniae) and Shu Di Huang (Radix Rehmanniae Praeparata) nourish yin and tonify the blood.• Dang Gui (Radix Angelicae Sinensis) tonifies the blood.• Tian Dong (Radix Asparagi) nourishes yin.• Ren Shen (Radix et Rhizoma Ginseng) and Gan Cao (Radix et Rhizoma Glycyrrhizae) boost qi.• Huang Lian (Rhizoma Coptidis) and Huang Qin (Radix Scutellariae) clear excess Liver fire.• Di Gu Pi (Cortex Lycii) controls deficiency heat.• Chai Hu (Radix Bupleuri) and Zhi Qiao (Fructus Aurantii) dispel Liver qi stagnation.• Wu Wei Zi (Fructus Schisandrae Chinensis) tranquilizes the Heart and calms the shen (spirit).

Zi Yin Di Huang Wan (Rehmannia Pill to Nourish Yin)

rising with underlying qi, blood and yin deficiencies. When Liver fire rises upward, it causes red eyes, dilated pupils, and increased sensitivity to light. Blurred vision and generalized weakness can be attributed to the underlying qi, blood and yin deficiencies.

Di Huang (Radix Rehmanniae) and *Shu Di Huang* (Radix Rehmanniae Praeparata) together nourish yin and tonify the blood. *Dang Gui* (Radix Angelicae Sinensis) tonifies the blood, *Tian Dong* (Radix Asparagi) nourishes yin, and *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao*

(Radix et Rhizoma Glycyrrhizae) boost qi. *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae) clear excess Liver fire, while *Di Gu Pi* (Cortex Lycii) controls deficiency heat. *Chai Hu* (Radix Bupleuri) and *Zhi Qiao* (Fructus Aurantii) dispel Liver qi stagnation. Lastly, *Wu Wei Zi* (Fructus Schisandrae Chinensis) tranquilizes the Heart and calms the *shen* (spirit).

CAUTIONS / CONTRAINDICATIONS

Patients with Liver fire should be advised to avoid hot and spicy foods while taking *Zi Yin Di Huang Wan*.

Zi Shen Ming Mu Tang

(Nourish the Kidney to Brighten the Eyes Decoction)

滋腎明目湯

滋腎明目汤

Pinyin Name: *Zi Shen Ming Mu Tang*

Literal Name: Nourish the Kidney to Brighten the Eyes Decoction

Alternate Name: Chrysanthemum Combination

Original Source: *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) by Gong Ting-Xian in 1587

COMPOSITION

<i>Di Huang</i> (Radix Rehmanniae)	2 parts
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	2 parts
<i>Dang Gui</i> (Radix Angelicae Sinensis)	2 parts
<i>Bai Shao</i> (Radix Paeoniae Alba)	2 parts
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	2 parts
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	2 parts
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1 part
<i>Ju Hua</i> (Flos Chrysanthemi)	2 parts
<i>Man Jing Zi</i> (Fructus Viticis)	2 parts
<i>Huang Lian</i> (Rhizoma Coptidis)	2 parts
<i>Zhi Zi</i> (Fructus Gardeniae)	2 parts
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	2 parts
<i>Jie Geng</i> (Radix Platycodonis)	2 parts

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with a small amount of *Cha Ye* (Folium Camelliae) and *Deng Xin Cao* (Medulla Junci) in water, and take the strained decoction while warm. Note: The source text only provided the proportions of the herbs, not the exact doses.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin
2. Tonifies qi and blood
3. Clears heat

Zi Shen Ming Mu Tang

(Nourish the Kidney to Brighten the Eyes Decoction)

CLINICAL MANIFESTATIONS

Blurred and impaired vision as a result of qi, blood and yin deficiencies: blurred vision, poor vision, eye strain, and excessive itching and tearing of the eyes.

CLINICAL APPLICATIONS

Deterioration of the eyes, impaired vision, blurred vision, cataract, and asthenopia.

EXPLANATION

Chronic qi, blood and yin deficiencies often result in malnourishment of the eyes and deterioration of their functions, producing symptoms such as blurred vision, poor vision, and eye strain.

Zi Shen Ming Mu Tang (Nourish the Kidney to Brighten the Eyes Decoction) tonifies qi and blood, nourishes yin, clears heat, and improves vision. *Di Huang* (Radix Rehmanniae) and *Shu Di Huang* (Radix Rehmanniae Praeparata) nourish yin. *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba) and *Chuan Xiong* (Rhizoma Chuanxiong) tonify the blood and regulate blood circulation. *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) are added to tonify qi. Together, these seven herbs address the underlying

deficiencies. In addition, *Ju Hua* (Flos Chrysanthemi) and *Man Jing Zi* (Fructus Viticis) are added to clear the Liver and improve vision. *Huang Lian* (Rhizoma Coptidis) and *Zhi Zi* (Fructus Gardeniae) clear damp-heat, especially if there is redness and eye pain. *Bai Zhi* (Radix Angelicae Dahuricae) opens the orifices in the head. Moreover, *Bai Zhi* (Radix Angelicae Dahuricae) and *Jie Geng* (Radix Platycodonis) have ascending properties, and guide the therapeutic effects of the formula to the affected area. *Deng Xin Cao* (Medulla Junci) and *Cha Ye* (Folium Camelliae) eliminate excess water from the body.

MODIFICATIONS

- With vertigo and blacked-out vision, add *Huang Qi* (Radix Astragali) and *Gou Qi Zi* (Fructus Lycii).
- With excessive tearing and eye pain caused by wind-heat, add *Fang Feng* (Radix Saposhnikoviae) and *Jing Jie* (Herba Schizonepetae).
- With fatigue of the eyes, add *Fu Ling* (Poria) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- For impaired vision or blurred vision caused by Kidney yin deficiency, add *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).
- For cataract and blurred vision, add *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).

Zi Shen Ming Mu Tang (Nourish the Kidney to Brighten the Eyes Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Xiang Fu (Rhizoma Cyperi)
Chai Hu (Radix Bupleuri)
Huang Qin (Radix Scutellariae), *chao* (dry-fried) with liquor

DOSAGE / PREPARATION / ADMINISTRATION

Grate equal amounts of the herbs and cook them in water to make a decoction. Take the strained decoction while warm.

CLINICAL APPLICATIONS

Deafness, tinnitus, and auditory depression.

CHINESE THERAPEUTIC ACTIONS

- 1. Nourishes the Kidney
- 2. Tonifies the blood

CLINICAL MANIFESTATIONS

Impaired hearing: poor hearing and/or tinnitus.

EXPLANATION

Zi Shen Tong Er Tang (Nourish the Kidney to Unblock the Ears Decoction) treats hearing disorders caused by aging, infection, or accumulation of toxic substances. Common complaints include poor hearing and tinnitus. This formula is ideal for treating various types of hearing disorders, especially in elderly patients.

Zi Shen Tong Er Tang (Nourish the Kidney to Unblock the Ears Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Impaired hearing	Poor hearing or tinnitus: Kidney and blood deficiencies unable to nourish the ears	<ul style="list-style-type: none">• Nourishes the Kidney• Tonifies the blood	<ul style="list-style-type: none">• <i>Di Huang</i> (Radix Rehmanniae) nourishes the Kidney.• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong) and <i>Bai Shao</i> (Radix Paeoniae Alba) tonify the blood and regulate blood circulation.• <i>Bai Zhi</i> (Radix Angelicae Dahuricae) guides the formula to the upper parts of the body.• <i>Zhi Mu</i> (Rhizoma Anemarrhenae) and <i>Huang Bo</i> (Cortex Phellodendri Chinensis) nourish yin and clear deficiency heat.• <i>Xiang Fu</i> (Rhizoma Cyperi) and <i>Chai Hu</i> (Radix Bupleuri) unblock Liver qi stagnation.• <i>Huang Qin</i> (Radix Scutellariae) clears heat and reduces inflammation.

Zi Shèn Tōng Ěr Tāng

(Nourish the Kidney to Unblock the Ears Decoction)

Di Huang (Radix Rehmanniae), the chief herb, nourishes the Kidney and treats the underlying deficiency. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Bai Shao* (Radix Paeoniae Alba) tonify the blood and regulate blood circulation. *Bai Zhi* (Radix Angelicae Dahuricae) has an ascending function, and guides the formula to the upper parts of the body. *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis) nourish yin and clear deficiency heat. *Xiang Fu* (Rhizoma Cyperi) and *Chai Hu* (Radix Bupleuri)

unblock Liver qi stagnation. *Huang Qin* (Radix Scutellariae) clears heat and reduces inflammation.

MODIFICATIONS

- For hearing disorders caused by toxicity of drugs, add *Huang Qi* (Radix Astragali) and *Lu Xian Cao* (Herba Pyrolae).
- If there is discomfort in the chest and diaphragm, add *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Zhi Qiao* (Fructus Aurantii).

Jin Gui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet)

金匱腎氣丸

金匱腎氣丸

Pinyin Name: *Jin Gui Shen Qi Wan***Literal Name:** Kidney Qi Pill from the Golden Cabinet**Alternate Names:** *Shen Qi Wan* (Kidney Qi Pill), Kidney Qi Formula from the Golden Cabinet**Original Source:** *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION**

<i>Di Huang</i> (Radix Rehmanniae)	24g
<i>Shan Zhu Yu</i> (Fructus Corni)	12g
<i>Shan Yao</i> (Rhizoma Dioscoreae)	12g
<i>Fu Ling</i> (Poria)	9g
<i>Mu Dan Pi</i> (Cortex Moutan)	9g
<i>Ze Xie</i> (Rhizoma Alismatis)	9g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	3g
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	3g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder, mix the powder with honey and form into small pills resembling the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 15-25 pills (6-10g) with a grain-based liquor twice daily.

CHINESE THERAPEUTIC ACTIONS

Warms and tonifies Kidney yang

CLINICAL MANIFESTATIONS

Kidney yang deficiency: lower back pain, weak legs, cold sensations in the lower body, pain and cramps in the lower abdomen, dysuria or polyuria, a pale, flabby tongue with a thin, white coating, and a deep, fine pulse at the *chi* position. It may also be used to treat leg *qi*, *tan yin* (phlegm retention), and *xiao ke* (wasting and thirsting) syndrome.

CLINICAL APPLICATIONS

Endocrine disorders (diabetes mellitus and insipidus, hyperaldosteronism, hypothyroidism); sexual and reproductive disorders (impotence, premature ejaculation,

prostatic hypertrophy, male and female infertility, gynecomastia); genitourinary disorders (nephritis, nephrosclerosis, chronic glomerulonephritis, urolithiasis, renal tuberculosis, proteinuria, anuria, urinary incontinence, nocturia, vesical calculus, prostate disorders); cardiovascular disorders (coronary artery disease, arteriosclerosis, hypertension, hypotension, post-stroke complications); respiratory disorders (chronic bronchitis, asthma, pulmonary emphysema); and other conditions such as lumbago and cataract.

EXPLANATION

Jin Gui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet) treats Kidney yang deficiency and/or deficiency of *ming men* (life gate) fire. Low back pain, weak legs, cold sensations in the lower back, and lower abdominal pain and cramps are caused by Kidney yang deficiency and its inability to warm the lower parts of the body. Kidney yang is also responsible for regulating water circulation and metabolism, and its deficiency may cause water retention, which can give rise to dysuria, leg *qi*, and *tan yin* (phlegm retention). Polyuria may occur if there is Kidney

Jin Gui Shèn Qì Wán (Kidney Qì Pill from the Golden Cabinet)

Jin Gui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Kidney yang deficiency	<ul style="list-style-type: none"> • Low back pain, weak legs, cold sensations in the lower back, and lower abdominal pain and cramps: Kidney yang deficiency unable to warm the lower parts of the body • Dysuria or polyuria: Kidney yang unable to regulate water circulation and metabolism • Deep, fine pulse at the <i>chi</i> position: Kidney yang deficiency 	Warms and tonifies Kidney yang	<ul style="list-style-type: none"> • <i>Di Huang</i> (Radix Rehmanniae) tonifies Kidney yin and <i>jing</i> (essence). • <i>Shan Zhu Yu</i> (Fructus Corni) tonifies Kidney and Liver yin. • <i>Shan Yao</i> (Rhizoma Dioscoreae) tonifies the Kidney and Spleen. • <i>Fu Ling</i> (Poria), <i>Mu Dan Pi</i> (Cortex Moutan) and <i>Ze Xie</i> (Rhizoma Alismatis) sedate turbidity and prevent the greasiness of the tonic herbs from blocking the qi flow. • <i>Gui Zhi</i> (Ramulus Cinnamomi) and <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) tonify Kidney yang.

deficiency in patients with *xiao ke* (wasting and thirsting) syndrome. A deep, fine pulse at the *chi* position is an indication of Kidney yang deficiency.

Jin Gui Shen Qi Wan is based on *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), with the addition of *Gui Zhi* (Ramulus Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata). The strategy behind this formula is to tonify Kidney yin to raise Kidney yang, since yin and yang are mutually dependent. This formula uses *Di Huang* (Radix Rehmanniae) to tonify Kidney yin and *jing* (essence), *Shan Zhu Yu* (Fructus Corni) to tonify Kidney and Liver yin, and *Shan Yao* (Rhizoma Dioscoreae) to tonify the Kidney and Spleen. To tonify Kidney yang, this formula uses a small amount of *Gui Zhi* (Ramulus Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata). Only a small amount of these two warming herbs are needed to ignite the *ming men* (life gate) fire and raise Kidney yang. *Ze Xie* (Rhizoma Alismatis), *Fu Ling* (Poria), and *Mu Dan Pi* (Cortex Moutan) sedate turbidity and prevent the greasiness of the tonic herbs from blocking the qi flow.

MODIFICATIONS

- With dizziness and vertigo, add *Gou Qi Zi* (Fructus Lycii) and *Ju Hua* (Flos Chrysanthemi).
- For cataract and poor vision, add *Yi Qi Cong Ming Tang* (Augment the Qi and Increase Acuity Decoction).
- With leg *qi* and low back pain, add *Fang Ji Huang Qi Tang* (Stephania and Astragalus Decoction).
- For yin deficiency and generalized atrophy, add *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle).
- For back pain and knee soreness, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Du Zhong* (Cortex Eucommiae).

- For back pain, swelling of the legs, and dysuria, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Che Qian Zi* (Semen Plantaginis).

CAUTIONS / CONTRAINDICATIONS

- *Jin Gui Shen Qi Wan* should be used with caution in patients who have poor appetite, loose stools, and chronic diarrhea caused by Spleen and Stomach deficiencies.
- This formula is contraindicated in patients with deficiency-heat rising, with symptoms such as a dry mouth and throat, and a red tongue with a scanty tongue coating.
- Possible side effects of the formula that have been reported include stomach discomfort, constipation, itching, rash, palpitations, and an irregular heart beat.¹
- Use of this formula is contraindicated during pregnancy.²

PHARMACOLOGICAL EFFECTS

1. **Antiaaging:** In numerous laboratory experiments, administration of *Jin Gui Shen Qi Wan* was associated with general improvements in the health and well-being of the subjects. The effects of the herbs include increased tolerance to cold weather, decreased risk of cancer formation, lower incidence of muscle atrophy, and decreased plasma cholesterol and triglyceride levels.³
2. **Immunostimulant:** Administration of *Jin Gui Shen Qi Wan* in mice at 0.3g each was associated with enhanced immunity by increasing the number of lymphocytes.⁴
3. **Endocrine:** Administration of *Jin Gui Shen Qi Wan* in 21-day-old mice for 28 days was associated with a stimulating effect on the endocrine system as evident in the increased weight of the pituitary glands, hypothalamus, and other glands. The dosage given to mice was equivalent to 10 times the human dose, according to weight calculation.⁵

Jin Gui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet)

4. **Reproductive:** Administration of *Jin Gui Shen Qi Wan* in rats was associated with an increase in sperm count and sperm motility.⁶

CLINICAL STUDIES AND RESEARCH

- Diabetes mellitus:** In one study, 38 patients with type II diabetes mellitus for 3 months to 20 years were treated with modified *Jin Gui Shen Qi Wan*. The base formula included *Fu Zi* (Radix Aconiti Lateralis Praeparata) 9g, *Rou Gui* (Cortex Cinnamomi) 5g, *Di Huang* (Radix Rehmanniae) 15g, *Shan Zhu Yu* (Fructus Corni) 15g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, *Shan Yao* (Rhizoma Dioscoreae) 30g, *Long Gu* (Os Draconis) 30g, *Mu Dan Pi* (Cortex Moutan) 10g, *Huang Qi* (Radix Astragali) 20g, *Fu Ling* (Poria) 12g, *Ze Xie* (Rhizoma Alismatis) 12g, and *Wu Bei Zi* (Galla Chinensis) 12g. Other modifications were made based on the patients' clinical presentation. The treatment protocol was to administer the herbs in decoction one time daily for 30 days per course of treatment. Out of 38 patients, the study reported marked improvement in 8 patients, moderate improvement in 16 patients, slight improvement in 12 patients, and no benefit in 2 patients. The overall rate of effectiveness was 94.7%.⁷
- Hypertension:** Use of modified *Jin Gui Shen Qi Wan* in 40 patients with primary hypertension characterized by Spleen and Kidney yang deficiencies was associated with reduction of blood pressure in 82.5% of patients.⁸
- Coronary artery disease:** In one study, 60 geriatric patients with coronary artery disease were divided into two groups: 40 received herbs and 20 received vitamin E capsules. After 1 month of treatment, the study reported that in the herb group, 16 had marked improvement, 14 had moderate improvement, 8 had slight improvement, and 2 had no benefit. In the vitamin E group, 3 had marked improvement, 8 had moderate improvement, 4 had slight improvement, and 5 had no benefit. Overall, the effectiveness rate was 95% for the herb group and 75% for the vitamin E group.⁹
- Asthma:** In one study, 19 patients with asthma were treated with *Jin Gui Shen Qi Wan* as a maintenance therapy. The study indicated that up to 89.5% of the patients noted improvement after using the herbs.¹⁰ According to another study, use of *Jin Gui Shen Qi Wan* three times daily for 6 months or more was associated with 89.5% effectiveness to prevent asthma attacks among 19 patients with asthma.¹¹
- Lumbago:** In one report, 27 patients (aged 35-80 years) with low back pain due to various causes were treated with *Jin Gui Shen Qi Wan* for 4 weeks, with marked improvement in 6 patients, moderate improvement in 11 patients, and slight improvement in 3 patients. The overall rate of effectiveness was 70%.¹²
- Male infertility:** Administration of *Jin Gui Shen Qi Wan* plus *Ren Shen* (Radix et Rhizoma Ginseng) at 7.5 g/day for 12 weeks showed effectiveness in treating 10 male infertility patients between 28-36 years of age. The study noted that 90 days of herbal treatment was required for significant changes in sperm count and motility.¹³ In another study, 51 men with infertility due to low sperm count and motility were treated with 7.5 g/day of *Jin Gui Shen Qi Wan*. Out of 51 men, pregnancy was reported in over 80% of couples within 3 months.¹⁴
- Female infertility:** In one study, 27 women with infertility caused by elevated prolactin levels (above 30 ng/mL) were treated with 2.5-10g of *Jin Gui Shen Qi Wan*. After 3 months of herbal therapy, prolactin levels decreased in 18 out of 27 patients. In addition, the level was < 30 ng/mL in 15 patients. In follow up interviews 6 months later, 12 women had become pregnant. No abnormalities were noted with the mothers or with the fetuses.¹⁵
- Impotence:** One study reported 43.2% effectiveness using *Jin Gui Shen Qi Wan* to treat 37 patients with impotence. The treatment protocol was to administer *Jin Gui Shen Qi Wan* in pills, 5g twice daily for 4 weeks.¹⁶
- Gynecomastia:** In one study, 32 men (21-69 years of age) with unilateral or bilateral gynecomastia for 2 months to 3 years were treated with modified *Jin Gui Shen Qi Wan*. The formula included *Rou Gui* (Cortex Cinnamomi) 6g, *Chi Shao* (Radix Paeoniae Rubra) 15g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, *Shu Di Huang* (Radix Rehmanniae Praeparata) 30g, and *Shan Yao* (Rhizoma Dioscoreae) 10g. In addition, *Xiang Fu* (Rhizoma Cyperi), *Chuan Lian Zi* (Fructus Toosendan), and *Yu Jin* (Radix Curcumae) were added for breast distention and pain. *Xia Ku Cao* (Spica Prunellae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Xuan Shen* (Radix Scrophulariae) were added for swelling and hardness of the breast. *Lu Jiao Shuang* (Cornu Cervi Degelatinatum), *Xian Mao* (Rhizoma Curculiginis), and *Sang Ji Sheng* (Herba Taxilli) were added for soreness of the lower back and knees and lack of sexual desire. *Sha Ren* (Fructus Amomi), *Shen Qu* (Massa Fermentata), and *Bing Lang* (Semen Arecae) were added for poor appetite with a thick, greasy tongue coating. The treatment protocol was to administer the herbs one time daily for 20 days per course of treatment, for 3 courses total. Out of 32 patients, the study reported marked effect in 23 patients, moderate improvement in 7 patients, and no benefit in 2 patients. The overall rate of effectiveness was 93.7%.¹⁷
- Prostatic hypertrophy:** According to numerous reports, the use of *Jin Gui Shen Qi Wan* showed benefits in treating

Jin Gui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet)

patients with prostate-related disorders, such as dysuria, frequent urination, and prostate enlargement.¹⁸ Complete recovery in 33 of 64 patients (51.5%) was reported in one study using modified *Jin Gui Shen Qi Wan* to treat prostatic hypertrophy with symptoms such as frequent urination (especially at night) and painful urination. The treatment protocol was to administer the herbs in decoction daily for 10 days per course of treatment until the resolution of symptoms, followed by maintenance therapy at 2 packs of herbs per week for 3 months.¹⁹

11. Urinary incontinence: In one study, 13 patients with 3 months to 1 year of incontinence were treated with *Jin Gui Shen Qi Wan* with salted water one time daily in the morning, for 10 days per course of treatment. The study reported that 6 patients had complete recovery after taking the herbs for 10-20 days, 4 had marked improvement after 20-30 days, 2 had slight improvement after 30-40 days, and 1 had no benefit.²⁰

12. Chronic glomerulonephritis: One study of 12 patients with chronic glomerulonephritis characterized by yang deficiency reported success (recovery in 10 patients and no benefit in 2 patients) using modified *Jin Gui Shen Qi Wan*. *Wu Jia Pi* (Cortex Acanthopanax) was added for individuals with edema in the legs. The duration of treatment was 21-90 days.²¹

13. Cataract: Use of *Jin Gui Shen Qi Wan* demonstrated effectiveness in treating geriatric patients with cataract. The study reported an overall effectiveness rate of 80%, with improvement in visual acuity noted in 60% of patients and stabilization of glaucoma in 20% of patients. The treatment protocol was to administer 3g of herbs in pills per day in two equally-divided doses. The study also noted that better prognosis was noted in individuals who began herbal therapy early.²²

HERB-DRUG INTERACTION

Prednisone-induced adverse reactions: According to one report, use of *Jin Gui Shen Qi Wan* was effective in treating side effects and adverse reactions associated with long-term use of prednisone, such as dizziness, weight gain, perspiration, and emotional disturbance.²³

TOXICOLOGY

According to a toxicology study, *Jin Gui Shen Qi Wan* was determined to have little toxicity. In rats, *Jin Gui Shen Qi Wan* in powder extract form was given at dosages of 40 mg/kg and 200 mg/kg in decoction one time daily for 6 months, and no abnormalities were noted in general signs and symptoms, complete blood count, urine analysis, and functions of the internal and reproductive organs.²⁴

<i>Fu Ling</i> (Poria)	30g [6g]

Grind the ingredients into a fine powder and form into small pills with honey. The pills should resemble *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 70 pills (9g) on an empty stomach with salted, grain-based liquor. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Shi Bu Wan (Ten-Tonic Pill) warms and tonifies Kidney yang. Clinically, patients may present with a dark facial complexion, cold feet, lower body edema, tinnitus, deafness, an emaciated complexion, weak knees, sore back, and dysuria.

Shi Bu Wan (Ten-Tonic Pill) is composed of *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) and the addition of *Rou Gui* (Cortex Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Lu Rong* (Cornu Cervi Pantotrichum), and *Wu Wei Zi* (Fructus Schisandrae Chinensis). *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) tonifies Kidney yin. *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) warm and tonify Kidney yang. *Lu Rong* (Cornu Cervi Pantotrichum) also warms and tonifies Kidney yang. *Wu Wei Zi* (Fructus Schisandrae Chinensis), an astringent herb, retains qi in the Kidney.

Jīn Guì Shèn Qì Wán (Kidney Qì Pill from the Golden Cabinet)

AUTHORS' COMMENTS

Originally named “*Shen Qi Wan* (Kidney Qi Pill)” by Zhang Zhong-Jing in the Eastern Han Dynasty, this formula today is commonly referred to as *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet). The reason for this change is to avoid confusion and errors, since there are at least 16 formulas with the identical name of “*Shen Qi Wan* (Kidney Qi Pill)” according to *Zhong Yi Fang Ji Da Ci Dian* (Grand Dictionary of Chinese Herbal Formulas).

Shen Qi Wan, literally Kidney Qi Pill, is so named because it uses only a small amount of *Gui Zhi* (Ramulus Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) to generate Kidney qi and ignite *ming men* (life gate) fire. Large doses of these two dry and hot herbs may not be appropriate because they may damage yin and consume fluids, leading to other adverse effects.

Bā Wèi Dì Huáng Wán (Eight-Ingredient Pill with Rehmannia)

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder, and mix the powder with honey and form into small pills that resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 15-25 pills (6-10g) with a grain-based liquor twice daily.

CHINESE THERAPEUTIC ACTIONS

Warms and tonifies Kidney yang

CLINICAL MANIFESTATIONS

Kidney yang deficiency: low back pain, weak legs, cold sensations in the lower body, pain and cramps in the lower abdomen, dysuria or polyuria, a pale, flabby tongue with a thin, white tongue coating, and a deep, fine pulse at the *chi* position. It can also treat leg *qi*, *tan yin* (phlegm retention), and *xiao ke* (wasting and thirsting) syndrome.

CLINICAL APPLICATIONS

Endocrine disorders (diabetes mellitus and insipidus, hyperaldosteronism, hypothyroidism); sexual and reproductive disorders (impotence, premature ejaculation, male and female infertility, gynecomastia); genitourinary disorders (nephritis, nephrosclerosis, kidney stones, renal tuberculosis, proteinuria, anuria, incontinence, nocturia, vesical calculus, prostate disorders); cardiovascular disorders (coronary artery disease, arteriosclerosis, hypertension, hypotension, post-stroke complications); and pulmonary disorders (chronic bronchitis, asthma, pulmonary emphysema). Other uses include lumbago, benign prostatic hyperplasia, cataract and other eye diseases.

EXPLANATION

Ba Wei Di Huang Wan (Eight-Ingredient Pill with Rehmannia) is a modification of *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet). *Di Huang* (Radix Rehmanniae) is replaced with *Shu Di Huang* (Radix Rehmanniae Praeparata) to enhance the yin-tonic effect. *Gui Zhi* (Ramulus Cinnamomi) is substituted with *Rou Gui* (Cortex Cinnamomi) to increase the yang-tonic function. This slightly revised formula, *Ba Wei Di Huang Wan*, is a warmer and slightly stronger yang tonic than *Jin Gui Shen Qi Wan*.

For additional information, please refer to *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet) and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

MODIFICATIONS

Same as for *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet).

CAUTIONS / CONTRAINDICATIONS

Same as for *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet).

PHARMACOLOGICAL EFFECTS

- 1. Immunosuppressant:** In one study, use of *Ba Wei Di Huang Wan* for 9 days was associated with suppressed development of MRL/lpr autoimmune diseases in mice.^{1,2}
- 2. Effect on the prostate:** *Ba Wei Di Huang Wan* has been used to treat various prostate disorders with great success. One study analyzed the mechanism of *Ba Wei Di Huang Wan* and found that this formula acts as a weak androgen and enhances prostatic thymidine kinase activity, but also acts as an anti-androgen and reduces prostatic thymidine kinase activity in the presence of androgen in immature rats.³
- 3. Effect on bone mass density:** In one study on the prevention and treatment of osteoporosis, *Ba Wei Di Huang Wan*, *Wen Jing Tang* (Warm the Channels Decoction), and *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) were administered for 49 days to rats with ovariectomy. Compared to sham-operated rats, the bone mineral density (BMD) of tibia in ovariectomized rats decreased by 20%, but the BMD was unaffected in rats treated with herbs or 17-beta-estradiol. The study concluded that these three formulas were as effective as 17-beta-estradiol in preventing the development of bone loss induced by ovariectomy by preserving the fine particle surface of the bone.⁴
- 4. Antihypertensive and nephroprotective:** Administration of *Ba Wei Di Huang Wan* for 5 weeks dose-dependently decreased systolic blood pressure in rats fed with a high-salt (2% NaCl) diet. This blood pressure reduction was associated with a decrease in cardiac mass and thickness of the aortic wall, increased urinary excretion of prostaglandin E2, improved glomerular filtration rate, and improved glomerulosclerosis and arterial injury in the kidney. The study stated that *Ba Wei Di Huang Wan* had both antihypertensive and nephroprotective effects.⁵
- 5. Endocrine:** Administration of *Ba Wei Di Huang Wan* was shown both *in vitro* and *in vivo* to stimulate the testes and increase the production of testosterone.⁶ Use of this formula also stimulated the corpus luteum and increased secretion of progesterone.⁷

CLINICAL STUDIES AND RESEARCH

- 1. Benign prostatic hyperplasia:** Use of *Ba Wei Di Huang Wan* for two weeks in 41 patients with benign prostatic hyperplasia was associated with significant improvements in emptying, weak stream, max flow rate, and total quality of life score, according to the International Prostate Symptom Score. Of 41 patients, 40% of patients responded well to

Ba Wei Di Huang Wan (Eight-Ingredient Pill with Rehmannia)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Severe Kidney yang deficiency	<ul style="list-style-type: none">• Low back pain, weak legs, cold sensations in the lower back, and lower abdominal pain and cramps: Kidney yang deficiency unable to warm the lower parts of the body• Dysuria or polyuria: Kidney yang unable to regulate water circulation and metabolism• Deep, fine pulse at the <i>chi</i> position: Kidney yang deficiency	Strongly warms and tonifies Kidney yang	<ul style="list-style-type: none">• <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) strongly tonifies Kidney yin and <i>jing</i> (essence).• <i>Shan Zhu Yu</i> (Fructus Corni) tonifies Kidney and Liver yin.• <i>Shan Yao</i> (Rhizoma Dioscoreae) tonifies the Kidney and Spleen.• <i>Fu Ling</i> (Poria), <i>Mu Dan Pi</i> (Cortex Moutan) and <i>Ze Xie</i> (Rhizoma Alismatis) sedate turbidity and prevent the greasiness of the tonic herbs from blocking the qi flow.• <i>Rou Gui</i> (Cortex Cinnamomi) and <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) strongly tonify Kidney yang.

Ba Wei Di Huang Wan therapy, although 2 did not finish administration as a result of epigastric discomfort.⁸

2. **Female infertility:** In one case report, use of bromocriptine was ineffective in treating one infertile hyperprolactinemic woman with a pituitary microadenoma. This woman was subsequently treated with *Ba Wei Di Huang Wan*, and succeeded in having a normal pregnancy and delivery.⁹

3. **Cataract and other eye diseases:** In one study, use of *Ba Wei Di Huang Wan* was associated with delaying cataract appearance by up to 13.9 years. The mechanism of this effect was attributed to inhibition of sodium-potassium ATPase activity and also the oxidation of lens protein.¹⁰ According to another study in 12 healthy adults, administration of *Ba Wei Di Huang Wan* was associated with significant increase in the systolic flow velocity, diastolic flow velocity, and mean flow velocity in the central retinal artery. Because various eye diseases are associated with a decrease of blood flow in the central retinal artery, use of *Ba Wei Di Huang Wan* to increase blood flow provides positive effects for treatment of such eye diseases.¹¹

AUTHORS' COMMENTS

According to *Zhong Yi Fang Ji Da Ci Dian* (Grand Dictionary of Chinese Herbal Formulas), there are seven different formulas with the same name of *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia). All were written by different authors in various texts and references. The formula listed here is generally considered to be the most commonly used formulation today.

Jin Gui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet) and *Ba Wei Di Huang Wan* are essentially the same formulas, except for a few minor differences.

- *Jin Gui Shen Qi Wan* uses *Di Huang* (Radix Rehmanniae) to moderately nourish Kidney yin, and *Gui Zhi* (Ramulus Cinnamomi) to mildly warm Kidney yang. Overall, it is a milder formula that gently tonifies both Kidney yin and yang.
- *Ba Wei Di Huang Wan* uses *Shu Di Huang* (Radix Rehmanniae Praeparata) to strongly tonify Kidney yin, and *Rou Gui* (Cortex Cinnamomi) to strongly warm and tonify Kidney yang. Overall, it potently tonifies both Kidney yin and yang.

According to Dr. Chang Wei-Yen, chronic nephritis can be treated with a combination of *Ba Wei Di Huang Wan*, *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), *Ba Zheng San* (Eight-Herb Powder for Rectification), *Shui Ding Xiang* (Herba Ludwigiae Prostratae), and *Xian Feng Cao* (Herba Bidentis).

(Kidney Qi Pill from Formulas that Aid the Living)

濟生腎氣丸
济生肾气丸

Pinyin Name: *Ji Sheng Shen Qi Wan*

Literal Name: Kidney Qi Pill from Formulas that Aid the Living

Alternate Names: *Jia Wei Shen Qi Wan* (Augmented Kidney Qi Pill), *Chi Sheng Shen Qi Wan*, Life-Saving Renal Chi Pill, Life-Preserving Kidney-Qi Pill, Cyathula and Plantago Formula

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

COMPOSITION

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	15g [6g]
<i>Shan Zhu Yu</i> (Fructus Corni)	30g [6g]
<i>Shan Yao</i> (Rhizoma Dioscoreae), <i>chao</i> (dry-fried)	30g [6g]
<i>Fu Ling</i> (Poria)	30g [6g]
<i>Mu Dan Pi</i> (Cortex Moutan)	30g [6g]
<i>Ze Xie</i> (Rhizoma Alismatis)	30g [6g]
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	60g [9g]
<i>Rou Gui</i> (Cortex Cinnamomi), do not expose to heat	15g [3g]
<i>Chuan Niu Xi</i> (Radix Cyathulae), <i>jin</i> (soaked) with liquor	15g [6g]
<i>Che Qian Zi</i> (Semen Plantaginis), <i>zheng</i> (steamed) with liquor	30g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into a fine powder, mix with honey and form into small pills. The pills should resemble *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 70 pills (9g) with rice soup on an empty stomach. Today, this formula may be prepared as a decoction using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Warms and tonifies Kidney yang
2. Regulates water and relieves edema

CLINICAL MANIFESTATIONS

Kidney yang deficiency with water accumulation: severe pitting edema, cold sensations in the lower body, lumbago, fatigue, sensory numbness, and urinary difficulties.

CLINICAL APPLICATIONS

Diabetes mellitus, diabetic neuropathy, nephrotic syndrome, chronic nephritis, dysuria, oliguria, infertility, prostatic hypertrophy, and osteoporosis.

Jì Shēng Shèn Qì Wán

(Kidney Qì Pill from Formulas that Aid the Living)

EXPLANATION

Ji Sheng Shen Qi Wan (Kidney Qi Pill from Formulas that Aid the Living) treats Kidney yang deficiency accompanied by water accumulation. Kidney yang deficiency is characterized by generalized decline in both physiological and physical functions as a result of insufficiency of *ming men* (life gate) fire to warm the Kidney, leading to compromises in endocrine, sexual, renal, cardiovascular, and pulmonary functions. Additionally, Kidney yang deficiency may lead to abnormal water circulation and metabolism, resulting in edema and urinary difficulties. Clinically, patients will exhibit symptoms and signs such as cold sensations in the lower body, lumbago, fatigue, sensory numbness, and urinary difficulties.

Ji Sheng Shen Qi Wan is comprised of *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), plus *Rou Gui* (Cortex Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Che Qian Zi* (Semen Plantaginis), and *Chuan Niu Xi* (Radix Cyathulae). *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) tonifies the underlying Kidney yin deficiency. Hot in nature, *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi) tonify Kidney yang and warm the lower body. *Fu Zi* (Radix Aconiti Lateralis Praeparata) is an excellent herb to treat various chronic disorders with signs and symptoms of cold. *Rou Gui* (Cortex Cinnamomi) strengthens the Spleen and tonifies Kidney yang. It warms cold hands and feet, relieves abdominal cold and pain, and stops diarrhea. Lastly, *Chuan Niu Xi* (Radix Cyathulae) and *Che Qian Zi* (Semen Plantaginis) promote urination and relieve edema.

MODIFICATIONS

- With weakness and fatigue due to qi deficiency, add *Huang Qi* (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng).

- For impotence and other sexual disorders, add *Gui Ban* (Plastrum Testudinis) and *Lu Jiao Shuang* (Cornu Cervi Degelatinatum).
- With soreness and pain in the upper and lower back, add *Du Zhong* (Cortex Eucommiae) and *Gou Qi Zi* (Fructus Lycii).
- With abdominal fullness and swelling, add *Huang Qi* (Radix Astragali) and *Fang Ji* (Radix Stephaniae Tetrandrae).

CAUTIONS / CONTRAINDICATIONS

- *Ji Sheng Shen Qi Wan* is contraindicated in the following situations: yin-deficient fire, excess fire and damaged body fluids, and the presence of an exterior condition.¹
- Use of this formula is sometimes associated with gastrointestinal irritation. In one study, 5 out of 30 patients who took this formula reported gastrointestinal side effects. In another study, 4 out of 80 patients had similar reactions. In both studies, the gastrointestinal side effects were mild and self-limiting, and resolved spontaneously with discontinuation of the herbs.²

PHARMACOLOGICAL EFFECTS

Hypoglycemic: Administration of *Ji Sheng Shen Qi Wan* to 24 patients with diabetes mellitus with various complications was associated with a marked decrease in plasma glucose levels for two hours.³

CLINICAL STUDIES AND RESEARCH

1. **Diabetic neuropathy:** Administration of *Ji Sheng Shen Qi Wan* in 44 patients with diabetic neuropathy was associated with marked symptomatic improvement, such as relief of pain, numbness, perspiration, and weakness in the lower back and legs. The treatment protocol was to administer the herbs in extract, at doses of 7.5g daily in three equally-divided doses, for 12 weeks or more.⁴
2. **Nephrotic syndrome:** One study reported 94% effectiveness using modified *Ji Sheng Shen Qi Wan* to treat

Ji Sheng Shen Qi Wan (Kidney Qi Pill from Formulas that Aid the Living)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Kidney yang deficiency with water accumulation	<ul style="list-style-type: none">• General decline in physiological and physical functions: Kidney yang deficiency with insufficiency of <i>ming men</i> (life gate) fire• Edema and urinary difficulties: Kidney yang deficiency unable to regulate water circulation and metabolism• Cold sensations in the lower body, and sensory numbness: Kidney yang deficiency unable to warm the body	<ul style="list-style-type: none">• Warms and tonifies Kidney yang• Regulates water and relieves edema	<ul style="list-style-type: none">• <i>Liu Wei Di Huang Wan</i> (Six-Ingredient Pill with Rehmannia) nourishes Liver and Kidney yin.• <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) and <i>Rou Gui</i> (Cortex Cinnamomi) tonify Kidney yang and warm the lower body.• <i>Chuan Niu Xi</i> (Radix Cyathulae) and <i>Che Qian Zi</i> (Semen Plantaginis) promote urination and relieve edema.

Ji Shēng Shèn Qì Wán

(Kidney Qi Pill from Formulas that Aid the Living)

68 patients with nephrotic syndrome. Modifications included the addition of *Sang Bai Pi* (Cortex Mori) and *Bai Mao Gen* (Rhizoma Imperatae) for severe edema; *Yi Yi Ren* (Semen Coicis) and *Sha Ren* (Fructus Amomi) for abdominal fullness with poor appetite; *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis) for Kidney yin-deficient fire; and *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins) for red eyes and face with the presence of sores. Of 68 patients, the study reported complete recovery in 19 patients, improvement in 45 patients, and no change in 4 patients.⁵

3. **Infertility:** *Ji Sheng Shen Qi Wan* was reported in one study of 34 men to have a marked effect in treating male infertility by increasing sperm count and motility. The treatment protocol was to administer 7.5g per day of this formula for 3 months.⁶ In another study, use of *Ji Sheng Shen Qi Wan* was associated with increased sperm count in 16 of 24 men with infertility.⁷
4. **Prostatic hypertrophy:** Administration of *Ji Sheng Shen Qi Wan* was beneficial in treating 23 patients with enlarged prostate who suffered from frequent and difficult urination. The treatment protocol was to administer 7.5 grams of the formula in extract form daily for 8 weeks. The study reported 84% effectiveness in treating frequent and difficult urination.⁸
5. **Osteoporosis:** Administration of 7.5g of *Ji Sheng Shen Qi Wan* daily for 6 months to 2 years in 50 patients (19 males and 31 females, between 61 to 84 years of age) with osteoporosis was associated with marked symptomatic improvements, such as relief of lower back pain and better quality of life.⁹

AUTHORS' COMMENTS

Originally named “*Jia Wei Shen Qi Wan* (Augmented Kidney Qi Pill)” by Yan Yong-He in 1253, this formula today is commonly referred to as *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living). The reason for this change is to avoid confusion and errors, since there are at many formulas with similar names according to *Zhong Yi Fang Ji Da Ci Dian* (Grand Dictionary of Chinese Herbal Formulas).

Jin Gui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet) and *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living) have similar names, but are derived from different sources and have slightly different functions:

- *Jin Gui Shen Qi Wan* has a balanced and stronger effect to tonify both Kidney yin and yang.
- *Ji Sheng Shen Qi Wan* has a stronger effect to tonify Kidney yang and promote urination.

Yòu Guī Wán (Restore the Right [Kidney] Pill)

右歸丸

右归丸

Pinyin Name: *You Gui Wan*

Literal Name: Restore the Right [Kidney] Pill

Alternate Name: Eucommia and Rehmannia Formula

Original Source: *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

COMPOSITION

<i>Rou Gui</i> (Cortex Cinnamomi)	60-120g [6-12g]
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>zhi</i> (prepared)	60-180g [6-18g]
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	240g [24g]
<i>Shan Zhu Yu</i> (Fructus Corni), <i>chao</i> (dry-fried)	90g [9g]
<i>Shan Yao</i> (Rhizoma Dioscoreae), <i>chao</i> (dry-fried)	120g [12g]
<i>Gou Qi Zi</i> (Fructus Lycii), <i>chao</i> (dry-fried)	120g [12g]
<i>Lu Jiao Jiao</i> (Colla Cornus Cervi), <i>chao</i> (dry-fried)	120g [12g]
<i>Tu Si Zi</i> (Semen Cuscutae), <i>zhi</i> (prepared)	120g [12g]
<i>Du Zhong</i> (Cortex Eucommiae), <i>chao</i> (dry-fried) with ginger juice	120g [12g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	90g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and mix it with honey to form small pills. Take 100 or more pills with boiled water. Today, it is prepared by mixing the powdered herbs with honey to form pills, with each pill weighing about 15g. Take 1 pill on an empty stomach in the morning and at night with water. This formula may also be prepared as a decoction using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Warms and tonifies Kidney yang
2. Replenishes *jing* (essence) and tonifies the blood

CLINICAL MANIFESTATIONS

Kidney yang deficiency with diminished *ming men* (life gate) fire: low energy and lethargy as a result of chronic illness, aversion to cold, cold extremities, impotence, premature ejaculation, seminal emissions, low sperm count, urinary incontinence, loose stools with undigested food, weakness of the lower back and knees, and edema of the legs.

CLINICAL APPLICATIONS

Infertility, impotence, seminal emissions, frequent urination, nephrotic syndrome, chronic nephritis, diabetes mellitus, bronchial asthma, sciatica, lumbago, and hypertrophic myelitis.

EXPLANATION

You Gui Wan (Restore the Right [Kidney] Pill) treats Kidney yang deficiency with diminished *ming men* (life gate) fire. As the source of yang, when *ming men* (life

gate) fire diminishes, the entire body will be affected. When Kidney yang is deficient, it is unable to warm the body, resulting in aversion to cold and cold extremities. Kidney yang deficiency may lead to Spleen and Stomach yang deficiencies, resulting in low energy, lethargy and loose stools with undigested food. In males, Kidney yang deficiency often leads to sexual and reproductive disorders, such as impotence, premature ejaculation, seminal emissions, and low sperm count. Kidney yang deficiency can affect urinary function and cause urinary disorders, such as urinary incontinence. It can also impair the body's ability to regulate water metabolism, giving rise to edema of the lower legs and loose stools. Because the Kidney resides in the low back area, Kidney deficiency may cause weakness of the lower back and knees. Chronic illness may consume the yang qi of the body, causing low energy and lethargy.

Rou Gui (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) warm Kidney yang and raise *ming men* (life gate) fire. According to the yin-yang theory of mutual dependence, in order to effectively tonify Kidney yang, Kidney yin must also be nourished. Thus, this formula uses *Shu Di Huang* (Radix Rehmanniae Praeparata), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae), and *Gou Qi Zi* (Fructus Lycii) to nourish Kidney yin and replenish *jing* (essence). *Lu Jiao Jiao* (Colla Cornus Cervi), *Tu Si Zi* (Semen Cuscutae), and *Du Zhong* (Cortex Eucommiae) warm Kidney yang, replenish *jing*, and tonify the Liver and Kidney to strengthen the bones and tendons. *Dang Gui* (Radix Angelicae Sinensis) tonifies the blood and nourishes the Liver.

Yòu Guī Wán (Restore the Right [Kidney] Pill)

You Gui Wan (Restore the Right [Kidney] Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Kidney yang deficiency with diminished <i>ming men</i> (life gate) fire	<ul style="list-style-type: none"> • Low energy, lethargy, aversion to cold, and cold extremities: diminished <i>ming men</i> fire • Weakness of the lower back and knees, impotence, premature ejaculation, seminal emissions, low sperm count: Kidney yang deficiency • Urinary incontinence and edema of the legs: Kidney yang deficiency unable to regulate water circulation and metabolism 	<ul style="list-style-type: none"> • Warms and tonifies Kidney yang • Replenishes <i>jing</i> (essence) and tonifies the blood 	<ul style="list-style-type: none"> • <i>Rou Gui</i> (Cortex Cinnamomi) and <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) warm Kidney yang and raise <i>ming men</i> fire. • <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>Shan Zhu Yu</i> (Fructus Corni), <i>Shan Yao</i> (Rhizoma Dioscoreae) and <i>Gou Qi Zi</i> (Fructus Lycii) nourish Kidney yin and replenish <i>jing</i>. • <i>Lu Jiao Jiao</i> (Colla Cornus Cervi), <i>Tu Si Zi</i> (Semen Cuscutae), and <i>Du Zhong</i> (Cortex Eucommiae) warm Kidney yang, replenish <i>jing</i>, and tonify the Liver and Kidney. • <i>Dang Gui</i> (Radix Angelicae Sinensis) tonifies the blood and nourishes the Liver.

MODIFICATIONS

- For severe indigestion, acid regurgitation, or decreased dietary intake, add *Gan Jiang* (Rhizoma Zingiberis).
- With abdominal pain, add *Wu Zhu Yu* (Fructus Evodiae).
- With soreness and pain of the lower back and knees, add *Hu Tao Ren* (Semen Juglandis).
- For impotence as a result of yang deficiency, add *Ba Ji Tian* (Radix Morindae Officinalis) and *Rou Cong Rong* (Herba Cistanches Deserticolae).
- With seminal emissions or clear vaginal discharge, add *Bu Gu Zhi* (Fructus Psoraleae).
- For chronic diarrhea, add *Bu Gu Zhi* (Fructus Psoraleae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Rou Dou Kou* (Semen Myristicae).

CAUTIONS / CONTRAINDICATIONS

- *You Gui Wan* is contraindicated in cases of Kidney deficiency and damp accumulation.
- Avoid cold and raw foods while taking this formula.¹

PHARMACOLOGICAL EFFECTS

1. **Immunostimulant:** In one experiment, daily administration of the formula at 30 g/kg orally for 5 days was associated with increased phagocytic activity of the macrophages in mice.²
2. **Adaptogenic:** Use of *You Gui Wan* was associated with improved physical performance in various laboratory studies. In one study, oral administration of the formula at 20-30 g/kg for 5 days increased the duration of swimming in mice ($P < 0.01$).³
3. **Cognitive:** One study reported improved cognition (improved memory and decreased repetition of errors) in mice that were administered *You Gui Wan* at 30 g/kg and 20 g/kg (dose based on dried herbs) for 5 days.⁴

4. **Antiplatelet:** In one study, oral administration of the formula at 20 g/kg for 5 days was associated with a mild antiplatelet effect.⁵

5. **Hepatoprotective:** In a laboratory experiment, oral administration of the formula at 20-30 g/kg for 5 days was effective in protecting against liver damage induced by injection of 0.1% carbon tetrachloride.⁶

CLINICAL STUDIES AND RESEARCH

1. **Male infertility:** One study reported successful treatment in all 11 male patients with a history of infertility (the female partners became pregnant) using modified *You Gui Wan* in decoction.⁷
2. **Frequent urination:** Frequent urination in elderly patients was successfully treated using *You Gui Wan* plus *Suo Quan Wan* (Shut the Sluice Pill). In addition to these two formulas, others herbs were added as deemed necessary: *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) for Spleen and Lung qi deficiencies; *Chuan Xiong* (Rhizoma Chuanxiong) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for blood stagnation; and *Gui Ban* (Plastrum Testudinis), *Niu Xi* (Radix Achyranthis Bidentatae), and *Zhi Mu* (Rhizoma Anemarrhenae) for yin deficiency. *Gui Lu Er Xian Jiao* (Tortoise Shell and Deer Antler Syrup) was given at the end to consolidate the treatment effect. The treatment protocol was to administer the herbs in decoction daily for 3 weeks per course of treatment. Of 64 patients, 17 had complete recovery, 21 showed significant improvement, 21 showed slight improvement, and 5 showed no change.⁸
3. **Nephrotic syndrome:** In one report, 6 patients with nephrotic syndrome who were unresponsive to drug treatment (steroids) were treated with herbs with satisfactory results. General progress included symptomatic improvement and a reduction of protein in the urine.⁹

Yòu Guī Wán (Restore the Right [Kidney] Pill)

4. **Bronchial asthma:** In a clinical study, long-term administration of *You Gui Wan* was successful in preventing asthma. The treatment protocol was to take the formula daily for 2 months prior to the seasonal changes starting in August. For patients who followed the protocol for 3 years, the success rate was between 83-95.5%. Moreover, 50% of the patients who were dependant on corticosteroids for prevention and treatment of asthma were able to discontinue the drugs.¹⁰
5. **Sciatica:** Use of modified *You Gui Wan* in 48 patients with sciatica was associated with complete recovery in 32 cases, significant improvement in 12 cases, and no benefit in 4 cases.¹¹
6. **Hypertrophic myelitis:** Use of modified *You Gui Wan* successfully treated hypertrophic myelitis. The treatment protocol was to administer the herbs for 10-15 days per course of treatment, with duration ranging from 10-42 days. Of 48 patients, the study reported complete recovery in 31 cases and improvement in 17 cases. Most patients had relief of pain after 2-3 days, and resolution of all symptoms after 10 days.¹²

HERB-DRUG INTERACTION

Corticosteroid-induced immune suppression: One study found *You Gui Wan* to be effective in reversing corticosteroid-induced immune suppression in rats. The mechanism was attributed to the “yang-tonifying” effect of the formula, as subjects who use steroids for a long period of time often have “yang deficiency” signs and symptoms, such as edema, swelling, and immune-suppression.¹³

TOXICOLOGY

In an acute toxicology study, no fatality was reported in mice following oral ingestion of a bolus dose of 50 g/kg and 25 g/kg of raw herbs in decoction. No abnormalities were observed in follow-up observation for up to 7 days.¹⁴

Jia Wei You Gui Wan (Augmented Restore the Right [Kidney] Pill) is a slight variation of the original *You Gui Wan*. In comparison to the original formulation, *Jia Wei You Gui Wan* (Augmented Restore the Right [Kidney] Pill) is slightly stronger, since it contains additional herbs to tonify Kidney yang and replenish Kidney *jing* (essence). This formula may be used for patients with primary Kidney yang deficiency accompanied by secondary Kidney yin and *jing* deficiencies.

Yòu Guī Wán (Restore the Right [Kidney] Pill)

AUTHORS' COMMENTS

You Gui Wan (Restore the Right [Kidney] Pill) differs from *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia) in the same way that *Zuo Gui Wan* (Restore the Left [Kidney] Pill) differs from *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

- *You Gui Wan* and *Zuo Gui Wan* tonify the Kidney without sedation. They have a more potent and immediate tonifying effect, and are more suitable for treating acute and severe cases.
- *Ba Wei Di Huang Wan* and *Liu Wei Di Huang Wan* tonify and sedate the Kidney at the same time. They have a moderate tonifying effect, and are suitable for long-term use to treat chronic deficiencies.

Yòu Guī Wán (Restore the Right [Kidney] Pill) and *Zuó Guī Wán* (Restore the Left [Kidney] Pill) have similar names and functions. These formulas may be used singularly, or in combination.

- *You Gui Wan* tonifies Kidney yang.
- *Zuo Gui Wan* tonifies Kidney yin.

Huán Shào Dān (Return to Youth Pill)

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and mix with honey to form pills. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 30 pills per dose three times daily on an empty stomach with a warm, grain-based liquor and/or warm, salted water. The source text states that improvement will be noted between 5 to 30 days of continuous use. It also states that this formula is safe for long-term use.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen, Stomach, Kidney and Heart
2. Tonifies qi, blood and *jing* (essence)
3. Warms yang

CLINICAL MANIFESTATIONS

Premature aging as a result of Spleen and Kidney deficiencies with insufficiency of qi, blood, yang and *jing* (essence): decreased libido, seminal emissions, generalized weakness and fatigue, anorexia, low-grade fever, forgetfulness, easily frightened, night sweats, toothache, and gum swelling.

CLINICAL APPLICATIONS

Spermatorrhea, seminal emissions, decreased libido, impotence, and premature aging.

EXPLANATION

Huan Shao Dan (Return to Youth Pill) treats premature aging in both men and women. Premature aging is commonly caused by excessive consumption of qi, blood, yang and *jing* (essence) with underlying deficiencies of the Spleen, Stomach, Heart and Kidney. Spleen and Stomach deficiencies result in an inadequate supply of qi, which manifests in symptoms such as generalized weakness, fatigue, and anorexia. Deficiencies of blood and Heart may lead to forgetfulness, being easily frightened, low-grade fever, and night sweats. Lastly, lack of *jing* is often accompanied by Kidney yang deficiency, leading to decreased libido, seminal emissions, and other sexual disorders.

Rou Cong Rong (Herba Cistanches), *Ba Ji Tian* (Radix Morindae Officinalis), and *Xiao Hui Xiang* (Fructus Foeniculi) strengthen Spleen qi and Kidney yang. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Shan Zhu Yu* (Fructus Corni) and *Gou Qi Zi* (Fructus Lycii) nourish the Kidney and benefit qi. *Du Zhong* (Cortex Eucommiae) and *Niu Xi* (Radix Achyranthis Bidentatae) tonify the Kidney and strengthen the knees and lower back. *Fu Ling* (Poria) and *Shan Yao* (Rhizoma Dioscoreae) strengthen the Spleen and dissolve dampness. *Wu Wei Zi* (Fructus Schisandrae Chinensis) reduces the loss of fluids from the Kidney, namely seminal emissions. *Yuan Zhi* (Radix

Premature aging	<ul style="list-style-type: none"> • Generalized weakness, fatigue, and anorexia: deficiencies of qi, Spleen and Stomach • Forgetfulness, being easily frightened, low-grade fever, and night sweats: deficiencies of blood and Heart • Decreased libido, seminal emissions, and other sexual disorders: deficiencies of <i>jing</i> (essence) and Kidney 	<ul style="list-style-type: none"> • Strengthens the Spleen, Stomach, Heart and Kidney • Tonifies the qi, blood, and <i>jing</i> • Warms yang 	<ul style="list-style-type: none"> • <i>Rou Cong Rong</i> (Herba Cistanches), <i>Ba Ji Tian</i> (Radix Morindae Officinalis) and <i>Xiao Hui Xiang</i> (Fructus Foeniculi) strengthen the Spleen and Kidney. • <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>Shan Zhu Yu</i> (Fructus Corni) and <i>Gou Qi Zi</i> (Fructus Lycii) nourish the Kidney and benefit qi. • <i>Du Zhong</i> (Cortex Eucommiae) and <i>Niu Xi</i> (Radix Achyranthis Bidentatae) tonify the Kidney and strengthen the knees and lower back. • <i>Fu Ling</i> (Poria) and <i>Shan Yao</i> (Rhizoma Dioscoreae) strengthen the Spleen and dissolve dampness. • <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) reduces the loss of fluids from the Kidney. • <i>Yuan Zhi</i> (Radix Polygalae) tonifies the Heart and calms the <i>shen</i> (spirit). • <i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii) opens the sensory orifices. • <i>Da Zao</i> (Fructus Jujubae) tonifies qi and blood. • <i>Chu Shi Zi</i> (Fructus Broussonetiae) warms and tonifies yang to strengthen the muscles and bones.

Huán Shào Dān (Return to Youth Pill)

Polygalae) tonifies the Heart and calms the *shen* (spirit). *Shi Chang Pu* (Rhizoma Acori Tatarinowii) opens the sensory orifices and improves mental functions. *Da Zao* (Fructus Jujubae) tonifies qi and blood, and strengthens the Lung and Spleen. *Chu Shi Zi* (Fructus Broussonetiae) warms and tonifies yang to strengthen the muscles and bones. Taking the formula with salted water allows the salt to function as a channel-guiding substance to the Kidney, to enhance the Kidney tonifying effect of this formula.

MODIFICATIONS

- If there is lack of appetite, add *Lian Zi* (Semen Nelumbinis) and *Qian Shi* (Semen Euryales).
- With low-grade fever and night sweats, add *Mai Dong* (Radix Ophiopogonis) and *Ren Shen* (Radix et Rhizoma Ginseng).
- For fatigue and weakness, add *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), and *Dang Gui* (Radix Angelicae Sinensis).

CAUTIONS / CONTRAINDICATIONS

- According to one report, use of *Huan Shao Dan* continuously for one month was associated with occasional side effects such as a dry mouth, constipation, and a feeling of warmth in the body. These reactions are self-limiting, and will resolve within 2 to 3 weeks.¹
- Use of this formula is contraindicated during pregnancy.²

Huan Shao Di Huang Wan (Rehmannia Pill to Return to Youth) follows the principles of two classic formulas: *Huan Shao Dan* and *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia). The combination of these two formulas enhances their overall synergy for tonifying Kidney yang and treating sexual, reproductive, endocrine, and musculoskeletal disorders. Clinical applications include premature aging with diminished sexual and physical functions.

Bu Shen Tang (Tonify the Kidney Decoction) primarily treats sexual and reproductive disorders in both men and women by fortifying Kidney yang and *jing* (essence), tonifying qi, and nourishing the blood. Clinically, it treats disorders such as decreased libido, infertility, impotence, premature ejaculation, seminal emissions, and low sperm count.

<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare this formula as a decoction and take it in two equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Warms Kidney yang
2. Tonifies Kidney *jing* (essence)
3. Drains deficiency fire from the Kidney

CLINICAL MANIFESTATIONS

Kidney yin and yang deficiencies with fire rising: menstrual disturbances, amenorrhea, hot flashes, mood swings, night sweats, nervousness, irritability, insomnia, fatigue, lassitude, palpitations, and urinary frequency.

CLINICAL APPLICATIONS

Infertility, menopause, amenorrhea, essential hypertension, chronic glomerulonephritis, nephritis, nephropathy, chronic pyelonephritis, polycystic kidneys, aplastic anemia, and urinary tract infection.

EXPLANATION

Er Xian Tang (Two-Immortal Decoction) treats chronic and complicated disorders characterized by underlying Kidney yin and yang deficiencies, accompanied by

deficiency fire rising. Because of Kidney yin deficiency, female patients may show symptoms such as menstrual disturbances, amenorrhea, hot flashes, and night sweats. Because of Kidney yang deficiency, patients will experience fatigue, lassitude, and urinary frequency. As a result of the chronic nature of the illness, Kidney yin and yang become ever more deficient and deficiency fire begins to rise to disturb the Heart, producing symptoms such as nervousness, irritability, mood swings, and insomnia.

The treatment strategy is to warm Kidney yang, tonify Kidney *jing* (essence), and drain deficiency fire. However, the selection of herbs and their doses is absolutely critical because herbs that tonify yang may contribute to more heat and fire, and herbs that clear fire may damage yin further. *Xian Mao* (Rhizoma Curculiginis), *Yin Yang Huo* (Herba Epimedii), and *Ba Ji Tian* (Radix Morindae Officinalis) warm Kidney yang and tonify Kidney *jing*. *Yin Yang Huo* (Herba Epimedii) tonifies both Kidney yin and yang. *Huang Bo* (Cortex Phellodendri Chinensis) and *Zhi Mu* (Rhizoma Anemarrhenae) nourish Kidney yin and clear deficiency fire. *Dang Gui* (Radix Angelicae Sinensis) nourishes the blood and regulates the *chong* (thoroughfare) and *ren* (conception) channels to treat menstrual disturbances.

Èr Xiān Tāng (Two-Immortal Decoction)

Er Xian Tang (Two-Immortal Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Kidney yin and yang deficiencies with fire rising	<ul style="list-style-type: none"> • Menstrual disturbances, amenorrhea, hot flashes, and night sweats: Kidney yin deficiency • Fatigue, lassitude, and urinary frequency: Kidney yang deficiency • Nervousness, irritability, mood swings, and insomnia: deficiency fire rising to disturb the Heart 	<ul style="list-style-type: none"> • Warms Kidney yang • Tonifies Kidney <i>jing</i> (essence) • Drains deficiency fire from the Kidney 	<ul style="list-style-type: none"> • <i>Xian Mao</i> (Rhizoma Curculiginis), <i>Yin Yang Huo</i> (Herba Epimedii) and <i>Ba Ji Tian</i> (Radix Morindae Officinalis) warm Kidney yang and tonify Kidney <i>jing</i>. • <i>Huang Bo</i> (Cortex Phellodendri Chinensis) and <i>Zhi Mu</i> (Rhizoma Anemarrhenae) nourish Kidney yin and clear deficiency fire. • <i>Dang Gui</i> (Radix Angelicae Sinensis) nourishes the blood.

MODIFICATIONS

- For hypertension during menopause, add *Du Zhong* (Cortex Eucommiae).
- With hot flashes, add *Yin Chai Hu* (Radix Stellariae) and *Hu Huang Lian* (Rhizoma Picrorhizae).
- If there is insomnia, add *Yuan Zhi* (Radix Polygalae) and *Suan Zao Ren* (Semen Ziziphi Spinosae).

PHARMACOLOGICAL EFFECTS

1. **Endocrine:** One study evaluated the effect of *Er Xian Tang* and its components on sex hormones in rats. The rats were divided into four groups: group one was the control, group two received *Er Xian Tang*, group three received Kidney and blood-tonifying herbs [*Xian Mao* (Rhizoma Curculiginis), *Yin Yang Huo* (Herba Epimedii), *Dang Gui* (Radix Angelicae Sinensis), and *Ba Ji Tian* (Radix Morindae Officinalis)] and group four received herbs that clear yin-deficient fire [*Huang Bo* (Cortex Phellodendri Chinensis) and *Zhi Mu* (Rhizoma Anemarrhenae)]. The treatment protocol was to administer 10 times the normal dose daily for 10 days, followed by 3 days of rest, and repeat again for a total of 6 months of treatment. At the end of the treatment period, the study reported that in comparison with the control group, rats that received herbs had a statistically significant increase in testosterone in male rats and estradiol in female rats, and a decrease in luteinizing-releasing hormone in both sexes.¹ (Note: Information on comparisons among the three herb groups was unavailable at the time of publication.)
2. **Antihypertensive:** Administration of *Er Xian Tang* was associated with a marked reduction in blood pressure in various laboratory studies. In one study, administration of the formula at 10 g/kg for 2 weeks was associated with a 9-15% reduction in blood pressure in rats. In another study, administration of the formula to anesthetized cats at 6 g/kg was associated with a 30% reduction in blood pressure 2 hours after the treatment. The researchers noted that *Huang Bo* (Cortex Phellodendri Chinensis)

and *Yin Yang Huo* (Herba Epimedii) were the main ingredients responsible for the antihypertensive effects of the formula.²

3. **Antioxidant:** Administration of *Er Xian Tang* was associated with an anti-aging effect, an antioxidant effect, and reduction of free radicals.³

CLINICAL STUDIES AND RESEARCH

1. **Infertility:** Administration of modified *Er Xian Tang* was successful in treating women with infertility due to irregular menstruation. Of the 26 women, 9 were between 25-27 years of age, 12 between 28-30 years of age, and 5 above 30 years of age. The treatment period ranged from 37 days to 1 year, with an average of 4-7 months. The study reported a success rate of 69.23% (18 pregnancies in 26 patients).⁴
2. **Menopause:** Many studies indicate that *Er Xian Tang* effectively treats menopausal signs and symptoms. In one study of 64 patients between the ages of 45-58, use of *Er Xian Tang* was deemed very effective. The formula contained 10g each of *Yin Yang Huo* (Herba Epimedii), *Xian Mao* (Rhizoma Curculiginis), *Ba Ji Tian* (Radix Morindae Officinalis), *Huang Bo* (Cortex Phellodendri Chinensis), *Zhi Mu* (Rhizoma Anemarrhenae), *Dang Gui* (Radix Angelicae Sinensis), and others if necessary. The treatment protocol was to administer the herbs in decoction daily for one month per course of treatment. Out of 64 patients, the study reported marked improvement in 41 patients, moderate improvement in 22 patients, and no change in 1 patient. The overall rate of effectiveness was 98%.⁵
3. **Nephropathy:** In one study, 60 children with a history of nephropathy from 3 days to 3 years were treated successfully with herbs. The children were divided into two groups: group one received prednisone, and group two received the prednisone with herbs. The herbal formula contained 10g of dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and 6g each of *Xian Mao* (Rhizoma Curculiginis), *Yin Yang Huo* (Herba Epimedii), *Bu Gu*

Èr Xiān Tāng (Two-Immortal Decoction)

Zhi (Fructus Psoraleae), *Huang Qi* (Radix Astragali), *Rou Cong Rong* (Herba Cistanches), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Fang Feng* (Radix Saposhnikoviae). The herbs were given as decoction daily. After one year of treatment, the study reported that individuals in group two (drug and herb group) responded much better than group one (drug group), with alleviation of signs and symptoms. Upon follow-up 3-6 months after the discontinuation of treatment, group two had only 6.6% recurrence, while group one had 36.6% recurrence.⁶

4. **Aplastic anemia:** In one study of 84 patients, use of *Er Xian Tang* to warm and tonify the Spleen and Kidney was associated with good results in treating aplastic anemia. Of 84 patients, the total effective rate was 84.5%, and the remission rate was 47.6%. The mechanism of action was attributed to the nourishing effect of the formula and stimulation of hemopoiesis stem cell. The experiment showed that use of *Er Xian Tang* was associated with an increase in CFU-S and GM-CFU in the bone marrow.⁷

Er Xian Bu Shen Tang (Two-Immortal Decoction to Tonify the Kidney) tonifies Kidney yin, yang and *jing* (essence). It treats male infertility by enhancing the sexual and reproductive functions.

AUTHORS' COMMENTS

Er Xian Tang, literally “Two-Immortal Decoction,” is aptly named for two reasons. First, the two chief herbs, *Xian Mao* (Rhizoma Curculiginis) and *Yin Yang Huo* (Herba Epimedii), effectively tonify the Kidney to prolong life. Second, it is called *Er Xian Tang* because the two chief herbs both contain “*Xian*” in their names: *Xian Mao* (Rhizoma Curculiginis) and *Xian Ling Pi* (Herba Epimedii). Note: *Xian Ling Pi* (Herba Epimedii) is an alternate name for *Yin Yang Huo* (Herba Epimedii).

Section 6

阴阳两补剂 — Yīn- and Yang-Tonifying Formulas

Guī Lù Èr Xiān Jiāo (Tortoise Shell and Deer Antler Syrup)

龜鹿二仙膠 龟鹿二仙胶

Pinyin Name: *Gui Lu Er Xian Jiao*

Literal Name: Tortoise Shell and Deer Antler Syrup

Alternate Names: *Gui Lu Er Xian Gao* (Tortoise Shell and Deer Antler Paste)

Original Source: *Yi Bian* (Ordinary Medicine) by Wang San-Cai in 1587

COMPOSITION

<i>Gui Ban</i> (Plastrum Testudinis)	2,400g
<i>Mi Lu Jiao</i> (Cornu Elaphuri)	4,800g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	450g
<i>Gou Qi Zi</i> (Fructus Lycii)	900g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to use fresh deer horn from Pere David's deer (*Elaphurus davidianus*), and not from elk or red deer (*Cervus elaphus*). Cut *Mi Lu Jiao* (Cornu Elaphuri) and crush *Gui Ban* (Plastrum Testudinis) into small pieces, and soak them in running water for 3 days. Simmer these two substances for 7 days to obtain a condensed extract. Separately simmer *Ren Shen* (Radix et Rhizoma Ginseng) and *Gou Qi Zi* (Fructus Lycii) to obtain a condensed extract. Mix these two batches of condensed extracts together, and simmer it over low intensity fire to make a condensed syrup. The preparation is finished when drops of the syrup crystallize. Take 4.5-9g of the syrup on an empty stomach every morning with a grain-based alcohol or lightly-salted water.

CHINESE THERAPEUTIC ACTIONS

1. Replenishes yin and tonifies *jing* (essence)
2. Benefits qi and strengthens Kidney yang

CLINICAL MANIFESTATIONS

Kidney yin and yang deficiencies accompanied by blood and *jing* (essence) deficiencies of the *du* (governing) and *ren* (conception) channels: weight loss, seminal emissions, impotence, dizziness, blurred vision, and soreness and weakness of the lower back and knees.

CLINICAL APPLICATIONS

Osteoporosis, hypothyroidism, hypotension, impotence, nocturnal emissions, and lumbago.

EXPLANATION

Gui Lu Er Xian Jiao (Tortoise Shell and Deer Antler Syrup) treats Kidney yin and yang deficiencies, as well as deficiencies of *jing* (essence) and blood of the *du* (governing) and *ren* (conception) channels. Because of its wide range of functions, this formula can treat a variety of disorders.

Mi Lu Jiao (Cornu Elaphuri) enters the *du* (governing) channel and tonifies yang. *Gui Ban* (Plastrum Testudinis) enters the *ren* (conception) channel and tonifies yin. Together, these two animal substances have a synergistic effect to strongly tonify yin and yang, and to promote the generation of blood, *jing* (essence), and marrow. In addition, *Ren Shen* (Radix et Rhizoma Ginseng) tonifies *yuan* (source) *qi*, and *Gou Qi Zi* (Fructus Lycii) nourishes yin. Overall, this is an excellent and comprehensive formula that tonifies yin, yang, qi, blood, *jing*, and marrow.

MODIFICATIONS

- For frequent infections as a result of generalized weakness and deficiency, add *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle) or *Bu*

Guī Lù Ēr Xiān Jiāo (Tortoise Shell and Deer Antler Syrup)

Gui Lu Er Xian Jiao (Tortoise Shell and Deer Antler Syrup)

 - For impotence, add *Yin Yang Huo* (Herba Epimedii) and *Du Zhong* (Cortex Eucommiae).
 - For seminal emissions, add *Jin Ying Zi* (Fructus Rosae Laevigatae).
 - If there is dizziness, add *Gou Qi Zi* (Fructus Lycii), *Ju Hua* (Flos Chrysanthemi), and *Tian Ma* (Rhizoma Gastrodiae).
- in treatment of osteoporosis. The women's age ranged from 36 to 67, with an average age of 48.8 years. Osteoporosis was diagnosed and confirmed using bone mass density (BMD). The treatment protocol was to administer 5 grams of powdered extract of the herbal formula twice daily for one year. BMD was measured before and at the end of the trial. After one year of herbal therapy, there was an average increase of 3.4% BMD among the 28 women. The researchers concluded the herbs to be effective in the treatment of osteoporosis.²

2. **Impotence:** In one clinical study, modified *Gui Lu Er Xian Jiao* was used to treat 826 patients with impotence. The age of the patients ranged from 17-55, and the duration of the condition ranged from 6 months to 8 years. Out of 826 patients, 608 were married and 218 were single. The formula included *Gui Ban Jiao* (Gelatinum Plastrum Testudinis) 20g, *Lu Jiao Jiao* (Colla Cornus Cervi) 20g, *Yin Yang Huo* (Herba Epimedii) 30g, *Du Zhong* (Cortex Eucommiae) 10g, *Gou Qi Zi* (Fructus Lycii) 10g, *Shou Wu Teng* (Caulis Polygoni Multiflori) 30g, and others. Modifications included the addition of *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) for feeling of coldness in the testicles, lower back, and legs; *Sha Ren* (Fructus Amomi), *Shan Yao* (Rhizoma Dioscoreae), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for poor appetite; *Suan Zao Ren* (Semen Ziziphi Spinosae), *Mai Dong* (Radix Ophiopogonis), and *Fu Shen* (Poria Paradicis) for excessive dreams at night; *Sang Shen* (Fructus Mori) and *Fu Pen Zi* (Fructus Rubi) for clear and profuse urination; and a larger dose of *Du Zhong* (Cortex Eucommiae) for incomplete erection. The formula was given orally as a decoction, and externally as steam therapy (by directing the steam to the penis). In addition, patients also received twice daily 30-50 mL of herbal wine made of *Ren Shen* (Radix et Rhizoma Ginseng) 20g and *Lu Rong* (Cornu Cervi Pantotrichum) 5g. Out of 826 cases, the study reported marked effects in 723 cases, improvement in 82 cases, and no effect in 21 cases. The overall effectiveness rate was 97.48%. The

CAUTIONS / CONTRAINDICATIONS

- *Gui Lu Er Xian Jiao* should be used with caution in cases of Spleen and/or Stomach deficiencies.
- This formula is contraindicated in patients with interior heat or yang rising.

PHARMACOLOGICAL EFFECTS

It has been reported that modified *Gui Lu Er Xian Jiao* has numerous valuable therapeutic effects, including but not limited to adaptogenic, antihyperlipidemic, and immunologic.¹

CLINICAL STUDIES AND RESEARCH

1. **Osteoporosis:** In one clinical study, 28 women were given *Gui Lu Er Xian Jiao* to determine the effects of these herbs

Guī Lù Ēr Xiān Jiāo (Tortoise Shell and Deer Antler Syrup)

duration of treatment was between 3-16 packs of raw herbs as decoction.³

3. **Hypotension:** One study reported good results using modified *Gui Lu Er Xian Jiao* to raise blood pressure. The herbal formula contained *Gui Lu Er Xian Jiao* plus *Dang Gui* (Radix Angelicae Sinensis), *Tu Si Zi* (Semen Cuscutae), *Shu Di Huang* (Radix Rehmanniae Praeparata) and others. The herbs were given in decoction daily, for 20 days per course of treatment, with 2 courses for most patients. Of 62 cases, the study reported complete recovery in 35 cases, moderate improvement in 19 cases, slight improvement in 6 cases, and no benefit in 2 cases.⁴

Kun Bu (Thallus Eckloniae)

Bu Shen Wan (Tonify the Kidney Pill) treats hypothyroidism characterized by Kidney yin, yang, and *jing* (essence) deficiency. This formula tonifies Kidney yin, yang and *jing* (essence), and warms the *ming men* (life gate) fire. In addition, *Hai Zao* (Sargassum) and *Kun Bu* (Thallus Eckloniae) dispel phlegm and soften nodules.

These two herbs are rich in iodine and are essential for the production of thyroid hormone.

Bǔ Gǔ Wán (Tonify the Bone Pill)

補骨丸
补骨丸

Pinyin Name: *Bu Gu Wan*

Literal Name: Tonify the Bone Pill

COMPOSITION

<i>He Shou Wu</i> (Radix Polygoni Multiflori), <i>zheng</i> (steamed) with <i>Hei Dou</i> (Semen Sojae) and sun-dried	480g [18g]
<i>Gou Qi Zi</i> (Fructus Lycii), <i>jin</i> (soaked) in liquor	240g [9g]
<i>Tu Si Zi</i> (Semen Cuscutae), <i>jin</i> (soaked) and <i>zheng</i> (steamed) in liquor	240g [9g]
<i>Niu Xi</i> (Radix Achyranthis Bidentatae), <i>jin</i> (soaked) in liquor	240g [9g]
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>xi</i> (washed) with liquor	240g [9g]
<i>Bu Gu Zhi</i> (Fructus Psoraleae), <i>ban</i> (blended) and <i>chao</i> (dry-fried) with <i>Hei Zhi Ma</i> (Semen Sesami Nigrum)	120g [6g]
<i>Fu Ling</i> (Poria), <i>ban</i> (blended) with milk	240g [18g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text advises to prepare each herb as specified above. *He Shou Wu* (Radix Polygoni Multiflori) should be steamed and sun-dried nine times. Add *Fu Ling* (Poria) and *Niu Xi* (Radix Achyranthis Bidentatae) to *He Shou Wu* (Radix Polygoni Multiflori) on the seventh to ninth repetition of steaming and drying. Grind all seven herbs into powder and form into pills with honey. Take 1 pill (10g) in the morning and at night with a grain-based liquor or lightly-salted water. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CLINICAL MANIFESTATIONS

Liver and Kidney deficiencies: premature gray hair, loose teeth, seminal emissions, nocturnal emissions, and soreness and weakness of the lower back and knees.

CLINICAL APPLICATIONS

Alopecia, premature gray hair, premature aging, male infertility, nocturnal emissions, impotence, low sperm count, decreased sperm motility, lumbago, frequent urination, aplastic anemia, osteoporosis, chronic infectious hepatitis, and menopause.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Kidney *jing* (essence)
2. Nourishes Liver blood

EXPLANATION

Qi Bao Mei Ran Dan (Seven-Treasure Special Pill for Beautiful Whiskers) commonly treats premature aging

Qi Bao Mei Ran Dan (Seven-Treasure Special Pill for Beautiful Whiskers)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver blood and Kidney <i>jing</i> (essence) deficiencies	<ul style="list-style-type: none">• Premature gray hair: Kidney <i>jing</i> and Liver blood deficiencies• Loose teeth: marrow deficiency secondary to Kidney deficiency• Seminal emissions and nocturnal emissions: leaking of <i>jing</i> caused by Kidney deficiency• Soreness and weakness of the lower back and knees: Kidney deficiency	<ul style="list-style-type: none">• Nourishes Kidney <i>jing</i>• Nourishes Liver blood	<ul style="list-style-type: none">• <i>He Shou Wu</i> (Radix Polygoni Multiflori) tonifies the Kidney and Liver and replenishes blood and <i>jing</i>.• <i>Gou Qi Zi</i> (Fructus Lycii), <i>Tu Si Zi</i> (Semen Cuscutae) and <i>Hei Zhi Ma</i> (Semen Sesami Nigrum) nourish the Liver and Kidney.• <i>Niu Xi</i> (Radix Achyranthis Bidentatae) tonifies the Kidney and Liver.• <i>Dang Gui</i> (Radix Angelicae Sinensis) tonifies the blood.• <i>Bu Gu Zhi</i> (Fructus Psoraleae) warms the yang.• <i>Fu Ling</i> (Poria) prevents the tonics herbs from creating stagnation.

Qī Bǎo Měi Rán Dān

(Seven-Treasure Special Pill for Beautiful Whiskers)

that is due to Kidney *jing* (essence) and Liver blood deficiencies. The Liver stores blood, and Liver blood deficiency causes malnourishment of the hair, leading to premature graying of the hair and hair loss. The Kidney produces marrow, which nourishes the bones and teeth. Thus, if the Kidney is deficient, the marrow may also become deficient and loose teeth may occur. Kidney deficiency may also lead to instability and leaking of *jing*, which results in seminal emissions and nocturnal emissions. Soreness and weakness of the lower back and knees are common clinical manifestations of Kidney deficiency.

He Shou Wu (Radix Polygoni Multiflori) is used heavily in this formula to tonify Kidney *jing* (essence). *Gou Qi Zi* (Fructus Lycii), *Tu Si Zi* (Semen Cuscutae), and *Hei Zhi Ma* (Semen Sesami Nigrum) nourish the Liver and Kidney to replenish Kidney *jing*. *Niu Xi* (Radix Achyranthis Bidentatae) tonifies the Kidney and Liver and strengthens the tendons and bones to relieve soreness and weakness of the lower back and knees. *Dang Gui* (Radix Angelicae Sinensis) tonifies the blood. Since yin and yang are mutually interdependent, *Bu Gu Zhi* (Fructus Psoraleae) is used to warm the yang and balance yin and yang. By adding a yang-tonifying herb to this formula, the yin-tonifying herbs may become more active, thus promoting harmony between yin and yang inside the body. *Fu Ling* (Poria) is added to promote urination, help the Spleen absorb the tonic herbs, and counter the greasy, stagnating properties of the tonic herbs.

MODIFICATIONS

- For premature gray hair without shine, add *Huang Qi* (Radix Astragali) and *Shu Di Huang* (Radix Rehmanniae Praeparata).
- To guide the effects of the herbs to the scalp, add *Ge Gen* (Radix Puerariae Lobatae).
- With soreness of the lower back, combine with *Du Zhong* (Cortex Eucommiae) and *Sang Ji Sheng* (Herba Taxilli).
- With tidal fever and night sweats, add *Di Gu Pi* (Cortex Lycii), *Nu Zhen Zi* (Fructus Ligustri Lucidi), and *Fu Xiao Mai* (Fructus Triticis Levis).
- With poor appetite and indigestion, add *Shan Yao* (Rhizoma Dioscoreae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shan Zha* (Fructus Crataegi), and *Mai Ya* (Fructus Hordei Germinatus).
- For yin deficiency and yang excess, add *Zhi Mu* (Rhizoma Anemarrhenae), *Huang Bo* (Cortex Phellodendri Chinensis), *Mai Dong* (Radix Ophiopogonis), and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

- For yin and blood deficiencies, add *Nu Zhen Zi* (Fructus Ligustri Lucidi), *Mo Han Lian* (Herba Ecliptae), and *Fu Pen Zi* (Fructus Rubi).

CAUTIONS / CONTRAINDICATIONS

- *Qi Bao Mei Ran Dan* contains many tonic herbs, and should be used with caution in cases of Spleen and Stomach deficiencies or damp and phlegm accumulation.
- The processed form of *He Shou Wu* (Radix Polygoni Multiflori) should be used to maximize the tonic effect, and to minimize its downward draining effect. If the fresh, unprocessed form is used, patients may suffer from frequent episodes of loose stools and diarrhea.

PHARMACOLOGICAL EFFECTS

Cardiovascular: In one laboratory experiment, oral administration *Qi Bao Mei Ran Dan* in rabbits at 6 g/kg was associated with an antiplatelet effect two hours after the oral ingestion.¹

CLINICAL STUDIES AND RESEARCH

1. **Alopecia:** In one study, 24 patients with alopecia were treated with oral and topical applications of herbs with good results. All patients received *Qi Bao Mei Ran Dan* as the base formula, with modifications as needed. For individuals with mixed white and yellow hair that appear malnourished, *Huang Qi* (Radix Astragali) and *Shu Di Huang* (Radix Rehmanniae Praeparata) were added to *Qi Bao Mei Ran Dan* for oral ingestion. In addition, they were treated with an herbal solution topically made of *Ce Bai Ye* (Cacumen Platycladi) 500g, *Sang Shen* (Fructus Mori) 500g, and *Mu Gua* (Fructus Chaenomeles) 250g. For individuals with yellow hair that is short and thin, *Zhi Mu* (Rhizoma Anemarrhenae), *Huang Bo* (Cortex Phellodendri Chinensis), *Mai Dong* (Radix Ophiopogonis), and *Wu Wei Zi* (Fructus Schisandrae Chinensis) were added to *Qi Bao Mei Ran Dan* for oral ingestion. They were also instructed to wash their hair with an herbal solution made from *Sang Ye* (Folium Mori) 60g and *Ma Ye* (Folium Cannabis) 60g. Lastly, for white hair that falls out easily, *Nu Zhen Zi* (Fructus Ligustri Lucidi) and *Mo Han Lian* (Herba Ecliptae) were added for oral ingestion. In addition, they were instructed to wash their hair with an herbal solution made from *He Zi* (Fructus Chebulae) 2 pieces, *Hu Tao Ren* (Semen Juglandis) 2 pieces, and fresh *Ce Bai Ye* (Cacumen Platycladi) 30g.²
2. **Male infertility:** In one study, 36 male patients with infertility were treated with modified *Qi Bao Mei Ran Dan* with good results. The ages of the patients ranged from 23-41 years, with the duration of marriage between 1-10 years. The formula included *Chuan Niu Xi* (Radix

Qī Bǎo Měi Rán Dān

(Seven-Treasure Special Pill for Beautiful Whiskers)

Cyathulae) 9g, *Dang Gui* (Radix Angelicae Sinensis) 9g, *Bu Gu Zhi* (Fructus Psoraleae) 6g, *Fu Ling* (Poria) 6g, *He Shou Wu* (Radix Polygoni Multiflori) 12g, *Tu Si Zi* (Semen Cuscutae) 12g, *Gou Qi Zi* (Fructus Lycii) 12g, *Shu Di Huang* (Radix Rehmanniae Praeparata) 12g, and *Rou Gui* (Cortex Cinnamomi) 3g. In addition, *Du Zhong* (Cortex Eucommiae) 12g and *Sang Ji Sheng* (Herba Taxilli) 6g were added for soreness of the lower back and knees; *Zhi Mu* (Rhizoma Anemarrhenae) 6g and *Huang Bo* (Cortex Phellodendri Chinensis) 12g were added for irritability with a dry mouth. After continuous treatment for 20-30 days, pregnancy was reported within one year in 22 of 36 cases.³

3. **Aplastic anemia:** Use of modified *Qi Bao Mei Ran Dan* was effective in treating aplastic anemia. Of 38 patients, 15 were treated with herbs only and 23 were treated with herbs and drugs. Herbal treatment was based on *Qi Bao Mei Ran Dan*, and modifications varied depending on the differential diagnosis. For yin deficiency (20 cases), *Xuan Shen* (Radix Scrophulariae) 15g, *Mai Dong* (Radix Ophiopogonis) 15g, *Sang Shen* (Fructus Mori) 15g, *Can Sha* (Faeces Bombycis) 10g, *Shan Zhu Yu* (Fructus Corni) 10g, charred *Wu Mei* (Fructus Mume) 10g, charred *Zhi Zi* (Fructus Gardeniae) 10g, charred *Du Zhong* (Cortex Eucommiae) 10g, and charred *Zong Lu* (Petiolus Trachycarpi) were added. For yang deficiency (10 cases), *Xian Mao* (Rhizoma Curculiginis) 15g, *Rou Cong Rong* (Herba Cistanches) 15g, *Ba Ji Tian* (Radix Morindae Officinalis) 10g, *Yin Yang Huo* (Herba Epimedii) 10g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 6g, and *Lu Rong* (Cornu Cervi Pantotrichum) 6g were added. For yin and yang deficiency (8 cases), *Xiao Hui Xiang* (Fructus Foeniculi) 10g, *Xu Duan* (Radix Dipsaci) 10g, *Huang Jing* (Rhizoma Polygonati) 15g, and *Shan Yao* (Rhizoma Dioscoreae) 15g were added. The herbs were given in decoction daily, for 30 days per course of treatment, for a total of 3 courses. The study reported marked improvement in 20 of 38 patients.⁴
4. **Osteoporosis:** One study reported 90.8% effectiveness in using modified *Qi Bao Mei Ran Dan* to treat osteoporosis. The treatment protocol used this formula plus *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) as the base formula, with the addition of *Gu Sui Bu* (Rhizoma Drynariae) and *San Qi* (Radix et Rhizoma Notoginseng) for bone fractures, and *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) for severe pain. Out of 76 cases, the study reported significant improvement in 12 cases, moderate improvement in 57 cases, and no benefit in 7 cases.⁵
5. **Chronic infectious hepatitis:** In one study, 22 patients with chronic infectious hepatitis confirmed by Western

medicine were treated successfully using modified *Qi Bao Mei Ran Dan*. The treatment protocol used this formula as the base, and added *Sha Ren* (Fructus Amomi) and *Hou Po* (Cortex Magnoliae Officinalis) for abdominal distention; *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for fatigue; *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Lian Zi* (Fructus Toosendan) for hypochondriac pain; and *Bie Jia* (Carapax Trionycis) and *Mu Li* (Concha Ostreae) for hepatomegaly. The herbs were given daily for 2-3 months. Of 22 patients, the study reported complete recovery in 14 cases, improvement in 3 cases, and no effect in 5 cases. Complete recovery was defined as resolution of all symptoms with normal liver functions. Improvement included resolution of all symptoms with near normal liver functions.⁶

Da Zao (Fructus Jujubae)

Shou Wu Pian (Polygonum Pill) is specifically designed to treat hair disorders by incorporating herbs to nourish yin, tonify the blood, and replenish *jing* (essence). Clinical applications include hair disorders such as premature gray hair and alopecia. This formula is also indicated for male infertility with signs of low sperm mobility, morphology and motility. The yin tonic herbs in this formula tonify the Kidney and restore *jing* and blood.

This formula is a variation of *Qi Bao Mei Ran Dan*. In comparison to the original formula, *Shou Wu Pian* (Polygonum

Qī Bǎo Měi Rán Dān

(Seven-Treasure Special Pill for Beautiful Whiskers)

Pill) contains more yang tonic herbs to enhance *ming men* (life gate) fire and restore reproductive functions to treat low libido, spermatorrhea, and erectile dysfunction.

AUTHORS' COMMENTS

According to Dr. Wen-Qi Tsai, *Qi Bao Mei Ran Dan* not only nourishes the hair, but can be used for male infertility involving low sperm count and slow motility.

Gui Lu Er Xian Jiao (Tortoise Shell and Deer Antler Syrup) and *Qi Bao Mei Ran Dan* both tonify Liver and Kidney deficiencies.

- *Gui Lu Er Xian Jiao* treats deficiencies of yin, yang, qi, and blood of the *ren* (conception) and *du* (governing) channels. *Lu Jiao* (Cornu Cervi) tonifies yang, and *Gui Ban* (Plastrum Testudinis) tonifies yin, *Ren Shen* (Radix et Rhizoma Ginseng) boosts qi, and *Gou Qi Zi* (Fructus Lycii) nourishes the blood. All four herbs tonify; and this formula does not have any sedating nor draining effect. Today, the primary indication of *Gui Lu Er Xian Jiao* is treatment of bone disorders (osteoporosis, bone fractures, etc.).

- *Qi Bao Mei Ran Dan* tonifies Liver and Kidney blood and *jing* (essence) with tonic herbs such as *He Shou Wu* (Radix Polygoni Multiflori), *Gou Qi Zi* (Fructus Lycii), *Niu Xi* (Radix Achyranthis Bidentatae), *Tu Si Zi* (Semen Cuscutae), and *Dang Gui* (Radix Angelicae Sinensis). *Fu Ling* (Poria), a mild draining herb, helps to balance the stagnating side effects of the tonic herbs. Today, the main applications of *Qi Bao Mei Ran Dan* is treatment of hair disorders (alopecia, premature grey and white hair, etc.).⁷

<i>Yuan Zhi</i> (Radix Polygalae)	[6g]
<i>Fu Ling</i> (Poria)	[6g]

Dì Huáng Yīn Zǐ (Rehmannia Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

Grind equal amounts of the ingredients into powder. Cook 9g of the powder with 5 slices of *Sheng Jiang* (*Rhizoma Zingiberis Recens*), 1 piece of *Da Zao* (*Fructus Jujubae*), and 5-7 leaves of *Bo He* (*Herba Menthae*) in 1.5 bowls of water until the liquid is reduced to 80%. Take the decoction any time during the day. Today, this formula may be prepared as a decoction using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Tonifies Kidney yin and yang
- 2. Resolves phlegm and opens the orifices

CLINICAL MANIFESTATIONS

Aphasia and leg paralysis: aphasia caused by a stiff tongue, a dry mouth without desire to drink, leg paralysis, a pale tongue with a white, slippery, moist tongue coating, and a deep, fine and weak pulse.

CLINICAL APPLICATIONS

Cerebrovascular diseases, post-stroke sequelae, dementia, diabetes mellitus, itching, and myelanalosis.

EXPLANATION

Di Huang Yin Zi (Rehmannia Decoction) treats various symptoms of Kidney deficiency and deficiency yang rising. Kidney yin deficiency can lead to weakness of the bones and tendons, eventually resulting in leg paralysis. Kidney yin deficiency may also lead to rising of Kidney

yang, which can carry internal dampness and phlegm to the head, causing tongue stiffness, aphasia, and a dry mouth without desire to drink. Patient will have no desire to drink because there is no actual lack of body fluids. The tongue and pulse both indicate deficiency and dampness inside the body.

Shu Di Huang (*Radix Rehmanniae Praeparata*) and *Shan Zhu Yu* (*Fructus Corni*) nourish Kidney yin. *Rou Cong Rong* (*Herba Cistanches*) and *Ba Ji Tian* (*Radix Morindae Officinalis*) tonify and stabilize Kidney yang. *Fu Zi* (*Radix Aconiti Lateralis Praeparata*) and *Rou Gui* (*Cortex Cinnamomi*) warm the Kidney to cause floating yang to descend. *Mai Dong* (*Radix Ophiopogonis*), *Shi Hu* (*Caulis Dendrobii*), and *Wu Wei Zi* (*Fructus Schisandrae Chinensis*) nourish yin and body fluids. *Shi Chang Pu* (*Rhizoma Acori Tatarinowii*), *Yuan Zhi* (*Radix Polygalae*), and *Fu Ling* (*Poria*) connect and harmonize the Heart and Kidney, as well as dispel dampness and open the head orifices. *Bo He* (*Herba Menthae*) clears the head and opens the orifices. *Sheng Jiang* (*Rhizoma Zingiberis Recens*) and *Da Zao* (*Fructus Jujubae*) harmonize the herbs and enhance their tonic actions.

MODIFICATIONS

- If there is a hot sensation in the joints caused by Kidney yin deficiency, remove *Rou Gui* (*Cortex Cinnamomi*) and *Fu Zi* (*Radix Aconiti Lateralis Praeparata*), and add *Sang Zhi* (*Ramulus Mori*), *Di Gu Pi* (*Cortex Lycii*), and *Bie Jia* (*Carapax Trionycis*).

Dì Huáng Yīn Zǐ (Rehmannia Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Aphasia and leg paralysis with Kidney deficiency and deficient yang rising	<ul style="list-style-type: none">• Leg paralysis: Kidney yin deficiency unable to nourish the bones and tendons• Tongue stiffness and aphasia: damp and phlegm accumulation in the head• Pale tongue with a white, slippery, moist tongue coating, and a deep, fine and weak pulse: deficiency and dampness	<ul style="list-style-type: none">• Tonifies Kidney yin and yang• Resolves phlegm and opens the orifices	<ul style="list-style-type: none">• <i>Shu Di Huang</i> (<i>Radix Rehmanniae Praeparata</i>) and <i>Shan Zhu Yu</i> (<i>Fructus Corni</i>) nourish Kidney yin.• <i>Rou Cong Rong</i> (<i>Herba Cistanches</i>) and <i>Ba Ji Tian</i> (<i>Radix Morindae Officinalis</i>) tonify and stabilize Kidney yang.• <i>Fu Zi</i> (<i>Radix Aconiti Lateralis Praeparata</i>) and <i>Rou Gui</i> (<i>Cortex Cinnamomi</i>) warm the Kidney.• <i>Mai Dong</i> (<i>Radix Ophiopogonis</i>), <i>Shi Hu</i> (<i>Caulis Dendrobii</i>) and <i>Wu Wei Zi</i> (<i>Fructus Schisandrae Chinensis</i>) nourish yin and body fluids.• <i>Shi Chang Pu</i> (<i>Rhizoma Acori Tatarinowii</i>), <i>Yuan Zhi</i> (<i>Radix Polygalae</i>) and <i>Fu Ling</i> (<i>Poria</i>) connect and harmonize the Heart and Kidney, dispel dampness, and open the head orifices.• <i>Bo He</i> (<i>Herba Menthae</i>) clears the head and opens the orifices.• <i>Sheng Jiang</i> (<i>Rhizoma Zingiberis Recens</i>) and <i>Da Zao</i> (<i>Fructus Jujubae</i>) harmonize the herbs.

Dì Huáng Yīn Zǐ (Rehmannia Decoction)

- For Kidney yang deficiency with coldness and pain in the back and knees, add *Yin Yang Huo* (Herba Epimedii) and *Xian Mao* (Rhizoma Curculiginis).
- With qi deficiency, add *Huang Qi* (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng).
- If there is no aphasia or a stiff tongue, remove *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Yuan Zhi* (Radix Polygalae), and *Bo He* (Herba Menthae).

CAUTIONS / CONTRAINDICATIONS

Di Huang Yin Zi is not recommended for individuals with Liver yang rising, since the formula is warm and tonifying, and may worsen the Liver yang condition.

CLINICAL STUDIES AND RESEARCH

1. **Cerebrovascular diseases:** It has been shown in many studies that the use of *Di Huang Yin Zi* is an effective supportive treatment for patients with various types of cerebrovascular diseases. One study reported beneficial effect using this formula to treat 240 patients with cerebral embolism.¹ Another study reported good results using this formula to treat 67 patients with cerebrovascular accident.²
2. **Post-stroke sequelae:** Modified *Di Huang Yin Zi* was successful in treating 24 patients with various types of post-stroke sequelae.³
3. **Dementia:** Use of *Di Huang Yin Zi* in 50 patients with dementia was associated with significant improvement in 24 patients, moderate improvement in 21 patients, and no effect in 5 patients.⁴
4. **Diabetes mellitus:** One study reported 80% effectiveness using modified *Di Huang Yin Zi* to treat 20 patients with diabetes mellitus characterized by qi and yin deficiencies.⁵
5. **Itching:** Use of *Di Huang Yin Zi* was associated with 80.5% effectiveness in 180 patients to treat itching caused by Liver and Kidney deficiencies. Of 180 patients, the study reported complete recovery in 103 patients, significant improvement in 42 patients, and no benefit in 35 patients.⁶
6. **Myelomalacia:** According to several studies, use of modified *Di Huang Yin Zi* was associated with beneficial effects in patients with pain in the spinal cord caused by neurosyphilis. One formula that reported good success contained *Di Huang Yin Zi* plus *Lu Jiao Shuang* (Cornu Cervi Degelatinatum), *Gui Ban Jiao* (Gelatinum Plastrum Testudinis), *Gou Qi Zi* (Fructus Lycii), *Suo Yang* (Herba Cynomorii), *Tian Ma* (Rhizoma Gastrodiae), and others.⁷

Chapter 8 — Summary

— Tonic Formulas

SECTION 1: QI-TONIFYING FORMULAS

Name	Similarities	Differences
<i>Si Jun Zi Tang</i> (Four-Gentlemen Decoction)	Tonify qi, strengthen the Spleen and Stomach	Base formula to tonify qi and strengthen the middle <i>jiao</i>
<i>Liu Jun Zi Tang</i> (Six-Gentlemen Decoction)		Eliminates dampness and phlegm
<i>Xiang Sha Liu Jun Zi Tang</i> (Six-Gentlemen Decoction with Aucklandia and Amomum)		Eliminates dampness and phlegm, regulates qi circulation, relieves pain
<i>Xiang Sha Yang Wei Tang</i> (Nourish the Stomach Decoction with Aucklandia and Amomum)		Regulates qi and dries dampness to increase appetite
<i>Shen Ling Bai Zhu San</i> (Ginseng, Poria, and Atractylodes Macrocephala Powder)	Tonify qi, strengthen the Spleen and Stomach, stop diarrhea	Resolves dampness
<i>Qi Pi Wan</i> (Guide the Spleen Pill)		Promotes digestion
<i>Bu Zhong Yi Qi Tang</i> (Tonify the Middle and Augment the Qi Decoction)	Tonify and raise qi, strengthen the Spleen and Stomach	Lifts yang qi and prolapsed organs
<i>Yi Qi Cong Ming Tang</i> (Augment the Qi and Increase Acuity Decoction)		Lifts yang qi and benefits the eyes and ears
<i>Sheng Mai San</i> (Generate the Pulse Powder)	Tonify Lung qi	Nourishes yin and body fluids
<i>Ren Shen Ge Jie San</i> (Ginseng and Gecko Powder)		Tonifies Lung and Kidney
<i>Bu Fei Tang</i> (Tonify the Lung Decoction)		Strengthens <i>wei</i> (defensive) qi

Si Jun Zi Tang (Four-Gentlemen Decoction) is the most commonly used and the most effective formula to tonify qi and strengthen the Spleen and Stomach. It treats Spleen and Stomach qi deficiencies arising from various causes or with various complications, and is often used as the base formula for many related conditions.

- *Liu Jun Zi Tang* (Six-Gentlemen Decoction) has the basic actions of *Si Jun Zi Tang* (Four-Gentlemen Decoction) but is stronger in dispelling dampness and phlegm.
- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum) has the basic actions of *Liu Jun Zi Tang* (Six-Gentlemen Decoction) but is stronger in regulating qi, dispelling cold, and relieving pain.
- *Xiang Sha Yang Wei Tang* (Nourish the Stomach Decoction with Aucklandia and Amomum) primarily increases appetite in individuals with middle *jiao* deficiency.

Shen Ling Bai Zhu San (Ginseng, Poria, and Atractylodes Macrocephala Powder) and *Qi Pi Wan* (Guide the Spleen Pill) both tonify qi, strengthen the Spleen and Stomach, and stop diarrhea.

- *Shen Ling Bai Zhu San* strongly resolves dampness in cases of Spleen and Stomach qi deficiencies causing impairment in the transportation and transformation functions.
- *Qi Pi Wan* promotes digestion in cases of Spleen and Stomach qi deficiencies, in which there is an inability to properly digest and absorb foods.

Bu Zhong Yi Qi Tang (Tonify the Middle and Augment the Qi Decoction) and *Yi Qi Cong Ming Tang* (Augment the Qi and Increase Acuity Decoction) strengthen the Spleen and Stomach, and tonify and raise yang qi.

- *Bu Zhong Yi Qi Tang* not only treats the usual symptoms of Spleen qi deficiency, it also lifts yang qi and treats prolapse of internal organs.

Chapter 8 — Summary

- *Yi Qi Cong Ming Tang* tonifies qi and blood, raises yang qi, and nourishes the Kidney and Liver. It tonifies underlying deficiencies and treats compromised visual and auditory functions.

Sheng Mai San (Generate the Pulse Powder), *Ren Shen Ge Jie San* (Ginseng and Gecko Powder) and *Bu Fei Tang* (Tonify the Lung Decoction) tonify Lung qi and treat lung disorders.

- *Sheng Mai San* tonifies qi, generates body fluids, astringes yin, and stops perspiration. It treats excess heat or chronic cough damaging qi and yin.
- *Ren Shen Ge Jie San* tonifies qi, clears Lung heat, stops cough, and relieves wheezing. Lung qi deficiency is the cause of cough and the excess sputum is due to the impairment of the transformation function of the Spleen. This formula can also be used for cough and dyspnea caused by the Kidney not being able to grasp the qi downward.
- *Bu Fei Tang* tonifies Lung qi to treat wheezing and dyspnea caused by Lung qi deficiency. It also strengthens *wei* (defensive) qi to relieve chills, intolerance to cold, and spontaneous perspiration.

SECTION 2: BLOOD-TONIFYING FORMULAS

Name	Similarities	Differences
<i>Si Wu Tang</i> (Four-Substance Decoction)		Base formula to tonify the blood
<i>Tao Hong Si Wu Tang</i> (Four-Substance Decoction with Safflower and Peach Pit)	Tonify the blood, regulate blood circulation	Eliminates blood stasis
<i>Wen Qing Yin</i> (Warming and Clearing Decoction)		Cools the blood, clears heat, eliminates toxins
<i>Guo Qi Yin</i> (Delayed Menstruation Decoction)		Activates qi and blood circulation
<i>Dang Gui Bu Xue Tang</i> (Tangkuei Decoction to Tonify the Blood)		Tonifies qi and promotes the generation of blood
<i>Gui Pi Tang</i> (Restore the Spleen Decoction)	Tonify qi and blood	Strengthens the Spleen, nourishes the Heart
<i>Zhi Gan Cao Tang</i> (Honey-Fried Licorice Decoction)		Nourishes yin, restores the pulse
<i>Nu Ke Bai Zi Ren Wan</i> (Platycladus Seed Pill for Females)	Tonify the blood	Nourishes yin
<i>Dang Gui Shao Yao San</i> (Tangkuei and Peony Powder)		Softens the Liver, strengthens the Spleen to regulate water metabolism
<i>Shao Yao Gan Cao Tang</i> (Peony and Licorice Decoction)	Replenishes body fluids	Harmonizes the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels

Si Wu Tang (Four-Substance Decoction) is the basic formula for tonifying and regulating the blood. It treats general blood deficiency with impairment of the *chong* (thoroughfare) and *ren* (conception) channels.

Tao Hong Si Wu Tang (Four-Substance Decoction with Safflower and Peach Pit) is formulated by adding *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) to *Si Wu Tang* (Four-Substance Decoction). The addition of these two herbs greatly enhances the effect in regulating blood circulation and eliminating blood stasis.

Wen Qing Yin (Warming and Clearing Decoction) is formulated by adding four heat-clearing herbs to *Si Wu Tang* (Four-Substance Decoction) to clear heat and cool the blood. The addition of these four herbs enables the formula to treat gynecological disorders caused by blood deficiency and heat.

Guo Qi Yin (Delayed Menstruation Decoction) tonifies blood, activates qi and blood circulation, and regulates menstrual cycles. It is used to treat irregular, delayed or scanty menstruation caused by qi and blood stagnation.

Chapter 8 — Summary

Dang Gui Bu Xue Tang (Tangkuei Decoction to Tonify the Blood) tonifies qi and blood in cases of over-exertion, which leads to the body's inability to retain the yang qi. Symptoms include warm skin, a feverish sensation, a red face, irritability, thirst with a strong desire to drink, slow healing of wounds, a full but deficient pulse may occur.

Gui Pi Tang (Restore the Spleen Decoction) tonifies qi, nourishes the blood, strengthens the Spleen, and nourishes the Heart. It treats Heart and Spleen deficiencies which manifest in palpitations, forgetfulness, insomnia, and night sweats. This formula can also be used for any type of bleeding caused by the Spleen not being able to hold the blood within the vessels.

Zhi Gan Cao Tang (Honey-Fried Licorice Decoction) treats a bound or intermittent pulse caused by qi and blood deficiencies. It can also treat Lung deficiency caused by over-exertion.

Nu Ke Bai Zi Ren Wan (Platycladus Seed Pill for Females) tonifies blood and nourishes yin to treat irregular menstruation and amenorrhea due to blood and yin deficiency.

Dang Gui Shao Yao San (Tangkuei and Peony Powder) nourishes the blood, softens the Liver, strengthens the Spleen, and regulates water metabolism. It treats abdominal pain with edema caused by blood deficiency and abnormal water metabolism.

Shao Yao Gan Cao Tang (Peony and Licorice Decoction) harmonizes the *ying* (nutritive) and *wei* (defensive) levels and replenishes body fluids. It is most effective for spasms and cramps caused by excessive sweating or deficiency of blood and body fluids.

SECTION 3: QI- AND BLOOD-TONIFYING FORMULAS

Name	Similarities	Differences
Ba Zhen Tang (Eight-Treasure Decoction)	Tonify qi and blood	Base formula to tonify qi and blood
Shi Quan Da Bu Tang (All-Inclusive Great Tonifying Decoction)		Tonifies qi, warms yang, dispels cold
Ren Shen Yang Ying Tang (Ginseng Decoction to Nourish the Nutritive Qi)		Nourishes the Heart and calms the <i>shen</i> (spirit)
Tai Shan Pan Shi San (Powder that Gives the Stability of Mount Tai)	Tonify qi and blood, stabilize pregnancy	Strengthens the Spleen
Bao Chan Wu You Fang (Preserve Pregnancy and Care-Free Decoction)		Treats complications associated with pregnancy and labor
Dang Gui San (Tangkuei Powder)		Treats complications associated with pregnancy and labor
Xiong Gui Tiao Xue Yin (Cnidium and Tangkuei Decoction to Regulate Blood)	Tonify qi and blood	Treats postpartum complications

Ba Zhen Tang (Eight-Treasure Decoction), **Shi Quan Da Bu Tang** (All-Inclusive Great Tonifying Decoction) and **Ren Shen Yang Ying Tang** (Ginseng Decoction to Nourish the Nutritive Qi) tonify qi and blood.

- **Ba Zhen Tang** is formulated by combining **Si Jun Zi Tang** (Four-Gentlemen Decoction) and **Si Wu Tang** (Four-Substance Decoction) to tonify qi and blood. It is neutral in thermal property, and will not warm nor cool the body.
- **Shi Quan Da Bu Tang** is formulated by adding **Huang Qi** (Radix Astragali) and **Rou Gui** (Cortex Cinnamomi) to **Ba Zhen Tang** (Eight-Treasure Decoction). The addition of these two herbs increases the overall warmth of the formula, and enhances the effects of benefiting qi, tonifying

Chapter 8 — Summary

yang, and dispelling cold. This formula is suitable for qi and blood deficiencies accompanied by the presence of interior cold.

- *Ren Shen Yang Ying Tang* treats qi and blood deficiencies arising from chronic consumptive diseases. Chronic qi and blood deficiencies may lead to malnourishment and instability of the Heart. Thus, this formula contains herbs to nourish the Heart and calm the *shen* (spirit).

Tai Shan Pan Shi San (Powder that Gives the Stability of Mount Tai), *Bao Chan Wu You Fang* (Preserve Pregnancy and Care-Free Decoction), and *Dang Gui San* (Tangkuei Powder) all tonify qi and blood to treat restless fetus, habitual miscarriage, and spontaneous abortion.

- *Tai Shan Pan Shi San* strongly tonifies qi and blood, strengthens the Spleen, and stabilizes pregnancy. It calms the restless fetus and prevents habitual miscarriage or spontaneous abortion by tonifying the underlying deficiencies.
- *Bao Chan Wu You Fang* tonifies qi and blood and stabilizes pregnancy. It can treat pregnancy-related complications, such as restless fetus, morning sickness, general weakness, soreness and pain of the lower back, and abdominal pain. If taken immediately before delivery, it also can facilitate labor and minimize complications.
- *Dang Gui San* prevents and treats complications associated with pregnancy and labor due to blood deficiency.

Xiong Gui Tiao Xue Yin (Cnidium and Tangkuei Decoction to Regulate Blood) tonifies qi and blood, and treats postpartum complications such as uterine bleeding, anemia, retention of lochia, irregular menstruation, and insufficient lactation.

SECTION 4: YIN-TONIFYING FORMULAS

Name	Similarities	Differences
<i>Liu Wei Di Huang Wan</i> (Six-Ingredient Pill with Rehmannia)		Base formula to tonify Liver and Kidney yin
<i>Zhi Bai Di Huang Wan</i> (Anemarrhena, Phellodendron, and Rehmannia Pill)		Clears deficiency fire
<i>Qi Ju Di Huang Wan</i> (Lycium Fruit, Chrysanthemum, and Rehmannia Pill)	Tonify Liver, Spleen, and Kidney yin	Brightens the eyes, treats eye disorders
<i>Mai Wei Di Huang Wan</i> (Ophiopogonis, Schisandra and Rehmannia Pill)		Astringes the Lung, redirects Lung qi downward
<i>Du Qi Wan</i> (Capital Qi Pill)		Invigorates Kidney qi, grasps qi downward
<i>Zuo Gui Wan</i> (Restore the Left [Kidney] Pill)	Tonifies Kidney yin	Replenishes bone marrow and Kidney <i>jing</i> (essence)
<i>Da Bu Yin Wan</i> (Great Tonify the Yin Pill)		Clears deficiency fire
<i>Hu Qian Wan</i> (Hidden Tiger Pill)	Tonify Liver and Kidney yin, clear deficiency fire	Strengthens the sinews and bones
<i>Er Zhi Wan</i> (Two-Ultimate Pill)		Nourishes the blood
<i>Yi Guan Jian</i> (Linking Decoction)	Tonify Liver and Kidney yin	Regulates the Liver qi
<i>Shi Hu Ye Guang Wan</i> (Dendrobium Pill for Night Vision)		Calms Liver wind, treats eye disorders
<i>Zi Yin Di Huang Wan</i> (Rehmannia Pill to Nourish Yin)		Clears Liver fire, treats eye disorders
<i>Zi Shen Ming Mu Tang</i> (Nourish the Kidney to Brighten the Eyes Decoction)	Tonify Liver and Kidney yin, improve sensory functions	Tonifies qi and blood, treats eye disorders
<i>Zi Shen Tong Er Tang</i> (Nourish the Kidney to Unblock the Ears Decoction)		Tonifies the blood, treats ear disorders

Chapter 8 — Summary

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia) is the representative formula in the yin-tonics category. It tonifies Liver and Kidney yin, and strengthens the water element while controlling wood. Kidney yin deficiency and deficiency fire may manifest as soreness and weakness of the lower back and knees, night sweats, heat sensations in the palms and soles, dizziness, vertigo, tinnitus, deafness, nocturnal emissions, tidal fever, and thirst. The tongue is red with a scanty coating, and the pulse is fine and rapid. Related formulas and their differential functions are as follows:

- **Zhi Bai Di Huang Wan** (Anemarrhena, Phellodendron, and Rehmannia Pill) is formulated by adding **Zhi Mu** (Rhizoma Anemarrhenae) and **Huang Bo** (Cortex Phellodendri Chinensis) to **Liu Wei Di Huang Wan** (Six-Ingredient Pill with Rehmannia). This formula nourishes yin and clears deficiency fire.
- **Qi Ju Di Huang Wan** (Lycium Fruit, Chrysanthemum, and Rehmannia Pill) is formulated by adding **Gou Qi Zi** (Fructus Lycii) and **Ju Hua** (Flos Chrysanthemi) to **Liu Wei Di Huang Wan** (Six-Ingredient Pill with Rehmannia). It nourishes Kidney and Liver yin and benefits the eyes to brighten vision.
- **Mai Wei Di Huang Wan** (Ophiopogonis, Schisandra and Rehmannia Pill) is formulated with the addition of **Mai Dong** (Radix Ophiopogonis) and **Wu Wei Zi** (Fructus Schisandrae Chinensis) to **Liu Wei Di Huang Wan** (Six-Ingredient Pill with Rehmannia). It nourishes yin, astringes the Lung, redirects Lung qi downward, and arrest wheezing.
- **Du Qi Wan** (Capital Qi Pill) tonifies Kidney yin and invigorates Kidney qi. It grasps qi downward to relieve wheezing and shortness of breath that arise from Kidney deficiency.

Zuo Gui Wan (Restore the Left [Kidney] Pill) is a potent formula that tonifies Kidney yin, fills bone marrow, and replenishes *jing* (essence). It contains primarily tonic herbs that are not balanced by sedating herbs. This is a strong tonic formula, and it is heavier and more stagnant in nature than **Liu Wei Di Huang Wan** (Six-Ingredient Pill with Rehmannia).

Da Bu Yin Wan (Great Tonify the Yin Pill) and **Hu Qian Wan** (Hidden Tiger Pill from the Analytic Collection) both tonify Liver and Kidney yin and clear deficiency fire.

- **Da Bu Yin Wan** treats yin deficiency of Liver and Kidney with flaring up of deficiency fire. Clinical manifestations include steaming bones sensation, tidal fever, night sweats, seminal emissions, weakness of knees and legs, a red tongue with a scanty coating, a rapid and forceful pulse at the *chi* position.
- **Hu Qian Wan** nourishes yin, clears deficiency-fire and strengthens bones and tendons. Weakness of bones and tendons are due to the lack of nourishment from Kidney yin. The clinical applications include soreness of lower back and knees, weakness of bones and tendons, and *wei zheng* (atrophy syndrome).

Er Zhi Wan (Two-Ultimate Pill) and **Yi Guan Jian** (Linking Decoction) tonify Liver and Kidney yin, nourish the blood, and moisten dryness.

- **Er Zhi Wan** tonifies Kidney and Liver yin deficiency and nourishes the blood. The key manifestations for this formula include a bitter taste in the mouth, dizziness, blurred vision, and premature graying of hair.
- **Yi Guan Jian** tonifies Liver and Kidney yin, regulates Liver qi, nourishes the blood, and moistens dryness. Clinical manifestations include chest and hypochondriac pain, acid regurgitation, a sore throat, and a dry mouth. Occasionally there may also be hernia.

Shi Hu Ye Guang Wan (Dendrobium Pill for Night Vision), **Zi Yin Di Huang Wan** (Rehmannia Pill to Nourish Yin), **Zi Shen Ming Mu Tang** (Nourish the Kidney to Brighten the Eyes Decoction), and **Zi Shen Tong Er Tang** (Nourish the Kidney to Unblock the Ears Decoction) all tonify Liver and Kidney yin, improve sensory (visual and auditory) functions, and treat eye and ear disorders.

Chapter 8 — Summary

- *Shi Hu Ye Guang Wan* soothes the Liver, calms Liver wind, and nourishes yin to treat eye disorders.
- *Zi Yin Di Huang Wan* tonifies Liver and Kidney yin and clears Liver fire to treat eye disorders.
- *Zi Shen Ming Mu Tang* tonifies Liver and Kidney yin and supplements qi and blood to treat eye disorders.
- *Zi Shen Tong Er Tang* tonifies Liver and Kidney yin to treat ear disorders.

SECTION 5: YANG-TONIFYING FORMULAS

Name	Similarities	Differences
<i>Jin Gui Shen Qi Wan</i> (Kidney Qi Pill from the Golden Cabinet)	Tonify Kidney yang, warm <i>ming men</i> (life gate) fire	Base formula to tonify Kidney yang
<i>Ba Wei Di Huang Wan</i> (Eight-Ingredient Pill with Rehmannia)		Slightly stronger function to tonify Kidney yang
<i>Ji Sheng Shen Qi Wan</i> (Kidney Qi Pill from Formulas that Aid the Living)		Regulates water and relieves edema
<i>You Gui Wan</i> (Restore the Right [Kidney] Pill)	Tonify Kidney yang and <i>jing</i> (essence)	Tonifies the blood
<i>Huan Shao Dan</i> (Return to Youth Pill)		Tonifies qi and blood, strengthens the Spleen, Stomach, Kidney, and Heart
<i>Er Xian Tang</i> (Two-Immortal Decoction)		Clears deficiency fire

Jin Gui Shen Qi Wan (Kidney Qi Pill from the Golden Cabinet) tonifies Kidney yang and warms *ming men* (life gate) fire. Clinical applications of this formula include low back pain, weak legs, a cold sensation in the lower body, pain and cramps in the lower abdomen, and dysuria or polyuria.

Ba Wei Di Huang Wan (Eight-Ingredient Pill with Rehmannia) is a modified formula that is slightly stronger than the original *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet) in tonifying Kidney yang and warming *ming men* (life gate) fire

Ji Sheng Shen Qi Wan (Kidney Qi Pill from Formulas that Aid the Living) tonifies Kidney yang and regulates water circulation. It treats water accumulation caused by Kidney yang deficiency, with signs and symptoms such as severe pitting edema, a cold sensation in the lower body, and dysuria or excessive urination.

You Gui Wan (Restore the Right [Kidney] Pill) tonifies Kidney yang, nourishes *jing* (essence), and nourishes the blood. This formula is indicated for chronic illness resulting in Kidney yang and *ming men* (life gate) fire deficiencies. This formula does not contain the “three sedative herbs”; hence, the tonifying action is stronger than that of *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet).

Huan Shao Dan (Return to Youth Pill) is a comprehensive formula that tonifies qi, blood, Kidney yang and *jing* (essence). In addition, it strengthens the Spleen, Stomach, Kidney, and Heart. This formula is most effective for premature aging caused by generalized weakness and deficiencies.

Er Xian Tang (Two-Immortal Decoction) tonifies Kidney yang, replenishes Kidney *jing* (essence), and drains deficiency fire. This formula treats Kidney deficiency with deficiency fire rising, as seen in menopausal patients with hot flashes, mood swings, night sweats, nervousness, irritability, insomnia, and fatigue.

Chapter 8 — Summary

SECTION 6: YIN- AND YANG-TONIFYING FORMULAS

Name	Similarities	Differences
Gui Lu Er Xian Jiao (Tortoise Shell and Deer Antler Syrup)	Tonify Kidney yin and yang	Tonifies qi and blood, replenishes <i>jing</i> (essence)
Qi Bao Mei Ran Dan (Seven-Treasure Special Pill for Beautiful Whiskers)		Tonifies Liver blood, replenishes <i>jing</i> (essence)
Di Huang Yin Zi (Rehmannia Decoction)		Dissolves phlegm, opens the orifices

Gui Lu Er Xian Jiao (Tortoise Shell and Deer Antler Syrup) tonifies qi and blood, supplements Kidney yin and yang, and replenishes *jing* (essence). Clinical applications of this formula include weight loss, seminal emissions, impotence, dizziness, and soreness and weakness of the lower back and knees.

Qi Bao Mei Ran Dan (Seven-Treasure Special Pill for Beautiful Whiskers) nourishes both Kidney *jing* (essence) and Liver blood to treat premature gray hair, loose teeth, seminal emissions, and soreness of the lower back and knees.

Di Huang Yin Zi (Rehmannia Decoction) tonifies Kidney yin and yang, dissolves phlegm, and opens the orifices. Clinical manifestations include aphasia caused by a stiff tongue, leg paralysis, a dry mouth without desire to drink, a pale tongue with a slippery, white and moist tongue coating, and a deep, fine and weak pulse.

Chapter 9

— Shen-Calming Formulas

扁鵲 Biǎn Què

扁鵲 Biǎn Què, also known as 秦越人 Qìn Yuè-Rén, 407 – 310 BCE. ¹

扁鹊 Bǐān Què

Bian Que.

So far as can be determined from recorded history, Bian Que is the founder of traditional Chinese medicine. The first physician spoken of in Chinese historical texts, Bian Que lived in the fifth century BCE. Bian Que understood all aspects of medicine, including herbs, acupuncture, internal and external medicine, gynecology, pediatrics, geriatrics, and disorders of the five senses. He was particularly skilled in the four diagnostic skills, including *wang* (inspection), *wen* (listening), *wen* (inquiry) and *qie* (palpation).

Bian Que authored two major texts during his life: 扁鹊内经 *Bian Que Nei Jing* (Internal Medicine according to Bian Que) and 扁鹊外经 *Bian Que Wai Jing* (External Medicine according to Bian Que). Physicians during the Han dynasty claimed to have studied the works of Bian Que. Unfortunately, both texts have been lost to history, and we are left with folklore and legends of his life and accomplishments.

There is one story that offers particular insight into the medical philosophy of Bian Que. King of Wei asked Bian Que one day, “You and your two brothers are all experts in medicine, which of you is the best?” Bian Que replied, “My eldest brother is the best, followed by my second brother, and I am the last.” The king then asked, “Then why is it that you are the most famous?” Bian Que answered, “My eldest brother cures a disease before it shows any symptoms. Since people do not see the disease, they do not recognize his ability. My second brother terminates a disease in its early stages. People assume he is only capable of treating minor illnesses, so he is merely known within this locality and its neighborhood. As for me, I treat a disease when it is already very severe and serious. When I perform blood-letting by injecting needles into vessels, or apply medical ointment on the skin, people think I am well versed in medicine. Therefore, I have become well known all over the country.” The king was quite satisfied with his answer and said, “You’ve spoken wisely.”

Chapter 9 — Overview

— Shen-Calming Formulas

Definition: *Shen*-calming formulas act to calm the *shen* (spirit) and tranquilize the mind. As such, they treat *shen* disturbance, a disorder characterized by palpitations, insomnia, irritability, restlessness, fear, fright, and other symptoms. *Shen* disturbance is associated with three *zang* (solid organs): the Heart, which stores the *shen*, the Liver, which stores the *hun* (ethereal soul), and the Kidney, which stores *zhi* (will-power). Therefore, imbalances of these organs contribute to *shen* disturbance.

While there are many causes of *shen* disturbance, the individual disturbances can nevertheless be categorized as either excess or deficient in nature.

- **Excess-type** *shen* disturbance may be caused externally by fear and fright, and internally by Liver qi stagnation turning into fire. In either cases, these pathogens disturb the *shen*, leading to signs and symptoms such as irritability, fidgeting, restlessness, and abnormal levels of fear, fright, and anger. Because of the excess nature of the *shen* disturbance in these conditions, treatment usually involves herbs that clear heat and sedate the *shen*.
- **Deficient-type** *shen* disturbance may be caused by over-thinking and over-worrying, leading to Heart and Liver blood deficiencies, Heart yin deficiency, malnourishment of the *shen*, and rising of deficiency fire in the interior. Clinical signs and symptoms include palpitations, forgetfulness, deficiency-type irritability and restlessness, insomnia, and abnormal levels of fear. Because of the deficient nature of the *shen* disturbance, the treatment methods should be to nourish the Heart and calm the *shen*.

Although *shen* (spirit) disturbance is categorized as being either excess or deficient in nature, both may occur separately or together, and with or without complications. If both excess and deficiency symptoms are observed clinically, then both sedating and nourishing methods may be employed simultaneously. If complications are noted, select additional herbs accordingly. In most cases, treating *shen* disturbance will involve treating both the symptoms and the cause concurrently.

Shen (spirit) disturbance may also be complicated by internal heat, phlegm accumulation, and blood stasis. These conditions are discussed in Chapter 5: Heat-Clearing Formulas, Chapter 18: Phlegm-Dispelling Formulas, and Chapter 13: Blood-Regulating Formulas, respectively.

SUBCATEGORIES OF ACTION

Shen-calming formulas fall into two subcategories: **sedative** formulas to treat excess-type *shen* disturbance, and **nourishing** formulas that treat deficient-type *shen* disturbance.

1. Sedative Formulas that Calm the *Shen* (Spirit)

These formulas treat *shen* (spirit) disorders caused by hyperactivity of Heart yang and flaring upward of Heart fire. Common clinical manifestations include fidgeting, irritability, restlessness, insomnia, palpitations, epilepsy, and abnormal levels of fear, fright and anger.

Among the substances used to treat excess-type *shen* disturbance: *Ci Shi* (Magnetitum), *Long Chi* (Dens Draconis), and *Zhen Zhu Mu* (Concha Margaritiferae) sedate and calm the *shen*;

In most cases, treating *shen* disturbance involves treating both cause and symptoms concurrently.

Shen-calming formulas are sedating and tranquilizing, to treat a wide variety of emotional, behavioral, and psychological disorders.

Chapter 9 — Overview

Di Huang (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Dang Gui* (Radix Angelicae Sinensis) nourish yin and blood that may have been consumed by excess yang; and *Huang Lian* (Rhizoma Coptidis) may be added to clear excess heat and fire.

Exemplar formulas that sedate and calm the *shen* are *Zhu Sha An Shen Wan* (Cinnabar Pill to Tranquilize the Spirit), *Zhen Zhu Mu Wan* (Mother of Pearl Pill) and *Ci Zhu Wan* (Magnetite and Cinnabar Pill).

2. Nourishing Formulas that Calm the Shen (Spirit)

These formulas treat *shen* disturbance with deficiency fire rising upward, caused by yin and blood deficiencies. Common clinical manifestations include deficiency-type irritability and restlessness, insomnia, dream-disturbed sleep, palpitations, abnormal levels of fear, night sweats, forgetfulness, nocturnal emissions, a red tongue, and a scanty tongue coating.

Treatment simultaneously calms the *shen* and nourishes yin and blood. Herbs that calm the *shen* include *Suan Zao Ren* (Semen Ziziphi Spinosae), *Bai Zi Ren* (Semen Platycladi), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Xiao Mai* (Fructus Tritici). Herbs that nourish yin and blood include *Di Huang* (Radix Rehmanniae), *Zhi Mu* (Rhizoma Anemarrhenae), *Mai Dong* (Radix Ophiopogonis), and *Dang Gui* (Radix Angelicae Sinensis).

Representative formulas include *Suan Zao Ren Tang* (Sour Jujube Decoction), *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), and *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction).

Shen disturbance may be complicated by interior heat, phlegm accumulation, and blood stasis.

CAUTIONS / CONTRAINDICATIONS

- Some sedative formulas that calm the *shen* (spirit) contain minerals or heavy metal substances. These formulas should not be taken for a long period of time, as they may injure the Spleen and Stomach. Furthermore, for *shen* disturbed patients who have constitutional Spleen and Stomach deficiencies, Spleen-tonifying and Stomach-harmonizing herbs should be added to prevent unwanted side effects of treatment.
- *Zhu Sha* (Cinnabaris), an ingredient traditionally found in some sedative formulas, is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use and influence of this substance.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Heavy metal substances in *shen*-calming formulas are no longer used today, for safety reasons.

Shen-calming formulas calm the *shen* (spirit) and tranquilize the mind. From allopathic medicinal perspectives, these formulas primarily treat a wide variety of mental disorders. Note: The term “mental disorders” is used here loosely to describe a general and broad range of abnormal emotional, behavioral, and psychological conditions. It is not to be interpreted strictly as defined by any one diagnosis in the standard psychiatric *Diagnostic and Statistical Manual* (DSM).

- **Mental disorders:** *Shen*-calming herbs and formulas primarily treat a wide range of mental disorders. General pharmacological effects include sedative and hypnotic effects on the central nervous system to suppress both mental and physical activities.^{1,2,3} One formula also demonstrated marked effectiveness in reducing elevated levels of serum corticosterone caused by emotional stress (psychological stress and conditioned-fear stress).⁴ Clinically, *shen*-calming formulas have been used successfully to treat a wide variety of emotional, behavioral, and psychological disorders, including but not limited to insomnia,^{5,6,7,8} neurasthenia,^{9,10} neurosis,¹¹ schizophrenia,^{12,13} depression,¹⁴ and hysteria.¹⁵ Formulas frequently used to calm the *shen* and treat mental disorders include *Suan Zao Ren Tang* (Sour Jujube Decoction), *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), *Yang Xin Tang* (Nourish the Heart Decoction), and *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction).
- **Others:** *Shen*-calming formulas have also been used to treat seizures and epilepsy,¹⁶ impotence,¹⁷ nocturnal emissions,¹⁸ enuresis,¹⁹ and menopause.²⁰

Section 1

重镇安神剂

— Sedative Formulas that Calm the Shen (Spirit)

Zhū Shā Ān Shén Wán (Cinnabar Pill to Tranquilize the Spirit)

朱砂安神丸

Pinyin Name: *Zhu Sha An Shen Wan*

Literal Name: Cinnabar Pill to Tranquilize the Spirit

Alternate Name: *An Shen Wan* (Tranquilize the Spirit Pill)Original Source: *Yi Xue Fa Ming* (Medical Innovations) by Li Gao in the Jin Dynasty

COMPOSITION

<i>Zhu Sha</i> (Cinnabaris), <i>shui fei</i> (refined with water)	15g
<i>Huang Lian</i> (Rhizoma Coptidis), <i>xi</i> (washed) with liquor	18g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	7.5g
<i>Di Huang</i> (Radix Rehmanniae)	7.5g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	16.5g

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states that all ingredients, except *Zhu Sha* (Cinnabaris), should be ground into a fine powder, steamed, and formed into small pills, about the size of corn kernels. Separately grind *Zhu Sha* (Cinnabaris) to fine powder, then refine it in water via *shui fei* (refining with water) technique, and allow it to dry in a cool place without direct exposure to sunlight. The *Zhu Sha* (Cinnabaris) powder is then used to coat the pills. The source text advises taking 15 pills after meals, swallowing them with saliva.

Today, this formula is usually prepared in pill form, with instructions to take 6-9g of pills before bedtime with water. This formula may also be prepared as a decoction with a proportionate adjustment in the doses of the herbs. *Zhu Sha* (Cinnabaris) should *not* be cooked in the

decoction. Instead, it should be ground into powder and refined in water, and taken with the strained decoction.

CHINESE THERAPEUTIC ACTIONS

1. Tranquilizes the Heart and calms the *shen* (spirit)
2. Sedates fire and nourishes yin

CLINICAL MANIFESTATIONS

Heart fire rising with yin and blood deficiencies: irritability, anxiety, insomnia, frequent dreams, severe palpitations, desire to vomit but inability to do so, fear and fright, tongue ulcers, a red tongue body, and a fine, rapid pulse.

CLINICAL APPLICATIONS

Viral carditis, arrhythmia, night sweats, sleep-walking, neurasthenia, forgetfulness, anxiety, and depression.

EXPLANATION

Heart fire rising (excess) accompanied by yin and blood deficiencies may cause disturbances of the *shen* (spirit), which then lead to symptoms of irritability, insomnia, frequent dreams, severe palpitations, and fear and fright. Since the Heart opens to the tongue, Heart fire may produce tongue ulceration. The red tongue body and fine, rapid pulse are both signs of yin and blood deficiencies and heat in the Heart.

Zhū Shā Ān Shén Wán (Cinnabar Pill to Tranquilize the Spirit)

Zhu Sha An Shen Wan (Cinnabar Pill to Tranquilize the Spirit)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heart fire rising with yin and blood deficiencies	<ul style="list-style-type: none"> Irritability, insomnia, frequent dreams, severe palpitations, fear and fright: Heart fire disturbing the <i>shen</i> (spirit) Tongue ulceration: Heart fire traveling upward to the tongue Red tongue body and a fine, rapid pulse: yin and blood deficiencies and Heart fire rising 	<ul style="list-style-type: none"> Tranquilizes the Heart and calms the <i>shen</i> Sedates fire Nourishes yin 	<ul style="list-style-type: none"> <i>Zhu Sha</i> (Cinnabaris) tranquilizes the Heart and calms the <i>shen</i>. <i>Huang Lian</i> (Rhizoma Coptidis) sedates Heart fire and relieves irritability. <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Di Huang</i> (Radix Rehmanniae) nourish the blood and yin. <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes all of the herbs.

Zhu Sha An Shen Wan (Cinnabar Pill to Tranquilize the Spirit) contains *Zhu Sha* (Cinnabaris) to tranquilize the Heart and calm the *shen* (spirit). *Huang Lian* (Rhizoma Coptidis) sedates Heart fire and relieves irritability. *Dang Gui* (Radix Angelicae Sinensis) and *Di Huang* (Radix Rehmanniae) nourish the blood and yin, which often become deficient in cases of heat and fire. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes all of the herbs.

compromised liver and kidney functions. Acute overdose of *Zhu Sha* (Cinnabaris) is characterized by disturbance of the central nervous system, nervousness, a metallic taste in the mouth, swollen gums, poor appetite, abdominal pain, diarrhea, tremors, sexual dysfunction, and liver and kidney damage.³

RELATED FORMULA

Shēng Tiě Luò Yīn (Iron Filings Decoction)

生鐵落飲

生铁落饮

Pinyin Name: *Sheng Tie Luo Yin*

Literal Name: Iron Filings Decoction

Original Source: *Yi Xue Xin Wu* (Medical Revelations) by Cheng Guo-Peng in 1732

MODIFICATIONS

- For neurasthenia causing insomnia, excessive dreams and forgetfulness, with phlegm and heat manifesting in a stifling sensation in the chest, and a greasy, yellow tongue coating, add *Gua Lou* (Fructus Trichosanthis) and *Zhu Ru* (Caulis Bambusae in Taenia).
- With palpitations and severe insomnia, add *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), and *Ci Shi* (Magnetitum).
- With irritability and severe insomnia, add *Zhi Zi* (Fructus Gardeniae) and *Lian Zi Xin* (Plumula Nelumbinis).

CAUTIONS / CONTRAINDICATIONS

- Zhu Sha An Shen Wan* is contraindicated in patients with yin deficiency. Also, it should not be used at a large dose or for a prolonged period of time.
- Because this formula contains *Zhu Sha* (Cinnabaris), it is contraindicated during pregnancy and in pediatric or geriatric patients.¹
- Individuals who take this formula should avoid smoking and spicy, pungent, oily, and greasy foods.²

TOXICOLOGY

Because *Zhu Sha* (Cinnabaris) contains mercuric sulfide, it should never be processed with heat or cooked in decoction, as heat increases the toxicity of this substance. It should be used with extreme caution for those with

<i>Tian Dong</i> (Radix Asparagi)	9g
<i>Mai Dong</i> (Radix Ophiopogonis)	9g
<i>Bei Mu</i> (Bulbus Fritillariae)	9g
<i>Dan Nan Xing</i> (Arisaema cum Bile)	3g
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	3g
<i>Yuan Zhi</i> (Radix Polygalae)	3g
<i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii)	3g
<i>Lian Qiao</i> (Fructus Forsythiae)	3g
<i>Fu Ling</i> (Poria)	3g
<i>Fu Shen</i> (Poria Paradicis)	3g
<i>Xuan Shen</i> (Radix Scrophulariae)	4.5g
<i>Gou Teng</i> (Ramulus Uncariae cum Uncis)	4.5g
<i>Dan Shen</i> (Radix et Rhizoma Salviae Miltiorrhizae)	4.5g
<i>Zhu Sha</i> (Cinnabaris)	0.9g
<i>Sheng Tie Luo</i> (Frusta Ferri), <i>jian</i> (decocted) and <i>ao</i> (simmered)	[30g]

Note: *Zhu Sha* (Cinnabaris) is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of

Zhū Shā Ān Shén Wán (Cinnabar Pill to Tranquilize the Spirit)

this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

The source text states to first decoct and simmer *Sheng Tie Luo* (Frusta Ferri) in water for approximately 1.5 hours (the duration of time needed to burn 3 sticks of incense). Filter and discard the residue, and use this strained decoction to cook the other ingredients. Note: The source text does not specify the dose of *Sheng Tie Luo* (Frusta Ferri).

Sheng Tie Luo Yin (Iron Filings Decoction) treats *dian kuang* (mania and withdrawal) syndrome characterized by the rising of phlegm and fire. This formula tranquilizes the Heart, dispels phlegm, calms the *shen* (spirit), and anchors *zhi* (will-power).

Zhu Sha An Shen Wan and *Sheng Tie Luo Yin* both treat *shen* (spirit) disturbance.

- *Zhu Sha An Shen Wan* addresses *shen* disturbance caused by rising of Heart fire with yin and blood deficiencies.

This formula uses herbs to simultaneously purge fire and nourish yin.

- *Sheng Tie Luo Yi* treats *shen* disturbance caused by the rising of phlegm and fire, leading to *dian kuang* (mania and withdrawal). It does so by sedating the Heart and dispelling phlegm.

AUTHORS' COMMENTS

Zhu Sha (Cinnabaris) is rarely used as a medicinal substance today. It is discussed here and in other parts of this text primarily for academic purposes, to reflect the historical use of this substance. Most herbal manufacturers today either omit *Zhu Sha* (Cinnabaris) from formulas that historically specified its use, or substitute other medicinal substances with similar functions.

Zhēn Zhū Mǔ Wán (Mother of Pearl Pill)

珍珠母丸

Pinyin Name: *Zhen Zhu Mu Wan*

Literal Name: Mother of Pearl Pill

Alternate Name: *Zhen Zhu Wan* (True Pearl Pill)

Original Source: *Pu Ji Ben Shi Fang* (Formulas of Universal Benefit from My Practice) by Xu Shu-Wei in 1132

COMPOSITION

<i>Zhen Zhu Mu</i> (Concha Margaritiferae), <i>yan</i> (ground) to powder	22.5g
<i>Long Chi</i> (Dens Draconis)	15g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	30g
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>bei</i> (stone-baked)	45g
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>zheng</i> (steamed) with liquor	45g
<i>Suan Zao Ren</i> (Semen Ziziphi Spinosae), <i>chao</i> (dry-fried) and <i>yan</i> (ground) to small particles	30g
<i>Bai Zi Ren</i> (Semen Platycladi), <i>yan</i> (ground) to small particles	30g
<i>Fu Shen</i> (Poria Paradicis)	15g
<i>Xi Jiao</i> (Cornu Rhinoceri), <i>bang</i> (scraped) into fine powder	15g
<i>Chen Xiang</i> (Lignum Aquilariae Resinatum)	15g

Note: *Xi Jiao* (Cornu Rhinoceri) is derived from an endangered animal, and *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal. Both are rarely used as medicinal substances

today. They are discussed here primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have

Zhēn Zhū Mǔ Wán (Mother of Pearl Pill)

removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder, form into very small pills with honey, and coat the pills with *Zhu Sha* (Cinnabaris). The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Separately prepare a decoction of *Jin Bo* (gold foil), *Yin Bo* (silver foil), and *Bo He* (Herba Menthae). Take 40-50 pills with the strained decoction during the day and at bedtime.

CHINESE THERAPEUTIC ACTIONS

1. Tranquilizes the Heart and calms the *shen* (spirit)
2. Nourishes yin and blood

CLINICAL MANIFESTATIONS

Hyperactivity of Liver yang with yin and blood deficiencies: emotional instability, insomnia, fright, palpitations, dizziness, vertigo, and a fine, wiry pulse.

CLINICAL APPLICATIONS

Hypertension and neurasthenia.

EXPLANATION

Zhen Zhu Mu Wan (Mother of Pearl Pill) treats hyperactivity of Liver and Heart yang that is accompanied by underlying yin and blood deficiencies. The Heart is the

organ that houses the mind. If yin and blood are deficient, then the *shen* (spirit) may become unstable, leading to insomnia and palpitations. Deficiency of yin with hyperactivity of yang may affect the brain, causing dizziness and vertigo.

Zhen Zhu Mu (Concha Margaritiferae) and *Long Chi* (Dens Draconis) subdue hyperactivity of Liver yang and calm Heart *shen* (spirit). *Zhen Zhu Mu* (Concha Margaritiferae) also enters the Heart and Liver channels, and guides the formula to these organs. *Ren Shen* (Radix et Rhizoma Ginseng), *Dang Gui* (Radix Angelicae Sinensis), and *Shu Di Huang* (Radix Rehmanniae Praeparata) nourish qi, yin, and blood. *Suan Zao Ren* (Semen Ziziphi Spinosae), *Bai Zi Ren* (Semen Platycladi), and *Fu Shen* (Poria Paradicis) calm the *shen* and anchor the *zhi* (will-power). They also help to promote restful sleep. *Xi Jiao* (Cornu Rhinoceri) enters the *xue* (blood) level to cool the blood and relieves fright and palpitations. *Chen Xiang* (Lignum Aquilariae Resinatum) lowers hyperactive yang to help calm the *shen*. *Zhu Sha* (Cinnabaris) calms the *shen* and guides the formula to the Heart. *Jin Bo* (gold foil) and *Yin Bo* (silver foil) calm the *shen*. *Bo He* (Herba Menthae) soothes Liver qi and clears Liver fire.

CAUTIONS / CONTRAINDICATIONS

Zhen Zhu Mu Wan contains rich tonics such as *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Suan Zao Ren* (Semen Ziziphi Spinosae), and is not suitable for treating insomnia and *shen* (spirit) disturbance caused by phlegm and heat.

Zhen Zhu Mu Wan (Mother of Pearl Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Hyperactivity of Liver yang with yin and blood deficiencies	<ul style="list-style-type: none"> Emotional instability, insomnia, and palpitations: yin and blood insufficient to nourish the <i>shen</i> (spirit) Dizziness and vertigo: hyperactivity of yang due to deficiency of yin 	<ul style="list-style-type: none"> Nourishes yin and blood Tranquilizes the Heart and calms the <i>shen</i> 	<ul style="list-style-type: none"> <i>Zhen Zhu Mu</i> (Concha Margaritiferae) and <i>Long Chi</i> (Dens Draconis) subdue hyperactivity of Liver yang and calm Heart <i>shen</i>. <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) nourish qi, yin and blood. <i>Suan Zao Ren</i> (Semen Ziziphi Spinosae), <i>Bai Zi Ren</i> (Semen Platycladi), and <i>Fu Shen</i> (Poria Paradicis) calm the <i>shen</i> and anchor <i>zhi</i> (will-power). <i>Xi Jiao</i> (Cornu Rhinoceri) enters the <i>xue</i> (blood) level and cools the blood. <i>Chen Xiang</i> (Lignum Aquilariae Resinatum) lowers hyperactive yang to help calm the <i>shen</i>.

Cí Zhū Wān (Magnetite and Cinnabar Pill)

磁朱丸

Pinyin Name: *Ci Zhu Wan*

Literal Name: Magnetite and Cinnabar Pill

Alternate Name: *Shen Qu Wan* (Medicated Leaven Pill)

Original Source: *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies) by Sun Si-Miao in the Tang Dynasty

COMPOSITION

<i>Ci Shi</i> (Magnetitum)	60g
<i>Zhu Sha</i> (Cinnabaris)	30g
<i>Shen Qu</i> (Massa Fermentata)	120g

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into powder and form into small pills with honey. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 3 pills three times daily. Today this formula is prepared by grinding the ingredients into a powder and mixing it with honey to form pills. Take 6g of pills per dose, twice daily with water.

CHINESE THERAPEUTIC ACTIONS

- 1. Tranquilizes the mind and calms the *shen* (spirit)
- 2. Subdues hyperactive yang and brightens vision

CLINICAL MANIFESTATIONS

Heart and Kidney disharmony: palpitations, insomnia, dizziness, deafness, tinnitus, and blurred vision.

CLINICAL APPLICATIONS

Seizures, epilepsy, neurasthenia, insomnia, forgetfulness, psychiatric disorders, hypertension, tinnitus, cataract, and glaucoma.

EXPLANATION

Ci Zhu Wan (Magnetite and Cinnabar Pill) is indicated for disharmony of the Heart and Kidney (e.g., Heart yang excess and Kidney *jing* (essence) deficiency). Excess Heart yang may disturb the *shen* (spirit), leading to palpitations and insomnia. Deficiency of Kidney *jing* fails to nourish the sensory organs, causing dizziness, tinnitus, deafness, and blurred vision.

In this formula, *Ci Shi* (Magnetitum) subdues hyperactive yang and benefits Kidney yin. *Zhu Sha* (Cinnabaris) calms the *shen* (spirit) and anchors the *zhi* (will-power). Used together, these two herbs restore the harmonious relationship between the Heart and Kidney. *Shen Qu* (Massa Fermentata) protects the stomach from being injured by *Ci Shi* (Magnetitum) and *Zhu Sha* (Cinnabaris). *Shen Qu* (Massa Fermentata) can also increase digestion and absorption of nutrients to help replenish Kidney *jing* (essence).

MODIFICATIONS

- With a restless *shen* (spirit), dry eyes, or photophobia caused by Kidney yin deficiency, add *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

Ci Zhu Wan (Magnetite and Cinnabar Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heart and Kidney disharmony	<ul style="list-style-type: none">• Palpitations and insomnia: <i>shen</i> (spirit) disturbance caused by Heart yang excess• Dizziness, tinnitus, deafness, and blurred vision: Kidney <i>jing</i> (essence) unable to nourish the sensory organs	<ul style="list-style-type: none">• Tranquilizes the mind and calms the <i>shen</i>• Sedates hyperactive yang and brightens vision	<ul style="list-style-type: none">• <i>Ci Shi</i> (Magnetitum) subdues hyperactive yang and benefits Kidney yin.• <i>Zhu Sha</i> (Cinnabaris) calms the <i>shen</i> and anchors <i>zhi</i> (will-power).• <i>Shen Qu</i> (Massa Fermentata) protects the stomach from the harsh properties of the two mineral substances.

Cí Zhū Wān (Magnetite and Cinnabar Pill)

- For epilepsy and seizures with profuse phlegm, add *Dan Nan Xing* (Arisaema cum Bile), *Ban Xia* (Rhizoma Pinelliae), and *Tian Zhu Huang* (Concretio Silicea Bambusae).

CAUTIONS / CONTRAINDICATIONS

- *Ci Zhu Wan* is contraindicated in patients who do not show symptoms of Heart fire and Kidney and Liver yin deficiencies.
- Use with caution in patients with Spleen and Stomach deficiencies, as the mineral substances in this formula may be harsh on the digestive system.
- Because this formula contains *Zhu Sha* (Cinnabaris), it is contraindicated during pregnancy and in pediatric or geriatric patients.

AUTHORS' COMMENTS

Ci Zhu Wan has been found to be effective in treating various ocular disorders, such as cataract and glaucoma. For these applications, *Ci Zhu Wan* is often combined with *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum,

and Rehmannia Pill) or *Ming Mu Di Huang Wan* (Improve Vision Pill with Rehmannia).

Zhu Sha An Shen Wan (Cinnabar Pill to Tranquilize the Spirit) and *Ci Zhu Wan* are both tranquilizing formulas that treat restless *shen* (spirit), palpitations, and insomnia accompanied by frequent dreams.

- *Zhu Sha An Shen Wan* strongly sedates Heart fire to treat excess Heart fire that is injuring yin and blood, causing irritability, disorientation, insomnia, a feeling of misdirected qi flow in the chest with heat sensations, and occasional urges to vomit.
- *Ci Zhu Wan* settles the Heart, brightens vision, and anchors floating yang. It is best for Kidney *jing* (essence) deficiency with Heart yang rising. This disharmony between the Heart and Kidney causes insomnia, palpitations, tinnitus, blurred vision, and in severe cases, deafness and epilepsy.¹

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	4.5g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	4.5g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	6 pieces

Chái Hú Jiā Lóng Gǔ Mǔ Lì Tāng

(Bupleurum plus Dragon Bone and Oyster Shell Decoction)

Note: *Qian Dan* (Minium) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

Cook all of the ingredients, except *Da Huang* (Radix et Rhizoma Rhei), in 8 cups [1,600 mL] of water until the decoction is reduced to 4 cups [800 mL]. Add *Da Huang* (Radix et Rhizoma Rhei), and bring the decoction to a quick boil. Take 1 cup [200 mL] of the warm, strained decoction.

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes the *shaoyang*
2. Unblocks the three yang stages
3. Calms the *shen* (spirit)

CLINICAL MANIFESTATIONS

1. Disorder in the three yang stages (*taiyang*, *yangming*, and *shaoyang*): fullness and distention in the chest, insomnia, anxiety, occasional palpitations, irritability, dysuria, delirium, feeling of heaviness in the entire body with inability to rotate the trunk, red tongue body, and a rapid, wiry pulse.
2. *Shaoyang* syndrome: chest fullness, irritability, excitability, dysuria, delirium, heaviness of the whole body, and difficulty in moving the body.

CLINICAL APPLICATIONS

Neurosis, neurotic palpitations, nervousness, anxiety, hysteria, neurasthenia, insomnia, depression, schizophrenia, menopausal disturbance, hypertension, valvular disease, angina pectoris, post-ischemic brain injury, hemiplegia, cerebral hemorrhage, hyperlipoproteinemia, atherosclerosis, seizure, epilepsy, pelvic inflammatory disease, hyperthyroidism, and Meniere's disease.

EXPLANATION

Chai Hu Jia Long Gu Mu Li Tang (Bupleurum plus Dragon Bone and Oyster Shell Decoction), first presented in *Shang Han Lun* (Discussion of Cold-Induced Disorders), was originally indicated for patients who receive improper downward draining treatment when their disorder is still at the exterior and has not yet entered the *yangming* stage.

As the result of improper downward draining treatment, the pathogenic factor travels inward to penetrate the *taiyang*, *yangming*, and *shaoyang* levels.

Clinically, patients usually exhibit a wide array of complex heat signs and symptoms. The presence of heat in the chest produces a feeling of fullness and distention; heat attacking the Heart causes insomnia, anxiety, and palpitations; heat in the *yangming* stage causes delirium; and heat in the *shaoyang* stage leads to a feeling of heaviness in the entire body with inability to rotate the trunk. The improper use of downward draining herbs may damage body fluids, thus causing constipation and urinary difficulties. A red tongue body and rapid, wiry pulse are also indicative of heat. While clinical presentations may vary between patients, the diagnostic feature is the *shen* (spirit) floating upward, as evident from symptoms such as anxiety, palpitations, and delirious speech.

The *shaoyang* syndrome discussed here is caused by the inappropriate use of downward draining methods instead of exterior-releasing methods for illnesses at the *taiyang* stage. Downward draining methods used inappropriately may result in penetration of the pathogenic factors into the interior of the body, causing a syndrome that is both exterior and interior, deficient and excess. Chest fullness, irritability, and excitability are caused by fire in the *shaoyang* channel. *Shaoyang* syndrome may affect the water passages, causing dysuria. Delirium is the result of Stomach heat and *shaoyang* fire disturbing the Heart. Heaviness of the body is the result of the disrupted flow of yang qi.

Chai Hu Jia Long Gu Mu Li Tang is based on *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), which is the representative formula for harmonizing *shaoyang* syndrome. (Please refer to the section on *Xiao Chai Hu Tang* for complete details.) *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae) clear heat from the *shaoyang* stage and harmonize the exterior and interior. *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae) and *Qian Dan* (Minium) calm the *shen* (spirit) to relieve anxiety, palpitations, and delirious speech. *Gui Zhi* (Ramulus Cinnamomi) dispels exterior pathogenic factors, while *Da Huang* (Radix et Rhizoma Rhei) drains internal heat. *Ban Xia* (Rhizoma Pinelliae) guides the qi downward, while *Fu Ling* (Poria) promotes normal urination. Furthermore, *Fu Ling* (Poria) and *Ren Shen* (Radix et Rhizoma Ginseng) strengthen the Spleen and calm the *shen*. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the formula.

Diagnosis	Signs and Symptoms	Treatment	Herbs
Disorder in the three yang stages	<ul style="list-style-type: none"> • A feeling of fullness and distention: heat in the chest • Insomnia, delirium, anxiety and palpitations: heat attacking the Heart and <i>shen</i> (spirit) • A feeling of heaviness in the entire body with inability to rotate the trunk: heat in the <i>shaoyang</i> stage • Constipation and urinary difficulties: heat damaging body fluids • A red tongue body and rapid, wiry pulse: interior heat 	<ul style="list-style-type: none"> • Harmonizes the <i>shaoyang</i> • Unblocks the three yang stages • Calms the <i>shen</i> (spirit) 	<ul style="list-style-type: none"> • <i>Chai Hu</i> (Radix Bupleuri) and <i>Huang Qin</i> (Radix Scutellariae) clear heat from the <i>shaoyang</i> stage and harmonize the exterior and interior. • <i>Long Gu</i> (Os Draconis), <i>Mu Li</i> (Concha Ostreae) and <i>Qian Dan</i> (Minium) calm the <i>shen</i> to relieve anxiety, palpitations, and delirious speech. • <i>Gui Zhi</i> (Ramulus Cinnamomi) dispels exterior pathogenic factors. • <i>Da Huang</i> (Radix et Rhizoma Rhei) drains internal heat. • <i>Ban Xia</i> (Rhizoma Pinelliae) causes qi to descend. • <i>Fu Ling</i> (Poria) promotes smooth urination. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) strengthens the Spleen and calms the <i>shen</i>. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize all of the herbs.

MODIFICATIONS

- With palpitations and insomnia due to hypertension, add *Gou Teng* (Ramulus Uncariae cum Uncis) and *Du Zhong* (Cortex Eucommiae).
- With irritability and fullness in the chest, add *Huang Lian* (Rhizoma Coptidis) and *Tian Hua Fen* (Radix Trichosanthis).
- With delirious speech, add *Tian Ma* (Rhizoma Gastrodiae) and *Gou Teng* (Ramulus Uncariae cum Uncis).
- If there is dysuria, add *Mu Tong* (Caulis Akebiae) and *Fang Ji* (Radix Stephaniae Tetrandrae).
- With nightmares and vertigo, add *Long Dan* (Radix et Rhizoma Gentianae) and *Xia Ku Cao* (Spica Prunellae).
- When there is fatigue due to qi deficiency, add *Huang Qi* (Radix Astragali) and increase the dose of *Ren Shen* (Radix et Rhizoma Ginseng).
- With low back pain, add *Du Zhong* (Cortex Eucommiae) and *Niu Xi* (Radix Achyranthis Bidentatae).

CAUTIONS / CONTRAINDICATIONS

- For patients with a sensitive gastrointestinal system, remove *Da Huang* (Radix et Rhizoma Rhei), as this herb may cause loose stools.
- *Chai Hu Jia Long Gu Mu Li Tang* should be used cautiously in those with Spleen and Stomach deficiencies, as *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) are hard to digest.
- The original formula contains *Qian Dan* (Minium), commonly known as lead oxide red. Because *Qian Dan* (Minium) is toxic, there have been cases of anemia

associated with long-term use of this herbal formula.¹ Therefore, modern formulations generally omit this ingredient, or replace it with *Zhe Shi* (Haematitum), which also has a calming action.²

PHARMACOLOGICAL EFFECTS

1. **Central nervous system:** Continuous administration of this formula for seven days was associated with increased sleeping time, decreased body temperature, and decreased spontaneous activity in rats.³
2. **Antidepressant:** Administration of *Chai Hu Jia Long Gu Mu Li Tang* in mice successfully treated depression induced by chronic stress, by restoring the normal functioning of the hypothalamo-pituitary-adrenal system and the prefrontal cortex. Furthermore, studies have demonstrated that *Chai Hu Jia Long Gu Mu Li Tang* significantly prevented chronic stress-induced decreases in extracellular concentrations of dopamine and serotonin in the prefrontal cortex.^{4,5} Lastly, administration of *Chai Hu Jia Long Gu Mu Li Tang*, *Yi Gan San* (Restrain the Liver Powder) and *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) for 14 consecutive days showed both antidepressive and antinociceptive properties in mice.⁶
3. **Endocrine:** A study evaluated the relationship between *Chai Hu Jia Long Gu Mu Li Tang* and serum corticosterone in mice. The study found *Chai Hu Jia Long Gu Mu Li Tang* to be effective in reducing elevated corticosterone caused by emotional stress (psychological stress and conditioned-fear stress), but not physical stress (immobilized

Chái Hú Jiā Lóng Gǔ Mǔ Lì Tāng

(Bupleurum plus Dragon Bone and Oyster Shell Decoction)

stress, forced-swim stress, and electric-shock stress). The researchers concluded that *Chai Hu Jia Long Gu Mu Li Tang* is more effective for stress associated with psychological changes, and less effective for stress caused by physical changes.⁷

4. **Sedative and hypnotic:** Administration of *Chai Hu Jia Long Gu Mu Li Tang* was associated with marked reduction in locomotor activity, and dose-dependent prolongation in the duration of drug-induced sleep time. The study suggested *Chai Hu Jia Long Gu Mu Li Tang* as a useful therapy against sleep disorder caused by excitation.⁸
5. **Antihypertensive:** *Chai Hu Jia Long Gu Mu Li Tang* has been used clinically in the treatment of hypertension. The mechanism of this antihypertensive effect was attributed to the antipressor effect (inhibition of vasoconstriction induced by nor-adrenaline).^{9,10}
6. **Metabolic:** Administration of the extract of the formula to mice at 0.4 g/kg for 12 months was associated with reduction of total cholesterol and triglyceride levels in both the liver and blood vessels.¹¹
7. **Effects on hypercholesterolemia and atherosclerosis:** Use of *Chai Hu Jia Long Gu Mu Li Tang* in rabbits was associated with prevention of hypercholesterolemia and protection against atheromatous lesions by affecting apoE and LDL receptor mRNA gene expression in the liver.¹² According to another study, *Chai Hu Jia Long Gu Mu Li Tang* prevented arteriosclerosis by inhibiting the proliferation of vascular smooth muscle cells.¹³

CLINICAL STUDIES AND RESEARCH

1. **Neurosis:** Thirty-two patients with neurosis were treated with this formula for two weeks, with significant improvement in 6 cases, moderate improvement in 6 cases, and slight improvement in 14 cases. The overall rate of effectiveness was 81.3%.¹⁴
2. **Depression:** Thirty-five patients (between 19-60 years of age) with depression were treated with *Chai Hu Jia Long Gu Mu Li Tang* plus *Sheng Tie Luo* (*Frusta Ferri*) with complete recovery in 15 cases, significant improvement in 10 cases, moderate improvement in 9 cases, and no improvement in 1 case. The formula was given in decoction daily for 30 days per course of treatment, and the duration of the treatment was between 14-90 days. The overall effectiveness rate was 97.1%.¹⁵ According to another study, use of *Chai Hu Jia Long Gu Mu Li Tang* in 63 patients (15 males and 48 females) with depression was associated with recovery in 32 cases, improvement in 19 cases, and no effect in 12 cases.¹⁶
3. **Schizophrenia:** In one study, 67 patients with schizophrenia were divided into three groups. Group A contained 15

schizophrenic patients characterized by *shaoyang* disorder and treated with *Chai Hu Jia Long Gu Mu Li Tang*. Diazepam or chlordiazepoxide was given only if necessary to treat insomnia. Group B had 31 schizophrenic patients characterized by *shaoyang* disorder who were treated with *Chai Hu Jia Long Gu Mu Li Tang* as the primary treatment, with the addition of chlorpromazine or chlorprothixene at low doses (200mg per day or less). Group C had 21 schizophrenic patients characterized by *shaoyang* disorder with qi and blood stagnation; they were treated with modified *Chai Hu Jia Long Gu Mu Li Tang* as the primary treatment, with the addition of chlorpromazine or chlorprothixene at low doses (200mg per day or less). The modified formula used in Group C contained *Chai Hu* (*Radix Bupleuri*) 9g, *Huang Qin* (*Radix Scutellariae*) 9g, *Dang Gui* (*Radix Angelicae Sinensis*) 9g, *Chi Shao* (*Radix Paeoniae Rubra*) 9g, *Tao Ren* (*Semen Persicae*) 9g, *Hong Hua* (*Flos Carthami*) 9g, *Da Huang* (*Radix et Rhizoma Rhei*) 6-9g, *Chuan Xiong* (*Rhizoma Chuanxiong*) 6g, *Mu Li* (*Concha Ostreae*) 15g, *Sheng Jiang* (*Rhizoma Zingiberis Recens*) 6g, and *Da Zao* (*Fructus Jujubae*) 15g. The treatment protocol for herbs in all three groups was to cook the herbs in water, and administer the decoction daily for 30 days per course of treatment. Those who did not respond after the first course received a second course of treatment. Of 67 patients, the study reported complete recovery in 1 case, significant recovery in 35 cases, and improvement in 14 cases. The overall effectiveness was 76.1%.¹⁷ Note: Comparative analysis of results among the three groups of patients was unavailable at the time of publication.

In another study, use of modified *Chai Hu Jia Long Gu Mu Li Tang* was associated with 86.67% effectiveness in treating 45 patients with schizophrenia. The herbal formula contained *Chai Hu* (*Radix Bupleuri*) 12g, *Long Gu* (*Os Draconis*) 20g, *Mu Li* (*Concha Ostreae*) 20g, *Dang Shen* (*Radix Codonopsis*) 15g, *Ban Xia* (*Rhizoma Pinelliae*) 12g, *Da Huang* (*Radix et Rhizoma Rhei*) 10g, *Fu Ling* (*Poria*) 12g, *Huang Qin* (*Radix Scutellariae*) 12g, *Gui Zhi* (*Ramulus Cinnamomi*) 6g, *Dan Shen* (*Radix et Rhizoma Salviae Miltiorrhizae*) 15g, *Sheng Jiang* (*Rhizoma Zingiberis Recens*) 3 slices, and *Da Zao* (*Fructus Jujubae*) 6 pieces. Most patients showed improvement after an average of 15 packs of herbs. Of 45 patients, the study reported significant improvement in 31 cases, moderate improvement in 8 cases, and no effect in 6 cases.¹⁸

4. **Hyperlipoproteinemia:** Modified *Chai Hu Jia Long Gu Mu Li Tang* showed marked effectiveness in treating hyperlipoproteinemia in 58 patients. The study divided all patients into three categories based on traditional

Chái Hú Jiā Lóng Gǔ Mǔ Lì Tāng

(Bupleurum plus Dragon Bone and Oyster Shell Decoction)

Chinese medical diagnoses. Hyperlipoproteinemia characterized by dampness and phlegm was treated with this formula plus *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Ban Xia* (Rhizoma Pinelliae), and others. Hyperlipoproteinemia characterized by Liver qi stagnation was treated with this formula plus *Zhi Qiao* (Fructus Aurantii), *Bai Shao* (Radix Paeoniae Alba), *Yu Jin* (Radix Curcumae) and others. Hyperlipoproteinemia characterized by Liver qi stagnation and Spleen deficiency was treated by this formula plus *Zhi Qiao* (Fructus Aurantii), *Yan Hu Suo* (Rhizoma Corydalis), *Fo Shou* (Fructus Citri Sarcodactylis), and others. The duration of treatment was 3 months per course of treatment. The study reported an overall rate of effectiveness of 87.9%.¹⁹ In addition, another study stated that *Chai Hu Jia Long Gu Mu Li Tang* may prevent the development of vascular complications in hyperlipidemia patients, as use of the herbs was associated with reduction of triglycerides, total cholesterol, CD62P, PMPs, sE-selectin, and anti-oxidized LDL antibody.²⁰

5. **Coronary restenosis** (accelerated atherosclerosis after percutaneous coronary intervention): Administration of *Chai Hu Jia Long Gu Mu Li Tang* had a marked effect to inhibit restenosis after percutaneous coronary intervention (PCI) in humans. The proposed mechanism of this effect is attributed to the inhibition of intimal smooth muscle cell proliferation, and reduction of serum total cholesterol and low-density lipoprotein cholesterol. The study also noted that *Chai Hu Jia Long Gu Mu Li Tang* maintained its therapeutic effect for up to 8 weeks after balloon injury. This study also stated that *Chai Hu Jia Long Gu Mu Li Tang* may prevent atherosclerosis, since restenosis after PCI is considered to be an accelerated atherosclerosis.^{21,22}
6. **Pelvic inflammatory disease**: Chronic pelvic inflammatory disease was treated with marked success using modified *Chai Hu Jia Long Gu Mu Li Tang* plus *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Pu Gong Ying* (Herba Taraxaci). In addition to the base formula, modifications were made by adding *Du Zhong* (Cortex Eucommiae), *Qian Shi* (Semen Euryales) and *Tu Si Zi* (Semen Cuscutae) for Kidney yang deficiency; *Er Zhi Wan* (Two-Ultimate Pill) for Kidney yin deficiency; *Yu Jin* (Radix Curcumae) and *Zhi Shi* (Fructus Aurantii Immaturus) for qi stagnation; and *Yi Yi Ren* (Semen Coicis) and *Cang Zhu* (Rhizoma Atractylodis) for dampness. The treatment protocol was to administer the herbs in decoction, for 6 packs of herbs per course of treatment, for a total of 2-6 courses. Of 323 patients, the study reported complete recovery in 178 cases, marked improvement in 112 cases, moderate

improvement in 26 cases, and no effect in 7 cases. The overall rate of effectiveness was 94.7%.²³

7. **Seizures and epilepsy**: A study reported 88% effectiveness using modified *Chai Hu Jia Long Gu Mu Li Tang* to treat 50 patients with epilepsy. The herbal treatment was based on *Chai Hu Jia Long Gu Mu Li Tang* without *Qian Dan* (Minium). Modifications included addition of *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Yuan Zhi* (Radix Polygalae) and *Dan Nan Xing* (Arisaema cum Bile) for the presence of excessive amounts of phlegm; *Suan Zao Ren* (Semen Ziziphi Spinosa), *Shou Wu Teng* (Caulis Polygoni Multiflori) and *He Huan Pi* (Cortex Albiziae) for insomnia due to deficiency and restlessness; *Shi Jue Ming* (Concha Haliotidis), *Gou Teng* (Ramulus Uncariae cum Uncis), *Sheng Tie Luo* (Frusta Ferri) and *Huang Lian* (Rhizoma Coptidis) for wind and yang rising; *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis) and *Xuan Shen* (Radix Scrophulariae) for yin deficiency. Additional adjustments were also made, depending on the severity of the condition and age of the patients. Of 50 patients, the study reported near-recovery in 25 cases, improvement in 19 cases, and no effect in 6 cases.²⁴ Another study reported marked success using modified *Chai Hu Jia Long Gu Mu Li Tang* to treat 20 patients with seizures and epilepsy, reducing the seizure frequency from an average of 13.4 +/- 3.4 to 10.7 +/- 2.5 per month.²⁵
8. **Insomnia**: Thirty-six patients with insomnia were treated with 88.9% effectiveness using modified *Chai Hu Jia Long Gu Mu Li Tang*. The herbal formula contained *Chai Hu* (Radix Bupleuri) 12-20g, *Long Gu* (Os Draconis) 20-30g, *Mu Li* (Concha Ostreae) 20-30g, *Huang Qin* (Radix Scutellariae) 10-15g, *Fu Ling* (Poria) 10-15g, *Ban Xia* (Rhizoma Pinelliae) 10-15g, *Da Huang* (Radix et Rhizoma Rhei) 6-10g, *He Huan Hua* (Flos Albiziae) 20g, *Da Zao* (Fructus Jujubae) 3-5 pieces, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 3-5 slices. *Long Dan* (Radix et Rhizoma Gentianae) and *Zhi Zi* (Fructus Gardeniae) were added for Liver fire rising; *Shen Qu* (Massa Fermentata) and *Lai Fu Zi* (Semen Raphani) for Stomach disharmony; *Huang Lian* (Rhizoma Coptidis) and *E Jiao* (Colla Corii Asini) for yin-deficient fire; and *Dang Shen* (Radix Codonopsis) and *Dang Gui* (Radix Angelicae Sinensis) for Heart and Spleen deficiencies. Of 36 patients, the study reported significant improvement in 19 cases, moderate improvement in 13 cases, and no effect in 4 cases. The overall rate of effectiveness was 88.9%.²⁶
9. **Postischemic brain injury**: Administration of three herbal formulas minimized postischemic brain injury by inhibiting production of free radicals and generation of

Chái Hú Jiā Lóng Gǔ Mǔ Lì Tāng

(Bupleurum plus Dragon Bone and Oyster Shell Decoction)

lipid peroxidation. The three formulas found to be effective, both *in vitro* and *in vivo*, were *Chai Hu Jia Long Gu Mu Li Tang*, *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), and *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill).²⁷

HERB-DRUG INTERACTION

- **Carbamazepine:** Researchers evaluated the possibility of pharmacokinetic interactions between *Chai Hu Jia Long Gu Mu Li Tang* and carbamazepine. After extensive examination in rats, the researchers found no significant differences in the serum protein binding of carbamazepine and carbamazepine-10,11-epoxide, its active metabolite. Furthermore, one-week pretreatment with *Chai Hu Jia Long Gu Mu Li Tang* (1 g/kg/day) did not affect the plasma concentration-time profile or any pharmacokinetic parameter of carbamazepine or its metabolite. The researchers concluded that oral co-administration of *Chai Hu Jia Long Gu Mu Li Tang* with carbamazepine appears to be pharmacokinetically safe.²⁸
- **Theophylline:** Administration of theophylline is often accompanied by side effects such as tachycardia and central nervous system stimulation. According to one study in rats and mice, administration of *Chai Hu Jia Long Gu Mu Li Tang* concurrent with theophylline successfully suppressed the cardiovascular and central nervous systems to alleviate theophylline-induced tachycardia, locomotion, and convulsions.²⁹

TOXICOLOGY

Qian Dan (Minium), lead oxide red (Pb₃O₄), is a potentially toxic substance. Acute poisoning may occur following a bolus dose of 15 grams; chronic poisoning has been reported following daily ingestion of 2 mg of this mineral.³⁰ Two cases of anemia have been reported with the use of *Chai Hu Jia Long Gu Mu Li Tang* that contained *Qian Dan* (Minium). The cause of this toxicity was attributed to *Qian Dan* (Minium), as anemia is a potential consequence of lead poisoning.³¹ Note: *Chai Hu Jia Long Gu Mu Li Tang* produced today do not contain *Qian Dan* (Minium), and should not cause these side effects.

Chai Hu An Shen Tang (Bupleurum Decoction to Tranquilize the Spirit) is a modified version of *Chai Hu Jia Long Gu Mu Li Tang*. The modifications include the removal of *Qian Dan* (Minium), which is generally deemed inappropriate for use today because of its potential toxicities. Furthermore, additional herbs are incorporated to enhance the effects of calming the *shen* (spirit), nourishing the blood, and tonifying qi. Common clinical applications of this formula include stress, anxiety, insomnia, emotional disturbances, and various types of mental disorders.

AUTHORS' COMMENTS

Chai Hu Jia Long Gu Mu Li Tang is one of today's most popular formulas for stress management. Similar to *Xiao Yao San* (Rambling Powder) which helps patients cope with daily stressful situations, this formula tranquilizes the *shen* (spirit), clears heat, and helps patients rest and fall asleep. Many psychosomatic disorders stem from Liver qi stagnation or Liver fire, which can be treated with the formulas mentioned above.

Suān Zǎo Rén Tāng (Sour Jujube Decoction)

酸棗仁湯

酸枣仁汤

Pinyin Name: *Suan Zao Ren Tang***Literal Name:** Sour Jujube Decoction**Alternate Names:** *Suan Zao Tang*, Zizyphus Combination**Original Source:** *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION***Suan Zao Ren* (Semen Ziziphi Spinosae), *chao* (dry-fried)

2 cups [15-18g]

Chuan Xiong (Rhizoma Chuanxiong)

6g [3-5g]

Fu Ling (Poria)

6g [10g]

Zhi Mu (Rhizoma Anemarrhenae)

6g [8-10g]

Gan Cao (Radix et Rhizoma Glycyrrhizae)

3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to first dry-fry *Suan Zao Ren* (Semen Ziziphi Spinosae), crack the seeds open, and then cook them with 8 cups [1,600 mL] of water until only 6 cups [1,200 mL] of the liquid remain. Add the other ingredients and cook until the liquid is further reduced to 3 cups [600 mL]. Take the warm, strained decoction in three equally-divided doses.

deficiency heat rising, caused by over-exertion or chronic consumption. Palpitations and dry mouth and throat are due to blood deficiency and lack of adequate nourishment to the Heart. Patients with this syndrome may have yin deficiency and deficiency heat, which can cause irritability, insomnia, palpitations, and night sweats. Liver blood deficiency may contribute to hyperactivity of Liver yang, leading to dizziness and vertigo.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the blood and calms the *shen* (spirit)
2. Clears heat and relieves irritability

Suan Zao Ren (Semen Ziziphi Spinosae), the chief herb of this formula, nourishes Liver blood and calms Heart *shen* (spirit). *Chuan Xiong* (Rhizoma Chuanxiong) regulates Liver blood. *Fu Ling* (Poria) tranquilizes the mind and calms the *shen*. *Zhi Mu* (Rhizoma Anemarrhenae) nourishes yin and clears deficiency heat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) clears heat and harmonizes all of the herbs in this formula.

CLINICAL MANIFESTATIONS

Liver blood deficiency with deficiency-heat rising: irritability, insomnia, palpitations, night sweating, dizziness, vertigo, dry mouth and throat, and a fine, wiry pulse.

CLINICAL APPLICATIONS

Insomnia, nocturnal emissions, somnolence, neurasthenia, menopausal syndrome, and excessive worrying.

MODIFICATIONS

- If there is qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali Membranacei).
- With night sweats, add *Ma Huang Gen* (Radix et Rhizoma Ephedrae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With severe night sweats, add *Mu Li* (Concha Ostreae) and *Fu Xiao Mai* (Fructus Tritici Levis).

EXPLANATION

Suan Zao Ren Tang (Sour Jujube Decoction) treats insomnia characterized by Liver blood deficiency with

Suān Zǎo Rén Tāng (Sour Jujube Decoction)

Suan Zao Ren Tang (Sour Jujube Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver blood deficiency with deficiency-heat rising	<ul style="list-style-type: none"> • Insomnia, irritability, palpitations and night sweats: interior heat disturbing <i>shen</i> (spirit) and consuming yin • Palpitations, dry mouth and throat: blood deficiency unable to nourish the Heart • Dizziness and vertigo: Liver blood deficiency with hyperactivity of Liver yang 	<ul style="list-style-type: none"> • Nourishes the blood and calms the <i>shen</i> • Clears heat and relieves irritability 	<ul style="list-style-type: none"> • <i>Suan Zao Ren</i> (Semen Ziziphi Spinosae) nourishes Liver blood and calms Heart <i>shen</i>. • <i>Chuan Xiong</i> (Rhizoma Chuanxiong) regulates Liver blood. • <i>Fu Ling</i> (Poria) tranquilizes the mind and calms the <i>shen</i>. • <i>Zhi Mu</i> (Rhizoma Anemarrhenae) nourishes yin and clears deficiency heat. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) clears heat and harmonizes all of the herbs.

- With irritability, thirst, and insomnia, add *Mai Dong* (Tuber Ophiopogonis Japonici) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With irritability, restlessness, and insomnia, add *Wen Dan Tang* (Warm the Gallbladder Decoction).
- For insomnia due to blood deficiency, add *Dang Gui* (Radix Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Glutinosae Conquatae), and *He Shou Wu* (Radix Polygoni Multiflori).
- For insomnia due to heat, add *Mu Dan Pi* (Cortex Moutan Radicis), *Zhi Zi* (Fructus Gardeniae Jasminoidis), and *Dan Zhu Ye* (Herba Lophatheri).
- With fright and palpitations, add *Yuan Zhi* (Radix Polygalae Tenuifoliae) and *Shi Chang Pu* (Rhizoma Acori Graminei).
- With excessive thinking and insomnia, add *Yi Gan San* (Restrain the Liver Powder).
- With palpitations and excessive dreams, or waking up at night from nightmares due to Heart and Gallbladder deficiencies, add *Dang Shen* (Radix Codonopsis) and *Long Chi* (Dens Draconis).
- With deficiency fire flaring, remove *Chuan Xiong* (Rhizoma Chuanxiong) and add *Bai Shao* (Radix Paeoniae Alba), *Di Huang* (Radix Rehmanniae), and *Huang Lian* (Rhizoma Coptidis).

PHARMACOLOGICAL EFFECTS

Central nervous system: Administration of *Suan Zao Ren Tang* was associated with marked sedative and hypnotic effects. According to various experiments in mice, rats, guinea pigs, rabbits, dogs, and humans, administration of the formula decreased spontaneous physical activities, inhibited caffeine-induced stimulation, and potentiated the effects of sedative and hypnotic drugs.¹

CLINICAL STUDIES AND RESEARCH

1. **Insomnia:** Use of modified *Suan Zao Ren Tang* was associated with 91.7% effectiveness in treating insomnia.

Modifications were made by adding *Long Dan* (Radix et Rhizoma Gentianae) and *Chai Hu* (Radix Bupleuri) for restlessness, irritability, anger, red eyes, a bitter taste in the mouth, red tongue, yellow tongue coating, and a wiry, rapid pulse; *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Shou Wu Teng* (Caulis Polygoni Multiflori) for blood stagnation; *E Jiao* (Colla Corii Asini), *Huang Bo* (Cortex Phellodendri Chinensis), and *Bie Jia* (Carapax Trionycis) for yin-deficient heat; *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), and *He Huan Pi* (Cortex Albiziae) for qi and blood deficiencies; *Huang Qi* (Radix Astragali) and *Yuan Zhi* (Radix Polygalae) for Heart qi deficiency; and *Dan Nan Xing* (Arisaema cum Bile) and *Zhu Li* (Succus Bambusae) for profuse sputum. The herbs were given 30 minutes before bedtime. Of 72 patients, the study reported recovery in 47 cases, significant improvement in 12 cases, moderate improvement in 7 cases, and no effect in 6 cases.² In another study, 20 out of 31 patients (64.5%) reported improvement following ingestion of 2.5g of an extract preparation of *Suan Zao Ren Tang*. Improvement was defined as shorter time needed to fall asleep, better quality of sleep, and better energy during the following day.³

2. **Nocturnal emissions:** Modified *Suan Zao Ren Tang* was effective in treating 28 patients with nocturnal emissions. The modifications included the addition of *Huang Bo* (Cortex Phellodendri Chinensis) and others as deemed necessary. The duration of treatment ranged from 10 to 30 days. The overall effectiveness was 78.6%.⁴

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	90g
<i>Fu Ling</i> (Poria)	90g
<i>Fu Shen</i> (Poria Paradicis)	90g
<i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii)	60g
<i>Yuan Zhi</i> (Radix Polygalae), <i>chao</i> (dry-fried) with ginger	60g
<i>Zhu Sha</i> (Cinnabaris)	30g

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

The source text states to grind all of the ingredients and only 15g of *Zhu Sha* (Cinnabaris) into powder and form into pills with honey. Use the other 15g of *Zhu Sha* (Cinnabaris) to coat the pills. Take 6g of pills with warm, boiled water, before bedtime.

The main actions of *Ding Zhi Wan* (Settle the Emotions Pill) are to tonify Heart qi, benefit cognitive functions, calm the *shen* (spirit), and ease fear and fright. It is generally indicated for individuals who have fear and fright, yet become easily angered, and have insomnia.

Suan Zao Ren Tang and *Ding Zhi Wan* (Settle the Emotions Pill) have functions to nourish and calm the *shen* (spirit).

- *Suan Zao Ren Tang* treats insomnia caused by blood deficiency and the inability of blood to nourish the Heart. The primary functions of the formula are to nourish the blood, clear heat, and calm the *shen*.
- *Ding Zhi Wan* treats insomnia with fear and fright caused by Heart qi deficiency. The main actions of the formula are to tonify Heart qi and calm the *shen*.

AUTHORS' COMMENTS

Suan Zao Ren Tang is one of the most commonly used formulas for treating insomnia. It is most effective for insomnia due to deficiency, irritability, and consumption, with such key signs and symptoms as irritability, palpitations, dry mouth and throat, and a fine, wiry pulse.

Proper processing of *Suan Zao Ren* (Semen Ziziphi Spinosae) is extremely important, as it will determine the overall effectiveness of this formula. According to the source text, *Suan Zao Ren* (Semen Ziziphi Spinosae) must be dry-fried first, then the seeds should be crushed open, before placing them in water for cooking. Dry-frying the seeds enhances the effects of tonifying Liver blood and treating insomnia; crushing them maximizes extraction of the active ingredients.⁵

Suan Zao Ren Tang, *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), and *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction) all treat insomnia, palpitations, and anxiety caused by lack of nourishment to the Heart and leading to *shen* (spirit) disturbance.

- *Suan Zao Ren Tang* is best for nourishing Liver blood and clearing deficiency heat. Chief manifestations include irritability, restlessness, vertigo, night sweats, and dry mouth and throat.
- *Tian Wang Bu Xin Dan* is better for nourishing yin and blood caused by Kidney and Heart deficiencies. Chief manifestations include anxiety, decreased sleep, palpitations, and a withered *shen*.
- *Gan Mai Da Zao Tang* harmonizes the middle *jiao*, relieves pain, and treats yin deficiency of the *zang* organs with Liver qi stagnation and Heart deficiency. Chief manifestations include frequent crying urges, emotional mood swings, and absent-mindedness.⁶

Please refer to *Gui Pi Tang* (Restore the Spleen Decoction) for a comparison of the uses, similarities, and differences between *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart) and *Suan Zao Ren Tang*.

<i>Bai Zi Ren</i> (Semen Platycladi)	30g [9g]
<i>Yuan Zhi</i> (Radix Polygalae)	15g [5g]
<i>Jie Geng</i> (Radix Platycodonis)	15g [5g]

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and form into small pills with honey. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Coat the pills with *Zhu Sha* (Cinnabaris). Take 20-30 pills [9g] per dose on an empty stomach with either warm/hot boiled water or with a decoction of *Zhu Ye* (Herba Phyllostachys). Today, this formula may be prepared and administered as pills or decoction. For pills, take 9g per dose with warm/hot boiled water. For decoction, use the suggested doses in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and tonifies the blood
2. Tonifies the Heart and Kidney
3. Calms the *shen* (spirit)

CLINICAL MANIFESTATIONS

Heart and Kidney deficiencies with yin and blood insufficiencies: generalized weakness and deficiency, forgetfulness, irritability, insomnia, palpitations, lassitude, nocturnal emissions, dry stools, tongue ulceration, a red tongue body with little coating, and a fine, rapid pulse.

CLINICAL APPLICATIONS

Coronary heart disease, angina, viral myocarditis, hypertension, hyperthyroidism, neurasthenia, mental instability, attention deficit disorder, insomnia, impotence, and hepatitis.

EXPLANATION

Tian Wang Bu Xin Dan (Emperor of Heaven's Special Pill to Tonify the Heart) is designed to treat Heart and Kidney deficiencies with yin and blood insufficiencies. Heart blood deficiency may lead to hyperactivity of yang, resulting in forgetfulness, irritability, insomnia, and palpitations. Deficiency of blood may cause malnourishment of the body, leading to lassitude. Kidney yin deficiency may lead to instability of the *jing* (essence) and nocturnal emissions. Dry stools indicate yin deficiency with insufficient nourishment to the bowels. Since the tongue is the sense organ that belongs to the Heart, Heart yin deficiency may lead to tongue ulcerations. A red tongue body with

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heart and Kidney deficiencies with yin and blood insufficiencies	<ul style="list-style-type: none"> • Forgetfulness and palpitations: Heart blood deficiency • Irritability and insomnia: hyperactivity of yang due to Heart blood deficiency • Lassitude: malnourishment of the body due to blood deficiency • Dry stools: yin-deficient fire consuming body fluids • Tongue ulcerations: yin-deficient fire rising upward • Red tongue body with little coating and a fine, rapid pulse: yin-deficient fire 	<ul style="list-style-type: none"> • Nourishes yin and tonifies the blood • Tonifies the Heart and Kidney • Calms the <i>shen</i> (spirit) 	<ul style="list-style-type: none"> • <i>Di Huang</i> (Radix Rehmanniae) tonifies yin and blood, moistens dryness and helps to control hyperactivity of yang. • <i>Xuan Shen</i> (Radix Scrophulariae), <i>Tian Dong</i> (Radix Asparagi) and <i>Mai Dong</i> (Radix Ophiopogonis) tonify yin to clear deficiency fire. • <i>Dan Shen</i> (Radix et Rhizoma Salviae Miltiorrhizae) and <i>Dang Gui</i> (Radix Angelicae Sinensis) tonify blood and activate blood circulation. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Fu Ling</i> (Poria) tonify qi and calm the <i>shen</i>. • <i>Suan Zao Ren</i> (Semen Ziziphi Spinosa) and <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) astringe the Heart qi to calm the <i>shen</i>. • <i>Bai Zi Ren</i> (Semen Platycladi), <i>Yuan Zhi</i> (Radix Polygalae) and <i>Zhu Sha</i> (Cinnabaris) nourish the Heart to calm the <i>shen</i>. • <i>Jie Geng</i> (Radix Platycodonis) leads all of the herbs to the upper <i>jiao</i>. • <i>Zhu Sha</i> (Cinnabaris) and <i>Zhu Ye</i> (Herba Phyllostachys) calm the <i>shen</i> and guide the formula to the Heart.

little coating, and a fine, rapid pulse, both suggest yin deficiency.

Di Huang (Radix Rehmanniae) is the chief herb in this formula. It tonifies yin and blood, helps to control hyperactivity of yang, and moistens dryness. It also nourishes Kidney water, and helps to control Heart fire. *Xuan Shen* (Radix Scrophulariae), *Tian Dong* (Radix Asparagi), and *Mai Dong* (Radix Ophiopogonis) tonify yin to clear deficiency fire. *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Dang Gui* (Radix Angelicae Sinensis) tonify blood and activate blood circulation. *Ren Shen* (Radix et Rhizoma Ginseng) and *Fu Ling* (Poria) tonify qi and calm the *shen* (spirit). *Suan Zao Ren* (Semen Ziziphi Spinosa) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) astringe Heart qi to calm the *shen*. *Bai Zi Ren* (Semen Platycladi), *Yuan Zhi* (Radix Polygalae) and *Zhu Sha* (Cinnabaris) nourish the Heart to calm the *shen*. *Jie Geng* (Radix Platycodonis) is a channel-guiding herb that leads all of the herbs to the upper *jiao*. *Zhu Sha* (Cinnabaris) and *Zhu Ye* (Herba Phyllostachys) calm the *shen* and guide the formula to the Heart.

MODIFICATIONS

- With toothache, add *Qing Wei San* (Clear the Stomach Powder).
- With ulcerations of the mouth and tongue, add *Huang Lian* (Rhizoma Coptidis) and *Mu Dan Pi* (Cortex Moutan Radicis).
- With dry mouth and throat, add *Shi Hu* (Caulis Dendrobii) and *Yu Zhu* (Rhizoma Polygonati Odorati).
- If there is constipation, add *Zhi Shi* (Fructus Immaturus Citri Aurantii) and *Hou Po* (Cortex Magnoliae Officinalis).
- With severe palpitations, insomnia, or restless *shen* (spirit), add *Long Yan Rou* (Arillus Longanae Euphoriae) and *Shou Wu Teng* (Caulis Polygoni Multiflori).
- With inability to concentrate, forgetfulness, or to enhance memory, add *Yuan Zhi* (Radix Polygalae), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), and *Yin Xing Ye* (Folium Ginkgo).
- For more severe insomnia, add *Long Gu* (Os Draconis) and *Ci Shi* (Magnetitum).
- For spermatorrhea or nocturnal emissions, add *Jin Ying Zi* (Fructus Rosae Laevigatae), *Qian Shi* (Semen Euryales), and *Mu Li* (Concha Ostreae).

Tiān Wáng Bǔ Xīn Dān

(Emperor of Heaven's Special Pill to Tonify the Heart)

- With dizziness and vertigo, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae).
- With excessive thinking and worrying, add *Xiao Yao San* (Rambling Powder).
- For insomnia or restless sleep, add *Suan Zao Ren Tang* (Sour Jujube Decoction).

CAUTIONS / CONTRAINDICATIONS

- While taking *Tian Wang Bu Xin Dan*, avoid the following: cilantro, garlic, radishes, seafood, and liquor.
- This formula contains many rich tonics, which make it unsuitable for long-term use by patients who have Spleen and Stomach deficiencies, or those with damp or phlegm accumulation.
- According to one report, use of this formula may cause occasional side effects such as indigestion, epigastric fullness and distention, mild diarrhea, skin rashes, and itching.¹

PHARMACOLOGICAL EFFECTS

1. **Central nervous system:** Many herbs in *Tian Wang Bu Xin Dan* have marked sedative and hypnotic effects, including *Dang Gui* (Radix Angelicae Sinensis), *Fu Ling* (Sclerotium Poriae Cocos), *Yuan Zhi* (Radix Polygalae Tenuifoliae), *Bai Zi Ren* (Semen Biotae Orientalis), and *Suan Zao Ren* (Semen Ziziphi Spinosae). Furthermore, some of the herbs also improve cognitive functions, such as *Ren Shen* (Radix et Rhizoma Ginseng) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).²
2. **Cardiovascular:** Laboratory experiments in mice showed administration of the formula to be beneficial in cases of shock, angina, arrhythmia, and hypoxia. The mechanisms of action are attributed to increased blood perfusion to the heart and increased resistance to hypoxia.³

CLINICAL STUDIES AND RESEARCH

1. **Neurasthenia:** In one study, 218 patients with neurasthenia were treated with *Tian Wang Bu Xin Dan* with an overall 66.5% rate of effectiveness. The treatment protocol was to administer the herbs in pills, 10-15 pills (1 g/pill) three times daily before meals and at bedtime. The duration of treatment was 30 days per course.⁴
2. **Coronary heart disease:** *Tian Wang Bu Xin Dan* has beneficial effects in treating coronary heart disease, angina, hypotension, palpitations and insomnia. It was noted that the dose of *Ren Shen* (Radix et Rhizoma Ginseng) should be 15g or above to have significant impact.⁵
3. **Angina:** Use of modified *Tian Wang Bu Xin Dan* in 35 patients with angina was associated with complete recovery in 10 cases, improvement in 20 cases, and no effect in 5 cases. In addition to *Tian Wang Bu Xin Dan*

as the base formula, modifications were made as needed. For a feeling of severe oppression in the chest, *Fo Shou* (Fructus Citri Sarcodactylis), *Zhi Shi* (Fructus Aurantii Immaturus), and *Tan Xiang* (Lignum Santali Albi) were added. For severe angina pain, a preparation containing *Su He Xiang* (Styrax) and *Bing Pian* (Borneolum Syntheticum) was added. For Heart yin deficiency, *Dang Shen* (Radix Codonopsis) was added. For insomnia, *Shou Wu Teng* (Caulis Polygoni Multiflori) and *He Huan Pi* (Cortex Albiziae) were added. For a thick, greasy tongue coating, *Gua Lou* (Fructus Trichosanthis) was added. And, for irregular heartbeat, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) was added.⁶

4. **Viral myocarditis:** In one study of 23 patients with viral myocarditis, use of modified *Tian Wang Bu Xin Dan* daily for 1-3 courses of treatment (10 days per course) was associated with 95.6% effectiveness. In addition to *Tian Wang Bu Xin Dan*, intravenous infusion of *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) was given for cases of severe blood stagnation. Of 23 cases, the study reported complete recovery in 16 cases, moderate improvement in 6 cases, and no effect in 1 case.⁷
5. **Insomnia:** Administration of *Tian Wang Bu Xin Dan* showed marked effectiveness in the treatment of insomnia. Depending on the dose and dosage form, the rate of success ranged from 87-96%.⁸
6. **Impotence:** Administration of modified *Tian Wang Bu Xin Dan* effectively treated 30 of 37 patients with impotence. The herbal treatment was based on *Tian Wang Bu Xin Dan*, with the addition of *Zhu Ye* (Herba Phyllostachys), *Mu Tong* (Caulis Akebiae), and *Zhu Sha* (Cinnabaris) for ulcerations of the mouth and tongue as well as burning sensations and pain in the penis; *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Qian Shi* (Semen Euryales) for premature ejaculation and seminal emission; and *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction) for palpitations with fear and fright. In addition to herbs, patients were advised to control their emotions, avoid spicy and pungent foods, and not to engage in excessive sexual activity.⁹
7. **Hepatitis:** In one study, modified *Tian Wang Bu Xin Dan* was used to treat 34 patients with chronic hepatitis characterized by yin deficiency. The patients presented with irritability, restlessness, insomnia, dizziness, vertigo, hypochondriac fullness, and pain. The treatment protocol was to administer the herbs in decoction one time daily, for 30 days per course of treatment. The average duration of treatment was 46.7 days. The study reported an overall effectiveness of 94.1%. Most patients reported improvement in signs and symptoms, reduced size of the spleen and liver, and decreased levels of liver enzymes.¹⁰

Tiān Wáng Bǔ Xīn Dān

(Emperor of Heaven's Special Pill to Tonify the Heart)

TOXICOLOGY

Use of *Tian Wang Bu Xin Dan* has been associated with side effects such as a general feeling of warmth, thirst, rash and eczema of the entire body.¹¹ Note: These reactions are due to older formulations of the product containing *Zhu Sha* (Cinnabaris), a potentially toxic substance, in the coating of the pellets. Most products today do **not** contain *Zhu Sha* (Cinnabaris), and should not cause these side effects.

The source text states to grind all ingredients into powder, and form into pills with honey. The pills are coated with *Jin Bo* (gold foil), and should weigh 3 grams each. Take one pill after meals and at bedtime with a decoction made from *Deng Xin Cao* (Medulla Junci) and *Da Zao* (Fructus Jujubae).

This formula has functions to moisten yin, nourish blood, tonify the Heart, and calm the *shen* (spirit). It is used to treat excessive worrying and over thinking, leading to symptoms such as dry mouth and throat, forgetfulness, nocturnal emission, ulcerations of the mouth and tongue, dry stools, a red tongue with thin tongue coating, and fine, rapid pulse.

Bǎi Zǐ Yǎng Xīn Wán

(Biota Seed Pill to Nourish the Heart)

柏子養心丸

柏子养心丸

Tiān Wáng Bǔ Xīn Dān

(Emperor of Heaven's Special Pill to Tonify the Heart)

Pinyin Name: *Bai Zi Yang Xin Wan*

Literal Name: Biota Seed Pill to Nourish the Heart

Original Source: *Ti Ren Hui Bian* (Compilation of Materials of Benevolence for the Body) by Peng Yong-Guang in 1549

<i>Bai Zi Ren</i> (Semen Platycladi)	120g [12g]
<i>Gou Qi Zi</i> (Fructus Lycii)	90g [9g]
<i>Mai Dong</i> (Radix Ophiopogonis)	30g [5g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	30g [5g]
<i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii)	30g [5g]
<i>Fu Shen</i> (Poria Paradicis)	30g [5g]
<i>Xuan Shen</i> (Radix Scrophulariae)	60g [6g]
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	60g [6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	15g [5g]

The source text states to grind the ingredients into powder and form into small pills with honey. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 40-50 pills [6g] per dose. Today, this formula may be prepared as a decoction using the suggested doses in brackets.

The main actions of this formula are to nourish the Heart, calm the *shen* (spirit), tonify the Kidney, and nourish yin. *Bai Zi Yang Xin Wan* (Biota Seed Pill to Nourish the Heart) treats disharmony of the Heart and Kidney with deficiency of *ying* (nutrition) and blood, manifesting in symptoms such as disorientation, severe palpitations, excessive dreams, dream-disturbed sleep, forgetfulness, and night sweats.

Yāng Xīn Dān (Nourish the Heart Pill)

養心丹
养心丹

Pinyin Name: *Yang Xin Dan*

Literal Name: Nourish the Heart Pill

Original Source: *Tian Jin Zhong Yi Xue Yuan* (Tianjin University of Chinese Medicine) in 1989

<i>Di Huang</i> (Radix Rehmanniae)
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)
<i>Dan Shen</i> (Radix et Rhizoma Salviae Miltiorrhizae)
<i>Xuan Shen</i> (Radix Scrophulariae)
<i>Fu Ling</i> (Poria)
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)
<i>Yuan Zhi</i> (Radix Polygalae)
<i>Jie Geng</i> (Radix Platycodonis)
<i>Dang Gui</i> (Radix Angelicae Sinensis)
<i>Tian Dong</i> (Radix Asparagi)

Mai Dong (Radix Ophiopogonis)

Bai Zi Ren (Semen Platycladi)

Suan Zao Ren (Semen Ziziphi Spinosae)

Shi Chang Pu (Rhizoma Acori Tatarinowii)

Yin Xing Ye (Folium Ginkgo)

Yang Xin Dan (Nourish the Heart Pill) has essentially the same ingredients and functions as *Tian Wang Bu Xin Dan*. Minor modifications include the removal of *Zhu Sha* (Cinnabaris), which is deemed inappropriate for use today, and the addition of *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Yin Xing Ye* (Folium Ginkgo) to help open the sensory orifices and improve the overall efficacy of the formula.

Zhēn Zhōng Dān (Pillow Special Pill)

枕中丹

Pinyin Name: *Zhen Zhong Dan*

Literal Name: Pillow Special Pill

Original Source: *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies) by Sun Si-Miao in the Tang Dynasty

Gui Ban (Plastrum Testudinis)

Long Gu (Os Draconis)

Yuan Zhi (Radix Polygalae)

Shi Chang Pu (Rhizoma Acori Tatarinowii)

Grind equal amounts of the ingredients into powder and form into pills with honey. Take 9g of pills per dose with grain-based liquor.

These herbs combine to calm the Heart, improve cognition, and sedate the *shen* (spirit). *Zhen Zhong Dan* (Pillow Special Pill) is generally used for individuals with forgetfulness and insomnia caused by a restless Heart and *shen* disturbance.

AUTHORS' COMMENTS

These three formulas have the same name, and similar functions and clinical applications.

- *Tian Wang Bu Xin Dan* from *Jiao Zhu Fu Ren Liang Fang* (Revised Fine Formulas for Women) is generally considered to be the representative formula, since this composition is most commonly used today.
- *Tian Wang Bu Xin Dan* from *She Sheng Mi Pou* (Secrets Investigations into Obtaining Health) is usually considered to be a related formula, but it was published approximately 200 years later. It has the same composition, but differ slightly in doses.

Tiān Wáng Bǔ Xīn Dān

(Emperor of Heaven's Special Pill to Tonify the Heart)

- *Tian Wang Bu Xin Dan* from *Shi Yi De Xiao Fang* (Effective Formulas from Generations of Physicians) is also considered to be a related formula. Though it was published first, this composition is not as frequently used today.

Tian Wang Bu Xin Dan, *Bai Zi Yang Xin Wan* (Biota Seed Pill to Nourish the Heart), and *Zhen Zhong Dan* (Pillow Special Pill) all treat insomnia. Their differences are as follows:

- *Tian Wang Bu Xin Dan* treats both the cause and the symptoms of insomnia by nourishing yin, tonifying blood, benefiting qi, and calming the Heart. It is one of the most commonly used formulas for treating insomnia arising from yin and blood deficiencies.
- *Bai Zi Yang Xin Wan* is primarily a tonic formula that treats insomnia caused by Heart and Kidney deficiencies.
- *Zhen Zhong Dan* is primarily a sedating formula that addresses forgetfulness and insomnia caused by a restless Heart and disturbed *shen* (spirit).

Tian Wang Bu Xin Dan and *Gui Pi Tang* (Restore the Spleen Decoction) both nourish the Heart and calm the *shen* (spirit) to treat palpitations, forgetfulness, and insomnia.

- *Tian Wang Bu Xin Dan* is indicated for patients with disharmony of the Heart and Kidney, in which a deficient Kidney yin is unable to nourish the Heart, and thus creates Heart fire. Besides blood deficiency signs of palpitations, forgetfulness, and insomnia, symptoms of Heart fire will also manifest such as that of irritability, night sweats, nocturnal emissions, ulcers on the tongue, and dry stools or constipation. This formula uses herbs that not only nourish yin and blood, but also have tranquilizing and calming effects, such as *Suan Zao Ren* (Semen Ziziphi Spinosae), *Bai Zi Ren* (Semen Platycladi), *Yuan Zhi* (Radix Polygalae), *Tian Dong* (Radix Asparagi), and *Mai Dong* (Radix Ophiopogonis).
- *Gui Pi Tang* is designed for individuals who worry excessively, resulting in qi and blood deficiencies of the Spleen and Heart. Other than *shen* (spirit) disturbance signs, they will exhibit poor appetite, decreased dietary intake, lassitude, shortness of breath, spontaneous sweating, and other Spleen deficiency signs. Therefore, besides tranquilizing herbs such as *Suan Zao Ren* (Semen Ziziphi Spinosae), *Fu Shen* (Poria Paradicis), *Long Yan Rou* (Arillus Longan), and *Yuan Zhi* (Radix Polygalae), this formula contains Spleen tonic herbs such as *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and

Gan Cao (Radix et Rhizoma Glycyrrhizae). *Mu Xiang* (Radix Aucklandiae) is added to regulate qi and awaken the Spleen. This formula can also be used for bleeding or bruising due to a deficient Spleen not being able to retain the blood inside the vessels.¹²

Tian Wang Bu Xin Dan and *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction) both nourish yin and blood, and thus address the palpitations, anxiety, insomnia, and dry stools.

- *Tian Wang Bu Xin Dan* is better for Heart yin and blood deficiencies with excess Heart yang flaring. Anxiety, decreased sleep, palpitations, withered *shen* (spirit), nocturnal emissions, and nervousness are the result of the *shen* not being nourished. Therefore, nourishing herbs as well as *shen*-calming herbs are used in this formula.
- *Zhi Gan Cao Tang* is mainly used for qi and blood deficiencies. Blood deficiency results in inability to nourish the Heart. With the qi being deficient, the yang is weak and cannot generate the pulse, leading to a bounding or intermittent pulse. Qi tonics, along with yin and blood tonics, are used to generate the pulse. *Shu Di Huang* (Radix Rehmanniae Praeparata), *Sheng Jiang* (Rhizoma Zingiberis Recens), *E Jiao* (Colla Corii Asini), *Mai Dong* (Radix Ophiopogonis), and *Da Zao* (Fructus Jujubae) nourish yin and blood. *Ren Shen* (Radix et Rhizoma Ginseng) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) warm and tonify qi. *Gui Zhi* (Ramulus Cinnamomi) and *Sheng Jiang* (Rhizoma Zingiberis Recens) assist Heart yang to generate the pulse. This formula can also be used for Lung qi and yin deficiencies, manifesting in emaciation, shortness of breath, anxiety, poor sleep, and spontaneous sweating.¹³

Tian Wang Bu Xin Dan is often used to treat forgetfulness or diminished mental acuity due to overwork or over-thinking. Today, this formula is used frequently by scholars and students preparing for exams, to help with their cognition.

According to Dr. Chang Wei-Yen, *Tian Wang Bu Xin Dan* can be combined with *Sheng Mai San* (Generate the Pulse Powder) and *Ba Zhen Tang* (Eight-Treasure Decoction) to treat those who suffer from headaches accompanied by dizziness, palpitations, frequent dreams, and cold limbs caused by blood deficiency. Also, the combination of *Tian Wang Bu Xin Dan* and *Sang Piao Xiao San* (Mantis Egg-Case Powder) effectively treats forgetfulness, bedwetting, enuresis, or seminal emissions.

Gān Mài Dà Zǎo Tāng (Licorice, Wheat, and Jujube Decoction)

甘麥大棗湯

甘麦大枣汤

Pinyin Name: *Gan Mai Da Zao Tang*

Literal Name: Licorice, Wheat, and Jujube Decoction

Alternate Names: *Gan Cao Xiao Mai Da Zao Tang*, *Kan Mai Ta Tsao Tang*, *Kan Tsao Hsiao Mai Ta Tsao Tang*, *Gan Zao Xiao Mai Da Zao Tang*, Licorice, Wheat, and Date Decoction; Licorice and Jujube Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Gan Cao (Radix et Rhizoma Glycyrrhizae)

9g

Xiao Mai (Fructus Triticici)

1 cup [9-15g]

Da Zao (Fructus Jujubae)

10 pieces [5-7 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction using 6 cups [1,200 mL] of water and reduce the liquid to 3 cups [600 mL]. Take the warm, strained decoction in three equally-divided doses daily. Today, the decoction may be prepared using the doses suggested in brackets.

CLINICAL APPLICATIONS

Hysteria, neurosis, neurasthenia, autonomic dystonia, schizophrenia, menopause, enuresis, insomnia, sleep-walking, night-crying in infants, chorea, gastric cramping, uterine cramping, and coughing due to spasms of the trachea.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the Heart and calms the *shen* (spirit)
2. Harmonizes the middle *jiao* and relieves acute conditions
3. Tonifies Spleen qi

EXPLANATION

Gan Mai Da Zao Tang (Licorice, Wheat, and Jujube Decoction) specifically treats a Chinese medical condition called *zang zao* (restless organ) disorder; this condition is characterized by Heart blood deficiency and Liver qi stagnation. With Heart blood deficiency, the *shen* (spirit) becomes unstable and patients will show such symptoms as absent-mindedness, frequent feelings of extreme sadness with the urge to cry, inability to control one's emotions, and restless sleep. Because of Liver qi stagnation, the emotions of the patients become unstable. In mild cases, they may

CLINICAL MANIFESTATIONS

Zang zao (restless organ) disorder: absent-mindedness, frequent feelings of extreme sadness with the urge to cry, inability to control one's emotions, restless sleep, abnormal speech or behavior, disorientation, frequent yawning, and a red tongue body with scanty coating.

Gān Mài Dà Zǎo Tāng (Licorice, Wheat, and Jujube Decoction)

Gan Mai Da Zao Tang (Licorice, Wheat, and Jujube Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Zang zao</i> (restless organ) disorder	<ul style="list-style-type: none"> Absent-mindedness, emotional instability, and restless sleep: Heart blood deficiency unable to nourish the <i>shen</i> (spirit) Mood swings, irritability, and disorientation: Liver qi stagnation Hysteria, neurosis, and abnormal speech or behavior: severe Liver qi stagnation Frequent yawning and a red tongue body with scanty coating: dryness consuming yin 	<ul style="list-style-type: none"> Nourishes the Heart and calms the <i>shen</i> Harmonizes the middle <i>jiao</i> and relieves acute conditions Tonifies Spleen qi 	<ul style="list-style-type: none"> <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the middle <i>jiao</i> and nourishes the Heart. <i>Xiao Mai</i> (Fructus Triticici) nourishes the Heart and calms the <i>shen</i>. <i>Da Zao</i> (Fructus Jujubae) tonifies Spleen qi, relieves Liver stagnation, and nourishes the Heart.

experience mood swings, irritability, and disorientation. In severe cases, they may exhibit hysteria, neurosis, and abnormal speech or behavior. Clinically, this formula can be used to treat behavioral or emotional disorders characterized by deficiency.

Gan Cao (Radix et Rhizoma Glycyrrhizae) harmonizes the middle *jiao* and nourishes the Heart to relieve the acute condition. *Xiao Mai* (Fructus Triticici) nourishes the Heart and calms the *shen* (spirit). *Da Zao* (Fructus Jujubae) tonifies Spleen qi, relieves Liver qi stagnation, and nourishes the Heart. Combined, these three herbs tonify the Heart, relieve the acute condition, soften the Liver, relieve Liver qi stagnation, tranquilize the Heart, and calm the *shen*.

- With dry stools, add *Hei Zhi Ma* (Semen Sesami Nigrum) and *He Shou Wu* (Radix Polygoni Multiflori).
- For schizophrenia, add *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).

PHARMACOLOGICAL EFFECTS

1. **Central nervous system:** In one study, daily administration of the formula at 2-4 g/kg per day for 7 days was associated with increased sleeping time. The formula was also effective in treating and preventing artificially-induced seizures in mice.¹
2. **Musculoskeletal:** In one experiment, administration of the formula effectively inhibited the contraction of the smooth muscles, such as the intestines and the uterus, in mice.²

MODIFICATIONS

- When irritability and thirst are present, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With irritability, insomnia, a red tongue body with scanty coating, and other yin deficiency signs, add *Di Huang* (Radix Rehmanniae), *Bai Zi Ren* (Semen Platycladi), and *Bai He* (Bulbus Lilii).
- For insomnia, add *Bai He* (Bulbus Lilii), *Di Huang* (Radix Rehmanniae Glutinosae), and *Shou Wu Teng* (Caulis Polygoni Multiflori).
- With palpitations, fear, and fright, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- For infants who cry excessively at night, add *Chan Tui* (Periostracum Cicadae) and *Wu Zhu Yu* (Fructus Evodiae).
- For enuresis, add *Sang Piao Xiao* (Ootheca Mantidis), *Yi Zhi* (Fructus Alpinia Oxyphyllae), and *Tu Si Zi* (Semen Cuscutae Chinensis).
- With dizziness and a fine, wiry pulse due to Liver blood deficiency, add *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Dang Gui* (Radix Angelicae Sinensis).

CLINICAL STUDIES AND RESEARCH

1. ***Zang zao* (restless organ) disorder:** In one study of 38 patients (12 males and 26 females) with *zang zao* (restless organ) disorder, use of modified *Gan Mai Da Zao Tang* was associated with complete recovery in 28 cases, marked improvement in 7 cases, and no effect in 3 cases. The overall effectiveness was 92.1%. Modifications included the addition of *Bai He* (Bulbus Lilii) and *Di Huang* (Radix Rehmanniae) for restlessness, irritability, insomnia, dry mouth, and a red tongue body with little tongue coating; *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Zhi Mu* (Rhizoma Anemarrhenae) for insomnia with excessive dreams, emotional instability, fidgeting, feeling of insecurity, and a wiry, rapid pulse; and *Huo Ma Ren* (Fructus Cannabis) and *Fu Ling* (Poria) for poor appetite and dry stools.³
2. **Menopause:** In one clinical study, 133 patients in menopause were treated with *Gan Mai Da Zao Tang* with good success. The effectiveness rate was 94.4% for tidal fever, 84.1% for perspiration, 92.7% for insomnia, 86.85% for headache, 67.8% for irritability and restlessness, and

Gān Mǎi Dà Zǎo Tāng (Licorice, Wheat, and Jujube Decoction)

70.2% for abdominal fullness.⁴ According to another clinical study, use of the formula in 54 menopause patients was associated with complete relief in 35 cases, improvement in 14 cases, and no effect in 5 cases.⁵ Lastly, 22 of 30 women (73.3%) with menopause experienced significant relief when treated with modified *Gan Mai Da Zao Tang*. Modifications included addition of *Suan Zao Ren* (Semen Ziziphi Spinosae) or *Fu Shen* (Poria Paradicis) for insomnia with restlessness and irritability, and larger dose and longer duration of treatment for severe conditions.⁶

3. **Insomnia:** In a clinical study, 110 patients with insomnia were treated with *Gan Mai Da Zao Tang* with the addition of *Bai He* (Bulbus Lilii), *Di Huang* (Radix Rehmanniae Glutinosae) and *Shou Wu Teng* (Caulis Polygoni Multiflori) with good success. The overall effectiveness reported was 74.2%.⁷
4. **Neurasthenia:** In one study, 92 out of 100 patients with neurasthenia, headache and insomnia were treated with complete recovery (28 cases) or marked improvement (64 cases) using *Gan Mai Da Zao Tang* with addition of *Bai He* (Bulbus Lilii) and *Zhi Mu* (Rhizoma Anemarrhenae).⁸
5. **Hysteria:** One study reported marked success using herbs and acupuncture to treat hysteria. The herbal formula was given in decoction, and contained *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 20g, *Da Zao* (Fructus Jujubae) 30 pieces, *Xiao Mai* (Fructus Triticici) 60g and *Wu Wei Zi* (Fructus Schisandrae Chinensis) 12g. Acupuncture points selected included *Hegu* (LI 4), *Renzhong* (GV 26), *Neiguan* (PC 6), and others to regulate qi and emotions. Of 60 patients, the study reported stabilization and resolution of all clinical signs and symptoms, with no recurrence in follow-up visits 6 months after the conclusion of treatments.⁹ According to another study, 27 patients with hysteria were treated with heavy doses of *Gan Mai Da Zao Tang* with recovery in 24 cases, marked improvement in 2 cases, slight improvement in 1 case, and no effect in 2 cases. The doses of the herbs used were *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 24-45g, *Fu Xiao Mai* (Fructus Triticici Levis) 60g, and *Da Zao* (Fructus Zizyphi Jujubae) 10 pieces.¹⁰ Lastly, 25 patients with hysteria were treated with *Gan Mai Da Zao Tang* plus electro-acupuncture (5 cases) with complete recovery in 22 cases, marked improvement in 2 cases, and slight improvement in 1 case.¹¹
6. **Schizophrenia:** One report described *Gan Mai Da Zao Tang* with addition of *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) to be effective in treating 79 cases of schizophrenia. The duration of treatment was between 7-70 days. During the treatment period, 62 out of 79 patients were treated concurrently with a low dose of chlorpromazine (< 200mg per day). Out of 79 cases, the study reported recovery in 5 cases, marked effectiveness in 23 cases, moderate effects in 34 cases, and no effect in

17 cases.¹² According to another study, 146 schizophrenic patients were treated for 7-98 days with recovery in 11 cases, significant improvement in 44 cases, improvement in 64 cases, and no effect in 27 cases. The herbal treatment included *Gan Mai Da Zao Tang* plus wild-crafted *Bai He* (Bulbus Lilii) and *Di Huang* (Radix Rehmanniae). In addition, a small amount of chlorpromazine was given in 17 patients.¹³

7. **Enuresis:** A study of 28 children with bed-wetting characterized by deficiency and cold of the lower *jiao* treated with *Gan Mai Da Zao Tang* with addition of *Sang Piao Xiao* (Ootheca Mantidis), roasted *Yi Zhi* (Fructus Alpinia Oxyphyllae) and *Tu Si Zi* (Semen Cuscutae Chinensis) showed good results. After 10 days of herbal therapy, enuresis stopped in 13 cases. After 20 days of herbal therapy, enuresis stopped in all patients. In follow-up interviews 8-12 months later, only 2 out of 28 children had had any recurrence.¹⁴
8. **Chorea:** Fourteen children with chorea were treated with good success using *Gan Mai Da Zao Tang* plus *Gui Zhi Jia Long Gu Mu Li Tang* (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell) with modifications. The herbal formula contained the following ingredients: *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 15g, *Fu Xiao Mai* (Fructus Triticici Levis) 30g, *Da Zao* (Fructus Jujubae) 10 pieces, *Gui Zhi* (Ramulus Cinnamomi) 12g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 6g, *Long Gu* (Os Draconis) 30g, *Mu Li* (Concha Ostreae) 30g, *Yu Jin* (Radix Curcumae) 15g, *Gou Teng* (Ramulus Uncariae cum Uncis) 15g, *Qin Jiao* (Radix Gentianae Macrophyllae) 12g, and *Tian Ma* (Rhizoma Gastrodiae) 9g. The study reported recovery in 11 of 14 cases. The remaining three patients were also treated with drugs prior to recovery.¹⁵

An Shen Tang (Tranquilize the Spirit Decoction) is used primarily to treat emotional disorders characterized by *shen* (spirit) disturbance. It contains herbs that nourish the Heart, tranquilize the *shen*, regulate Liver qi circulation, sedate Liver fire, and tonify underlying deficiencies. Clinical applications of this formula include stress, irritability, anxiety, emotional instability, and insomnia.

AUTHORS' COMMENTS

Xiao Mai (Fructus Tritici) and *Fu Xiao Mai* (Fructus Tritici Levis) are derived from the same plant, and have similar characteristics and functions. When *Fu Xiao Mai* (Fructus Tritici Levis) and *Xiao Mai* (Fructus Tritici) are both placed in water, *Xiao Mai* (Fructus Tritici) sinks and *Fu Xiao Mai* (Fructus Tritici Levis) floats. *Fu Xiao Mai* (Fructus Tritici Levis) has astringent functions to stop sweating, while *Xiao Mai* (Fructus Tritici) can nourish the Heart and calm *shen*. The source text uses *Xiao Mai* (Fructus Tritici) to nourish the Heart to alleviate *shen* disturbance. Some contemporary texts recommend the use of *Fu Xiao Mai* (Fructus Tritici Levis) to treat yin-deficient heat and relieve spontaneous sweating and night sweats.

Gan Mai Da Zao Tang has also been used during pregnancy and after delivery to treat emotional instability and depression characterized by *zang zao* (restless organ) disorder.

<i>Rou Gui</i> (Cortex Cinnamomi)	0.3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a coarse powder. Cook 9g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 2 pieces of *Da Zao* (Fructus Jujubae) in water, and take the warm, strained decoction before meals.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the Heart
2. Tonifies the blood

CLINICAL MANIFESTATIONS

Heart blood deficiency: palpitations, night sweats, insomnia, tendency towards being easily frightened, forgetfulness, restlessness, and mild fever.

CLINICAL APPLICATIONS

Anemia, neurasthenia, palpitations, absent-mindedness, and poor concentration.

EXPLANATION

Yang Xin Tang (Nourish the Heart Decoction) treats blood deficiency and the subsequent inability to nourish the Heart. Because it is malnourished, the Heart cannot carry out its normal functions. Thus, symptoms and signs of Heart blood deficiency such as palpitations, forgetfulness, insomnia, and night sweats may occur. Furthermore, Heart blood deficiency may contribute to *shen* (spirit)

disturbance, manifesting in symptoms such as being easily scared or frightened and restlessness.

This formula contains many tonic herbs and has a focus mainly on nourishing the Heart and replenishing the blood. Since production of blood requires an adequate amount of qi, this formula uses herbs to tonify qi and nourish blood concurrently. *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Bai Fu Ling* (Poria Alba), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi. *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) replenish and move the blood. *Fu Shen* (Poria Paradicis), *Yuan Zhi* (Radix Polygalae), *Bai Zi Ren* (Semen Platycladi), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Suan Zao Ren* (Semen Ziziphi Spinosae) calm the *shen* (spirit). *Ban Xia Qu* (Rhizoma Pinelliae Massa Fermentata) dries dampness and eliminates phlegm, which may form from the use of tonic herbs. *Rou Gui* (Cortex Cinnamomi) acts as a guiding herb to direct the therapeutic effects of the herbs to the Heart channel. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the herbs in the formula.

MODIFICATIONS

- With fever and thirst, add *Mai Dong* (Radix Ophiopogonis) and *Zhu Ru* (Caulis Bambusae in Taenia).

Yǎng Xīn Tāng (Nourish the Heart Decoction)

Yang Xin Tang (Nourish the Heart Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heart blood deficiency	<ul style="list-style-type: none">• Palpitations, forgetfulness, insomnia and night sweats: Heart blood deficiency• Fear, fright and restlessness: <i>shen</i> (spirit) disturbance	<ul style="list-style-type: none">• Nourishes the Heart• Tonifies the blood	<ul style="list-style-type: none">• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Huang Qi</i> (Radix Astragali), <i>Bai Fu Ling</i> (Poria Alba) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) replenish and move blood.• <i>Fu Shen</i> (Poria Paradicis), <i>Yuan Zhi</i> (Radix Polygalae), <i>Bai Zi Ren</i> (Semen Platycladi), <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) and <i>Suan Zao Ren</i> (Semen Ziziphi Spinosae) calm the <i>shen</i> (spirit).• <i>Ban Xia Qu</i> (Rhizoma Pinelliae Massa Fermentata) dries dampness and eliminates phlegm.• <i>Rou Gui</i> (Cortex Cinnamomi) guides the herbs to the Heart channel.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize all of the herbs.

- With irritability, fever, and insomnia, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis).
- If the patient is forgetful and easily frightened, add *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Bai Shao* (Radix Paeoniae Alba).
- With palpitations, add *Bing Lang* (Semen Arecae) and *Chi Fu Ling* (Poria Rubra).

AUTHORS’ COMMENTS

Yang Xin Tang, literally “Nourish the Heart Decoction,” is a common generic name for a variety of formulas. There are at least 13 formulas with the exact same name documented in the history of Chinese herbal medicine, all with slightly different ingredients, doses, and indications.

Chapter 9 — Summary

— Shen-Calming Formulas

SECTION 1: SEDATIVE FORMULAS THAT CALM THE *SHEN* (SPIRIT)

Name	Similarities	Differences
Zhu Sha An Shen Wan (Cinnabar Pill to Tranquilize the Spirit)		Clears the Heart and purges fire
Zhen Zhu Mu Wan (Mother of Pearl Pill)	Tranquilize the mind and calm the <i>shen</i> (spirit)	Calms the Heart and Liver yang
Ci Zhu Wan (Magnetite and Cinnabar Pill)		Harmonizes the Heart and Kidney, redirects ascending yang
Chai Hu Jia Long Gu Mu Li Tang (Bupleurum plus Dragon Bone and Oyster Shell Decoction)		Harmonizes the <i>shaoyang</i> and anchors the <i>shen</i>

Zhu Sha An Shen Wan (Cinnabar Pill to Tranquilize the Spirit), **Zhen Zhu Mu Wan** (Mother of Pearl Pill), **Ci Zhu Wan** (Magnetite and Cinnabar Pill), and **Chai Hu Jia Long Gu Mu Li Tang** (Bupleurum plus Dragon Bone and Oyster Shell Decoction) all tranquilize the mind and calm the *shen* (spirit). The common symptoms are irritability, insomnia, and palpitations.

- **Zhu Sha An Shen Wan** calms the Heart and purges fire. Excess Heart fire consumes yin and blood and creates symptoms of irritability, insomnia, frequent dreams, anxiety, and palpitations.
- **Zhen Zhu Mu Wan** controls hyperactivity of Liver and Heart yang in patients with yin and blood deficiencies. The key clinical manifestations include dizziness, vertigo, and a fine, wiry pulse.
- **Ci Zhu Wan** treats Heart and Kidney disharmony. By assisting the Kidney to restrain the hyperactivity of Heart yang, the herbs in the formula treat eye and ear disorders.
- **Chai Hu Jia Long Gu Mu Li Tang** harmonizes the *shaoyang*, calms and tranquilizes the body with heavy substances, dredges the yang, and purges heat. It is used for *shaoyang* stage in which the emotions are unstable.

SECTION 2: NOURISHING FORMULAS THAT CALM THE *SHEN* (SPIRIT)

Name	Similarities	Differences
Suan Zao Ren Tang (Sour Jujube Decoction)		Tonifies Liver blood and restrains Liver yang
Tian Wang Bu Xin Dan (Emperor of Heaven's Special Pill to Tonify the Heart)	Nourish the blood and yin, tonify the Heart, calm the <i>shen</i> (spirit)	Nourishes Heart and Kidney yin, calms the <i>shen</i>
Gan Mai Da Zao Tang (Licorice, Wheat, and Jujube Decoction)		Treats <i>zang zao</i> (restless organ) disorder, calms the <i>shen</i>
Yang Xin Tang (Nourish the Heart Decoction)		Tonifies Heart blood

Suan Zao Ren Tang (Sour Jujube Decoction), **Tian Wang Bu Xin Dan** (Emperor of Heaven's Special Pill to Tonify the Heart), **Gan Mai Da Zao Tang** (Licorice, Wheat, and Jujube Decoction), and **Yang Xin Tang** (Nourish the Heart Decoction) all have common functions of nourishing blood and yin, tonifying the Heart, and calming the *shen* (spirit).

- **Suan Zao Ren Tang** tonifies Liver blood to restrain hyperactive Liver yang, which can produce deficiency heat that disturbs the Heart and creates symptoms of irritability, insomnia, palpitations, night sweats, dizziness, and a dry mouth and throat. The pulse is usually fine, wiry.

Chapter 9 — Summary

- *Tian Wang Bu Xin Dan* tonifies blood, nourishes yin and calms the *shen*. The two deficient organs addressed by this formula are the Heart and Kidney. Key clinical manifestations include irritability, forgetfulness, and nocturnal emissions.
- *Gan Mai Da Zao Tang* is used for *zang zao* (restless organ) disorder and *shen* disturbance caused by Liver qi stagnation and Heart blood deficiency. Usually, this formula is used to harmonize and relieve acute conditions of emotional instability.
- *Yang Xin Tang* nourishes Heart blood deficiency to treat palpitations, night sweats, insomnia, fearfulness, forgetfulness, and restlessness.

Chapter 10

— Orifice-Opening Formulas

华佗 Huǎ Tuō

华佗 Huǎ Tuō, 110 – 207 CE.

华佗 Huā Tuō

Hua Tuo was born into a poor family. When Hua Tuo was seven years old, his father passed away, taking with him the only source of family income. Faced with financial hardship and poverty, Hua Tuo began to work in a local herbal pharmacy. While working there, Hua Tuo carefully observed the practice of medicine and pharmacy, and thus began the career of one of the best physicians in our profession.

Hua Tuo lived and practiced medicine during the end of the Eastern Han and beginning of the Three Kingdoms, a period of time characterized by political instability, with constant battles and turmoil. He sympathized with the common people whose lives were suppressed by the government, and dedicated his entire life to helping them. Therefore, Hua Tuo was also known as “the physician of the people.” He preferred to treat the common folks of the world, and repeatedly refused to accept offers of the position of 太医 the Supreme Physician in the Imperial Palace.

Hua Tuo is respected for being the first surgeon and the inventor of anesthesia in Traditional Chinese Medicine. He believed that for diseases that could not be treated with acupuncture and herbs, the only solution was surgery to remove the cause. It is well-documented that Hua Tuo frequently performed surgery on various parts of the body by using an herbal formula called 麻沸散 *Ma Fei San* (Numbing and Boiling Powder) for systemic anesthesia.¹

Despite his outstanding achievements, there were always more patients than Hua Tuo could possibly care for in his practice. Thus, he began to wonder why people were always sick, and what would make them healthier. He concluded that chronic illnesses were due, in part, to lack of physical activity, and proposed regular exercise as a remedy. As part of Hua Tuo’s strong emphasis on the importance of physical activity, he developed 五禽戏 *Wu Qin Xi* (Five Animal Frolics), an exercise that imitates the physical movement of tigers, deers, monkeys, bears and birds.

In his later years, Hua Tuo was called by the emperor of the Wei Kingdom, 曹操 *Cāo Cáo*,² to treat his “head wind” [presumably migraine headache] that had not responded to any of the treatments by many other physicians. By the insertion of just one needle, the chronic headache was alleviated. Cao was so impressed that he insisted on having Hua Tuo as his personal physician. Hua Tuo tactfully refused, claiming that he needed to return home to attend to his sick wife. Shortly after returning home, he was called again, and subsequently forced by Cao to return to the Imperial Palace. Cao had another severe headache and wanted Hua Tuo to cure him, and would not let him leave the Imperial Palace. Hua Tuo stated that the headache was so severe that it could not be treated simply with herbs or acupuncture. The only cure would be to induce anesthesia, and surgically open the head to remove the cause of the headache. Cao thought Hua Tuo was making an attempt to assassinate him, and sentenced Hua Tuo to death. While in prison, Hua Tuo compiled all of his clinical experience in writing, and tried to give it to a prison guard for safe keeping. However, out of fear of Cao, the guard refused to do any favors or accept anything from Hua Tuo.

In extreme anger and frustration, Hua Tuo burned his manuscripts, turning all his clinical knowledge to ashes. After Hua Tuo died, he was buried next to a flowing river of clear water – symbolizing that he was cleared from all wrong-doing.

1. The exact composition of *Ma Fei San* (Numbing and Boiling Powder), similar to all of Hua Tuo’s clinical knowledge, was lost when his manuscripts were burned to ashes. Many physicians have attempted to re-create the same formulation based on historical records, but none achieved the same clinical efficacy as Hua Tuo’s. This formula is believed to have contained *Yang Jin Hua* (Flos *Daturae*), *Cao Wu* (Radix *Aconiti Kusnezoffii*), *Bai Zhi* (Radix *Angelicae Dahuricae*), *Dang Gui* (Radix *Angelicae Sinensis*), and *Chuan Xiong* (Rhizoma *Chuanxiong*), among others.
2. 曹操 *Cāo Cáo* was the emperor of the Wei Kingdom during the period of the Three Kingdoms. Because these three kingdoms were at war constantly for approximately 60 years, Cao had many enemies and was always facing the threat of assassination. So when Hua Tuo offered to cure Cao’s headache by “cutting his head open” to perform brain surgery, Cao naturally assumed he was using medicine as an excuse to kill him, and subsequently sentenced Hua Tuo to death. This story, however, is considered to be folklore, as there is no confirmed historical record of exact motive and circumstances associated with Hua Tuo’s death.

Chapter 10 — Overview

— Orifice-Opening Formulas

Definition: Orifice-opening formulas are composed of aromatic herbs that open the sensory orifices, awaken the *shen* (spirit), and restore consciousness. Though “open the orifices” is not a specific treatment method listed in the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor’s Inner Classic), cold orifice-opening formulas employ the *wen fa* (warming) method and warm orifice-opening formulas utilize the *qing fa* (clearing) method to treat corresponding disorders.

Unconsciousness with closed sensory orifices (described below) is a condition that is divided, for purposes of assessment and treatment, into two main diagnostic categories: excess and deficiency. It is very important to distinguish between excess and deficiency when treating unconsciousness with closed sensory orifices. Excess disorders, such as *bi zheng* (closed disorder), may be treated with orifice-opening formulas to open the sensory orifices, awaken the *shen* (spirit), and restore consciousness. Deficiency disorders, such as *tuo zheng* (abandoned syndrome), must be treated with herbs that tonify qi and restore yang.

- *Bi zheng* (closed disorder) is an excess disorder characterized by the following manifestations: unconsciousness, trismus, convulsions of the muscles, clenched fists, stiff limbs, and a forceful pulse. The nature of *bi zheng* (closed disorder) can be either hot or cold. Hot *bi zheng* (closed disorder) is due to heat toxins attacking the Pericardium, and is treated with cold orifice-opening formulas. Cold *bi zheng* (closed disorder) is due to cold-phlegm or qi stagnation causing turbidity to mist around the Heart. In this case, warm orifice-opening formulas are administered.
- *Tuo zheng* (abandoned syndrome) is a deficiency disorder, with manifestations such as cold limbs, perspiration, extreme fatigue, open mouth, closed eyes, and enuresis. *Tuo zheng* (abandoned syndrome) should **not** be treated with herbs that open the orifices, as this will further accentuate the weakness and deficiency the individual is already experiencing. This deficient condition **must** be treated with herbs that tonify qi and restore yang.

Orifice-opening formulas treat *bi zheng* (closed disorder), but are contraindicated for *bi zheng* (painful obstruction syndrome) and *tuo zheng* (abandoned syndrome).

Disorder	Primary Diagnosis	Secondary Diagnosis	Signs and Symptoms
Unconsciousness with closed sensory orifices	• <i>Bi zheng</i> (closed disorder)	• Hot <i>bi zheng</i> (closed disorder)	• High fever, unconsciousness, delirium, convulsions, and a forceful pulse
		• Cold <i>bi zheng</i> (closed disorder)	• Sudden unconsciousness, clenched jaw, pale face, cold extremities, white tongue coating, and a slow pulse
	• <i>Tuo zheng</i> (abandoned syndrome)		• Cold limbs, perspiration, extreme fatigue, open mouth, closed eyes, and enuresis

Note: The pinyin names are exactly the same for 闭证 *bi zheng* (closed disorder) and 痹证 *bi zheng* (painful obstruction syndrome), although the Chinese characters are different. These two disorders have very different symptomology, diagnoses, and treatments, and must be correctly identified to

Chapter 10 — Overview

insure safe and effective treatment. To avoid confusion, the term *bi zheng* (closed disorder) will be displayed with its English translation throughout the entire text.

SUBCATEGORIES OF ACTION

Orifice-opening formulas are divided into two subcategories to reflect the differential diagnosis and treatment of hot and cold types of *bi zheng* (closed disorder).

1. Cold Orifice-Opening Formulas

These formulas treat hot *bi zheng* (closed disorder) caused by pathogenic heat toxins attacking the Pericardium and blocking the sensory orifices. The manifestations include high fever, unconsciousness, delirium, and convulsions. These formulas can also treat sudden unconsciousness due to *zhong feng* (wind stroke), or phlegm accumulation with heat signs and symptoms. In allopathic medical terminology, hot *bi zheng* (closed disorder) is often related to infectious diseases, meningitis, severe pneumonia, septicemia, heat stroke, liver diseases, or toxic uremia.

Herbs commonly used to open the sensory orifices include *Bing Pian* (Borneolum Syntheticum), *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Yu Jin* (Radix Curcumae). To enhance the opening of the sensory orifices, herbs are added to clear heat, purge fire, cool the blood, and eliminate toxins, such as *Niu Huang* (Calculus Bovis), *Huang Lian* (Rhizoma Coptidis), and *Shi Gao* (Gypsum Fibrosum). Representative formulas include *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone), *Zi Xue* (Purple Snow), and *Zhi Bao Dan* (Greatest Treasure Special Pill).

2. Warm Orifice-Opening Formulas

These formulas are used to treat cold *bi zheng* (closed disorder) in which unconsciousness is due to *zhong feng* (wind stroke), cold stroke, and phlegm accumulation. The main clinical manifestations include sudden unconsciousness, clenched jaws, pale face, cold extremities, white tongue coating, and a slow pulse. In allopathic terminology, cold *bi zheng* (closed disorder) is usually caused by cerebrovascular accidents and poisoning.

Commonly used herbs include *Su He Xiang* (Styrax) and *Bing Pian* (Borneolum Syntheticum). They are usually combined with acrid, warm, qi-regulating herbs to enhance their effects, such as *Xiang Fu* (Rhizoma Cyperi), *Ding Xiang* (Flos Caryophylli), and *Bi Bo* (Fructus Piperis Longi). Exemplar formulas include *Su He Xiang Wan* (Liquid Styrax Pill) and *Zi Jin Ding* (Purple Gold Special Pill).

CAUTIONS / CONTRAINDICATIONS

- *Tuo zheng* (abandoned syndrome), the deficiency disorder manifesting in cold limbs, unclenched fists, perspiration, extreme fatigue, open mouth, closed eyes, and enuresis, should be treated with herbs that tonify qi and restore yang. This condition must **not** be treated with orifice-opening formulas, which will only accentuate the underlying weakness and deficiency.
- Orifice-opening formulas are composed of acrid and aromatic herbs; therefore, prolonged use of these formulas will damage the *yuan* (source) *qi*. These formulas are

generally reserved for emergency use only and should be discontinued once the desired effects are achieved.

- These formulas are contraindicated during pregnancy.
- *Yangming fu* (hollow organ) excess syndrome with altered consciousness and delirious speech should be treated with cold formulas that drain downward, rather than with orifice-opening formulas.
- *Yangming fu* (hollow organ) excess syndrome with pathogenic heat attacking the Pericardium should be treated with orifice-opening formulas first, followed by cold formulas that drain downward, or both methods of treatment together, depending on the urgency of the condition.

Orifice-opening formulas are generally for emergency use, and should be discontinued once the desired effects are achieved.

Prolonged use of orifice-opening formulas will damage the *yuan* (source) *qi*.

Chapter 10 — Overview

PROCESSING

Orifice-opening formulas are usually prepared in pill form, powders, or injectables for two reasons. First, these herbs are aromatic in nature, and their effectiveness is destroyed when processed with heat (such as in decoction). Second, they must be available immediately during an emergency. Having these formulas in pills, powders, or injections ensures immediate access to them. Decoction is inappropriate because it requires too much time to prepare. Moreover, decoctions cannot be prepared in advance because of their short shelf life and the difficulty of storing them for any useful period of time.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Orifice-opening herbs and formulas are generally reserved for acute, emergent cases of sudden unconsciousness, which may have a wide variety of causes. The pharmacological effects observed vary: some have a stimulant effect on the central nervous system, such as *Zhang Nao* (Camphora), which awakens patients from unconsciousness;¹ others have a sedative effect on the central nervous system, such as *Shi Chang Pu* (Rhizoma Acori Tatarinowii), which suppresses seizures and epileptic activities.² Other pharmacological effects include antipyretic effects to reduce body temperature,³ and hypotensive effects to lower blood pressure.⁴ Clinical applications of orifice-opening formulas include unconsciousness from encephalitis B, meningitis, toxic uremia, hepatitis, acute icteric hepatitis, acute pancreatitis, cerebrovascular accident, seizures, and convulsions.⁵

However, because of the acute and urgent nature of these illnesses, there are very few controlled clinical research studies available for discussion. Exemplar formulas that open the sensory orifices include *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone) and *Su He Xiang Wan* (Liquid Styrax Pill).

To be immediately available in emergency, orifice-opening formulas are prepared in pills, powder, or for injection.

凉开剂

— Cold Orifice-Opening Formulas

Ān Gōng Niú Huáng Wán (Calm the Palace Pill with Cattle Gallstone)

安宮牛黃丸

安宮牛黃丸

Pinyin Name: *An Gong Niu Huang Wan***Literal Name:** Calm the Palace Pill with Cattle Gallstone**Alternate Name:** *Niu Huang Wan* (Cattle Gallstone Pill)**Original Source:** *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798**COMPOSITION**

<i>Niu Huang</i> (Calculus Bovis)	30g
<i>She Xiang</i> (Moschus)	7.5g
<i>Xi Jiao</i> (Cornu Rhinoceri)	30g
<i>Huang Qin</i> (Radix Scutellariae)	30g
<i>Huang Lian</i> (Rhizoma Coptidis)	30g
<i>Zhi Zi</i> (Fructus Gardeniae)	30g
<i>Bing Pian</i> (Borneolum Syntheticum)	7.5g
<i>Yu Jin</i> (Radix Curcumae)	30g
<i>Zhu Sha</i> (Cinnabaris)	30g
<i>Zhen Zhu</i> (Margarita)	15g
<i>Xiong Huang</i> (Realgar)	30g
<i>Jin Bo</i> (gold foil)	

Note: *Zhu Sha* (Cinnabaris) and *Xiong Huang* (Realgar) are potentially toxic heavy metals, and *Xi Jiao* (Cornu Rhinoceri) and *She Xiang* (Moschus) are derived from endangered animals. They are rarely used as medicinal substances today. The discussion of these substances here is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Zhu Sha* (Cinnabaris) and *Xiong Huang* (Realgar), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a very fine powder and form into pills with honey. The pills

should be 3g in weight, and are traditionally coated with *Jin Bo* (gold foil) and sealed with wax. For robust patients in severe condition, take 1 pill two to three times daily. For children, take one-half pill one time daily. If there is no response, a second dose may be given.

Today, this formula is prepared in four steps. First, process *Zhu Sha* (Cinnabaris), *Zhen Zhu* (Margarita), and *Xiong Huang* (Realgar) separately with the *shui fei* (refining with water) technique to obtain extremely fine powder. Second, grind *Niu Huang* (Calculus Bovis), *Xi Jiao* (Cornu Rhinoceri), *She Xiang* (Moschus), and *Bing Pian* (Borneolum Syntheticum) into a fine powder. Third, grind the remaining ingredients into powder. Finally, blend all of the herb powders together and mix with *Feng Mi* (Mel) and water to form large pills. Dry the pills in a cool place without direct exposure to sunlight. Take one pill daily.

Ān Gōng Niú Huáng Wán (Calm the Palace Pill with Cattle Gallstone)

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and opens the orifices
2. Dispels phlegm and eliminates toxins

CLINICAL MANIFESTATIONS

Febrile disorders with heat attacking the Pericardium and hot phlegm obstructing the orifices: high fever, fidgeting, irritability, delirium, coma, unconsciousness due to stroke, and infantile convulsions.

CLINICAL APPLICATIONS

Fever, encephalitis B, meningitis, dysentery, toxic uremia, hepatitis, acute icteric hepatitis, acute pancreatitis, cerebrovascular accident, seizures, and convulsions.

EXPLANATION

An Gong Niu Huang Wan (Calm the Palace Pill with Cattle Gallstone) is a representative formula for treating febrile disorders with heat attacking the Pericardium and hot phlegm obstructing the sensory orifices. The Heart, covered by the Pericardium, is the organ that houses the mind and controls the *shen* (spirit). If heat attacks the Pericardium, the patient may show *shen* disturbance, high fever, fidgeting, and irritability. If hot phlegm obstructs the sensory orifices and seizes the *shen*, the patient may lose consciousness, as in delirium and coma. Clinically, this formula is used to treat hot *bi zheng* (closed disorder) syndrome, as seen in stroke, coma, seizures, and epilepsy.

An Gong Niu Huang Wan uses *Niu Huang* (Calculus Bovis) to clear Heart heat, eliminate toxins, dispel phlegm, and open the orifices. *She Xiang* (Moschus) has a resuscitating function to open the sensory orifices and awaken the *shen* (spirit). Though *She Xiang* (Moschus) is a warm substance, it will not generate heat as the formula contains many cold herbs at large doses. *Xi Jiao* (Cornu Rhinoceri) clears heat, cools the blood, and eliminates toxins. *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Zhi Zi* (Fructus Gardeniae) clear heat, purge fire, and eliminate toxins. *Bing Pian* (Borneolum Syntheticum) and *Yu Jin* (Radix Curcumae) enhance the resuscitating function of *She Xiang* (Moschus) to open orifices and awaken the *shen*. *Zhu Sha* (Cinnabaris) and *Zhen Zhu* (Margarita) calm the *shen* and relieve fidgeting and irritability. *Xiong Huang* (Realgar) helps *Niu Huang* (Calculus Bovis) dispel phlegm and eliminate toxins. *Jin Bo* (gold foil) helps *Zhu Sha* (Cinnabaris) calm the *shen*. *Feng Mi* (Mel), as the envoy herb, regulates the middle *jiao* and strengthens the Stomach.

This formula can also be used to treat unconsciousness due to coma and infantile convulsions if the patient has the above clinical manifestations.

MODIFICATIONS

With heat entering the Pericardium and excess heat in the *fu* (hollow organs) manifesting in delirium, constipation,

An Gong Niu Huang Wan (Calm the Palace Pill with Cattle Gallstone)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Febrile disorder with heat attacking the Pericardium and hot phlegm obstructing the orifices	<ul style="list-style-type: none"> • <i>Shen</i> (spirit) disturbance, high fever, fidgeting, and irritability: heat attacking the Pericardium • Delirium, coma and unconsciousness: hot phlegm obstructing the sensory orifices 	<ul style="list-style-type: none"> • Clears heat and opens orifices • Dispels phlegm and eliminates toxins 	<ul style="list-style-type: none"> • <i>Niu Huang</i> (Calculus Bovis) clears Heart heat, eliminates toxins, dispels phlegm, and opens orifices. • <i>She Xiang</i> (Moschus) opens sensory orifices and awakens the <i>shen</i>. • <i>Xi Jiao</i> (Cornu Rhinoceri) clears heat, cools the blood, and eliminates toxins. • <i>Huang Qin</i> (Radix Scutellariae), <i>Huang Lian</i> (Rhizoma Coptidis) and <i>Zhi Zi</i> (Fructus Gardeniae) clear heat, purge fire, and eliminate toxins. • <i>Bing Pian</i> (Borneolum Syntheticum) and <i>Yu Jin</i> (Radix Curcumae) open orifices and awaken the <i>shen</i>. • <i>Zhu Sha</i> (Cinnabaris), <i>Zhen Zhu</i> (Margarita), and <i>Jin Bo</i> (gold foil) calm the <i>shen</i> and relieve fidgeting and irritability. • <i>Xiong Huang</i> (Realgar) dispels phlegm and eliminates toxins. • <i>Feng Mi</i> (Mel) regulates the middle <i>jiao</i> and strengthens the Stomach.

Ān Gōng Niú Huáng Wán (Calm the Palace Pill with Cattle Gallstone)

and thirst that cannot be relieved by the intake of water, administer 2 pills of *An Gong Niu Huang Wan* plus 9g of powdered *Da Huang* (*Radix et Rhizoma Rhei*) in warm water.

CAUTIONS / CONTRAINDICATIONS

- *An Gong Niu Huang Wan* is contraindicated in cases of *zhong feng* (wind stroke) characterized by *tuo zheng* (abandoned syndrome).¹
- Use of this formula is contraindicated during pregnancy.²

PHARMACOLOGICAL EFFECTS

1. **Central nervous system:** Laboratory experiments showed that administration of *An Gong Niu Huang Wan* had a sedative effect on the central nervous system by decreasing spontaneous physical activities and suppressing seizures.³
2. **Antipyretic:** Administration of the formula was effective in treating rabbits with artificially-induced fever. The antipyretic effect was observed one hour following ingestion, and lasted for 5-6 hours.⁴
3. **Anti-inflammatory:** In one study, the use of the formula was associated with marked effect to reduce swelling and inflammation. The effect was observed from 1 to 4.5 hours after administration.⁵
4. **Hypotensive:** In one experiment, intravenous injection of the formula was associated with an immediate drop of blood pressure of approximately 10-40 mmHg. The effect to lower blood pressure lasted for 3-5 minutes, with blood pressure returning to the previous level after 10 minutes.⁶

CLINICAL STUDIES AND RESEARCH

1. **Fever:** One report described 8 cancer patients with high fevers of 39.1-41.5°C (102.4-106.7°F) for an average of 5.6 days. They were treated with *An Gong Niu Huang Wan*, and all patients stopped using analgesic and anti-inflammatory drugs during the herbal therapy. The treatment protocol was to administer one pill of the formula twice daily for 3-5 days. The study reported that the temperature was reduced to below 38°C (100.4°F) within 4-72 hours (average of 27.2 hours). The study concluded the formula to be effective in treating fever in cancer patients.⁷
2. **Others:** *An Gong Niu Huang Wan* has been used to treat encephalitis B, meningitis, dysentery, toxic uremia, hepatitis, acute icteric hepatitis, acute pancreatitis, cerebrovascular accident, seizures, and convulsions.⁸

TOXICOLOGY

Use of *An Gong Niu Huang Wan* has been associated with side effects such as palpitations, dull pain in the

upper abdominal area, fear, fright, restlessness, irritability, facial edema, rashes, and dark purple appearance that starts at the lips and then spreads to the rest of the body. Long-term use or gross overdose (over 60 pills per dose) has been associated with nephritis, with symptoms such as low back pain, decreased urination, red-colored urine, and the presence of protein and white blood cells in the urine.⁹ Note: These reactions are usually attributed to *Zhu Sha* (*Cinnabaris*) and *Xiong Huang* (*Realgar*), two substances that are considered toxic.

RELATED FORMULA

Niú Huáng Qīng Xīn Wán

(Cattle Gallstone Pill to Clear the Heart)

牛黃清心丸

牛黃清心丸

Pinyin Name: *Niu Huang Qing Xin Wan*

Literal Name: Cattle Gallstone Pill to Clear the Heart

Original Source: *Dou Zhen Shi Yi Xin Fa* (Teachings of Generations of Physicians about Pox) by Wan Quan in 1568

<i>Niu Huang</i> (<i>Calculus Bovis</i>)	0.75g
<i>Zhu Sha</i> (<i>Cinnabaris</i>)	4.5g
<i>Huang Lian</i> (<i>Rhizoma Coptidis</i>)	15g
<i>Huang Qin</i> (<i>Radix Scutellariae</i>)	9g
<i>Zhi Zi</i> (<i>Fructus Gardeniae</i>)	9g
<i>Yu Jin</i> (<i>Radix Curcumae</i>)	6g

Note: *Zhu Sha* (*Cinnabaris*) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

Grind the ingredients into a fine powder, and form into pills with flour and water. The pills should resemble corn kernels in size. Take 7-8 pills with a decoction of *Deng Xin Cao* (*Medulla Junci*). Today, this formula is normally prepared by mixing the powdered herbs with honey to form pills. The pills should weigh 1.5g each. Take 2 pills per dose two to three times daily. Adjust the doses for children according to age and body weight.

Niu Huang Qing Xin Wan (Cattle Gallstone Pill to Clear the Heart) clears heat, eliminates toxins, opens the sensory orifices, and calms the *shen* (spirit). Clinically, this formula may be used for heat invading the Pericardium, leading

Ān Gōng Niú Huáng Wán (Calm the Palace Pill with Cattle Gallstone)

to such symptoms as delirium, semi-unconsciousness, feverish sensations, fidgeting, and irritability. This formula may also be used for infantile convulsions in which there is constant muscle contraction, and for *zhong feng* (wind stroke) with closed sensory orifices.

An Gong Niu Huang Wan and *Niu Huang Qing Xin Wan* (Cattle Gallstone Pill to Clear the Heart) have similar compositions, actions, and indications.

- *An Gong Niu Huang Wan* has a stronger action to tranquilize the *shen* (spirit) and open the sensory orifices; hence, it is more suitable for such symptoms as high fever, semiconsciousness, and delirium.
- *Niu Huang Qing Xin Wan* functions more strongly to clear heat and eliminate toxins, and is more suitable for symptoms such as feverish sensations, fidgeting, and irritability.

AUTHORS' COMMENTS

An Gong Niu Huang Wan, *Zhi Bao Dan* (Greatest Treasure Special Pill), and *Zi Xue Dan* (Purple Snow Pill), are commonly referred to as "*San Bao* (Three Treasures)," as these are three of the most commonly used formulas to treat hot *bi zheng* (closed disorder).

- *An Gong Niu Huang Wan* is the coldest of the three formulas. It is most potent in clearing heat and eliminating toxins.
- *Zhi Bao Dan* is aromatic, and is the best for opening the sensory orifices to treat unconsciousness due to obstruction of phlegm and heat.
- *Zi Xue Dan* is most effective to calm Liver wind in treating seizures, epilepsy, and convulsions.

Zhi Bao Dan (Greatest Treasure Special Pill)

Note: *Zhu Sha* (Cinnabaris) and *Xiong Huang* (Realgar) are potentially toxic heavy metals, and *Xi Jiao* (Cornu Rhinoceri) and *She Xiang* (Moschus) are derived from endangered animals. They are rarely used as medicinal substances today. The discussion of these substances here is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Zhu Sha* (Cinnabaris) and *Xiong Huang* (Realgar), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

Crush separately into fine powder *Xi Jiao* (Cornu Rhinoceri), *Dai Mao* (Carapax Eretmochelydis Imbricatae), *An Xi Xiang* (Benzoinum), and *Hu Po* (Succinum). *Zhu Sha* (Cinnabaris) and *Xiong Huang* (Realgar) are separately processed via the *shui fei* (refining with water) technique to obtain extremely fine powders. *Niu Huang* (Calculus Bovis), *She Xiang* (Moschus), and *Bing Pian* (Borneolum Syntheticum) are ground into powder. *Jin Bo* (gold foil) [25 leaves] and *Yin Bo* (silver foil) [50 leaves] are also ground into powder. Blend all the powders together, place them through a sieve, and mix with honey to form pills. Coat the pills with the remaining 25 leaves of *Jin Bo* (gold foil). The pills should weigh 3g each. Take 1 pill one time daily. Reduce the dose for children.

Note: The formulation today no longer uses *Jin Bo* (gold foil) or *Yin Bo* (silver foil), and has replaced *Xi Jiao* (Cornu Rhinoceri) with *Shui Niu Jiao* (Cornu Bubali). Please refer to the related formula *Ju Fang Zhi Bao San* (Greatest

Treasure Powder from the Imperial Grace Formulary) for additional information.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears heat and opens the sensory orifices
- 2. Dissolves turbidity and eliminates toxins

CLINICAL MANIFESTATIONS

- 1. Heat stroke, *zhong feng* (wind stroke), *wen bing* (warm disease), and *bi zheng* (closed disorder) with obstruction of phlegm and heat: altered consciousness, delirium, feverish sensations, irritability, restlessness, hoarse voice with profuse sputum, red tongue body with a yellow, greasy tongue coating, and a slippery, rapid pulse.
- 2. Infantile seizures and epilepsy due to obstruction by phlegm and heat.

CLINICAL APPLICATIONS

Stroke, heat stroke, coma, seizures and epilepsy, and encephalitis B.

EXPLANATION

Zhi Bao Dan (Greatest Treasure Special Pill) treats various disorders characterized by obstruction of phlegm and heat in the interior. The phlegm and heat cover the Pericardium and block the sensory orifices. Due to the heat, there will be symptoms of feverish sensations, irritability, and restlessness. Phlegm, which covers the Pericardium and blocks the sensory orifices, causes symptoms such as altered consciousness and delirium.

This formula uses aromatic substances such as *She Xiang* (Moschus), *Bing Pian* (Borneolum Syntheticum), and *An Xi Xiang* (Benzoinum) to open the sensory orifices and

<i>An Xi Xiang</i> (Benzoinum)	45g

MODIFICATIONS

For deficiency of *zheng* (upright) *qi*, administer *Zhi Bao Dan* with a decoction of *Ren Shen* (Radix et Rhizoma Ginseng).

CAUTIONS / CONTRAINDICATIONS

- *Zhi Bao Dan* is contraindicated in cases of yang excess and yin deficiency, as this formula has many acrid and drying herbs that may consume yin and body fluids.
- During pregnancy, this formula should only be used when absolutely necessary, and then, only with extreme caution.

<i>Shui Niu Jiao</i> (Cornu Bubali)	240-300g
<i>Zhu Sha</i> (Cinnabaris)	30g

Note: *Zhu Sha* (Cinnabaris) and *Xiong Huang* (Realgar) are potentially toxic heavy metals, and *She Xiang* (Moschus) is derived from an endangered animal. They are rarely used as medicinal substances today. The discussion here is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Zhu Sha* (Cinnabaris) and *Xiong Huang* (Realgar), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

Ju Fang Zhi Bao San (Greatest Treasure Powder from the Imperial Grace Formulary) is derived from *Zhi Bao Dan* (Greatest Treasure Special Pill), with two key changes. First, the dosage form has been changed from pills to powder. Second, three ingredients have been removed or replaced: *Jin Bo* (gold foil) and *Yin Bo* (silver foil) are no longer used today, and have been removed from this formula; while *Xi Jiao* (Cornu Rhinoceri) has been replaced by *Shui Niu Jiao* (Cornu Bubali). Note: The dose of *Shui Niu Jiao* (Cornu Bubali) was not available. However, the general consensus is 240-300g, since *Xi Jiao* (Cornu Rhinoceri) is approximately 8-10 times more potent than *Shui Niu Jiao* (Cornu Bubali).

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and *Ling Yang Jiao* (Cornu Saigae Tataricae), *She Xiang* (Moschus) and *Xi Jiao* (Cornu Rhinoceri) are derived from endangered animals. They are rarely used as a medicinal substance today. The discussion here is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Zhu Sha* (Cinnabaris), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

Crush the mineral ingredients [*Shi Gao* (Gypsum Fibrosum), *Huang Jin* (Gold), *Han Shui Shi* (Mirabilite), *Hua Shi* (Talcum) and *Ci Shi* (Magnetitum)] into small particles and cook in water three times. Then add the herbal ingredients [*Xuan Shen* (Radix Scrophulariae), *Mu Xiang* (Radix Aucklandiae), *Chen Xiang* (Lignum Aquilariae Resinatum), *Sheng Ma* (Rhizoma Cimicifugae), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Ding Xiang* (Flos Caryophylli)] and cook in water three times. Filter and discard the residues, and

cook the strained decoction and reduce it to a condensed paste.

Mix into this paste powdered *Xiao Shi* (Niter) and *Po Xiao* (Sal Glauberis), and blend thoroughly. Allow it to dry and then grind it into a fine powder. Grate and grind the horns [*Xi Jiao* (Cornu Rhinoceri) and *Ling Yang Jiao* (Cornu Saigae Tataricae)] into fine powder. Process *Zhu Sha* (Cinnabaris) via the *shui fei* (refining with water) technique to obtain an extremely fine powder. Grind *She Xiang* (Moschus) into powder. Mix these powders together, and place them through a sieve to obtain the final powdered formula. Take 1.5-3g of the powder per dose two times daily. Reduce the dose for children. As the literal name of the formula implies, the finished product resembles “purple snow.”

Note: The source text state to use “*Qing Mu Xiang*” as one of the ingredients in this formula. However, it is believed that “*Qing Mu Xiang*” actually refers to *Mu Xiang* (Radix Aucklandiae) during that period. Therefore, most textbooks and clinicians now use *Mu Xiang* (Radix Aucklandiae) as the ingredient in this formula. Also, *Po Xiao* (Sal Glauberis) is usually replaced with *Mang Xiao* (Natrii Sulfas), which is more readily available. *Huang*

Zǐ Xuě (Purple Snow)

Jin (Gold) is replaced with *Jin Bo* (gold foil), or removed from the formula.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears heat and opens the sensory orifices
- 2. Stops convulsions and calms the *shen* (spirit)

CLINICAL MANIFESTATIONS

Febrile disorders with heat attacking the Pericardium and rise of Liver wind: high fever, irritability, restlessness, altered consciousness, delirium, convulsions, thirst, dry lips, dysuria, constipation, infantile seizures, and epilepsy.

CLINICAL APPLICATIONS

Infantile seizures, epilepsy, and convulsions.

EXPLANATION

Zi Xue (Purple Snow) treats febrile disorders in which heat attacks the Pericardium and causes the rising of Liver wind. When heat attacks the Pericardium and disturbs the *shen* (spirit), there will be altered consciousness, delirium, irritability, and restlessness. The presence of heat in febrile disorders may also cause high fever, dysuria, and constipation. Heat may also stir Liver wind and cause it to rise

upward, leading to convulsions, seizures, and epilepsy. Lastly, heat may dry up body fluids, causing thirst and dry lips.

Xi Jiao (Cornu Rhinoceri) clears heat from the Heart and eliminates toxins. Sweet and cold, *Shi Gao* (Gypsum Fibrosum), *Han Shui Shi* (Mirabilite), and *Hua Shi* (Talcum) clear heat, purge fire, and preserve yin. *Xuan Shen* (Radix Scrophulariae) and *Sheng Ma* (Rhizoma Cimicifugae) clear heat and eliminate toxins. *She Xiang* (Moschus), *Mu Xiang* (Radix Aucklandiae), *Ding Xiang* (Flos Caryophylli), and *Chen Xiang* (Lignum Aquilariae Resinatum) activate qi circulation and open the sensory orifices. *Ling Yang Jiao* (Cornu Saigae Tataricae) clears the Liver, calms Liver wind, and relieves convulsions. *Zhu Sha* (Cinnabaris) and *Ci Shi* (Magnetitum) are heavy substances that anchor the *shen* (spirit) and relieve irritability and restlessness. *Huang Jin* (Gold) sedates the Heart, calms the *shen*, and eliminates toxins. *Po Xiao* (Sal Glauberis) and *Xiao Shi* (Niter) clear heat and drain it downward. Lastly, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the formula.

Zi Xue (Purple Snow)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Febrile disorders with heat attacking the Pericardium and rise of Liver wind	<ul style="list-style-type: none">• High fever, altered consciousness, delirium, irritability, and restlessness: heat attacking the Pericardium and disturbing the <i>shen</i> (spirit)• Seizures and epilepsy: heat stirring Liver wind upwards• Thirst and dry lips: heat consuming body fluids in the upper body• Dysuria and constipation: heat damaging body fluids in the lower body	<ul style="list-style-type: none">• Clears heat and opens sensory orifices• Stops convulsions and calms the <i>shen</i>	<ul style="list-style-type: none">• <i>Xi Jiao</i> (Cornu Rhinoceri) clears heat from the Heart and eliminates toxins.• <i>Shi Gao</i> (Gypsum Fibrosum), <i>Han Shui Shi</i> (Mirabilite), and <i>Hua Shi</i> (Talcum) clear heat, purge fire, and preserve yin.• <i>Xuan Shen</i> (Radix Scrophulariae) and <i>Sheng Ma</i> (Rhizoma Cimicifugae) clear heat and eliminate toxins.• <i>She Xiang</i> (Moschus), <i>Mu Xiang</i> (Radix Aucklandiae), <i>Ding Xiang</i> (Flos Caryophylli) and <i>Chen Xiang</i> (Lignum Aquilariae Resinatum) activate qi circulation and open orifices.• <i>Ling Yang Jiao</i> (Cornu Saigae Tataricae) clears the Liver, calms Liver wind, and relieves convulsions.• <i>Zhu Sha</i> (Cinnabaris) and <i>Ci Shi</i> (Magnetitum) are heavy substances that anchor the <i>shen</i> and relieve irritability and restlessness.• <i>Po Xiao</i> (Sal Glauberis) and <i>Xiao Shi</i> (Niter) clear heat and drain it downward.• <i>Huang Jin</i> (Gold) sedates the Heart, calms the <i>shen</i>, and eliminates toxins.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the formula.

Zǐ Xuě (Purple Snow)

CAUTIONS / CONTRAINDICATIONS

- *Zi Xue* should be discontinued as soon as the desired effects are achieved. Prolonged use of this formula, or use at large doses, could cause such side effects as profuse sweating, nausea, vomiting, icy cold extremities, hurried respiration, palpitations, dizziness, and vertigo.
- Use of this formula is contraindicated during pregnancy.¹
- Avoid spicy, pungent, oily, and greasy foods while taking this formula.²

AUTHORS' COMMENTS

Febrile disorders are often complicated by heat drying up body fluids. Therefore, it is important to note that this

formula uses sweet and cold herbs that clear heat and preserve body fluids [such as *Shi Gao* (Gypsum Fibrosum) and *Hua Shi* (Talcum)], instead of bitter and cold herbs that clear heat but damage yin and body fluids [such as *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis)].

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and *She Xiang* (Moschus) is derived from an endangered animal. They are rarely used as medicinal

substances today. The discussion here is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most

Xiǎo Ēr Huí Chūn Dān (Return of Spring Special Pill [Pediatric])

herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Zhu Sha* (Cinnabaris), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and form into very small pills that weigh about 0.09g [90mg] each. *Zhu Sha* (Cinnabaris) is used to coat these pellets. For infants under 1 year of age, administer 1 pill, two to three times daily. For children between 1-2 years of age, administer 2 pills, two to three times daily.

CHINESE THERAPEUTIC ACTIONS

- 1. Opens the sensory orifices and stops convulsions
- 2. Clears heat and dissolves phlegm

CLINICAL MANIFESTATIONS

Infantile convulsions due to heat and phlegm: fever, fidgeting, irritability, restlessness, continuous crying at night, delirium, vomiting of milk, wheezing and dyspnea, coughing with sputum, abdominal pain, and diarrhea.

CLINICAL APPLICATIONS

Infantile seizures, epilepsy, and convulsions.

EXPLANATION

Xiao Er Hui Chun Dan (Return of Spring Special Pill [Pediatric]) is one of the most important and effective formulas for treating infantile seizures and epilepsy due to stagnation of interior heat and phlegm. Heat and phlegm can stagnate in the Heart and obstruct the *shen* (spirit), causing fidgeting, irritability, restlessness, continuous crying at night, and delirium. Heat and phlegm may accumulate in the Lung, leading to wheezing, dyspnea and cough with sputum. Heat and phlegm may affect the Stomach, causing vomiting, abdominal pain, and diarrhea. Finally, heat may stir internal wind and cause it to rise upward, producing convulsions.

This formula uses *Niu Huang* (Calculus Bovis) to clear heat, eliminate toxins, dispel phlegm, open the sensory orifices, calm Liver wind, and alleviate convulsions. The aromatic *She Xiang* (Moschus) can open the orifices and awaken *shen* (spirit). *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Tian Zhu Huang* (Concretio Silicea

Xiao Er Hui Chun Dan (Return of Spring Special Pill [Pediatric])

Infantile convulsions due to heat and phlegm	<ul style="list-style-type: none">• Fidgeting, irritability, restlessness, continuous crying at night, and delirium: heat and phlegm stagnate in the Heart and obstruct the <i>shen</i> (spirit)• Vomiting, abdominal pain and diarrhea: heat and phlegm affecting the Stomach• Wheezing, dyspnea, and cough with sputum: heat and phlegm in the Lung• Convulsions: heat stirring internal wind upward	<ul style="list-style-type: none">• Opens sensory orifices and stops convulsion• Clears heat and dissolves phlegm	<ul style="list-style-type: none">• <i>Niu Huang</i> (Calculus Bovis) clears heat, eliminates toxins, dispels phlegm, calms Liver wind, and alleviates convulsions.• <i>She Xiang</i> (Moschus) opens the orifices and awakens <i>shen</i>.• <i>Chuan Bei Mu</i> (Bulbus Fritillariae Cirrhosae), <i>Tian Zhu Huang</i> (Concretio Silicea Bambusae), <i>Dan Nan Xing</i> (Arisaema cum Bile) and <i>Ban Xia</i> (Rhizoma Pinelliae) clear heat and dissolve phlegm.• <i>Gou Teng</i> (Ramulus Uncariae cum Uncis), <i>Tian Ma</i> (Rhizoma Gastrodiae), <i>Quan Xie</i> (Scorpio) and <i>Jiang Can</i> (Bombyx Batryticatus) calm internal wind and relieve convulsions.• <i>Zhu Sha</i> (Cinnabaris) quickly tranquilizes the mind and sedates Heart fire.• <i>Da Huang</i> (Radix et Rhizoma Rhei) purges fire and clears heat and phlegm stagnation.• <i>Zhi Qiao</i> (Fructus Aurantii), <i>Mu Xiang</i> (Radix Aucklandiae), <i>Chen Pi</i> (Pericarpium Citri Reticulatae), <i>Chen Xiang</i> (Lignum Aquilariae Resinatum), <i>Dou Kou</i> (Fructus Amomi Rotundus), and <i>Tan Xiang</i> (Lignum Santali Albi) regulate qi circulation to remove phlegm.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs.

Xiǎo Ēr Huí Chūn Dān (Return of Spring Special Pill [Pediatric])

Bambusae), *Dan Nan Xing* (Arisaema cum Bile), and *Ban Xia* (Rhizoma Pinelliae) all clear heat and dissolve phlegm. *Gou Teng* (Ramulus Uncariae cum Uncis), *Tian Ma* (Rhizoma Gastrodiae), *Quan Xie* (Scorpio), and *Jiang Can* (Bombyx Batryticatus) calm Liver wind and relieve the convulsions. *Zhu Sha* (Cinnabaris) is a heavy substance that quickly tranquilizes the mind and helps sedate Heart fire. *Da Huang* (Radix et Rhizoma Rhei) purges fire and clears the stagnation of heat and phlegm. *Zhi Qiao* (Fructus Aurantii), *Mu Xiang* (Radix Aucklandiae), *Chen Pi* (Pericarpium Citri Reticulatae), *Chen Xiang* (Lignum Aquilariae Resinatum), *Dou Kou* (Fructus Amomi Rotundus), and *Tan Xiang* (Lignum Santali Albi)

regulate qi circulation to help remove the phlegm. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs.

CAUTIONS / CONTRAINDICATIONS

Xiao Er Hui Chun Dan is contraindicated in chronic convulsions with deficiency and cold of the Spleen and Kidney.

AUTHORS' COMMENTS

Xiao Er Hui Chun Dan is one of the best formulas to treat the acute onset of infantile convulsions. The four diagnostic keys are heat, phlegm, wind, and convulsions.

Xíng Jūn Sǎn (Troop-Marching Powder)

行軍散
行军散

Pinyin Name: *Xing Jun San*

Literal Name: Troop-Marching Powder

Original Source: *Huo Luan Lun* (Discussion of Sudden Turmoil Disorders) by Wan Shi-Xiong in 1862

COMPOSITION

<i>She Xiang</i> (Moschus)	3g
<i>Bing Pian</i> (Borneolum Syntheticum)	3g
<i>Niu Huang</i> (Calculus Bovis)	3g
<i>Xiao Shi</i> (Niter), <i>zhi</i> (prepared)	0.9g
<i>Peng Sha</i> (Borax)	3g
<i>Xiong Huang</i> (Realgar), <i>shui fei</i> (refined with water)	24g
<i>Zhen Zhu</i> (Margarita)	3g
<i>Fei Jin</i> (Gold)	20 leaves

Note: *Xiong Huang* (Realgar) is a potentially toxic heavy metal, and *She Xiang* (Moschus) is derived from an endangered animal. They are rarely used as medicinal substances today. The discussion here is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Xiong Huang* (Realgar), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients separately into extremely fine powder. Mix these powders together and grind again. Place the powdered formula in a porcelain container and seal it with wax. Take 0.9-1.5g of the powdered formula per dose with boiled water at room temperature. Today, this formula is prepared by processing *Xiong Huang* (Realgar) and *Zhen Zhu* (Margarita) separately with the *shui fei* (refining with water) technique to obtain extremely fine powders. *Xiao Shi* (Niter), *Peng Sha* (Borax), *Niu Huang* (Calculus Bovis), *She Xiang*

Xíng Jūn Sǎn (Troop-Marching Powder)

(Moschus) and *Bing Pian* (Borneolum Syntheticum) are ground into powder. All of these powders are blended and then sifted to produce the final powder. Take 0.3-0.9g of the powder per dose, two to three times daily.

CHINESE THERAPEUTIC ACTIONS

1. Opens the sensory orifices
2. Dispels filth and fetidness
3. Eliminates toxins

CLINICAL MANIFESTATIONS

1. *Sha zhang* (acute filthy disease) and sudden turmoil disorder in late summer and early fall: vomiting, diarrhea, abdominal pain, extreme irritability, chest oppression, and altered consciousness or unconsciousness.
2. Other uses: oral lesions, sore throat, and corneal opacity caused by wind-heat.

CLINICAL APPLICATIONS

Gastrointestinal infections and traveler's diarrhea.

EXPLANATION

Xing Jun San (Troop-Marching Powder) treats *sha zhang* (acute filthy disease) and sudden turmoil disorder, diseases contracted primarily via ingestion of raw, dirty, or filthy foods, leading to fever, chest oppression, abdominal distention, nausea, vomiting, and diarrhea. Ingestion of such unclean foods impairs normal digestion, leading to accumulation of dampness and phlegm, abnormal circulation of qi, and subsequent gastrointestinal symptoms such as abdominal distention, nausea, vomiting, and

diarrhea. Dampness and phlegm may also accumulate in the chest to cover the Pericardium, causing a feeling of chest oppression and altered consciousness.

This formula uses aromatic substances such as *She Xiang* (Moschus) and *Bing Pian* (Borneolum Syntheticum) as the chief agents to open the sensory orifices, active qi circulation, and dispel filth and fetidness. *Niu Huang* (Calculus Bovis) clears the Heart, eliminates toxins, dispels phlegm, and opens sensory orifices. *Xiao Shi* (Niter) purges heat and breaks stagnation. *Peng Sha* (Borax) clears heat and eliminates toxins. *Xiong Huang* (Realgar) is used at a large dose to dispel filth and fetidness and eliminate toxins. *Zhen Zhu* (Margarita) and *Fei Jin* (Gold) calm the *shen* (spirit).

CAUTIONS / CONTRAINDICATIONS

Use of *Xing Jun San* is contraindicated during pregnancy, since it contains many herbs that are acrid, aromatic, and dispersing.

AUTHORS' COMMENTS

This formula originally contained *Fei Jin* (Gold) to calm the *shen* (spirit). However, *Fei Jin* (Gold) is no longer used today, and has been replaced with *Sheng Jiang* (Rhizoma Zingiberis Recens), which relieves nausea and vomiting and harmonizes the middle *jiao*.

Xing Jun San, literally "Troop-Marching Powder", was originally used to ensure the health of military troops as they marched through different places and were exposed to environment and diet of poor sanitations.

Xing Jun San (Troop-Marching Powder)

温开剂

— Warm Orifice-Opening Formulas

Sū Hé Xiāng Wán (Liquid Styrax Pill)

蘇合香丸

苏合香丸

Pinyin Name: *Su He Xiang Wan*

Literal Name: Liquid Styrax Pill

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Su He Xiang</i> (Styrax), <i>dun</i> (stewed)	30g
<i>She Xiang</i> (Moschus), <i>yan</i> (ground) to small particles	60g
<i>Bing Pian</i> (Borneolum Syntheticum), <i>yan</i> (ground) to small particles	30g
<i>An Xi Xiang</i> (Benzoinum), <i>ao</i> (simmered) the powder into paste	60g
<i>Mu Xiang</i> (Radix Aucklandiae)	60g
<i>Tan Xiang</i> (Lignum Santali Albi)	60g
<i>Chen Xiang</i> (Lignum Aquilariae Resinatum)	60g
<i>Ru Xiang</i> (Gummi Olibanum), <i>yan</i> (ground) to small particles	30g
<i>Ding Xiang</i> (Flos Caryophylli)	60g
<i>Xiang Fu</i> (Rhizoma Cyperi), <i>chao</i> (dry-fried)	60g
<i>Bi Bo</i> (Fructus Piperis Longi)	60g
<i>Xi Jiao</i> (Cornu Rhinoceri)	60g
<i>Zhu Sha</i> (Cinnabaris), <i>yan</i> (ground) and <i>shui fei</i> (refined with water)	60g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	60g
<i>He Zi</i> (Fructus Chebulae), <i>wei</i> (roasted)	60g

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and *Xi Jiao* (Cornu Rhinoceri) and *She Xiang* (Moschus) are derived from endangered animals. They are rarely used as medicinal substances today. The discussion here is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Zhu Sha* (Cinnabaris), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

The source text states to use “*Qing Mu Xiang*” as one of the ingredients in this formula. However, it is believed that

“*Qing Mu Xiang*” actually refers to *Mu Xiang* (Radix Aucklandiae) during that period. Therefore, most textbooks and clinicians now use *Mu Xiang* (Radix Aucklandiae) as one of the ingredients in this formula.

DOSAGE / PREPARATION / ADMINISTRATION

Grind separately *She Xiang* (Moschus), *Bing Pian* (Borneolum Syntheticum) and *Xi Jiao* (Cornu Rhinoceri) into fine powder and sift all of these powders together. Process *Zhu Sha* (Cinnabaris) separately via the *shui fei* (refining with water) method to obtain an extremely fine powder. Grind and blend all the ingredients into powder. Separately simmer *An Xi Xiang* (Benzoinum) from powder into paste, and stew *Su He Xiang* (Styrax) from solid into liquid form, and then blend the paste and the

Sū Hé Xiāng Wán (Liquid StyraX Pill)

liquid together. Mix all of the ingredients (both powder and liquid) with honey to form large pills. Dry the pills in a cool place without direct exposure to sunlight. Take 1 pill one to two times daily.

CHINESE THERAPEUTIC ACTIONS

1. Opens the sensory orifices with aromatic herbs
2. Activates qi circulation and stops pain

CLINICAL MANIFESTATIONS

Cold *bi zheng* (closed disorder) syndrome caused by stagnation of cold, qi and phlegm: sudden unconsciousness, extreme pain in the chest and abdomen, lockjaw, pale face, blue lips, white tongue coating, and a slow pulse.

CLINICAL APPLICATIONS

Angina pectoris, coronary artery disease, and cerebrovascular accident.

EXPLANATION

Su He Xiang Wan (Liquid StyraX Pill) is the representative formula for treating cold *bi zheng* (closed disorder) syndrome caused by stagnation of cold, qi and phlegm. Interior cold or phlegm obstruction may suddenly block the qi flow and “seize” Heart *shen* (spirit). As a result, acute and serious symptoms such as sudden unconsciousness, lockjaw, and abdominal and chest pain occur.

To effectively treat this syndrome, all three methods of cold-dispersing, qi-regulating, and phlegm-dissolving must be employed. This formula uses aromatic substances such as *Su He Xiang* (Styrax), *She Xiang* (Moschus), *Bing Pian* (Borneolum Syntheticum), and *An Xi Xiang* (Benzoinum) to quickly open the sensory orifices. *Mu Xiang* (Radix Aucklandiae), *Tan Xiang* (Lignum Santali Albi), *Chen Xiang* (Lignum Aquilariae Resinatum), *Ru Xiang* (Gummi Olibanum), *Ding Xiang* (Flos Caryophylli), and *Xiang Fu* (Rhizoma Cyperi) activate qi circulation, dispel cold, and dissolve phlegm. *Bi Bo* (Fructus Piperis Longi) warms the interior and dispels cold. *Xi Jiao* (Cornu Rhinoceri) clears heat and eliminates toxins. *Zhu Sha* (Cinnabaris) quickly calms the *shen* (spirit) and stabilizes the mind. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dispels dampness. *He Zi* (Fructus Chebulae) has a constricting effect to prevent the acrid and dispersing herbs of this formula from consuming too much *zheng* (upright) *qi*.

CAUTIONS / CONTRAINDICATIONS

- *Su He Xiang Wan* is contraindicated in cases of *two zheng* (abandoned syndrome) and hot *bi zheng* (closed disorder).
- Use of this formula is contraindicated during pregnancy.

Su He Xiang Wan (Liquid StyraX Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Cold <i>bi zheng</i> (closed disorder) syndrome due to stagnation of cold, qi and phlegm	<ul style="list-style-type: none"> • Sudden unconsciousness, lockjaw, and extreme pain in the chest and abdomen: cold <i>bi zheng</i> (closed disorder) • Pale face and blue lips: cold • Pain in the chest and abdomen: qi and blood stagnation 	<ul style="list-style-type: none"> • Opens the sensory orifices with aromatic herbs • Activates qi circulation and stops pain 	<ul style="list-style-type: none"> • <i>Su He Xiang</i> (Styrax), <i>She Xiang</i> (Moschus), <i>Bing Pian</i> (Borneolum Syntheticum) and <i>An Xi Xiang</i> (Benzoinum) quickly open the sensory orifices. • <i>Mu Xiang</i> (Radix Aucklandiae), <i>Tan Xiang</i> (Lignum Santali Albi), <i>Chen Xiang</i> (Lignum Aquilariae Resinatum), <i>Ru Xiang</i> (Gummi Olibanum), <i>Ding Xiang</i> (Flos Caryophylli) and <i>Xiang Fu</i> (Rhizoma Cyperi) activate qi circulation, dispel cold, and dissolve phlegm. • <i>Bi Bo</i> (Fructus Piperis Longi) warms the interior and dispels cold. • <i>Xi Jiao</i> (Cornu Rhinoceri) clears heat and eliminates toxins. • <i>Zhu Sha</i> (Cinnabaris) quickly calms the <i>shen</i> (spirit) and stabilizes the mind. • <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dispels dampness. • <i>He Zi</i> (Fructus Chebulae) prevents the acrid and dispersing herbs of this formula from consuming too much <i>zheng</i> (upright) <i>qi</i>.

Sū Hé Xiāng Wán (Liquid Styrax Pill)

RELATED FORMULA

Guān Xīn Sū Hé Wán (Coronary Styrax Pill)

冠心蘇合丸

冠心苏合丸

Pinyin Name: *Guan Xin Su He Wan*

Literal Name: Coronary Styrax Pill

Original Source: *Zhong Hua Ren Min Gong He Guo Yao Dian* (Pharmacopoeia of People's Republic of China) in 2005

<i>Su He Xiang</i> (Styrax)	50g
<i>Bing Pian</i> (Borneolum Syntheticum)	105g
<i>Ru Xiang</i> (Gummi Olibanum), <i>zhi</i> (prepared)	105g
<i>Tan Xiang</i> (Lignum Santali Albi)	210g
<i>Tu Mu Xiang</i> (Radix Inulae)	210g

Note: *Qing Mu Xiang* (Radix Aristolochiae) was used as one of the ingredients when this formula was first cited in *Zhong Guo Yao Dian* (Dictionary of Chinese Medicine) in 1977. However, because *Qing Mu Xiang* (Radix Aristolochiae) contains aristolochic acid and is potentially toxic, most textbooks and clinicians have replaced it with *Tu Mu Xiang* (Radix Inulae).

The source text states to grind *Ru Xiang* (Gummi Olibanum), *Tan Xiang* (Lignum Santali Albi), and *Tu Mu Xiang* (Radix Inulae) into a fine powder. *Bing Pian* (Borneolum Syntheticum) is ground separately and then sifted together with the other herb powders. Heat up a sufficient amount of honey, add *Su He Xiang* (Styrax) and mix them together thoroughly. Then add the sifted herb powders and mix them together again. Form into 1,000 pills. Place 1 pill under the tongue or chew it before swallowing, one to three times daily. This formula may also be taken before bedtime or as needed.

The main actions of this formula are to open orifices with aromatic herbs, activate qi circulation, and relieve pain. Clinically, this formula is often used to treat angina pectoris characterized by stagnation of qi, phlegm, and turbidity.

Su He Xiang Wan and *Guan Xin Su He Wan* (Coronary Styrax Pill) both use warm herbs to open sensory orifices, regulate qi and blood circulation, and stop pain.

- *Su He Xiang Wan* has stronger effects to open sensory orifices, dispel cold, and regulate qi.
- *Guan Xin Su He Wan* has better function to relieve chest pain.

Zǐ Jīn Dìng (Purple Gold Special Pill)

紫金錠

紫金錠

Pinyin Name: *Zi Jin Ding*

Literal Name: Purple Gold Special Pill

Original Source: *Pian Yu Xin Shu* (Text from Heart of Jade) by Wu Quan in the mid-16th century

COMPOSITION

<i>She Xiang</i> (Moschus)	9g
<i>Shan Ci Gu</i> (Pseudobulbus Cremastrae seu Pleiones)	90g
<i>Xiong Huang</i> (Realgar)	30g
<i>Qian Jin Zi</i> (Semen Euphorbiae), frost	30g
<i>Hong Da Ji</i> (Radix Knoxiae)	45g
<i>Zhu Sha</i> (Cinnabaris)	30g
<i>Wu Bei Zi</i> (Galla Chinensis)	90g

Note: *Zhu Sha* (Cinnabaris) and *Xiong Huang* (Realgar) are potentially toxic heavy metals, and *She Xiang* (Moschus) is derived from an endangered animal. They are rarely used as medicinal substances today. The discussion here

is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have removed them completely, or replaced them with substitutes with

Zi Jin Ding (Purple Gold Special Pill)

similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and form into special pills with sticky rice paste. For topical application, crush the special pills and mix with water, and apply locally. Today, *Xiong Huang* (Realgar) and *Zhu Sha* (Cinnabaris) are processed with the *shui fei* (refining with water) technique to obtain extremely fine powder. *Shan Ci Gu* (Pseudobulbus Cremastrae seu Pleiones), *Wu Bei Zi* (Galla Chinensis) and *Hong Da Ji* (Radix Knoxiae) are crushed into powder. *She Xiang* (Moschus) is also crushed into powder. All of these powders are sifted together and mixed with the frost of *Qian Jin Zi* (Semen Euphorbiae). Mix sticky rice powder and water and form into a dough. Steam the dough, and mix with the herbal powder, and form into tablets. Dry the tablets in a cool place without direct exposure to sunlight. For internal use, take 0.6-1.5g of tablets twice daily. For topical use, crush the tablets, mix with vinegar, and apply to the affected area.

CHINESE THERAPEUTIC ACTIONS

1. Dissolves phlegm and opens the sensory orifices
2. Dispels filth and fetidness and eliminates toxins
3. Reduces swelling and relieves pain

CLINICAL MANIFESTATIONS

Accumulation of filth, fetidness, phlegm and turbidity; epigastric and abdominal distention, oppression and pain, nausea, vomiting, diarrhea, and phlegm syncope in children. This formula may be applied topically to treat abscesses and sores.

CLINICAL APPLICATIONS

Nausea and vomiting from gastrointestinal infections.

EXPLANATION

Zi Jin Ding (Purple Gold Special Pill) has a wide range of applications, and was used in the past to treat disorders characterized by accumulation of filth, fetidness, phlegm and turbidity leading to stagnation of qi. Clinical presentations include feeling of epigastric and abdominal distention, oppression and pain, nausea, vomiting, and diarrhea; phlegm syncope in children; and abscesses and sores when applied topically.

In this formula, *She Xiang* (Moschus) opens the sensory orifices, activates qi circulation and relieves pain. *Shan Ci Gu* (Pseudobulbus Cremastrae seu Pleiones) clears heat and reduces swellings. *Xiong Huang* (Realgar) dispels filth and fetidness and eliminates toxins. *Qian Jin Zi* (Semen Euphorbiae) and *Hong Da Ji* (Radix Knoxiae) eliminate phlegm and reduce swellings. *Zhu Sha* (Cinnabaris) calms the *shen* (spirit). *Wu Bei Zi* (Galla Chinensis) astringes the Intestines to relieve diarrhea. It also prevents the drastic and harsh herbs from damaging the body.

CAUTIONS / CONTRAINDICATIONS

- *Zi Jin Ding* should be used with caution during pregnancy, since *She Xiang* (Moschus) has potent dispersing effect.
- It should be used with caution and with reduced dose in children, since some ingredients in this formula are potentially toxic.

AUTHORS' COMMENTS

Zi Jin Ding can also be applied topically on abscesses and sores to reduce swelling and disperse nodules.

Chapter 10 — Summary

— Orifice-Opening Formulas

SECTION 1: COLD ORIFICE-OPENING FORMULAS

Name	Similarities	Differences
<i>An Gong Niu Huang Wan</i> (Calm the Palace Pill with Cattle Gallstone)	Open the sensory orifices,	Clears heat and eliminates toxins
<i>Zhi Bao Dan</i> (Greatest Treasure Special Pill)	treat hot <i>bi zheng</i> (closed disorder)	Opens the sensory orifices, calms the <i>shen</i> (spirit)
<i>Zi Xue</i> (Purple Snow)		Calms Liver wind, relieves convulsions
<i>Xiao Er Hui Chun Dan</i> (Return of Spring Special Pill [Pediatric])	Open the sensory orifices	Treats infantile convulsions
<i>Xing Jun San</i> (Troop-Marching Powder)		Treats <i>sha zhang</i> (acute filthy disease)

An Gong Niu Huang Wan (Calm the Palace Pill with Cattle Gallstone), *Zhi Bao Dan* (Greatest Treasure Special Pill), and *Zi Xue* (Purple Snow) are generally considered to be the three representative formulas for treating hot *bi zheng* (closed disorder).

- *An Gong Niu Huang Wan* clears heat, eliminates toxins, opens the sensory orifices, and calms the *shen* (spirit). It mainly treats febrile disorders in which heat attacks the Pericardium and heat-phlegm obstructs the orifices.
- *Zhi Bao Dan* has potent functions to open the sensory orifices and calms the *shen* (spirit). It treats *bi zheng* (closed disorder) syndrome caused by heat-phlegm obstruction. It is also effective in treating infantile seizures, epilepsy, and convulsions caused by heat-phlegm obstruction.
- *Zi Xue* strongly calms Liver wind and stops convulsions, but is mild in clearing heat, eliminating toxins, opening the sensory orifices, and calming the *shen* (spirit). Thus, it is mostly used to treat febrile disorders in which heat attacks the Pericardium, giving rise to seizures, epilepsy, and convulsions.

Xiao Er Hui Chun Dan (Return of Spring Special Pill [Pediatric]) clears heat, dissolves phlegm, and opens the sensory orifices. As the name implies, it is designed for children to treat convulsions associated with heat and phlegm. The main clinical manifestations include fever, night crying, fright, delirium, irritability, and vomiting of milk.

Xing Jun San (Troop-Marching Powder) opens the sensory orifices, dispels filth and fetidness, and eliminates toxins. This formula was originally used to treat *sha zhang* (acute filthy disease), a gastrointestinal disease contracted primarily by ingestion of filthy (raw, dirty or unclean) foods. Clinical manifestations include fever, chest oppression, abdominal distention, nausea, vomiting, diarrhea, and in severe cases, altered consciousness.

Chapter 10 — Summary

SECTION 2: WARM ORIFICE-OPENING FORMULAS

Name	Similarities	Differences
Su He Xiang Wan (Liquid Styrax Pill)	Open the sensory orifices, treat cold <i>bi zheng</i> (closed disorder)	Activates qi circulation, dispels cold, stops pain
Zi Jin Ding (Purple Gold Special Pill)		Dissolves phlegm, dispels filth and fetidness, eliminates toxins

Su He Xiang Wan (Liquid Styrax Pill) and **Zi Jin Ding** (Purple Gold Special Pill) are two warm formulas with similar functions to open the sensory orifices and treat cold *bi zheng* (closed disorder).

- **Su He Xiang Wan** has additional functions to activate qi circulation, dispel cold, and stop pain. It treats cases of altered consciousness due to cold *bi zheng* (closed disorder) with stagnation of cold, qi and phlegm. Clinical manifestations include sudden unconsciousness, locked jaws, and extreme pain in the chest and abdomen.
- **Zi Jin Ding** has additional functions to dissolve phlegm, dispel filth and fetidness, and eliminate toxins. It treats gastrointestinal disorders characterized by accumulation of filth, fetidness, phlegm, and turbidity. Clinical manifestations include feelings of epigastric and abdominal distention, oppression and pain, nausea, vomiting, and diarrhea.

Chapter 11

— Astringent Formulas

傅山 Fù Shān

傅山 Fù Shān, also known as 傅青主 Fù Qíng-Zhǔ, 1607 – 1684.

傅山 Fù Shān

傅青主男科 *Fu Qing Zhu Nan Ke* (Men's Diseases According to Fu Qing-Zhu) and
傅青主女科 *Fu Qing Zhu Nu Ke* (Women's Diseases According to Fu Qing-Zhu), combined.

Fu Shan, also known as Fu Qing-Zhu,¹ is one of the most famous physicians from the Ming and Qing dynasties. He mastered the medical texts published before his time, and experimented with many *Yan Fang* (Time-Tested Formulas) from doctors during his own period of time. After many years of searching for and experimenting with regional remedies, Fu Shan discovered many unconventional, yet effective, herbal therapies. He concluded that it is extremely important to be completely open-minded when practicing medicine: “Do not be restricted to just one school of thought when making the diagnosis [whether *shang han* (cold damage) or *wen bing* (warm disease)], and do not be confined to a fixed formula when prescribing medicine.” By this, he set a strong example for practitioners to modify and customize each treatment as needed.

Fu Shan is known for having cared for his patients above and beyond his duty as a physician. He would frequently treat the poor and homeless for free, pay for their herbal medicines, and even give them money for food and shelter. When he died at the age of 78, thousands of people came from near and far to attend his funeral, to show their appreciation for his compassion as a person and skills as a physician.

Fu Shan specialized in both men's and women's health, and significantly influenced the treatment of male and female disorders in Traditional Chinese Medicine. He wrote many books, and is best known for *Fu Qing Zhu Nan Ke* (Men's Diseases According to Fu Qing-Zhu) and *Fu Qing Zhu Nu Ke* (Women's Diseases According to Fu Qing-Zhu). Many of the formulas discussed in these texts are still in use today, such as *Wan Dai Tang* (End Discharge Decoction), *Bao Chan Wu You Fang* (Preserve Pregnancy and Care-Free Decoction), and *Sheng Hua Tang* (Generation and Transformation Decoction).

1. Fu Shan was multi-talented. In addition to being an excellent physician, he was an expert in art, poetry, calligraphy, and martial arts. He was also a patriot in and soldier for the Ming dynasty, and led many revolts against the Qing dynasty. Eventually, when the Ming dynasty collapsed, he retreated to the mountains to quietly practice medicine. To avoid being tracked down and prosecuted, he changed his name to Fu Qing-Zhu, which is why all his publications carry this pseudonym.

Chapter 11 — Overview

— Astringent Formulas

Definition: Astringent formulas stabilize, bind, and stop the loss of qi, blood, *jing* (essence), and body fluids.

Qi, blood, *jing* (essence) and body fluids are vital substances of the body. These four substances are constantly being consumed and replaced, like the continuous flow of water in and out of a running river. It is this balance of consumption and replacement that helps to sustain health and life. However, in cases of over-consumption, lack of production, and/or continuous loss, disorders will surface. The loss of qi, blood, *jing*, or body fluids results in various clinical manifestations, such as spontaneous sweating, night sweats, chronic coughing, spermatorrhea, nocturnal emission, incontinence, chronic diarrhea, dysentery, leukorrhea and profuse menstrual bleeding. Clinical manifestations differ depending on the cause and location of the illness.

Astringent formulas treat disorders characterized by underlying deficiency with inability to produce qi, blood, *jing* (essence), or body fluids, and complicated by the continuous loss of these substances. In most cases, the cause and symptoms are treated concurrently by using tonic and astringent herbs. In cases of severe loss of qi, blood, *jing*, or body fluids, astringent herbs are used first to stop the immediate loss, followed by the use of tonic herbs to regenerate and replace these substances. In the case of qi and yang depletion, high doses of qi and yang-tonifying herbs should be used to restore qi and yang [see Chapter 6 Interior-Warming Formulas].

Qi, blood, *jing* (essence) and body fluids are constantly being consumed and replaced, like the continuous flow of water in and out of a running river.

SUBCATEGORIES OF ACTION

Astringent formulas are divided into five subcategories according to their therapeutic actions and clinical applications.

1. Exterior-Stabilizing Formulas to Stop Perspiration

These formulas are designed to treat spontaneous sweating due to *wei* (defensive) qi deficiency, or night sweating due to yin deficiency. *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) tonify *wei* (defensive) qi to stop spontaneous sweating, while *Fu Xiao Mai* (Fructus Triticis Levis) and *Mu Li* (Concha Ostreae) benefit yin and relieve night sweats. One exemplar formula that treats spontaneous sweating is *Yu Ping Feng San* (Jade Windscreen Powder), while *Mu Li San* (Oyster Shell Powder) is an exemplar formula for treating night sweats.

2. Lung-Restraining Formula to Relieve Cough

This formula is designed to treat chronic cough with Lung qi and yin deficiencies. The signs and symptoms of this condition include shortness of breath, spontaneous sweating, and a deficient, rapid pulse. In this case, astringent and tonic herbs are used together to treat the symptoms and the cause. For example, *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Wu Mei* (Fructus Mume) restrain the Lung and relieve cough, while *Ren Shen* (Radix et Rhizoma Ginseng) and *E Jiao* (Colla Corii Asini) tonify qi and nourish yin. A representative formula is *Jiu Xian San* (Nine-Immortal Powder).

Chapter 11 — Overview

Astringent herbs stop the immediate loss of qi, blood, *jing* (essence), or body fluids. Tonic herbs regenerate and replace them.

3. Intestine-Binding Formulas to Stop Leakage

These formulas treat diarrhea, dysentery, and in severe cases, rectal incontinence, characterized by chronic deficiency and cold of the Spleen and Kidney. Astringent herbs that bind the Intestines to stop diarrhea and dysentery include *Chi Shi Zhi* (Haloysitum Rubrum), *Rou Dou Kou* (Semen Myristicae), *He Zi* (Fructus Chebulae), and *Wu Wei Zi* (Fructus Schisandrae Chinensis). Tonic herbs that address deficiency and cold of the Spleen and Kidney include *Bu Gu Zhi* (Fructus Psoraleae), *Rou Gui* (Cortex Cinnamomi), *Gan Jiang* (Rhizoma Zingiberis), *Ren Shen* (Radix et Rhizoma Ginseng), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). Exemplar formulas include *Zhen Ren Yang Zang Tang* (True Man's Decoction for Nourishing the Organs), *Si Shen Wan* (Four-Miracle Pill), and *Tao Hua Tang* (Peach Blossom Decoction).

4. Jing (Essence)-Stabilizing Formulas to Stop Leakage

Formulas in this subcategory treat problems such as spermatorrhea, nocturnal emission, urinary incontinence, or enuresis due to Kidney deficiency. Kidney deficiency, characterized by leakage of *jing* (essence) and manifested as spermatorrhea or nocturnal emission, is treated by herbs such as *Sha Yuan Zi* (Semen Astragali Complinati), *Lian Xu* (Stamen Nelumbinis), *Qian Shi* (Semen Euryales), and the formula *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence). Kidney deficiency characterized by leakage of urine with signs such as urinary incontinence or enuresis, may be treated with herbs and formulas such as *Sang Piao Xiao* (Ootheca Mantidis), *Sang Piao Xiao San* (Mantis Egg-Case Powder), and *Suo Quan Wan* (Shut the Sluice Pill).

5. Womb-Stabilizing Formulas to Stop Leakage

These formulas treat profuse menstrual bleeding, metrorrhagia, continuous leukorrhea, and various *beng lou* (flooding and spotting) disorders. Clinical manifestations include palpitations, shortness of breath, soreness and pain of the lower back, pale face, prolonged menstrual bleeding, continuous leukorrhea, pale tongue, and a deficient, weak and fine pulse. Commonly used herbs include calcined *Long Gu* (Os Draconis), calcined *Mu Li* (Concha Ostreae), *Hai Piao Xiao* (Endoconcha Sepiae), *Chun Pi* (Cortex Ailanthi) and *Wu Bei Zi* (Galla Chinensis). Representative formulas include *Gu Jing Wan* (Stabilize the Menses Pill), *Wan Dai Tang* (End Discharge Decoction), and *Yi Huang Tang* (Change the Yellow [Discharge] Decoction).

Though these conditions are generally characterized by Spleen and Kidney deficiencies with instability of *chong* (thoroughfare) and *ren* (conception) channels, the treatment needs to be modified accordingly, as these conditions often occur with complications.

- For *beng lou* (flooding and spotting) with additional signs and symptoms such as palpitations, shortness of breath, weakness and pain of the lower back, pale face, pale tongue, and a deficient, fine, and weak pulse, add *Chun Pi* (Cortex Ailanthi), *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), and *Bai Guo* (Semen Ginkgo).
- For *beng lou* (flooding and spotting) characterized by weakness of Spleen qi or deficiency of *chong* (thoroughfare) and *ren* (conception) channels, add *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Shan Zhu Yu* (Fructus Corni).
- For *beng lou* (flooding and spotting) accompanied by yin deficiency and heat in the blood, add *Gui Ban* (Plastrum Testudinis) and *Huang Bo* (Cortex Phellodendri Chinensis).
- For leukorrhea caused by damp-heat in the lower *jiao*, add *Che Qian Zi* (Semen Plantaginis).

CAUTIONS / CONTRAINDICATIONS

- Astringent formulas are not suitable in disorders in which the loss of qi, blood, *jing* (essence), or body fluids is caused by excess syndromes with pathogenic factors residing in the interior. Examples include sweating due to heat, coughing due to phlegm retention, nocturnal emission due to fire, diarrhea and dysentery due to damp-heat, and metrorrhagia or leukorrhea due to heat in the blood. These are some of the syndromes not suitable

In most cases, cause and symptoms are treated concurrently by using tonic and astringent herbs.

Chapter 11 — Overview

with astringent formulas since the use of astringent herbs may trap the pathogenic factors inside the body, further aggravating the condition.

- Astringent formulas are primarily used to temporarily treat symptoms to stop the loss of qi, blood, *jing* (essence), or body fluids. It is important to also use tonic herbs to address the underlying deficiency.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Astringent formulas stop the loss of qi, blood, *jing* (essence), or body fluids from various parts of the body. From allopathic medical perspectives, these formulas treat respiratory, kidney, intestinal, genitourinary, menstrual, and gynecological disorders.

1. **Exterior-stabilizing formulas** that stop perspiration are designed to treat spontaneous or night sweating. They also address respiratory and kidney disorders.
 - **Sweating:** *Yu Ping Feng San* (Jade Windscreen Powder) and *Mu Li San* (Oyster Shell Powder) are formulas that have been used effectively to treat both spontaneous and night sweating.^{1,2}
 - **Prevention of respiratory tract infection:** *Yu Ping Feng San* (Jade Windscreen Powder) is also frequently used for the prevention of respiratory tract infection,³ as it has marked immunostimulant and antiviral effects.^{4,5}
 - **Nephritis:** *Yu Ping Feng San* (Jade Windscreen Powder) has been shown to have nephroprotective effects,⁶ and has been used to effectively treat nephritis.⁷
2. **The Lung-restraining formula** is used mainly to treat cough.
 - **Cough:** *Jiu Xian San* (Nine-Immortal Powder) effectively suppresses cough as many of its ingredients have antitussive and expectorant effects, such as *Ying Su Ke* (Pericarpium Papaveris),⁸ *Kuan Dong Hua* (Flos Farfarae),⁹ and *Jie Geng* (Radix Platycodonis).¹⁰
3. **Intestine-binding formulas** that stop leakage are used primarily to treat intestinal disorders marked by the loss of fluids, such as diarrhea and dysentery.
 - **Diarrhea and dysentery:** These formulas have been used with great success to treat diarrhea,^{11,12,13} dysentery,^{14,15} and colitis.^{16,17} The mechanism of this antidiarrheal effect is attributed in part to the inhibition of intestinal peristalsis and increased reabsorption of water.¹⁸ Exemplar formulas include *Zhen Ren Yang Zang Tang* (True Man's Decoction for Nourishing the Organs), *Si Shen Wan* (Four-Miracle Pill), and *Tao Hua Tang* (Peach Blossom Decoction).
4. ***Jing* (essence)-stabilizing formulas** that stop leakage are primarily used to treat abnormalities of sperm (spermatorrhea and nocturnal emission) and urine (incontinence and enuresis).
 - **Spermatorrhea:** According to one report, *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence) demonstrated good results in treating severe spermatorrhea.¹⁹
 - **Urinary disorders:** These formulas are effective in the treatment of urinary disorders, such as enuresis,^{20,21} frequent urination,^{22,23} and urinary incontinence.²⁴ The mechanism of action is attributed in part to the antidiuretic effects of the formula.²⁵ Exemplar formulas include *Sang Piao Xiao San* (Mantis Egg-Case Powder) and *Suo Quan Wan* (Shut the Sluice Pill).
5. **Womb-stabilizing formulas** that stop leakage are mainly used to treat menstrual and gynecological disorders.
 - **Menstrual disorders:** *Gu Jing Wan* (Stabilize the Menses Pill) may be used to treat various menstrual disorders, such as irregular menstruation during puberty,²⁶ and *beng lou* (flooding and spotting) during the perimenopausal period.²⁷
 - **Gynecological disorders:** *Wan Dai Tang* (End Discharge Decoction) is used to address many gynecological disorders, such as leukorrhea,²⁸ chronic cervicitis,²⁹ and acute or chronic vaginitis.³⁰

~
Astringent formulas are not suitable if the losses are caused by excess syndromes with pathogenic factors residing in the interior.

Section 1

固表止汗剂

— Exterior-Stabilizing Formulas to Stop Perspiration

Yù Píng Fēng Sǎn (Jade Windscreen Powder)

玉屏風散

玉屏风散

Pinyin Name: *Yu Ping Feng San*

Literal Name: Jade Windscreen Powder

Alternate Names: Jade Wind-Barrier Formula, Jade Screen Powder, Astragalus and Siler Formula

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Huang Qi</i> (Radix Astragali)	30g [6g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	60g [12g]
<i>Fang Feng</i> (Radix Saposhnikoviae)	30g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder. Cook 9g of the powdered herbs and 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 large bowls of water for decoction. Today, this formula may be prepared as a decoction with the doses suggested in brackets, with addition of 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae).¹

CHINESE THERAPEUTIC ACTIONS

1. Tonifies *wei* (defensive) *qi*
2. Consolidates the exterior
3. Stops spontaneous sweating

CLINICAL MANIFESTATIONS

Wei (defensive) *qi* deficiency: spontaneous sweating, aversion to wind and cold, increased susceptibility to invasion of exterior pathogens, pale face, pale tongue, white tongue coating, and a floating, deficient pulse.

CLINICAL APPLICATIONS

Prevention of respiratory tract infection, allergic rhinitis, abnormal perspiration, nephritis, and facial paralysis.

EXPLANATION

Yu Ping Feng San (Jade Windscreen Powder) is commonly used to treat spontaneous sweating or increased susceptibility to invasion of exterior pathogens due to deficiency of *wei* (defensive) *qi*. *Wei qi* resides at the exterior of the body to regulate skin pores and protect the body from the invasion of exterior pathogenic factors. If *wei qi* becomes deficient, body fluids may leak out of the body through the open skin pores, resulting in spontaneous sweating. Deficiency of *wei qi* may lower the defensive function of the skin, increasing the patient's susceptibility to invasion of exterior pathogens. Pale face, pale tongue, and a deficient pulse all indicate *qi* deficiency.

This formula uses a large dose of *Huang Qi* (Radix Astragali) to strengthen *wei* (defensive) *qi* at the exterior and increase the body's defense against foreign pathogenic factors. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) assists *Huang Qi* (Radix Astragali) in strengthening the exterior to stop spontaneous sweating. *Fang Feng* (Radix Saposhnikoviae) dispels any exterior pathogenic factors, especially wind. This formula has a unique check and balance: the use of an exterior-releasing herb, *Fang Feng* (Radix Saposhnikoviae), prevents retention of pathogenic factors trapped by a *qi*-tonifying herb, *Huang Qi* (Radix

Yù Píng Fēng Sǎn (Jade Windscreen Powder)

Yu Ping Feng San (Jade Windscreen Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Wei</i> (defensive) <i>qi</i> deficiency	<ul style="list-style-type: none">• Spontaneous sweating: leakage of body fluids due to deficiency of <i>wei qi</i>• Aversion to wind and cold and increased susceptibility to exterior conditions: deficiency of <i>wei qi</i> unable to protect the exterior• Pale face, pale tongue, white tongue coating and a deficient pulse: <i>qi</i> deficiency	<ul style="list-style-type: none">• Tonifies <i>wei qi</i>• Protects the exterior• Stops spontaneous sweating	<ul style="list-style-type: none">• <i>Huang Qi</i> (Radix Astragali) strengthens <i>wei qi</i> at the exterior and increases the body's defense.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) strengthens the exterior and stops spontaneous sweating.• <i>Fang Feng</i> (Radix Saposhnikoviae) dispels any exterior pathogenic factors.

Astragali); and the use of a *qi*-tonifying herb prevents any damage to the body that may be induced by the use of an exterior-releasing herb. Thus, using an exterior-releasing herb in conjunction with a tonic herb prevents exterior pathogenic factors from being trapped in the interior and causing harm.

Yu Ping Feng San has functions to tonify *wei* (defensive) *qi*, protect the exterior, release exterior pathogenic factors, and stop perspiration. It is commonly used to treat individuals with spontaneous perspiration due to exterior deficiency, or individuals who frequently contract common colds and influenza.

MODIFICATIONS

- For common cold characterized by wind-cold, add *Cang Zhu* (Rhizoma Atractylodis) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- For common cold in a constitutionally deficient person, add *Jing Jie* (Herba Schizonepetae), *Zi Su Ye* (Folium Perillae), and *Dang Shen* (Radix Codonopsis).
- With dizziness due to blood deficiency, add *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong).
- With skin eruptions, add *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba).
- With chronic or allergic sinusitis, add *Xin Yi Hua* (Flos Magnoliae) and *Cang Er Zi* (Fructus Xanthii).
- With spontaneous perspiration due to yang deficiency, add *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With severe spontaneous sweating, add *Fu Xiao Mai* (Fructus Tritici Levis), calcined *Mu Li* (Concha Ostreae), and *Ma Huang Gen* (Radix et Rhizoma Ephedrae).
- With fatigue due to *qi* deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With generalized weakness and deficiency, add *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction).

CAUTIONS / CONTRAINDICATIONS

- *Yu Ping Feng San* is contraindicated in patients with exterior syndrome with spontaneous sweating. It should be used only for spontaneous sweating without exterior syndrome.
- This formula is inappropriate for individuals with night sweating caused by yin deficiency.
- Individuals who take this formula should avoid exposure to cold and wind, and refrain from raw, cold, oily and greasy foods.²
- According to one report, the use of this formula was associated with mild dry mouth in 8 out of 127 patients. Dry mouth appeared within the first 10 days of use, and was self-limiting and resolved between days 11 to 20. No other abnormalities were noted.³

PHARMACOLOGICAL EFFECTS

1. **Immunostimulant:** Administration of *Yu Ping Feng San* has been associated with increased immunity. According to one study, the use of this formula increased IgG and IgA in mice.⁴ Another study reported that the use of this formula for 2 to 3 months increased NK cell count and activities.⁵
2. **Antiviral:** According to one *in vitro* study, *Yu Ping Feng San* has demonstrated inhibition on the replication of influenza A viruses.⁶
3. **Nephroprotective:** According to one study, administration of *Yu Ping Feng San* in rabbits was associated with marked reduction of creatinine in comparison with the control group which did not receive any herbs. *Yu Ping Feng San*, however, did not have any statistically-significant effect on proteinuria in the same subjects.⁷

CLINICAL STUDIES AND RESEARCH

1. **Prevention of respiratory tract infection:** According to one study, *Yu Ping Feng San* was evaluated for its effect in preventing recurrent respiratory tract infection in 32 children who have had a history of frequent infections.

Yù Píng Fēng Sǎn (Jade Windscreen Powder)

The treatment protocol was to administer *Yu Ping Feng San* for 14 weeks prior to winter. The study reported an overall effectiveness of 96.9%. Furthermore, the study noted that there was an increase in IgA, but no significant changes to IgG or IgM.⁸

2. **Allergic rhinitis:** According to one study, the use of modified *Yu Ping Feng San* was associated with good results to treat 495 patients with allergic rhinitis characterized by deficiency of the exterior. Of 495 patients, the study reported significant improvement in 293 cases, improvement in 120 cases, and no effect in 79 cases. The rate of effectiveness was 84%. Information was unavailable on 3 individuals who did not complete the study.⁹
3. **Perspiration:** In one study, 88 children with profuse perspiration were treated with satisfactory results using modified *Yu Ping Feng San*. Modifications were made based on traditional Chinese medical diagnosis. For qi deficiencies, *Da Zao* (Fructus Jujubae) 15g, *Nuo Mi Gen* (Radix Oryzae Glutinosae) 9g, calcined *Mu Li* (Concha Ostreae) 30g, and calcined *Long Gu* (Os Draconis) 30g were added. For qi and yin deficiencies, *Wu Wei Zi* (Fructus Schisandrae Chinensis) 4.5g and *Dang Gui* (Radix Angelicae Sinensis) 9g were added.¹⁰
4. **Nephritis:** According to one study, administration of modified *Yu Ping Feng San* was associated with beneficial effect in 29 of 33 patients. The treatment protocol was to administer the herbs in powder form, 9 grams three times daily for 3 consecutive days followed by 4 days of rest per week, for 6 months. The herbal formula contained *Huang Qi* (Radix Astragali) 20g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, *Fang Feng* (Radix Saposhnikoviae) 12g, *Chen Pi* (Pericarpium Citri Reticulatae) 9g, *Lian Qiao* (Fructus Forsythiae) 40g, *Tu Fu Ling* (Rhizoma Smilacis Glabrae) 50g, and *Qiang Huo* (Rhizoma et Radix Notopterygii) 10g.¹¹
5. **Facial paralysis:** According to one study, concurrent use of *Yu Ping Feng San* and *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction) for treatment of facial paralysis in 49 patients was associated with complete recovery in 32 cases, significant improvement in 15 cases, and moderate improvement in 2 cases.¹²

TOXICOLOGY

Yu Ping Feng San has very little toxicity. According to one study on acute toxicology, administration of this formula at 100 g/kg in mice did not cause any abnormal reactions or fatalities.¹³ According to another study on chronic toxicology in mice, oral administration of this formula at 15 g/kg/day for 14 days did not cause any abnormal reactions of the internal organs (heart, lung, liver, kidney, and stomach). However, some mild side effects were observed, such as diarrhea.¹⁴

RELATED FORMULA

Huáng Qí Fáng Fēng Tāng

(Astragalus Decoction to Guard the Wind)

黃耆防風湯

黄芪防风汤

Pinyin Name: *Huang Qi Fang Feng Tang*

Literal Name: Astragalus Decoction to Guard the Wind

Original Source: *Tian Jin Zhong Yi Da Xue* (Tianjin University of Chinese Medicine) in 1989

Huang Qi (Radix Astragali)

Fang Feng (Radix Saposhnikoviae)

Bai Zhu (Rhizoma Atractylodis Macrocephalae)

Dong Chong Xia Cao (Cordyceps)

Ling Zhi (Ganoderma)

Wu Wei Zi (Fructus Schisandrae Chinensis)

Huang Qi Fang Feng Tang (Astragalus Decoction to Guard the Wind) specifically tonifies *wei* (defensive) *qi* and prevents the invasion of *liu yin* (six exogenous factors). Clinically, it treats individuals with a compromised immune system, and can be used prophylactically to prevent infectious diseases by boosting the immune system.

AUTHORS' COMMENTS

Yu Ping Feng San is the key formula for tonifying and consolidating *wei* (defensive) *qi*. Key symptoms include spontaneous sweating, weakness, pale complexion, pale tongue, and a deficient pulse. These patients, due to *wei qi* deficiency, often catch infections more often than others. Today, this formula is commonly used to prevent infection in individuals who are weak, deficient, or have compromised immunity.

Yu Ping Feng San, *Sheng Mai San* (Generate the Pulse Powder), and *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi) can all be used to enhance the immune system of those individuals who frequently catch colds.

- *Yu Ping Feng San* tonifies *wei* (defensive) *qi*.
- *Sheng Mai San* (Generate the Pulse Powder) tonifies *qi* and generates body fluids.
- *Ren Shen Yang Ying Tang* tonifies *qi* and blood.

Yu Ping Feng San and *Gui Zhi Tang* (Cinnamon Twig Decoction) both treat spontaneous perspiration and aversion to wind, but have completely different clinical applications.

- *Yu Ping Feng San* is an astringent formula that treats spontaneous perspiration and aversion to wind. However, these symptoms are due to *wei* (defensive) *qi* deficiency with inability to consolidate the exterior. Besides leakage

Yù Píng Fēng Sǎn (Jade Windscreen Powder)

of body fluids, other symptoms include frequent catching of common colds, pale complexion, generalized weakness, and a deficient pulse. *Yu Ping Feng San* is designed for patients who have not yet contracted an exterior condition.

- *Gui Zhi Tang* is an exterior-releasing formula designed to treat wind-cold invasion with disharmony between the *ying* (nutritive) and *wei* (defensive) levels, causing symptoms such as fever, aversion to cold, perspiration, headache, stuffy nose, and a superficial pulse. *Gui Zhi Tang* is formulated to treat patients who are now suffering from an exterior wind-cold condition.¹⁵

Mǔ Lì Sǎn (Oyster Shell Powder)

牡蠣散

牡蛎散

Pinyin Name: *Mu Li San*

Literal Name: Oyster Shell Powder

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Mu Li</i> (Concha Ostreae), <i>jin</i> (soaked) in rice water to remove soil and <i>shao</i> (burned) till red	30g
<i>Huang Qi</i> (Radix Astragali)	30g
<i>Ma Huang Gen</i> (Radix et Rhizoma Ephedrae), <i>xi</i> (washed)	30g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the three ingredients into coarse powder. Cook 9g of the powder and approximately 100 pieces [15-30g] of *Xiao Mai* (Fructus Triticum) in 1.5 bowls of water until it is reduced down to 80%. Take the warm, strained decoction in two equally-divided doses at anytime during the day. Today this formula is prepared by cooking 9g of the coarsely-powdered herbs with 30g of *Xiao Mai* (Fructus Triticum) in water. It may also be prepared as a decoction with addition of *Xiao Mai* (Fructus Triticum) and proportional adjustment of doses of herbs.

CHINESE THERAPEUTIC ACTIONS

1. Protects the exterior
2. Stops spontaneous and night sweating

CLINICAL MANIFESTATIONS

Yin and qi deficiencies: spontaneous sweating, profuse and continuous sweating while sleeping at night, palpitations, irritability, shortness of breath, and lethargy.

CLINICAL APPLICATIONS

Post-surgical sweating, postpartum sweating, and sweating in pulmonary tuberculosis.

Mǔ Lì Sǎn (Oyster Shell Powder)

EXPLANATION

Mu Li San (Oyster Shell Powder) is designed to treat sweating due to deficiencies of yin and qi. Deficiency of yin may lead to sweating while sleeping, and deficiency of qi may lead to spontaneous sweating. Sweat is the body fluid that belongs to the Heart. Therefore, excessive sweating may cause Heart yin deficiency, leading to palpitations and irritability. Excessive sweating may also consume the qi since the qi travels with the sweat out of the body. Continuous consumption of qi in a qi-deficient individual would then lead to shortness of breath and lethargy.

The objectives of this formula are to tonify qi and yin to stop both spontaneous and night sweating. *Mu Li* (Concha Ostreae) benefits yin to stop night sweating, and anchors yang to relieve irritability. *Huang Qi* (Radix Astragali) tonifies qi, strengthens the exterior, and stops spontaneous sweating. *Ma Huang Gen* (Radix et Rhizoma Ephedrae) has an astringent effect to stop spontaneous and night sweating. *Xiao Mai* (Fructus Triticici) benefits Heart qi, nourishes Heart yin, stops sweating, and relieves irritability and palpitation. Indeed, this formula nourishes the qi and yin and strengthens the exterior to stop the abnormal sweating.

MODIFICATIONS

- With more qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With more yin deficiency, add *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Bai Shao* (Radix Paeoniae Alba).
- With yang deficiency, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With blood deficiency, add *Shu Di Huang* (Radix Rehmanniae Praeparata) and *He Shou Wu* (Radix Polygoni Multiflori).

- With Spleen deficiency, add *Bai Bian Dou* (Semen Lablab Album) and *Shan Yao* (Rhizoma Dioscoreae).
- With irritability and insomnia, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis).
- With continuous sweating after ingestion of this formula, add *Wu Wei Zi* (Fructus Schisandrae Chinensis).

CAUTIONS / CONTRAINDICATIONS

Mu Li San is not suitable for night sweating caused by yin-deficient heat.

CLINICAL STUDIES AND RESEARCH

Perspiration: According to one study, the use of modified *Mu Li San* was effective in treating both spontaneous and night sweating in 28 patients (6 with spontaneous sweating, 15 with night sweating, and 7 with both). In addition to sweating, other complaints included poor appetite, dizziness, palpitations, fatigue and lack of energy. The study reported complete recovery in 20 cases, near-complete recovery in 5 cases, slight improvement in 1 case, and no effect in 2 cases. Most patients responded within 10 packs of herbs.¹

AUTHORS' COMMENTS

Mu Li San is a commonly used formula in the treatment of sweating. The key signs and symptoms include spontaneous sweating (qi deficiency), night sweating (yin deficiency), shortness of breath, lethargy, pale tongue, and a fine, weak pulse. To further enhance the effect to stop sweating, *Fu Xiao Mai* (Fructus Triticici Levis) is used to replace *Xiao Mai* (Fructus Triticici).

Yu Ping Feng San and *Mu Li San* (Oyster Shell Powder) both treat sweating.

- *Yu Ping Feng San* is designed for exterior *wei* (defensive) qi deficiency with spontaneous sweating and aversion to wind, pale complexion, pale tongue, and a deficient pulse.

Mu Li San (Oyster Shell Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Yin and qi deficiencies	<ul style="list-style-type: none"> • Spontaneous sweating: qi deficiency • Night sweating: yin deficiency • Palpitation and irritability: Heart yin deficiency due to excessive sweating • Shortness of breath, lethargy: qi deficiency due to excessive sweating 	<ul style="list-style-type: none"> • Protects the exterior • Stops spontaneous and night sweating 	<ul style="list-style-type: none"> • <i>Mu Li</i> (Concha Ostreae) benefits yin to stop night sweating, and anchors yang to relieve irritability. • <i>Huang Qi</i> (Radix Astragali) tonifies qi, strengthens the exterior, and stops spontaneous sweating. • <i>Ma Huang Gen</i> (Radix et Rhizoma Ephedrae) has astringent effect to stop sweating. • <i>Xiao Mai</i> (Fructus Triticici) benefits Heart qi, nourishes Heart yin, stops sweating, and relieves irritability and palpitation.

Mǔ Lì Sǎn (Oyster Shell Powder)

Since this formula tonifies qi, consolidates the exterior, and stops sweating, it is indicated for individuals who frequently suffer from common colds.

- *Mu Li San* is indicated for general deficiency with profuse sweating, especially at night, palpitations, easily frightened, shortness of breath, irritability, and fatigue. It is more appropriate for individuals with yin and qi deficiencies with night sweating.²

Mu Li San and *Dang Gui Liu Huang Tang* (Tangkuei and Six-Yellow Decoction) both nourish yin, clear heat, consolidate the exterior, and stop night sweating.

- *Mu Li San* has a stronger effect to bind and stop sweating, and a weaker effect to nourish yin and clear heat. It is used mostly to treat qi and yin deficiencies with

sweating during the day and night. Other symptoms include palpitations, being easily frightened, and shortness of breath.

- *Dang Gui Liu Huang Tang* is stronger at nourishing yin and clearing heat. It is mainly used for night sweating with feverish sensation at night or tidal fever, irritability, dryness of the mouth, lips, and stools, and other signs of yin-deficient heat.³

Section 2

敛肺止咳剂

— Lung-Restraining Formula to Relieve Cough

Jiǔ Xiān Sǎn (Nine-Immortal Powder)

九仙散

Pinyin Name: *Jiu Xian San*

Literal Name: Nine-Immortal Powder

Original Source: *Yi Xue Zheng Zhuan* (True Lineage of Medicine) by Yu Tian-Min in 1515

COMPOSITION

<i>Ying Su Ke</i> (Pericarpium Papaveris), <i>mi zhi</i> (fried with honey)	6g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	1.5g [3g]
<i>Wu Mei</i> (Fructus Mume)	1 piece [6g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>dun</i> (stewed) separately	1.5g [3g]
<i>E Jiao</i> (Colla Corii Asini)	1.5g [3g]
<i>Kuan Dong Hua</i> (Flos Farfarae)	1.5g [3g]
<i>Bei Mu</i> (Bulbus Fritillariae)	1.5g [3g]
<i>Sang Bai Pi</i> (Cortex Mori)	1.5g [3g]
<i>Jie Geng</i> (Radix Platycodonis)	1.5g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all ingredients into powder. Cook the herbs with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in two large bowls of water until it is reduced down to one bowl. Take the warm, strained decoction. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Restrains the Lung and stops coughing
2. Benefits qi and nourishes yin

CLINICAL MANIFESTATIONS

Chronic coughing with Lung yin and qi deficiencies: chronic, persistent coughing, severe coughing leading to wheezing, dyspnea and spontaneous sweating, and a deficient, rapid pulse.

CLINICAL APPLICATIONS

Pulmonary tuberculosis, chronic bronchitis, and coughing.

EXPLANATION

Jiu Xian San (Nine-Immortal Powder) is designed to treat chronic coughing with Lung yin and qi deficiencies. Chronic coughing injures the Lung, causing wheezing, dyspnea and shortness of breath. Chronic coughing also consumes qi and causes the inability of skin pores to close, leading to spontaneous sweating. Chronic coughing may also deplete yin, leading to deficiency heat, and manifesting in the form of a deficient, rapid pulse.

Ying Su Ke (Pericarpium Papaveris) in this formula is used to restrain the Lung and stop coughing. *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Wu Mei* (Fructus Mume) help restrain the Lung to stop coughing. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies Lung qi. *Wu Wei Zi* (Fructus Schisandrae Chinensis) also assists *Ren Shen* (Radix et Rhizoma Ginseng) to tonify qi. *E Jiao* (Colla Corii Asini) nourishes Lung yin. *Kuan Dong Hua* (Flos Farfarae) and *Bei Mu* (Bulbus Fritillariae) descend Lung qi, stop coughing and wheezing, and dissolve phlegm. *Sang Bai Pi* (Cortex Mori) clears the Lung to stop coughing and wheezing. *Jie Geng* (Radix Platycodonis), besides relieving the coughing and dissolving the phlegm, guides all the other herbs upward to the Lung.

Jiǔ Xiān Sǎn (Nine-Immortal Powder)

Jiu Xian San (Nine-Immortal Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Chronic coughing with damage of Lung yin and qi	<ul style="list-style-type: none">• Chronic coughing, wheezing and shortness of breath: Lung yin and qi deficiencies• Spontaneous sweating: Lung qi deficiency unable to close skin pores• A deficient and rapid pulse: deficiency heat	<ul style="list-style-type: none">• Restrains Lung and stops coughing• Benefits qi and nourishes yin	<ul style="list-style-type: none">• <i>Ying Su Ke</i> (Pericarpium Papaveris) restrains the Lung and stops coughing.• <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) and <i>Wu Mei</i> (Fructus Mume) restrain the Lung to stop coughing.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies the Lung qi.• <i>E Jiao</i> (Colla Corii Asini) nourishes the Lung yin.• <i>Kuan Dong Hua</i> (Flos Farfarae) and <i>Bei Mu</i> (Bulbus Fritillariae) descend Lung qi, stop coughing and wheezing, and dissolve phlegm.• <i>Sang Bai Pi</i> (Cortex Mori) clears the Lung to stop coughing and wheezing.• <i>Jie Geng</i> (Radix Platycodonis) relieves coughing and dissolves phlegm, and guides the other herbs upward to the Lung.

MODIFICATIONS

- With wheezing and dyspnea due to Lung and Kidney deficiencies, add *Shu Di Huang* (Radix Rehmanniae Praeparata), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae), and *Hu Tao Ren* (Semen Juglandis).
- With loose stools and indigestion due to Spleen deficiency, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shan Yao* (Rhizoma Dioscoreae), and *Fu Ling* (Poria).

CAUTIONS / CONTRAINDICATIONS

- *Jiu Xian San* has a tonic effect, and as such, it is not appropriate for coughing due to exterior conditions with fever and aversion to cold. The use of tonic herbs may complicate the illness by drawing pathogenic factors from the exterior to the interior.
- Since this formula has a strong astringent action, it is not indicated for cases of coughing with profuse sputum, as the astringent effect may trap the pathogenic factors inside.
- Overdose or long-term usage of *Ying Su Ke* (Pericarpium Papaveris) may result in numerous side effects and adverse reactions, as this herb is potentially toxic and addictive.

Section 3

涩肠固脱剂

— Intestines-Binding Formulas to Stop Leakage

Zhēn Rén Yǎng Zàng Tāng

(True Man's Decoction for Nourishing the Organs)

真人養臟湯

真人养脏汤

Pinyin Name: *Zhen Ren Yang Zang Tang***Literal Name:** True Man's Decoction for Nourishing the Organs**Original Source:** *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85**COMPOSITION**

<i>Ying Su Ke</i> (Pericarpium Papaveris), <i>mi zhi</i> (fried with honey)	108g [15g]
<i>Rou Dou Kou</i> (Semen Myristicae), <i>wei</i> (roasted)	15g [6g]
<i>He Zi</i> (Fructus Chebulae)	36g [12g]
<i>Rou Gui</i> (Cortex Cinnamomi)	24g [3g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	18g [9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>bei</i> (stone baked)	18g [9g]

<i>Mu Xiang</i> (Radix Aucklandiae), do not expose to heat	42g [4.5g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	24g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into coarse powder. Cook 6g of the powder in 1.5 bowls of water until it is reduced down to 80%. Take the warm, strained decoction before meal. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Binds the intestines and stops diarrhea and dysentery
2. Warms and tonifies the Spleen and Kidney

CLINICAL MANIFESTATIONS

Chronic diarrhea or dysentery due to deficiency and cold of the Spleen and Kidney: uncontrollable bowel movement throughout the day and night, rectal tenesmus and prolapse, abdominal pain that is relieved by pressure and warmth, red or white dysentery, stools with pus or blood, lethargy, and loss of appetite.

CLINICAL APPLICATIONS

Chronic enteritis, chronic colitis, chronic diarrhea, chronic dysentery, and rectal prolapse.

EXPLANATION

Zhen Ren Yang Zang Tang (True Man's Decoction for Nourishing the Organs) is designed to treat chronic diarrhea or dysentery due to deficiency and cold of the Spleen and Kidney. Deficiency and cold of the Spleen and Kidney may cause the normally ascending qi of these two organs to descend, leading to diarrhea or dysentery. In severe cases, rectal prolapse may occur. Abdominal pain that is relieved by pressure and warmth indicates general deficiency and cold conditions. Presence of red [blood] or white [pus or mucus] stools and rectal tenesmus indicates disharmony of qi and blood. A chronic condition of diarrhea or dysentery may lead to generalized deficiency with lethargy and loss of appetite.

Zhēn Rén Yǎng Zàng Tāng

(True Man’s Decoction for Nourishing the Organs)

Zhen Ren Yang Zang Tang (True Man’s Decoction for Nourishing the Organs)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Chronic diarrhea or dysentery due to deficiency and cold of the Spleen and Kidney	<ul style="list-style-type: none">• Uncontrollable bowel movement as diarrhea or dysentery: deficiency and cold of the Spleen and the Kidney unable to ascend qi• Abdominal pain that is minimized with pressure and warmth: deficiency and cold of the Spleen and the Kidney• Red [blood] or white [pus or mucus] dysentery and rectal tenesmus: disharmony of qi and blood	<ul style="list-style-type: none">• Binds the intestines and stops diarrhea and dysentery• Warms and tonifies the Spleen and Kidney	<ul style="list-style-type: none">• <i>Ying Su Ke</i> (Pericarpium Papaveris) binds the intestines to relieve diarrhea or dysentery.• <i>Rou Dou Kou</i> (Semen Myristicae) and <i>He Zi</i> (Fructus Chebulae) bind the Intestines and stop diarrhea.• <i>Rou Gui</i> (Cortex Cinnamomi) warms the Spleen and the Kidney to raise the yang.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) warm the Spleen and tonify qi.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Bai Shao</i> (Radix Paeoniae Alba) nourish the yin and the blood.• <i>Mu Xiang</i> (Radix Aucklandiae) regulates qi and relieves pain.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs in this formula.

In general, diarrhea or dysentery due to deficiency and cold of the Spleen and Kidney should be treated with warm herbs that tonify these organs. However, in the case of severe diarrhea and dysentery with uncontrollable bowel movement and rectal prolapse, use of astringent herbs is necessary to quickly treat the symptoms.

This formula contains *Ying Su Ke* (Pericarpium Papaveris) to bind the Intestines to quickly relieve diarrhea or dysentery. *Rou Dou Kou* (Semen Myristicae) binds the intestines and warms the Spleen and Kidney. *He Zi* (Fructus Chebulae) helps to bind the Intestines and stop diarrhea. *Rou Gui* (Cortex Cinnamomi) warms the Spleen and Kidney to raise the yang. *Ren Shen* (Radix et Rhizoma Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) are used to warm the Spleen and tonify qi. Since chronic dysentery may damage the yin and blood, *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba) are used to nourish the yin and blood. *Mu Xiang* (Radix Aucklandiae) is employed in this formula for two reasons: to offset the rich tonics from causing stagnation and to regulate qi and relieve pain. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs in this formula. Also, the combination of *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Bai Shao* (Radix Paeoniae Alba) has a good pain-relieving effect.

- MODIFICATIONS
- For rectal prolapse, add *Sheng Ma* (Rhizoma Cimicifugae) and *Huang Qi* (Radix Astragali); or *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).
 - With cold extremities and diarrhea with undigested food due to Spleen and Kidney yang deficiencies, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis); or combine with *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle).

- CAUTIONS / CONTRAINDICATIONS
- *Zhen Ren Yang Zang Tang* contains astringent herbs, and is contraindicated for dysentery in which heat and toxins still remain in the body.
 - This formula is designed for chronic diarrhea or dysentery with underlying deficiency and cold. It is inappropriate for acute cases of dysentery or diarrhea, which are often characterized by an excess condition.
 - Avoid consumption of alcohol, fish, and foods that are raw, cold, oily, or greasy while taking this formula.
 - Overdose or long-term usage of *Ying Su Ke* (Pericarpium Papaveris) may result in numerous side effects and adverse reactions, as this herb is potentially toxic and addictive.

Zhēn Rén Yǎng Zàng Tāng

(True Man's Decoction for Nourishing the Organs)

CLINICAL STUDIES AND RESEARCH

1. **Chronic colitis:** According to one study, the use of modified *Zhen Ren Yang Zang Tang* was associated with 95.92% effectiveness in treating chronic colitis in 49 patients (37 males and 12 females, between 17-58 years of age, with 1-28 years history of illness). The herbal treatment contained the following ingredients: *Huang Qi* (Radix Astragali) 12-15g, *Dang Shen* (Radix Codonopsis) 12-30g, dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 12-15g, *Dang Gui* (Radix Angelicae Sinensis) 9-12g, roasted *Rou Dou Kou* (Semen Myristicae) 9-15g, roasted *He Zi* (Fructus Chebulae) 9-15g, *Bai Shao* (Radix Paeoniae Alba) 9-15g, *Mu Xiang* (Radix Aucklandiae) 6-12g, *Rou Gui* (Cortex Cinnamomi) 3g [given in powder form], *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 6-9g, *Chi Shi Zhi* (Holloysitum Rubrum) 15-30g, *Yan Hu Suo* (Rhizoma Corydalis) 9-15g, and *Wu Mei* (Fructus Mume) 9-15g as the base formula. Modifications included the addition of *Gan Jiang* (Rhizoma Zingiberis) for cold in the Stomach with cold extremities; *Sha Ren* (Fructus Amomi) and *Hou Po* (Cortex Magnoliae Officinalis) for poor appetite with abdominal distention; charred *Di Yu* (Radix Sanguisorbae) for yang deficiency with hematochezia; *Yin Yang Huo* (Herba Epimedii), *Du Zhong* (Cortex Eucommiae) and *Bu Gu Zhi* (Fructus Psoraleae) for Spleen and Kidney yang deficiencies; and *Er Cha* (Catechu) for ulceration of the intestinal mucous membrane. The treatment protocol was to administer the herbs in decoction one time per day, for 30 days per course of treatment. Patients were instructed to avoid all other medications (herbs and drugs) and refrain from eating greasy or oily foods. Of 49 patients, the study reported complete recovery in 29 cases, significant improvement in 10 cases, improvement in 8 cases, and no effect in 2 cases.¹
2. **Chronic dysentery and rectal prolapse:** One study reported good results using modified *Zhen Ren Yang Zang Tang* to treat chronic dysentery and/or prolapsed rectum in 162 patients (108 with chronic dysentery and 54 with prolapse rectum). The herbal treatment contained *Ren Shen* (Radix et Rhizoma Ginseng) 5-20g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 5-20g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 3-15g, *Rou Dou Kou* (Semen Myristicae) 5-30g, *Rou Gui* (Cortex Cinnamomi) 3-15g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 5-30g, *He Zi* (Fructus Chebulae) 5-30g, *Ying Su Ke* (Pericarpium Papaveris) 5-25g, *Bai Shao* (Radix Paeoniae Alba) 5-20g, *Dang Gui* (Radix Angelicae Sinensis) 5-10g, and *Mu Xiang* (Radix Aucklandiae) 3-10g. Furthermore, *Chi Shi Zhi* (Holloysitum Rubrum) 10-30g

was added for those with chronic dysentery, and processed *Huang Qi* (Radix Astragali) was added for rectal prolapse. In addition, those with rectal prolapse were also treated with topical soaking of an herbal solution made from *Shi Liu Pi* (Pericarpium Granati), *Bai Fan* (Alumen) and *Wu Bei Zi* (Galla Chinensis). The treatment protocol was to cook the herbs and administer the decoction in three equally-divided doses daily, for 20 days per course of treatment, for up to 3 courses total. The study reported 91.7% effectiveness for treatment of chronic dysentery, and 87% for rectal prolapse.²

3. **Diarrhea:** Administration of modified *Zhen Ren Yang Zang Tang* was associated with good results in treating 78 patients with recurrent diarrhea and diabetes mellitus. The herbal treatment contained herbs such as *Ren Shen* (Radix et Rhizoma Ginseng) 5g [or *Dang Shen* (Radix Codonopsis) 30g], dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 12g, *Rou Gui* (Cortex Cinnamomi) 12g, *Bai Shao* (Radix Paeoniae Alba) 12g, *Rou Dou Kou* (Semen Myristicae) 15g, *He Zi* (Fructus Chebulae) 15g, *Ying Su Ke* (Pericarpium Papaveris) 6g, *Mu Xiang* (Radix Aucklandiae) 6g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 5g, and others as needed. For severe cold, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 12g and *Gan Jiang* (Rhizoma Zingiberis) 10g were added. For diarrhea with clear watery stools, 5 a.m. diarrhea, or abdominal pain with preference of pressure, *Ba Ji Tian* (Radix Morindae Officinalis) 15g and *Bu Gu Zhi* (Fructus Psoraleae) 15g were added. For chronic diarrhea with stabbing pain in the abdomen with dark colored tongue with spots, *Wu Ling Zhi* (Faeces Troglodyteris) 12g, *Pu Huang* (Pollen Typhae) 12g, and *Xi Xin* (Radix et Rhizoma Asari) 6g were added. The herbs were cooked in 800 mL of water, and the decoction was given for 5 days per course of treatment. Of 78 patients, the study reported complete control of bowel movement in 61 cases, improvement in 14 cases, and no effect in 3 cases. The overall rate of effectiveness was 96.2%.³

AUTHORS' COMMENTS

Zhen Ren Yang Zang Tang, *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction), *Shao Yao Tang* (Peony Decoction) and *Bai Tou Weng Tang* (Pulsatilla Decoction) all treat diarrhea, but have different functions and indications.

- *Zhen Ren Yang Zang Tang* warms and tonifies the Spleen and Kidney to bind the Intestines to stop diarrhea. From a biomedical perspective, this formula is most effective for diarrhea due to inflammatory bowel condition, such as chronic colitis and enteritis.

Zhēn Rén Yǎng Zàng Tāng

(True Man’s Decoction for Nourishing the Organs)

- *Ge Gen Huang Qin Huang Lian Tang* treats damp-heat accumulation in the Intestines, which manifests in burning diarrhea, rectal tenesmus, and heat sensation. From a biomedical perspective, this formula is most effective for diarrhea due to various gastrointestinal infections.
- *Shao Yao Tang* regulates qi and blood, clears heat, and eliminates toxins to treat damp-heat accumulation and qi stagnation in the Intestines, causing abdominal pain, bloody stools with mucus, and rectal tenesmus. From a biomedical perspective, this formula is most effective for diarrhea due to various gastrointestinal infections.
- *Bai Tou Weng Tang* clears heat and eliminates toxins to treat toxic heat invading the *xue* (blood) level leading

to bloody diarrhea. From a biomedical perspective, this formula is most effective for diarrhea due to amoebic infection.⁴

Sì Shén Wán (Four-Miracle Pill)

四神丸

Pinyin Name: *Si Shen Wan*
Literal Name: Four-Miracle Pill
Original Source: *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) by Wang Ken-Tang in 1602

COMPOSITION

<i>Bu Gu Zhi</i> (Fructus Psoraleae)	120g [12g]
<i>Rou Dou Kou</i> (Semen Myristicae)	60g [6g]
<i>Wu Zhu Yu</i> (Fructus Evodiae), <i>jin</i> (soaked) and <i>chao</i> (dry-fried)	30g [3g]
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	60g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook 100 pieces of *Da Zao* (Fructus Jujubae) with 240g of *Sheng Jiang* (Rhizoma Zingiberis Recens). Remove *Sheng Jiang* (Rhizoma Zingiberis Recens) and discard the seeds of *Da Zao* (Fructus Jujubae), and save the fruit. Separately grind the ingredients into powder. Blend the fruit of *Da Zao* (Fructus Jujubae) and the powder of ingredients to form small pills. The source text recommends to take 50-70 pills with water before meal or on an empty stomach. Today, this formula is usually prepared and administered in pills. Take 6-9g of pills once or twice daily. This formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Warms and tonifies the Spleen and Kidney
2. Binds the Intestines and stops diarrhea

CLINICAL MANIFESTATIONS

Deficiency and cold of the Spleen and Kidney: early morning diarrhea at around 5 a.m., chronic diarrhea, loss of appetite, soreness of the lower back, abdominal pain, cold limbs, lack of energy, and fatigue.

CLINICAL APPLICATIONS

Diarrhea, colitis with diarrhea, chronic colitis, dysentery, intestinal tuberculosis, constipation, enuresis, and spermatorrhea.

EXPLANATION

Si Shen Wan (Four-Miracle Pill) is particularly famous for treating early morning diarrhea at around 5 a.m. Early morning diarrhea is due to failure of the yang qi to ascend in the early morning. Soreness of the lower back indicates Kidney yang deficiency. Fatigue and loss of appetite

Sì Shén Wán (Four-Miracle Pill)

Si Shen Wan (Four-Miracle Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency and cold of the Spleen and Kidney	<ul style="list-style-type: none"> • Early morning diarrhea: failure of the yang qi to ascend in the early morning • Soreness of the lower back: Kidney yang deficiency • Fatigue and loss of appetite: Spleen yang deficiency • Abdominal pain and cold extremities: accumulation of cold 	<ul style="list-style-type: none"> • Warms and tonifies the Spleen and Kidney • Binds the Intestines and stops diarrhea 	<ul style="list-style-type: none"> • <i>Bu Gu Zhi</i> (Fructus Psoraleae) warms the Kidney and invigorates <i>ming men</i> (life gate) fire. • <i>Rou Dou Kou</i> (Semen Myristicae) warms the Spleen and the Kidney and binds the intestines to stop diarrhea. • <i>Wu Zhu Yu</i> (Fructus Evodiae) warms the Spleen and the Stomach to relieve pain. • <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) warms and binds the intestines to stop diarrhea. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) dispels cold and regulates water. • <i>Da Zao</i> (Fructus Jujubae) nourishes the Spleen and Stomach.

reflect Spleen yang deficiency. Abdominal pain and cold extremities are caused by accumulation of cold and inability of yang to warm the body.

Bu Gu Zhi (Fructus Psoraleae), the chief herb of this formula, warms the Kidney and invigorates *ming men* (life gate) fire. *Rou Dou Kou* (Semen Myristicae) warms the Spleen and Kidney and binds the intestines to stop diarrhea. *Wu Zhu Yu* (Fructus Evodiae) warms the Spleen and Stomach. It also disperses cold and relieves the abdominal pain. *Wu Wei Zi* (Fructus Schisandrae Chinensis) warms and binds the intestines. *Sheng Jiang* (Rhizoma Zingiberis Recens) dispels cold and regulates water. *Da Zao* (Fructus Jujubae) nourishes the Spleen and Stomach.

MODIFICATIONS

- For rectal prolapse, add *Huang Qi* (Radix Astragali) and *Sheng Ma* (Rhizoma Cimicifugae); or *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).
- For pain of the back and coldness of the limbs, add *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata); or *You Gui Wan* (Restore the Right [Kidney] Pill).
- With lower abdominal pain, add *Xiao Hui Xiang* (Fructus Foeniculi) and *Mu Xiang* (Radix Aucklandiae).

CAUTIONS / CONTRAINDICATIONS

- *Si Shen Wan* contains tonic and astringent herbs to treat chronic diarrhea and dysentery due to deficiency. It is contraindicated in diarrhea caused by damp-heat accumulation or food stagnation.
- Avoid raw and cold foods while taking this formula.

PHARMACOLOGICAL EFFECTS

Antidiarrheal: *Si Shen Wan* has been shown to have marked antidiarrheal effect according to many studies and reports. The mechanism of this antidiarrheal effect has been attributed to its action to inhibit the intestinal peristalsis.¹

CLINICAL STUDIES AND RESEARCH

1. **Diarrhea:** Many studies have shown *Si Shen Wan* to effectively treat diarrhea due to various reasons. One study reported complete recovery in 24 of 28 patients with 5 a.m. diarrhea when treated with *Si Shen Wan* plus *Pao Jiang* (Rhizoma Zingiberis Praeparatum), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Huang Qi* (Radix Astragali), *Fu Zi* (Radix Aconiti Lateralis Praeparata), and *Rou Gui* (Cortex Cinnamomi). The duration of treatment ranged from 12 to 36 packs of herbs.²
2. **Dysentery:** One study reported good results using *Si Shen Wan* plus *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea) to treat dysentery characterized by Liver stagnation and Spleen deficiency. Clinical presentations included abdominal pain, hematochezia, rectal tenesmus, absence of fever and thirst, fatigue, aversion to cold, poor appetite, sallow facial appearance, emaciated complexion, white tongue coating, and a deep, fine pulse. The herbal formula contained *Bu Gu Zhi* (Fructus Psoraleae), *Wu Zhu Yu* (Fructus Evodiae), roasted *Rou Dou Kou* (Semen Myristicae), *Chen Pi* (Pericarpium Citri Reticulatae), *Fang Feng* (Radix Saposhnikoviae), *Mu Xiang* (Radix Aucklandiae), *Bai Shao* (Radix Paeoniae Alba), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Huang Lian* (Rhizoma Coptidis), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Wu Wei Zi* (Fructus Schisandrae).

Sì Shén Wán (Four-Miracle Pill)

Chinensis). The study reported complete recovery in all 14 patients.³

3. **Irritable bowel syndrome:** One study reported a 93% success rate using *Sì Shén Wán* and *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder) to treat alternation of diarrhea and constipation with abdominal pain in 30 patients with irritable bowel syndrome.⁴
4. **Colitis:** One study of colitis associated with diarrhea reported satisfactory results using modified *Sì Shén Wán*. Patients were divided into early, middle and late stage of colitis with diarrhea. The formula for early stage contained *Wu Zhu Yu* (Fructus Evodiae) 10g, *Bu Gu Zhi* (Fructus Psoraleae) 20g, *Wu Wei Zi* (Fructus Schisandrae Chinensis) 10g, *Pao Jiang* (Rhizoma Zingiberis Praeparatum) 5g, *Da Huang* (Radix et Rhizoma Rhei) 12g, *Hou Po* (Cortex Magnoliae Officinalis) 15g, and *Fu Zi* (Radix Aconiti Lateralis Praeparata) 10g. The formula for middle stage contained *Sì Shén Wán* plus *Huang Bo* (Cortex Phellodendri Chinensis) 12g, *Cang Zhu* (Rhizoma Atractylodis) 15g, and *Huang Lian* (Rhizoma Coptidis) 15g. The formula for late stage contained *Sì Shén Wán* plus *He Zi* (Fructus Chebulae) 12g and *Ying Su Ke* (Pericarpium Papaveris) 10g. The study reported 96.6% effectiveness among 100 patients.⁵
5. **Enuresis:** One study reported complete recovery in all 20 patients with enuresis when treated with *Sì Shén Wán* plus *Yi Zhi* (Fructus Alpiniae Oxyphyllae). The duration of treatment ranged from 1 to 4 packs of herbs, with an average of 2 to 3 packs. No recurrence was reported in all 20 patients during follow up interview one year later.⁶
6. **Seminal emission:** One study reported marked improvement using modified *Sì Shén Wán* to treat all 15 patients with seminal emission characterized by Spleen and Kidney yang deficiencies. Clinical presentations include pale face, fatigue, lack of energy, dizziness, tinnitus, soreness and weakness of the lower back and knees, frequent seminal emission, white and greasy tongue coating, and a deep, weak pulse. The herbal treatment contained *Rou Dou Kou* (Semen Myristicae) 12g, *Wu Wei Zi* (Fructus Schisandrae Chinensis) 12g, *Bu Gu Zhi* (Fructus Psoraleae) 30g, *Da Zao* (Fructus Jujubae) 30g, *Shan Zhu Yu* (Fructus Corni) 30g, *Wu Zhu Yu* (Fructus Evodiae) 6g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 10g, and *Bai Shao* (Radix Paeoniae Alba) 24g. The duration of treatment was 15 packs of herbs.⁷
7. **Constipation:** One study reported marked effect using *Sì Shén Wán* plus *Hua Jiao* (Pericarpium Zanthoxyli) and *Liu Huang* (Sulfur) to treat constipation characterized by deficiency and cold. Of 62 patients, the study reported complete recovery in 18 cases, marked improvement in 32 cases, and no effect in 12 cases.⁸

AUTHORS' COMMENTS

Sì Shén Wán is literally known as “Four-Miracle Pill” because the four herbs in the formula readily and miraculously treat early morning diarrhea due to Kidney yang deficiency.

Zhen Ren Yang Zang Tang (True Man's Decoction for Nourishing the Organs) and *Sì Shén Wán* are warm astringent formulas that stop diarrhea and dysentery due to deficiency and cold of the Spleen and Kidney.

- *Zhen Ren Yang Zang Tang* has a stronger astringent effect to stop diarrhea and dysentery. The formula contains qi and blood tonics to address the underlying qi and blood deficiencies. It has excellent effect to treat uncontrollable bowel movement throughout the day and night.
- *Sì Shén Wán* has a more potent function to warm and tonify the deficiency and cold of the Spleen and Kidney. This formula is more effective to treat early morning diarrhea with undigested food.⁹

Sì Shén Wán, *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), and *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea) all bind the Intestines and treat diarrhea.

- *Sì Shén Wán* warms and tonifies Spleen and Kidney yang to stop chronic diarrhea. It is designed for severe diarrhea that occurs in the early morning, characterized by watery diarrhea that contains undigested food.
- *Shen Ling Bai Zhu San* is for Spleen qi deficiency diarrhea with damp accumulation, accompanied by fatigue, weakness of the limbs, and poor appetite.
- *Tong Xie Yao Fang* tonifies the Spleen and spreads Liver qi. This formula stops stress-related diarrhea. Patients will often complain of gas, bloating, or abdominal pain that is relieved with diarrhea.¹⁰

Táo Huā Tāng (Peach Blossom Decoction)

桃花湯

桃花汤

Pinyin Name: *Tao Hua Tang*

Literal Name: Peach Blossom Decoction

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing during the Eastern Han Dynasty

COMPOSITION

Chi Shi Zhi (Haloysitum Rubrum)

48g [30g]

Gan Jiang (Rhizoma Zingiberis)

3g [9g]

Geng Mi (Semen Oryzae)

1 cup [30g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook *Gan Jiang* (Rhizoma Zingiberis), *Geng Mi* (Semen Oryzae), and half of the amount of *Chi Shi Zhi* (Haloysitum Rubrum) in 7 cups [1,400 mL] of water until *Geng Mi* (Semen Oryzae) is well cooked. Take the warm, strained decoction with 1 spoonful [1g] of powdered *Chi Shi Zhi* (Haloysitum Rubrum) three times daily. Discontinue this formula when the desired effect is achieved. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Warms up the middle *jiao* and binds the Intestines

CLINICAL MANIFESTATIONS

Diarrhea or dysentery due to deficiency and cold of the middle *jiao*: chronic diarrhea or dysentery with dark blood and pus in the stools, dysuria, abdominal pain that is alleviated by pressure and warmth, pale tongue, white tongue coating, and a fine, slow and weak pulse.

CLINICAL APPLICATIONS

Bacterial dysentery, amoebic dysentery, enteritis, chronic colitis, and diarrhea.

EXPLANATION

Tao Hua Tang (Peach Blossom Decoction) is originally presented in *Shang Han Lun* (Discussion of Cold-Induced Disorders) for treating *shaoyin* disorder where there is diarrhea with the presence of pus and dark blood in the stools. More specifically, the chronic diarrhea here is due to deficiency and cold of the middle *jiao* and dysfunction of the Intestines. Consequently, there is pus and blood in the stools, and abdominal pain that is relieved by pressure and warmth.

Chi Shi Zhi (Haloysitum Rubrum), the chief substance of this formula, has a warm and astringent nature to bind the Intestines, relieve diarrhea, and prevent rectal prolapse. *Gan Jiang* (Rhizoma Zingiberis) warms the middle *jiao* and dispels interior cold. *Geng Mi* (Semen Oryzae) nourishes the Stomach and harmonizes the middle *jiao*. This formula is effective in treating chronic diarrhea due to deficiency and cold of the middle *jiao*.

MODIFICATIONS

- For yang deficiency with excess cold, add *Ren Shen* (Radix et Rhizoma Ginseng), *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle); or *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle).
- For severe abdominal pain, add *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba).
- With *chang feng* (intestinal wind) and blood in the stools, substitute *Gan Jiang* (Rhizoma Zingiberis) with *Pao Jiang* (Rhizoma Zingiberis Praeparatum).

CAUTIONS / CONTRAINDICATIONS

Tao Hua Tang contains astringent herbs to treat chronic diarrhea and dysentery due to deficiency. It is contraindicated in diarrhea and dysentery caused by damp-heat accumulation.

CLINICAL STUDIES AND RESEARCH

1. **Bacterial dysentery:** Use of modified *Tao Hua Tang* was shown in many studies to effectively stop diarrhea in patients with bacterial dysentery.¹ One study used *Tao Hua Tang* plus *Ren Shen* (Radix et Rhizoma Ginseng) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) to treat bacterial dysentery characterized by the presence of pus and blood in the stools, abdominal pain that diminishes with pressure, absence of thirst, pale tongue with white tongue coating, and a deep, forceless pulse.² Another

Táo Huā Tāng (Peach Blossom Decoction)

Tao Hua Tang (Peach Blossom Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Diarrhea or dysentery due to deficiency and cold of the middle <i>jiao</i>	<ul style="list-style-type: none">• Diarrhea with pus and dark blood in the stools: deficiency and cold of the middle <i>jiao</i>• Abdominal pain that decreases with pressure and warmth: presence of deficiency and cold	Warms up the middle <i>jiao</i> and binds the Intestines	<ul style="list-style-type: none">• <i>Chi Shi Zhi</i> (Halloysitum Rubrum) warms and binds the Intestines to relieve diarrhea.• <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the middle <i>jiao</i> and dispels the interior cold.• <i>Geng Mi</i> (Semen Oryzae) nourishes the Stomach and harmonizes the middle <i>jiao</i>.

study used *Tao Hua Tang* to treat chronic bacterial dysentery with 5 to 7 bowel movements daily, rectal tenesmus, poor appetite, fatigue, pale tongue with white, greasy tongue coating, and a slow pulse.³

2. **Diarrhea:** According to one study, administration of *Tao Hua Tang* to stop diarrhea, and *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum) to consolidate the constitution, was effective in the treatment and management of diarrhea characterized by deficiency and cold.⁴

RELATED FORMULA

Chi Shi Zhi Yu Yu Liang Tang
(Halloysitum and Limonite Decoction)

赤石脂禹餘糧湯
赤石脂禹余粮汤

Pinyin Name: *Chi Shi Zhi Yu Yu Liang Tang*

Literal Name: Halloysitum and Limonite Decoction

Alternate Name: *Chi Shi Zhi Yu Liang Shi Tang*

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing during the Eastern Han Dynasty

Chi Shi Zhi (Halloysitum Rubrum),
 fen sui (pulverized) 48g [30g]
Yu Yu Liang (Limonitum), *fen sui* (pulverized) 48g [30g]

The source text states to cook the ingredients in 6 cups [1,200 mL] of water until it is reduced to 2 cups (400 mL). Take the warm, strained decoction in three equally-divided doses. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

The main actions of this formula are to bind the Intestines and stop diarrhea. Clinically, the patient may have chronic diarrhea with uncontrollable bowel movements. The interior-warming action of *Chi Shi Zhi Yu Yu Liang Tang* (Halloysitum and Limonite Decoction) is not as strong as *Tao Hua Tang*; however, since the astringent action of this formula is quite strong, it can be used as a short-term symptomatic treatment to quickly stop diarrhea.

AUTHORS’ COMMENTS

Tao Hua Tang is literally named “Peach Blossom Decoction” to describe the appearance of this formula. The color of its principle ingredient, *Chi Shi Zhi* (Halloysitum Rubrum), is crimson, and the color of *Geng Mi* (Semen Oryzae) is white. The combination of these two colors results in the peach color, hence the name Peach Blossom.

Chi Shi Zhi (Halloysitum Rubrum) is a mineral substance that is poorly soluble in water, and its effect is limited when used in decoction. Therefore, the source text specifically states to cook half the amount of *Chi Shi Zhi* (Halloysitum Rubrum) in decoction, and take an additional amount in powder form with the decoction, to ensure therapeutic effectiveness.

涩精止遗剂

— Jīng (Essence)-Stabilizing Formulas to Stop Leakage

Jīn Suǒ Gù Jīng Wán (Metal Lock Pill to Stabilize the Essence)

金鎖固精丸

金锁固精丸

Pinyin Name: *Jin Suo Gu Jing Wan***Literal Name:** Metal Lock Pill to Stabilize the Essence**Alternate Names:** *Chin Suo Ku Ching Wan*, Golden Lock Essence-Securing Pill, Golden Lock Pill for Consolidating the Essence, Lotus Stamen Formula**Original Source:** *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682**COMPOSITION**

<i>Sha Yuan Zi</i> (Semen Astragali Complanati), <i>chao</i> (dry-fried)	60g [12g]
<i>Qian Shi</i> (Semen Euryales), <i>zheng</i> (steamed)	60g [12g]
<i>Lian Xu</i> (Stamen Nelumbinis)	60g [12g]
<i>Long Gu</i> (Os Draconis), <i>zhi</i> (fried with liquid) till crisp	30g [10g]
<i>Mu Li</i> (Concha Ostreae), <i>zhu</i> (boiled) in lightly salted water for 24 hours and <i>duan</i> (calcined) into powder	30g [10g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder and form into pills with powdered *Lian Zi* (Semen Nelumbinis). Take the pills with salted water. Today this formula may be given in pills or decoction. For pills, take 9g per dose once or twice daily with water or lightly salted water. For decoction, use the suggested doses in brackets.

CHINESE THERAPEUTIC ACTIONS

Tonifies the Kidney and stabilizes the *jing* (essence)

CLINICAL MANIFESTATIONS

Seminal emission and/or spermatorrhea due to Kidney deficiency: seminal emission, spermatorrhea, urinary incontinence, frequent urination, lack of energy, weak knees, soreness and weakness of the legs, lower back pain, and tinnitus.

CLINICAL APPLICATIONS

Spermatorrhea, nocturnal emission, sexual dysfunction, enuresis, nocturia, diarrhea, and myasthenia gravis.

EXPLANATION

Jin Suo Gu Jing Wan (Metal Lock Pill to Stabilize the Essence) is designed to treat spermatorrhea and/or nocturnal emission due to Kidney deficiency. Kidney is the organ that stores *jing* (essence). If the Kidney is deficient, then the *jing* may become unstable and leak out of the body, resulting in seminal emission and/or spermatorrhea. In addition to Kidney *jing* deficiency, Kidney yin and yang may be deficient as well, leading to the following clinical manifestations: lack of energy, weak knees, sore back, and tinnitus.

Sha Yuan Zi (Semen Astragali Complanati), the chief herb of this formula, is used to tonify the Kidney and stabilize *jing* (essence). *Lian Zi* (Semen Nelumbinis) and *Qian Shi* (Semen Euryales) help the chief herb tonify the Kidney and stabilize *jing*. *Lian Xu* (Stamen Nelumbinis), prepared *Long Gu* (Os Draconis), and calcined *Mu Li* (Concha Ostreae) are used mainly to stabilize the leaking *jing*.

Since this formula concentrates on consolidating the *jing* (essence), it may be used to temporarily stop the leaking symptoms of seminal emission or spermatorrhea. However, it lacks strength in tonifying the Kidney; hence, once the

Jin Suǒ Gù Jīng Wán (Metal Lock Pill to Stabilize the Essence)

Jin Suo Gu Jing Wan (Metal Lock Pill to Stabilize the Essence)

Seminal emission and/or spermatorrhea due to Kidney deficiency	<ul style="list-style-type: none"> • Seminal emission and/or spermatorrhea: loss of <i>jing</i> (essence) due to Kidney deficiency • Soreness and weakness of the knees and legs, lower back pain and tinnitus: Kidney yin and yang deficiencies 	Tonifies the Kidney and stabilizes the <i>jing</i>	<ul style="list-style-type: none"> • <i>Sha Yuan Zi</i> (Semen Astragali Complanati) tonifies the Kidney and stabilize the <i>jing</i>. • <i>Lian Zi</i> (Semen Nelumbinis) and <i>Qian Shi</i> (Semen Euryales) tonify the Kidney and stabilize the <i>jing</i>. • <i>Lian Xu</i> (Stamen Nelumbinis), <i>Long Gu</i> (Os Draconis) and <i>Mu Li</i> (Concha Ostreae) stabilize and stop the leaking <i>jing</i>.

spermatorrhea and/or seminal emission is/are stopped, more Kidney-tonic herbs should be used.

MODIFICATIONS

- For severe spermatorrhea or nocturnal emission, add *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With Kidney yang deficiency, add *Bu Gu Zhi* (Fructus Psoraleae), *Rou Cong Rong* (Herba Cistanches), and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With Kidney yin deficiency, add *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).
- With yin-deficient fire, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis).
- With irritability and insomnia, add *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Bai Zi Ren* (Semen Platycladi).
- With irritability and thirst from yin deficiency, add *Mai Dong* (Radix Ophiopogonis) and *Ren Shen* (Radix et Rhizoma Ginseng).
- With cold signs and/or symptoms, add *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With dry stools, add *Rou Cong Rong* (Herba Cistanches) and *Dang Gui* (Radix Angelicae Sinensis).
- With loose stools, add *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Bu Gu Zhi* (Fructus Psoraleae).
- With soreness and pain of the back, add *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci); or *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction).
- With impotence, add *Yin Yang Huo* (Herba Epimedii) and *Suo Yang* (Herba Cynomorii); or *Huan Shao Dan* (Return to Youth Pill).
- With leukorrhea, add *Fu Ling* (Poria) and *Yi Yi Ren* (Semen Coicis).
- With white, cloudy discharge, add *Sang Piao Xiao* (Ootheca Mantidis) and *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae).

CAUTIONS / CONTRAINDICATIONS

Jin Suo Gu Jing Wan contains many astringent herbs, and is therefore contraindicated in seminal emission and/or spermatorrhea due to Heart fire, Liver fire, Kidney yin-deficient fire, or damp-heat in the lower *jiao*.

CLINICAL STUDIES AND RESEARCH

1. **Spermatorrhea:** According to one report, *Jin Suo Gu Jing Wan* was used with good results to treat one patient with a three-year history of severe spermatorrhea accompanied by night perspiration, fatigue, sore lower back, low libido, impotence, premature ejaculation, and nocturnal emission. The treatment protocol was to administer 15 pills of *Jin Suo Gu Jing Wan* three times daily for one month.¹
2. **Diarrhea:** One report stated that *Jin Suo Gu Jing Wan* can effectively treat diarrhea associated with chronic enteritis characterized by Spleen and Kidney deficiencies.²
3. **Myasthenia gravis:** One study reported marked success using *Jin Suo Gu Jing Wan* to treat one person with myasthenia gravis. Clinical manifestations included drooping eyelids, fatigue, lack of power in all four limbs, difficulty with chewing, shortness of breath, insomnia, spermatorrhea, low back pain, feeling of coldness in the legs, and red tongue with scanty tongue coating. The treatment protocol was to administer 12 grams of *Jin Suo Gu Jing Wan* three times daily with lightly salted water. Improvement was noted after two weeks of herbal therapy.³

RELATED FORMULA

Shuǐ Lù Èr Xiān Dān

(Water and Earth Two Immortals Special Pill)

水陸二仙丹

水陆二仙丹

Pinyin Name: Shui Lu Er Xian Dan

Literal Name: Water and Earth Two Immortals Special Pill

Original Source: *Hong Shi Ji Yan Fang* (Time-Tested Formulas of the Hong Family)

Jīn Suǒ Gù Jīng Wán (Metal Lock Pill to Stabilize the Essence)

Qian Shi (Semen Euryales) [12g]
Jin Ying Zi (Fructus Rosae Laevigatae) [12g]

The source text states to use equal amounts of these two ingredients. Simmer *Jin Ying Zi* (Fructus Rosae Laevigatae) in low heat and condense it into paste. Separately grind *Qian Shi* (Semen Euryales) into fine powder. Mix the paste of *Jin Ying Zi* (Fructus Rosae Laevigatae) and the powder of *Qian Shi* (Semen Euryales) together to form pills. Take 9g of pills twice daily before meals with warm grain-based liquor or lightly salted water. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

The main actions of this formula are to tonify the Kidney and consolidate *jing* (essence). Clinically, it may be used for seminal emission in men, and leukorrhea of persistent, clear and thin discharge in women.

Shui Lu Er Xian Dan (Water and Earth Two Immortals Special Pill) has similar, but weaker astringent and tonic effects, when compared with *Jin Suo Gu Jing Wan*.

AUTHORS' COMMENTS

Jin Suo Gu Jing Wan is one of the most commonly used formulas for treating seminal emission and spermatorrhea. Other key signs include tinnitus, soreness and weakness of the back and knees. It can also be used for seminal emission and spermatorrhea caused by neurasthenia or chronic prostatitis.

COMPOSITION

Jin Suo Gu Jing Wan (Metal Lock Pill to Stabilize the Essence)

Liu Wei Di Huang Wan (Six-Ingredient Pill with Rehmannia)

DOSAGE / PREPARATION / ADMINISTRATION

This formula is taken before meals with warm water or lightly-salted water.

CLINICAL APPLICATIONS

Seminal emission and/or spermatorrhea due to mental and physical exhaustion.

CHINESE THERAPEUTIC ACTIONS

1. Stabilizes *jing* (essence) and stops leakage of sperm
2. Tonifies the Kidney and replenishes the *jing* (essence)

CLINICAL MANIFESTATIONS

Seminal emission and/or spermatorrhea due to Kidney deficiency; seminal emission and/or spermatorrhea in individuals who are mentally and physically drained, possibly with neurasthenia.

EXPLANATION

Liu Wei Gu Jing Wan (Rehmannia Six and Lotus Stamen Pill) is made by combining *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence) with *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia). The purpose of *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence) is to address the symptoms, which is seminal emission and/or spermatorrhea; and the purpose of *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) is to address the cause, which is Liver and Kidney yin

Liù Wèi Gù Jīng Wán (Rehmannia Six and Lotus Stamen Pill)

deficiencies. The combination of these two formulas offers both immediate and long-term benefits as both the cause and the symptoms are addressed simultaneously.

For additional and detailed information, please refer to *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence) and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder and take 6g at bedtime with a decoction made from *Ren Shen* (Radix et Rhizoma Ginseng). Today, this formula is usually taken [6g at bedtime] with a decoction made from *Dang Shen* (Radix Codonopsis). This formula may also be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- Regulates and tonifies the Heart and Kidney
- Stabilizes *jing* (essence) and stops seminal emission

CLINICAL MANIFESTATIONS

Heart and Kidney deficiencies: frequent urination, cloudy urine that resembles rice water, seminal emission, enuresis, trance, forgetfulness and poor appetite.

Sāng Piāo Xiǎo Sǎn (Mantis Egg-Case Powder)

CLINICAL APPLICATIONS

Chronic nephritis, cystitis, frequent urination, enuresis, seminal emission, diabetes mellitus, neurasthenia, and constipation.

EXPLANATION

Sang Piao Xiao San (Mantis Egg-Case Powder) is designed to treat the various clinical manifestations caused by Heart and Kidney deficiencies. According to five element theory, the Kidney belongs to the water element and the Heart belongs to the fire element. If the Kidney (water) and the Heart (fire) cannot exist in harmony, then both organs may exhaust themselves. Kidney deficiency would lead to leaking of *jing* (essence), and resulting in seminal emission. Since the Kidney has an important function in regulating urination, deficiency of the Kidney would lead to enuresis and frequent urination. Finally, deficiency of the Heart may cause instability of the *shen* (spirit), leading to trance and forgetfulness.

To effectively treat this syndrome, the Heart and Kidney should be tonified and their harmonious relationship be restored. *Sang Piao Xiao* (Ootheca Mantidis), the chief substance of this formula, tonifies the Kidney, nourishes *jing* (essence), and stops seminal emission. *Long Gu* (Os Draconis) calms the *shen* (spirit) and stabilizes *jing*. *Gui Ban* (Plastrum Testudinis) nourishes yin and tonifies the Heart and Kidney. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies *yuan* (source) *qi*, and *Dang Gui* (Radix Angelicae Sinensis) nourishes blood. *Yuan Zhi* (Radix Polygalae) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii) calm and anchor the *shen* to restore harmony between the Heart and Kidney. *Fu Shen* (Poria Paradicis) calms the *shen*.

MODIFICATIONS

- With generalized fatigue and deficiency, add *Huang Qi* (Radix Astragali).
- With more frequent urination, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With dense urine that feels sticky, add *Shan Yao* (Rhizoma Dioscoreae) and *Qian Shi* (Semen Euryales).
- For enuresis or urinary incontinence, add *Yi Zhi* (Fructus Alpiniae Oxyphyllae) and *Fu Pen Zi* (Fructus Rubi).
- With forgetfulness and inability to concentrate, add *Bai Zi Ren* (Semen Platycladi) and *Long Chi* (Dens Draconis).
- With insomnia and forgetfulness, add *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Suan Zao Ren* (Semen Ziziphi Spinosaes); or *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart).
- For spermatorrhea or seminal emission, add *Suo Yang* (Herba Cynomorii) and *Shan Zhu Yu* (Fructus Corni).
- For spermatorrhea with a weak pulse, add *Sha Yuan Zi* (Semen Astragali Complinati).
- With Kidney yang deficiency, add *Ba Ji Tian* (Radix Morindae Officinalis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With Liver and Kidney yin deficiencies, add *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

CAUTIONS / CONTRAINDICATIONS

Sang Piao Xiao San contains many tonic and astringent herbs to treat loss of *jing* (essence) and body fluids due to Heart and Kidney deficiencies. This formula is not suitable for treating seminal emission and frequent urination due to damp-heat in the lower *jiao*.

Sang Piao Xiao San (Mantis Egg-Case Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heart and Kidney deficiencies	<ul style="list-style-type: none"> • Enuresis and frequent urination with cloudy urine: Kidney deficiency unable to control urination • Seminal emission: leaking of <i>jing</i> (essence) due to Kidney deficiency • Trance and forgetfulness: Heart deficiency unable to nourish <i>shen</i> (spirit) 	<ul style="list-style-type: none"> • Regulates and tonifies the Heart and the Kidney • Stabilizes <i>jing</i> and stops seminal emission 	<ul style="list-style-type: none"> • <i>Sang Piao Xiao</i> (Ootheca Mantidis) tonifies the Kidney, nourishes the <i>jing</i> and stops seminal emission. • <i>Long Gu</i> (Os Draconis) calms the <i>shen</i> and stabilizes the <i>jing</i>. • <i>Gui Ban</i> (Plastrum Testudinis) nourishes yin and tonifies the Heart and Kidney. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Dang Gui</i> (Radix Angelicae Sinensis) tonify <i>qi</i> and blood. • <i>Yuan Zhi</i> (Radix Polygalae), <i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii) and <i>Fu Shen</i> (Poria Paradicis) calm the <i>shen</i> to restore harmony to the Heart and Kidney.

Sāng Piāo Xiāo Sǎn (Mantis Egg-Case Powder)

CLINICAL STUDIES AND RESEARCH

- 1. Frequent urination:** According to one study, administration of *Sang Piao Xiao San* in decoction was associated with good results in treating frequent urination in 51 children (between 3 to 6 years of age, with 2 to 20 days history of illness). The clinical presentations included frequent urination with dripping, clear urine, no feelings of pain during urination, pale tongue with thin, white coating, and a fine, weak pulse. Of 51 patients, the study reported recovery in 2 cases after 2 days, 4 cases after 3 days, 14 cases after 4 days, 21 cases after 5 days, 6 cases after 6 days, and 2 cases after 7 days. Information was unavailable on individuals who did not complete the study.¹
- 2. Enuresis:** One study reported satisfactory results using modified *Sang Piao Xiao San* to treat bedwetting in 56 children (between 4 to 14 years of age, with 3 months to 10 years of history). The herbal formula contained processed *Huang Qi* (Radix Astragali) 10g, dry-fried *Dang Shen* (Radix Codonopsis) 10g, *Sang Piao Xiao* (Ootheca Mantis) 15g, *Long Gu* (Os Draconis) 10g, dry-fried *Sheng Ma* (Rhizoma Cimicifugae) 10g, *Yi Zhi* (Fructus Alpiniae Oxyphyllae) 10g, and *Shan Yao* (Rhizoma Dioscoreae) 10g. The treatment protocol was to administer the herbs in decoction daily, for 10 days per course of treatment. The duration of treatment ranged from 7 to 23 days, with an average of 3 weeks. Of 56 children, the study reported complete recovery in 34 cases (no bedwetting for 3 months), significant improvement in 20 cases (reduced frequency of bedwetting within 3 months) and no effect in 2 cases. The overall effectiveness was 96.5%.²
- 3. Constipation:** Use of *Sang Piao Xiao San* was associated with satisfactory results in treating constipation in 27 elderly patients (19 males and 8 females, between 56 to 86 years of age, with 10 months to 9 years history of illness). The clinical presentation included difficulty passing stools, with one bowel movement every 4 to 8 days. The herbal formula contained *Sang Piao Xiao* (Ootheca Mantis) 12g, *Long Gu* (Os Draconis) 21g, *Qian Shi* (Semen Euryales) 15g, *Dang Shen* (Radix Codonopsis) 10g, *Gui Ban* (Plastrum Testudinis) 10g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Shi Chang Pu* (Rhizoma Acori Tatarinowii) 10g, and *Yuan Zhi* (Radix Polygalae) 10g. Furthermore, modifications were made by adding *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and a larger dose of *Dang Shen* (Radix Codonopsis) for qi deficiency; *Bie Jia* (Carapax Trionycis) and a larger dose of *Gui Ban* (Plastrum Testudinis) for

yin deficiency; *E Jiao* (Colla Corii Asini) and a larger dose of *Dang Gui* (Radix Angelicae Sinensis) for blood deficiency; *Huang Bo* (Cortex Phellodendri Chinensis) and *Zhi Mu* (Rhizoma Anemarrhenae) for frequent and painful urination with dark color urination; and *Yi Zhi* (Fructus Alpiniae Oxyphyllae), *Jin Ying Zi* (Fructus Rosae Laevigatae) and larger doses of *Sang Piao Xiao* (Ootheca Mantis) and *Qian Shi* (Semen Euryales) for frequent urination with clear urine. The duration of treatment ranged from 7 to 25 days. Of 27 patients, the study reported complete recovery in 20 cases, improvement in 5 cases, and no effect in 2 cases.³

AUTHORS' COMMENTS

Sang Piao Xiao San is the representative formula for treating loss of *jing* (essence) and body fluids due to Heart and Kidney deficiencies. Key symptoms in choosing this formula include enuresis, frequent urges to urinate, forgetfulness and diminished mental acuity. This formula can also be used for urinary incontinence during pregnancy or bedwetting in children.

Jin Suo Gu Jing Wan (Metal Lock Pill to Stabilize the Essence) and *Sang Piao Xiao San* are both astringent formulas that consolidate the *jing* (essence) and stop spermatorrhea.

- *Jin Suo Gu Jing Wan* is stronger in astringing and treating the symptoms of spermatorrhea.
- *Sang Piao Xiao San* consolidates *jing* and tonifies the Kidney and Heart to treat spermatorrhea, forgetfulness, bedwetting, enuresis, and other signs of Heart and Kidney deficiencies.⁴

According to Dr. Chang Wei-Yen, *Sang Piao Xiao San* can be combined with *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart) to more effectively treat forgetfulness, bedwetting, enuresis, or seminal emission.

Suō Quán Wán (Shut the Sluice Pill)

縮泉丸

缩泉丸

Pinyin Name: *Suo Quan Wan*

Literal Name: Shut the Sluice Pill

Alternate Name: Shut the Sluice Formula

Original Source: *Fu Ren Liang Fang* (Fine Formulas for Women) by Chen Zi-Ming in 1237

COMPOSITION

Yi Zhi (Fructus Alpiniae Oxyphyllae)

[9g]

Wu Yao (Radix Linderae)

[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of *Yi Zhi* (Fructus Alpiniae Oxyphyllae) and *Wu Yao* (Radix Linderae) into powder. Separately cook powdered *Shan Yao* (Rhizoma Dioscoreae) [9-15g] with grain-based liquor until it becomes an herbal paste. Combine the powder and the paste to form pills. Take 70 pills per dose with salted grain-based liquor or rice soup. Today, this formula is usually administered by giving 6g of pills per dose once or twice a day with water. This formula may also be prepared as a decoction with the doses suggested in brackets.

jiao and disperses cold to restore the normal urinary functions of the Kidney and Urinary Bladder. *Shan Yao* (Rhizoma Dioscoreae) strengthens the Spleen and tonifies the Kidney to treat the underlying deficiency. It also stabilizes the *jing* (essence). These herbs are warm but not drying, and work to treat deficiency and cold and restore normal urination.

Even though *Suo Quan Wan* is effective, it is only mild to moderate in potency. In severe cases of frequent urination and enuresis, additional tonic and astringent herbs are called for to ensure adequate treatment.

CHINESE THERAPEUTIC ACTIONS

1. Warms the Kidney and dispels cold
2. Controls frequent urination and stops enuresis

CLINICAL MANIFESTATIONS

Frequent urination and enuresis due to deficiency and cold of the lower *jiao*: frequent and prolonged urination, dripping of urine after urination, clear urine; and enuresis in children.

CLINICAL APPLICATIONS

Frequent urination, urinary incontinence, enuresis, spermatorrhea, leukorrhea, and lumbago.

EXPLANATION

Suo Quan Wan (Shut the Sluice Pill) is designed to treat urinary disorders due to deficiency and cold of the lower *jiao*. The Kidney has functions of regulating urination and dispelling turbid water out of the body. If Kidney qi is deficient and cold starts to accumulate in the Urinary Bladder, then urinary disorders such as frequent urination and enuresis may occur.

In this formula, *Yi Zhi* (Fructus Alpiniae Oxyphyllae) warms the Kidney and Spleen to stop frequent urination and enuresis. *Wu Yao* (Radix Linderae) warms the lower

MODIFICATIONS

- For frequent urination, add *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Huang Qi* (Radix Astragali).
- For enuresis, add *Sang Piao Xiao* (Ootheca Mantidis), *Long Gu* (Os Draconis), and *Mu Li* (Concha Ostreae).

CAUTIONS / CONTRAINDICATIONS

Individuals who take *Suo Quan Wan* should avoid spicy and pungent foods.¹

PHARMACOLOGICAL EFFECTS

Antidiuretic: According to one study, use of *Suo Quan Wan* in healthy rats was associated with marked antidiuretic effect. Furthermore, there was a reduced concentration in the urine of sodium and chloride, but increased concentration of potassium.²

CLINICAL STUDIES AND RESEARCH

1. **Frequent urination:** *Suo Quan Wan* has been shown in many studies to effectively treat frequent urination in children. According to one study, administration of this formula in powder form was associated with 93.75% effectiveness. Of 32 children, the study reported complete recovery in 27 cases, improvement in 3 cases, and no effect in 2 cases.³ Another study also reported good results for treatment of frequent urination using *Suo*

Suō Quán Wán (Shut the Sluice Pill)

Suo Quan Wan (Shut the Sluice Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Frequent urination and enuresis	Frequent and prolonged urination, dripping of urine after urination, and enuresis: deficiency and cold of the lower <i>jiao</i>	<ul style="list-style-type: none"> • Warms up the Kidney and dispels cold • Controls frequent urination and stops enuresis 	<ul style="list-style-type: none"> • <i>Yi Zhi</i> (Fructus Alpiniae Oxyphyllae) tonifies and warms the Kidney to stop frequent urination and enuresis. • <i>Wu Yao</i> (Radix Linderae) warms the lower <i>jiao</i> and disperses cold to restore the normal urinary function of Kidney and the Urinary Bladder. • <i>Shan Yao</i> (Rhizoma Dioscoreae) strengthens the Spleen and tonifies the Kidney to treat the underlying deficiencies.

Quan Wan plus *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Huang Qi* (Radix Astragali) as the base formula.⁴

2. **Urinary incontinence:** The use of modified *Suo Quan Wan* was shown in one study to have good effect to treat urinary and bowel incontinence in post-stroke patients. The herbal treatment contained this formula plus *Sang Piao Xiao* (Ootheca Mantidis), *Shan Zhu Yu* (Fructus Corni), *Bu Gu Zhi* (Fructus Psoraleae), *Tu Si Zi* (Semen Cuscutae) and *Huang Qi* (Radix Astragali) as the base formula. Furthermore, *Rou Dou Kou* (Semen Myristicae), *Wu Zhu Yu* (Fructus Evodiae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) were added for bowel incontinence; *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Yu Jin* (Radix Curcumae), *Yuan Zhi* (Radix Polygalae) and *Dan Nan Xing* (Arisaema cum Bile) were added for speech difficulties; *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Di Long* (Pheretima), *Chi Shao* (Radix Paeoniae Rubra) and a larger dose of *Huang Qi* (Radix Astragali) for sallow facial appearance, fatigue, and weakness and paralysis of the extremities.⁵
3. **Enuresis:** According to one study, the use of *Suo Quan Wan* plus *Sang Piao Xiao* (Ootheca Mantidis), *Long Gu* (Os Draconis) and other herbs was associated with 95% effectiveness in treating 20 children with enuresis. Of 20 patients, 12 had complete recovery, 7 had improvement, and 1 had no effect.⁶

TOXICOLOGY

According to one toxicology study, administration of *Suo Quan Wan* at 10 g/kg, 15 g/kg and 20 g/kg daily

(proportionally 50, 75 and 100 times the normal dose in human adults) for 2 days did not cause any abnormal reactions within 7 days of the observation period.⁷

AUTHORS' COMMENTS

Sang Piao Xiao San (Mantis Egg-Case Powder) and *Suo Quan Wan* both treat frequent urination and enuresis.

- *Sang Piao Xiao San* tonifies but is not warm in property. It tonifies the Heart and Kidney to treat not only frequent urination and enuresis, but also seminal emission and forgetfulness.
- *Suo Quan Wan* warms the Kidney to treat frequent urination and enuresis due to deficiency and cold. This formula is warm but not drying and mild in effect. If the symptoms are severe, other herbs should be added to achieve maximum effect.⁸

Fú Tū Dān (Poria and Cuscuta Special Pill)

茯菟丹

Pinyin Name: *Fu Tu Dan*
Literat Name: Poria and Cuscuta Special Pill
Alternate Name: Hoelen and Cuscuta Formula
Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Fu Ling</i> (Poria)	150g
<i>Tu Si Zi</i> (Semen Cuscutae), <i>jin</i> (soaked) in liquor	300g
<i>Shi Lian Zi</i> (Herba Sinocrassulae Indicae)	90g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis), <i>jin</i> (soaked) in liquor	210g
<i>Shan Yao</i> (Rhizoma Dioscoreae), <i>zhu</i> (boiled) with liquor	180g

Note: There is one variation of this formula from the source text, which contains only three herbs: *Tu Si Zi* (Semen Cuscutae) 150g, *Fu Ling* (Poria) 90g, and *Shi Lian Zi* (Herba Sinocrassulae Indicae) 60g.

CLINICAL MANIFESTATIONS

Disharmony of the Heart and Kidney: spermatorrhea, premature ejaculation, white, turbid urine, increased volume of urine, thirst, increased food intake, and restlessness.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all the ingredients [except *Shan Yao* (Rhizoma Dioscoreae)] into powder. Separately cook 180g of powdered *Shan Yao* (Rhizoma Dioscoreae) in grain-based liquor and reduce it to a thick paste. Mix the powdered herbs and the paste to form into pills. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 30-50 pills per dose on an empty stomach with rice water or lightly-salted water.

CLINICAL APPLICATIONS

Spermatorrhea, premature ejaculation, leakage of seminal fluids, general sexual dysfunction, and diabetes mellitus.

EXPLANATION

Fu Tu Dan (Poria and Cuscuta Special Pill) specifically treats spermatorrhea or premature ejaculation due to disharmony of the Heart and Kidney. The fundamental illness is an underlying Kidney deficiency, which is characterized by symptoms such as spermatorrhea, premature ejaculation, white, turbid urine, and increased volume of urine. Kidney deficiency may give rise to deficiency fire, which travels upward to affect the Heart, resulting in restlessness and thirst.

In this formula, *Fu Ling* (Poria) strengthens the Spleen, drains dampness, and calms the *shen* (spirit). *Tu Si Zi* (Semen Cuscutae) tonifies the Kidney and stops the loss

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen and drains dampness
2. Tonifies the Kidney and stabilizes the *jing* (essence)
3. Benefits the Heart and calms the *shen* (spirit)

Fu Tu Dan (Poria and Cuscuta Special Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Fú Tū Dān (Poria and Cuscuta Special Pill)

of *jing* (essence) [spermatorrhea or premature ejaculation] and body fluids [increased volume of white, turbid urine]. *Shi Lian Zi* (Herba Sinocrassulae Indicae) clears the urine and relieves white, turbid urine. *Wu Wei Zi* (Fructus Schisandrae Chinensis) calms the Heart to relieve restlessness. *Shan Yao* (Rhizoma Dioscoreae) tonifies the Spleen and Kidney to address the underlying deficiencies.

MODIFICATIONS

- With more impotence and premature ejaculation, add *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).
- With polyuria and white, cloudy urine, add *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) and *Sang Piao Xiao* (Ootheca Mantidis).
- With generalized deficiency and coldness of the body and extremities, add *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With yin-deficient fire, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis).
- With increased thirst and hunger, add *Sha Shen* (Radix Glehniae seu Adenophorae) and *Mai Dong* (Radix Ophiopogonis).

Guì Zhī Jiā Lóng Gǔ Mǔ Lì Tāng

(Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell)

桂枝加龍骨牡蠣湯

桂枝加龙骨牡蛎汤

Pinyin Name: *Gui Zhi Jia Long Gu Mu Li Tang*

Literal Name: Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell

Alternate Names: *Gui Zhi Jia Long Mu Tang*, Cinnamon and Dragon Bone Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-jing during the Eastern Han Dynasty

COMPOSITION

<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Long Gu</i> (Os Draconis)	9g
<i>Mu Li</i> (Concha Ostreae)	9g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	9g
<i>Da Zao</i> (Fructus Jujubae)	12 pieces
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook all the ingredients in 7 cups [1,400 mL] of water until it is reduced down to 3 cups [600 mL]. Take the warm, strained decoction in three equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies yin and yang
2. Harmonizes the *ying* (nutritive) and *wei* (defensive) levels
3. Stabilizes *jing* (essence)

CLINICAL MANIFESTATIONS

Deficiency of yin and yang accompanied by disharmony of the *ying* (nutritive) and *wei* (defensive) levels: spermatorrhea (in men), dreams of sexual intercourse (in women), lower abdominal contraction and pain, cold sensation at the tip of the penis, premature hair loss, gradual decline in physical strength and condition, palpitations, and insomnia.

CLINICAL APPLICATIONS

Impotence, spermatorrhea, premature ejaculation, nocturnal emission and other male sexual disorders, neurosis, insomnia, forgetfulness, and enuresis.

Guì Zhī Jiā Lóng Gǔ Mǔ Lì Tāng

(Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell)

Gui Zhi Jia Long Gu Mu Li Tang (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency of the yin and yang accompanied by disharmony of the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels	<ul style="list-style-type: none"> Generalized weakness in physical strength and condition: yin and yang deficiencies Spontaneous sweating, night sweating and muscle aches: disharmony of the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels Lower abdominal contraction and pain, and cold sensation at the tip of penis: cold in the body 	<ul style="list-style-type: none"> Tonifies yin and yang Harmonizes <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels Stabilizes <i>jing</i> (essence) 	<ul style="list-style-type: none"> <i>Gui Zhi</i> (Ramulus Cinnamomi) and <i>Bai Shao</i> (Radix Paeoniae Alba) balance yin and yang, and harmonize <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels. <i>Long Gu</i> (Os Draconis) and <i>Mu Li</i> (Concha Ostreae) balance yin and yang from the interior, prevent the loss of <i>jing</i>, and calm down the <i>shen</i> (spirit). <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) warms up yang and dispels cold. <i>Da Zao</i> (Fructus Jujubae) tonifies the qi and replenishes body fluids. <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes all the herbs.

EXPLANATION

This formula is designed to treat patients who experience chronic and gradual decline in physical and sexual functions. The underlying cause of this condition is deficiency of yin and yang accompanied by disharmony of the *ying* (nutritive) and *wei* (defensive) levels. Deficiency of yin and yang is representative of aging, whereby the patients experience generalized weakness in physical strength and condition. Because yin and yang are deficient and out of balance, patients experience irregular fever, headache, and dizziness. Furthermore, disharmony of the *ying* (nutritive) and *wei* (defensive) levels is characterized by spontaneous sweating, night sweating, and muscle aches. Due to the chronic nature of the illness, cold begins to build up in the body as the patient experiences lower abdominal contraction and pain, and cold sensation at the tip of the penis. As the overall constitution of the body declines, other symptoms and signs of sexual dysfunction begin to appear, such as spermatorrhea, impotence, nocturnal emission, premature ejaculation in men, and dreams of sexual intercourse in women.

Gui Zhi Jia Long Gu Mu Li Tang (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell) is a modification of *Gui Zhi Tang* (Cinnamon Twig Decoction) with the addition of *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae). *Gui Zhi Tang* (Cinnamon Twig Decoction) is used as the base formula because it tonifies yin and yang, and harmonizes the *ying* (nutritive) and *wei* (defensive) levels. *Gui Zhi* (Ramulus Cinnamomi), sweet, pungent, and warm in property, tonifies yang and relieves body aches and pain. *Bai Shao* (Radix Paeoniae Alba), sour and

cold in nature, tonifies yin and consolidates body fluids. Together, *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba) harmonize *ying* (nutritive) and *wei* (defensive) levels. In addition to the pairing of *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba), which balances yin and yang from the exterior, *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) are added to balance yin and yang from the interior. *Long Gu* (Os Draconis) calms yang and prevents the loss of yang from the body; *Mu Li* (Concha Ostreae) preserves yin and restrains yang. Used together, *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) balance yin and yang from the interior, prevent the loss of *jing* (essence), and calm down the *shen* (spirit). Additionally, *Sheng Jiang* (Rhizoma Zingiberis Recens) helps *Gui Zhi* (Ramulus Cinnamomi) to warm yang and dispel cold from the body. *Da Zao* (Fructus Jujubae) tonifies qi and replenishes body fluids, while *Gan Cao* (Radix et Rhizoma Glycyrrhizae) relieves aches and pains and promotes the production of body fluid. *Da Zao* (Fructus Jujubae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) also function as envoys to harmonize all the herbs in this formula.

MODIFICATIONS

- With spermatorrhea and weakness, add *Lu Jiao Shuang* (Cornu Cervi Degelatinatum) and *Gui Ban* (Plastrum Testudinis).
- With fatigue and qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- With sore back and feeling of pain in the bone, add *Du Zhong* (Cortex Eucommiae) and *Niu Xi* (Radix Achyranthis Bidentatae).

Fu Ling (Poria)	30g
Zhu Ling (Polyporus)	75g
Sha Ren (Fructus Amomi)	30g
Ban Xia (Rhizoma Pinelliae), <i>pao</i> (blast-fried) in water 7 times	30g
Lian Xu (Stamen Nelumbinis)	60g
Yi Zhi (Fructus Alpiniae Oxyphyllae)	30g
Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	90g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder and form into small pills. Take 50 pills on an empty stomach with warm grain-based liquor.

CLINICAL APPLICATIONS

Prostatic hypertrophy, chronic cystitis, chronic urethritis, and urinary tract infection.

CHINESE THERAPEUTIC ACTIONS

- 1. Protects qi and *jing* (essence)
- 2. Clears damp-heat

EXPLANATION

Zhi Zhuo Gu Ben Wan (Treat the Turbidity and Guard the Root Pill) is designed to treat damp-heat in the Urinary Bladder leading to abnormal genitourinary function. Symptoms of such conditions include white and turbid urine, excessive frequency and amount of urination, and spermatorrhea.

CLINICAL MANIFESTATIONS

Damp-heat in the Urinary Bladder: white, turbid urine, spermatorrhea, and polyuria.

Zhi Zhuo Gu Ben Wan (Treat the Turbidity and Guard the Root Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Damp-heat in the Urinary Bladder	Increased frequency and amount of urination, white turbid urine and spermatorrhea: damp-heat in the Urinary Bladder	<ul style="list-style-type: none">• Protects qi and <i>jing</i> (essence)• Clears damp-heat	<ul style="list-style-type: none">• <i>Huang Lian</i> (Rhizoma Coptidis) and <i>Huang Bo</i> (Cortex Phellodendri Chinensis) effectively clear damp-heat.• <i>Fu Ling</i> (Poria) and <i>Zhu Ling</i> (Polyporus) regulate the circulation of water and promote normal urination.• <i>Sha Ren</i> (Fructus Amomi) and <i>Ban Xia</i> (Rhizoma Pinelliae) strengthen the Spleen and Stomach to eliminate and prevent production of dampness.• <i>Lian Xu</i> (Stamen Nelumbinis) and <i>Yi Zhi</i> (Fructus Alpiniae Oxyphyllae) consolidate the <i>jing</i> and stop spermatorrhea.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes all the herbs.

Zhì Zhuó Gù Běn Wán

(Treat the Turbidity and Guard the Root Pill)

In this formula, herbs are used to control urination and resolve turbidity. Bitter and cold, *Huang Lian* (Rhizoma Coptidis) and *Huang Bo* (Cortex Phellodendri Chinensis) effectively purge damp-heat. *Fu Ling* (Poria) and *Zhu Ling* (Polyporus) regulate the circulation of water and promote normal urination. *Sha Ren* (Fructus Amomi) and *Ban Xia* (Rhizoma Pinelliae) strengthen the Spleen and Stomach to eliminate and prevent production of dampness. *Lian Xu* (Stamen Nelumbinis) and *Yi Zhi* (Fructus Alpiniae Oxyphyllae) consolidate the *jing* (essence) and stop spermatorrhea. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes all the herbs in the formula. In short, this formula is used to treat loss of

fluids (urine and sperm) through consolidating *jing* and clearing damp-heat.

MODIFICATIONS

- With more spermatorrhea and urination, add *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).
- With more white, turbid urine, add *Hai Piao Xiao* (Endoconcha Sepiae) and *Sang Piao Xiao* (Ootheca Mantidis).
- With soreness and pain of the lower back and legs, add *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci).

固崩止带剂

— Womb-Stabilizing Formulas to Stop Leakage

Gù Jīng Wán (Stabilize the Menses Pill)

固經丸

固经丸

Pinyin Name: *Gu Jing Wan*

Literal Name: Stabilize the Menses Pill

Original Source: *Yi Xue Ru Men* (Introduction to Medicine) by Li Ting in 1575

COMPOSITION

<i>Gui Ban</i> (Plastrum Testudinis)	30g [15g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	30g [15g]
<i>Huang Qin</i> (Radix Scutellariae)	30g [15g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	9g [6g]
<i>Chun Pi</i> (Cortex Ailanthi)	21g [12g]
<i>Xiang Fu</i> (Rhizoma Cyperi)	7.5g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder and form into small pills with grain-based liquor. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50 pills per dose with grain-based liquor. Today the instruction is usually to administer 9g of pills once or twice a day with warm water. This formula may also be prepared as a decoction with suggested dosages in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and clears deficiency heat
2. Stabilizes menses and stops bleeding

CLINICAL MANIFESTATIONS

Beng lou (flooding and spotting) and hypermenorrhea due to deficiency heat in the interior: continuous menstrual bleeding or incessant dripping of blood from the uterus, bleeding of dark red blood, sometimes bleeding with purplish-black blood clots, irritability, heat sensations in the chest, abdominal pain, dysuria, red tongue, and a wiry, rapid pulse.

CLINICAL APPLICATIONS

Irregular menstruation, menstrual bleeding, and gastrointestinal bleeding.

EXPLANATION

Gu Jing Wan (Stabilize the Menses Pill) is designed to treat menstrual disorders, such as *beng lou* (flooding and spotting) and hypermenorrhea characterized by yin deficiency complicated with Liver stagnation and heat. As the heat and fire rise, they disturb *chong* (thoroughfare) and *ren* (conception) channels and force reckless movement of blood, resulting in bleeding or incessant dripping of blood from the uterus. Irritability and abdominal pain are due to Liver qi stagnation and heat.

To effectively treat this syndrome, one must nourish yin, clear heat, and stop bleeding. This formula contains *Gui Ban* (Plastrum Testudinis) to benefit the Kidney, nourish yin, and clear heat. *Bai Shao* (Radix Paeoniae Alba) nourishes Liver blood to soften the Liver and relieve pain. *Huang Qin* (Radix Scutellariae) and *Huang Bo* (Cortex Phellodendri Chinensis) clear heat, purge fire, and stop the bleeding. *Chun Pi* (Cortex Ailanthi), a cold, astringent

herb, stabilizes menstruation and stops bleeding. *Xiang Fu* (Rhizoma Cyperi) regulates Liver qi and harmonizes the blood.

MODIFICATIONS

With more yin-deficiency heat signs such as tidal fever, flushed cheeks, and *wu xin re* (five-center heat): remove *Huang Bo* (Cortex Phellodendri Chinensis) and *Xiang Fu* (Rhizoma Cyperi); and add *Di Huang* (Radix Rehmanniae), *Shan Zhu Yu* (Fructus Corni), and *Di Gu Pi* (Cortex Lycii); or *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill).

CAUTIONS / CONTRAINDICATIONS

Gu Jing Wan is contraindicated in cases of excess heat, blood stagnation, and/or qi deficiency.

CLINICAL STUDIES AND RESEARCH

1. **Irregular menstruation:** One study reported good results using modified *Gu Jing Wan* to treat irregular menstruation in women during puberty characterized by Kidney yin deficiency with deficiency heat. The formula contained *Bie Jia* (Carapax Trionycis) 10g, *Bai Shao* (Radix Paeoniae Alba) 10g, dry-fried *Huang Qin* (Radix Scutellariae) 10g, *Chun Pi* (Cortex Ailanthi) 10g, *Xiang Fu* (Rhizoma Cyperi) 10g, *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) 10g, dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, dry-fried *Wu Mei* (Fructus Mume) 10g, dry-fried *Dang Shen* (Radix Codonopsis) 18g, *Nu Zhen Zi* (Fructus Ligustri Lucidi) 12g, *Mo Han Lian* (Herba Ecliptae) 12g, and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 5g.¹

2. ***Beng lou* (flooding and spotting):** According to one study, *beng lou* (flooding and spotting) in perimenopausal women characterized by yin deficiency and heat in the blood may be treated with modified *Gu Jing Wan*. The herbal formula contained *Bie Jia* (Carapax Trionycis) 9g, dry-fried *Huang Qin* (Radix Scutellariae) 9g, dry-fried *Bai Shao* (Radix Paeoniae Alba) 9g, dry-fried *Huang Bo* (Cortex Phellodendri Chinensis) 9g, charred *Qian Cao* (Radix et Rhizoma Rubiae) 9g, *Chun Pi* (Cortex Ailanthi) 12g, charred *Dang Gui* (Radix Angelicae Sinensis) 12g, charred *Xu Duan* (Radix Dipsaci) 12g, dry-fried *Dang Shen* (Radix Codonopsis) 18g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 4.5g, processed *Huang Jing* (Rhizoma Polygonati) 30g, *Hai Piao Xiao* (Endoconcha Sepiae) 30g, and *Sang Ji Sheng* (Herba Taxilli) 12g.²

3. **Bleeding:** *Gu Jing Wan* has been shown to effectively stop bleeding due to various causes. According to one report, it was effective in treating gastrointestinal bleeding. According to another report, it was effective for treating uterine bleeding and profuse menstrual bleeding.^{3,4}

<i>Qian Cao</i> (Radix et Rhizoma <i>Rubiae</i>)	9g
<i>Zong Lu</i> (Petiolus <i>Trachycarpi</i>), <i>tan</i> (charred to ash)	6g
<i>Wu Bei Zi</i> (Galla <i>Chinensis</i>), <i>ya</i> (pressed) into fine particles	1.5g

The source text states to prepare the ingredients as a decoction. *Wu Bei Zi* (Galla *Chinensis*) should be mixed with the decoction immediately prior to ingestion.

Gu Chong Tang (Stabilize *Chong* [Thoroughfare Channel] Decoction) tonifies qi, strengthens the Spleen, stabilizes the *chong* (thoroughfare) channel, and stops menstrual bleeding. With Spleen qi deficiency and *chong* (thoroughfare) channel instability, blood cannot circulate within the vessels leading to *beng lou* (flooding and spotting) and hypermenorrhea. Bleeding is usually excessive, pale and quite diluted. Furthermore, because of the deficient nature of the illness, the patient may show palpitations, shortness of breath, pale tongue, and a fine, weak pulse.

Gu Jing Wan and *Gu Chong Tang* (Stabilize *Chong* [Thoroughfare Channel] Decoction) both treat excess menstrual bleeding.

- *Gu Jing Wan* is used for bleeding due to yin-deficient heat causing reckless movement of blood.
- *Gu Chong Tang* is used for bleeding due to Spleen qi deficiency and instability of *chong* (thoroughfare) channel, leading to inability of blood to circulate within the blood vessels.

AUTHORS' COMMENTS

Gu Jing Wan and *Gui Pi Tang* (Restore the Spleen Decoction) both treat hypermenorrhea and *beng lou* (flooding and spotting).

- *Gu Jing Wan* nourishes yin, clears heat, and treats profuse bleeding that is dark red in color and may also be accompanied by clots. The tongue is red and the pulse is wiry and rapid.
- *Gui Pi Tang* tonifies the Spleen and Heart and treats bleeding that is lighter in color. *Gui Pi Tang* is most suitable for individuals with qi and blood deficiencies, with accompanying symptoms such as weakness, poor appetite, insomnia, and palpitations.⁵

COMPOSITION

<i>Chi Shi Zhi</i> (Halloysitum Rubrum), <i>duan</i> (calcined) with fire and <i>cui</i> (quenched) with vinegar	120g
<i>Yu Yu Liang</i> (Limonitum), <i>duan</i> (calcined) with fire and <i>cui</i> (quenched) with vinegar	120g
<i>Zi Shi Ying</i> (Fluoritum), <i>duan</i> (calcined) with fire and <i>cui</i> (quenched) with vinegar	120g
<i>Zhe Shi</i> (Haematitum), <i>duan</i> (calcined) with fire and <i>cui</i> (quenched) with vinegar	120g
<i>Ru Xiang</i> (Gummi Olibanum), <i>yan</i> (ground) to small particles separately	60g
<i>Mo Yao</i> (Myrrha), <i>yan</i> (ground) to small particles	60g
<i>Wu Ling Zhi</i> (Faeces Troglodyteri), <i>yan</i> (ground) to small particles	60g
<i>Zhu Sha</i> (Cinnabaris), <i>shui fei</i> (refined with water)	30g

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder. Separately cook *Nuo Mi* (*Oryza Glutinosa*) into a paste. Combine the powder and the paste to form large pills. The pills should resemble the head of a small chicken in size. Dry the pills under the sun. Take one pill on an empty stomach daily. The source text states that men should take the pill with warm grain-based liquor, and women should take it with vinegar.

CHINESE THERAPEUTIC ACTIONS

Stops bleeding and dissolves blood stasis

CLINICAL MANIFESTATIONS

Beng lou (flooding and spotting) caused by deficiency and cold of the *chong* (thoroughfare) and *ren* (conception) channels accompanied by blood stasis in the uterus: continuous menstrual bleeding that is purplish red or purplish black in color, bleeding with or without clots, abdominal pain worsened by pressure and relieved by the passing of blood clots, dark purplish tongue, and a deep, fine and wiry pulse.

CLINICAL APPLICATIONS

Leukorrhea, uterine bleeding, and chronic diarrhea.

EXPLANATION

Zhen Ling Dan (Rouse the Spirits Special Pill) is designed to treat *beng lou* (flooding and spotting) caused by deficiency and cold of the *chong* (thoroughfare) and *ren* (conception) channels accompanied by blood stasis in the uterus. With deficiency and cold, blood leaves the *chong* (thoroughfare) and *ren* (conception) channels resulting in continuous menstrual bleeding. Once blood travels to the outside of the blood vessels, blood stasis may form, hence bleeding with purplish blood clots. Blood stasis may cause abdominal pain that is worsened by pressure. And when the blood clots are passed out, the pain may become lessened due to reduced blood stasis. The tongue and pulse conditions should show interior deficiency and cold along with blood stagnation.

Optimal treatment requires the use of herbs to warm the uterus, stabilize the *chong* (thoroughfare) and *ren* (conception) channels, stop bleeding, and dissolve blood stasis. In this formula, *Chi Shi Zhi* (Halloysitum Rubrum), *Yu Yu Liang* (Limonitum), *Zi Shi Ying* (Fluoritum), and *Zhe Shi* (Haematitum) warm the uterus, stabilize *chong* (thoroughfare) and *ren* (conception) channels, and stop bleeding. These four herbs should all be calcined first to enhance their warming and astringent effects. *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), and *Wu Ling Zhi* (Faeces Troglodyteri) activate blood circulation to eliminate blood stasis, and regulate qi circulation to relieve pain.

<i>Jing Jie Sui Tan</i> (Spica Schizonepetae Carbonisata)	1.5g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies middle *jiao* and strengthens the Spleen
2. Dissolves damp and stops leukorrhea

Wán Dài Tāng (End Discharge Decoction)

CLINICAL MANIFESTATIONS

Abnormal vaginal discharge due to Spleen deficiency and Liver qi stagnation accompanied by dampness and turbidity in the lower *jiao*: odorless, clear, and thin leukorrhea that is white or light yellow in color, pale face, lethargy, loose stools, pale tongue, white tongue coating, and a moderate or soggy and weak pulse.

CLINICAL APPLICATIONS

Leukorrhea, cervicitis, vaginitis, abnormal vaginal discharge, infertility, edema during pregnancy, chronic hepatitis, glomerulonephritis, diarrhea, and irritable bowel syndrome.

EXPLANATION

Wan Dai Tang (End Discharge Decoction) is designed to treat abnormal vaginal discharge caused by Spleen qi deficiency and Liver qi stagnation. Stagnation of Liver qi may lead to Liver overacting on the Spleen, causing Spleen deficiency. Deficiency of the Spleen may cause production and accumulation of dampness and turbidity, which usually travel to the lower *jiao* due to their heavy and descending character and result in leukorrhea. Since there is no heat or infection, the leukorrhea will be clear, thin, odorless, and white or light yellow in color. Pale face, lethargy, loose stools, pale tongue, and a moderate or soggy and weak pulse indicate qi deficiency and damp accumulation.

This formula uses dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Shan Yao* (Rhizoma Dioscoreae)

in heavy dosages to carry out two important functions. First, these two herbs strengthen the Spleen and tonify qi to facilitate the water metabolism function. Second, both herbs dry dampness and help reduce leukorrhea. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies qi. *Cang Zhu* (Rhizoma Atractylodis) and *Chen Pi* (Pericarpium Citri Reticulatae) activate the qi flow and dry dampness. These two herbs also prevent the tonifying herbs from creating additional dampness and stagnation. *Che Qian Zi* (Semen Plantaginis) resolves dampness through urination. *Bai Shao* (Radix Paeoniae Alba) softens the Liver. *Chai Hu* (Radix Bupleuri) ascends the yang and activates Liver qi flow. *Jing Jie Sui Tan* (Spica Schizonepetae Carbonisata) has the function to stop leukorrhea. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all the herbs in this formula.

MODIFICATIONS

- For vaginal discharge characterized by cold, add *Li Zhong Tang* (Regulate the Middle Decoction).
- For yellow vaginal discharge characterized by heat, add *Huang Bo* (Cortex Phellodendri Chinensis) and *Long Dan* (Radix et Rhizoma Gentianae); or *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- For vaginal discharge secondary to chronic illness and deficiency, add *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).
- For chronic vaginal discharge that is white or clear, add *Lu Jiao Shuang* (Cornu Cervi Degelatinatum).
- With Spleen deficiency, add *Huang Qi* (Radix Astragali) and *Bai Bian Dou* (Semen Lablab Album).

Wan Dai Tang (End Discharge Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Abnormal vaginal discharge due to Spleen deficiency and Liver qi stagnation	<ul style="list-style-type: none"> • Leukorrhea (clear, thin, odorless and white or light yellowish in color): Spleen deficiency with dampness and turbidity • Pale face, pale tongue, white tongue coating, lethargy and loose stools: Spleen deficiency • A moderate or soggy and weak pulse: Spleen deficiency with dampness accumulation 	<ul style="list-style-type: none"> • Tonifies middle <i>jiao</i> and strengthens the Spleen • Dissolves dampness and stops leukorrhea 	<ul style="list-style-type: none"> • <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Shan Yao</i> (Rhizoma Dioscoreae) strengthen the Spleen and dry dampness. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies qi. • <i>Cang Zhu</i> (Rhizoma Atractylodis) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) activate the qi flow and dry dampness. • <i>Che Qian Zi</i> (Semen Plantaginis) resolves dampness through urination. • <i>Bai Shao</i> (Radix Paeoniae Alba) softens the Liver. • <i>Chai Hu</i> (Radix Bupleuri) ascends the yang and activates Liver qi flow. • <i>Jing Jie Sui Tan</i> (Spica Schizonepetae Carbonisata) stops leukorrhea. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes all the herbs.

Wán Dài Tāng (End Discharge Decoction)

- With blood deficiency, add *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Dang Gui* (Radix Angelicae Sinensis).
- With Spleen and Kidney deficiencies, add *Tu Si Zi* (Semen Cuscutae) and *Ba Ji Tian* (Radix Morindae Officinalis).
- With lower abdominal pain, add *Wu Yao* (Radix Linderae) and *Xiao Hui Xiang* (Fructus Foeniculi).
- With lower abdominal pain with cold and dampness, add *Pao Jiang* (Rhizoma Zingiberis Praeparatum) and *Xiao Hui Xiang* (Fructus Foeniculi).
- With soreness and weakness of the lower back and knees, add *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci).
- With lower back pain, add *Du Zhong* (Cortex Eucommiae) and *Tu Si Zi* (Semen Cuscutae).
- With low libido, add *Huan Shao Dan* (Return to Youth Pill).

CAUTIONS / CONTRAINDICATIONS

Wan Dai Tang is contraindicated in yellow or foul-smelling vaginal discharge caused by damp-heat.

PHARMACOLOGICAL EFFECTS

Anti-inflammatory: One study reported marked effect in reducing inflammation using *Wan Dai Tang* in mice given via intraperitoneal injection.¹

CLINICAL STUDIES AND RESEARCH

1. **Leukorrhea:** One study reported improvement to complete recovery using modified *Wan Dai Tang* to treat 50 women with leukorrhea. The herbal formula contained *Tai Zi Shen* (Radix Pseudostellariae) 10g, charred *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, processed *Cang Zhu* (Rhizoma Atractylodis) 6g, *Che Qian Zi* (Semen Plantaginis) 10g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 3g, *Chen Pi* (Pericarpium Citri Reticulatae) 6g, *Chai Hu* (Radix Bupleuri) 3g, charred *Jing Jie* (Herba Schizonepetae) 2g, alcohol-fried *Bai Shao* (Radix Paeoniae Alba) 12g, *Shan Yao* (Rhizoma Dioscoreae) 30g, *Qian Shi* (Semen Euryales) 12g, *Bai Guo* (Semen Ginkgo) 7 pieces, and others as deemed necessary. The duration of treatment ranged from 5 to 14 packs of herbs.²
2. **Cervicitis:** According to one study, administration of modified *Wan Dai Tang* in decoction daily for 15 to 46 packs of herbs was effective in treating chronic cervicitis. Of 47 women, the study reported complete recovery in 25 cases, improvement in 18 cases, and no effect in 4 cases.³
3. **Vaginitis:** According to one study, the use of modified *Wan Dai Tang* was associated with good effect to treat acute or chronic vaginitis caused by *Candida albicans*. Modifications to the original formula were made by adding *Di Fu Zi* (Fructus Kochiae) and *Bai Xian Pi* (Cortex Dictamnii) for itching in the genital region; *Mu Tong* (Caulis Akebiae), *Zhi Zi* (Fructus Gardeniae) and *Zhi Mu* (Rhizoma Anemarrhenae) for burning sensations and pain; *Qu Mai* (Herba Dianthi) and *Hua Shi* (Talcum) for frequent urination with pain; *Yu Xing Cao* (Herba Houttuyniae) and *Huang Bo* (Cortex Phellodendri Chinensis) for yellow discharge; *Xu Duan* (Radix Dipsaci) and *Du Zhong* (Cortex Eucommiae) for low back pain; and *Bu Gu Zhi* (Fructus Psoraleae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Rou Dou Kou* (Semen Myristicae) and *Wu Zhu Yu* (Fructus Evodiae) for chronic illness. Of 31 patients, the study reported complete recovery in 28 cases, significant improvement in 2 cases, and no effect in 1 case.⁴
4. **Colitis:** One study reported good effect using modified *Wan Dai Tang* to treat chronic colitis associated with diarrhea. Clinical manifestations include varying severities of diarrhea, abdominal pain, decreased intake of food, fatigue, and presence of sticky mucus in the stools. In addition to *Wan Dai Tang* as the base formula, *Huang Lian* (Rhizoma Coptidis), *Di Yu* (Radix Sanguisorbae) and *Huai Hua* (Flos Sophorae) were added for hematochezia; *Mu Xiang* (Radix Aucklandiae) for rectal tenesmus; *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Qiao* (Fructus Aurantii) for abdominal distention; *Shen Qu* (Massa Fermentata) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for decreased food intake; and *Rou Dou Kou* (Semen Myristicae) and *Shi Liu Pi* (Pericarpium Granati) for chronic diarrhea. Of 49 patients, the study reported complete recovery in 10 cases, significant improvement in 14 cases, and no effect in 4 cases. Information was unavailable on individuals who did not complete the study.⁵
5. **Irritable bowel syndrome (IBS):** One study reported 92% effectiveness using modified *Wan Dai Tang* to treat 24 patients with IBS. In addition to the base formula, *Cang Zhu* (Rhizoma Atractylodis) and *Pu Gong Ying* (Herba Taraxaci) were added for more damp-heat; *Wu Zhu Yu* (Fructus Evodiae) and *Rou Dou Kou* (Semen Myristicae) for more deficiency and cold; *Mu Xiang* (Radix Aucklandiae) and *Gua Lou* (Fructus Trichosanthis) for abdominal distention; *Sheng Ma* (Rhizoma Cimicifugae) and *Bai Zhi* (Radix Angelicae Dahuricae) for frequent diarrhea; *Da Huang* (Radix et Rhizoma Rhei) for constipation; *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae) for feeling of incomplete evacuation after defecation; and *Yi Zhi* (Fructus Alpiniae Oxyphyllae) and *Bu Gu Zhi* (Fructus Psoraleae) for chronic illness. Of 24 patients, the study reported complete recovery in 17 cases, improvement in 5 cases, and no effect in 2 cases.⁶

Wán Dài Tāng (End Discharge Decoction)

RELATED FORMULAS

Yì Huáng Tāng

(Change the Yellow [Discharge] Decoction)

易黃湯
易黃汤

Pinyin Name: Yi Huang Tang

Literal Name: Change the Yellow [Discharge] Decoction

Original Source: *Fu Qing Zhu Nu Ke* (Women's Diseases According to Fu Qing-Zhu) by Fu Shan in 1827

<i>Shan Yao</i> (Rhizoma Dioscoreae), <i>chao</i> (dry-fried)	30g
<i>Qian Shi</i> (Semen Euryales), <i>chao</i> (dry-fried)	30g
<i>Huang Bo</i> (Cortex Phellodendri Chinensis), <i>chao</i> (dry-fried) with salted water	6g
<i>Che Qian Zi</i> (Semen Plantaginis), <i>chao</i> (dry-fried) with liquor	3g
<i>Bai Guo</i> (Semen Ginkgo), <i>fen sui</i> (pulverized)	10 kernels

The source text states to prepare the ingredients as a decoction. The main actions of *Yi Huang Tang* (Change the Yellow [Discharge] Decoction) are to strengthen the Spleen, dry dampness, clear heat, and stop leukorrhea. Clinically, it may be used to treat Spleen deficiency with damp-heat, characterized by symptoms such as yellow or white vaginal discharge that is sticky with a foul odor, and weak knees and lower back.

Qīng Dài Tāng (Clear the Discharge Decoction)

清帶湯
清带汤

Pinyin Name: Qing Dai Tang

Literal Name: Clear the Discharge Decoction

Original Source: *Yi Xue Zhong Zhong Can Xi Lu* (Records of Heart-Felt Experiences in Medicine with Reference to the West) by Zhang Xi-Chun in 1918-34

<i>Shan Yao</i> (Rhizoma Dioscoreae)	30g
<i>Long Gu</i> (Os Draconis), <i>dao</i> (pounded) into fine particles	18g
<i>Mu Li</i> (Concha Ostreae), <i>dao</i> (pounded) into fine particles	18g
<i>Hai Piao Xiao</i> (Endoconcha Sepiae), <i>dao</i> (pounded)	12g
<i>Qian Cao</i> (Radix et Rhizoma Rubiae)	9g

The source text states to prepare the ingredients as a decoction. The main actions of *Qing Dai Tang* (Clear the Discharge Decoction) are to strengthen the Spleen and stop abnormal vaginal discharge. Clinically, the patient may show red or white discharge that is diluted and large in quantity, weak lower back, pale tongue with white tongue coating, and a fine, moderate and deep pulse.

AUTHORS' COMMENTS

Wan Dai Tang, *Yi Huang Tang* (Change the Yellow [Discharge] Decoction), and *Qing Dai Tang* (Clear Discharge Decoction) all treat leukorrhea with Spleen deficiency.

- *Wan Dai Tang* treats leukorrhea due to Spleen deficiency and Liver qi stagnation.
- *Yi Huang Tang* treats leukorrhea due to Spleen deficiency with damp-heat accumulation.
- *Qing Dai Tang* treats leukorrhea due to Spleen deficiency.

Wan Dai Tang and *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) both treat leukorrhea.

- *Wan Dai Tang* is reserved for leukorrhea that is white and odorless, due to Spleen deficiency, Liver qi stagnation, and accumulation of dampness.
- *Long Dan Xie Gan Tang* is used only for yellow, thick, and foul-smelling leukorrhea, due to damp-heat attacking the Liver channel.⁷

According to Dr. Richard Tan, *Wan Dai Tang* can be combined with *Xin Yi San* (Magnolia Flower Powder) to treat leukorrhea that is clear or white in color.

DOSAGE / PREPARATION / ADMINISTRATION

EXPLANATION

Unavailable.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears heat and eliminates toxins
- 2. Dries damp and disperses stagnations

CLINICAL MANIFESTATIONS

Leukorrhea characterized by damp-heat in the lower *jiao*: leukorrhea with yellow, white, or red discharge, generalized itching and discomfort in the genital region, abdominal pain, soreness of the lower back, and slight anemia.

CLINICAL APPLICATIONS

Acute or chronic leukorrhea with yellow vaginal discharge, gonorrheal leukorrhea, trichomonal leukorrhea, uteritis, and generalized itching of the genital region.

Ba Wei Dai Xia Fang (Eight-Ingredient Formula for Leukorrhea) is designed to treat acute or chronic leukorrhea due to damp-heat and toxins in the lower *jiao*. Therefore, effective treatment must focus on clearing damp-heat and toxins from the affected area.

In this formula, *Tu Fu Ling* (Rhizoma Smilacis Glabrae) and *Jin Yin Hua* (Flos Lonicerae Japonicae) clear heat and remove toxins. *Fu Ling* (Poria), *Mu Tong* (Caulis Akebiae), and *Chen Pi* (Pericarpium Citri Reticulatae) clear damp-heat. *Da Huang* (Radix et Rhizoma Rhei) drains pathogenic heat from the body. *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) nourish the blood and prevent the drying and draining herbs from consuming yin.

Ba Wei Dai Xia Fang (Eight-Ingredient Formula for Leukorrhea)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Leukorrhea	Leukorrhea with yellow, white or red discharge: damp-heat in the lower <i>jiao</i>	<ul style="list-style-type: none">• Clears heat and eliminates toxins• Dries dampness and disperses stagnations	<ul style="list-style-type: none">• <i>Tu Fu Ling</i> (Rhizoma Smilacis Glabrae) and <i>Jin Yin Hua</i> (Flos Lonicerae Japonicae) clear heat and remove toxin.• <i>Fu Ling</i> (Poria), <i>Mu Tong</i> (Caulis Akebiae) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) clear damp-heat.• <i>Da Huang</i> (Radix et Rhizoma Rhei) drains pathogenic heat from the body.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) nourish the blood and prevent the drying and draining herbs from consuming yin.

Bā Wèi Dài Xià Fāng (Eight-Ingredient Formula for Leukorrhea)

MODIFICATIONS

- With itching and pain in the genital region due to damp-heat, add *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- For gonorrhea or syphilis in men or women, combine with *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver).
- With blood deficiency and generalized weakness, add *Si Wu Tang* (Four-Substance Decoction).

CAUTIONS / CONTRAINDICATIONS

Patients with a sensitive gastrointestinal tract may wish to take *Ba Wei Dai Xia Fang* without *Da Huang* (Radix et Rhizoma Rhei), as this herb may cause diarrhea and stomach discomfort.

Chapter 11 — Summary

— Astringent Formulas

SECTION 1: EXTERIOR-STABILIZING FORMULAS TO STOP PERSPIRATION

Name	Similarities	Differences
Yu Ping Feng San (Jade Windscreen Powder)	Stabilize the exterior, stop perspiration	Tonifies <i>wei</i> (defensive) <i>qi</i> to stop spontaneous sweating
Mu Li San (Oyster Shell Powder)		Nourishes yin to stop night sweating

Yu Ping Feng San (Jade Windscreen Powder) tonifies *qi* and strengthens the exterior *wei* (defensive) level. It is used for spontaneous sweating due to *wei* (defensive) *qi* deficiency. It is also effective in strengthening *wei qi* and preventing frequent contraction of exterior wind-cold.

Mu Li San (Oyster Shell Powder) has a strong function to nourish yin and stop night sweating due to yin deficiency. It also stabilizes the exterior, tonifies *qi*, and stops spontaneous sweating due to *wei* (defensive) *qi* deficiency.

SECTION 2: LUNG-RESTRAINING FORMULA TO RELIEVE COUGH

Name	Similarities	Differences
Jiu Xian San (Nine-Immortal Powder)	Restrains the Lung	Tonifies Lung <i>qi</i> and yin

Jiu Xian San (Nine-Immortal Powder) restrains the Lung, tonifies *qi* and yin, and stops coughing. It is used for chronic cough, shortness of breath, and spontaneous sweating due to Lung *qi* and yin deficiencies.

SECTION 3: INTESTINES-BINDING FORMULAS TO STOP LEAKAGE

Name	Similarities	Differences
Zhen Ren Yang Zang Tang (True Man's Decoction for Nourishing the Organs)	Bind the Intestines, stop diarrhea and dysentery	Warms and tonifies the Spleen and Kidney; stronger astringent effect
Si Shen Wan (Four-Miracle Pill)		Warms and tonifies the Spleen and Kidney; stronger warming and tonifying effect
Tao Hua Tang (Peach Blossom Decoction)		Warms the middle <i>jiao</i>

Zhen Ren Yang Zang Tang (True Man's Decoction for Nourishing the Organs) warms and tonifies the Spleen and Kidney to stop diarrhea. Clinical manifestations include uncontrollable bowel movements, abdominal pain alleviated by pressure and warmth, rectal tenesmus and prolapse, red or white dysentery, stools with pus or blood, lethargy, and loss of appetite.

Si Shen Wan (Four-Miracle Pill) also has the action to warm and tonify the Spleen and Kidney to stop diarrhea. This formula is especially effective for 5 a.m. diarrhea due to Kidney yang deficiency. The clinical manifestations include early morning diarrhea, loss of appetite, soreness of the lower back, abdominal pain, cold extremities, lack of energy, pale tongue, and a thin, white tongue coating.

Chapter 11 — Summary

Tao Hua Tang (Peach Blossom Decoction) warms the middle *jiao* and binds the Intestines. It is used mainly for diarrhea due to deficiency and cold of the Spleen and Stomach. Clinical manifestations include diarrhea, stools with dark blood and pus, dysuria, abdominal pain which is alleviated by warmth and pressure.

SECTION 4: JING (ESSENCE)-STABILIZING FORMULAS TO STOP LEAKAGE

Name	Similarities	Differences
Jin Suo Gu Jing Wan (Metal Lock Pill to Stabilize the Essence)		Tonifies the Kidney
Liu Wei Gu Jing Wan (Rehmannia Six and Lotus Stamen Pill)		Strongly tonifies Liver and Kidney yin
Sang Piao Xiao San (Mantis Egg-Case Powder)		Tonifies the Heart and Kidney
Suo Quan Wan (Shut the Sluice Pill)	Restrained and stop the leakage of <i>jing</i> (essence)	Warms the Kidney and astringes the Urinary Bladder
Fu Tu Dan (Poria and Cuscuta Special Pill)		Harmonizes the Heart and Kidney, strengthens the Spleen
Gui Zhi Jia Long Gu Mu Li Tang (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell)		Tonifies yin and yang; harmonizes <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels
Zhi Zhuo Gu Ben Wan (Treat the Turbidity and Guard the Root Pill)		Clears heat, resolves dampness

Jin Suo Gu Jing Wan (Metal Lock Pill to Stabilize the Essence) tonifies Kidney and stabilizes the *jing* (essence). It treats spermatorrhea and/or seminal emission due to Kidney deficiency with signs and symptoms such as lack of energy, soreness and weakness of the back and knees, and tinnitus.

Liu Wei Gu Jing Wan (Rehmannia Six and Lotus Stamen Pill) is formulated by combining two formulas together: **Liu Wei Di Huang Wan** (Six-Ingredient Pill with Rehmannia) to tonify Liver and Kidney yin, and **Jin Suo Gu Jing Wan** (Metal Lock Pill to Stabilize the Essence) to restrain and stop the leakage of *jing* (essence). It treats spermatorrhea and/or seminal emission due to Liver and Kidney yin deficiencies.

Sang Piao Xiao San (Mantis Egg-Case Powder) tonifies the Heart and Kidney. It is used to treat deficiency of both the Heart and Kidney with clinical manifestations such as seminal emission, enuresis, frequent urination, cloudy urine, trance, and forgetfulness.

Suo Quan Wan (Shut the Sluice Pill) warms the Kidney and astringes the Urinary Bladder. It is used for Kidney qi deficiency with accumulation of cold in the Urinary Bladder causing enuresis and frequent, clear and prolonged urination. This formula is also effective for bedwetting in children.

Fu Tu Dan (Poria and Cuscuta Special Pill) strengthens the Spleen and drains dampness, tonifies the Kidney and stabilizes the *jing* (essence), and benefits the Heart and calms the *shen* (spirit). It treats spermatorrhea or premature ejaculation due to disharmony of the Heart and Kidney.

Gui Zhi Jia Long Gu Mu Li Tang (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell) tonifies yin and yang, harmonizes *ying* (nutritive) and *wei* (defensive) levels, and astringes *jing* (essence). It treats chronic and gradual decline in physical and sexual functions due to deficiency of yin and yang, accompanied by disharmony of the *ying* (nutritive) and *wei* (defensive) levels.

Zhi Zhuo Gu Ben Wan (Treat the Turbidity and Guard the Root Pill) clears heat, resolves dampness, and prevents the loss of qi and *jing* (essence). It treats genitourinary disorders due to damp-heat in the Urinary Bladder. Clinical manifestations include white and turbid urine, frequent and excessive amount of urination, and spermatorrhea.

Chapter 11 — Summary

SECTION 5: WOMB-STABILIZING FORMULAS TO STOP LEAKAGE

Name	Similarities	Differences
Gu Jing Wan (Stabilize the Menses Pill)	Stabilize	Nourishes yin, clears deficiency heat
Zhen Ling Dan (Rouse the Spirits Special Pill)	menstruation, stop bleeding	Warms the interior, eliminates blood stagnation, relieves pain
Wan Dai Tang (End Discharge Decoction)	Resolve dampness, stop leukorrhea	Tonifies qi, strengthens the Spleen, regulates Liver qi
Ba Wei Dai Xia Fang (Eight-Ingredient Formula for Leukorrhea)		Clears damp-heat and toxins in the lower <i>jiao</i>

Gu Jing Wan (Stabilize the Menses Pill) nourishes yin, clears deficiency heat, and stops abnormal menstrual bleeding. It is used for deficiency heat in the interior causing abnormal menstrual bleeding with dark red blood or purplish-black blood clots, irritability, abdominal pain, dysuria, hematuria, red tongue, and a wiry, rapid pulse.

Zhen Ling Dan (Rouse the Spirits Special Pill) is used for deficiency and cold in the *chong* (thoroughfare) and *ren* (conception) channels resulting in menstrual bleeding with blood stagnation. Clinical manifestations include continuous menstrual bleeding that is purplish-red or purplish-black in color, abdominal pain worsened by pressure, reduced pain with the passing of blood clots, dark purplish tongue, and a deep, fine and wiry pulse.

Wan Dai Tang (End Discharge Decoction) stops leukorrhea due to Spleen deficiency and Liver qi stagnation. Clinical manifestations include odorless, clear, and thick leukorrhea that is white or light yellow in color, pale face, and lethargy.

Ba Wei Dai Xia Fang (Eight-Ingredient Formula for Leukorrhea) treats leukorrhea due to damp-heat and toxins in the lower *jiao*. Clinical manifestations include leukorrhea with yellow, white, or red discharge, generalized itching and discomfort in the genital region, abdominal pain, soreness of the lower back, and slight anemia.

Chapter 12

— Qi-Regulating Formulas

李时珍 Lǐ Shí-Zhēn

李时珍 Lǐ Shí-Zhēn, 1518 – 1593.

李时珍 Lǐ Shí-Zhēn

本草綱目 *Ben Cao Gang Mu*
(Materia Medica) in 1596.

Li Shi-Zhen was born into a long family lineage of physicians. However, his father refused to allow him to study medicine in his youth because at that time, physicians were held in low social esteem and had poor economic status. Li remained interested in medicine, and after years of insistence, his father finally agreed, and began to teach Li medicine when he was 23 years old. Li made tremendous advances in the next fifteen years. When he was 38, he was called to the Imperial Palace to become 太医 the Supreme Physician. Three years later, he was promoted to Chief Supreme Physician. However, he disliked the politics of serving in the Imperial Palace, and resigned one year later to return home.

In Li's years of studying and practicing, he noticed many errors, omissions, and repetitions among herbal texts. Realizing that such errors create malpractice and jeopardize lives, he embarked on a life-long journey to research and rewrite the records of herbal medicine. During the research process, Li interviewed physicians and pharmacists, lived with hunters and farmers, and personally cultivated and tested many herbs, all to ensure accuracy of the information. In 1578, when Li Shi-Zhen was 60 years old, he finished the *Ben Cao Gang Mu* (Materia Medica) after 27 years of work. This was the most comprehensive of all herbal texts prior to the 17th century: it documented 1,892 medicinal substances (1,195 plants, 340 animals, and 357 mineral substances) classified into 6 sections, 52 scrolls, and 60 categories.

Ironically, Li spent his entire adult life in compiling the *Ben Cao Gang Mu* (Materia Medica), yet during his life time he found no one willing to invest the money to publish it. He eventually donated it to the Imperial Palace before he passed away, hoping that it would be preserved and passed on to future generations. Finally in 1596, three years after his death, it was published in Nanjing. Today, the *Ben Cao Gang Mu* (Materia Medica) is still considered one of the most important herbal texts, and has been translated into many languages, including English, Japanese, German, French and Russian.

Qi-Regulating Formulas (Summary)	860

Chapter 12 — Overview

— Qi-Regulating Formulas

Definition: Qi-regulating formulas activate qi circulation to treat qi stagnation, and direct reversed flow of qi to descend.

Qi circulates throughout the body to provide warmth and protection, and ensures normal health and functioning in the interior (*zang fu* organs) and the exterior (the four extremities). Qi disorders result from excessive stress, overwork, emotional disturbances, inappropriate diet, or changes in the weather. Qi disorders are generally characterized by deficiency (qi deficiency) or excess (qi stagnation and reversed qi flow). These conditions may occur independently or concurrently. Qi deficiency is treated with qi-tonifying formulas (see Chapter 8: Tonic Formulas). Qi stagnation is smoothed with qi-moving formulas. Reversed flow of qi is corrected with qi-descending formulas. If the qi disorder is characterized by both qi stagnation and reversed qi flow, then qi-moving and qi-descending formulas must be prescribed together. Similarly, in patients with underlying qi deficiency, the use of qi-regulating formulas should be accompanied by qi-tonifying herbs/formulas to prevent further loss of qi.

SUBCATEGORIES OF ACTION

Qi-regulating formulas are divided into two subcategories.

1. Qi-Moving Formulas

These formulas activate qi circulation and disperse qi stagnation. Qi stagnation usually does not occur as an isolated condition or disorder. Qi stagnation is usually accompanied by stagnation of blood, phlegm, food, and other substances. Furthermore, qi stagnation in one organ may affect the normal functioning of other organs. Therefore, many qi-moving formulas are designed to treat qi stagnation with these complications. Qi stagnation is often seen among the Spleen/Stomach and Liver syndromes.

Spleen and Stomach qi stagnation result in epigastric and abdominal symptomatology such as distention and fullness, poor appetite, nausea, vomiting, acid regurgitation, hiccups, belching, and constipation. Herbs commonly used to move Spleen and Stomach qi include *Chen Pi* (Pericarpium Citri Reticulatae), *Hou Po* (Cortex Magnoliae Officinalis), *Mu Xiang* (Radix Aucklandiae), *Zhi Shi* (Fructus Aurantii Immaturus), and *Sha Ren* (Fructus Amomi). Representative formulas for these purposes include *Yue Ju Wan* (Escape Restraint Pill) and *Hou Po Wen Zhong Tang* (Magnolia Bark Decoction for Warming the Middle).

Liver qi stagnation results in one or more disorders in the three *jiaos*: chest and hypochondriac distention and pain, hernia, irregular menstruation, and dysmenorrhea. Herbs commonly used to soothe Liver qi and unblock stagnation include *Xiang Fu* (Rhizoma Cyperi), *Wu Yao* (Radix Linderae), *Chuan Lian Zi* (Fructus Toosendan), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Yu Jin* (Radix Curcumae). Representative formulas that move Liver qi include *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction) and *Ju He Wan* (Tangerine Seed Pill).

2. Qi-Descending Formulas

These formulas are designed to direct reversed flow of qi downward. Reversal of qi flow often occurs as a result of stagnation or obstruction (such as qi stagnation or phlegm obstruction). The Lung and Stomach are most likely to be affected by reversed qi flow.

Qi circulates throughout the body to provide warmth and protection, and ensures normal health and functioning in the interior (*zang fu* organs) and the exterior (the four extremities).

Qi stagnation is not an isolated condition – it is usually accompanied by stagnation of blood, phlegm, food, and other substances.

Chapter 12 — Overview

Qi deficiency must not be treated with only qi-regulating herbs, which will further consume and injure the qi.

Reversed flow of Lung qi leads to coughing, wheezing, shortness of breath, and dyspnea. Herbs that help direct Lung qi downward include *Zi Su Zi* (Fructus Perillae), *Ku Xing Ren* (Semen Armeniacae Amarum), *Zi Wan* (Radix et Rhizoma Asteris), and *Hou Po* (Cortex Magnoliae Officinalis). Exemplar formulas include *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward) and *Ding Chuan Tang* (Arrest Wheezing Decoction).

Reversed flow of Stomach qi may lead to acid regurgitation, nausea, vomiting, and hiccups. Herbs that redirect Stomach qi include *Xuan Fu Hua* (Flos Inulae), *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae), *Ding Xiang* (Flos Caryophylli), *Zhe Shi* (Haematitum), *Shi Di* (Calyx Kaki), and *Zhu Ru* (Caulis Bambusae in Taenia). Exemplar formulas include *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction) and *Ju Pi Zhu Ru Tang* (Tangerine Peel and Bamboo Shaving Decoction).

CAUTIONS / CONTRAINDICATIONS

- Deficiency conditions, such as qi deficiency, must not be treated with qi-regulating herbs, which will further consume and injure the qi. These conditions must be treated with qi-tonifying herbs.
- Excess conditions, such as qi stagnation or reversed flow of qi, must not be treated with qi-tonifying formulas, which will only cause more stagnation. These conditions must be treated with qi-regulating herbs.
- Qi-regulating formulas often include acrid, drying, and aromatic herbs that consume qi and injure body fluids; thus, excessive or prolonged use is not recommended, especially for the pregnant women, elderly persons, individuals with yin-deficient fire, or those with a history of bleeding (such as excessive bleeding during menstrual periods and epistaxis).

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Qi-regulating formulas are divided into subcategories based on differing traditional therapeutic actions: qi-moving and qi-descending. These appropriately have contrasting pharmacological effects and clinical applications.

Qi-regulating formulas treat respiratory, gastrointestinal, and emotional disorders.

From a traditional Chinese medicine perspective, qi-moving formulas activate qi circulation and disperse qi stagnation to treat Spleen/Stomach and Liver imbalances. From allopathic medical perspectives, these formulas treat gastrointestinal disorders, emotional disorders, hernia, and globus hystericus.

- **Gastrointestinal disorders:** Qi-moving formulas treat gastrointestinal disorders, such as peptic ulcer disease,^{1,2} enteritis,³ and swallowing disorders.^{4,5} Exemplar formulas include *Yue Ju Wan* (Escape Restraint Pill), *Jin Ling Zi San* (Melia Toosendan Powder), and *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction).
- **Emotional disorders:** Qi-moving formulas have been used successfully in treatment of various mental and psychiatric disorders, including depression,⁶ schizophrenia,⁷ neurosis,⁸ hysteria,⁹ stress and depression,¹⁰ panic disorder,¹¹ and *dian kuang* (mania and withdrawal).¹² Exemplar formulas include *Yue Ju Wan* (Escape Restraint Pill) and *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction).
- **Hernia:** *Ju He Wan* (Tangerine Seed Pill) and *Nuan Gan Jian* (Warm the Liver Decoction) are two of the most effective formulas for treating hernia.¹³
- **Globus hystericus:** Known as *mei he qi* (plum-pit qi) in traditional Chinese medicine, this is a condition characterized by the feeling of having a foreign object obstructing the throat, that cannot be expectorated nor swallowed. Globus hystericus, and related conditions such as pharyngeal paraesthesia and swallowing disorders, can be treated effectively with formulas such as *Yue Ju Wan* (Escape Restraint Pill) and *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction).^{14,15,16}

Qi-descending formulas are designed to correct reversed flow of Lung or Stomach qi by directing qi downward. From allopathic medical perspectives, these formulas treat respiratory and gastrointestinal disorders, and globus hystericus.

Chapter 12 — Overview

- **Respiratory disorders:** Many of these formulas exert marked influence on the respiratory tract. Pharmacological effects include antitussive,^{17,18} antiallergic,¹⁹ and antiasthmatic influences.²⁰ Clinically, these formulas have been successfully used to treat cough and wheezing,²¹ asthma,^{22,23} bronchopneumonia,²⁴ and bronchial asthma.²⁵ Exemplar formulas include *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward), *Ding Chuan Tang* (Arrest Wheezing Decoction), and *Si Mo Tang* (Four Milled-Herbs Decoction).
- **Gastrointestinal disorders:** Clinical applications of qi-descending formulas include nausea and vomiting,^{26,27,28} morning sickness,^{29,30} peptic ulcer disease,³¹ and gastritis.³² Exemplar formulas include *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward), *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction), and *Ding Xiang Shi Di Tang* (Clove and Persimmon Calyx Decoction).
- **Globus hystericus:** Qi-descending formulas also treat globus hystericus. Specifically, *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward) treats *mei he qi* (plum-pit qi),³³ and *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction) is used for pharyngeal neurosis.³⁴

Section 1

行气剂
— Qi-Moving Formulas

Yuè Jú Wán (Escape Restraint Pill)

越鞠丸

Pinyin Name: *Yue Ju Wan***Literal Name:** Escape Restraint Pill**Alternate Names:** *Yue Chu Wan* (Stagnation-Relieving Pill), *Xiong Zhu Wan* (Cyperus and Atractylodes Pill), Ligusticum Chuanxiong and Atractylodes Pill, Cyperus and Atractylodes Combination**Original Source:** *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481**COMPOSITION**

<i>Xiang Fu</i> (Rhizoma Cyperi)	[6g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	[6g]
<i>Zhi Zi</i> (Fructus Gardeniae)	[6g]
<i>Cang Zhu</i> (Rhizoma Atractylodis)	[6g]
<i>Shen Qu</i> (Massa Fermentata)	[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to grind equal amounts of the ingredients into powder and form into pills with water. The pills should resemble *Lu Dou* (Semen Phaseoli Radiati) in size. Take 6-9g of pills with warm water. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

Regulates qi and relieves constraint

CLINICAL MANIFESTATIONS

Qi stagnation: distention and oppression in the chest and diaphragm, epigastric and abdominal fullness and pain, acid regurgitation, indigestion, nausea, vomiting, and belching with a fetid odor.

CLINICAL APPLICATIONS

Psychiatric disorders (depression, schizophrenia and neurosis), *mei he qi* (plum-pit qi), gastritis, peptic ulcer disease, gastric neurosis, migraine, intercostal neuralgia, infectious hepatitis, cholecystitis, and cholelithiasis.

EXPLANATION

Yue Ju Wan (Escape Restraint Pill) treats mild to moderate cases of constraint in which qi stagnation has led to

other complications, such as stagnation of blood, phlegm, heat, dampness, and food. If the qi is stagnant in the chest and abdomen, qi is not able to ascend or descend freely; chest distention and oppression as well as abdominal fullness and pain may occur. Qi stagnation of the Spleen and Stomach may lead to indigestion and reversed flow of Stomach qi, with symptoms such as acid regurgitation, nausea, and vomiting.

Since the underlying cause of these symptoms is qi stagnation, the primary focus of treatment is to relieve that stagnation. This formula has *Xiang Fu* (Rhizoma Cyperi) to activate qi circulation and relieve qi stagnation. *Chuan Xiong* (Rhizoma Chuanxiong) activates blood circulation to dispel blood stagnation. *Zhi Zi* (Fructus Gardeniae) clears heat and sedates fire. *Cang Zhu* (Rhizoma Atractylodis) dries dampness to clear damp and phlegm stagnation. *Shen Qu* (Massa Fermentata) promotes digestion and clears food stagnation.

This formula emphasizes the relief of qi stagnation. Once the qi can circulate smoothly, other stagnations will be resolved. However, if there are any complications or changes in condition, select additional herbs and adjust doses accordingly.

Yuè Jú Wán (Escape Restraint Pill)

Yue Ju Wan (Escape Restraint Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Qi stagnation	<ul style="list-style-type: none"> Chest distention/oppression and abdominal fullness/pain: qi stagnation in the chest and abdomen Acid regurgitation, nausea and vomiting: reversed flow of Stomach qi due to qi stagnation 	Regulates qi and relieves constraint	<ul style="list-style-type: none"> <i>Xiang Fu</i> (Rhizoma Cyperi) activates qi circulation and relieves qi stagnation. <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activates blood circulation to dispel blood stagnation. <i>Zhi Zi</i> (Fructus Gardeniae) clears heat and sedates fire. <i>Cang Zhu</i> (Rhizoma Atractylodis) dries dampness to clear phlegm stagnation. <i>Shen Qu</i> (Massa Fermentata) promotes digestion and clears food stagnation.

MODIFICATIONS

- For severe qi stagnation, bloating, distention, and sighing, add *Mu Xiang* (Radix Aucklandiae), *Zhi Qiao* (Fructus Aurantii), and *Hou Po* (Cortex Magnoliae Officinalis); or *Xiao Yao San* (Rambling Powder).
- When there is severe blood stagnation, add *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Chi Shao* (Radix Paeoniae Rubra); or the formula *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).
- With more dampness, add *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis).
- With more phlegm, add *Ban Xia* (Rhizoma Pinelliae) and *Gua Lou* (Fructus Trichosanthis).
- With more food stagnation, add *Mai Ya* (Fructus Hordei Germinatus) and *Shan Zha* (Fructus Crataegi); or *Bao He Wan* (Preserve Harmony Pill).
- With more fire, add *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis).
- With fullness, distention, and oppression, add *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Qiao* (Fructus Aurantii).

CAUTIONS / CONTRAINDICATIONS

Yue Ju Wan is contraindicated in cases of generalized weakness and deficiency with abdominal fullness, distention and oppression, loose stools and lack of appetite.

CLINICAL STUDIES AND RESEARCH

- Psychiatric disorders:** According to various reports, *Yue Ju Wan* has been used successfully to treat various psychiatric disorders, such as depression, schizophrenia, and neurosis. According to one study, use of *Yue Ju Wan* was associated with 94.4% effectiveness in treating 72 patients with psychiatric disorders. The treatment protocol was to administer 6g of this formula in pills, twice daily. For those who did not respond to initial treatment, the herbs were given in decoction, and the formulation was modified as follows: with more dampness, *Fu Ling* (Poria) and *Bai Zhi* (Radix Angelicae Dahuricae) were added; for more fire, *Qing Dai* (Indigo Naturalis) was added; for more phlegm, *Ban Xia* (Rhizoma Pinelliae) and *Dan Nan Xing* (Arisaema cum Bile) were added; for more blood stagnation, *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) were added; for more qi stagnation, *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae) were added; and for more food stagnation, *Shan Zha* (Fructus Crataegi) and *Sha Ren* (Fructus Amomi) were added. Of 72 patients, the study reported complete recovery in 51 cases, improvement in 17 cases, and no benefit in 4 cases.^{1,2,3}
- Mei he qi (plum-pit qi):** One study reported 95.45% effectiveness when using modified *Yue Ju Wan* to treat 44 patients with plum-pit qi. The herbal treatment contained *Chuan Xiong* (Rhizoma Chuanxiong) 10g, *Xiang Fu* (Rhizoma Cyperi) 15g, *Zhi Zi* (Fructus Gardeniae) 15g, *Shen Qu* (Massa Fermentata) 15g, and *Cang Zhu* (Rhizoma Atractylodis) 10g. Modifications were also made by adding *Er Chen Tang* (Two-Cured Decoction) for profuse phlegm; *Mai Dong* (Radix Ophiopogonis) and *Xuan Shen* (Radix Scrophulariae) for dry throat; *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Mai Ya* (Fructus Hordei Germinatus) for decreased food intake; *Hou Po* (Cortex Magnoliae Officinalis) and *Zi Su Geng* (Caulis Perillae) for chest oppression; and *Dan Dou Chi* (Semen Sojae Praeparatum) and *Yu Jin* (Radix Curcumae) for irritability.⁴
- Peptic ulcer disease:** Use of modified *Yue Ju Wan* achieved an 88% rate of effectiveness in treating gastric and duodenal ulcers. The herbal formula contained *Cang*

Yuè Jú Wán (Escape Restraint Pill)

Zhu (Rhizoma Atractylodis) 10g, *Xiang Fu* (Rhizoma Cyperi) 10g, *Chuan Xiong* (Rhizoma Chuanxiong) 10g, dry-fried *Zhi Zi* (Fructus Gardeniae) 10g, *Chai Hu* (Radix Bupleuri) 10g, *Shen Qu* (Massa Fermentata) 15g, *Bai Shao* (Radix Paeoniae Alba) 20g, *Ying Su Ke* (Pericarpium Papaveris) 6g, and others as needed. The treatment protocols include giving the herbs in decoction daily, for 20 days per course of treatment, for 3 courses total (with a resting period of 5 days between courses). Of 50 patients, the study reported complete recovery in 19 cases, improvement in 25 cases, and no effect in 6 cases.⁵

4. **Migraine:** One study reported marked effectiveness using *Yue Ju Wan* to treat 50 patients with migraine headache (23 with unilateral symptoms, 17 with bilateral, and 10 with global headache). Clinical manifestations included recurrent headaches, dizziness, insomnia, poor appetite, nausea and/or vomiting, impaired vision and speech, and numb extremities. The herbal treatment used *Yue Ju Wan* as the base formula, and modifications were made as needed based on signs and symptoms. Of 50 cases, the study reported complete recovery in 45 cases and improvement in 5 cases. The duration of treatment ranged from 3 to 16 packs of herbs given in decoction form. In follow-up interviews one year later, 3 patients had experienced 1 recurrence and 2 patients had 2 recurrences.⁶

RELATED FORMULA

Ci Wu Jia (Radix et Rhizoma seu Caulis

Acanthopanax Senticosi)

Xiang Fu Wan (Cyperus Pill) treats emotional disorders characterized by *shen* (spirit) disturbance accompanied by stagnation of qi, blood, dampness, phlegm, and food. Clinical applications include depression, schizophrenia, and neurosis.

AUTHORS' COMMENTS

Yue Ju Wan is the representative formula for all stagnations: qi, blood, phlegm, food, damp and fire. Today, it is commonly used to treat depression, manifested by fullness, stifling sensations and pain in the chest, hypochondriac, and abdominal areas. Indigestion and a feeling of obstruction in the body are also common complaints.

Yue Ju Wan can also be used for women who are overweight due to excessive accumulation of dampness and phlegm, and consequently experiencing infertility.

Yue Ju Wan is the basic formula for treating the six stagnations. In this syndrome, qi stagnation is the primary condition, and stagnation of blood, phlegm, food, dampness and fire stagnations is the secondary condition. “*Yue ju*,” figuratively means “to overcome an obstacle,” and thus refers to the ability of this formula to help the body escape the restrained qi. Once qi flows smoothly, other stagnations will slowly be resolved.

Yue Ju Wan contains five herbs to treat six stagnations: *Xiang Fu* (Rhizoma Cyperi) activates qi circulation, *Chuan Xiong* (Rhizoma Chuanxiong) invigorates blood circulation, *Zhi Zi* (Fructus Gardeniae) clears fire, *Cang Zhu* (Rhizoma Atractylodis) dries dampness, and *Shen Qu* (Massa Fermentata) eliminates food stagnation. Since phlegm is formed secondary to the stagnations of qi, blood, dampness and food, phlegm will also be resolved when other stagnations are eliminated. However, if needed for more acute or severe conditions, herbs that transform phlegm may be added, such as *Ban Xia* (Rhizoma Pinelliae).

Jin Ling Zi San (Melia Toosendan Powder)

金鈴子散

金铃子散

Pinyin Name: Jin Ling Zi San

Literal Name: Melia Toosendan Powder

Original Source: *Su Wen Bing Ji Qi Yi Bao Ming Ji* (Collection of Writings on the Mechanisms of Illness, Suitability of Qi, and the Safeguarding of Life as Discussed in the Basic Questions) by Zhang Yuan-Su in 1186

COMPOSITION

Chuan Lian Zi (Fructus Toosendan)

30g [9g]

Yan Hu Suo (Rhizoma Corydalis)

30g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into a fine powder and taking 9g per dose with grain-based liquor. Today, this formula may be given in decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Regulates qi and soothes the Liver
2. Activates blood circulation and stops pain

CLINICAL MANIFESTATIONS

Liver qi stagnation with interior heat: intermittent pain in the chest, abdominal, and hypochondriac areas, a bitter taste in the mouth, red tongue with yellow tongue coating, and a wiry, rapid pulse.

CLINICAL APPLICATIONS

Biliary ascariasis and peptic ulcer disease.

EXPLANATION

Jin Ling Zi San (Melia Toosendan Powder) is the basic formula for treatment of various types of pain caused by Liver qi stagnation that has led to the formation of heat. The Liver stores blood and smoothes the flow of qi in the body to disperse stagnation. If Liver qi is stagnant, various pains in the chest, abdomen, and hypochondrium occur, as the Liver channel passes through these regions. Many of these symptoms are intermittent in nature, as onset and

relief are closely associated with emotions. A bitter taste in the mouth, red tongue body, a yellow tongue coating, and a wiry, rapid pulse indicate that the qi stagnation has created interior heat.

Chuan Lian Zi (Fructus Toosendan) soothes Liver qi and sedates Liver fire. *Yan Hu Suo* (Rhizoma Corydalis) activates qi and blood circulation to relieve pain. Together, the two herbs soothe the Liver and activate qi and blood circulation to relieve pain.

MODIFICATIONS

- With hypochondriac distention and pain due to Liver qi stagnation or Liver fire rising, add *Chai Hu* (Radix Bupleuri), *Yu Jin* (Radix Curcumae), and *Zhi Zi* (Fructus Gardeniae).
- For dysmenorrhea, add *Xiang Fu* (Rhizoma Cyperi), *Yi Mu Cao* (Herba Leonuri), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Hong Hua* (Flos Carthami).
- With hernial pain from qi stagnation, add *Ju He* (Semen Citri Reticulatae) and *Li Zhi He* (Semen Litchi).
- When cold accumulation causes hernial pain, add *Wu Zhu Yu* (Fructus Evodiae) and *Xiao Hui Xiang* (Fructus Foeniculi).
- With gallstones or kidney stones, add *Jin Qian Cao* (Herba Lysimachiae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Yu Jin* (Radix Curcumae), and *Hai Jin Sha* (Spora Lygodii).

Jin Ling Zi San (Melia Toosendan Powder)

Jin Ling Zi San (Melia Toosendan Powder)

CAUTIONS / CONTRAINDICATIONS

Jin Ling Zi San contains herbs that activate qi and blood circulation and should be used with caution during pregnancy.

CLINICAL STUDIES AND RESEARCH

- Biliary ascariasis:** All 40 patients in one study reported complete recovery from biliary ascariasis using *Jin Ling Zi San*, *Si Ni San* (Frigid Extremities Powder), *Bing Lang* (Semen Arecae), *Wu Mei* (Fructus Mume), *Huang Lian* (Rhizoma Coptidis), *Zi Su Ye* (Folium Perillae), and others as needed. The duration of treatment ranged from 1-10 days, with an average of 4.2 days.¹
- Peptic ulcer disease:** One study reported marked effectiveness in relieving pain associated with gastric or duodenal ulcers using *Jin Ling Zi San*, *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), and other herbs as needed. The herbal formula contained *Yan Hu Suo* (Rhizoma Corydalis) 9g, *Chuan Lian Zi* (Fructus Toosendan) 9g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 9g, *Hai Piao Xiao* (Endoconcha Sepiae) 9g, *Xiang Fu* (Rhizoma Cyperi) 9g, *Pu Gong Ying* (Herba Taraxaci) 15g, *Chen Xiang* (Lignum Aquilariae Resinatum) 12g, *Wu Yao* (Radix Linderae) 6g, and *Bai Ji* (Rhizoma Bletillae) 15g. Furthermore, *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) were added for qi deficiency; *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) and *Rou Gui* (Cortex Cinnamomi) for Stomach cold; *Sha Shen* (Radix Glehniae seu Adenophorae) and *Mai Dong* (Radix Ophiopogonis) for Stomach yin deficiency; and *E Jiao* (Colla Corii Asini), *Zi Zhu* (Folium Callicarpae), and *San Qi* (Radix et Rhizoma Notoginseng) for gastrointestinal bleeding. Of 46 patients, the study reported complete recovery in 29 cases, improvement in 12 cases, and no effect in 5 cases. The overall rate of effectiveness was 89%.²

RELATED FORMULAS

Yán Hú Suǒ Sǎn (Corydalis Powder)

延胡索散

Pinyin Name: *Yan Hu Suo San*

Literal Name: Corydalis Powder

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

Dang Gui (Radix Angelicae Sinensis), *jin* (soaked)
in liquor, *cuo* (grated) and *chao* (dry-fried) 15g
Yan Hu Suo (Rhizoma Corydalis), *chao* (dry-fried) 15g
Pu Huang (Pollen Typhae), *chao* (dry-fried) 15g
Chi Shao (Radix Paeoniae Rubra) 15g
Rou Gui (Cortex Cinnamomi), do not expose to heat 15g
Jiang Huang (Rhizoma Curcumae Longae), *xi* (washed) 9g
Ru Xiang (Gummi Olibanum) 9g

Mo Yao (Myrrha) 9g
Mu Xiang (Radix Aucklandiae), do not expose to heat 9g
Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae
Praeparata cum Melle) 7.5g

The source text recommends: grind the ingredients into coarse powder, cook 12g of the powder and 7 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 large bowls of water until it is reduced to 70%. Take the warm, strained decoction before meals.

Yan Hu Suo San (Corydalis Powder) activates qi and blood circulation to regulate menstruation and relieve pain. Clinically, it may be used for menstrual pain caused by qi and blood stagnation, which is characterized by abdominal pain that radiates to the lower back or ribs. This formula can also be used for painful menstruation accompanied by emotional disturbances.

Jin Ling Zi San and *Yan Hu Suo San* (Corydalis Powder) both relieve pain due to qi and blood stagnation.

- *Jin Ling Zi San* is cold in nature, and thus is more suitable for qi and blood stagnation with interior heat.
- *Yan Hu Suo San* is warm in nature, and stronger in its overall action. It is therefore more suitable for patients with more severe qi and blood stagnation accompanied by interior cold.

Yán Hú Yī Hàò (Corydalis Formula One)

延胡一號

延胡一号

Pinyin Name: *Yan Hu Yi Hao*

Literal Name: Corydalis Formula One

Original Source: *An Hui Zhong Yi Xue Yuan* (Anhui University School of Medicine) in 1990

Yan Hu Suo (Rhizoma Corydalis)
Dan Shen (Radix et Rhizoma Salviae Miltiorrhizae)
Chuan Xiong (Rhizoma Chuanxiong)
Bai Zhi (Radix Angelicae Dahuricae)
Ge Gen (Radix Puerariae Lobatae)

The main actions of this formula are to activate qi and blood circulation, and relieve pain. Clinically, it may be used for pain due to qi and blood stagnation, especially in the upper body, such as headaches and migraines.

Yán Hú Èr Hàò (Corydalis Formula Two)

延胡二號

延胡二号

Pinyin Name: *Yan Hu Er Hao*

Literal Name: Corydalis Formula Two

Jin Ling Zi San (Melia Toosendan Powder)

Original Source: *An Hui Zhong Yi Xue Yuan* (Anhui University School of Medicine) in 1990

Yan Hu Suo (Rhizoma Corydalis)
San Leng (Rhizoma Sparganii)
E Zhu (Rhizoma Curcumae)
Gui Zhi (Ramulus Cinnamomi)
Dang Gui (Radix Angelicae Sinensis)

This formula activates qi and blood circulation and relieves pain. Clinically, it may be used for pain due to qi and blood stagnation, especially in the extremities, such as leg and arm pain.

AUTHORS' COMMENTS

This formula is named *Jin Ling Zi San* (Melia Toosendan Powder) because *Jin Ling Zi* (Fructus Toosendan) is the chief herb. *Jin Ling Zi* and *Chuan Lian Zi* both refer to the

same herb: Fructus Toosendan. Today, the formula's name remains the same, but the standard herb name used today is *Chuan Lian Zi*.³

Jin Ling Zi San is the key formula used to treat hypochondriac pain caused by Liver qi stagnation turning into Liver fire. It is also an excellent formula for treating pain associated with duct obstruction, such as gallstones or kidney stones.

Bàn Xià Hòu Pò Tāng (Pinellia and Magnolia Bark Decoction)

半夏厚樸湯

半夏厚朴汤

Pinyin Name: *Ban Xia Hou Po Tang*

Literal Name: Pinellia and Magnolia Bark Decoction

Alternate Names: *Pan Hsia Hou Pu Tang*, *Ban Xia Hou Pu Tang*, Pinellia and Magnolia Decoction, Pinellia and Magnolia Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ban Xia</i> (Rhizoma Pinelliae)	1 cup [12g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis)	9g
<i>Fu Ling</i> (Poria)	12g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	15g [9g]
<i>Zi Su Ye</i> (Folium Perillae)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 7 cups [1,400 mL] of water and reduce it to 4 cups [800 mL]. Take the warm, strained decoction in four equally-divided doses, three times during the day and one time at night. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Activates qi and disperses stagnation

2. Directs reversed flow of qi downward
3. Dissolves phlegm

CLINICAL MANIFESTATIONS

Mei he qi (plum-pit qi): a sensation that a foreign object (such as a plum pit) is stuck in the throat and cannot be spit out or swallowed, difficulty in swallowing food, possible coughing or vomiting, and chest and hypochondriac fullness and oppression.

Bàn Xià Hòu Pò Tāng (Pinellia and Magnolia Bark Decoction)

CLINICAL APPLICATIONS

Globus hystericus, pharyngeal paraesthesia, swallowing disorder in aspiration pneumonia, sleep choking syndrome (sleep apnea and hypopnea), swallowing disorder in Parkinson's disease, hysteria, neurasthenia, nervousness, stress and depression, panic disorder, chronic laryngitis, tracheitis, enteritis, esophageal spasms, gastroptosis, and gastroatonia.

EXPLANATION

Mei he qi (plum-pit *qi*) is the feeling of having a foreign substance (such as a plum pit) obstructing the throat which cannot be expectorated nor swallowed. Since there is no physical obstruction, the feeling cannot be relieved by expectorating or swallowing. This condition usually begins with the formation of Liver *qi* stagnation caused by emotional disturbances. As Liver *qi* stagnates, it also interferes with *qi* flow in the Lung and Stomach. As a result of *qi* stagnation, body fluids accumulate and eventually lead to phlegm obstruction. This condition of *qi* stagnation and phlegm obstruction affects various parts of the body, including the throat (a feeling that there is a foreign object stuck in the throat), Lung (coughing and fullness of the chest and hypochondrium), and Stomach (vomiting).

Ban Xia Hou Po Tang (Pinellia and Magnolia Bark Decoction) contains *Ban Xia* (Rhizoma Pinelliae) as the chief herb to dissolve and disperse phlegm, and restore the descending function of the Stomach to relieve vomiting. *Hou Po* (Cortex Magnoliae Officinalis) activates *qi* to help *Ban Xia* (Rhizoma Pinelliae) clear the phlegm obstruction; it also directs the reversed flow of Lung and Stomach *qi* downward to relieve fullness, coughing and vomiting. *Fu Ling* (Poria) helps *Ban Xia* (Rhizoma Pinelliae) eliminate dampness and phlegm through diuresis. *Sheng Jiang* (Rhizoma Zingiberis Recens) disperses stagnation and

harmonizes the Stomach and relieves vomiting. Aromatic *Zi Su Ye* (Folium Perillae) regulates the Lung *qi* flow and smoothes Liver *qi*.

MODIFICATIONS

- With more phlegm and saliva, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- When there is cough and dyspnea, add *Bei Mu* (Bulbus Fritillariae) and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With fullness and distention in the chest and hypochondriac region, add *Mu Xiang* (Radix Aucklandiae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Zhi Qiao* (Fructus Aurantii).
- If accompanied by a dry mouth and throat, add *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), and *Xuan Shen* (Radix Scrophulariae).
- With hoarseness of voice, add *Xuan Shen* (Radix Scrophulariae), *Mai Dong* (Radix Ophiopogonis), *Jie Geng* (Radix Platycodonis), and *Zi Wan* (Radix et Rhizoma Asteris); or *Xiang Sheng Po Di San* (Loud Sound Resembling Broken Flute Powder).
- For phlegm accumulation and stagnation, combine with *Er Chen Tang* (Two-Cured Decoction).
- For food stagnation, combine with *Liu He Tang* (Harmonize the Six Decoction).
- If there is depression, combine with *Yue Ju Wan* (Escape Restraint Pill).
- With palpitations and insomnia, combine with *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction).
- When the *qi* stagnation is severe, add *Xiang Fu* (Rhizoma Cyperi) and *Yu Jin* (Radix Curcumae); or *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver).
- With hypochondriac pain, add *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis).

Ban Xia Hou Po Tang (Pinellia and Magnolia Bark Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Mei he qi</i> (plum-pit <i>qi</i>)	<ul style="list-style-type: none">• Feeling of having a foreign substance obstructing the throat: <i>qi</i> stagnation and phlegm obstruction• Coughing, chest and hypochondrium fullness: phlegm accumulation in the Lung• Vomiting: phlegm accumulation in the Stomach	<ul style="list-style-type: none">• Activates <i>qi</i> and disperses stagnation• Directs reversed flow of <i>qi</i> downward• Dissolves phlegm	<ul style="list-style-type: none">• <i>Ban Xia</i> (Rhizoma Pinelliae) dissolves and disperses phlegm and restores the descending function of the Stomach.• <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates <i>qi</i> to clear phlegm obstruction, and reverses ascending Lung and Stomach <i>qi</i>.• <i>Fu Ling</i> (Poria) eliminates dampness and phlegm through diuresis.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonizes the Stomach.• <i>Zi Su Ye</i> (Folium Perillae) regulates Lung <i>qi</i> flow and smoothes Liver <i>qi</i> circulation.

Bàn Xià Hòu Pò Tāng (Pinellia and Magnolia Bark Decoction)

- If there is throat pain, add *Xuan Shen* (Radix Scrophulariae) and *Jie Geng* (Radix Platycodonis).
- With throat spasms and tightness, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Jie Geng* (Radix Platycodonis).
- With deficiency and cold of the Stomach, add *Wu Zhu Yu* (Fructus Evodiae).
- With stress and anxiety due to Liver qi stagnation, add *Chai Hu* (Radix Bupleuri), *Yu Jin* (Radix Curcumae), *Xiang Fu* (Rhizoma Cyperi), and *Qing Pi* (Pericarpium Citri Reticulatae Viride).
- With snoring characterized by wind-cold, add *Xin Yi San* (Magnolia Flower Powder).
- With snoring characterized by wind-heat, add *Cang Er Zi San* (Xanthium Powder).

CAUTIONS / CONTRAINDICATIONS

- *Ban Xia Hou Po Tang* is not suitable for yin-deficient patients with red cheeks, red tongue, scanty tongue coating, and/or a bitter taste, because many herbs in this formula are acrid, bitter, warm, and drying.
- Patients with internal heat due to qi stagnation should not use this formula.

PHARMACOLOGICAL EFFECTS

1. **Sedative:** Administration of this formula in rats at 4 g/kg/day for 6 days was associated with a reduction of spontaneous physical activities. The effect was more obvious in a dark environment, and less in a bright one. The sedative effect lasted for approximately 2 days upon discontinuation of the herbal therapy. Another report states that the use of this formula at 2-4 g/kg prolonged sleeping time induced by phenobarbitals.¹
2. **Antiallergic:** According to one report, use of *Ban Xia Hou Po Tang* was effective in treating contact dermatitis in mice.²
3. **Effect on the throat:** *Ban Xia Hou Po Tang* has been used with great success to treat various disorders of the throat, such as *mei he qi* (plum-pit qi), a hoarse voice, swallowing reflex, and others. The mechanism of this effect was attributed to stimulation of neuropeptidergic nerves locally.³
4. **Anxiolytic:** According to one study, administration of *Ban Xia Hou Po Tang* was associated with a marked anxiolytic effect in mice. The effect was attributed to the component honokiol from *Hou Po* (Cortex Magnoliae Officinalis), because administration of the formula without *Hou Po* did not have any anxiolytic effect.⁴

CLINICAL STUDIES AND RESEARCH

1. **Mei he qi (plum-pit qi):** Administration of *Ban Xia Hou Po Tang* plus *Wu Zhu Yu* (Fructus Evodiae) and *Huang Lian* (Rhizoma Coptidis) in 74 patients with plum-pit

qi was associated with complete recovery in 9 cases, improvement in 24 cases, and no effect in 41 cases.⁵

2. **Pharyngeal paraesthesia:** Use of modified *Ban Xia Hou Po Tang* was effective in treating pharyngeal paraesthesia. In addition to *Ban Xia Hou Po Tang* as the base formula, modifications were made by adding *Xiang Fu* (Rhizoma Cyperi), *Chen Pi* (Pericarpium Citri Reticulatae), and *Gua Lou* (Fructus Trichosanthis) for individuals with emotional stress and instability with a feeling of fullness and distention in the chest and hypochondrium; and *Huang Qi* (Radix Astragali), *Sha Shen* (Radix Glehniae seu Adenophorae), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Da Zao* (Fructus Jujubae), and *Mu Dan Pi* (Cortex Moutan) for individuals with qi and yin deficiencies due to chronic illness with fatigue, lack of energy, irritability, and insomnia. Of 34 patients, the study reported complete recovery in 8 cases, significant improvement in 20 cases, moderate improvement in 4 cases, and no effect in 2 cases. The overall effectiveness was 84.1%.⁶
3. **Sleep choking syndrome (sleep apnea and hypopnea):** One case study reported success using *Ban Xia Hou Po Tang* to treat a 44-year-old Japanese male who suffered from multiple episodes of sleep choking syndrome (sleep apnea and hypopnea) almost every night. The patient had normal respiration during sleep with the exception of apnea episodes (0.92 events/h) and hypopnea episodes (2.77 events/hour). The patient had unsuccessful treatment using 500mg of acetazolamide prior to herbal therapy.⁷
4. **Swallowing disorder in aspiration pneumonia:** One study evaluated the therapeutic effect of *Ban Xia Hou Po Tang* for treatment of depressed swallowing reflex in patients with aspiration pneumonia. Of 32 geriatric patients (mean age 74.2 +/- 1.7 years), 24 were treated with herbs (7.5 g/day) and 12 with placebo. After 4 weeks of treatment, the herb group responded much better than the placebo group, using various measurements of swallowing reflex. The researchers suggested that *Ban Xia Hou Po Tang* improves the impaired swallowing reflex and may help to prevent aspiration pneumonia in the elderly.⁸
5. **Swallowing disorder in Parkinson's disease:** Use of *Ban Xia Hou Po Tang* was beneficial in treating 23 patients with Parkinson's disease (PD). After 4 weeks of herbal therapy, it was noted that this formula significantly improved the swallowing reflex in PD patients, and therefore can be a hopeful candidate for preventing aspiration pneumonia in PD.⁹
6. **Parkinson's disease:** According to one study, 8 patients with Parkinson's disease were treated with herbs for 2 years with significant improvement in 6 cases and

Bàn Xià Hòu Pò Tāng (Pinellia and Magnolia Bark Decoction)

moderate improvement in 2 cases. The herbal treatment contained 2 formulas: *Ban Xia Hou Po Tang* plus *Yi Gan San* (Restrain the Liver Powder).¹⁰

7. **Enteritis:** One study reported good results using *Ban Xia Hou Po Tang* plus *Ping Wei San* (Calm the Stomach Powder) to treat acute enteritis. The herbal formula contained *Zi Su Geng* (Caulis Perillae) 6g, *Ban Xia* (Rhizoma Pinelliae) 6g, *Hou Po* (Cortex Magnoliae Officinalis) 4-6g, *Cang Zhu* (Rhizoma Atractylodis) 4-6g, *Fu Ling* (Poria) 9g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. Of 129 patients, the study reported complete recovery in 81 cases, significant improvement in 42 cases, and improvement in 6 cases.¹¹
8. **Dian kuang (mania and withdrawal):** One study reported good results using modified *Ban Xia Hou Po Tang* to treat 21 patients with *dian kuang* (mania and withdrawal). The herbal formula contained *Ban Xia* (Rhizoma Pinelliae) 10g, *Hou Po* (Cortex Magnoliae Officinalis) 10g, *Fu Ling* (Poria) 10g, *Zi Su Geng* (Caulis Perillae) 7g, *Zhen Zhu Mu* (Concha Margaritiferae) 10g, *He Huan Pi* (Cortex Albiziae) 10g, *Jiu Jie Chang Pu* (Rhizoma Anemones Altaicae) 10g, *Dan Zhu Ye* (Herba Lophatheri) 5g, *Lian Zi Xin* (Plumula Nelumbinis) 10g, and others as needed. The duration of treatment ranged from 10 to 45 days. The study reported recovery in 19 of 21 cases, with 2 cases needing chlorpromazine as addition therapy.¹²
9. **Hysteria:** One study reported successful treatment in 103 of 104 patients with hysteria characterized by phlegm stagnation using modified *Ban Xia Hou Po Tang*. The duration of treatment ranged from 5-27 days. During follow-up visits 7 years later, the study reported stabilization in 91 of 94 who returned.¹³
10. **Stress and depression:** One study evaluated the clinical usefulness of herbal formulas for the treatment of stress and depression by examining the modulatory effects of the herbs on the hypothalamo-pituitary-adrenal axis and autonomic nervous function. Of several formulas tested, three were found to be effective in lowering plasma ACTH and cortisol levels under stress. The study stated that the modulatory effects of these formulas might be beneficial in treating stress-related diseases. Three formulas found to be effective were *Liu Jun Zi Tang* (Six-Gentlemen Decoction), *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium), and *Ban Xia Hou Po Tang*.¹⁴
11. **Panic disorder:** Four patients diagnosed with panic disorder with agoraphobia in accordance with the Diagnostic and Statistical Manual of Mental Disorders (DSM) criteria were successfully treated with herbal medicine. Two patients were treated with *Ban Xia Hou Po Tang*, and two with *Jia Wei Xiao Yao San* (Augmented

Rambling Powder). Both formulas successfully relieved panic attacks, anticipatory anxiety, and agoraphobia. The study concluded that these formulas may be useful as additional or alternative treatments for panic disorder.¹⁵

AUTHORS' COMMENTS

Ban Xia Hou Po Tang is the most famous formula for treating the feeling of a foreign object stuck in the throat, commonly known as *mei he qi* (plum-pit qi) in traditional Chinese medicine, or globus hystericus in Western medicine.

Zhǐ Shí Xiè Bái Guì Zhī Tāng

(Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction)

枳實薤白桂枝湯

枳实薤白桂枝汤

Pinyin Name: *Zhi Shi Xie Bai Gui Zhi Tang*

Literat Name: Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	4 pieces [12g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis)	12g
<i>Xie Bai</i> (Bulbus Allii Macrostemonis)	0.5 cup [9-12g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	3g [6g]
<i>Gua Lou</i> (Fructus Trichosanthis), <i>dao</i> (pounded)	1 piece [12-24g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis) first in 5 cups [1,000 mL] of water and reduce it down to 2 cups [400 mL]. Discard the residue, add the rest of the ingredients to the strained decoction, and cook it again to bring it to a few boils. Take the warm, strained decoction in three equally-divided doses in one day. Today, the decoction may be prepared using the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Unblocks yang and disperses stagnations
2. Dispels phlegm and directs qi flow downward

CLINICAL MANIFESTATIONS

Xiong bi (painful obstruction of the chest): chest fullness and pain, chest pain radiating to the back, wheezing,

coughing with sputum, shortness of breath, a sensation of qi rushing upward from the hypochondrium to the heart, a white and greasy tongue coating, and a deep, wiry pulse or tight pulse.

CLINICAL APPLICATIONS

Pleuritis, epigastric pain, hypochondriac pain, and cholecystitis.

EXPLANATION

Zhi Shi Xie Bai Gui Zhi Tang (Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction) is designed to treat *xiong bi* (painful obstruction of the chest) due to yang deficiency, phlegm accumulation and qi stagnation in the chest region. Chest yang deficiency may result in abnormal dispersion and distribution of fluids in the body, leading to phlegm accumulation. Accumulation of phlegm may further lead to qi stagnation, which then

Zhi Shi Xie Bai Gui Zhi Tang (Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Xiong bi</i> (painful obstruction of the chest)	<ul style="list-style-type: none">• Chest fullness and pain: qi stagnation in the chest• Coughing and wheezing: phlegm stagnation affecting Lung qi circulation• White and greasy tongue coating: phlegm and damp accumulation• A deep, wiry or tight pulse: cold in the interior	<ul style="list-style-type: none">• Unblocks yang and disperses stagnations• Dispels phlegm and directs qi flow downward	<ul style="list-style-type: none">• <i>Zhi Shi</i> (Fructus Aurantii Immaturus) activates qi circulation and breaks up qi stagnation to relieve chest fullness and pain.• <i>Hou Po</i> (Cortex Magnoliae Officinalis) redirects rising qi, dispels phlegm, and relieves fullness.• <i>Xie Bai</i> (Bulbus Allii Macrostemonis) warms and unblocks yang and disperses stagnation in the chest.• <i>Gui Zhi</i> (Ramulus Cinnamomi) activates yang to disperse cold.• <i>Gua Lou</i> (Fructus Trichosanthis) disperses stagnation and dispels phlegm.

Zhǐ Shí Xiè Bái Guì Zhī Tāng

(Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction)

causes chest fullness and pain. Qi stagnation may cause reversed flow of qi, resulting in radiating pain and a sensation of qi rushing upwards. If phlegm interferes with the flow of Lung qi, then symptoms such as coughing and wheezing will occur. A white, greasy tongue coating and a deep, wiry pulse or tight pulse suggest cold and dampness in the interior.

In this formula, *Zhi Shi* (Fructus Aurantii Immaturus) activates qi circulation and breaks up qi stagnation to relieve the feeling of fullness and pain. *Hou Po* (Cortex Magnoliae Officinalis) redirects rising qi, dispels phlegm, and relieves chest fullness. *Xie Bai* (Bulbus Allii Macrostemonis), acrid and warm, is able to warm and unblock yang and disperse stagnation in the chest. *Gui Zhi* (Ramulus Cinnamomi) activates yang to disperse cold. *Gua Lou* (Fructus Trichosanthis) disperses stagnation and dispels phlegm.

RELATED FORMULAS

Jia Wei Gua Lou Xie Bai Tang (Augmented Trichosanthes Fruit and Chinese Chive Decoction) unblocks yang, activates qi and blood circulation, and dispels qi and blood stagnation. This formula may be used clinically to treat *xiong bi* (painful obstruction of the chest) with symptoms such as chest fullness and pain, chest pain radiating to the back, dyspnea, shortness of breath, and a dark purple tongue with prominent or red petechiae.

AUTHORS' COMMENTS

Zhī Shí Xiè Bái Guì Zhī Tāng, *Gua Lou Xie Bai Bai Jiu Tang* (Trichosanthes Fruit, Chinese Chive, and Wine Decoction) and *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction) all relieve *xiong bi* (painful obstruction of the chest) by unblocking yang, dispersing stagnation, activating qi circulation, and dispelling phlegm.

- *Zhī Shí Xiè Bái Guì Zhī Tāng* more strongly unblocks yang and dispels interior cold. It is used primarily for severe cases of *xiong bi* caused by stagnation of qi and phlegm.
- *Gua Lou Xie Bai Bai Jiu Tang* has a milder function of activating yang and dispelling phlegm, and therefore is more suitable for mild *xiong bi*.
- *Gua Lou Xie Bai Ban Xia Tang* more strongly dispels phlegm and relieves stagnation, and therefore is more suitable for the treatment of *xiong bi* caused by severe phlegm stagnation.

Jú Hé Wán (Tangerine Seed Pill)

COMPOSITION

<i>Ju He</i> (Semen Citri Reticulatae), <i>chao</i> (dry-fried)	30g [9g]
<i>Chuan Lian Zi</i> (Fructus Toosendan), <i>chao</i> (dry-fried)	30g [9g]
<i>Mu Xiang</i> (Radix Aucklandiae), do not expose to heat	15g [6g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>chao</i> (dry-fried) with ginger juice	15g [6g]
<i>Zhī Shí</i> (Fructus Aurantii Immaturus), <i>chao</i> (dry-fried) with bran	15g [6g]
<i>Tao Ren</i> (Semen Persicae), <i>chao</i> (dry-fried) with bran	30g [9g]
<i>Yan Hu Suo</i> (Rhizoma Corydalis), <i>chao</i> (dry-fried)	15g [6g]
<i>Guì Xīn</i> (Cortex Rasus Cinnamomi), do not expose to heat	15g [6g]
<i>Mu Tong</i> (Caulis Akebiae)	15g [6g]
<i>Hai Zao</i> (Sargassum), <i>xi</i> (washed)	30g [9g]
<i>Kun Bu</i> (Thallus Eckloniae), <i>xi</i> (washed)	30g [9g]
<i>Hai Dai</i> (Thallus Laminariae), <i>xi</i> (washed)	30g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into a fine powder and forming into small pills with grain-based liquor. Take 70 pills [9g] per dose with salted

grain-based liquor or lightly-salted water on an empty stomach one to two times daily. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

Jú Hé Wán (Tangerine Seed Pill)

CHINESE THERAPEUTIC ACTIONS

- 1. Activates qi circulation and stops pain
- 2. Softens hardness and disperses nodules

CLINICAL MANIFESTATIONS

Hernia caused by damp-cold: swelling and enlargement of the testicles, hardening (like a rock) of the testicles, and pain radiating from the testes to the abdomen.

CLINICAL APPLICATIONS

Hernia, hydrocele, orchitis, epididymitis, testitis, and fallopian tube obstruction.

EXPLANATION

Ju He Wan (Tangerine Seed Pill) is designed to treat hernia with swelling and enlargement of the testicles from damp-cold invading the Liver channel. Because the *jueyin* channel of the Liver passes through the inguinal region, it is closely related to the external genitalia. In the early stage of damp-cold attacking the Liver channel, hernia may be characterized by swelling and enlargement of the testicles. In the later stage, when qi and blood become stagnant, the testicles may harden, with pain radiating from the testes to the lower abdomen.

Ju He (Semen Citri Reticulatae), which activates qi circulation and disperses qi stagnation, is indicated specifically

for treating hernia. *Chuan Lian Zi* (Fructus Toosendan) and *Mu Xiang* (Radix Aucklandiae) assist *Ju He* (Semen Citri Reticulatae) in activating qi circulation and relieving pain. *Hou Po* (Cortex Magnoliae Officinalis) activates qi circulation to dry dampness. *Zhi Shi* (Fructus Aurantii Immaturus) activates qi and disperses any hardness or stagnation. *Tao Ren* (Semen Persicae) activates blood circulation and disperses blood stagnation. *Yan Hu Suo* (Rhizoma Corydalis) activates qi and blood circulation to stop pain. *Gui Xin* (Cortex Rasus Cinnamomi) warms the Kidney and Liver to disperse cold. *Mu Tong* (Caulis Akebiae) opens the blood vessels of the lower *jiao* and dispels dampness through diuresis. *Hai Zao* (Sargassum), *Kun Bu* (Thallus Eckloniae) and *Hai Dai* (Thallus Laminariae) soften hardness and disperse nodules.

MODIFICATIONS

- When there is severe pain due to blood stagnation, add *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- When there is severe pain due to cold, add *Xiao Hui Xiang* (Fructus Foeniculi) and *Wu Zhu Yu* (Fructus Evodiae). The doses of *Gui Xin* (Cortex Rasus Cinnamomi) and *Mu Xiang* (Radix Aucklandiae) should also be increased.
- When there is severe pain due to heat, add *Huang Qin* (Radix Scutellariae), *Huang Bo* (Cortex Phellodendri Chinensis), and *Long Dan* (Radix et Rhizoma Gentianae).

Ju He Wan (Tangerine Seed Pill)

Hernia caused by damp-cold	<ul style="list-style-type: none">• Hernia with swelling and enlargement of the testicles: damp-cold attacking the Liver channel• Hardening of the testicles with pain radiating to the abdomen: qi and blood stagnation	<ul style="list-style-type: none">• Activates qi circulation and stops pain• Softens hardness and disperses nodules	<ul style="list-style-type: none">• <i>Ju He</i> (Semen Citri Reticulatae) activates qi circulation and disperses qi stagnation to treat hernia.• <i>Chuan Lian Zi</i> (Fructus Toosendan) and <i>Mu Xiang</i> (Radix Aucklandiae) activate qi circulation and stop pain.• <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates qi circulation to dry dampness.• <i>Zhi Shi</i> (Fructus Aurantii Immaturus) activates qi and disperses any hardness or stagnation.• <i>Tao Ren</i> (Semen Persicae) activates blood circulation and disperses blood stagnation.• <i>Yan Hu Suo</i> (Rhizoma Corydalis) activates qi and blood circulation to stop pain.• <i>Gui Xin</i> (Cortex Rasus Cinnamomi) warms the Kidney and Liver to disperse coldness.• <i>Mu Tong</i> (Caulis Akebiae) opens the blood vessels of the lower <i>jiao</i> and dispels dampness through diuresis.• <i>Hai Zao</i> (Sargassum), <i>Kun Bu</i> (Thallus Eckloniae) and <i>Hai Dai</i> (Thallus Laminariae) soften hardness and disperse nodules.

Jú Hé Wán (Tangerine Seed Pill)

- With redness, swelling, and itching of the scrotum, add *Huang Bo* (Cortex Phellodendri Chinensis), *Tu Fu Ling* (Rhizoma Smilacis Glabrae), and *Che Qian Zi* (Semen Plantaginis).

CLINICAL STUDIES AND RESEARCH

Female infertility due to obstructed fallopian tubes:

According to one study, use of 9g of *Ju He Wan*, twice daily for 1-6 months, was effective in treating infertility due to blockage of the fallopian tubes. Of 96 patients, the study reported successful pregnancy in 39 cases, unblocked fallopian tubes in 25 cases, and improvement in 32 cases.¹

AUTHORS' COMMENTS

Ju He Wan has been used historically to treat damp-cold hernia. Today, it has been found that this formula is also

effective in treating female infertility arising from blockage of the fallopian tubes.

Ju He Wan, *Tian Tai Wu Yao San* (Top-Quality Lindera Powder) and *Nuan Gan Jian* (Warm the Liver Decoction) are three formulas commonly used to treat hernias caused by cold. The differences are as follows:

- *Ju He Wan* treats hernia caused by cold and dampness, in which the testicles are swollen, enlarged, and hardened.
- *Tian Tai Wu Yao San* treats intestinal hernia in which there is severe cold and qi stagnation.
- *Nuan Gan Jian* treats hernia characterized by Liver and Kidney deficiencies with cold accumulation and qi stagnation. Hernia is usually accompanied by lower abdominal pain without anatomical or physical changes.

Reference

1. *Shan Xi Zhong Yi* (Shanxi Chinese Medicine) 1992;8(4):17.

Tiān Tái Wū Yào Sǎn (Top-Quality Lindera Powder)

天臺烏藥散
天台乌药散

Pinyin Name: *Tian Tai Wu Yao San*

Literal Name: Top-Quality Lindera Powder

Original Source: *Yi Xue Fa Ming* (Medical Innovations) by Li Gao in the Jin Dynasty

COMPOSITION

<i>Wu Yao</i> (Radix Linderae)	15g [12g]
<i>Mu Xiang</i> (Radix Aucklandiae)	15g [6g]
<i>Xiao Hui Xiang</i> (Fructus Foeniculi)	15g [6g]
<i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride)	15g [6g]
<i>Gao Liang Jiang</i> (Rhizoma Alpiniae Officinarum)	15g [9g]
<i>Bing Lang</i> (Semen Arecae)	2 pieces [9g]
<i>Chuan Lian Zi</i> (Fructus Toosendan)	10 pieces [12g]
<i>Ba Dou</i> (Semen Crotonis)	70 pieces [12g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends cracking open *Ba Dou* (Semen Crotonis) and dry-frying it with *Chuan Lian Zi* (Fructus Toosendan) and bran until the color turns from brown to black. Discard *Ba Dou* (Semen Crotonis) and the bran. Grind *Chuan Lian Zi* (Fructus Toosendan) and the other ingredients into powder. Take 3g of the powder per dose with warm grain-based liquor.

Today, this formula may be prepared as a decoction with the doses suggested in brackets above. First, dry-fry *Ba Dou* (Semen Crotonis) and *Chuan Lian Zi* (Fructus Toosendan) until their color turns from brown to black. Discard *Ba Dou* (Semen Crotonis), and cook *Chuan Lian Zi* (Fructus Toosendan) with the rest of the herbs in water. Take the warm, strained decoction with a small amount of grain-based liquor.

Tiān Tái Wú Yào Sǎn (Top-Quality Lindera Powder)

CHINESE THERAPEUTIC ACTIONS

- 1. Activates qi circulation and spreads Liver qi
- 2. Disperses cold and stops pain

CLINICAL MANIFESTATIONS

Hernia due to cold accumulation and qi stagnation: hernia of the small intestine, pain of the lower abdomen, and pain and swelling of the testicles.

CLINICAL APPLICATIONS

Hernia and leukorrhea.

EXPLANATION

The *jueyin* channel of the Liver passes through the inguinal region and the abdomen. Therefore, if cold stagnates along the pathway of the Liver channel, hernia could occur. *Tian Tai Wu Yao San* (Top-Quality Lindera Powder) is designed to treat hernia of the small intestine with pain and swelling of the testicles due to cold accumulation and qi stagnation.

This formula uses *Wu Yao* (Radix Linderae) to activate qi, spread Liver qi, and disperse cold to relieve pain. *Mu Xiang* (Radix Aucklandiae), *Xiao Hui Xiang* (Fructus Foeniculi), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) activate qi circulation, disperse stagnation, and dispel cold. *Bing Lang* (Semen Arecae) enters the lower *jiao* to activate qi circulation, dissolve stagnation, and disperse hardness. *Chuan Lian Zi* (Fructus Toosendan) activates qi circulation and disperses stagnation. Lastly, the hot nature of *Ba Dou* (Semen Crotonis) reduces the cold influence of *Chuan Lian Zi* (Fructus Toosendan) to enhance the overall benefit and minimize side effects. However, *Ba Dou* (Semen Crotonis) is discarded as its drastic purgative effect may adversely affect the patient.

MODIFICATIONS

- If there is severe cold, add *Wu Zhu Yu* (Fructus Evodiae) and *Rou Gui* (Cortex Cinnamomi).
- When there is blood stagnation, add *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami).
- With severe pain, add *Chen Xiang* (Lignum Aquilariae Resinatum).
- To enhance the treatment of hernia, add *Ju He* (Semen Citri Reticulatae), *Li Zhi He* (Semen Litchi), *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi), and *Yan Hu Suo* (Rhizoma Corydalis).
- With a feeling of prolapse and swelling, add *Li Zhi He* (Semen Litchi), *Ju He* (Semen Citri Reticulatae); or *Ju He Wan* (Tangerine Seed Pill).

CAUTIONS / CONTRAINDICATIONS

Tian Tai Wu Yao San is contraindicated when the hernia is caused by damp-heat in the lower *jiao*.

RELATED FORMULAS

Sān Céng Huí Xiāng Wán
(Fennel Seed Pill with Three Levels)
三層茴香丸
三层茴香丸

Pinyin Name: *San Ceng Hui Xiang Wan*
Literal Name: Fennel Seed Pill with Three Levels
Original Source: *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

San Ceng Hui Xiang Wan (Fennel Seed Pill with Three Levels) actually consists of three formulas, or levels, to be used for different degrees of severity. The treatment protocol is to begin with the Level One formula, which should be sufficient for mild cases of hernial pain. If the

Tian Tai Wu Yao San (Top-Quality Lindera Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Hernia due to cold accumulation and qi stagnation	Hernia of the small intestine, lower abdominal pain, and testicular swelling and pain: cold accumulation and qi stagnation along the Liver channel	<ul style="list-style-type: none">• Activates qi circulation and spreads Liver qi• Disperses cold and stops pain	<ul style="list-style-type: none">• <i>Wu Yao</i> (Radix Linderae) activates qi, spreads Liver qi, and disperses cold to relieve pain.• <i>Mu Xiang</i> (Radix Aucklandiae), <i>Xiao Hui Xiang</i> (Fructus Foeniculi), <i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride) and <i>Gao Liang Jiang</i> (Rhizoma Alpiniae Officinarum) activate qi circulation, disperse stagnation and dispel cold.• <i>Bing Lang</i> (Semen Arecae) enters the lower <i>jiao</i> to activate qi circulation, dissolve stagnation and disperse hardness.• <i>Chuan Lian Zi</i> (Fructus Toosendan) activates qi circulation and disperses stagnation.

Tiān Tái Wū Yào Sǎn (Top-Quality Lindera Powder)

pain continues, Level Two and then Level Three formulas may be used.

Level One:

<i>Xiao Hui Xiang</i> (Fructus Foeniculi), <i>chao</i> (dry-fried) with salt till yellow	30g
<i>Sha Shen</i> (Radix Glehniae seu Adenophorae), <i>xi</i> (washed)	30g
<i>Chuan Lian Zi</i> (Fructus Toosendan), <i>pao</i> (blast-fried)	30g
<i>Mu Xiang</i> (Radix Aucklandiae)	30g

Level Two:

<i>Xiao Hui Xiang</i> (Fructus Foeniculi), <i>chao</i> (dry-fried) with salt till yellow	30g
<i>Sha Shen</i> (Radix Glehniae seu Adenophorae), <i>xi</i> (washed)	30g
<i>Chuan Lian Zi</i> (Fructus Toosendan), <i>pao</i> (blast-fried)	30g
<i>Mu Xiang</i> (Radix Aucklandiae)	30g
<i>Bi Bo</i> (Fructus Piperis Longi)	30g
<i>Bing Lang</i> (Semen Arecae)	15g

Level Three:

<i>Xiao Hui Xiang</i> (Fructus Foeniculi), <i>chao</i> (dry-fried) with salt till yellow	30g
<i>Sha Shen</i> (Radix Glehniae seu Adenophorae), <i>xi</i> (washed)	30g
<i>Chuan Lian Zi</i> (Fructus Toosendan), <i>pao</i> (blast-fried)	30g
<i>Mu Xiang</i> (Radix Aucklandiae)	30g
<i>Bi Bo</i> (Fructus Piperis Longi)	30g
<i>Bing Lang</i> (Semen Arecae)	15g
<i>Fu Ling</i> (Poria)	120g
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	15-30g

The source text recommends grinding all the ingredients into powder, and mixing with rice paste to form pills. The pills should resemble *Lu Dou* (Semen Phaseoli Radiati) in size. Take 20-30 pills per dose on an empty stomach, three times daily with warm grain-based liquor or salted water. The dose may be increased up to 30-40 pills depending on the severity of the condition.

The main actions of these three formula are to warm the Kidney, dispel cold, regulate Liver qi circulation, and relieve hernial pain. Clinically, the patient may have a

“cold hernia” characterized by lower abdominal pain, cold testicles, enlargement and hardening of the testicles, and an enlarged scrotum that makes walking difficult.

Dǎo Qì Tāng (Conduct the Qi Decoction)

導氣湯
导气汤

Pinyin Name: *Dao Qi Tang*

Literal Name: Conduct the Qi Decoction

Original Source: *Shen Shi Zun Sheng Shu* (Master Shen's Book for Revering Life) by Shen Jin-Ao in 1773

<i>Chuan Lian Zi</i> (Fructus Toosendan)	12g
<i>Mu Xiang</i> (Radix Aucklandiae)	9g
<i>Xiao Hui Xiang</i> (Fructus Foeniculi)	6g
<i>Wu Zhu Yu</i> (Fructus Evodiae), <i>pao</i> (blast-fried) with liquid	3g

The source text recommends preparing the ingredients as a decoction. *Dao Qi Tang* (Conduct the Qi Decoction) activates qi circulation, spreads Liver qi, disperses cold, and relieves hernial pain. Clinically, this formula treats painful cold hernia.

AUTHORS' COMMENTS

Ju He Wan (Tangerine Seed Pill) and *Tian Tai Wu Yao San* both treat hernias caused by cold. The differences are as follows:

- *Ju He Wan* treats hernia caused by cold and damp accumulating in the body over a prolonged period of time, which causes the testicles to swell, enlarge, and harden.
- *Tian Tai Wu Yao San* treats hernia in which there is severe qi stagnation caused by Liver and Kidney deficiencies accompanied by coldness.

Tian Tai Wu Yao San, *San Ceng Hui Xiang Wan* (Fennel Seed Pill with Three Levels), and *Dao Qi Tang* (Conduct the Qi Decoction) all treat hernia characterized by qi and cold stagnation, but have the following differences:

- *Tian Tai Wu Yao San* more strongly regulates and spreads Liver qi.
- *San Ceng Hui Xiang Wan* more effectively disperses cold and warms the Kidney.
- *Dao Qi Tang* is similar in function to *Tian Tai Wu Yao San*, but is less potent.

Nuǎn Gān Jiān (Warm the Liver Decoction)

暖肝煎

Pinyin Name: *Nuan Gan Jian*
Literal Name: Warm the Liver Decoction
Original Source: *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	6-9g
<i>Gou Qi Zi</i> (Fructus Lycii)	9g
<i>Rou Gui</i> (Cortex Cinnamomi)	3-6g
<i>Xiao Hui Xiang</i> (Fructus Foeniculi)	6g
<i>Wu Yao</i> (Radix Linderae)	6g
<i>Chen Xiang</i> (Lignum Aquilariae Resinatum)	3g
<i>Fu Ling</i> (Poria)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 3-5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 bowls of water until it is reduced to 70%. Take the warm, strained decoction between meals. Note: If *Chen Xiang* (Lignum Aquilariae Resinatum) is unavailable, *Mu Xiang* (Radix Aucklandiae) may be used as a substitute.

CHINESE THERAPEUTIC ACTIONS

1. Warms the Liver and Kidney
2. Activates qi circulation, dispels cold, and stops pain

CLINICAL MANIFESTATIONS

Hernia due to cold in the Liver and Kidney channels: lower abdominal pain, hernia, and hardening of the testes.

CLINICAL APPLICATIONS

Hernia, chronic appendicitis, and urinary stones.

EXPLANATION

Nuan Gan Jian (Warm the Liver Decoction) is designed to treat hernia caused by cold of the Liver and Kidney.

Because both the Liver and Kidney channels pass through the lower abdomen, cold obstruction may lead to hernia and pain. Effective treatment of this syndrome requires warming the Liver and Kidney to address the cause, and activating qi circulation and dispelling cold to relieve the symptoms.

In this formula, *Dang Gui* (Radix Angelicae Sinensis) and *Gou Qi Zi* (Fructus Lycii) warm and tonify the Kidney and Liver. *Rou Gui* (Cortex Cinnamomi) and *Xiao Hui Xiang* (Fructus Foeniculi) warm the Kidney and Liver to dispel cold. *Wu Yao* (Radix Linderae) and *Chen Xiang* (Lignum Aquilariae Resinatum) activate qi to stop pain. *Fu Ling* (Poria) strengthens the Spleen and dispels dampness. *Sheng Jiang* (Rhizoma Zingiberis Recens) disperses cold and harmonizes the Stomach.

MODIFICATIONS

- With more cold, add *Wu Zhu Yu* (Fructus Evodiae), *Gan Jiang* (Rhizoma Zingiberis), and if necessary, *Fu Zi* (Radix Aconiti Lateralis Praeparata).

Nuan Gan Jian (Warm the Liver Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Hernia due to cold in the Liver and Kidney channels	Hernia, hardening of testes, and lower abdominal pain: cold in the Liver and Kidney channels	<ul style="list-style-type: none">• Warms the Liver and Kidney• Activates qi circulation, dispels cold, and stops pain	<ul style="list-style-type: none">• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Gou Qi Zi</i> (Fructus Lycii) warm and tonify the Kidney and Liver.• <i>Rou Gui</i> (Cortex Cinnamomi) and <i>Xiao Hui Xiang</i> (Fructus Foeniculi) warm the Kidney and Liver to dispel cold.• <i>Wu Yao</i> (Radix Linderae) and <i>Chen Xiang</i> (Lignum Aquilariae Resinatum) activate qi to stop pain.• <i>Fu Ling</i> (Poria) strengthens the Spleen and dispels dampness.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) disperses cold and harmonizes the Stomach.

Nuǎn Gān Jiān (Warm the Liver Decoction)

- With more abdominal pain, add *Xiang Fu* (Rhizoma Cyperi).
- For testicular pain, add *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Ju He* (Semen Citri Reticulatae).

CAUTIONS / CONTRAINDICATIONS

Nuan Gan Jian is contraindicated in hernia with redness, swelling, and pain of the testicles caused by damp-heat in the lower *jiao*.

CLINICAL STUDIES AND RESEARCH

1. **Hernia:** Administration of modified *Nuan Gan Jian* successfully treated hernia in 251 patients between 1 and 70 years of age, with 1-3 year history of illness. The base formula contained *Gou Qi Zi* (Fructus Lycii) 15g, *Dang Gui* (Radix Angelicae Sinensis) 15g, *Fu Ling* (Poria) 15g, *Xiao Hui Xiang* (Fructus Foeniculi) 10g, *Wu Yao* (Radix Linderae) 10g, *Rou Gui* (Cortex Cinnamomi) 10g, and *Chen Xiang* (Lignum Aquilariae Resinatum) 5g. Additional modifications were made based on each patient's differential diagnosis. Herbs also were applied topically as an herbal paste when deemed necessary. The herbs were given in decoction daily for 7 days per course of treatment. Of 251 patients, the study reported resolution of symptoms in 195 cases, significant improvement in 22 cases, slight improvement in 16 cases, and no effect in 18 cases. The overall rate of effectiveness was 92.8%.¹
2. **Chronic appendicitis:** One study reported good results treating chronic appendicitis using herbs both orally and topically. The herbal formula contained *Xiao Hui Xiang* (Fructus Foeniculi) 6g, *Rou Gui* (Cortex Cinnamomi) 6g,

Chen Xiang (Lignum Aquilariae Resinatum) 6g, *Wu Yao* (Radix Linderae) 9g, *Dang Gui* (Radix Angelicae Sinensis) 9g, *Chuan Xiong* (Rhizoma Chuanxiong) 9g, and *Fu Ling* (Poria) 9g. Modifications were made as follows: *Shui Zhi* (Hirudo) 6g for pain upon palpation at lower right corner of the abdomen; and *Zhi Qiao* (Fructus Aurantii) 9g and *Bing Lang* (Semen Arecae) 9g for abdominal distention without pain upon palpation. The treatment protocol was to administer the herbs in decoction. The herb residue was put in a cloth bag while warm, and placed on the lower right corner of the lower abdomen for 30 minutes. The process (oral ingestion and topical application of herbs) was repeated one time per day for 10 days per course of treatment. Of 20 patients, the study reported complete recovery in 9 cases, significant improvement in 6 cases, moderate improvement in 4 cases, and no benefit in 1 case. The overall rate of effectiveness was 95%.²

AUTHORS' COMMENTS

Tian Tai Wu Yao San (Top-Quality Lindera Powder) and *Nuan Gan Jian* are two formulas commonly used in the treatment of hernia:

- *Tian Tai Wu Yao San* is better for hernias characterized more by qi stagnation than by cold.
- *Nuan Gan Jian* warms the Liver and is better for hernias characterized by more cold than qi stagnation.

Hòu Pò Wēn Zhōng Tāng

(Magnolia Bark Decoction for Warming the Middle)

厚樸溫中湯

厚朴温中汤

Pinyin Name: *Hou Po Wen Zhong Tang*

Literal Name: Magnolia Bark Decoction for Warming the Middle

Alternate Name: Magnolia Combination

Original Source: *Nei Wai Shang Bian Huo Lun* (Clarifying Doubts about Injury from Internal and External Causes) by Li Gao in 1247

COMPOSITION

<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>zhi</i> (prepared) with ginger	30g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	30g
<i>Mu Xiang</i> (Radix Aucklandiae)	15g
<i>Cao Dou Kou</i> (Semen Alpiniae Katsumadai)	15g
<i>Gan Jiang</i> (Rhizoma Zingiberis)	2.1g
<i>Fu Ling</i> (Poria)	15g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into a coarse powder. Cook 15g of the powder and 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 2 large bowls of water until it is reduced to one bowl. Take the warm, strained decoction before meals.

CHINESE THERAPEUTIC ACTIONS

1. Warms the middle *jiao* and activates qi circulation
2. Dries dampness and relieves abdominal fullness

CLINICAL MANIFESTATIONS

Damp-cold affecting the Spleen and Stomach: epigastric and abdominal distention, fullness and/or pain, low appetite, lethargy, white tongue coating, and a deep, wiry pulse.

CLINICAL APPLICATIONS

Peptic ulcer, chronic gastritis, chronic enteritis, chronic colitis, inflammatory bowel syndrome, chronic pancreatitis, and leukorrhea.

EXPLANATION

Hou Po Wen Zhong Tang (Magnolia Bark Decoction for Warming the Middle) treats various symptoms caused by damp-cold in the Spleen and Stomach. Dampness has a greasy and sticky character, while cold is constricting and stagnating by nature. Combined, these factors slow the circulation of qi and disrupt the ascending and descending functions of the Spleen and Stomach. As a result, abdominal fullness and pain, poor appetite, and lethargy manifest.

This formula contains *Hou Po* (Cortex Magnoliae Officinalis) to activate qi, dry dampness, and reduce distention and fullness. *Chen Pi* (Pericarpium Citri Reticulatae) and *Mu Xiang* (Radix Aucklandiae) activate qi and relieve pain. *Cao Dou Kou* (Semen Alpiniae Katsumadai) warms the middle *jiao*, dispels cold, dries dampness, and eliminates phlegm. *Gan Jiang* (Rhizoma Zingiberis) and *Sheng Jiang* (Rhizoma Zingiberis Recens) warm the Spleen and Stomach to dispel cold. *Fu Ling* (Poria) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) dispel dampness and strengthen the middle *jiao*.

Because the emphasis of this formula is on warming the middle *jiao*, it is also effective in treating nausea, vomiting, and epigastric pain resulting from cold invading the Stomach.

MODIFICATIONS

- With abdominal pain and diarrhea, add *Cang Zhu* (Rhizoma Atractylodis) and *Sha Ren* (Fructus Amomi).
- With nausea and vomiting of clear watery vomitus, add *Ban Xia* (Rhizoma Pinelliae) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- For food stagnation, add *Shan Zha* (Fructus Crataegi) and *Shen Qu* (Massa Fermentata).
- When accompanied by a cold body and extremities due to deficiency and cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi).
- With edema and a feeling of heaviness in the body, add *Da Fu Pi* (Pericarpium Arecae).
- If there is severe pain, add *Rou Gui* (Cortex Cinnamomi) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).

CAUTIONS / CONTRAINDICATIONS

Avoid cold and raw foods while taking *Hou Po Wen Zhong Tang*.

RELATED FORMULA

Liáng Fù Wán (Galangal and Cyperus Pill)

良附丸

Pinyin Name: *Liang Fu Wan*

Literal Name: Galangal and Cyperus Pill

Original Source: *Liang Fang Yi Ye* (Small Collection of Fine Formulas) by Xie Yuan-Qing in 1842

Gao Liang Jiang (Rhizoma Alpiniae Officinarum),
xi (washed) with liquor 7 times, *bei* (stone baked)
and *yan* (ground) to small particles [9g]
Xiang Fu (Rhizoma Cyperi), *xi* (washed) with
vinegar 7 times, *bei* (stone baked) and
yan (ground) to small particles [9g]

The source text recommends using equal amounts of *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) and *Xiang Fu* (Rhizoma Cyperi). Wash *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) with a grain-based liquor, stone-bake it, and grind it into powder. Wash *Xiang Fu* (Rhizoma Cyperi) in vinegar, stone-bake it, and grind it into powder. The source text specifically instructs to prepare and store these two herbs separately. Immediately before serving, mix equal amounts of each powdered herb with a spoonful of ginger juice and a pinch of salt to form pills. Continue to take this formula until the condition is relieved.

Today, this formula is prepared by grinding the ingredients into powder. Take 6g (powder or pills) per dose one to two times daily with boiled water. This formula may also be prepared as a decoction with the doses suggested in brackets above.

Liang Fu Wan (Galangal and Cyperus Pill) activates qi circulation, soothes the Liver, dispels cold, and stops pain. It is designed to treat epigastric pain and vomiting caused by Liver qi or cold invading the Stomach. Clinical manifestations include epigastric pain, vomiting, and sometimes chest and hypochondriac pain.

In this formula *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) warms the Stomach, dispels cold, and relieves vomiting. *Xiang Fu* (Rhizoma Cyperi) soothes the Liver, activates qi circulation, and relieves pain.

Hou Po Wen Zhong Tang and *Liang Fu Wan* (Galangal and Cyperus Pill) both warm the middle *jiao*, regulate qi, and relieve pain.

- *Hou Po Wen Zhong Tang* emphasizes warming the middle *jiao*, dispelling cold, and drying dampness. This formula treats both Spleen and Stomach.
- *Liang Fu Wan* also warms the middle *jiao* and regulates qi, but focuses on treating the Spleen and Liver.

Section 2

降气剂

— Qi-Descending Formulas

Sū Zǐ Jiàng Qì Tāng

(Perilla Fruit Decoction for Directing Qi Downward)

蘇子降氣湯

苏子降气汤

Pinyin Name: *Su Zi Jiang Qi Tang***Literal Name:** Perilla Fruit Decoction for Directing Qi Downward**Alternate Names:** *Su Tzu Chiang Chi Tang*, *Su Zi Jiang Chi Tang*, Perilla Seed Decoction, Perilla Seed Combination**Original Source:** *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85**COMPOSITION**

<i>Zi Su Zi</i> (Fructus Perillae)	75g [9g]
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed) with liquid 7 times	75g [9g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>chao</i> (dry-fried) with ginger juice	30g [6g]
<i>Qian Hu</i> (Radix Peucedani)	30g [6g]
<i>Rou Gui</i> (Cortex Cinnamomi)	45g [3g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	45g [6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	60g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into a fine powder. Cook 6g of the powder with 2 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens), 1 piece of *Da Zao* (Fructus Jujubae) and 5 leaves [2g] of *Zi Su Ye* (Folium Perillae) in 1.5 large bowls of water until the liquid is reduced to 80% (1.2 large bowls). Take the hot strained liquid any time during the day. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Directs Lung qi downward to relieve wheezing
2. Eliminates phlegm and stops coughing

CLINICAL MANIFESTATIONS

Upper excess with lower deficiency syndrome: abundant phlegm and watery sputum, wheezing, coughing, shortness of breath, dyspnea, abnormal respiration with more exhalation than inhalation, feeling of fullness and oppression

in the chest and diaphragm; possible sore back and weak legs; possible lassitude, edema of the extremities; white, slippery or white, greasy tongue coating, and a weak pulse at the *chi* position.

CLINICAL APPLICATIONS

Bronchial asthma, chronic bronchitis, pulmonary emphysema, cough and wheezing, plum-pit *qi*, and morning sickness.

EXPLANATION

Su Zi Jiang Qi Tang (Perilla Fruit Decoction for Directing Qi Downward) is indicated for respiratory problems characterized by upper excess and lower deficiency. Upper excess refers to phlegm accumulation in the Lung, affecting the flow of Lung qi and causing feelings of fullness and oppression in the chest and diaphragm. Lower deficiency refers to deficiency of Kidney yang. Under normal conditions, the Kidney assists Lung qi to descend. However, when Kidney yang is deficient, the Lung qi may no longer

Sū Zǐ Jiàng Qì Tāng

(Perilla Fruit Decoction for Directing Qi Downward)

be able to descend properly, and wheezing or shortness of breath may occur. Clinically, inhalation will be shorter than exhalation. Also, Kidney deficiency may result in back pain and leg weakness. Moreover, edema may occur because Kidney yang is no longer able to regulate water metabolism, leaving the fluids to accumulate and form edema in the extremities, especially the lower limbs.

To treat upper excess, the reversed qi flow must be corrected and phlegm must be eliminated. To treat lower deficiency, Kidney yang must be reinforced. The chief herb of this formula, *Zi Su Zi* (Fructus Perillae), directs Lung qi downwards, eliminates phlegm, and relieves coughing and wheezing. *Ban Xia* (Rhizoma Pinelliae), *Hou Po* (Cortex Magnoliae Officinalis), and *Qian Hu* (Radix Peucedani) eliminate phlegm and relieve coughing and wheezing. Together, these four herbs treat the “upper excess.” *Rou Gui* (Cortex Cinnamomi) warms Kidney yang to treat “lower deficiency.” By warming and tonifying the Kidney, *Rou Gui* (Cortex Cinnamomi) enables the Kidney to grasp qi, pull it downward and facilitate inhalation. *Dang Gui* (Radix Angelicae Sinensis) nourishes blood to balance the acrid and drying herbs. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Zi Su Ye* (Folium Perillae) disperse cold and ventilate the Lung. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Da Zao* (Fructus Jujubae) harmonize the formula.

MODIFICATIONS

- For qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- For deficiency and cold, add *Huang Qi* (Radix Astragali) and increase the dose of *Rou Gui* (Cortex Cinnamomi).
- With cough and dyspnea due to reversed flow of qi, add *Chen Xiang* (Lignum Aquilariae Resinatum).
- With cough and dyspnea accompanied by phlegm, add *Bei Mu* (Bulbus Fritillariae) and *Ku Xing Ren* (Semen Armeniacae Amarum); or *Er Chen Tang* (Two-Cured Decoction).
- With cough and dyspnea due to wind-cold, add *Ding Chuan Tang* (Arrest Wheezing Decoction).
- When there is nausea, add *Zhe Shi* (Haematitum).
- With nausea, vomiting, and drooling of saliva, add *Fu Ling* (Poria) and *Jie Geng* (Radix Platycodonis).
- With chest and epigastric fullness and oppression, add *Huang Qin* (Radix Scutellariae) and *Chai Hu* (Radix Bupleuri).

CAUTIONS / CONTRAINDICATIONS

- *Su Zi Jiang Qi Tang* is warm and drying, and is mainly used to reverse the flow of Lung qi and eliminate dampness and phlegm. It is not suitable for coughing or wheezing due to Lung deficiency, nor is it suitable for wheezing due to heat and phlegm accumulation in the Lung.
- Individuals who take this formula should avoid exposure to cold and wind, and refrain from eating raw, cold, oily and greasy foods.¹

Su Zi Jiang Qi Tang (Perilla Fruit Decoction for Directing Qi Downward)

Upper-excess, lower-deficiency syndrome	<ul style="list-style-type: none">• Phlegm and sputum, wheezing, coughing, shortness of breath, dyspnea, and chest and hypochondriac fullness and oppression: phlegm accumulation [excess] in the Lung [upper]• Back soreness, weakness of lower extremities, lassitude, edema of lower extremities: yang deficiency of Kidney [lower]	<ul style="list-style-type: none">• Directs Lung qi downward to relieve wheezing• Eliminates phlegm and stops coughing	<ul style="list-style-type: none">• <i>Zi Su Zi</i> (Fructus Perillae) directs Lung qi downward, eliminates phlegm, and relieves coughing and wheezing.• <i>Ban Xia</i> (Rhizoma Pinelliae), <i>Hou Po</i> (Cortex Magnoliae Officinalis) and <i>Qian Hu</i> (Radix Peucedani) eliminate phlegm and relieve coughing and wheezing.• <i>Rou Gui</i> (Cortex Cinnamomi) warms Kidney yang to grasp qi downwards.• <i>Dang Gui</i> (Radix Angelicae Sinensis) nourishes blood to balance the acrid and drying herbs.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Zi Su Ye</i> (Folium Perillae) disperse cold and ventilate the Lung.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) and <i>Da Zao</i> (Fructus Jujubae) harmonize the herbs.

Sū Zǐ Jiàng Qì Tāng

(Perilla Fruit Decoction for Directing Qì Downward)

PHARMACOLOGICAL EFFECTS

Respiratory: According to one study, administration of *Su Zi Jiang Qi Tang* in mice was associated with marked antitussive, antiasthmatic, and anti-inflammatory effects.²

CLINICAL STUDIES AND RESEARCH

- Cough and wheezing:** One study reported marked success using *Su Zi Jiang Qi Tang* to treat various respiratory disorders, such as bronchial asthma, chronic bronchitis, pulmonary emphysema, and others.³
- Mei he qi (plum-pit qi):** According to one study, administration of *Su Zi Jiang Qi Tang* was effective in treating 55 of 60 patients who had plum-pit qi for 6 months to 2 years. The herbs were cooked in water, and the decoction was given in three equally-divided doses daily. The duration of treatment ranged from 6 to 10 packs of herbs.⁴
- Morning sickness:** Modified *Su Zi Jiang Qi Tang* was effective in treating nausea and vomiting in 94 of 96 pregnant women (between 21 and 30 years of age, mostly within the first 6–12 weeks of their first pregnancy). Clinical manifestations included nausea, vomiting (with clear fluids or saliva), nausea when smelling food and vomiting after eating food, feelings of fullness, distention and oppression in the chest. Dizziness and vertigo, fatigue, and a sallow facial appearance. The herbal formula contained *Zi Su Zi* (Fructus Perillae) 15g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Qian Hu* (Radix Peucedani) 10g, *Xuan Fu Hua* (Flos Inulae) 10g, *Huang Qin* (Radix Scutellariae) 10g, *Sha Ren* (Fructus Amomi) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Dang Gui* (Radix Angelicae Sinensis) 12g, *Xu Duan* (Radix Dipsaci) 12g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 3 slices. *Zhu Ru* (Caulis Bambusae in Taenia) 12g, and *Bai Shao* (Radix Paeoniae Alba) 15g were added for Liver heat. *Fu Ling* (Poria) 10g was added and the dose of *Ban Xia* (Rhizoma Pinelliae) was increased for excess dampness and phlegm. Patients in the study reported improvement or complete relief within taking 5 packs of herbs.⁵

San Zi Jiang Qi Tang (Three-Seed Decoction for Directing Qì Downward) is designed to treat wheezing and dyspnea characterized by phlegm in the Lung accompanied by underlying deficiency. Clinical applications include asthma, bronchitis, emphysema, and other chronic and debilitating respiratory disorders with wheezing and dyspnea. This formula is composed following the principles of two classic formulas: *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents) and *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qì Downward). The herbs in both formulas work synergistically to restore the correct downward flow of Lung qì to relieve wheezing and dyspnea, eliminate the storage of phlegm in the Lung, and restore the functioning of the Spleen.

AUTHORS' COMMENTS

Su Zi Jiang Qi Tang is indicated in classic textbooks for treating “upper excess, lower deficiency” syndrome. However, it is important to remember that the primary emphasis is upper excess (which is treated with four herbs), and the secondary focus is lower deficiency (which is addressed with only one herb).

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends decocting the ingredients in three bowls of water until two bowls of liquid remain. Take one bowl of decoction per dose twice daily at any time during the day. The source text prohibits the use of ginger in the decoction. Today, the decoction may be prepared with the doses suggested in brackets.

that is difficult to expectorate, abundant phlegm, rapid breathing, coughing, wheezing, dyspnea; a yellow, greasy tongue coating, and a slippery, rapid pulse.

CLINICAL APPLICATIONS

Asthma, bronchial asthma, tracheitis, acute and chronic bronchitis, bronchiolitis, and bronchopneumonia.

CHINESE THERAPEUTIC ACTIONS

1. Ventilates the Lung and directs Lung qi downwards
2. Dispels phlegm and relieves wheezing

EXPLANATION

Ding Chuan Tang (Arrest Wheezing Decoction) is one of the most commonly used formulas to treat wheezing and dyspnea due to exterior wind-cold and interior phlegm-heat. Patients suffering from this syndrome usually already have abundant phlegm that is thick, sticky and yellow. When the wind-cold factor attacks the exterior and

CLINICAL MANIFESTATIONS

Wind-cold constricting the exterior and phlegm-heat accumulation in the interior: thick, sticky, yellow sputum

Ding Chuan Tang (Arrest Wheezing Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Wind-cold at the exterior and phlegm-heat in the interior	<ul style="list-style-type: none"> • Abundant phlegm, rapid breathing, and thick, sticky yellow sputum: phlegm-heat accumulation in the interior • Coughing, wheezing and dyspnea: reversed flow of Lung qi • Yellow, greasy tongue coating and a slippery, rapid pulse: phlegm-heat accumulation in the interior 	<ul style="list-style-type: none"> • Ventilates the Lung and redirects Lung qi • Dispels phlegm and relieves wheezing 	<ul style="list-style-type: none"> • <i>Ma Huang</i> (Herba Ephedrae) releases the exterior wind-cold factor and ventilates the Lung. • <i>Bai Guo</i> (Semen Ginkgo) eliminates phlegm and astringes Lung qi. • <i>Zi Su Zi</i> (Fructus Perillae), <i>Ku Xing Ren</i> (Semen Armeniacae Amarum), <i>Ban Xia</i> (Rhizoma Pinelliae), and <i>Kuan Dong Hua</i> (Flos Farfarae) eliminate phlegm and direct the reversed flow of qi downwards. • <i>Sang Bai Pi</i> (Cortex Mori) and <i>Huang Qin</i> (Radix Scutellariae) clear Lung heat. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Ding Chuan Tang (Arrest Wheezing Decoction)

constricts the Lung, the dispersing and descending functions of the Lung may be further inhibited, causing phlegm stagnation and heat. The tongue coating and pulse both indicate heat and phlegm accumulation in the body.

In this formula, *Ma Huang* (Herba Ephedrae) releases the exterior wind-cold factor and dilates the Lung to relieve wheezing and dyspnea. *Bai Guo* (Semen Ginkgo) eliminates phlegm and astringes Lung qi to relieve wheezing. The astringent effect of *Bai Guo* (Semen Ginkgo) also prevents *Ma Huang* (Herba Ephedrae) from over-venting the Lung and leading to the loss of Lung qi. The dispersing effect of *Ma Huang* (Herba Ephedrae) prevents *Bai Guo* (Semen Ginkgo) from retaining the disease in the body. *Zi Su Zi* (Fructus Perillae), *Ku Xing Ren* (Semen Armeniacae Amarum), *Ban Xia* (Rhizoma Pinelliae), and *Kuan Dong Hua* (Flos Farfarae) eliminate phlegm and direct the reversed flow of qi downwards to relieve wheezing and coughing. *Sang Bai Pi* (Cortex Mori) and *Huang Qin* (Radix Scutellariae) clear Lung heat and relieve wheezing and coughing. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- For wheezing and dyspnea due to wind-cold, combine with *Ma Huang Tang* (Ephedra Decoction).
- For wheezing and dyspnea due to damp-heat, combine with *Liang Ge San* (Cool the Diaphragm Powder).
- For wheezing and dyspnea due to excessive phlegm, combine with *Er Chen Tang* (Two-Cured Decoction).
- With feelings of oppression in the chest, add *Zhi Qiao* (Fructus Aurantii) and *Hou Po* (Cortex Magnoliae Officinalis).
- With irritability and thirst, add *Mai Dong* (Radix Ophiopogonis) and *Di Gu Pi* (Cortex Lycii).
- For sputum that is thick and difficult to expectorate, add *Gua Lou* (Fructus Trichosanthis), *Dan Nan Xing* (Arisaema cum Bile), and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).
- With profuse sputum, add *Fu Hai Shi* (Pumice), *Ju Hong* (Exocarpium Citri Reticulatae), and *Gua Lou Pi* (Pericarpium Trichosanthis).
- When there is severe Lung heat with fever, add *Shi Gao* (Gypsum Fibrosum), *Yu Xing Cao* (Herba Houttuyniae), or *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- If accompanied by a severe stifling sensation in the chest, add *Zhi Qiao* (Fructus Aurantii) and *Zhu Ru* (Caulis Bambusae in Taenia).

CAUTIONS / CONTRAINDICATIONS

- *Ding Chuan Tang* should be used with caution during the very first stage of a wind invasion showing dyspnea without perspiration.
- This formula is contraindicated in chronic wheezing or cough caused by Lung and Kidney yin deficiencies.

PHARMACOLOGICAL EFFECTS

1. **Antiasthmatic:** Intraperitoneal injection of *Ding Chuan Tang* was shown to be effective in relieving asthma. The formula had no antiasthmatic effect when *Bai Guo* (Semen Ginkgo) was removed; but did have a significantly stronger antiasthmatic effect when the dose of *Bai Guo* was doubled. The study concluded that *Bai Guo* is an essential ingredient for this function.¹ The mechanism of its antiasthmatic effect was attributed to the formula's ability to blend histamine and acetylcholine, decrease contraction of external trachea smooth muscle, and promote secretion of phenol red in the respiratory tract.² Another study stated that *Ding Chuan Tang* may be used as a prophylactic treatment against allergen-induced asthma and airway inflammation via its bronchodilating influence and its ability to inhibit eosinophils in the airway.³
2. **Expectorant:** Intraperitoneal injection of *Ding Chuan Tang* in mice was shown to have a marked expectorant effect.⁴
3. **Antitussive:** According to one study, use of *Ding Chuan Tang* was associated with suppressing cough in mice.⁵

CLINICAL STUDIES AND RESEARCH

1. **Asthma:** Modified *Ding Chuan Tang* was effective in treating 36 patients with severe asthma. The herbal treatment contained *Ding Chuan Tang* plus *Dan Nan Xing* (Arisaema cum Bile), *Di Long* (Pheretima), *Yu Xing Cao* (Herba Houttuyniae), *Mian Hua Gen* (Radix Gossypii), *Fang Feng* (Radix Saposhnikovia), and others. Antibiotic drugs were given in cases of severe infection. Of 36 patients, the study reported complete recovery in 24 cases, marked improvement in 10 cases, and no effect in 2 cases. The rate of effectiveness was 94.5%.⁶
2. **Asthma with bronchitis:** Use of modified *Ding Chuan Tang* showed good results in treating asthma associated with bronchitis in 63 infants (2 years of age or below, with more than 10 days of illness). The formula contained *Ma Huang* (Herba Ephedrae) 3g, *Huang Qin* (Radix Scutellariae) 4g, *Zi Su Zi* (Fructus Perillae) 4g, *Ku Xing Ren* (Semen Armeniacae Amarum) 4g, *Sang Bai Pi* (Cortex Mori) 4g, *Bai Guo* (Semen Ginkgo) 4g, *Ban Xia* (Rhizoma Pinelliae) 4g, *Kuan Dong Hua* (Flos Farfarae) 4g, *She Gan* (Rhizoma Belamcandae) 4g, *Jie Geng* (Radix Platycodonis) 4g, *Ban Lan Gen* (Radix Isatidis) 12g, and

Dìng Chuǎn Tāng (Arrest Wheezing Decoction)

Gan Cao (Radix et Rhizoma Glycyrrhizae) 2g. [The dose listed is for a 2 year old. Adjust the dose accordingly for infants under 2 years of age.] The herbs were given in decoction twice daily, for 7 days per course of treatment. Of 63 infants, the study reported complete recovery in 59 cases, improvement in 3 cases, and no benefit in 1 case. The rate of effectiveness was 98.4%.⁷

3. **Bronchopneumonia:** Administration of daily decoction of modified *Ding Chuan Tang* was effective in treating 34 patients with bronchopneumonia. The study reported resolution of cough and wheezing after an average of 4.61 days (range of 2.02 to 7.20 days) and complete recovery after 7.88 days (range of 4.66 to 11.70 days).⁸
4. **Bronchial asthma:** One study reported 97% effectiveness using modified *Ding Chuan Tang* to treat 100 patients with chronic bronchial asthma. The herbal formula contained *Ding Chuan Tang* plus *Yu Xing Cao* (Herba Houttuyniae), *Pu Gong Ying* (Herba Taraxaci), and others as needed. The treatment protocol was to administer the herbs in decoction form for 10 days per course of treatment. Of 100 patients, the study reported significant improvement in 83 cases and moderate improvement in 14 cases. The study described *Ding Chuan Tang* to have marked antiasthmatic, antitussive, and expectorant effects.⁹

TOXICOLOGY

According to one acute toxicology study, administration of *Ding Chuan Tang* at 150 g/kg in a bolus dose did not cause any abnormal reaction in dietary habits or physical activities.¹⁰

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

Shén Mì Tāng (Mysterious Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

- 1. Regulates qi
- 2. Eliminates phlegm

CLINICAL MANIFESTATIONS

Wheezing and dyspnea caused by stagnation of qi and phlegm: wheezing, dyspnea, sputum and phlegm, a rattling sound in the throat, and fullness and distention in the chest and hypochondrium.

CLINICAL APPLICATIONS

Asthma and bronchial asthma.

EXPLANATION

Shen Mi Tang (Mysterious Decoction) is designed to treat stagnation of qi and phlegm that affects the proper flow

of Lung qi resulting in wheezing and dyspnea. Phlegm causes chest fullness and congestion, and an audible rattling sound in the throat accompanying breathing.

In this formula, *Ma Huang* (Herba Ephedrae) dilates the Lung to relieve wheezing and dyspnea. *Ku Xing Ren* (Semen Armeniacae Amarum) directs Lung qi downward to facilitate breathing. These two herbs are often combined to treat wheezing and dyspnea. *Chen Pi* (Pericarpium Citri Reticulatae) and *Hou Po* (Cortex Magnoliae Officinalis) both regulate qi and eliminate phlegm. *Zi Su Ye* (Folium Perillae) dispels wind-cold from the exterior. *Chai Hu* (Radix Bupleuri) clears heat from the exterior and interior, and eases distention in the chest and hypochondrium. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula. In short, this is a good formula for patients with wheezing and dyspnea caused by qi and phlegm stagnation.

Sì Mò Tāng (Four Milled-Herbs Decoction)

四磨湯

四磨汤

Pinyin Name: *Si Mo Tang*

Literal Name: Four Milled-Herbs Decoction

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

COMPOSITION

<i>Wu Yao</i> (Radix Linderae)	[9g]
<i>Chen Xiang</i> (Lignum Aquilariae Resinatum)	[3g]
<i>Bing Lang</i> (Semen Arecae)	[9g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	[3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are: mill equal amounts of the herbs, cook them with a small bowl of water, bring it to a boil three to five times, and take the decoction while warm. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Activates qi circulation and redirects abnormal rising qi
2. Disperses stagnation and expands the chest

CLINICAL MANIFESTATIONS

Liver qi stagnation caused by instability of the seven emotions: irritability, a feeling of oppression in the chest and diaphragm, wheezing, hurried respiration, epigastric fullness and distention, and loss of appetite.

CLINICAL APPLICATIONS

Asthma and gynecomastia.

EXPLANATION

Si Mo Tang (Four Milled-Herbs Decoction) treats Liver qi stagnation caused by instability of the seven emotions (joy, anger, melancholy, over-thinking, grief, fear, and fright). When the Liver qi becomes stagnant, it fails to disperse smoothly in all directions, and may invade the Lung and Stomach. Irregular Lung qi flow leads to chest oppression and wheezing, while irregular Stomach qi flow leads to fullness and distention in the epigastrium, and loss of appetite. It is important to note that while the cause of the illness is Liver qi stagnation, the symptoms are associated with the Lung and Stomach. Optimal treatment requires a combination of herbs that simultaneously treats the cause and the symptoms.

In this formula, *Wu Yao* (Radix Linderae) spreads the Liver, activates qi circulation and disperses qi stagnation. *Chen Xiang* (Lignum Aquilariae Resinatum) regulates qi

flow, corrects the reversed flow of qi, and relieves wheezing. *Bing Lang* (Semen Arecae) activates qi circulation and breaks down qi stagnation to relieve fullness of the epigastrium. If only qi-activating herbs were used, however, the qi of the body would be damaged or consumed. Therefore, *Ren Shen* (Radix et Rhizoma Ginseng) is added to tonify qi and strengthen the body.

MODIFICATIONS

- For strong patients experiencing anger and distended pain in the chest and abdomen, remove *Ren Shen* (Radix et Rhizoma Ginseng) and add *Mu Xiang* (Radix Aucklandiae) and *Zhi Shi* (Fructus Aurantii Immaturus).
- With constipation, belching, abdominal pain, and distention, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Da Huang* (Radix et Rhizoma Rhei).

CLINICAL STUDIES AND RESEARCH

1. **Gynecomastia:** One study reported successful treatment of gynecomastia in 31 of 32 patients using modified *Si Mo Tang*. The herbal formula contained *E Zhu* (Rhizoma Curcumae) 9g, *Wu Yao* (Radix Linderae) 9g, *Bing Lang* (Semen Arecae) 9g, *Gua Lou Pi* (Pericarpium Trichosanthis) 9g, *Bei Mu* (Bulbus Fritillariae) 15g, *Dang Shen* (Radix Codonopsis) 15g, *Di Huang* (Radix Rehmanniae) 15g, dry-fried *Gu Ya* (Fructus Setariae Germinatus) 15g, *Yin Yang Huo* (Herba Epimedii) 12g, *Chen Xiang* (Lignum Aquilariae Resinatum) 2g, and others as needed. The herbs were given in decoction daily, for an average of 22 days (range from 10-42 days).¹
2. **Asthma:** One study reported satisfactory results using modified *Si Mo Tang* to treat 12 patients with asthma. The herbal formula contained *Wu Yao* (Radix Linderae) 10g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Dang Shen* (Radix Codonopsis) 10g, *Chen Xiang* (Lignum Aquilariae Resinatum) 6g, *Zhi Shi* (Fructus Aurantii Immaturus) 6g, *Bing Lang* (Semen Arecae) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Zi Su Geng* (Caulis Perillae)

Pinyin Name: Wu Mo Yin Zi

Literal Name: Five Milled-Herbs Decoction

Original Source: *Yi Bian* (Ordinary Medicine) by Wang San-Cai in 1587

Mu Xiang (Radix Aucklandiae)	[6g]
Chen Xiang (Lignum Aquilariae Resinatum)	[6g]
Bing Lang (Semen Arecae)	[9g]
Zhi Shi (Fructus Aurantii Immaturus)	[9g]
Wu Yao (Radix Linderae)	[9g]

The source text states to prepare this formula by grinding equal amounts of the ingredients and administer with a grain-based liquor. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Wu Mo Yin Zi (Five Milled-Herbs Decoction) is composed of Si Mo Tang, with the addition of *Zhi Shi* (Fructus Aurantii Immaturus) and *Mu Xiang* (Radix Aucklandiae), and the removal of *Ren Shen* (Radix et Rhizoma Ginseng). This change in composition gives the formula stronger

actions to activate qi and dispel qi stagnation. Clinically, the patient may show extreme anger, irritation, and fullness and pain in the chest and abdomen that radiate to other parts of the body.

Si Mo Tang and Wu Mo Yin Zi (Five Milled-Herbs Decoction) both treat qi stagnation and abnormal qi circulation. Their differences are as follows:

- Si Mo Tang simultaneously tonifies and regulates qi, making it more suitable for patients who are weak or deficient in nature.
- Wu Mo Yin Zi is a stronger formula for activating qi and dispelling stagnation, making it more suitable for patients who are strong or have pure excess conditions.

AUTHORS' COMMENTS

Si Mo Tang is used mainly for severe Liver qi stagnation with reversed flow of Lung and Stomach qi, manifesting in dyspnea, a stifling sensation and fullness in the chest and hypochondriac area, and distention and fullness in the epigastric area.

Si Mo Tang is prepared by milling the herbs and cooking them for a short period of time – just enough to bring the decoction to a few quick boils. The preparation is important because it retains the aromatic property of the qi-regulating herbs in this formula. Therefore, this formula is literally named “Four Milled-Herbs Decoction.”

Xuán Fù Dài Zhě Shí Tāng (Inula and Hematite Decoction)

旋覆代赭石湯

旋覆代赭石汤

Pinyin Name: *Xuan Fu Dai Zhe Shi Tang*

Literal Name: Inula and Hematite Decoction

Alternate Names: *Hsuan Fu Tai Che Shih Tang*, Inula and Red Ochre Decoction, Inula and Hematite Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Xuan Fu Hua</i> (Flos Inulae)	9g
<i>Zhe Shi</i> (Haematitum)	3g [9g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	15g [10g]
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed)	0.5 cup [9g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g [6g]
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends cooking the herbs in 10 cups [2,000 mL] of water until it is reduced to 6 cups [1,200 mL]. Discard the herb residue, and cook the strained decoction again, reducing it to 3 cups [600 mL]. Take 1 cup [200 mL] of warm decoction three times daily. Today, this decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dissolves phlegm and corrects abnormal rising qi
2. Benefits qi and harmonizes the Stomach

CLINICAL MANIFESTATIONS

Stomach qi deficiency with turbid phlegm stagnation: epigastric distention and hardness, unremitting belching, and hiccups.

CLINICAL APPLICATIONS

Morning sickness, nausea and vomiting, peptic ulcer disease, acid reflux, gastritis, pharyngoneurosis, gastrointestinal neurosis, gastrectasis, incomplete pyloric obstruction, vertigo, and Meniere's syndrome.

EXPLANATION

Xuan Fu Dai Zhe Shi Tang (Inula and Hematite Decoction) is formulated to treat Stomach qi deficiency with turbid phlegm stagnation. According to *Shang Han Lun* (Discussion of Cold-Induced Disorders), this condition occurs when patients with an exterior condition are treated with *han fa* (sweating), *tu fa* (vomiting), and *xia fa* (draining downward) methods. Though these treatments release the exterior condition, they damage *zhong* (central) *qi*, and lead to subsequent formation of phlegm and reversed flow of qi. Epigastric distention and hardness

Xuan Fu Dai Zhe Shi Tang (Inula and Hematite Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Stomach qi deficiency with stagnation of turbid phlegm	<ul style="list-style-type: none">• Epigastric distention and hardness: phlegm accumulation• Belching and hiccups: reversed flow of Stomach qi	<ul style="list-style-type: none">• Dissolves phlegm and redirects abnormal rising qi• Benefits qi and harmonizes the Stomach	<ul style="list-style-type: none">• <i>Xuan Fu Hua</i> (Flos Inulae) warms the Stomach, dissolves phlegm, and corrects the reversed flow of Stomach qi.• <i>Zhe Shi</i> (Haematitum) corrects the reversed flow of Stomach qi.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) warms the Stomach and redirects rising Stomach qi.• <i>Ban Xia</i> (Rhizoma Pinelliae) dries dampness, disperses phlegm, and harmonizes the Stomach.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Da Zao</i> (Fructus Jujubae) nourishes the Stomach and tonifies the Spleen.

Xuán Fù Dài Zhě Shí Tāng (Inula and Hematite Decoction)

indicate phlegm accumulation. Unremitting belching and hiccups indicate reversed flow of Stomach qi.

The chief herb of this formula, *Xuan Fu Hua* (Flos Inulae), warms the Stomach, dissolves phlegm, and corrects the reversed flow of Stomach qi to relieve belching and hiccups. *Zhe Shi* (Haematitum) is heavy and can guide Stomach qi downward to relieve belching. *Sheng Jiang* (Rhizoma Zingiberis Recens) warms the Stomach to dissolve phlegm and redirects the rising qi to relieve nausea and vomiting. *Ban Xia* (Rhizoma Pinelliae) dries dampness, disperses phlegm, and harmonizes the Stomach. It also assists *Xuan Fu Hua* (Flos Inulae) and *Zhe Shi* (Haematitum) to relieve belching and hiccups and reduce epigastric distention and hardness. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies the Spleen and Stomach. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourishes the middle *jiao*. *Da Zao* (Fructus Jujubae) nourishes the Stomach and tonifies the Spleen.

MODIFICATIONS

- When there is heat, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- With cough and drooling of phlegm, add *Fu Ling* (Poria) and *Chen Pi* (Pericarpium Citri Reticulatae).
- With epigastric fullness and oppression, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Jie Geng* (Radix Platycodonis).
- For hiccups due to deficiency and cold, add *Ding Xiang* (Flos Caryophylli), *Shi Di* (Calyx Kaki), and *Wu Zhu Yu* (Fructus Evodiae).
- When there is Stomach yin deficiency, add *Mai Dong* (Radix Ophiopogonis) and *Shi Hu* (Caulis Dendrobii).
- For food stagnation, add *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Shan Zha* (Fructus Crataegi).
- With profuse sputum, add *Fu Ling* (Poria) and *Chen Pi* (Pericarpium Citri Reticulatae).

CLINICAL STUDIES AND RESEARCH

1. **Morning sickness:** Administration of modified *Xuan Fu Dai Zhe Shi Tang* was shown in one study to effectively treat nausea and vomiting during pregnancy in 66 women. The herbal formula contained *Xuan Fu Hua* (Flos Inulae) 5g, *Zhe Shi* (Haematitum) 15-30g, *Dang Shen* (Radix Codonopsis) 10g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g, *Da Zao* (Fructus Jujubae) 5 pieces, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 3 slices. Furthermore, charred *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Huang Jing* (Rhizoma Polygonati), *Shan Yao* (Rhizoma Dioscoreae), *Sha Ren* (Fructus Amomi), and *Mu Xiang* (Radix Aucklandiae) were added for Spleen and Stomach deficiency and

weakness; *Chuan Lian Zi* (Fructus Toosendan), *Huang Lian* (Rhizoma Coptidis), *Zhu Ru* (Caulis Bambusae in Taenia), and *Huang Qin* (Radix Scutellariae) for Liver and Stomach disharmony; *Fu Ling* (Poria), charred *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Sha Ren* (Fructus Amomi), *Chen Pi* (Pericarpium Citri Reticulatae), and *Sheng Jiang* (Rhizoma Zingiberis Recens) for obstruction of dampness and phlegm; and *Xi Yang Shen* (Radix Panacis Quinquefolii), *Wu Mei* (Fructus Mume), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Xuan Shen* (Radix Scrophulariae), and *Mai Dong* (Radix Ophiopogonis) for yin and qi deficiencies. The study reported improvement or recovery in 65 of 66 women. The overall rate of effectiveness was 98.5%.¹

2. **Nausea and vomiting:** Many studies have shown *Xuan Fu Dai Zhe Shi Tang* to effectively treat nausea and vomiting from various causes. One study of 60 patients reported good results for treating nausea and vomiting using modified *Xuan Fu Dai Zhe Shi Tang*. The herbal formula contained *Xuan Fu Hua* (Flos Inulae) 6g, *Zhe Shi* (Haematitum) 30g, *Ban Xia* (Rhizoma Pinelliae) 9g, *Shi Di* (Calyx Kaki) 6g, *Chen Pi* (Pericarpium Citri Reticulatae) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 9g, and others as needed. Of 60 patients, the study reported recovery in 4 cases after 2 packs of herbs, 46 cases after 4 packs, and 10 cases after 8 packs. No recurrence of nausea and vomiting were reported within 3 months of follow-ups.² According to another study involving 30 patients, use of this formula was associated with recovery in 17 cases within 3-6 packs of herbs, 10 cases within 12 packs of herbs, and no effect in 3 cases.³
3. **Peptic ulcer disease:** Administration of *Xuan Fu Dai Zhe Shi Tang* plus *Chuan Lian Zi* (Fructus Toosendan), *Yan Hu Suo* (Rhizoma Corydalis), and others was associated with satisfactory results in treating 30 patients with gastric and/or duodenal ulcers. Of 30 patients, the study reported complete recovery in 20 cases, improvement in 8 cases, and no effect in 2 cases. The overall rate of effectiveness was 93.4%.⁴
4. **Vertigo:** One study reported marked success using modified *Xuan Fu Dai Zhe Shi Tang* to treat vertigo characterized by Liver yang rising and accompanied by phlegm accumulation. The herbal formula contained *Xuan Fu Hua* (Flos Inulae), *Zhe Shi* (Haematitum), *Chen Pi* (Pericarpium Citri Reticulatae), *Fu Ling* (Poria), *Ban Xia* (Rhizoma Pinelliae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Che Qian Zi* (Semen Plantaginis), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi), and *Gou Teng* (Ramulus Uncariae cum Uncis). Modifications were made by adding *Shen Qu* (Massa Fermentata) for poor appetite, and *Niu Xi* (Radix Achyranthis Bidentatae) and

Xuán Fù Dài Zhě Shí Tāng (Inula and Hematite Decoction)

Dan Shen (Radix et Rhizoma *Salviae Miltiorrhizae*) for numbness of the extremities. The herbs were given in decoction daily, with most patients having improvement to recovery within 5-6 packs of herbs. Of 20 patients, the study reported complete recovery in 18 patients within 6 packs of herbs, and improvement in 2 cases.⁵

5. **Pharyngoneurosis:** One study reported marked success using *Xuan Fu Dai Zhe Shi Tang* to treat pharyngeal neurosis in 500 patients. The herbal formula contained *Xuan Fu Hua* (Flos *Inulae*) 15g, *Xiang Fu* (Rhizoma *Cyper*) 15g, *Zhi Qiao* (Fructus *Aurantii*) 15g, *Zhe Shi* (Haematitum) 20g, *Ban Xia* (Rhizoma *Pinelliae*) 12g, *Jie Geng* (Radix *Platycodonis*) 12g, *Sheng Jiang* (Rhizoma *Zingiberis Recens*) 10g, *Zhi Gan Cao* (Radix et Rhizoma *Glycyrrhizae Praeparata cum Melle*) 5g, and others as needed. The duration of treatment ranged from 6 months to 3 years. The overall rate of effectiveness was 93%.⁶

RELATED FORMULA

Gān Jiāng Rén Shēn Bàn Xià Wán

(Ginger, Ginseng, and Pinellia Pill)

乾姜人參半夏丸

干姜人參半夏丸

Pinyin Name: *Gan Jiang Ren Shen Ban Xia Wan*

Literal Name: Ginger, Ginseng, and Pinellia Pill

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Gan Jiang</i> (Rhizoma <i>Zingiberis</i>)	3g [6g]
<i>Ren Shen</i> (Radix et Rhizoma <i>Ginseng</i>)	3g [6g]
<i>Ban Xia</i> (Rhizoma <i>Pinelliae</i>)	6g [9g]

The source text recommends grinding the ingredients into powder and forming into small pills with juice of *Sheng Jiang* (Rhizoma *Zingiberis Recens*). The pills should resemble the size of *Wu Tong Zi* (Semen *Firmianae*), a small seed approximately 5 mm in diameter. Take 10 pills three times daily. Today, the formula may be given in pills or decoction form. For pills, mix the powdered herbs with water and the juice of *Sheng Jiang* (Rhizoma *Zingiberis Recens*) to form pills. Take 3-6g of pills per dose. For decoction, use the doses suggested in brackets.

Gan Jiang Ren Shen Ban Xia Wan (Ginger, Ginseng, and Pinellia Pill) tonifies and warms the middle *jiao*, corrects the reversed flow of Lung qi, and stops vomiting. Clinically, it may be used for nausea and vomiting during pregnancy, or due to deficiency and cold of the Spleen and Stomach.

Xuan Fu Dai Zhe Shi Tang and *Gan Jiang Ren Shen Ban Xia Wan* (Ginger, Ginseng, and Pinellia Pill) both tonify the middle *jiao* and direct rising qi downward.

- *Xuan Fu Dai Zhe Shi Tang* is a potent formula that focuses primarily on correcting reversed flow of qi, secondarily on tonifying deficiency. It directly and potently suppresses nausea, vomiting, belching, hiccups, and other symptoms characterized by abnormally rising qi.
- *Gan Jiang Ren Shen Ban Xia Wan*, originally designed to treat morning sickness during pregnancy, uses small doses of herbs to gently warm the middle *jiao* to relieve nausea and vomiting. The formula is mild, and emphasizes on warming and tonifying more than countering the reversed flow of qi.

AUTHORS' COMMENTS

Xuan Fu Dai Zhe Shi Tang is effective for hiccups even if the cause is unknown. It usually is reserved as the last resort when all other treatments fail.

The dose of *Zhe Shi* (Haematitum) is intentionally low in order to prevent damage to Stomach qi. However, in patients with a strong stomach, the dose of *Zhe Shi* (Haematitum) can be increased and *Ren Shen* (Radix et Rhizoma *Ginseng*) and *Da Zao* (Fructus *Jujubae*) removed.

Xuan Fu Dai Zhe Shi Tang, *Ju Pi Zhu Ru Tang* (Tangerine Peel and Bamboo Shaving Decoction) and *Ding Xiang Shi Di Tang* (Clove and Persimmon Calyx Decoction) are three formulas that treat nausea, vomiting, and hiccups due to reversed flow of Stomach qi upwards.

- *Xuan Fu Dai Zhe Shi Tang* primarily treats reversed flow of Stomach qi due to Stomach deficiency with qi and phlegm stagnation.
- *Ju Pi Zhu Ru Tang* mainly addresses reversed flow of Stomach qi due to Stomach qi deficiency with Stomach heat.
- *Ding Xiang Shi Di Tang* is most effective for reversed flow of Stomach qi due to Stomach qi deficiency with Stomach cold.

Jú Pí Zhú Rú Tāng (Tangerine Peel and Bamboo Shaving Decoction)

橘皮竹茹湯
橘皮竹茹汤

Pinyin Name: Ju Pi Zhu Ru Tang
Literal Name: Tangerine Peel and Bamboo Shaving Decoction
Alternate Names: Chu Pi Tsu Ju Tang, Ju Pi Zu Ru Tang, Citrus and Bamboo Shaving Decoction, Citrus and Bamboo Combination
Original Source: Jin Gui Yao Lue (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Chen Pi (Pericarpium Citri Reticulatae)	2 cups [12g]
Zhu Ru (Caulis Bambusae in Taenia)	2 cups [12g]
Ren Shen (Radix et Rhizoma Ginseng)	3g [3g]
Sheng Jiang (Rhizoma Zingiberis Recens)	24g [9g]
Da Zao (Fructus Jujubae)	30 pieces [5 pieces]
Gan Cao (Radix et Rhizoma Glycyrrhizae)	15g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text suggests cooking all of the ingredients in 10 cups [2,000 mL] of water until it is reduced to 3 cups [600 mL]. Take 1 cup of the warm decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

- 1. Counters reversed flow of qi to relieve hiccups
- 2. Benefits qi and clears heat

CLINICAL MANIFESTATIONS

Reversed flow of Stomach qi due to deficiency and heat: hiccups, dry heaves, and retching.

CLINICAL APPLICATIONS

Nausea, vomiting, hiccup, neurogenic nausea and vomiting, post-surgical nausea and vomiting, chemotherapy-induced nausea and vomiting, morning sickness, incomplete

pyloric obstruction, gastritis, erosive esophagitis, and vertigo.

EXPLANATION

Ju Pi Zhu Ru Tang (Tangerine Peel and Bamboo Shaving Decoction) treats hiccups, dry heaves or retching due to deficiency and heat of the Stomach. It contains herbs that tonify Stomach deficiency, clear heat, and correct reversed flow of Stomach qi.

In this formula, *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi, harmonizes the Stomach, and relieves hiccups and retching. *Zhu Ru* (Caulis Bambusae in Taenia) clears Stomach heat and stops hiccups. *Ren Shen* (Radix et Rhizoma Ginseng) nourishes qi and strengthens the Stomach. Together with *Chen Pi* (Pericarpium Citri Reticulatae), *Ren Shen* (Radix et Rhizoma Ginseng) is able to tonify qi without causing stagnation. *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonizes the Stomach to stop nausea

Ju Pi Zhu Ru Tang (Tangerine Peel and Bamboo Shaving Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Reversed flow of Stomach qi due to deficiency and heat	Nausea, vomiting, hiccups or retching: Reversed flow of Stomach qi	<ul style="list-style-type: none">• Corrects reversed flow of qi to relieve hiccups• Benefits qi and clears heat	<ul style="list-style-type: none">• <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulates qi, and harmonizes the Stomach.• <i>Zhu Ru</i> (Caulis Bambusae in Taenia) clears Stomach heat.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) nourishes qi and strengthens the Stomach.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonizes the Stomach.• <i>Da Zao</i> (Fructus Jujubae) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify qi and harmonize the middle <i>jiao</i>.

Jú Pí Zhú Rú Tāng (Tangerine Peel and Bamboo Shaving Decoction)

and vomiting. The warm nature of *Sheng Jiang* (Rhizoma Zingiberis Recens) also balances the cold influence of *Zhu Ru* (Caulis Bambusae in Taenia). *Da Zao* (Fructus Jujubae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) help *Ren Shen* (Radix et Rhizoma Ginseng) to tonify qi and harmonize the middle *jiao*. This formula was formulated carefully to benefit qi without creating stagnation, and to clear deficiency heat without creating unnecessary cold in the body.

MODIFICATIONS

- For Stomach yin deficiency accompanied by thirst, add *Mai Dong* (Radix Ophiopogonis), *Shi Hu* (Caulis Dendrobii), or *Mai Men Dong Tang* (Ophiopogonis Decoction).
- For Stomach heat and Stomach qi and yin deficiencies, add *Mai Dong* (Radix Ophiopogonis), *Fu Ling* (Poria), *Ban Xia* (Rhizoma Pinelliae), and *Pi Pa Ye* (Folium Eriobotryae).
- When there is Stomach heat but no qi deficiency, add *Shi Di* (Calyx Kaki), and remove *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Da Zao* (Fructus Jujubae).
- For Stomach heat causing Stomach qi reversal, add *Huang Lian* (Rhizoma Coptidis).
- With phlegm, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).

CAUTIONS / CONTRAINDICATIONS

Ju Pi Zhu Ru Tang is not suitable for hiccups and retching due to excess heat or deficiency cold.

CLINICAL STUDIES AND RESEARCH

1. **Vertigo:** One study reported success in treating 138 patients with vertigo characterized by wind and phlegm rising. The herbal formula was based on *Ju Pi Zhu Ru Tang* and *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction). This formula contained the following ingredients: *Xuan Fu Hua* (Flos Inulae) 10g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 10g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Fu Ling* (Poria) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Pi Pa Ye* (Folium Eriobotryae) 10g, *Zhu Ru* (Caulis Bambusae in Taenia) 10g, *Zhe Shi* (Haematitum) 30g, *Dang Shen* (Radix Codonopsis) 15g, *Mai Dong* (Radix Ophiopogonis) 12g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, and *Da Zao* (Fructus Jujubae) 4 pieces. Additional modifications were made as necessary. Of 128 patients, the study reported complete recovery in 106 cases and improvement in 22 cases. No recurrences were reported in 6 months of follow-up.¹
2. **Erosive esophagitis:** One study report 88.2% effectiveness using *Ju Pi Zhu Ru Tang* to treat patients with erosive esophagitis.²

HERB-DRUG INTERACTION

Chemotherapy-induced nausea and vomiting: One study reported a beneficial effect using modified *Ju Pi Zhu Ru Tang* to treat nausea and vomiting induced by chemotherapy. The herbal formula contained *Ren Shen* (Radix et Rhizoma Ginseng) 10g, *Dan Zhu Ye* (Herba Lophatheri) 30g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 20g, and *Da Zao* (Fructus Jujubae) 30g. The treatment protocol was to cook one pack of herbs in water to obtain 250 mL of decoction, which was administered in six to eight equally-divided doses daily. Five packs of herbs were given per course of treatment. Those with severe nausea and vomiting were also given 1g of charred salt to hold in the mouth to help to relieve nausea and vomiting.³

RELATED FORMULAS

Jú Pí Zhú Rú Tāng

(Tangerine Peel and Bamboo Shaving Decoction)

橘皮竹茹湯

橘皮竹茹汤

Pinyin Name: *Ju Pi Zhu Ru Tang*

Literal Name: Tangerine Peel and Bamboo Shaving Decoction

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

<i>Chi Fu Ling</i> (Poria Rubra)	30g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	30g
<i>Pi Pa Ye</i> (Folium Eriobotryae)	30g
<i>Mai Dong</i> (Radix Ophiopogonis)	30g
<i>Zhu Ru</i> (Caulis Bambusae in Taenia)	30g
<i>Ban Xia</i> (Rhizoma Pinelliae),	
<i>xi</i> (washed) with liquid 7 times	30g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	15g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae	
<i>Praeparata cum Melle</i>)	15g

The source text states to grind the herbs into a coarse powder. Cook 12g of the powder and 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) with 1.5 large bowls of water until it is reduced to 80%. Take the warm, strained decoction at any time during the day.

The main actions of this formula are to correct reversed flow of qi, harmonize the Stomach, and clear heat. Clinically, the patient may have Stomach heat with such symptoms as hiccups, vomiting, thirst, and a low appetite.

This formula has the same name as the previous formula, but is derived from a different source and has a different composition and application. Therefore, it is important

Jú Pí Zhú Rú Tāng (Tangerine Peel and Bamboo Shaving Decoction)

that the two are not confused or used interchangeably. Contrasting aspects of these two formulas are discussed under Authors' Comments.

Xīn Zhì Jú Pí Zhú Rú Tāng (Newly-Formulated Tangerine Peel and Bamboo Shaving Decoction)

新制橘皮竹茹湯
新制橘皮竹茹汤

Pinyin Name: Xīn Zhì Ju Pí Zhu Ru Tang

Literal Name: Newly-Formulated Tangerine Peel and Bamboo Shaving Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

Chen Pi (Pericarpium Citri Reticulatae)	9g
Zhu Ru (Caulis Bambusae in Taenia)	9g
Shi Di (Calyx Kaki)	7 pieces [9g]
Sheng Jiang (Rhizoma Zingiberis Recens), chong fu (taken drenched)	3 teaspoonfuls of juice

The source text recommends preparing the ingredients as a decoction. The dose of *Sheng Jiang* juice used in this formula is about 15 mL, mixed into the decoction immediately before administration.

Xīn Zhì Ju Pí Zhu Ru Tāng (Newly-Formulated Tangerine Peel and Bamboo Shaving Decoction) regulates qi, corrects the reversed flow of qi, and clears heat. Clinically,

the patient may show hiccups and vomiting due to Stomach heat, but with no signs of Stomach qi deficiency.

AUTHORS' COMMENTS

Ju Pi Zhu Ru Tang is often used for morning sickness, as it is a mild formula that will not harm the fetus. It also can be used for hiccups, nausea, and Stomach qi reversal signs caused by abdominal surgeries.

The formulas listed below regulate qi, harmonize the Stomach, clear heat, and stop hiccups. Their differences are as follows:

- *Ju Pi Zhu Ru Tang* from *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) is indicated for hiccups due to Stomach heat accompanied by Stomach qi deficiency.
- *Ju Pi Zhu Ru Tang* from *Ji Sheng Fang* (Formulas to Aid the Living) treats hiccups due to Stomach heat, accompanied by qi and yin deficiencies.
- *Xīn Zhì Ju Pí Zhu Ru Tāng* (Newly-Formulated Tangerine Peel and Bamboo Shaving Decoction) treats hiccups due to Stomach heat with no underlying deficiency.

Shēng Jiāng (Rhizoma Zingiberis Recens)	[6g]

Dīng Xiāng Shì Dì Tāng (Clove and Persimmon Calyx Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends preparing the ingredients as a decoction, but does not specify ingredient doses. Contemporary doses are indicated in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Warms the middle *jiao* and benefits qi
2. Corrects reversed flow of qi to stop hiccups

CLINICAL MANIFESTATIONS

Deficiency and cold of the Stomach: constant hiccups, feelings of distention in the chest, and a slow pulse.

CLINICAL APPLICATIONS

Hiccups, nausea, vomiting, and gastritis.

EXPLANATION

Ding Xiang Shi Di Tang (Clove and Persimmon Calyx Decoction) is designed to treat hiccups due to deficiency and cold of the Stomach. Stomach qi deficiency may lead to cold accumulation, which block proper downward movement of qi. As qi flow reverses and rises upwards, it causes hiccups and a feeling of fullness and oppression in the chest. The slow pulse is indicative of Stomach cold.

This formula contains *Ding Xiang* (Flos Caryophylli) and *Shi Di* (Calyx Kaki) to warm the Stomach, dispel cold, and counter reversed flow of Stomach qi. These two herbs are essential for treating hiccups due to Stomach cold. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies qi, and *Sheng Jiang* (Rhizoma Zingiberis Recens) warms and harmonizes the Stomach.

MODIFICATIONS

- When there is continuous vomiting, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).
- If accompanied by heat signs, add *Huang Lian* (Rhizoma Coptidis) and *Zhu Ru* (Caulis Bambusae in Taenia).

- With stagnation of cold, qi, and phlegm, add *Ju Hong* (Exocarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae), and *Chen Xiang* (Lignum Aquilariae Resinatum).
- With qi and phlegm stagnation, add *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae).
- When there are more cold signs, add *Rou Gui* (Cortex Cinnamomi) and *Wu Zhu Yu* (Fructus Evodiae).

CAUTIONS / CONTRAINDICATIONS

Ding Xiang Shi Di Tang is contraindicated in the treatment of hiccups caused by Stomach heat.

CLINICAL STUDIES AND RESEARCH

1. **Nausea and vomiting:** Administration of modified *Ding Xiang Shi Di Tang* was shown to have a marked effect in 18 patients to relieve nausea and vomiting from various causes (chronic gastritis, duodenal ulcer, cerebral embolism, and others). The herbal formula contained *Ding Xiang* (Flos Caryophylli), *Shi Di* (Calyx Kaki), *Ren Shen* (Radix et Rhizoma Ginseng), *Sheng Jiang* (Rhizoma Zingiberis Recens), *Zhi Qiao* (Fructus Aurantii), *Mu Xiang* (Radix Aucklandiae), *Chai Hu* (Radix Bupleuri), and others as needed. The treatment protocol was to cook the herbs in water to obtain 300 mL of decoction, which was taken in three equally-divided doses. In addition to herbs, the patients also were given acupuncture or acupressure treatments.¹
2. **Gastritis:** According to one study, 53 patients with gastritis due to regurgitation of bile were successfully treated using *Ding Xiang Shi Di Tang* plus *Si Jun Zi Tang* (Four-Gentlemen Decoction). The herbal formula contained the following ingredients: *Ding Xiang* (Flos Caryophylli) 6g, *Shi Di* (Calyx Kaki) 6g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 6g, *Dang Shen* (Radix Codonopsis) 12g, *Fu Ling* (Poria) 9g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 9g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. The treatment protocol was to cook

Dīng Xiāng Shì Dì Tāng (Clove and Persimmon Calyx Decoction)

the herbs in water, and administer the decoction in two equally-divided doses daily, for one month per course of treatment. Of 53 patients, the study reported significant improvement in 49 cases and moderate improvement in 4 cases.²

RELATED FORMULA

Shì Dì Tāng (Persimmon Calyx Decoction)

柿蒂湯
柿蒂汤

Pinyin Name: *Shì Dì Tāng*

Literal Name: Persimmon Calyx Decoction

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

<i>Shì Dì</i> (Calyx Kaki)	30g [9g]
<i>Dīng Xiāng</i> (Flos Caryophylli)	30g [6g]

The source text instructions are: grind the herbs into powder, and cook 12g of the powder in 1.5 bowls of water with 5 slices of *Sheng Jiang* (*Rhizoma Zingiberis Recens*) until the liquid is reduced to 0.7 bowl. Take the strained decoction while warm at any time of the day. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Shì Dì Tāng (Persimmon Calyx Decoction) is composed of *Dīng Xiāng Shì Dì Tāng* without *Ren Shen* (*Radix et Rhizoma Ginseng*). The main actions of this formula are to warm the middle *jiao* and correct reversed flow of qi. Clinically, it may be used for patients who have unremitting hiccups due to cold in the Stomach, without underlying Stomach deficiency.

Shēng Yáng Sǎn Huǒ Tāng

(Raise the Yang and Disperse the Fire Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into a coarse powder, and cooking 15g of the powder in 2 bowls of water until it is reduced to 1 bowl. Take the warm, strained decoction at any time of the day.

CHINESE THERAPEUTIC ACTIONS

1. Raises yang qi
2. Disperses stagnant heat and fire

CLINICAL MANIFESTATIONS

Cold obstruction and diversion of yang qi: feelings of heaviness and warmth in the extremities, and skin that is warm or hot to the touch.

CLINICAL APPLICATIONS

Influenza, tonsillitis, and sinusitis.

EXPLANATION

Sheng Yang San Huo Tang (Raise the Yang and Disperse the Fire Decoction) is designed to treat individuals with underlying Stomach deficiency, who after consuming cold foods, suffer from cold obstruction with diversion of yang qi to the four limbs. Because of the underlying deficiency, the Stomach is unable to process cold food, leading to stagnation of cold that blocks the normal

ascension of yang. Consequently, the flow of yang is diverted to the exterior, and produces a feeling of warmth in the extremities, skin, and muscles.

This formula contains many warm and acrid herbs to properly address the condition of cold obstruction with diversion of yang qi. *Sheng Ma* (Rhizoma Cimicifugae) and *Chai Hu* (Radix Bupleuri) both have a general ascending action. *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Ge Gen* (Radix Puerariae Lobatae) are particularly effective for the upper parts of the body, while *Du Huo* (Radix Angelicae Pubescentis) is effective for the lower parts. Lastly, *Fang Feng* (Radix Saposhnikoviae) has a generalized dispersing effect. To prevent the ascending and dispersing herbs from depleting qi and blood, *Ren Shen* (Radix et Rhizoma Ginseng) and *Bai Shao* (Radix Paeoniae Alba) tonify qi and nourish the blood. Fresh *Gan Cao* (Radix et Rhizoma Glycyrrhizae) purges stagnant fire from the Spleen, while honey-processed *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthens the Spleen and Stomach.

CAUTIONS / CONTRAINDICATIONS

Avoid consumption of cold foods and beverages while taking *Sheng Yang San Huo Tang*.

Sheng Yang San Huo Tang (Raise the Yang and Disperse the Fire Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Cold obstruction and diversion of yang qi	Feelings of heaviness and warmth in the extremities, skin that is warm or hot to the touch: diversion of yang qi to the exterior due to obstruction of cold in the interior	<ul style="list-style-type: none"> • Raises yang qi • Disperses stagnant heat and fire 	<ul style="list-style-type: none"> • <i>Sheng Ma</i> (Rhizoma Cimicifugae) and <i>Chai Hu</i> (Radix Bupleuri) lift yang qi upward. • <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii), <i>Ge Gen</i> (Radix Puerariae Lobatae), <i>Du Huo</i> (Radix Angelicae Pubescentis) and <i>Fang Feng</i> (Radix Saposhnikoviae) disperse cold from upper, lower and exterior parts of the body. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Bai Shao</i> (Radix Paeoniae Alba) tonify qi and nourish blood. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) purges stagnant fire from the Spleen. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthens the Spleen and Stomach.

Chapter 12 — Summary

— Qi-Regulating Formulas

SECTION 1: QI-MOVING FORMULAS

Name	Similarities	Differences
Yue Ju Wan (Escape Restraint Pill)	Regulates qi circulation to relieve constraint	Treats qi, blood, phlegm, fire, damp, and food stagnation
Jin Ling Zi San (Melia Toosendan Powder)	Regulates qi circulation to relieve pain	Smooths Liver qi, activates blood circulation
Ban Xia Hou Po Tang (Pinellia and Magnolia Bark Decoction)	Activate qi circulation, dissolve phlegm, direct reversed flow of qi downwards	Treats <i>mei he qi</i> (plum-pit qi) and phlegm stagnation
Zhi Shi Xie Bai Gui Zhi Tang (Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction)		Treats <i>xiong bi</i> (painful obstruction of the chest)
Ju He Wan (Tangerine Seed Pill)	Activate qi circulation, dispel cold, relieve pain, treat hernia	Stronger effect to soften hardness and disperse nodules
Tian Tai Wu Yao San (Top-Quality Lindera Powder)		Stronger effect to activate qi and dispel cold
Nuan Gan Jian (Warm the Liver Decoction)		Stronger effect to warm the Kidney and nourish the Liver
Hou Po Wen Zhong Tang (Magnolia Bark Decoction for Warming the Middle)	Activates qi circulation, warms the middle <i>jiao</i>	Dispels damp-cold in the Spleen and Stomach

Yue Ju Wan (Escape Restraint Pill) treats stagnation of qi, blood, phlegm, fire, dampness, and food. Because qi stagnation is the main cause of all the stagnations, this formula is categorized under the qi-regulating category. Clinical manifestations include chest fullness and rigidity, abdominal fullness and pain, acid regurgitation, nausea, vomiting, and indigestion.

Jin Ling Zi San (Melia Toosendan Powder) regulates qi circulation, smooths the Liver, activates blood circulation, and stops pain. This formula is cold in nature, and thus is used for Liver qi stagnation with heat. It can also be used for menstrual pain due to stagnation of qi and blood, accompanied by heat. Other clinical manifestations include intermittent hypochondriac pain, chest and abdominal pain, a yellow tongue coating, and a wiry, rapid pulse.

Ban Xia Hou Po Tang (Pinellia and Magnolia Bark Decoction) activates qi, disperses stagnation, reverses the flow of ascending qi, and dissolves phlegm. It is used for *mei he qi* (plum-pit qi) caused by emotional disturbances. Other clinical manifestations include chest and hypochondriac pain.

Zhi Shi Xie Bai Gui Zhi Tang (Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction) activates yang, disperses stagnation, corrects the reversed flow of qi, and dispels phlegm. This formula is designed to treat *xiong bi* (painful obstruction of the chest) due to chest yang deficiency and stagnation of qi and phlegm. Clinical manifestations include fullness and pain, wheezing, coughing with sputum, shortness of breath, a white and greasy tongue coating, and a deep, wiry pulse or tight pulse.

Ju He Wan (Tangerine Seed Pill), **Tian Tai Wu Yao San** (Top-Quality Lindera Powder), and **Nuan Gan Jian** (Warm the Liver Decoction) are commonly used to treat hernia. They have similar actions to activate qi circulation, dispel cold, and relieve pain.

Chapter 12 — Summary

- *Ju He Wan* is best for damp-cold hernia, as it more strongly activates qi circulation, stops pain, softens hardness, and dissolves nodules. Clinical manifestations of this condition include swelling and enlargement or hardness of the testes, and pain radiating from the testes to the abdomen.
- *Tian Tai Wu Yao San* treats hernia of the small intestine, and pain and swelling in the testes due to qi stagnation and cold accumulation. Of the three formulas, this one has strongest actions to activate qi circulation, stop pain, disperse cold, and spread the Liver. Key signs and symptoms include lower abdominal pain radiating to the testicles, a pale tongue with white tongue coating, and a wiry pulse.
- *Nuan Gan Jian* treats hernial pain due to cold in the Liver and Kidney. Its primary actions are to warm the Liver and Kidney, activate qi circulation, and stop pain. Clinically, it is used for hernial pain with lower abdominal pain, a pale tongue with white tongue coating, and a deep, wiry pulse.

Hou Po Wen Zhong Tang (Magnolia Bark Decoction for Warming the Middle) mainly treats abdominal distention, fullness and pain due to qi stagnation and damp-cold in the Spleen and Stomach.

SECTION 2: QI-DESCENDING FORMULAS

Name	Similarities	Differences
<i>Su Zi Jiang Qi Tang</i> (Perilla Fruit Decoction for Directing Qi Downward)		Eliminates phlegm, warms the Kidney
<i>Ding Chuan Tang</i> (Arrest Wheezing Decoction)	Direct reversed flow of Lung qi downwards, relieve cough, wheezing, and dyspnea	Releases exterior wind-cold, eliminates interior hot phlegm
<i>Shen Mi Tang</i> (Mysterious Decoction)		Dispels qi and phlegm stagnation
<i>Si Mo Tang</i> (Four Milled-Herbs Decoction)		Unblocks Liver qi stagnation, directs Lung and Stomach qi downwards
<i>Xuan Fu Dai Zhe Shi Tang</i> (Inula and Hematite Decoction)	Direct reversed flow of Stomach qi downwards, relieve nausea, vomiting, and hiccups	Eliminates phlegm, warms the Stomach, dispels cold
<i>Ju Pi Zhu Ru Tang</i> (Tangerine Peel and Bamboo Shaving Decoction)		Tonifies Stomach qi, clears Stomach heat
<i>Ding Xiang Shi Di Tang</i> (Clove and Persimmon Calyx Decoction)		Warms and strengthens the Stomach, dispels cold
<i>Sheng Yang San Huo Tang</i> (Raise the Yang and Disperse the Fire Decoction)	Raises and regulates yang qi circulation	Disperses stagnant fire

Su Zi Jiang Qi Tang (Perilla Fruit Decoction for Directing Qi Downward) is used mainly for upper-excess and lower-deficiency syndrome. In this syndrome, upper excess refers to phlegm accumulation in the Lung, and lower deficiency refers to Kidney yang deficiency. Clinical manifestations include excess phlegm and sputum, wheezing, coughing, shortness of breath, chest and hypochondriac fullness, possible back soreness, lassitude, and a white, slippery tongue coating.

Ding Chuan Tang (Arrest Wheezing Decoction) ventilates the Lung, corrects the reversed flow of qi, relieves wheezing, and clears heat and phlegm. It is used for wheezing due to wind-cold constricting the exterior and phlegm-heat brewing in the interior. Clinical manifestations include rapid breathing, excess phlegm, thick, yellow sputum, coughing, wheezing, a yellow, greasy tongue coating, and a slippery, rapid pulse.

Shen Mi Tang (Mysterious Decoction) regulates Lung qi and eliminates phlegm to relieve cough, wheezing, and dyspnea. It is most effective for wheezing and dyspnea due to stagnation of qi and

Chapter 12 — Summary

phlegm, with signs and symptoms such as shortness of breath, presence of sputum and phlegm in the lungs, a rattling sound in the throat, and fullness and distention in the chest and hypochondrium.

Si Mo Tang (Four Milled-Herbs Decoction) activates qi circulation, corrects the rising qi, disperses stagnation, and relieves chest oppression. It is used when there is irregular flow of Lung and Stomach qi as a result of Liver qi stagnation from emotional disturbances. Clinical manifestations include irritability, chest oppression, wheezing, fullness and oppression of the epigastrium, and lack of appetite.

Xuan Fu Dai Zhe Shi Tang (Inula and Hematite Decoction) dissolves phlegm, corrects the reversed flow of qi, and nourishes and harmonizes Stomach qi. It is used for Stomach qi deficiency with stagnation of phlegm and qi causing epigastric distention and hardness, with unremitting belching and hiccups.

Ju Pi Zhu Ru Tang (Tangerine Peel and Bamboo Shaving Decoction) nourishes qi, clears heat, and redirects Stomach qi to relieve hiccups and retching. This formula is used for hiccups, dry heaves and retching due to deficiency and heat of the Stomach.

Ding Xiang Shi Di Tang (Clove and Persimmon Calyx Decoction) warms and nourishes the middle *jiao*, corrects the reversed flow of qi, and stops hiccups. It is used for cold accumulation in the Stomach. Clinical manifestations include unremitting hiccups, distending sensation in the chest, and a slow pulse.

Sheng Yang San Huo Tang (Raise the Yang and Disperse the Fire Decoction) raises and regulates the circulation of yang qi to disperse stagnant fire and dissolve damp-heat. It treats obstruction of cold and diversion of yang qi characterized by feelings of heaviness and warmth in the extremities, and skin that is warm to the touch.

Chapter 13

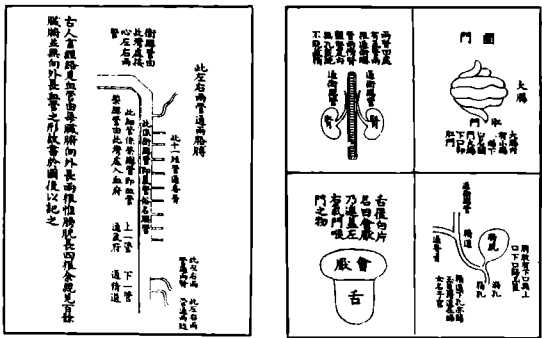

— Blood-Regulating Formulas

王清任 Wāng Qíng-Rèn

王清任 Wāng Qíng-Rèn, 1768 – 1831.

王清任 Wāng Qíng-Rèn

医林改错 Yi Lin Gai Cuo (Corrections of Errors Among Physicians)
in 1830, with illustrations and explanations of internal organs.

Wang Qing-Ren was born during the Qing dynasty. He grew up studying martial arts, and later pursued the study of traditional Chinese medicine. Because of his martial arts background, he had a good understanding of human anatomy.

Wang suspected many errors in the ancient texts.¹ He was the first person of his era to question traditional wisdom. To confirm his opinions, he personally observed the internal organs of corpses of executed convicts, and the deserted bodies of children who had died from epidemics.² After years of observation, Wang published *Yi Lin Gai Cuo* (Corrections of Errors Among Physicians) in 1830. In this text, he drew 25 precise illustrations of human anatomy from different angles and depth. Furthermore, based on his findings, he accurately pointed out many errors among medical texts at the time, such as the presence of the pancreas and diaphragm; corrected the mistaken notion that the liver was in the left hypochondrium; and stated that it is the brain that thinks (not the heart). Wang also said that “treating disease without knowing the internal organs is like a blind man walking in the dark.” Wang was harshly criticized for his boldness, and his works were not recognized for a long time.

Wang parlayed his uncommon understanding of human anatomy to develop the use of blood-moving formulas to treat blood stasis disorders. His outstanding formulas for the treatment of blood stasis affecting different parts of the body include:

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction)
- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction)
- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction)
- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction)
- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction)
- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction)

1. In Chinese culture, it is extremely disrespectful to cut [dissect] the human body, which is considered a gift from heaven. Therefore, ancient Chinese physicians learned human anatomy from illustrations in the *Nei Jing* (Inner Classic), and accepted it as universal truth.

2. Wang claimed in his writing that he only observed, but did not cut or dissect, human bodies. The corpses were deserted bodies of executed convicts or dead children, whose bodies were torn open by wild animals. Therefore, he did not commit any act of disrespect to those dead individuals.

Chapter 13 — Overview

— Blood-Regulating Formulas

Definition: Blood-regulating formulas invigorate blood circulation, remove blood stasis, and/or stop bleeding. They are used to treat blood stagnation and to stop bleeding.

Blood is a vital substance that continually circulates and nourishes both the inside (*zang fu* organs) and outside (extremities) of the body. Various etiologies contribute to disorders of blood deficiency, blood stagnation, and bleeding. These conditions may occur independently or concurrently. Blood deficiency is treated with blood-tonifying formulas (see Chapter 8: Tonic Formulas), blood stagnation is treated with blood-invigorating and stasis-removing formulas, and bleeding is treated with stop-bleeding formulas.

Differential diagnosis of blood disorders is extremely important for patient safety and for treatment success. One must determine whether the blood disorder is characterized by cold or heat, and whether it is of a deficient or excess nature. Furthermore, one needs to identify correctly the cause(s) of the blood disorder, and recognize whether the situation is severe or mild, and whether it is acute or chronic in nature. In emergency situations (e.g., acute and severe bleeding), it is more important to address the symptoms first (i.e., stop the bleeding). In non-emergent situations (e.g., chronic and mild blood disorders), one should concentrate on treating the cause, or address both the cause and the symptoms concurrently.

SUBCATEGORIES OF ACTION

Blood-regulating formulas are divided into two subcategories: blood-invigorating and stasis-removing formulas, and stop-bleeding formulas.

1. Blood-Invigorating and Stasis-Removing Formulas

These formulas are suitable for treating blood stagnation, and are commonly used to treat the following conditions involving blood stagnation: acute trauma, chronic injuries, amenorrhea, dysmenorrhea, retention of lochia, hemiplegia, chest pain, epigastric pain, and initial onset of ulcerative diseases. Clinical manifestations of blood stagnation include sharp, stabbing pain at a fixed location, pain that intensifies with pressure, and stiffness and hardness at the affected area upon palpation. The tongue body is usually dark and purple in color, with prominent or pronounced petechiae.

Because conditions involving blood stagnation are often complex, other herbs are usually added to enhance the overall effectiveness of the treatment. If blood stasis is accompanied by qi stagnation, qi-regulating herbs are added to promote normal qi circulation. If blood stasis is generating heat, both blood-invigorating and heat-clearing herbs should be used at the same time. If blood stasis is caused by cold, herbs that warm the channels and disperse cold enhance the treatment effect. Finally, chronic stagnation may contribute to qi and blood deficiencies, thus requiring the use of qi- and blood-tonifying herbs.

Herbs commonly used to invigorate blood circulation and remove blood stasis include *Chuan Xiong* (Rhizoma Chuanxiong), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Chi Shao* (Radix Paeoniae Rubra), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae). Exemplar formulas include *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi), *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction), *Wen*

Blood-regulating formulas have distinct, opposite functions: to invigorate blood circulation and remove blood stasis, and to promote coagulation and stop bleeding.

Differential diagnosis of blood disorders is extremely important for patient safety and for treatment success.

Chapter 13 — Overview

Jing Tang (Warm the Channels Decoction), *Sheng Hua Tang* (Generation and Transformation Decoction), and *Shi Xiao San* (Sudden Smile Powder).

2. Stop-Bleeding Formulas

These formulas are used to treat various types of bleeding, such as epistaxis, hemoptysis, hematemesis, hematochezia, and abnormal menstrual bleeding.

Proper management of bleeding is rather complicated, as there are many factors that must be considered, such as its characteristics (cold or hot, deficiency or excess), location (upper or lower body), and urgency (acute or chronic). For example, bleeding due to heat in the *xue* (blood) level, causing reckless movement of blood, needs to be treated with herbs that cool the blood and stop bleeding; bleeding due to deficiency and damage to the *chong* (thoroughfare) and *ren* (conception) channels is treated with herbs that tonify blood and stop bleeding. In addition, bleeding in the upper body should be treated with an additional proportion of herbs that guide the blood downward; and bleeding in the lower parts of the body should be treated with herbs that lift upward. Furthermore, in acute and severe cases of bleeding, it is more important to treat the symptoms first and stop the bleeding than it is to initially address the underlying cause; while in chronic cases, it is more important to address the underlying cause. Lastly, profuse bleeding may contribute to collapse of *qi*, and this condition must be treated first by herbs that restore and rescue *yuan* (source) *qi* from collapse, before efforts to control the bleeding will succeed.

Herbs commonly used to stop bleeding due to heat include *Ce Bai Ye* (Cacumen Platycladi), *Xiao Ji* (Herba Cirsii), *Bai Mao Gen* (Rhizoma Imperatae), and *Di Yu* (Radix Sanguisorbae). Herbs used to stop bleeding due to cold include *Pao Jiang* (Rhizoma Zingiberis Praeparatum), *Ai Ye* (Folium Artemisiae Argyi), and *Fu Long Gan* (Terra Flava Usta). Herbs commonly used to stop bleeding accompanied by blood stasis include *San Qi* (Radix et Rhizoma Notoginseng) and *Pu Huang* (Pollen Typhae). Furthermore, bleeding in the upper body should be treated with a small amount of herbs that guide the blood downward, such as *Niu Xi* (Radix Achyranthis Bidentatae) and *Da Huang* (Radix et Rhizoma Rhei); bleeding in the lower body should be treated with herbs that lift upward, such as charred *Jing Jie* (Herba Schizonepetae), charred *Sheng Ma* (Rhizoma Cimicifugae), and *Huang Qi* (Radix Astragali).

Exemplar formulas that stop bleeding include *Shi Hui San* (Ten Partially-Charred Substances Powder), *Huai Hua San* (Sophora Japonica Flower Powder), *Huang Tu Tang* (Yellow Earth Decoction), and *Jiao Ai Tang* (Ass-Hide Gelatin and Mugwort Decoction).

CAUTIONS / CONTRAINDICATIONS

- Use of blood-invigorating herbs may consume and damage the *qi* and blood, especially if used in large doses or for an extended period of time. Therefore, *qi*- and blood-tonifying herbs are often added to protect the body from adverse effects.
- Blood-regulating formulas have moving and dispersing characteristics, and should be used with extreme caution during pregnancy and in individuals with hypermenorrhea.
- Blood-activating herbs must be used cautiously, as overdose or prolonged use may contribute to more bleeding. If bleeding is accompanied by blood stasis (such as in a trauma situation), then blood-activating herbs should be used to clear any residual blood stagnation in the body, as well as taking appropriate stop-bleeding measures.
- Herbs that stop bleeding should not be given at large doses or for prolonged periods of time, as such uses may contribute to the development of blood stasis.
- Astringent herbs and formulas must be used with caution in cases of bleeding, as their binding and retaining effect may contribute to blood stasis.
- Bleeding in the upper body should **not** be treated with herbs that have ascending or lifting characteristics. Bleeding in the lower body should **not** be treated with herbs that have descending or sinking characteristics.

In non-emergent situations, concentrate on treating the cause, or address both cause and symptoms concurrently.

In severe, acute bleeding, it is more important to treat the symptoms, stop the bleeding, than to initially address the underlying cause.

Chapter 13 — Overview

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Blood-regulating formulas are divided into two subcategories: 1) blood-invigorating and stasis-removing formulas, and 2) stop-bleeding formulas. These subcategories have distinct characteristics in Chinese herbal medicine; they also have contrasting Western pharmacology and clinical applications.

1. Blood-invigorating and stasis-removing formulas have a wide variety of pharmacological effects and clinical applications. The main applications are as follows:

- **Clotting disorders:** Many blood-invigorating and stasis-removing herbs have been shown to have marked hematological effects. For example,
 - *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Chi Shao* (Radix Paeoniae Rubra) have anticoagulant effects.^{1,2,3}
 - *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Chuan Xiong* (Rhizoma Chuanxiong) and *Hong Hua* (Flos Carthami) have antiplatelet effects,^{4,5,6} and
 - *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae) have thrombolytic effects.^{7,8}
 Similarly, blood-invigorating and stasis-removing formulas have marked anticoagulant, antiplatelet, and thrombolytic effects.^{9,10,11,12,13,14} Clinical applications of these formulas include stroke,^{15,16} ischemic stroke,¹⁷ cerebral infarction,¹⁸ post-stroke sequelae,¹⁹ and deep vein thrombosis.²⁰ Exemplar formulas include *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction) and *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction).
- **Cardiovascular disorders:** Many blood-invigorating and stasis-removing herbs and formulas have been shown to exert profound influence on the cardiovascular system. They dilate blood vessels, decrease blood pressure, and increase blood perfusion to smaller blood vessels.^{21,22} Clinical applications include cardiac angina,²³ ischemia,²⁴ bradyarrhythmia,²⁵ and coronary heart disease.²⁶ Exemplar formulas include *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction) and *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction).
- **Hyperlipidemia:** Many blood-invigorating and stasis-removing herbs and formulas have been shown to lower plasma cholesterol and triglyceride levels.^{27,28,29} These formulas may be used to treat hyperlipidemia,³⁰ arteriosclerosis,³¹ and atherosclerosis.^{32,33} They also are used to treat associated clotting and cardiovascular disorders. Exemplar formulas include *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction) and *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction).
- **Gynecological and obstetric disorders:** One of the most common and effective uses of blood-invigorating and stasis-removing formulas is in the treatment of gynecological and obstetric disorders. Clinical applications include uterine bleeding,^{34,35} premenstrual syndrome,³⁶ dysmenorrhea,^{37,38} amenorrhea,^{39,40} anovulation,⁴¹ infertility (male and female),^{42,43,44,45} ectopic pregnancy,^{46,47} endometriosis,^{48,49,50} hysteromyoma,^{51,52} uterine myomas,⁵³ uterine leiomyomas,⁵⁴ adnexitis,⁵⁵ oophoritic cyst,⁵⁶ hyperplasia of mammary glands,⁵⁷ and retention of lochia.⁵⁸ Exemplar formulas include *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), *Shi Xiao San* (Sudden Smile Powder), *Wen Jing Tang* (Warm the Channels Decoction), *Ai Fu Nuan Gong Wan* (Mugwort and Cyperus Pill for Warming the Womb), *Sheng Hua Tang* (Generation and Transformation Decoction), and *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill).
- **Pain:** Many blood-invigorating and stasis-removing herbs are well-documented for their analgesic and anti-inflammatory effects.^{59,60,61,62,63} Clinical applications include headache,⁶⁴ sciatica,^{65,66} arthritis,⁶⁷ rheumatoid arthritis,⁶⁸ lumbago,⁶⁹ and many others. Exemplar formulas include *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction), *Zheng Gu Zi Jin Dan* (Purple and Gold Pill for Righteous Bones), and *Huo Luo Xiao Ling Dan* (Fantastically Effective Pill to Invigorate the Collaterals).
- **Traumatic injuries:** These formulas also treat traumatic injuries, such as concussion,^{70,71,72} bone fractures,^{73,74} and various external and sports injuries.⁷⁵ Exemplar formulas that treat traumatic injuries include *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood

Blood-invigorating and stasis-removing herbs have anticoagulant, antiplatelet and thrombolytic effects.

Chapter 13 — Overview

Decoction), *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction), *Zheng Gu Zi Jin Dan* (Purple and Gold Pill for Righteous Bones), and *Qi Li San* (Seven-Thousandths of a Tael Powder).

- **Liver, gallbladder, and pancreatic disorders:** These formulas may be used for certain liver, gallbladder, and pancreatic disorders, such as hepatitis,^{76,77,78} hepatic hemangioma,⁷⁹ liver abscess,⁸⁰ cholecystitis,⁸¹ and pancreatitis.⁸² Exemplar formulas include *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi), *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), and *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction).
- **Kidney disorders:** Some blood-invigorating and stasis-removing formulas have been successfully used to treat various kidney disorders, such as pyelonephritis,⁸³ renal insufficiency,⁸⁴ chronic nephritis,⁸⁵ and renal colic caused by stones.⁸⁶ Exemplar formulas include *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi) and *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction).

Stop-bleeding herbs
are hemostatic:
promote coagulation
and stop bleeding.

2. **Stop-bleeding formulas** are used primarily for their hemostatic effect to stop bleeding.
 - **Bleeding:** These formulas may be used to treat all types of bleeding disorders, including but not limited to epistaxis and hemoptysis in the upper body, hematemesia in the middle body, and hematochezia, hematuria, abnormal uterine bleeding, and bleeding hemorrhoids in the lower body.^{87,88,89,90} Furthermore, they treat acute bleeding from external injuries such as trauma or sports injuries, or chronic bleeding from internal illnesses such as bleeding ulcers.^{91,92} These hemostatic herbs and formulas increase platelets and facilitate the clotting cascade.⁹³ Representative formulas that stop bleeding include *Shi Hui San* (Ten Partially-Charred Substances Powder), *Huai Hua San* (Sophora Japonica Flower Powder), *Huang Tu Tang* (Yellow Earth Decoction), and *Jiao Ai Tang* (Ass-Hide Gelatin and Mugwort Decoction).

Section 1

活血祛瘀剂

— Blood-Invigorating and Stasis-Removing Formulas

Táo Hé Chéng Qì Tāng (Peach Pit Decoction to Order the Qi)

桃核承氣湯

桃核承气汤

Pinyin Name: *Tao He Cheng Qi Tang*

Literal Name: Peach Pit Decoction to Order the Qi

Alternate Names: *Tao He Cheng Chi Tang, Tao Ren Cheng Qi Tang, Tao Jen Cheng Chi Tang*, Persica Qi-Infusing Decoction, Peach Kernel Purgative Decoction, Persica and Rhubarb Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Tao Ren</i> (Semen Persicae)	50 pieces [12g]
<i>Da Huang</i> (Radix et Rhizoma Rhei)	12g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	6g
<i>Mang Xiao</i> (Natrii Sulfas)	6g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook all the ingredients, except *Mang Xiao* (Natrii Sulfas), in 7 cups [1,400 mL] of water until the liquid is reduced to 2.5 cups [500 mL]. Discard the residue, add *Mang Xiao* (Natrii Sulfas), and bring the decoction to a slight boil. Take 0.5 cup [100 mL] of the warm, strained decoction three times daily after meals. This formula may cause loose stools.

CHINESE THERAPEUTIC ACTIONS

Breaks up blood stasis and drains it downward

CLINICAL MANIFESTATIONS

Blood accumulation in the lower *jiao*: acute lower abdominal pain with normal urination, delirium, irritability, thirst, fever at night, or mania in severe cases.

CLINICAL APPLICATIONS

Cholecystitis, hepatitis, enteroparalysis, pyelonephritis, renal insufficiency, renal colic, headache, pharyngitis, toothache, diabetes mellitus, schizophrenia, irregular menstruation, dysmenorrhea, amenorrhea, acute pelvic inflammation, and retention of lochia.

EXPLANATION

According to the *Shang Han Lun* (Discussion of Cold-Induced Disorders), *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi) treats blood stagnation in the lower *jiao*. This condition occurs when a person suffering from a *taiyang* disorder is not relieved of the exterior pathogens, and the pathogens travel along the channel pathway and transform into heat in the interior. The heat then stagnates with the blood in the lower *jiao*, resulting in lower *jiao* blood stasis. Acute lower abdominal pain is due to blood stasis in the lower *jiao*. Delirium, irritability, thirst, fever at night, and mania are due to heat in the *xue* (blood) level. Because the water passages are not affected, urination is still normal.

Tao He Cheng Qi Tang consists of *Tiao Wei Cheng Qi Tang* (Regulate the Stomach and Order the Qi Decoction) plus *Tao Ren* (Semen Persicae) and *Gui Zhi* (Ramulus Cinnamomi). In this formula, *Tao Ren* (Semen Persicae) breaks up and dispels blood stagnation. *Da Huang* (Radix et Rhizoma Rhei) drains heat and blood stagnation downward. These two herbs, which together dispel blood stasis and heat, are the chief herbs in this formula. *Gui Zhi* (Ramulus Cinnamomi) opens the channels and collaterals to help

Táo Hé Chéng Qì Tāng (Peach Pit Decoction to Order the Qì)

Tao He Cheng Qi Tang (Peach Pit Decoction to Order the Qi)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Accumulation of blood in the lower jiao	<ul style="list-style-type: none">• Acute lower abdominal pain: blood stasis in the lower jiao• Delirium, irritability, and mania: heat disturbing the shen (spirit)• Thirst and fever at night: heat consuming yin and body fluids	Breaks up blood stasis and drains it downward	<ul style="list-style-type: none">• <i>Tao Ren</i> (Semen Persicae) breaks up and dispels blood stagnation.• <i>Da Huang</i> (Radix et Rhizoma Rhei) drains heat and stagnation downward.• <i>Gui Zhi</i> (Ramulus Cinnamomi) opens the channels and collaterals to dispel blood stasis.• <i>Mang Xiao</i> (Natrii Sulfas) drains heat.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) supplements qi and regulates the middle jiao, and lessens the harsh effects of the other herbs.

Tao Ren (Semen Persicae) dispel blood stasis. *Mang Xiao* (Natrii Sulfas) drains heat and softens hardness to help *Da Huang* (Radix et Rhizoma Rhei) drain downwards. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), besides supplementing qi and harmonizing the middle jiao, lessens the harsh effects of the other herbs to prevent injury to the qi.

MODIFICATIONS

- With blood deficiency, add *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba).
- With blood stagnation, add *San Qi* (Radix et Rhizoma Notoginseng) and *Chi Shao* (Radix Paeoniae Rubra).
- With qi stagnation, add *Xiang Fu* (Rhizoma Cyperi), *Wu Yao* (Radix Linderae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Mu Xiang* (Radix Aucklandiae).
- With constipation, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis).
- With restlessness and thirst, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- With oliguria, add *Che Qian Zi* (Semen Plantaginis), *Fu Ling* (Poria), and *Mu Tong* (Caulis Akebiae).
- With bleeding, add *Di Huang* (Radix Rehmanniae) and *Bai Mao Gen* (Rhizoma Imperatae).
- With distention and pain due to qi stagnation, add *Xiang Fu* (Rhizoma Cyperi) and *Zhi Qiao* (Fructus Aurantii).
- With trauma-related pain, add *Chi Shao* (Radix Paeoniae Rubra), *Dang Gui Wei* (Extremities Radix Angelicae Sinensis), *Hong Hua* (Flos Carthami), and *Su Mu* (Lignum Sappan).
- With fire flaring upward manifesting in headache, distention in the head, red eyes and face, and vomiting of blood, add *Di Huang* (Radix Rehmanniae), *Mu Dan Pi* (Cortex Moutan), *Zhi Zi* (Fructus Gardeniae), and *Niu Xi* (Radix Achyranthis Bidentatae).

- For irregular menstruation or amenorrhea due to blood stasis, add *Dang Gui* (Radix Angelicae Sinensis) and *Hong Hua* (Flos Carthami).
- With gallstones, add *Jin Qian Cao* (Herba Lysimachiae), *Hai Jin Sha* (Spora Lygodii), *Yu Jin* (Radix Curcumae), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

CAUTIONS / CONTRAINDICATIONS

- *Tao He Cheng Qi Tang* should be used only when the exterior pathogen is no longer present at the exterior. Therefore, if exterior symptoms are still present, exterior-releasing methods need to be employed before this formula can be given.
- Because this formula strongly breaks up blood stagnation and dispels heat, careful diagnosis should be made before applying this strong formula.
- This formula is contraindicated during pregnancy.
- Use of this formula is occasionally associated with side effects that include nausea, vomiting, and diarrhea.¹

PHARMACOLOGICAL EFFECTS

- 1. Purgative:** One study reported marked success using *Tao He Cheng Qi Tang* to induce bowel movements in constipated mice. The first bowel movement was generally reported within 4 hours after the administration of the herbs.²
- 2. Antiplatelet and anticoagulant:** According to various *in vitro* studies, administration of *Tao He Cheng Qi Tang* has been associated with inhibiting platelet aggregation, inhibiting coagulation, and decreasing blood viscosity.^{3,4}
- 3. Antihyperlipidemic:** Administration of *Tao He Cheng Qi Tang* in animal subjects was associated with reduced plasma lipoprotein and triglyceride levels.⁵
- 4. Hypoglycemic:** According to one study, administration of *Tao He Cheng Qi Tang* on an empty stomach to diabetic

Táo Hé Chéng Qì Tāng (Peach Pit Decoction to Order the Qì)

rats was associated with decreased plasma levels of glucose and insulin.⁶

5. **Anti-inflammatory:** Administration of *Tao He Cheng Qi Tang* in animal subjects was associated with reduced swelling and inflammation. The anti-inflammatory effect was attributed primarily to *Da Huang* (Radix et Rhizoma Rhei) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).^{7,8}

CLINICAL STUDIES AND RESEARCH

1. **Cholecystitis:** Use of modified *Tao He Cheng Qi Tang* was associated with 94% effectiveness in treating cholecystitis in 100 patients (47 males and 53 females, between 19-54 years of age, with 1 day to 13 months history of illness). The herbal treatment contained *Tao Ren* (Semen Persicae), *Da Huang* (Radix et Rhizoma Rhei), *Gui Zhi* (Ramulus Cinnamomi), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), and *Zhi Shi* (Fructus Aurantii Immaturus). The treatment protocol was to administer the decoction every 6 hours in acute cases, and twice daily in chronic cases. The duration of treatment ranged from 5-27 days. Of 100 patients, the study reported complete recovery in 23 cases, remission in 64 cases, improvement in 7 cases, and no effect in 6 cases.⁹
2. **Hepatitis:** Administration of *Tao He Cheng Qi Tang* and *Chai Ling Tang* (Bupleurum and Poria Decoction) in 10 patients with chronic active hepatitis was associated with significant reduction of liver enzymes and symptomatic improvements.¹⁰
3. **Enteroparalysis:** One study reported marked effectiveness using modified *Tao He Cheng Qi Tang* to treat 20 patients with enteroparalysis associated with traumatic injuries to the thoracic or lumbar spine. For patients with a severe condition, the formula was modified by removing *Gui Zhi* (Ramulus Cinnamomi) and adding *Zhi Shi* (Fructus Aurantii Immaturus), *Hou Po* (Cortex Magnoliae Officinalis), *Fan Xie Ye* (Folium Sennae), and others as needed. For those who did not have a bowel movement after the initial herbal treatment, 30 grams each of *Da Huang* (Radix et Rhizoma Rhei) and *Xuan Ming Fen* (Natrii Sulfas Exsiccatus) were added. The herbs were cooked in water, and the herbal solution (approximately 600 mL) was given via rectal enema. The study reported marked effect in most patients to induce bowel movement.¹¹
4. **Pyelonephritis:** Use of modified *Tao He Cheng Qi Tang* was effective in treating 46 patients with chronic pyelonephritis. The formula was modified based on the condition of each individual patient. For individuals with diarrhea, *Mang Xiao* (Natrii Sulfas) was removed. For frequent and urgent urination, *Hua Shi* (Talcum) was added. For lower abdominal pain, a large dose of *Gui Zhi* (Ramulus Cinnamomi) or *Tian Tai Wu Yao San* (Top-Quality Linder Powder) was added. Of 46 patients, the study reported significant improvement in 24 cases and improvement in 15 cases.¹²
5. **Renal insufficiency:** Administration of modified *Tao He Cheng Qi Tang* in 18 patients with renal insufficiency was associated with marked improvements in BUN, SCr, and CO₂CP. The herbal formula was given one time daily, and contained the following ingredients: *Tao Ren* (Semen Persicae), *Da Huang* (Radix et Rhizoma Rhei), *Gui Zhi* (Ramulus Cinnamomi), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), *Huang Qi* (Radix Astragali), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Ze Xie* (Rhizoma Alismatis), *Yi Mu Cao* (Herba Leonuri), and *Nu Zhen Zi* (Fructus Ligustri Lucidi).¹³
6. **Renal colic:** One study reported pain relief using *Tao He Cheng Qi Tang* to treat renal colic caused by stones. The treatment protocol was to administer the herbs in decoction (1 pack per day, with decoction given in three equally-divided doses). The study reported relief of pain in all 11 patients within 2-3 days.¹⁴
7. **Headache:** One study reported marked results using modified *Tao He Cheng Qi Tang* to treat headache caused by physical trauma. Of 10 patients, the study reported significant relief of pain in 8 cases within 10 to 15 packs of herbs, and complete resolution of all symptoms after 40 to 90 packs of herbs.¹⁵
8. **Pharyngitis:** One clinical study evaluated the efficacy of modified *Tao He Cheng Qi Tang* in treating acute pharyngitis. The herbal treatment contained *Tao He Cheng Qi Tang* plus *Niu Xi* (Radix Achyranthis Bidentatae), *She Gan* (Rhizoma Belamcandae), *Jie Geng* (Radix Platycodonis), *Pang Da Hai* (Semen Sterculiae Lychnophorae), and others as needed. The average duration of treatment was 2.8 days. Of 47 patients, the study reported complete recovery in 21 cases within 2 packs of herbs, 24 cases within 3-4 packs of herbs, and 2 cases within 5 packs of herbs.¹⁶
9. **Toothache:** One study reported complete recovery in 94 of 100 patients with toothache using *Tao He Cheng Qi Tang* plus *Xia Ku Cao* (Spica Prunellae) and *Bai Zhi* (Radix Angelicae Dahuricae). Additional modifications were made as follows: *Fang Feng* (Radix Saposhnikoviae) and *Quan Xie* (Scorpio) for toothache due to wind and fire; *Shi Gao* (Gypsum Fibrosum) and *Sheng Ma* (Rhizoma Cimicifugae) for Stomach fire; *Di Huang* (Radix Rehmanniae) and *Bai Shao* (Radix Paeoniae Alba) for yin-deficient fire; *Lian Qiao* (Fructus Forsythiae) and *Bei Mu* (Bulbus Fritillariae) for abscesses; and *Feng Fang* (Nidus Vespaee) and *Wei Ling Xian* (Radix et Rhizoma Clematidis) for pain due to dental caries.¹⁷
10. **Diabetes mellitus:** One study reported 79% effectiveness using *Tao He Cheng Qi Tang* to treat 106 patients with

Táo Hé Chéng Qì Tāng (Peach Pit Decoction to Order the Qi)

type II diabetes mellitus. The mechanism was attributed to the formula's ability to stimulate the beta-islet cells of the pancreas to produce more insulin.^{18,19}

11. **Schizophrenia:** Use of *Tao He Cheng Qi Tang* was associated with beneficial effect in all 10 patients with schizophrenia that was characterized by blood stagnation in the lower jiao.²⁰

HERB-DRUG INTERACTION

Drug-induced menopause: One study evaluated the therapeutic effects of certain herbal medicines on menopausal symptoms induced by gonadotropin-releasing hormone agonist therapy in Japanese women with endometriosis, adenomyosis, or leiomyoma. According to this study, 13 menopausal patients were successfully treated with *Tao He Cheng Qi Tang*, *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), *Jia Wei Xiao Yao San* (Augmented Rambling Powder), or *Gui Zhi Tang* (Cinnamon Twig Decoction). Most importantly, there were no significant changes in serum estradiol levels after treatment with these herbal medicines. The researchers concluded that these herbal medicines could be recommended for menopausal symptoms induced by gonadotropin-releasing hormone agonists without a negative effect on serum estradiol levels.²¹

RELATED FORMULA

Xià Yǔ Xuè Tāng (Drain Blood Stasis Decoction)

下瘀血湯
下瘀血汤

Pinyin Name: *Xia Yu Xue Tang*

Literal Name: Drain Blood Stasis Decoction

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Da Huang</i> (Radix et Rhizoma Rhei)	9g
<i>Tao Ren</i> (Semen Persicae)	20 pieces [9g]
<i>Tu Bie Chong</i> (Eupolyphaga seu <i>Steleophaga</i>), <i>ao</i> (simmered)	20 pieces [9g]

The source text states to prepare the ingredients as a decoction with the suggested dose in brackets. The main actions of *Xia Yu Xue Tang* (Drain Blood Stasis Decoction) are to break blood stasis and drain it downward. This formula is used primarily to treat postpartum women with abdominal pain due to stasis and hardening of blood in the umbilical region. The source text identifies this formula as treating “dried blood below the umbilicus.”

Tao He Cheng Qi Tang and *Xia Yu Xue Tang* (Drain Blood Stasis Decoction) both treat blood stasis in the lower abdomen.

- *Tao He Cheng Qi Tang* treats lower abdominal pain due to heat accumulation and blood stasis. In addition to lower abdominal pain, there are also symptoms such as delirium, irritability, thirst, fever at night, or mania in severe cases.
- *Xia Yu Xue Tang* treats pain due to blood stasis in the umbilical region in postpartum women. The affected area (umbilical region) is painful and hard on palpation, but there are usually no systemic symptoms.

AUTHORS' COMMENTS

Tao He Cheng Qi Tang was used originally to treat blood stasis in the lower jiao. Today, its clinical application has been expanded, as this formula has been proven effective in treating various other conditions characterized by blood stasis, including:

- Sports injuries with bruises and severe pain that limit physical movements, accompanied by difficult defecation or urination.
- Headache, feelings of distention in the head, red eyes, or toothache caused by excessive fire rising.
- Epistaxis and hemoptysis (vomiting of purplish black blood) due to blood heat.
- Blood stagnation in women, such as amenorrhea, persistent bleeding after delivery, hardness and pain in the lower abdomen, and shortness of breath.

(Unblock the Orifices and Invigorate the Blood Decoction)

通竅活血湯

通窍活血汤

Pinyin Name: *Tong Qiao Huo Xue Tang*

Literat Name: Unblock the Orifices and Invigorate the Blood Decoction

Original Source: *Yi Lin Gai Cuo* (Corrections of Errors Among Physicians) by Wang Qing-Ren in 1830

COMPOSITION

<i>Chi Shao</i> (Radix Paeoniae Rubra)	3g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	3g
<i>Tao Ren</i> (Semen Persicae), <i>yan</i> (ground) till muddy	9g
<i>Hong Hua</i> (Flos Carthami)	9g
<i>Lao Cong</i> (Herba Allii Fistulosi), <i>qie</i> (sliced)	3 pieces [3-6g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	9g
<i>She Xiang</i> (Moschus)	0.15g
<i>Da Zao</i> (Fructus Jujubae)	7 pieces [5g]
Grain-based liquor	250g

Note: *She Xiang* (Moschus) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

CLINICAL MANIFESTATIONS

Blood stagnation in the head and face: headache, dizziness, chronic tinnitus and poor hearing, hair loss, facial appearance that is blue, green, or purple in color; with or without rosacea or vitiligo; emaciation in women due to blood disorders; *gan ji* (infantile malnutrition) with muscle wasting, enlarged abdomen, and tidal fever.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook all the ingredients, except *She Xiang* (Moschus), in a large bowl of water. Discard the residue, add *She Xiang* (Moschus) and a grain-based liquor to the strained decoction, and bring it to a boil twice. Take the warm decoction before bedtime. Today, this formula may be prepared as a decoction with the doses suggested in brackets, with the addition of a small amount of grain-based liquor.

CLINICAL APPLICATIONS

Concussion, cerebrovascular accident, vascular headache, hypersomnia, rheumatoid arthritis, and carbon monoxide poisoning.

EXPLANATION

The main actions of *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction) are to activate blood circulation and remove blood stagnation in the head and facial regions. It can be used for various conditions characterized by blood stagnation in the head and face.

CHINESE THERAPEUTIC ACTIONS

Activates blood circulation and opens the sensory orifices

Tōng Qiào Huó Xuè Tāng

(Unblock the Orifices and Invigorate the Blood Decoction)

Tong Qiao Huo Xue Tang (Unblock the Orifices and Invigorate the Blood Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood stagnation in the head and face	<ul style="list-style-type: none">Headache with blue/green/purplish facial appearance: blood stagnation in the headChronic tinnitus and poor hearing: blood stagnation blocking the sensory orifices	<ul style="list-style-type: none">Activates blood circulationOpens the sensory orifices	<ul style="list-style-type: none"><i>Chi Shao</i> (Radix Paeoniae Rubra), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), <i>Tao Ren</i> (Semen Persicae), and <i>Hong Hua</i> (Flos Carthami) activate blood circulation and eliminate blood stasis.<i>Lao Cong</i> (Herba Allii Fistulosi) unblocks stagnation and promotes the circulation of yang qi.<i>She Xiang</i> (Moschus) opens the sensory orifices and restores their normal functions.<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize the herbs.

In this formula, *Chi Shao* (Radix Paeoniae Rubra), *Chuan Xiong* (Rhizoma Chuanxiong), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami) all activate blood circulation and eliminate blood stasis. *Lao Cong* (Herba Allii Fistulosi) unblocks stagnation and promotes the circulation of yang qi. *She Xiang* (Moschus) opens the sensory orifices and restores their normal functions. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the herbs.

2. **Carbon monoxide poisoning:** Use of modified *Tong Qiao Huo Xue Tang* was effective in treating 11 patients with carbon monoxide poisoning. The herbal formula contained *She Xiang* (Moschus) 6g, *Chi Shao* (Radix Paeoniae Rubra) 30g, *Chuan Xiong* (Rhizoma Chuanxiong) 30g, *Tao Ren* (Semen Persicae) 30g, *Hong Hua* (Flos Carthami) 30g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 30g, *Yu Jin* (Radix Curcumae) 30g, *Huang Qi* (Radix Astragali) 50g, *Dang Gui* (Radix Angelicae Sinensis) 50g, *Shi Chang Pu* (Rhizoma Acori Tatarinowii) 20g, and others. The herbs were ground into a fine powder and placed into capsules. The treatment protocol was to administer 3g of herbs in capsules twice daily after meals with an herbal tea made by cooking 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens), 3 pieces of *Cong Bai* (Bulbus Allii Fistulosi), and 7 pieces of *Da Zao* (Fructus Jujubae) in equal portions of water and grain-based liquor. The herbs were given for 1 month per course of treatment. Of 11 patients, the study reported significant improvement in 7 cases, moderate improvement in 3 cases, and no improvement in 1 case. No side effects were reported.²

CLINICAL STUDIES AND RESEARCH

1. **Concussion:** One study reported a marked effect using modified *Tong Qiao Huo Xue Tang* to treat concussion. The herbal formula contained *Chuan Xiong* (Rhizoma Chuanxiong) 20g, *Niu Xi* (Radix Achyranthis Bidentatae) 20g, *Fu Ling* (Poria) 20g, *Huang Jing* (Rhizoma Polygonati) 20g, *Mu Dan Pi* (Cortex Moutan) 20g, *Tao Ren* (Semen Persicae) 10g, *Hong Hua* (Flos Carthami) 10g, *Tu Bie Chong* (Eupolyphaga seu Steleophaga) 10g, *Shi Chang Pu* (Rhizoma Acori Tatarinowii) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 6g, *Xi Xin* (Radix et Rhizoma Asari) 3g, and *Bo He* (Herba Menthae) 3g. Of 61 patients, the study reported complete recovery in 14 cases after 4-6 packs of herbs, and in 47 cases after 8-14 packs.¹

DOSAGE / PREPARATION / ADMINISTRATION

Prepare as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and dispels blood stagnation
2. Activates qi circulation and relieves pain

CLINICAL MANIFESTATIONS

Blood stagnation in the chest and obstructed blood circulation: chronic stabbing pain at a fixed location in the chest and/or the head, hypochondriac pain, chronic and constant hiccups, dry heaves or vomiting after intake of water, palpitations, insomnia, restless sleep, fidgeting, bad temper, tidal fever in the evenings, dark red tongue body with petechiae spots on the top or the sides, dark lips, dark eyes, and a rough or wiry, tight pulse.

CLINICAL APPLICATIONS

Coronary heart disease, angina pectoris, hypertension, rheumatic heart disease, thrombosis, embolism, cardiac ischemia, bradyarrhythmia, stroke, concussion, post-concussion syndrome, cerebral atherosclerosis, hyperlipidemia, pneumothorax, physical injury to the chest, hepatitis, pancreatitis, headache, vascular headache, insomnia, phlebitis, mammary gland hyperplasia, pelvic inflammatory disease, schizophrenia, functional neurosis, endometriosis, and amenorrhea.

EXPLANATION

Xue Fu Zhu Yu Tang (Drive Out Stasis in the Mansion of Blood Decoction) treats various clinical manifestations induced by blood stagnation in the chest (the mansion of blood). Blood stagnation in the chest may cause stabbing pain at a fixed location in the chest and hypochondrium. Blood stagnation may cause pain in the body, which in turn may lead to restlessness, fidgeting, and bad temper. Chronic blood stagnation may contribute to Liver qi stagnation, which, when overacting on the Stomach, may cause hiccups, dry heaves and vomiting. Furthermore, chronic blood stasis contributes to heat formation, causing palpitations, insomnia, and tidal fever. A dark red tongue with petechiae indicates blood stagnation. A rough or wiry, tight pulse indicates blood stagnation with pain.

The design of this formula uses the principles of two formulas: *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit) to nourish blood, activate blood circulation, and eliminate blood stasis; and *Si Ni San* (Frigid Extremities Powder) to activate qi circulation, harmonize the blood, and smooth the Liver.

In this formula, *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) are used to break up blood stagnation and activate blood circulation. *Di Huang* (Radix Rehmanniae), *Dang Gui* (Radix Angelicae Sinensis), *Chi Shao*

Xuè Fǔ Zhú Yū Tāng

(Drive Out Stasis in the Mansion of Blood Decoction)

Xue Fu Zhu Yu Tang (Drive Out Stasis in the Mansion of Blood Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood stagnation in the chest and obstructed blood circulation	<ul style="list-style-type: none"> Chronic stabbing pain at a fixed location in the chest and head and hypochondriac pain: blood stagnation in the chest Hiccups, dry heaves and vomiting: reversed flow of Stomach qi due to blood stagnation Palpitations, insomnia, restless sleep, fidgeting, bad temper and tidal fever: <i>shen</i> (spirit) disturbance caused by blood stagnation Dark lips and eyes: lack of nourishment due to blood stagnation Dark red tongue with petechiae and rough or wiry, tight pulse: blood stagnation 	<ul style="list-style-type: none"> Activates blood circulation and dispels blood stagnation Activates qi and relieves pain 	<ul style="list-style-type: none"> <i>Tao Ren</i> (Semen Persicae) and <i>Hong Hua</i> (Flos Carthami) break up blood stagnation and activate blood circulation. <i>Di Huang</i> (Radix Rehmanniae), <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chi Shao</i> (Radix Paeoniae Rubra), and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) nourish blood, activate blood circulation, and clear heat. <i>Chai Hu</i> (Radix Bupleuri) smooths Liver qi and <i>Zhi Qiao</i> (Fructus Aurantii) regulates qi in the chest and the upper <i>jiao</i>. <i>Jie Geng</i> (Radix Platycodonis) guides all of the herbs upward to the chest. <i>Chuan Niu Xi</i> (Radix Cyathulae) unblocks stagnation in the blood vessels and guides blood downward. <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

(Radix Paeoniae Rubra), and *Chuan Xiong* (Rhizoma Chuanxiong) nourish the blood, activate blood circulation, and clear heat. *Chai Hu* (Radix Bupleuri) smooths Liver qi to relieve chest pain. *Zhi Qiao* (Fructus Aurantii) regulates qi in the chest and the upper *jiao*. *Jie Geng* (Radix Platycodonis) guides all of the herbs upward to the chest. *Chuan Niu Xi* (Radix Cyathulae) unblocks stagnation in the blood vessels and guides blood downwards. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula. Overall, this formula has the unique and valuable attributes of activating blood circulation and dispelling blood stasis without injuring the blood, and soothing the Liver and relieving qi stagnation without consuming qi.

MODIFICATIONS

- With post-concussion complications, add *Quan Xie* (Scorpio) and *Gao Ben* (Rhizoma et Radix Ligustici).
- With allergic purpura, add *Ban Lan Gen* (Radix Isatidis) and *Qin Jiao* (Radix Gentianae Macrophyllae).
- With neck and shoulder stiffness and pain, add *Ge Gen* (Radix Puerariae Lobatae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- With frontal headache due to heat and blood stagnation, add *Bai Zhi* (Radix Angelicae Dahuricae) and *Shi Gao* (Gypsum Fibrosum).
- With vertex headache due to wind, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Gao Ben* (Rhizoma et Radix Ligustici).
- With headache accompanied by dizziness, vertigo, and tinnitus, add *Ju Hua* (Flos Chrysanthemi), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Xia Ku Cao* (Spica Prunellae).
- With heat, add *Huang Qin* (Radix Scutellariae), *Long Dan* (Radix et Rhizoma Gentianae), and *Mu Dan Pi* (Cortex Moutan).
- With cold, add *Gui Zhi* (Ramulus Cinnamomi) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei).
- With blood stagnation and yin deficiency, add *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).
- With blood stagnation and qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- With palpitations, add *Fu Shen* (Poria Paradicis) and *Bai Zi Ren* (Semen Platycladi).
- With angina, add *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Jiang Xiang* (Lignum Dalbergiae Odoriferae).
- With feelings of distention, oppression, and pain in the chest, add *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis).
- With distention and the sensation of a mass or blockage in the hypochondriac area, add *Yu Jin* (Radix Curcumae) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae).
- With insomnia and excessive dreams, add *Shou Wu Teng*

Xuè Fǔ Zhú Yú Tāng

(Drive Out Stasis in the Mansion of Blood Decoction)

(Caulis Polygoni Multiflori) and *He Huan Pi* (Cortex Albiziae).

- With amenorrhea and dysmenorrhea due to blood stasis, remove *Jie Geng* (Radix Platycodonis), and add *Xiang Fu* (Rhizoma Cyperi) and *Yi Mu Cao* (Herba Leonuri).
- To dissolve blood clots, add *Shui Zhi* (Hirudo), *Meng Chong* (Tabanus), *Da Huang* (Radix et Rhizoma Rhei), and *Tu Bie Chong* (Eupolyphaga seu Steleophaga).

CAUTIONS / CONTRAINDICATIONS

- *Xue Fu Zhu Yu Tang* is contraindicated in pregnancy, and in cases of hypermenorrhea, because this formula strongly activates blood circulation and removes blood stasis.
- If this formula is to be taken for a prolonged period of time, tonic herbs should be added accordingly.

PHARMACOLOGICAL EFFECTS

1. **Antiplatelet and anticoagulant:** Administration of *Xue Fu Zhu Yu Tang* was associated with a marked antiplatelet effect in animal subjects.^{1,2} It also inhibits the formation of blood clots.³ Lastly, it improves blood circulation by decreasing blood viscosity.⁴
2. **Cardiovascular:** Administration of *Xue Fu Zhu Yu Tang* was associated with reduced blood pressure, a response attributed to its effect to inhibit the rhythm and contractility of the heart. Furthermore, it has a regulatory effect on the blood vessels, causing them to relax or constrict.^{5,6}
3. **Antihyperlipidemic:** Administration of *Xue Fu Zhu Yu Tang* in male rats at 16g/kg was associated with a reduction of plasma cholesterol levels. However, it did not affect the plasma glucose or triglyceride levels.⁷

CLINICAL STUDIES AND RESEARCH

1. **Cardiac ischemia:** One study reported 89.3% effectiveness using modified *Xue Fu Zhu Yu Tang* to treat elderly patients with cardiac ischemia. Of 84 patients, the study reported significant improvement in 29 cases, moderate improvement in 46 cases, and no effect in 9 cases. The duration ranged from 1-3 courses of treatment.⁸
2. **Bradyarrhythmia:** One study reported 92.8% effectiveness using modified *Xue Fu Zhu Yu Tang* in decoction daily to treat 28 patients with bradyarrhythmia. The herbal treatment contained *Tao Ren* (Semen Persicae) 10g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Chi Shao* (Radix Paeoniae Rubra) 10g, *Niu Xi* (Radix Achyranthis Bidentatae) 10g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 10g, *Gua Lou Pi* (Pericarpium Trichosanthis) 10g, *Hong Hua* (Flos Carthami) 5g, *Chuan Xiong* (Rhizoma Chuanxiong) 5g, *Jie Geng* (Radix Platycodonis) 5g, *Gan*

Cao (Radix et Rhizoma Glycyrrhizae) 3g, and *Huang Qi* (Radix Astragali) 15g. Of 28 patients, the study reported complete recovery in 14 cases, improvement in 12 cases, and no effect in 2 cases.⁹

3. **Pneumothorax:** One study reported complete recovery in all 12 patients with pneumothorax after 2-4 weeks of treatment with *Xue Fu Zhu Yu Tang*.¹⁰
4. **Hepatitis:** Administration of modified *Xue Fu Zhu Yu Tang* in decoction in 81 patients with chronic hepatitis was associated with complete recovery in 67 cases, improvement in 8 cases, and no effect in 6 cases. The overall effectiveness was 92.6%. In addition to the base formula, modifications were made as follows: *Huang Qin* (Radix Scutellariae) and *Zhi Zi* (Fructus Gardeniae) were added for dry mouth with bitter taste, yellow urine, and yellow greasy tongue coating; *Fu Ling* (Poria) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added for abdominal fullness, loose stools, and a pale tongue body with a white coating; and *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Gou Qi Zi* (Fructus Lycii) for *wu xin re* (five-center heat), soreness and weakness of the lower back and knees, and a red tongue body with a thin coating.¹¹
5. **Pancreatitis:** One study reported complete recovery in 128 patients using integrated treatments of herbs and drugs. The herbal treatment included modified *Xue Fu Zhu Yu Tang* in decoction daily for 7 days per course of treatment. Western treatment included drugs and intravenous fluids (specific details were unavailable). Instructions were also given to follow a low-fat, high-protein, and high carbohydrate diet. The study reported complete recovery in all 128 patients within 3 courses of treatment.¹²
6. **Headache:** One study reported 93.33% effectiveness using modified *Xue Fu Zhu Yu Tang* to treat 15 patients with headache due to blood stagnation. Modifications to the formula included addition of *Shi Jue Ming* (Concha Haliotidis) and *Gou Teng* (Ramulus Uncariae cum Uncis) for Liver yang rising; *Shan Zhu Yu* (Fructus Corni) and *Gou Qi Zi* (Fructus Lycii) for Kidney deficiency; *Hou Po* (Cortex Magnoliae Officinalis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for turbid dampness; and *Bai Zhi* (Radix Angelicae Dahuricae) and *Gao Ben* (Rhizoma et Radix Ligustici) for exterior wind-cold. Of 15 patients, 3 had complete recovery, 11 had marked improvement, and 1 had no response.¹³
7. **Vascular headache:** Fifty patients with vascular headaches responded well to modified *Xue Fu Zhu Yu Tang*. The herbal treatment contained *Tao Ren* (Semen Persicae) 12g, *Hong Hua* (Flos Carthami) 9g, *Dang Gui* (Radix Angelicae Sinensis) 9g, *Di Huang* (Radix Rehmanniae) 9g,

Xuè Fǔ Zhú Yū Tāng

(Drive Out Stasis in the Mansion of Blood Decoction)

Chuan Xiong (Rhizoma Chuanxiong) 15g, *Chi Shao* (Radix Paeoniae Rubra) 6g, *Niu Xi* (Radix Achyranthis Bidentatae) 9g, *Jie Geng* (Radix Platycodonis) 5g, *Chai Hu* (Radix Bupleuri) 3g, *Zhi Qiao* (Fructus Aurantii) 6g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. Additional modifications were made as follows: for frontal headache, *Bai Zhi* (Radix Angelicae Dahuricae), *Tian Ma* (Rhizoma Gastrodiae), and *Xi Xin* (Radix et Rhizoma Asari) were added; for occipital headache, *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Du Huo* (Radix Angelicae Pubescentis) were used; for temporal headache, *Man Jing Zi* (Fructus Viticis), *Ju Hua* (Flos Chrysanthemi), and *Long Dan* (Radix et Rhizoma Gentianae) were included; and for vertex headache, *Gao Ben* (Rhizoma et Radix Ligustici) was added. The herbs were given in decoction daily, for 8 days per course of treatment. Of 50 patients, the study reported complete recovery in 34 cases, significant improvement in 11 cases, and no benefit in 5 cases. The overall effectiveness was 90%.¹⁴

8. Insomnia: Use of modified *Xue Fu Zhu Yu Tang* was associated with 93.5% effectiveness in treating 31 patients with stubborn insomnia. The base formula contained *Xue Fu Zhu Yu Tang*, with addition of *Shou Wu Teng* (Caulis Polygoni Multiflori) and *Hu Po* (Succinum), and elimination of *Chai Hu* (Radix Bupleuri) and *Chuan Xiong* (Rhizoma Chuanxiong). Modifications were made based on the condition of the patients. *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) were added for qi deficiency; *Shu Di Huang* (Radix Rehmanniae Praeparata) and *E Jiao* (Colla Corii Asini) were added for blood deficiency; *Gou Qi Zi* (Fructus Lycii) and *Shan Zhu Yu* (Fructus Corni) were added for yin deficiency; and *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae) were added to clear hot phlegm.¹⁵

9. Phlebitis: Administration of modified *Xue Fu Zhu Yu Tang* has been shown to effectively treat phlebitis. In addition to the base formula, *Mu Dan Pi* (Cortex Moutan) was added for redness and swelling associated with heat in the *xue* (blood) level; *San Qi* (Radix et Rhizoma Notoginseng) was added for blood vessel pain with swelling and inflammation; and *Huang Qi* (Radix Astragali) was added for a fine, weak pulse. Each course of treatment was 7 days. Of 38 patients, the study reported significant benefit in 8 cases, moderate improvement in 29 cases, and no effect in 1 case.¹⁶ Another study reported marked effects using herbs orally and topically to treat phlebitis. The herbal formula for oral ingestion contained *Xue Fu Zhu Yu Tang* plus *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Di Long* (Pheretima), and was given daily for 15 days per course of treatment. Herbs also were applied topically to the affected area twice daily

to relieve pain. Of 12 patients, the study reported complete recovery in 9 cases, improvement in 2 cases, and no effect in 1 case. The overall effectiveness was 92%.¹⁷

10. Mammary gland hyperplasia: According to one study, 104 patients with mammary gland hyperplasia were treated with complete recovery in 68 cases and moderate improvement in 27 cases (91.4% effectiveness). The herbal treatment contained *Xue Fu Zhu Yu Tang* as the base formula, with the addition of *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae), and removal of *Di Huang* (Radix Rehmanniae) and *Jie Geng* (Radix Platycodonis). Other herbs were added if deemed necessary.¹⁸

11. Pelvic inflammatory disease: One study reported 92% effectiveness using modified *Xue Fu Zhu Yu Tang* to treat 60 patients with chronic pelvic inflammatory disease. Modifications included the addition of *Xiao Hui Xiang* (Fructus Foeniculi) and *Pao Jiang* (Rhizoma Zingiberis Praeparatum) for cold sensations in the lower abdomen; *Pu Gong Ying* (Herba Taraxaci) and *Zi Hua Di Ding* (Herba Violae) for toxic heat; and *Yi Yi Ren* (Semen Coicis) for dampness. Of 60 patients, the study reported complete recovery in 24 cases, improvement in 31 cases, and no response in 5 cases.¹⁹

12. Concussion: One study reported 92.3% effectiveness for 12 patients with concussion using modified *Xue Fu Zhu Yu Tang*. The herbal treatment contained this formula plus *Shi Chang Pu* (Rhizoma Acori Tatarinowii) 10g, *Yuan Zhi* (Radix Polygalae) 15g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 25g, *Mai Dong* (Radix Ophiopogonis) 16g, and *Suan Zao Ren* (Semen Ziziphi Spinosae) 13g. The herbs were given in decoction daily.²⁰

13. Stroke: Benefit in the prevention and treatment of stroke and ischemia has been associated with many Chinese herbal formulas, including *Xue Fu Zhu Yu Tang*, *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), *Xiao Xu Ming Tang* (Minor Prolong-Life Decoction), and *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction). The mechanisms of these beneficial effects were attributed to anti-hypercholesterolemia, antioxidant activity, and free radical scavenger effects of these formulas.²¹

14. Cerebral atherosclerosis: Sixty-three patients were treated with excellent results using modified *Xue Fu Zhu Yu Tang* plus ear acupuncture. The herbal treatment contained *Dang Gui* (Radix Angelicae Sinensis) 15-20g, *Di Huang* (Radix Rehmanniae) 5g, *Tian Ma* (Rhizoma Gastrodiae) 5g, *Tao Ren* (Semen Persicae) 9g, *Zhi Qiao* (Fructus Aurantii) 9g, *Chuan Xiong* (Rhizoma Chuanxiong) 9g, *Hong Hua* (Flos Carthami) 6g, *Chai*

Xuè Fǔ Zhú Yú Tāng

(Drive Out Stasis in the Mansion of Blood Decoction)

Hu (Radix Bupleuri) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Niu Xi* (Radix Achyranthis Bidentatae) 10g, *Chi Shao* (Radix Paeoniae Rubra) 10g, and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15-30g. The duration of treatment ranged from 1-6 months. Of 63 patients, the study reported complete recovery in 42 cases, improvement in 13 cases, and no effect in 8 cases.²²

15. Hyperlipidemia: Use of *Xue Fu Zhu Yu Tang* was associated with 95% effectiveness in reducing cholesterol and triglyceride levels. Of 20 patients, the study reported significant improvement in 11 cases, moderate improvement in 8 cases, and no effect in 1 case.²³

16. Schizophrenia: According to one study of 66 schizophrenic patients with 3 months to 23 years history of illness, use of modified *Xue Fu Zhu Yu Tang* was associated with marked beneficial effects. The herbal treatment contained *Chai Hu* (Radix Bupleuri) 15g, *Hong Hua* (Flos Carthami) 10g, *Chi Shao* (Radix Paeoniae Rubra) 30g, *Chuan Xiong* (Rhizoma Chuanxiong) 15g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 30g, and *Jiang Xiang* (Lignum Dalbergiae Odoriferae) 15g. Modifications were made by adding *Xiang Fu* (Rhizoma Cyperi) to regulate qi, *Da Huang* (Radix et Rhizoma Rhei) to clear heat, *Fu Ling* (Poria) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to strengthen the Spleen, and *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) to tonify qi. The treatment protocol was to cook the herbs in water and administer the decoction in two equally-divided doses daily for 8 weeks per course of treatment. In addition to Chinese herbs, a small dose of antipsychotic medication (selection depended on the condition of the patient) was given daily.²⁴

17. Endometriosis: Use of *Xue Fu Zhu Yu Tang* was associated with 94% effectiveness in the treatment of 83 patients with endometriosis, using herbs orally and rectally. The herbal formula for oral ingestion contained *Dang Gui* (Radix Angelicae Sinensis) 9g, *Di Huang* (Radix Rehmanniae) 9g, *Hong Hua* (Flos Carthami) 9g, *Chi Shao* (Radix Paeoniae Rubra) 9g, *Niu Xi* (Radix Achyranthis Bidentatae) 9g, *Zhi Qiao* (Fructus Aurantii) 6g, *Jie Geng* (Radix Platycodonis) 6g, *Chuan Xiong* (Rhizoma Chuanxiong) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Chai Hu* (Radix Bupleuri) 3g, and *Tao Ren* (Semen Persicae) 12g. Modifications were made by adding *Xi Xin* (Radix et Rhizoma Asari) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) for blood stagnation with cold; *Chuan Lian Zi* (Fructus Toosendan), *Pu Huang* (Pollen Typhae), and *Wu Ling Zhi* (Faeces Troglodyter) for qi and blood stagnation; *Da Xue Teng* (Caulis Sargentodoxae) and *Bai Jiang Cao* (Herba cum Radice Patriniae) for blood stagnation with heat; *Huang*

Qi (Radix Astragali), *Dang Shen* (Radix Codonopsis), and *Mu Xiang* (Radix Aucklandiae) for blood stagnation with qi deficiency; *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae) for nodules and cysts; and *Yin Yang Huo* (Herba Epimedii), *Xian Mao* (Rhizoma Curculiginis) and *Tu Si Zi* (Semen Cuscutae) for infertility. The herbs were given as decoction in two equally-divided doses. Herbs also were given as rectal enema one time daily, with an herbal solution made from *San Leng* (Rhizoma Sparganii) 10g, *E Zhu* (Rhizoma Curcumae) 10g, *Da Xue Teng* (Caulis Sargentodoxae) 12g, *Zao Jiao Ci* (Spina Gleditsiae) 12g, *Feng Fang* (Nidus Vespae) 12g, *Chi Shao* (Radix Paeoniae Rubra) 12g, and *Tao Ren* (Semen Persicae) 6g. Of 83 patients, the study reported complete recovery in 41 cases, significant improvement in 27 cases, moderate improvement in 10 cases, and no improvement in 5 cases.²⁵

18. Amenorrhea: One study reported marked success using modified *Xue Fu Zhu Yu Tang* in decoction daily to treat amenorrhea following miscarriage. The herbal formula contained *Niu Xi* (Radix Achyranthis Bidentatae) 12g, *Dang Gui* (Radix Angelicae Sinensis) 12g, *Di Huang* (Radix Rehmanniae) 12g, *Tao Ren* (Semen Persicae) 9g, *Hong Hua* (Flos Carthami) 9g, *Chi Shao* (Radix Paeoniae Rubra) 9g, *Chai Hu* (Radix Bupleuri) 9g, *Zhi Shi* (Fructus Aurantii Immaturus) 9g, *Chuan Xiong* (Rhizoma Chuanxiong) 6g, *Jie Geng* (Radix Platycodonis) 6g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. Other modifications were made as needed based on the individual's condition. Of 33 patients, the study reported normal menstruation in 17 cases, significant improvement in 14 cases, and slight improvement in 2 cases. The duration of treatment ranged from 9-21 days.²⁶

San Jiao Zhu Yu Tang (Drive Out Blood Stasis in Three Jiaos Decoction) is a variation of *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction) with the addition of blood moving herbs for the middle and lower *jiaos* and one of the strongest blood moving herbs, *Shui Zhi* (Hirudo). This formula is aimed at breaking up chronic or stubborn blood stasis from past injuries or blood clots with no outlet such as that seen in endometriosis. It is an extremely strong formula designed for short term use to quickly break up severe and chronic blood stasis to bring the body back to homeostasis.

AUTHORS' COMMENTS

There are four “*zhu yu tang* (drive out stasis decoction)” formulas that are commonly used for similar conditions. All four formulas contain *Chuan Xiong* (Rhizoma Chuanxiong), *Dang Gui* (Radix Angelicae Sinensis), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami) as key ingredients to activate blood, eliminate blood stasis, and relieve pain. Their main differences are as follows:

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction) treats qi and blood stagnation in the upper *jiao* to alleviate pain in the chest and hypochondrium.
- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction) treats qi and blood stagnation in the middle *jiao* to alleviate pain below the diaphragm in areas such as the hypochondrium and the upper abdominal area.
- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction) treats qi and blood stagnation with

cold in the lower *jiao* to address irregular menstruation, menstrual pain, and numerous gynecological disorders.

- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction) treats qi and blood stagnation with obstruction of the channels and collaterals in the extremities to relieve aches and pains.

<i>Yan Hu Suo</i> (Rhizoma Corydalis)	3g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	9g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and dispels blood stagnation
2. Activates qi circulation and relieves pain

CLINICAL MANIFESTATIONS

Blood stagnation below the diaphragm: palpable mass in the abdomen due to blood stasis; formation of abdominal mass or hardness in children; and abdominal pain in a fixed area.

CLINICAL APPLICATIONS

Hematuria, pleural adhesion, acute and chronic hepatitis, liver cirrhosis, hepatic hemangioma, cholecystitis, jaundice, splenomegaly, pelvic inflammatory disease, dysmenorrhea, amenorrhea, menopause, endometriosis, prostatic hypertrophy, chronic colitis, peptic ulcer disease, and tumors of the thyroid gland, uterus, and liver.

EXPLANATION

Ge Xia Zhu Yu Tang (Drive Out Blood Stasis Below the Diaphragm Decoction) activates qi and blood circulation, removes blood stagnation, and relieves pain in the region below the diaphragm. Because blood stagnation below the diaphragm is the underlying cause of the illness, the patient may experience severe pain and swelling.

Additionally, blood stagnation often presents as a mass or hardness in the abdominal region. Clinically, the patient may show symptoms such as fixed abdominal pain and a palpable mass in the abdomen.

Tao Ren (Semen Persicae) and *Hong Hua* (Flos Carthami) break up blood stagnation and activate blood circulation. These two herbs have synergistic effects and are often used together. *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) nourish the blood and activate blood circulation. The pairing of these herbs points to the fact that blood-tonifying herbs are commonly combined with blood-activating herbs to prevent tonification from turning into stagnation. *Mu Dan Pi* (Cortex Moutan) and *Chi Shao* (Radix Paeoniae Rubra) clear heat, cool the blood, and dispel blood stagnation. Because blood stagnation and qi stagnation often occur simultaneously, *Zhi Qiao* (Fructus Aurantii), *Wu Yao* (Radix Linderae), and *Xiang Fu* (Rhizoma Cyperi) are employed to activate and regulate qi circulation. *Zhi Qiao* (Fructus Aurantii) breaks down stagnation, *Wu Yao* (Radix Linderae) stimulates peristalsis of the intestines, and *Xiang Fu* (Rhizoma Cyperi) relieves pain. Because patients with blood stasis often experience severe pain, *Wu Ling Zhi* (Faeces Troglodyteri) and *Yan Hu Suo* (Rhizoma Corydalis) are added to dispel blood stasis and relieve pain. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonifies qi and harmonizes the herbs in this formula.

Ge Xia Zhu Yu Tang (Drive Out Blood Stasis Below the Diaphragm Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood stagnation below the diaphragm	Abdominal pain in a fixed location, presence of a mass or hardness in the abdomen: blood stagnation in the middle <i>jiao</i> area	<ul style="list-style-type: none">• Activates blood circulation and dispels blood stagnation• Activates qi circulation and relieves pain	<ul style="list-style-type: none">• <i>Tao Ren</i> (Semen Persicae) and <i>Hong Hua</i> (Flos Carthami) break up blood stagnation and activate blood circulation.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) nourish blood and activate blood circulation.• <i>Mu Dan Pi</i> (Cortex Moutan) and <i>Chi Shao</i> (Radix Paeoniae Rubra) clear heat, cool the blood, and dispel blood stagnation.• <i>Zhi Qiao</i> (Fructus Aurantii), <i>Wu Yao</i> (Radix Linderae), and <i>Xiang Fu</i> (Rhizoma Cyperi) regulate qi circulation and relieve pain.• <i>Wu Ling Zhi</i> (Faeces Troglodyteris) and <i>Yan Hu Suo</i> (Rhizoma Corydalis) dispel blood stasis and relieve pain.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonifies qi and harmonizes all the herbs in this formula.

MODIFICATIONS

- With qi deficiency, add *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali).
- With yin-deficient heat, add *Zhi Mu* (Rhizoma Anemarrhenae), *Sha Shen* (Radix Glehniae seu Adenophorae), and *Di Huang* (Radix Rehmanniae).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei).
- With blood in the vomitus or stools, add *Bai Ji* (Rhizoma Bletillae), *Huai Hua* (Flos Sophorae), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae).
- With insomnia, add *Ci Shi* (Magnetitum).
- With allergic purpura, add large doses of *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Qin Jiao* (Radix Gentianae Macrophyllae), and *Ban Lan Gen* (Radix Isatidis).
- With menstrual pain and cramps, dysmenorrhea, and amenorrhea, combine with *Wen Jing Tang* (Warm the Channels Decoction), *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), and *Yan Hu Suo* (Rhizoma Corydalis).
- With emotional and behavioral changes during menopause, combine with *Ai Ye* (Folium Artemisiae Argyi), *Xiao Yao San* (Rambling Powder), and *Dang Gui Shao Yao San* (Tangkuei and Peony Powder).
- For chronic hepatitis and liver cirrhosis, combine with *Yin Chen Wu Ling San* (Artemisia Scoparia and Five-Ingredient Powder with Poria), *Jia Wei Xiao Yao San* (Augmented Rambling Powder), or *Xiao Chai Hu*

Tang (Minor Bupleurum Decoction). *San Qi* (Radix et Rhizoma Notoginseng), *E Zhu* (Rhizoma Curcumae), and *Bie Jia* (Carapax Trionycis) are also useful and can be added to these formulas.

- For liver cancer, add *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), *Ban Zhi Lian* (Herba Scutellariae Barbatae), and *Bai Hua She She Cao* (Herba Hedyotis).
- For tumors on the thyroid gland, combine with *San Zhong Kui Jian Tang* (Disperse the Swelling and Break the Hardness Decoction), *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), and *Xia Ku Cao* (Spica Prunellae).
- For chronic cholecystitis, combine with *Yin Chen Wu Ling San* (Artemisia Scoparia and Five-Ingredient Powder with Poria), *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), and *Jin Yin Hua* (Flos Lonicerae Japonicae).
- For uterine tumors, combine with *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), *Bie Jia* (Carapax Trionycis), *E Zhu* (Rhizoma Curcumae), and *San Leng* (Rhizoma Sparganii).
- For jaundice and acute hepatitis, combine with *Jia Wei Xiao Yao San* (Augmented Rambling Powder).

CAUTIONS / CONTRAINDICATIONS

- *Ge Xia Zhu Yu Tang* should be used with caution during menstruation.
- Use of this formula is contraindicated during pregnancy.¹

Gé Xià Zhú Yú Tāng

(Drive Out Blood Stasis Below the Diaphragm Decoction)

CLINICAL STUDIES AND RESEARCH

- Hematuria:** Use of *Ge Xia Zhu Yu Tang* was associated with complete recovery in all 8 patients with hematuria characterized by qi and blood stagnation, with symptoms such as hypochondriac or upper abdominal pain that intensifies at night, and urine with red, yellow, or coffee-ground color.²
- Pleural adhesion:** Sixty patients with pleural adhesions were treated with complete recovery in 33 cases, significant improvement in 23 cases, moderate improvement in 2 cases, and no effect in 2 cases. The herbal treatment used *Ge Xia Zhu Yu Tang* as the base formula, with the addition of *Gui Zhi* (Ramulus Cinnamomi), *Jing Jie* (Herba Schizonepetae), and *Fang Feng* (Radix Saposhnikoviae) for exterior wind-cold; *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Bo He* (Herba Menthae) for exterior wind-heat; *Huang Qin* (Radix Scutellariae), *Gua Lou* (Fructus Trichosanthis), and *Sang Bai Pi* (Cortex Mori) for Lung heat with cough; *Gan Jiang* (Rhizoma Zingiberis), *Xi Xin* (Radix et Rhizoma Asari), and *Wu Wei Zi* (Fructus Schisandrae Chinensis) for Lung cold with cough; and *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency.³
- Hepatitis:** Use of *Ge Xia Zhu Yu Tang* in 25 patients with chronic active hepatitis was associated with alleviating pain, improving appetite, resolving jaundice, and relieving ascites.⁴
- Hepatic hemangioma:** Use of *Ge Xia Zhu Yu Tang* plus *Meng Chong* (Tabanus) and *San Leng* (Rhizoma Sparganii) was associated with 86% effectiveness in treating hepatic hemangioma. Modifications to the base formula were made as follows: *Huang Qi* (Radix Astragali), *Shan Yao* (Rhizoma Dioscoreae), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for chronic hepatitis; *Bie Jia* (Carapax Trionycis) and *Mu Li* (Concha Ostreae) for liver cirrhosis; *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), and *Yu Jin* (Radix Curcumae) for chronic cholecystitis; and *Jiang Xiang* (Lignum Dalbergiae Odoriferae), *Mu Xiang* (Radix Aucklandiae), and *Shan Zha* (Fructus Crataegi) for epigastric pain. Of 32 patients, the study reported complete recovery in 12 cases, significant improvement in 5 cases, moderate improvement in 12 cases, and no benefit in 3 cases.⁵
- Pelvic inflammatory disease:** Administration of modified *Ge Xia Zhu Yu Tang* was reported in one study to have 90.6% effectiveness in treating chronic pelvic inflammatory disease. The herbal treatment was based on this formula, with the addition of *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Da Zao* (Fructus Jujubae), and the removal of *Wu Ling Zhi* (Faeces Troglodyteris), *Zhi Qiao* (Fructus Aurantii), and *Wu Yao* (Radix Linderae). Furthermore, *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) were added for qi deficiency; *Shu Di Huang* (Radix Rehmanniae Praeparata) and *He Shou Wu* (Radix Polygoni Multiflori) were added for blood deficiency; *Mai Dong* (Radix Ophiopogonis) and *Sha Shen* (Radix Glehniae seu Adenophorae) were added for yin deficiency; *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Pao Jiang* (Rhizoma Zingiberis Praeparatum) were added for yang deficiency; *Huang Qin* (Radix Scutellariae) and *Ze Xie* (Rhizoma Alismatis) were added for damp-heat; and *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae) were added for accumulation of heat and toxins. Of 64 patients, the study reported complete recovery in 21 cases, improvement in 37 cases, and no effect in 6 cases.⁶
- Ectopic pregnancy:** Use of modified *Ge Xia Zhu Yu Tang* was associated with successful termination of ectopic pregnancy in 19 of 20 patients (surgical intervention was needed in 1 case). The herbal treatment was based on this formula, with the addition of *Niu Xi* (Radix Achyranthis Bidentatae) and *Ru Xiang* (Gummi Olibanum) and removal of *Wu Ling Zhi* (Faeces Troglodyteris), *Zhi Qiao* (Fructus Aurantii), *Chuan Xiong* (Rhizoma Chuanxiong), *Xiang Fu* (Rhizoma Cyperi), and others as deemed necessary.⁷
- Prostatic hypertrophy:** One study reported 90% effectiveness using modified *Ge Xia Zhu Yu Tang* to treat 22 patients with prostatic hypertrophy. The herbal treatment was based on this formula, with the addition of *Hua Shi* (Talcum) and the removal of *Wu Ling Zhi* (Faeces Troglodyteris) and *Yan Hu Suo* (Rhizoma Corydalis). Furthermore, *Nu Zhen Zi* (Fructus Ligustri Lucidi), *Shan Zhu Yu* (Fructus Corni) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) were added for Kidney yin deficiency; *Gui Zhi* (Ramulus Cinnamomi) and *Mu Hu Die* (Semen Oxyli) were added for Kidney qi deficiency; and *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) were added for qi deficiency. Of 22 patients, the study reported recovery in 17 cases, improvement in 3 cases, and no effect in 2 cases.⁸
- Chronic colitis:** Use of modified *Ge Xia Zhu Yu Tang* in 75 patients with chronic colitis was associated with complete recovery in 63 cases, significant improvement in 9 cases, and improvement in 3 cases. The duration of treatment ranged from 3-9 days in most cases, with some cases requiring up to 40 days to resolve. The herbal formula contained *Dang Gui* (Radix Angelicae Sinensis) 9-12g, *Chi Shao* (Radix Paeoniae Rubra) 6-9g, *Xiang Fu*

Gé Xià Zhú Yū Tāng

(Drive Out Blood Stasis Below the Diaphragm Decoction)

(Rhizoma Cyperi) 6-9g, *Wu Yao* (Radix Linderae) 6-9g, *Wu Ling Zhi* (Faeces Troglodyteri) 6-9g, *Zhi Qiao* (Fructus Aurantii) 6-9g, *Hong Hua* (Flos Carthami) 6g, and *Chuan Xiong* (Rhizoma Chuanxiong) 6g. Furthermore, modifications were made by adding *Dang Shen* (Radix Codonopsis) 9-12g and *Yi Yi Ren* (Semen Coicis) 12-15g for chronic illness; *Da Huang* (Radix et Rhizoma Rhei) 6-9g and *Huo Ma Ren* (Fructus Cannabis) 9-12g for difficulties with bowel movement; *Bai Jiang Cao* (Herba cum Radice Patriniae) 9-12g for deficiency heat; *Fu Zi* (Radix Aconiti Lateralis Praeparata) 3-5g for deficiency and cold; and *Da Huang* (Radix et Rhizoma Rhei), *Bai Tou Weng* (Radix Pulsatillae) and *Ma Chi Xian* (Herba Portulacae) for chronic ulcerative colitis with rectal tenesmus and mucous and blood in the stools.⁹

9. **Peptic ulcer disease:** One study reported that modified *Ge Xia Zhu Yu Tang* was effective in treating gastric or duodenal ulcer in 30 patients (24 males and 6 females, between 20-60 years of age, with 1-18 years history of illness). The herbal treatment contained *Dang Gui* (Radix Angelicae Sinensis) 10g, *Chi Shao* (Radix Paeoniae Rubra) 5g, *Wu Ling Zhi* (Faeces Troglodyteri) 5g, *Chuan Xiong* (Rhizoma Chuanxiong) 4g, *Tao Ren* (Semen Persicae) 5g, *Mu Dan Pi* (Cortex Moutan) 5g, *Wu Yao* (Radix Linderae) 6g, *Yan Hu Suo* (Rhizoma Corydalis) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 8g, *Xiang Fu* (Rhizoma Cyperi) 10g, and *Zhi Qiao* (Fructus

Aurantii) 5g. After 3 months of herbal treatment in 30 patients, the study reported significant improvement in 18 cases, moderate improvement in 9 cases, and no effect in 3 cases.¹⁰

AUTHORS' COMMENTS

According to Dr. Chang Wei-Yen, *Ge Xia Zhu Yu Tang* can be combined with *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), *Zhe Chong Yin* (Break the Conflict Decoction), *Shui Zhi* (Hirudo), and *Yan Hu Suo* (Rhizoma Corydalis) to treat chronic blood stasis all over the body manifesting in pain and other complex, difficult-to-treat conditions.

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	3g
<i>Chi Shao</i> (Radix Paeoniae Rubra)	6g
<i>Wu Ling Zhi</i> (Faeces Troglodyti), <i>chao</i> (dry-fried)	6g
<i>Pu Huang</i> (Pollen Typhae)	9g
<i>Yan Hu Suo</i> (Rhizoma Corydalis)	3g
<i>Mo Yao</i> (Myrrha)	6g
<i>Gan Jiang</i> (Rhizoma Zingiberis), <i>chao</i> (dry-fried)	0.6g [3g]
<i>Xiao Hui Xiang</i> (Fructus Foeniculi), <i>chao</i> (dry-fried)	7 pieces [1.5g]
<i>Rou Gui</i> (Cortex Cinnamomi)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and dispels blood stagnation
2. Warms and regulates menstruation to relieve pain

CLINICAL MANIFESTATIONS

Blood stagnation in the lower abdomen: pain and fullness in the lower abdominal region; formation of mass in the lower abdomen; multiple cycles of bleeding (between 3-5 times) within one period; menstrual pain, low back pain and lower abdominal fullness during the menstruation; excess menstrual bleeding that is black and/or purplish with blood clots; and *beng lou* (flooding and spotting) with lower abdominal pain.

CLINICAL APPLICATIONS

Female infertility, male infertility, amenorrhea, dysmenorrhea, painful menstruation, irregular menstruation, uterine bleeding, ectopic pregnancy, hysteromyoma, endometriosis, oophoritic cyst, ovarian cyst, pelvic inflammatory disease, hyperplastic tuberculosis of intestine, ulcerative colitis, and urinary stones.

EXPLANATION

Shao Fu Zhu Yu Tang (Drive Out Blood Stasis in the Lower Abdomen Decoction) is designed specifically for blood stagnation in the lower abdomen. It activates blood circulation to dispel blood stagnation, activates qi circulation to relieve pain, and warms the lower *jiao* to restore normal menstruation. Clinically, the patient may show pain and fullness in the lower abdominal region, menstrual pain, excess menstrual bleeding that is black and/or purplish with blood clots, and multiple cycles of bleeding (between 3-5 times) within one period.

In this formula, *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Chi Shao* (Radix Paeoniae Rubra) nourish the blood, activate blood circulation, and eliminate blood stasis. *Wu Ling Zhi* (Faeces Troglodyti) disperses blood stasis to relieve pain. *Pu Huang* (Pollen Typhae) regulates blood circulation. *Yan Hu Suo* (Rhizoma Corydalis) and *Mo Yao* (Myrrha) activate qi and blood circulation to relieve pain. *Gan Jiang* (Rhizoma Zingiberis) warms the menses and dispels cold. *Xiao Hui Xiang* (Fructus Foeniculi) and *Rou Gui* (Cortex Cinnamomi) warm the lower *jiao* to relieve pain.

MODIFICATIONS

- For amenorrhea or dysmenorrhea with blood stagnation accompanied by constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood stagnation in the lower abdomen	<ul style="list-style-type: none"> • Pain and fullness in the lower abdominal region and formation of a mass in the lower abdomen: blood stagnation in the lower <i>jiao</i> area • Menstrual pain, multiple cycles of bleeding (between 3-5 times) within one period, excess menstrual bleeding that is black and purplish with blood clots: blood stagnation affecting menstruation 	<ul style="list-style-type: none"> • Activates blood circulation and dispels blood stagnation • Warms and regulates menstruation to relieve pain 	<ul style="list-style-type: none"> • <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), and <i>Chi Shao</i> (Radix Paeoniae Rubra) nourish the blood, activate blood circulation, and eliminate blood stasis. • <i>Wu Ling Zhi</i> (Faeces Troglodyteri) disperses blood stasis to relieve pain. • <i>Pu Huang</i> (Pollen Typhae) regulates blood circulation. • <i>Yan Hu Suo</i> (Rhizoma Corydalis) and <i>Mo Yao</i> (Myrrha) activate qi and blood circulation to relieve pain. • <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the menses and dispels cold. • <i>Xiao Hui Xiang</i> (Fructus Foeniculi) and <i>Rou Gui</i> (Cortex Cinnamomi) warm the lower <i>jiao</i> to relieve pain.

- For infertility due to the absence of ovulation, add *Shan Yao* (Rhizoma Dioscoreae) or *Zi He Che* (Placenta Hominis).
- With early menstruation, add *Huang Qin* (Radix Scutellariae).
- With continuous and incessant menstrual bleeding due to heat, add *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis).
- For cysts and fibroids in the lower abdominal area with pain and dark menstrual discharge, add *Hai Zao* (Sargassum), *Hai Dai* (Thallus Laminariae), *Kun Bu* (Thallus Eckloniae), *Xia Ku Cao* (Spica Prunellae), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Zi Cao* (Radix Arnebiae), *Mu Li* (Concha Ostreae), *E Zhu* (Rhizoma Curcumae), *San Leng* (Rhizoma Sparganii), *Bie Jia* (Carapax Trionycis), and *Sang Ji Sheng* (Herba Taxilli).
- For chronic hepatitis, liver cirrhosis, and ascites, add *Chai Hu* (Radix Bupleuri), *Ban Lan Gen* (Radix Isatidis), *Huang Jing* (Rhizoma Polygonati), *Huang Qi* (Radix Astragali), *Gou Qi Zi* (Fructus Lycii), and *Ren Shen* (Radix et Rhizoma Ginseng).

CAUTIONS / CONTRAINDICATIONS

Shao Fu Zhu Yu Tang is contraindicated during pregnancy. Although useful for *beng lou* (flooding and spotting), this formula is not recommended in cases of *beng lou* with underlying qi deficiency.¹

PHARMACOLOGICAL EFFECTS

Anti-inflammatory: According to one *in vitro* study, administration of *Shao Fu Zhu Yu Tang* at doses of 8g/kg or 16g/kg was associated with a marked anti-inflammatory effect in rats. The study noted that while *Shao Fu Zhu Yu Tang* and hydrocortisone both have marked anti-inflammatory effects, their mechanisms and side effects are quite different. The use of hydrocortisone was associated with the various side effects of the corticosteroid drugs, while *Shao Fu Zhu Yu Tang* did not have such side effects.²

CLINICAL STUDIES AND RESEARCH

1. **Female infertility:** According to one study, 45 of 46 patients successfully became pregnant after taking 3-5 packs of herbs per month starting at the beginning of the period, for 1-4 months. The causes of infertility included inflammation of the fallopian tubes, chronic pelvic inflammatory diseases, and anovulation. The standard herbal treatment was *Shao Fu Zhu Yu Tang*. Modifications included the addition of *Li Zhi He* (Semen Litchi), *Che Qian Zi* (Semen Plantaginis), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Chuan Lian Zi* (Fructus Toosendan), *Pu Gong Ying* (Herba Taraxaci), and others specifically for inflammation of the fallopian tubes.³ According to another study of 50 women with infertility (3-11 years) due to obstructed fallopian tubes, use of modified *Shao Fu Zhu Yu Tang* was associated with successful pregnancy in 51% of patients.⁴

Shào Fù Zhú Yú Tāng

(Drive Out Blood Stasis in the Lower Abdomen Decoction)

2. **Male infertility:** One study reported successful treatment of male infertility in 17 of 20 patients using modified *Shao Fu Zhu Yu Tang*. The duration of treatment ranged from 20-40 days. In addition to the base formula, *Huang Jing* (Rhizoma Polygonati) was added for yang deficiency; *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Shi Wei* (Folium Pyrrosiae), and *Che Qian Zi* (Semen Plantaginis) were added for presence of pus in the sperm; *Huang Qi* (Radix Astragali) and *Yin Yang Huo* (Herba Epimedii) were added for poor sperm motility; and Kidney tonics for low sperm count.⁵
3. **Male infertility from sperm disorders:** Use of *Shao Fu Zhu Yu Tang* was associated with improvement in sperm mobility, quantity, and quality in 36 patients with chronic prostatitis after treatment for 60 days. The increase in sperm mobility was evaluated by computer-assisted semen analysis, and sperm quantity and quality with a high-powered intravital microscope. The mechanisms of this effect were attributed to increased sperm acrosin activity levels.⁶
4. **Ectopic pregnancy:** Use of modified *Shao Fu Zhu Yu Tang* successfully terminated pregnancy in all of 12 women with ectopic pregnancy. The herbal formula contained *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, dry-fried *Lai Fu Zi* (Semen Raphani) 15g, *Yi Mu Cao* (Herba Leonuri) 15g, *Chi Shao* (Radix Paeoniae Rubra) 10g, *Chuan Niu Xi* (Radix Cyathulae) 10g, *Hong Hua* (Flos Carthami) 6g, *Xiao Hui Xiang* (Fructus Foeniculi) 6g, *Tian Hua Fen* (Radix Trichosanthis) 15-30g, *Yi Yi Ren* (Semen Coicis) 20g, *Pu Huang* (Pollen Typhae) 17g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g. The treatment protocol was to cook the herbs in water, and administer the decoction in two to three equally-divided doses 1 hour before meals. In addition, anti-inflammatory drugs were given as adjunct therapy as needed. The duration of treatment ranged from 3 to 21 days.⁷
5. **Hysteromyoma:** Use of modified *Shao Fu Zhu Yu Tang* in 14 patients with hysteromyoma was associated with complete recovery in 8 cases, significant improvement in 4 cases, slight improvement in 1 case, and no effect in 1 case. The base formula was *Shao Fu Zhu Yu Tang* with the removal of *Gan Jiang* (Rhizoma Zingiberis) and *Chi Shao* (Radix Paeoniae Rubra), and addition of *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Juan Bai* (Herba Selaginellae), and *Yi Mu Cao* (Herba Leonuri). *Xiang Fu* (Rhizoma Cyperi), *Chuan Lian Zi* (Fructus Toosendan), and *Li Zhi He* (Semen Litchi) were added for severe qi stagnation; *Shui Zhi* (Hirudo), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Yi Mu Cao* (Herba Leonuri) were added for severe blood stagnation; and *Ba Zhen Tang* (Eight-Treasure Decoction) was given during the recovery period.⁸
6. **Endometriosis:** One study reported 97.5% effectiveness using modified *Shao Fu Zhu Yu Tang* to treat 40 women with endometriosis. For those with endometriosis characterized by cold obstruction and blood stagnation, unmodified *Shao Fu Zhu Yu Tang* was used for treatment. For those with endometriosis characterized by qi deficiency and blood stagnation, *Shao Fu Zhu Yu Tang* was modified by eliminating *Wu Ling Zhi* (Faeces Troglodyteri) and adding *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), *Sheng Ma* (Rhizoma Cimicifugae), and *Mu Xiang* (Radix Aucklandiae).⁹
7. **Oophoritic cyst:** Use of modified *Shao Fu Zhu Yu Tang* was associated with complete recovery in 46 of 50 patients. In addition to *Shao Fu Zhu Yu Tang*, modifications included the addition of *Nu Zhen Zi* (Fructus Ligustri Lucidi) and *Mo Han Lian* (Herba Ecliptae) for prolonged bleeding and increased menstrual discharge; *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) for yin deficiency; *San Qi* (Radix et Rhizoma Notoginseng) and *Yi Mu Cao* (Herba Leonuri) for severe abdominal pain caused by blood stagnation; and general tonic herbs when swelling and inflammation subsided. The duration of treatment ranged from 30-60 packs of herbs.¹⁰
8. **Dysmenorrhea:** Numerous studies have shown that *Shao Fu Zhu Yu Tang* treats dysmenorrhea. According to one study of 100 patients with dysmenorrhea characterized by cold and blood stagnation, administration of *Shao Fu Zhu Yu Tang* (starting 1 week before the period for 7-10 days) followed by *Wen Jing Tang* (Warm the Channels Decoction) (starting after the period for 2-3 months total) was associated with 100% effectiveness.¹¹ According to another study, use of modified *Shao Fu Zhu Yu Tang* for 1-8 packs was associated with marked success in 54 patients with dysmenorrhea. Of 46 patients who had complete recovery, no recurrences were reported within one year. Of 4 patients who had moderate improvement, no recurrences were reported within 3 months. Three had only symptomatic relief and 1 had no effect.¹²
9. **Uterine bleeding:** *Shao Fu Zhu Yu Tang* was shown to be effective in treating 32 women with uterine bleeding associated with functional disorder. In addition to this formula, modifications were made by adding *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Shen* (Radix Codonopsis), and *Huang Qi* (Radix Astragali)

Shào Fù Zhú Yū Tāng

(Drive Out Blood Stasis in the Lower Abdomen Decoction)

for qi deficiency; *Mu Dan Pi* (Cortex Moutan), *Ce Bai Ye* (Cacumen Platycladi), and *Di Huang* (Radix Rehmanniae) for heat in the blood; *Shu Di Huang* (Radix Rehmanniae Praeparata), *Xu Duan* (Radix Dipsaci), and *Tu Si Zi* (Semen Cuscutae) for Kidney deficiency. The treatment protocol was to administer the herbs in decoction starting on the first day of the period, for a total of 4 packs of herbs.¹³

10. Pelvic inflammatory disease: Forty-two women with pelvic inflammatory disease due to various causes (ligation, abortion, miscarriage, etc.) were treated with complete recovery in 26 cases, marked improvement in 9 cases, slight improvement in 4 cases, and no effect in 3 cases. The overall effectiveness was 92%. The herbal treatment contained *Shao Fu Zhu Yu Tang*, minus *Gan Jiang* (Rhizoma Zingiberis), plus *Bai Jiang Cao* (Herba cum Radice Patriniae) and *Huang Qi* (Radix Astragali). *Pu Gong Ying* (Herba Taraxaci), *Huang Bo* (Cortex Phellodendri Chinensis) and liquor-processed *Da Huang* (Radix et Rhizoma Rhei) were added for damp-heat; *Wu Zhu Yu* (Fructus Evodiae), *Wu Yao* (Radix Linderae), *Gan Jiang* (Rhizoma Zingiberis), and larger doses of *Xiao Hui Xiang* (Fructus Foeniculi) and *Rou Gui* (Cortex Cinnamomi) for qi stagnation with cold; and *San Leng* (Rhizoma Sparganii), and *E Zhu* (Rhizoma Curcumae) for qi and blood stagnation.¹⁴

11. Hyperplastic tuberculosis of the intestine: One study reported complete recovery in 70 of 76 patients with hyperplastic tuberculosis of the intestine using modified *Shao Fu Zhu Yu Tang*. The base formula contained *Shao Fu Zhu Yu Tang* plus *Bie Jia* (Carapax Trionycis) and *Gui Ban* (Plastrum Testudinis). Additional modifications were made as follows: *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; *Huo Ma Ren* (Fructus Cannabis) and *Rou Cong Rong* (Herba Cistanches) for yin deficiency and constipation; *Yin Chai Hu* (Radix Stellariae), *Zhi Mu* (Rhizoma Anemarrhenae), and *Mu Li* (Concha Ostreae) for tidal fever and night perspiration; *Bu Gu Zhi* (Fructus Psoraleae), *Rou Dou Kou* (Semen Myristicae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Wu Zhu Yu* (Fructus Evodiae) for “5 a.m. diarrhea;” *Lai Fu Zi* (Semen Raphani), *Hou Po* (Cortex Magnoliae Officinalis), and *Bing Lang* (Semen Arecae) for abdominal distention; *Ban Xia* (Rhizoma Pinelliae) and *Zhe Shi* (Haematitum) for severe nausea and vomiting; and *Cang Zhu* (Rhizoma Atractylodis) for dampness.¹⁵

12. Ulcerative colitis: One study reported 88.7% effectiveness using modified *Shao Fu Zhu Yu Tang* to treat 44 patients with ulcerative colitis.¹⁶

13. Urinary stones: One-hundred patients with urinary stones (16 in the kidneys, 81 in the ureters, and 3 in the bladder) treated with modified *Shao Fu Zhu Yu Tang* showed complete recovery in 65 cases, marked improvement in 22 cases, and no benefit in 13 cases. The overall effectiveness was 87%. In addition to the base formula, the herbal treatment was modified as follows: *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) for soreness and pain of the lower back; *Bai Mao Gen* (Rhizoma Imperatae) and *Hu Po* (Succinum) for hematuria; *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; *Di Huang* (Radix Rehmanniae) and *Mo Han Lian* (Herba Ecliptae) for yin deficiency; *Jin Qian Cao* (Herba Lysimachiae) and *Shi Wei* (Folium Pyrrosiae) for painful urination; and removal of *Gan Jiang* (Rhizoma Zingiberis) and *Gui Zhi* (Ramulus Cinnamomi) for damp-heat.¹⁷

DOSAGE / PREPARATION / ADMINISTRATION

Prepare as a decoction.

located in the shoulder, elbow, waist, leg, or throughout the whole body.

CHINESE THERAPEUTIC ACTIONS

1. Activates qi and blood circulation
2. Disperses blood stagnation and opens the channels and collaterals
3. Unblocks *bi zheng* (painful obstruction syndrome) and relieves pain

CLINICAL MANIFESTATIONS

Pain due to qi and blood stagnation blocking the channels and collaterals: pain in the shoulder, elbow, waist and/or leg; and persistent, generalized pain throughout the whole body that does not respond to treatment.

CLINICAL APPLICATIONS

Arthritis, rheumatoid arthritis, sciatica, pain in the lower back and legs, lumbago, neuralgia, hyperosteogeny, and allergic purpura.

EXPLANATION

Shen Tong Zhu Yu Tang (Drive Out Blood Stasis from a Painful Body Decoction) activates qi and blood circulation, dispels blood stagnation, opens the channels and collaterals, and relieves pain. Clinically, it is often used for pain due to stagnation of qi and blood. Pain may be

In this formula, *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) activate blood circulation and eliminate blood stasis. *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) nourish the blood and promote blood circulation. *Mo Yao* (Myrrha) relieves pain by invigorating blood circulation. *Wu Ling Zhi* (Faeces Troglodyteris) and *Di Long* (Pheretima) dispel blood stasis and open the channels and collaterals. *Qin Jiao* (Radix Gentianae Macrophyllae) and *Qiang Huo* (Rhizoma et Radix Notopterygii) dispel wind-dampness to relieve pain. *Xiang Fu* (Rhizoma Cyperi) activates qi to relieve pain. *Niu Xi* (Radix Achyranthis Bidentatae) strengthens bones, tendons, and soft tissues. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs in the formula.

MODIFICATIONS

- With pain in the upper body, add *Ge Gen* (Radix Puerariae Lobatae).
- With pain the lower body, add *Du Huo* (Radix Angelicae Pubescentis).
- With pain in the extremities, add *Sang Zhi* (Ramulus Mori) and *Gui Zhi* (Ramulus Cinnamomi).

CAUTIONS / CONTRAINDICATIONS
Use of *Shen Tong Zhu Yu Tang* is contraindicated during pregnancy.¹

PHARMACOLOGICAL EFFECTS
Analgesic and anti-inflammatory: According to *in vitro* studies, administration of *Shen Tong Zhu Yu Tang* in tincture form was effective in relieving pain and reducing inflammation.²

CLINICAL STUDIES AND RESEARCH
1. Bizheng (painful obstruction syndrome): Administration of *Shen Tong Zhu Yu Tang* in 32 patients with *bi zheng* (painful obstruction syndrome) was associated with complete recovery in 12 cases, significant improvement in 10 cases, moderate improvement in 7 cases, and no improvement in 3 cases. The overall effectiveness was 90.6%. The herbal formula used *Shen Tong Zhu Yu Tang* as the base, with the addition of *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; *Fang Feng* (Radix Saposhnikovia) and *Wei Ling Xian* (Radix et Rhizoma Clematidis) for wind; *Zhi Chuan Wu* (Radix Aconiti Praeparata) and *Xi Xin* (Radix et Rhizoma Asari) for cold; *Fu Ling* (Poria) and *Yi Yi Ren* (Semen Coicis) for damp; *Gui Zhi* (Ramulus Cinnamomi) and *Sang Zhi*

(Ramulus Mori) for pain in the upper limbs; *Sang Ji Sheng* (Herba Taxilli), *Xu Duan* (Radix Dipsaci), and *Gou Ji* (Rhizoma Cibotii) for pain in the lower limbs; *Ge Gen* (Radix Puerariae Lobatae) for pain in the neck; and *Feng Fang* (Nidus Vespae), *Wu Shao She* (Zaocys), *Quan Xie* (Scorpio), and dry-fried *Chuan Shan Jia* (Squama Manis) for stiff joints with deformation. For *re bi* (heat painful obstruction), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Cang Zhu* (Rhizoma Atractylodis), and *Huang Bo* (Cortex Phellodendri Chinensis) were added, and *Qin Jiao* (Radix Gentianae Macrophyllae), *Qiang Huo* (Rhizoma et Radix Notopterygii), and *Chuan Xiong* (Rhizoma Chuanxiong) were removed. For *shi-re bi* (damp-heat painful obstruction), *Huang Lian* (Rhizoma Coptidis), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Yu Jin* (Radix Curcumae) were added, and *Niu Xi* (Radix Achyranthis Bidentatae), *Qin Jiao* (Radix Gentianae Macrophyllae), *Qiang Huo* (Rhizoma et Radix Notopterygii), and *Chuan Xiong* (Rhizoma Chuanxiong) were removed.³

2. Arthritis: Use of modified *Shen Tong Zhu Yu Tang* in 67 patients with arthritis was associated with complete recovery in 50 patients, significant improvement in 14 cases, and no effect in 3 cases. Modifications included the addition of *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Xi Xin* (Radix et Rhizoma Asari), and *Wei Ling Xian*

Shēn Tòng Zhú Yū Tāng

(Drive Out Blood Stasis from a Painful Body Decoction)

(Radix et Rhizoma Clematidis) for arthritis due to cold; *Ren Dong Teng* (Caulis Loniceræ Japonicæ), *Shi Gao* (Gypsum Fibrosum), *Huang Bo* (Cortex Phellodendri Chinensis), and *Yi Yi Ren* (Semen Coicis), and removal of *Qiang Huo* (Rhizoma et Radix Notopterygii), for arthritis due to heat; *Bai Shao* (Radix Paeoniae Alba) for stiffness of the tendons and ligaments; and *Jin Qian Bai Hua She* (Bungarus Parvus) and *Wu Shao She* (Zaocys) for “mobile” arthritis that affects multiple joints.⁴

3. **Rheumatoid arthritis:** One study of 46 patients with rheumatoid arthritis reported marked success using modified *Shen Tong Zhu Yu Tang*. Of 46 patients, the study reported recovery in 12 cases, improvement in 25 cases, slight improvement in 7 cases, and no effect in 2 cases. The duration of treatment was 2 months per course of treatment, for 3 courses total. The study also noted that the effect of the herbs was comparable to or better than that in the control group that received aspirin. The herbal formula contained *Shen Tong Zhu Yu Tang* as the base formula, and added *Gui Zhi* (Ramulus Cinnamomi), *Fang Feng* (Radix Saposhnikoviae), and *Wei Ling Xian* (Radix et Rhizoma Clematidis) for wind-dampness; *Gui Zhi* (Ramulus Cinnamomi), *Gan Jiang* (Rhizoma Zingiberis), and *Fu Ling* (Poria) for damp-cold; addition of *Cang Zhu* (Rhizoma Atractylodis), *Huang Bo* (Cortex Phellodendri Chinensis), and *Fang Feng* (Radix Saposhnikoviae), and removal of *Qiang Huo* (Rhizoma et Radix Notopterygii), for damp-heat; the addition of *Di Huang* (Radix Rehmanniae), *Gou Qi Zi* (Fructus Lycii), and *Nu Zhen Zi* (Fructus Ligustri Lucidi), and removal of *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Qin Jiao* (Radix Gentianae Macrophyllae), for Kidney yin deficiency; and the addition of *Rou Gui* (Cortex Cinnamomi) and *Shan Zhu Yu* (Fructus Corni), and removal of *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Qin Jiao* (Radix Gentianae Macrophyllae), for Kidney yang deficiency.⁵
4. **Sciatica:** Administration of *Shen Tong Zhu Yu Tang* for 7-45 days (average of 17.4 days) in 36 patients with sciatica was associated with complete recovery in 29 cases, significant improvement in 6 cases, and no effect in 1 case. The overall effectiveness was 97.2%. Furthermore, of 24 patients who returned for follow-up one year later, only 1 had recurrence.⁶
5. **Pain in the lower back and legs:** Administration of *Shen Tong Zhu Yu Tang* has been shown in 2 studies to effectively treat pain in the lower back and legs. Of 67 patients, the first study reported complete recovery in 53 cases, improvement in 9 cases, and no effect in 5 cases.⁷ Of 52 patients in the second study, 12 had complete

recovery, 26 had significant improvement, 9 had moderate improvement, and 5 had no effect.⁸

6. **Lumbago:** One study reported good results using modified *Shen Tong Zhu Yu Tang* to treat acute low back pain. Modifications included the addition of *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) for qi deficiency; and *Yan Hu Suo* (Rhizoma Corydalis) and *Qi Ye Lian* (Radix Schefflerae) for severe pain. The herbal treatment also was applied topically to the affected area. Of 15 patients, the study reported complete recovery in 8 cases, significant improvement in 3 cases, moderate improvement in 3 cases, and no benefit in 1 case.⁹
7. **Hyperosteo-geny:** Hyperosteo-geny of the lumbar spine was treated with modified *Shen Tong Zhu Yu Tang* with good results. Of 25 patients, the study reported complete relief in 18 cases, significant relief in 4 cases, and no effect in 3 cases.¹⁰
8. **Allergic purpura:** Use of modified *Shen Tong Zhu Yu Tang* for treatment of allergic purpura was associated with marked success in 30 patients (between 11-59 years of age with 2 days to 3 years history of illness). The herbal treatment contained *Dang Gui* (Radix Angelicae Sinensis) 15g, *Hong Hua* (Flos Carthami) 12g, *Mo Yao* (Myrrha) 12g, *Wu Ling Zhi* (Faeces Troglodyteris) 12g, *Xiang Fu* (Rhizoma Cyperi) 12g, *Chuan Xiong* (Rhizoma Chuanxiong) 10g, *Tao Ren* (Semen Persicae) 10g, *Niu Xi* (Radix Achyranthis Bidentatae) 9g, *Qin Jiao* (Radix Gentianae Macrophyllae) 9g, *Di Long* (Pheretima) 9g, *Qiang Huo* (Rhizoma et Radix Notopterygii) 9g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g. Other modifications were made as needed based on the condition of the individual patients. The herbs were given in decoction daily for 5-32 days duration. Of 30 patients, the study reported complete recovery in 26 cases, significant improvement in 3 cases, and no benefit in one case.¹¹

Zhu Yu Tang (Drive Out Blood Stasis Decoction) is designed to treat pain in the extremities due to blood

stagnation. It is formulated based on the principles and ingredients of three classic formulas: *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction) to eliminate blood stasis from the extremities; *Dang Gui Si Ni Tang* (Tangkuei Decoction for Frigid Extremities) to warm the channels and disperse cold; and *Zheng Gu Zi Jin Dan* (Purple and Gold Pill for Righteous Bones) to activate blood circulation and dispel blood stasis. Clinical applications include peripheral neuropathy, polyneuropathy, diabetic neuropathy, distal polyneuropathy, and neuralgia.

Original Source: *Yi Xue Fa Ming* (Medical Innovations) by Li Gao during the Jin Dynasty

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei), <i>jin</i> (soaked) in liquor	30g
<i>Chai Hu</i> (Radix Bupleuri)	15g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g
<i>Tao Ren</i> (Semen Persicae), <i>jin</i> (soaked) in liquor and <i>yan</i> (ground) till muddy	50 pieces [9g]
<i>Hong Hua</i> (Flos Carthami)	6g
<i>Tian Hua Fen</i> (Radix Trichosanthis)	9g
<i>Chuan Shan Jia</i> (Squama Manis), <i>pao</i> (blast-fried)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g

DOSAGE / PREPARATION / ADMINISTRATION

Grind all of the ingredients into a coarse powder except for *Tao Ren* (Semen Persicae), which should be ground until muddy. Cook 30g of the herbs in 1.5 bowls of water and 0.5 bowl of grain-based liquor until the liquid is reduced to 70%. Take the warm, strained decoction before meals. Discontinue the formula once the pain is relieved.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and dispels blood stasis
2. Soothes the Liver and opens the channels and collaterals

CLINICAL MANIFESTATIONS

Traumatic injuries with stagnation of qi and blood: traumatic or sports injuries, pain and swelling in the chest and hypochondriac region, musculoskeletal or soft tissue injuries, and severe, excruciating pain.

CLINICAL APPLICATIONS

Traumatic injuries, musculoskeletal or soft tissue injuries, concussion, scapulocostal syndrome, bone fractures, hepatic abscess, hypochondriac pain, costal chondritis, intercostal neuralgia, hyperplasia of mammary glands, ocular hemorrhage, asthma, and intestinal adhesion.

EXPLANATION

Fu Yuan Huo Xue Tang (Revive Health by Invigorating the Blood Decoction) was originally designed to treat traumatic and external injuries with blood stasis under the

hypochondrium. All traumatic and external injuries are characterized in part by qi and blood stagnation, regardless of the severity or area of injury. When there is an injury, the blood leaves the vessels and forms obstruction along the channels and collaterals. These obstructions block the smooth flow of qi, induce pain and numbness, and cause local swelling and inflammation. Moreover, since the Liver is the organ that stores blood, stagnation of blood in the peripheral parts of the body affects the normal functions of the Liver. If Liver qi becomes stagnant, the patient may experience hypochondriac pain and fullness. Although this formula is designed to treat injuries to the chest and hypochondriac regions, it is also effective for various other types of injuries.

In this formula, *Da Huang* (Radix et Rhizoma Rhei) drains heat and blood stasis to reduce pain and swelling. *Chai Hu* (Radix Bupleuri) smooths Liver qi stagnation and relieves hypochondriac fullness and pain. It also guides *Da Huang* (Radix et Rhizoma Rhei) to the hypochondriac region to enhance its effect. *Dang Gui* (Radix Angelicae Sinensis), *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) activate blood circulation, remove blood stasis, reduce swelling and relieve pain. These herbs have a synergistic effect and are frequently used together. *Tian Hua Fen* (Radix Trichosanthis) clears heat and reduces swelling. It also promotes the generation of muscle tissues. *Chuan Shan Jia* (Squama Manis) is one of the most effective herbs for breaking up blood stasis and opening

the channels and collaterals. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) not only relieves muscle spasms and cramps, but also harmonizes all of the herbs.

MODIFICATIONS

- With more qi stagnation, add *Mu Xiang* (Radix Aucklandiae), *Xiang Fu* (Rhizoma Cyperi), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Zhi Qiao* (Fructus Aurantii).
- With more severe blood stasis, add *San Qi* (Radix et Rhizoma Notoginseng), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha).
- With severe pain, add *Yan Hu Suo* (Rhizoma Corydalis).
- With insomnia, add *Yuan Zhi* (Radix Polygalae) and *Suan Zao Ren* (Semen Ziziphi Spinosa).
- With distention and pain in the chest and hypochondriac region, add *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Chuan Lian Zi* (Fructus Toosendan).
- With abdominal distention, add *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Qiao* (Fructus Aurantii).
- With upper back pain, add *Gui Zhi* (Ramulus Cinnamomi) and *Jiang Huang* (Rhizoma Curcumae Longae).
- With pain in the lower extremities, add *Chuan Niu Xi* (Radix Cyathulae) and *Mu Gua* (Fructus Chaenomelis).

CAUTIONS / CONTRAINDICATIONS

- *Fu Yuan Huo Xue Tang* is contraindicated during pregnancy, and in weak and deficient patients.
- This formula should be used with caution in patients with Spleen qi deficiency, as this formula may cause loose stools or diarrhea.

CLINICAL STUDIES AND RESEARCH

1. Hepatic abscess: Thirty-eight patients with hepatic abscess were divided into 5 diagnostic groups and treated accordingly with modified *Fu Yuan Huo Xue Tang*. Those diagnosed with liver abscess with qi and blood stagnation were treated with this formula without modification. Those with damp-heat in the Liver and Gallbladder accompanied by blood stagnation received this formula plus 10g each of *Long Dan* (Radix et Rhizoma Gentianae), *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), *Che Qian Zi* (Semen Plantaginis), *Mu Tong* (Caulis Akebiae), *Lian Qiao* (Fructus Forsythiae), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Bai Bian Dou* (Semen Lablab Album), and *Huo Xiang* (Herba Agastaches). Those diagnosed with heat and toxins accompanied by qi and blood stagnation received this formula plus 15g each of *Ye Ju Hua* (Flos Chrysanthemi Indici), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Zi Hua Di Ding* (Herba Violae), *Tu Fu Ling* (Rhizoma Smilacis Glabrae), *Pu Gong Ying* (Herba Taraxaci), and 10g of *Huang Qin* (Radix Scutellariae). Those diagnosed with cold accompanied by obstruction of the channels and collaterals received this formula plus 10g each of *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Chuan Xiong* (Rhizoma Chuanxiong), and *Xiang Fu* (Rhizoma Cyperi), and 12g each of *Yi Yi Ren* (Semen Coicis), *Bai Jiang Cao* (Herba cum Radice Patriniae), and *Zao Jiao* (Fructus Gleditsiae). Lastly, those diagnosed with *zheng* (upright) qi deficiency with stagnation and toxins received this formula plus *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Chuan Xiong* (Rhizoma

Fù Yuán Huó Xuè Tāng

(Revive Health by Invigorating the Blood Decoction)

- Chuanxiong) 10g, *Shu Di Huang* (Radix Rehmanniae Praeparata) 12g, *Bai Shao* (Radix Paeoniae Alba) 12g, *Dang Shen* (Radix Codonopsis) 15g, and *Fu Ling* (Poria) 15g. The treatment protocol was to administer the herbs in decoction daily, with the duration of treatment ranging from 13-145 days (average of 34.7 days). Of 38 patients, the study reported complete recovery in 14 cases, near-complete recovery in 17 cases, and moderate improvement in 7 cases.¹
2. **Hypochondriac pain:** Use of modified *Fu Yuan Huo Xue Tang* in 82 patients with hypochondriac pain characterized by Liver and blood stagnation was associated with remission in 25 cases, near-remission in 40 cases, improvement in 8 cases, and no effect in 9 cases.²
 3. **Costal chondritis:** One study reported marked effectiveness using modified *Fu Yuan Huo Xue Tang* in treating 100 patients with costal chondritis with a history of illness between 15 days to 3.5 years. The herbs were given in decoction daily, for an average duration of 65 days of treatment.³
 4. **Ocular hemorrhage:** One study reported 95.2% effectiveness using modified *Fu Yuan Huo Xue Tang* to treat 21 cases of internal eye bleeding associated with external trauma. The average duration of treatment was 6 days.⁴
 5. **Xiong bi (painful obstruction of the chest):** One study reported 82% effectiveness using *Fu Yuan Huo Xue Tang* to treat *xiong bi* (painful obstruction of the chest) in 48 patients. In addition to the original formula, the treatment was modified by adding *Yu Jin* (Radix Curcumae) and *Ge Gen* (Radix Puerariae Lobatae) for feeling of chest oppression and shortness of breath; *Gua Lou* (Fructus Trichosanthis) and *Zhi Zi* (Fructus Gardeniae) for irritability and dry mouth; *Yan Hu Suo* (Rhizoma Corydalis), *Xiang Fu* (Rhizoma Cyperi), and *Jiang Xiang* (Lignum Dalbergiae Odoriferae) for severe chest pain; *Dou Kou* (Fructus Amomi Rotundus) and *Shan Zha* (Fructus Crataegi) for food stagnation and poor appetite; *Fu Ling* (Poria), *Di Long* (Pheretima), and *Sheng Jiang* (Rhizoma Zingiberis Recens) for palpitations accompanied by edema in the lower legs; and *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gui Zhi* (Ramulus Cinnamomi), and *Ren Shen* (Radix et Rhizoma Ginseng) for perspiration accompanied by cold extremities.⁵
 6. **Scapulocostal syndrome:** Use of *Fu Yuan Huo Xue Tang* was effective in treating 280 patients with stiffness and pain in the shoulder and scapula regions.⁶
 7. **Bone fractures:** Concurrent use of *Fu Yuan Huo Xue Tang* plus *Qi Li San* (Seven-Thousandths of a Tael Powder) within the first 2 weeks of injury was shown to have a marked effect in reducing swelling and relieving pain in over 10,000 patients with bone fractures.⁷
 8. **Concussion:** Use of modified *Fu Yuan Huo Xue Tang* was associated with 100% effectiveness in treating 53 patients with concussion. Modifications to the original formula included the addition of *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Yuan Zhi* (Radix Polygalae) for unconsciousness; *Chuan Xiong* (Rhizoma Chuanxiong) and *Man Jing Zi* (Fructus Viticis) for headache and dizziness; *Zhe Shi* (Haematitum) and *Zhu Ru* (Caulis Bambusae in Taenia) for nausea and vomiting; *Ge Gen* (Radix Puerariae Lobatae) for neck stiffness; and *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Yuan Zhi* (Radix Polygalae) for insomnia. Of 53 patients, the study reported complete recovery in 48 cases within 3-30 days, and improvement in 5 cases.⁸
 9. **Intestinal adhesion:** Use of modified *Fu Yuan Huo Xue Tang* was associated with complete recovery in all 17 patients with intestinal adhesion, without recurrence for 6 months. The herbal treatment contained this formula with modifications such as the addition of *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Chi Shao* (Radix Paeoniae Rubra), and *Bai Shao* (Radix Paeoniae Alba) for severe abdominal pain; *Mu Xiang* (Radix Aucklandiae) and *Da Fu Pi* (Pericarpium Arecae) for severe abdominal distention; *Ban Xia* (Rhizoma Pinelliae) and *Zhe Shi* (Haematitum) for severe nausea and vomiting; *Zhi Shi* (Fructus Aurantii Immaturus) and *Xuan Ming Fen* (Natrii Sulfas Exsiccatus) for constipation accompanied by dry mouth and tongue.⁹
 10. **Hyperplasia of mammary glands:** Use of modified *Fu Yuan Huo Xue Tang* was effective in treating uni- or bilateral hyperplasia of mammary glands in 80 women (between 20-50 years of age, with 0.5-5 years history of illness). The hyperplasia was characterized by swelling or stabbing pain, various sizes, and shapes of mobile nodules (0.5-3.5 cm) with defined borders. The herbal treatment contained vinegar-processed *Chai Hu* (Radix Bupleuri), *Chuan Shan Jia* (Squama Manis), *Rou Cong Rong* (Herba Cistanches), *He Shou Wu* (Radix Polygoni Multiflori), *Si Gua Luo* (Retinervus Luffae Fructus), *Gua Lou* (Fructus Trichosanthis), *Dang Gui* (Radix Angelicae Sinensis), *Tao Ren* (Semen Persicae), *Xiang Fu* (Rhizoma Cyperi), liquor-processed *Da Huang* (Radix et Rhizoma Rhei), *Hong Hua* (Flos Carthami), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The herbs were administered in decoction daily for 20 days per course of treatment. Of 80 patients, 44 had complete recovery, 23 had significant improvement, 10 had moderate improvement, and 3 experienced no effect. The effectiveness rate was 96.25%.¹⁰
 11. **Asthma:** One study reported good results using modified *Fu Yuan Huo Xue Tang* to treat asthma. The

Fù Yuán Huó Xuè Tāng

(Revive Health by Invigorating the Blood Decoction)

herbal treatment contained this formula plus *Ma Huang* (Herba Ephedrae), *Bai Shao* (Radix Paeoniae Alba), *Zhi Qiao* (Fructus Aurantii), and *Cang Er Zi* (Fructus Xanthii). Furthermore, *Gua Lou* (Fructus Trichosanthis), *Huang Qin* (Radix Scutellariae), and *Yu Xing Cao* (Herba Houttuyniae) were added for yellow, sticky sputum with a feeling of chest oppression; *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Dang Shen* (Radix Codonopsis), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for Spleen and Kidney yang deficiencies; and *Ren Shen* (Radix et Rhizoma Ginseng) and *Ge Jie* (Gecko) for frequent asthma attacks. The study reported reduced frequency and severity of asthma attacks after 8-10 packs of herbs.¹¹

Huo Xue Shun Qi Tang (Invigorate the Blood and Smooth the Qi Decoction) is designed to treat traumatic injuries to the chest or upper back with sprain and strain, swelling, inflammation and pain. This formula contains herbs that activate qi and blood circulation, remove qi and blood stagnation, and relieve pain.

This formula can also be used to treat traumatic injuries to the extremities. For this application, *Chai Hu* (Radix Bupleuri) should be removed, and *Gui Zhi* (Ramulus Cinnamomi) and *Sang Zhi* (Ramulus Mori) should be added.

AUTHORS' COMMENTS

Fu Yuan Huo Xue Tang is one of the best formulas for treating physical injuries (trauma, sports, and external injuries) with pain, swelling, inflammation, bruising, and damage to the soft tissues. This formula originally was designed for trauma in the hypochondriac region, but is equally effective for injuries in the rest of the body.

Patients who suffer from chronic hypochondriac pain and distention, with raised rib cage when lying facing up, can benefit from the use of this formula.

This formula consists mainly of blood-activating herbs. To enhance the effect of this formula, some qi-activating herbs may be added since qi and blood stagnation often occur together.

Zhèng Gǔ Zǐ Jīn Dān (Purple and Gold Pill for Righteous Bones)

正骨紫金丹

Pinyin Name: Zheng Gu Zi Jin Dan

Literal Name: Purple and Gold Pill for Righteous Bones

Alternate Names: Cheng Ku Tzu Chin Tan, Rhubarb and Carthamus Formula

Original Source: *Yi Zong Jin Jian* (Golden Mirror of the Medical Tradition) by Wu Qian in 1742

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	60g
<i>Bai Shao</i> (Radix Paeoniae Alba)	60g
<i>Xue Jie</i> (Sanguis Draconis)	30g
<i>Hong Hua</i> (Flos Carthami)	30g
<i>Er Cha</i> (Catechu)	30g
<i>Mu Dan Pi</i> (Cortex Moutan)	15g
<i>Da Huang</i> (Radix et Rhizoma Rhei), prepared	30g
<i>Mu Xiang</i> (Radix Aucklandiae)	30g
<i>Ding Xiang</i> (Flos Caryophylli)	30g
<i>Lian Zi</i> (Semen Nelumbinis)	60g
<i>Fu Ling</i> (Poria)	60g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all the ingredients into a fine powder, then mix the powder with honey to form pills. Take 9g of the pills with a grain-based liquor or *Tong Bian* (Infantis Urina).

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and dispels blood stasis
2. Opens the channels and collaterals
3. Reduces swelling and bruising

CLINICAL MANIFESTATIONS

Traumatic injuries: various types of physical injuries with

pain, swelling, inflammation, bruising, and damage to both soft tissues and bone.

CLINICAL APPLICATIONS

Bone fractures, joint dislocation, soft tissue injuries, sports injuries, and other external or traumatic injuries.

EXPLANATION

Zheng Gu Zi Jin Dan (Purple and Gold Pill for Righteous Bones) contains herbs to relieve pain, reduce swelling and bruises, and facilitate recovery of injuries to both soft tissues and bone. *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba) activate blood

and bruising, and relieves pain. This formula contains *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha), and has a stronger pain-relieving effect for external or traumatic injuries in comparison to *Zheng Gu Zi Jin Dan* (Purple and Gold Pill for Righteous Bones).

AUTHORS' COMMENTS

It is important to note that *Zheng Gu Zi Jin Dan* specifically uses prepared *Da Huang* (Radix et Rhizoma Rhei) to clear heat and drain bruises. The use of unprepared *Da Huang* (Radix et Rhizoma Rhei) is inappropriate, as it will likely cause diarrhea due to its strong purgative and laxative effects.

Qī Lí Sǎn (Seven-Thousandths of a Tael Powder)

七厘散

Pinyin Name: *Qī Lí Sǎn*

Literal Name: Seven-Thousandths of a Tael Powder

Original Source: *Liang Fang Yi Ye* (Small Collection of Fine Formulas) by Xie Yuan-Qing in 1842

COMPOSITION

<i>Xue Jie</i> (Sanguis Draconis)	30g
<i>Hong Hua</i> (Flos Carthami)	4.5g
<i>Ru Xiang</i> (Gummi Olibanum)	4.5g
<i>Mo Yao</i> (Myrrha)	4.5g
<i>She Xiang</i> (Moschus)	0.36g
<i>Bing Pian</i> (Borneolum Syntheticum)	0.36g
<i>Er Cha</i> (Catechu)	7.2g
<i>Zhu Sha</i> (Cinnabaris)	3.6g

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and *She Xiang* (Moschus) is derived from an endangered animal. They are rarely used as medicinal substances today. The discussion here is included primarily for academic purposes, to reflect the historical use of these substances in its original formulation. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Zhu Sha* (Cinnabaris), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all the ingredients into a fine powder and store the powder in a porcelain container sealed with wax. For acute pain and/or bleeding, first take hot grain-based liquor with 0.22g of the powder for internal use. Then, make a paste for external application: mix the powdered herbs with hot grain-based liquor, and apply topically to the affected area.

Today this formula is prepared by grinding all ingredients into a fine powder and storing it in an airtight container. For internal use, take in 0.22-1.5g doses with a warm grain-based liquor or warm water. For external use, mix an adequate amount of the powder with a warm grain-based liquor and apply the herbal paste to the affected area. Note: In the title, a “li” is a unit of weight that equals 0.03124 gram. Seven “li” indicates the standard dose for this formula, which is 0.22 gram.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and disperses blood stasis
2. Relieves pain and stops bleeding

CLINICAL MANIFESTATIONS

External injuries and traumas: blood stasis with swelling and pain due to injuries to soft tissue or bone; and bleeding due to cuts, burns, and other external traumas.

CLINICAL APPLICATIONS

External and traumatic injuries, bone fractures, herpes zoster, and infantile diarrhea.

Qī Lí Sǎn (Seven-Thousandths of a Tael Powder)

EXPLANATION

Qi Li San (Seven-Thousandths of a Tael Powder) is well-known for treating various symptoms due to traumatic injuries, such as broken or fractured bones, soft tissue injuries (muscles, ligaments, and tendons), swelling, pain, bruises, bleeding, or other blood stasis problems.

The treatment plan for this condition entails activating qi and blood circulation, dispelling blood stagnation, stopping bleeding, reducing swelling, and relieving pain. *Xue Jie* (Sanguis Draconis) dispels blood stagnation, relieves pain, and stops bleeding. *Hong Hua* (Flos Carthami) helps *Xue Jie* (Sanguis Draconis) to break up blood stasis and activate the blood. *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) activate qi and blood circulation, break up blood stagnation, and relieve pain and swelling. *She Xiang* (Moschus) and *Bing Pian* (Borneolum Syntheticum) activate qi and blood circulation and open the channels and collaterals. Aromatic in nature, these two herbs dramatically enhance the overall effect to unblock the channels and collaterals and relieve pain. *Er Cha* (Catechu) clears heat. It also has an astringent effect to help *Xue Jie* (Sanguis Draconis) stop the bleeding and promote generation of new flesh. *Zhu Sha* (Cinnabaris) tranquilizes the *shen* (spirit), which is often unstable after traumatic injuries. Combined, these herbs activate circulation, remove stagnation, reduce swelling, relieve pain, stop bleeding, and promote healing.

MODIFICATIONS

With bone fractures or broken bones, add *San Qi* (Radix et Rhizoma Notoginseng), *Tu Bie Chong* (Eupolyphaga seu Steleophaga), and *Zi Ran Tong* (Pyritum).

CAUTIONS / CONTRAINDICATIONS

- *Qi Li San* is contraindicated during pregnancy because it contains many herbs that activate qi and blood circulation.
- It should not be taken for a prolonged period of time or at a high dose because the *Zhu Sha* (Cinnabaris) used in this formula is potentially toxic.
- Constipation is the most common side effect of *Qi Li San*.¹ Furthermore, allergic reactions (rash, itching, and urticaria) were reported in 2 of 200 patients who were given this formula for bone fractures.²

PHARMACOLOGICAL EFFECTS

1. **Anti-inflammatory:** *Qi Li San* has been shown to reduce inflammation and swelling in rats.³
2. **Analgesic:** According to one study, *Qi Li San* did not have a significant pain-relieving effect in mice.⁴

CLINICAL STUDIES AND RESEARCH

1. **Bone fractures:** Administration of *Qi Li San* in 26 patients with bone fractures showed promising results to speed up bone fusion.⁵
2. **Trauma:** Topical application of *Qi Li San* was effective in treating joint inflammation caused by external or traumatic injuries. The treatment protocol was to mix the powdered herbs with rubbing alcohol and apply the herbal paste to the affected area for 15-20 minutes. This treatment was performed daily or once every other day for 10-20 days per course of treatment. The duration of treatment was between 2-3 courses. Out of 7 patients, the study reported complete recovery in 3 cases, significant improvement in 2 cases, and slight improvement in 1 case.⁶

Qī Lí Sǎn (Seven-Thousandths of a Tael Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
External injuries and traumas	External trauma, such as broken or fractured bones, soft tissue injuries (muscles, ligaments and tendons), swelling, pain, bruises and bleeding; qi and blood stagnation	<ul style="list-style-type: none">• Activates blood circulation and disperses blood stasis• Relieves pain and stops bleeding	<ul style="list-style-type: none">• <i>Xue Jie</i> (Sanguis Draconis) dispels blood stagnation, relieves pain, and stops bleeding.• <i>Hong Hua</i> (Flos Carthami) breaks up blood stasis and activates the blood.• <i>Ru Xiang</i> (Gummi Olibanum) and <i>Mo Yao</i> (Myrrha) activate qi and blood circulation, break up blood stagnation, and relieve pain and swelling.• <i>She Xiang</i> (Moschus) and <i>Bing Pian</i> (Borneolum Syntheticum) activate qi and blood circulation and open the channels and collaterals.• <i>Er Cha</i> (Catechu) clears heat.• <i>Zhu Sha</i> (Cinnabaris) tranquilizes the <i>shen</i> (spirit).

Qī Lǐ Sǎn (Seven-Thousandths of a Tael Powder)

3. **Herpes zoster:** *Qi Li San* was used successfully in treating 46 patients with herpes zoster. The treatment protocol for adults was to administer 1.2g of the formula with warm water daily. Doses for children were adjusted accordingly. Out of 46 patients, the study reported complete recovery in 42 cases within 5 days, and 4 cases within 10 days.⁷
4. **Infantile diarrhea:** In one study, *Qi Li San* was used to treat 41 infants between the ages of 2-20 months who had 1-3 days of diarrhea in autumn. The treatment protocol was to administer 0.2g of the formula one time daily for mild to moderate diarrhea, and twice daily for severe diarrhea. Individuals with dehydration also received intravenous fluids. Those who responded to herbal treatment were instructed to continue taking the herbs for 2-3 days. Those who did not respond after 3 days discontinued herbal treatment, and were treated with other methods. Out of 41 cases, the study reported complete recovery in 19 cases within 48 hours, improvement in 9 cases within 72 hours, and no effect in 13 cases.⁸

TOXICOLOGY

Administration of *Qi Li San* has been associated with rare reports of rash, itching, and skin lesions.⁹ (Note: These reactions are generally attributed to *Zhu Sha* (Cinnabar), a potentially toxic substance, on the coating of the pellets.)

AUTHORS' COMMENTS

Qi Li San should **not** be prepared or taken in decoction form because many of its ingredients are aromatic and may lose their potency when cooked at a high temperature. Rather, the formula should be taken in powder or pill form with grain-based liquor and/or water. This formula, when applied topically, is also effective for relieving pain associated with herpes zoster.

Bǔ Yáng Huán Wǔ Tāng (Tonify the Yang to Restore Five Decoction)

補陽還五湯

补阳还五汤

Pinyin Name: *Bu Yang Huan Wu Tang*

Literat Name: Tonify the Yang to Restore Five Decoction

Alternate Names: *Pu Yang Huan Wu Tang*, Yang Nourishing Five Returning Decoction, Invigorating Recuperation Decoction, Astragalus and Peony Combination

Original Source: *Yi Lin Gai Cuo* (Corrections of Errors Among Physicians) by Wang Qing-Ren in 1830

COMPOSITION

<i>Huang Qi</i> (Radix Astragali)	120g
<i>Dang Gui Wei</i> (Extremities Radix Angelicae Sinensis)	6g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	3g
<i>Chi Shao</i> (Radix Paeoniae Rubra)	4.5g
<i>Hong Hua</i> (Flos Carthami)	3g
<i>Tao Ren</i> (Semen Persicae)	3g
<i>Di Long</i> (Pheretima)	3g

Bǔ Yáng Huán Wǔ Tāng (Tonify the Yang to Restore Five Decoction)

DOSAGE / PREPARATION / ADMINISTRATION
Prepare as a decoction.

- CHINESE THERAPEUTIC ACTIONS**
- 1. Tonifies qi
 - 2. Activates blood circulation
 - 3. Opens the channels and collaterals

CLINICAL MANIFESTATIONS
Post-stroke sequelae: hemiplegia, deviation of the mouth and eyes, slurred speech, involuntary salivation, atrophy of the lower limbs, frequent urination or urinary incontinence, a white tongue coating, and a moderate pulse.

CLINICAL APPLICATIONS
Cerebrovascular disease, cerebral infarction, stroke, post-stroke sequelae, ischemic cerebrovascular disorder, paralysis, facial paralysis, brain trauma, cerebral atherosclerosis, coronary heart disease, arteriosclerosis obliterans, thromboangiitis obliterans, deep vein thrombosis, varicose veins, vascular headache, Raynaud’s disease, acute myelitis, poliomyelitis, polyneuritis, chronic nephritis, chronic prostatitis, prostatic hypertrophy, sciatica, and numbness.

EXPLANATION
Bu Yang Huan Wu Tang (Tonify the Yang to Restore Five Decoction) is designed to treat various post-stroke symptoms. After a stroke, the qi may become deficient, the blood stagnant, and the channels and collaterals obstructed. As a result, the muscles and tendons become malnourished and the body cannot carry out normal physical functions, and symptoms such as hemiplegia, deviation of the mouth and eyes, slurred speech, involuntary salivation, and urinary incontinence may occur. Hemiplegia and deviation of the mouth and eyes indicate blood stagnation obstructing the channels and collaterals. Slurred speech, involuntary salivation, and urinary

incontinence indicate qi deficiency with inability to control bodily functions.

This formula uses a large dose of *Huang Qi* (Radix Astragali) to greatly tonify *zheng* (upright) and *yuan* (source) *qi*. Abundance of qi promotes blood circulation, and allows elimination of blood stasis without damaging the body. *Dang Gui Wei* (Extremities Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), *Chi Shao* (Radix Paeoniae Rubra), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami) activate the blood and eliminate blood stasis. *Di Long* (Pheretima) unblocks the channels and collaterals to restore normal physical functions. With sufficient qi, normal blood circulation, and unobstructed channels and collaterals, the body will gradually recover from all signs and symptoms of the previous injury or blockage.

- MODIFICATIONS**
- With slurred speech, add *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Yu Jin* (Radix Curcumae), and *Yuan Zhi* (Radix Polygalae).
 - With facial paralysis and deviation of the eyes and mouth, add *Bai Fu Zi* (Rhizoma Typhonii), *Jiang Can* (Bombyx Batryticatus), and *Quan Xie* (Scorpio).
 - For initial onset of hemiplegia, add *Fang Feng* (Radix Saposhnikoviae).
 - For chronic hemiplegia without improvement, add *Shui Zhi* (Hirudo) and *Meng Chong* (Tabanus).
 - With paralysis of the lower limbs, add *Du Zhong* (Cortex Eucommiae) and *Niu Xi* (Radix Achyranthis Bidentatae).
 - With impaired mental functions, add *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Yin Xing Ye* (Folium Ginkgo), and *Jiu Ceng Ta* (Herba Ocimi Basilici).
 - With epigastric distention and difficulty in breathing, add *Wu Yao* (Radix Linderae) and *Qing Pi* (Pericarpium Citri Reticulatae Viride).

Bu Yang Huan Wu Tang (Tonify the Yang to Restore Five Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Post-stroke sequelae	<ul style="list-style-type: none">• Hemiplegia and deviation of the mouth and eyes: blood stagnation obstructing the channels and collaterals• Slurred speech, involuntary salivation, and urinary incontinence: qi deficiency with inability to control body functions	<ul style="list-style-type: none">• Tonifies qi• Activates blood circulation• Opens the channels and collaterals	<ul style="list-style-type: none">• <i>Huang Qi</i> (Radix Astragali) greatly tonifies <i>zheng</i> (upright) and <i>yuan</i> (source) <i>qi</i>.• <i>Dang Gui Wei</i> (Extremities Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), <i>Chi Shao</i> (Radix Paeoniae Rubra), <i>Tao Ren</i> (Semen Persicae), and <i>Hong Hua</i> (Flos Carthami) activate the blood and eliminate blood stasis.• <i>Di Long</i> (Pheretima) unblocks the channels and collaterals to restore normal physical functions.

Bǔ Yáng Huán Wǔ Tāng (Tonify the Yang to Restore Five Decoction)

- With cold conditions, add *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), and *Ba Ji Tian* (Radix Morindae Officinalis).
- With Spleen and Stomach deficiencies, add *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With profuse phlegm, add *Ban Xia* (Rhizoma Pinelliae) and *Tian Zhu Huang* (Concretio Silicea Bambusae).
- With irritability and insomnia, and a wiry, deficient, rapid pulse, add *Zhi Zi* (Fructus Gardeniae) and *Suan Zao Ren* (Semen Ziziphi Spinosa).
- For coronary artery disorders, angina, and cardiac infarction, add *San Qi* (Radix et Rhizoma Notoginseng) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae).

CAUTIONS / CONTRAINDICATIONS

- *Bu Yang Huan Wu Tang* is contraindicated in patients who have Liver wind rising, yin-deficient heat, or stagnation of phlegm.
- Because this formula contains strong blood-activating and blood-stasis removing herbs, it should not be used immediately after strokes caused by cerebral hemorrhage.
- This formula is contraindicated in post-stroke patients who have a forceful pulse, which indicates an excess condition. This formula contains a large dose of *Huang Qi* (Radix Astragali), a tonic with ascending properties, and may exacerbate excess conditions.

PHARMACOLOGICAL EFFECTS

1. **Effects on the central nervous system:** According to various *in vitro* studies, administration of *Bu Yang Huan Wu Tang* was associated with dilating blood vessels in the brain and improving blood perfusion to the brain.¹ The effect lasted for up to 1 hour following intravenous injection of this formula at 0.25-0.5 g/kg.² Furthermore, it was shown that use of *Bu Yang Huan Wu Tang* facilitated the healing and recovery of subjects who suffered from nervous system damage to the brain and spine.³
2. **Antiplatelet, anticoagulant and thrombolytic:** *Bu Yang Huan Wu Tang* has been shown to have antiplatelet, anticoagulant, and thrombolytic effects in both *in vitro* and *in vivo* studies.^{4,5,6}
3. **Antihyperlipidemic:** According to various *in vitro* studies, administration of *Bu Yang Huan Wu Tang* was associated with a reduction in total cholesterol levels and triglyceride levels. No significant changes were noted in HDL.^{7,8}
4. **Cardiovascular:** In one study of anesthetized rabbits, administration of *Bu Yang Huan Wu Tang* showed different effects at different doses. At 0.5 g/kg given via intravenous injection, no significant changes were noted to blood pressure and heart rate. At 1.0 to 2.0 g/kg given

via intravenous injection, blood pressure was reduced for up to 20 minutes with no changes to heart rate.⁹

CLINICAL STUDIES AND RESEARCH

1. **Cerebrovascular disease:** Use of *Bu Yang Huan Wu Tang* plus *Gui Zhi* (Ramulus Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) in 32 patients with cerebrovascular disease was associated with recovery in 12 cases, significant improvement in 17 cases, moderate improvement in 2 cases, and no effect in 1 case.¹⁰
2. **Cerebral infarction:** Fifty patients with cerebral infarction due to stenosis of the artery were treated with *Bu Yang Huan Wu Tang* with complete recovery in 31 cases, significant recovery in 9 cases, moderate improvement in 5 cases, and no effect in 5 cases.¹¹
3. **Stroke:** According to one study, 150 patients with stroke characterized by qi deficiency and blood stagnation were treated with complete recovery in 64 cases, marked improvement in 40 cases, moderate improvement in 45 cases, and fatality in 1 case. Treatment included herbs, acupuncture, and *tui-na*. The herbal formula contained *Bu Yang Huan Wu Tang* plus *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Ji Xue Teng* (Caulis Spatholobi).¹²
4. **Ischemic cerebrovascular disorder:** Administration of *Bu Yang Huan Wu Tang* has been shown in many studies to treat patients with ischemic stroke. According to one study, use of this formula plus *Chuan Shan Jia* (Squama Manis) and *Ji Xue Teng* (Caulis Spatholobi) for 2-3 months in 103 patients was associated with 96.3% effectiveness.¹³ According to another study, concurrent treatment of herbs (*Bu Yang Huan Wu Tang* daily for 10 days per course of treatment) and acupuncture (every other day for 5 treatments per course) was associated with 97.7% effectiveness among 45 patients with ischemic cerebrovascular disorder.¹⁴
5. **Post-stroke sequelae:** Many studies of *Bu Yang Huan Wu Tang* have shown it to be one of the most effective herbal formulas for post-stroke sequelae. One study of 35 post-stroke patients reported 94% effectiveness when treated with modified *Bu Yang Huan Wu Tang*. The herbal formula contained *Huang Qi* (Radix Astragali) 30-120g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Chi Shao* (Radix Paeoniae Rubra) 10g, *Tao Ren* (Semen Persicae) 10g, *Hong Hua* (Flos Carthami) 10g, *Di Long* (Pheretima) 10g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 30g, and *Chuan Xiong* (Rhizoma Chuanxiong) 6g. *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae) were added for phlegm and dampness; *Tian Ma* (Rhizoma Gastrodiae) and *Gou Teng* (Ramulus Uncariae cum Uncis) for Liver yang rising; *Dang Shen* (Radix Codonopsis) for qi and blood deficiencies; and

Bǔ Yáng Huán Wǔ Tāng (Tonify the Yang to Restore Five Decoction)

Da Huang (Radix et Rhizoma Rhei) and *Huo Ma Ren* (Fructus Cannabis) for constipation. The herbs were cooked in water, and the decoction was taken in two equally-divided doses in the afternoon and evening.¹⁵

6. **Paralysis:** Ninety-three patients with paralysis due to stroke were treated with *Bu Yang Huan Wu Tang* plus *Ji Xue Teng* (Caulis Spatholobi), *Niu Xi* (Radix Achyranthis Bidentatae), *Qian Nian Jian* (Rhizoma Homalomenae), and other herbs with good results (complete recovery in 40 cases, significant improvement in 31 cases, moderate improvement in 20 cases, and no effect in 2 cases).¹⁶
7. **Facial paralysis:** One study reported complete recovery in 18 of 20 patients with facial paralysis using *Bu Yang Huan Wu Tang* plus *Qian Zheng San* (Lead to Symmetry Powder).¹⁷ Another study reported complete recovery in all 15 patients with facial paralysis using *Bu Yang Huan Wu Tang* plus *Wu Gong* (Scolopendra), *Fang Feng* (Radix Saposhnikovia), *Jiang Can* (Bombyx Batryticatus), and others.¹⁸
8. **Brain trauma:** One study reported 97.2% effectiveness using *Bu Yang Huan Wu Tang* to treat brain trauma in 36 patients (between 8-62 years of age, 17 days to 11 years history of illness). Clinical improvements included relief of headache, dizziness, insomnia, excessive dreams, poor memory, speech difficulties, and paralysis. Of 36 patients, the study reported complete recovery in 26 cases, marked improvement in 9 cases, and no effect in 1 case. Each course of treatment was 30 days.¹⁹
9. **Cerebral atherosclerosis:** One study reported good results using modified *Bu Yang Huan Wu Tang* to treat 75 patients with cerebral atherosclerosis with hypertension. The herbal treatment contained this formula plus *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Ge Gen* (Radix Puerariae Lobatae), *Ji Xue Teng* (Caulis Spatholobi), *Shan Zha* (Fructus Crataegi), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).²⁰
10. **Coronary heart disease:** *Bu Yang Huan Wu Tang* was reported in several studies to treat coronary heart disease. According to one study, use of modified *Bu Yang Huan Wu Tang* in decoction daily for 30 days per course of treatment was associated with 96.3% effectiveness for 82 patients.²¹ According to another study, coronary heart disease characterized by qi deficiency and blood stagnation was treated with 83.7% effectiveness using *Bu Yang Huan Wu Tang* plus *Yu Jin* (Radix Curcumae) 10g, *Yi Mu Cao* (Herba Leonuri) 10g, *Gua Lou* (Fructus Trichosanthis) 10g, *Xie Bai* (Bulbus Allii Macrostemonis) 10g, and *Ban Xia* (Rhizoma Pinelliae) 10g. The herbs were given in decoction daily, for 10 days per course of treatment.²²
11. **Arteriosclerosis obliterans:** Use of *Bu Yang Huan Wu Tang* plus *Ji Xue Teng* (Caulis Spatholobi), *Dang Shen* (Radix Codonopsis), *Gui Zhi* (Ramulus Cinnamomi), and *Gan Jiang* (Rhizoma Zingiberis) was associated with 87.7% effectiveness in treating early stage arteriosclerosis obliterans in 49 patients (between 40-82 years of age, with 15 days to 7 years history of illness).²³
12. **Vascular headache:** One study of 26 patients with vascular headache reported complete recovery in 16 cases, improvement in 9 cases, and no effect in 1 case. The herbal treatment contained *Bu Yang Huan Wu Tang* plus *Niu Xi* (Radix Achyranthis Bidentatae), *Bai Zhi* (Radix Angelicae Dahuricae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) as the base formula. Modifications included addition of *Shi Jue Ming* (Concha Halitidis) and *Suan Zao Ren* (Semen Ziziphi Spinosae) for insomnia due to severe headache; and *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Long Chi* (Dens Draconis) for insomnia due to restlessness and irritability.²⁴
13. **Raynaud's disease:** Use of *Bu Yang Huan Wu Tang* plus *Gui Zhi* (Ramulus Cinnamomi) in 31 patients with Raynaud's disease was associated with 90.3% effectiveness (18 with complete recovery, 10 with improvement, and 3 with no effect).²⁵
14. **Poliomyelitis:** One study reported good results in treating poliomyelitis in young children using *Bu Yang Huan Wu Tang* plus *Yin Yang Huo* (Herba Epimedii) as the base formula, with modifications as needed. *Quan Xie* (Scorpio) and *Wu Gong* (Scolopendra) were added for treating the early stage of illness. *Qian Zheng San* (Lead to Symmetry Powder) was added for deviation of the eyes and mouth. *Sang Zhi* (Ramulus Mori) was added for paralysis of the arms, and *Niu Xi* (Radix Achyranthis Bidentatae) for paralysis of the legs. The study reported complete recovery in 37 of 42 patients.²⁶
15. **Deep vein thrombosis:** One study reported good results using herbs and drugs to treat deep vein thrombosis in the legs. The herbal treatment contained *Bu Yang Huan Wu Tang* plus *Ji Xue Teng* (Caulis Spatholobi), *Niu Xi* (Radix Achyranthis Bidentatae), *Ren Dong Teng* (Caulis Lonicerae Japonicae) and others as needed. The drug was given via intravenous infusion (the name of the drug was not available). After 2-4 months of treatment in 18 patients, the study reported complete recovery in 14 cases and improvement in 4 cases.²⁷
16. **Varicose veins:** One study reported good results using modified *Bu Yang Huan Wu Tang* to treat 30 patients with varicose veins (history of 4 to 20 years of illness). Of 30 patients, the study reported marked improvement in 21 cases and moderate improvement in 9 cases.²⁸
17. **Polyneuritis:** Use of herbs topically as an herbal wash proved beneficial for treating polyneuritis. The warm herbal formula contained *Bu Yang Huan Wu Tang* plus *Dang Shen* (Radix Codonopsis), *Fu Ling* (Poria), *Bai Zhu*

Bǔ Yáng Huán Wǔ Tāng (Tonify the Yang to Restore Five Decoction)

(Rhizoma Atractylodis Macrocephalae), and others as needed. The treatment protocol was to cook the herbs in 1,500 mL of water to yield 1,000 mL of solution. (50g of ethanol was added to the final solution.) The herbal solution was applied topically to the affected area as an herbal wash. Of 19 patients, 13 had significant improvement and 6 had moderate improvement.²⁹

18. Chronic nephritis: Use of *Bu Yang Huan Wu Tang* plus *Da Huang* (Radix et Rhizoma Rhei), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Cang Zhu* (Rhizoma Atractylodis), and *Sang Ji Sheng* (Herba Taxilli) in 108 patients with chronic nephritis was associated with 96.3% effectiveness (73 with complete recovery, 16 with marked improvement, 15 with moderate improvement, and 4 with no effect).³⁰

19. Chronic prostatitis: Sixty geriatric patients with chronic prostatitis were treated with herbs for 1 month with 95% effectiveness. The herbal treatment contained *Bu Yang Huan Wu Tang* plus *Ze Lan* (Herba Lycopi), *Yi Mu Cao* (Herba Leonuri), *Chuan Niu Xi* (Radix Cyathulae) and *Fu Ling* (Poria) as the base formula. Modifications included *Di Huang* (Radix Rehmanniae) for yin deficiency; *Yin Yang Huo* (Herba Epimedii) and *Ba Ji Tian* (Radix Morindae Officinalis) for yang deficiency; *Tian Ma* (Rhizoma Gastrodiae) for hypertension; *Wu Yao* (Radix Linderae), *Shui Zhi* (Hirudo), and *Tu Bie Chong* (Eupolyphaga seu Steleophaga) for qi stagnation; and others as needed.³¹

20. Prostatic hypertrophy: One study reported 93.78% effectiveness using modified *Bu Yang Huan Wu Tang* to treat 48 geriatric males with prostatic hypertrophy. The herbal treatment contained this formula plus *San Qi* (Radix et Rhizoma Notoginseng), *Wang Bu Liu Xing* (Semen Vaccariae), *Yu Xing Cao* (Herba Houttuyniae), and others as needed. The treatment protocol was to cook the herbs in water and drink 150 mL of decoction twice daily. Of 48 patients, the study reported significant improvement in 32 cases, moderate improvement in 13 cases, and no effect in 3 cases.³²

21. Sciatica: Administration of *Bu Yang Huan Wu Tang* has been shown to be effective in treating sciatica. In one study of 100 patients with sciatica, 98% effectiveness was reported using *Bu Yang Huan Wu Tang* plus *Gui Zhi* (Ramulus Cinnamomi), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Dang Shen* (Radix Codonopsis), and *Ji Xue Teng* (Caulis Spatholobi) for 8-25 packs of herbs.³³ Another study reported 92% effectiveness among 53 patients with sciatica using *Bu Yang Huan Wu Tang* plus *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), *Wu Gong* (Scolopendra), and *Quan Xie* (Scorpio).³⁴

22. Numbness: Administration of *Bu Yang Huan Wu Tang* was associated with 98% effectiveness in treating 56 patients with numbness from various causes such as hyperlipidemia, post-stroke sequelae, or hypertension. The herbal formula contained *Huang Qi* (Radix Astragali) 60g, *Dang Gui* (Radix Angelicae Sinensis) 12g, *Chi Shao* (Radix Paeoniae Rubra) 12g, *Wu Gong* (Scolopendra) 12g, *Quan Xie* (Scorpio) 12g, *Hai Feng Teng* (Caulis Piperis Kadsurae) 12g, *Tao Ren* (Semen Persicae) 10g, *Hong Hua* (Flos Carthami) 10g, *Chuan Xiong* (Rhizoma Chuanxiong) 10g, *Di Long* (Pheretima) 10g, and *Fu Zi* (Radix Aconiti Lateralis Praeparata) 3g. Modifications were made by: adding *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for blood stagnation; *He Shou Wu* (Radix Polygoni Multiflori) for blood deficiency; *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria) for dampness; and *Niu Xi* (Radix Achyranthis Bidentatae) and *Long Gu* (Os Draconis) for Liver yang rising. The herbs were given daily in decoction. Of 56 patients, the study reported complete recovery in 25 cases, improvement in 30 cases, and no effect in 1 case.³⁵

TOXICOLOGY

Bu Yang Huan Wu Tang has very little toxicity. According to one acute toxicology study, the LD₅₀ in mice via injection is equivalent to 149 g/kg of dried herbs.³⁶

Nao Wei Kang Wan (Benefit Brain Atrophy Pill) is designed specifically to treat individuals with compromised mental acuity and physical activity due to deterioration of the brain. Although the formula is rather complex, the main actions are to tonify Kidney yin, Kidney yang, and *jing* (essence); regulate qi and blood; remove blood stagnation; and open the sensory orifices to promote awareness and alertness. Clinically, this formula may be used for Parkinson's disease, Alzheimer's disease, dementia, and post-stroke patients with impaired mental and physical functions.

AUTHORS' COMMENTS

Bu Yang Huan Wu Tang is the representative formula for treating post-stroke patients with qi deficiency and blood stasis. It can be used any time after a stroke as long as the patient is showing signs of blood stasis with qi deficiency. The key symptoms include paralysis and a moderate pulse.

As the chief herb, *Huang Qi* (Radix Astragali) is used at a large dose to tonify qi and treat the underlying disorder. The dose of *Huang Qi* (Radix Astragali) may be started at approximately 30-60g, and increased gradually to obtain the desired effects. Upon recovery, it is important to continue taking the herbs for a period of time to consolidate the condition and prevent further strokes.

It has been debated whether it is appropriate to use *Bu Yang Huan Wu Tang* in patients with hypertension. The argument against is that *Huang Qi* (Radix Astragali), a warm tonic with ascending effect, may raise blood pressure. However, it has been shown that intravenous injection of *Huang Qi* (Radix Astragali) actually decreases blood pressure in anesthetized subjects via dilation of

peripheral blood vessels.³⁷ Furthermore, intravenous injection of *Bu Yang Huan Wu Tang* in anesthetized subjects did not have any significant effect on blood pressure.³⁸ Lastly, two clinical texts clearly state that *Bu Yang Huan Wu Tang* is not contraindicated in patients with hypertension.^{39,40}

Bu Yang Huan Wu Tang treats sequelae of wind-stroke. This formula was composed by Dr. Wang Qing-Ren, who believed that one's qi, when healthy, is 100% functional, with an equal 50% bilateral distribution. In the case of hemiplegia, 50% of the qi is impaired. Since severe qi deficiency is the primary imbalance in this syndrome, *Huang Qi* (Radix Astragali) is used as the chief herb at very large dosage to strongly tonify *zheng* (upright) qi and *yuan* (source) qi, generate flesh, and improve atrophy. This herb also tonifies qi to move the blood and transform blood stasis. Qi deficiency leads to blood deficiency, which in turn impedes the circulation of *yuan* (source) qi and aggravates muscle atrophy. Therefore, small dosages of invigorating herbs such as *Chuan Xiong* (Rhizoma Chuanxiong), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Dang Gui* (Radix Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubra) and *Di Long* (Pheretima) are added to enhance the blood-transforming function of this formula. In short, this formula is aimed at tonifying the yang qi, and nourishing the blood, muscles and sinews to restore bodily functions.

Shī Xiào Sǎn (Sudden Smile Powder)

失笑散

Pinyin Name: Shi Xiao San

Literal Name: Sudden Smile Powder

Alternate Name: Sudden Smile Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

Wu Ling Zhi (Faeces Trogopteri), yan (ground) to small particles with liquor

[6g]

Pu Huang (Pollen Typhae), chao (dry-fried) until aromatic

[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amount of both ingredients into a fine powder. Cook 6g of the powder with vinegar and condense it into a paste. Add 1 bowl of water and cook it again until the liquid is reduced to 70%, and take the warm decoction before meals. Today this formula is prepared by grinding the ingredients into a fine powder. Take 6g of the powder with a grain-based liquor or vinegar. This formula may also be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and removes blood stasis
2. Disperses stagnation and stops pain

CLINICAL MANIFESTATIONS

Blood stasis in the body: sharp pain in the chest or abdomen, postpartum bleeding due to retention of lochia, irregular menstruation, and acute onset of pain in the lower abdomen.

CLINICAL APPLICATIONS

Dysmenorrhea, amenorrhea, irregular menstruation, endometriosis, infertility, uterine bleeding, uterine bleeding caused by abortion or miscarriage, ectopic pregnancy, postpartum abdominal pain, angina pectoris, coronary artery disease, viral hepatitis, and upper gastrointestinal bleeding.

Shī Xiào Sǎn (Sudden Smile Powder)

EXPLANATION

Shi Xiao San (Sudden Smile Powder) is a commonly used formula for treating various presentations of pain caused by blood stasis and obstruction of blood circulation. It is especially useful for treating blood stagnation in the Liver channel.

This formula combines *Wu Ling Zhi* (Faeces Troglodyteris) with *Pu Huang* (Pollen Typhae) to activate blood circulation, remove blood stagnation, and relieve pain. This formula is prepared with grain-based liquor to enhance the effect to warm the channels and invigorate blood circulation. Furthermore, this formula is taken with vinegar to improve the function to disperse blood stasis and relieve pain.

MODIFICATIONS

- With more severe qi stagnation, add *Chuan Lian Zi* (Fructus Toosendan) and *Xiang Fu* (Rhizoma Cyperi).
- With more cold, add *Pao Jiang* (Rhizoma Zingiberis Praeparatum) and *Xiao Hui Xiang* (Fructus Foeniculi).
- With irregular menstruation due to blood stasis and blood deficiency, add *Si Wu Tang* (Four-Substance Decoction).

CAUTIONS / CONTRAINDICATIONS

- *Shi Xiao San* is contraindicated during pregnancy.
- This formula should be used with caution in patients with a weak or sensitive stomach.

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** According to *in vitro* studies, use of *Shi Xiao San* was associated with reduced blood pressure and heart rate in both frogs and rabbits.^{1,2}
2. **Antiplatelet:** According to an *in vitro* study in rats, administration of *Shi Xiao San* was associated with marked antiplatelet effect 4 hours after oral ingestion. The researchers noted that this formula has an antiplatelet effect comparable to aspirin.³
3. **Effect on the uterus:** According to clinical studies, *Shi Xiao San* has a marked regulatory effect on the uterus. It may stimulate contraction of the uterus to facilitate passage of placental remnants in postpartum women,

or relax smooth muscle to relieve menstrual cramps in women with dysmenorrhea or premenstrual syndrome.⁴

CLINICAL STUDIES AND RESEARCH

1. **Dysmenorrhea:** Many studies have reported success using *Shi Xiao San* to treat painful menstruation. According to one study, use of the formula in 108 women with dysmenorrhea was associated with significant relief in 72 cases, moderate improvement in 34 cases, and no effect in 2 cases. The treatment started herbal therapy 2-3 days prior to the period, for 5-7 packs of herbs per course of treatment.⁵ Another study reported 97.5% effectiveness using this formula to treat 80 patients with dysmenorrhea. The treatment protocol was to administer one pack of herbs in decoction daily, starting 3 days before the period, for 6 packs of herbs per course of treatment, for a total of 3 menstrual cycles.⁶
2. **Endometriosis:** Thirty patients with endometriosis were treated with herbs, with complete recovery in 12 cases, marked improvement in 16 cases, and no effect in 2 cases. The herbal treatment contained dry-fried *Pu Huang* (Pollen Typhae) 8g, *Wu Ling Zhi* (Faeces Troglodyteris) 12g, *Xue Jie* (Sanguis Draconis) 1.5g, and *San Qi* (Radix et Rhizoma Notoginseng) 1.5g.⁷
3. **Uterine bleeding:** According to one study, women with excessive uterine bleeding (in volume or duration) were treated with 84.7% effectiveness using *Dang Gui* (Radix Angelicae Sinensis) 9-12g, *Chuan Xiong* (Rhizoma Chuanxiong) 6-9g, *Pu Huang* (Pollen Typhae) 6-9g, dry-fried *Wu Ling Zhi* (Faeces Troglodyteris) 10g, and *Tao Ren* (Semen Persicae) 10g. Of 59 patients, the study reported marked improvement in 43 cases, moderate improvement in 7 cases, and no effect in 9 cases.⁸
4. **Uterine bleeding caused by miscarriage:** *Shi Xiao San* has been shown to be effective in stopping bleeding in women with profuse bleeding following miscarriage. Most treatment protocols use *Shi Xiao San* as the base formula, with the addition of *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill) to discharge placental remnants, *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) and/or *Gui Pi Tang* (Restore the Spleen Decoction) for qi and blood deficiencies, and heat-clearing herbs for infection.^{9,10}

Shi Xiao San (Sudden Smile Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood stasis in the body	Abdominal pain, postpartum bleeding due to retention of lochia, irregular menstruation, and sharp pain in the lower abdomen: blood stasis with obstructed blood circulation	<ul style="list-style-type: none">• Activates blood circulation and removes blood stasis• Disperses stagnation and stops pain	<ul style="list-style-type: none">• <i>Wu Ling Zhi</i> (Faeces Troglodyteris) activates blood circulation, removes blood stagnation, and relieves pain.• <i>Pu Huang</i> (Pollen Typhae) activates blood circulation, stops bleeding, and relieves pain.

Shī Xiào Sǎn (Sudden Smile Powder)

5. **Angina pectoris and coronary artery disease:** One study reported good results using *Shi Xiao San* to treat 46 patients with angina and coronary artery disease. The herbal formula contained 15g each of *Wu Ling Zhi* (Faeces Troglodyteris), *Pu Huang* (Pollen Typhae), *Chuan Xiong* (Rhizoma Chuanxiong), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami). The treatment protocol was to administer the herbs in decoction daily, for 1 month per course of treatment, for 1-5 courses total. Of 44 patients, the study reported 88.6% effectiveness based on symptomatic evaluation, and 28.1% effectiveness based on EKG readings.¹¹
6. **Viral hepatitis:** One study of 200 patients with viral hepatitis reported a 70% recovery rate using *Shi Xiao San* plus *Yin Chen Hao Tang* (Artemisia Scoparia Decoction). The base formula contained *Wu Ling Zhi* (Faeces Troglodyteris) 10-15g, dry-fried *Pu Huang* (Pollen Typhae) 10-15g, *Yin Chen* (Herba Artemisiae Scopariae) 30-60g, *Zhi Zi* (Fructus Gardeniae) 10g, and *Da Huang* (Radix et Rhizoma Rhei) 10-30g. Other herbs were added depending on the condition of the individual. For acute hepatitis with jaundice, *Huang Bo* (Cortex Phellodendri Chinensis), *Yi Yi Ren* (Semen Coicis), *Fu Ling* (Poria), *Yu Jin* (Radix Curcumae), *Pu Gong Ying* (Herba Taraxaci), and *Jin Qian Cao* (Herba Lysimachiae) were added. For acute hepatitis without jaundice, *Long Dan* (Radix et Rhizoma Gentianae), *Mu Dan Pi* (Cortex Moutan), *Ze Xie* (Rhizoma Alismatis), *Fu Ling* (Poria), *Yi Yi Ren* (Semen Coicis), *Che Qian Zi* (Semen Plantaginis), *Mu Tong* (Caulis Akebiae), and *Chi Shao* (Radix Paeoniae Rubra) were added. For chronic infectious hepatitis, *Yu Jin* (Radix Curcumae), *Yan Hu Suo* (Rhizoma Corydalis), *Bai Shao* (Radix Paeoniae Alba), *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), and *Yi Yi Ren* (Semen Coicis) were added. For chronic active hepatitis, *Chi Shao* (Radix Paeoniae Rubra), *Mu Dan Pi* (Cortex Moutan), *Long Dan* (Radix et Rhizoma Gentianae), vinegar-processed *Chai Hu* (Radix Bupleuri), *Yu Jin* (Radix Curcumae), *Pu Gong Ying* (Herba Taraxaci), *Zhi Qiao* (Fructus Aurantii), *Yan Hu Suo* (Rhizoma Corydalis), and *Bai Hua She She Cao* (Herba Hedyotis) were added. With hepatomegaly or splenomegaly, *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Chuan Xiong* (Rhizoma Chuanxiong), *Yu Jin* (Radix Curcumae), *Yan Hu Suo* (Rhizoma Corydalis), *Zhi Qiao* (Fructus Aurantii), processed *Bie Jia* (Carapax Trionycis), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Bai Hua She She Cao* (Herba Hedyotis) were added. Of 139 patients with acute viral hepatitis, 112 experienced

complete recovery. Of 61 patients with chronic viral hepatitis, 28 had recovered completely.¹²

RELATED FORMULAS

Shōu Niān Sǎn (Pinch Powder)

手拈散

Pinyin Name: *Shou Nian San*

Yan Hu Suo (Rhizoma Corydalis)

Wu Ling Zhi (Faeces Troglodyteris)

Cao Guo (Fructus Tsaoko)

Mo Yao (Myrrha)

The source text states to grind equal amounts of all the ingredients into a powder, and take 6g per dose with boiled water. This formula activates blood circulation, removes blood stagnation, activates qi circulation, and relieves pain. Clinically, it may be used for epigastric or abdominal pain due to qi and blood stagnation.

Shou Nian San (Pinch Powder) is a stronger and warmer formula than *Shi Xiao San*, and is more appropriate for treating pain characterized by cold and blood stagnation.

Niu Xi (Radix Achyranthis Bidentatae)

Wen Jing Zhi Tong Tang (Warm the Channels and Stop Pain Decoction) is designed to treat menstrual disorders

Shī Xiào Sǎn (Sudden Smile Powder)

characterized by qi stagnation and blood stasis. Clinical applications include dysmenorrhea with bloating, cramping, pain, and blood clots; endometriosis with severe menstrual cramping and pain; and pain associated with various gynecological disorders.

AUTHORS' COMMENTS

Shi Xiao San is one of the best formulas for dysmenorrhea. The main emphasis of this formula is to activate blood, dispel blood stasis, and relieve pain. It does not have a strong qi-activating function. Because blood and qi stagnation often occur together, this formula should be modified as needed.

The literal translation of *Shi Xiao San* on a word-for-word basis is *shi* (lose) *xiao* (smile) *san* (powder). However, this literal translation is misleading and does not convey the meaning of the formula. When *Shi Xiao San* is prescribed to treat severe pain associated with dysmenorrhea, the formula has such a strong and immediate effect to relieve pain that the patients break into a “sudden smile.” They are often at a loss to know why the pain disappeared so quickly. So, while the literal translation of *Shi Xiao San* is

“lose a smile powder,” the actual meaning is “at-a-loss and smile powder.”

Huó Luò Xiào Líng Dān

(Fantastically Effective Pill to Invigorate the Collaterals)

活絡效靈丹
活络效灵丹

Pinyin Name: *Huo Luo Xiao Ling Dan*

Literat Name: Fantastically Effective Pill to Invigorate the Collaterals

Original Source: *Yi Xue Zhong Zhong Can Xi Lu* (Records of Heart-Felt Experiences in Medicine With Reference to the West) by Zhang Xi-Chun in 1918-34

COMPOSITION

<i>Dan Shen</i> (Radix et Rhizoma <i>Salviae Miltiorrhizae</i>)	15g
<i>Ru Xiang</i> (Gummi <i>Olibanum</i>), fresh	15g
<i>Mo Yao</i> (Myrrha), fresh	15g
<i>Dang Gui</i> (Radix <i>Angelicae Sinensis</i>)	15g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare as a decoction. This formula may also be administered in powder form. Grind the ingredients with the doses stated above into powder. Take the powder in four equally-divided doses with a warm, grain-based liquor.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and dispels blood stasis
2. Unblocks the collaterals and relieves pain

Huó Luò Xiào Líng Dān

(Fantastically Effective Pill to Invigorate the Collaterals)

CLINICAL MANIFESTATIONS

Qi and blood stagnation: heart and abdominal pain, pain of the arms and legs, bruises and swelling due to trauma, and other external disorders such as carbuncles, furuncles, multiple abscesses, scrofulae, and ulcers.

CLINICAL APPLICATIONS

Bi zheng (painful obstruction syndrome), heel pain, sciatica, ischemic stroke, coronary artery disease, angina pectoris, cerebrovascular accident, thromboangiitis obliterans, cervical spondylosis, ectopic pregnancy, and hysteromyoma.

EXPLANATION

Huo Luo Xiao Ling Dan (Fantastically Effective Pill to Invigorate the Collaterals) treats various types of pain and disorders, both external and internal, due to qi and blood stagnation. The formula uses *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) to invigorate blood circulation and remove blood stasis. *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) activate qi and blood circulation to relieve pain. *Dang Gui* (Radix Angelicae Sinensis) nourishes the blood and activates blood circulation.

MODIFICATIONS

- With leg pain, add *Niu Xi* (Radix Achyranthis Bidentatae).
- With abdominal pain in women due to blood stagnation, add *Tao Ren* (Semen Persicae) and *Wu Ling Zhi* (Faeces Troglodyter).
- With yang-type sores with redness and swelling, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Zhi Mu* (Rhizoma Anemarrhenae).
- With yin-type sores that are hard, add *Rou Gui* (Cortex Cinnamomi) and *Lu Jiao Jiao* (Colla Cornus Cervi).
- With chronic sores that are slow to heal, add *Huang Qi* (Radix Astragali), *Zhi Mu* (Rhizoma Anemarrhenae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With abscesses of the internal organs, add *San Qi* (Radix

et Rhizoma Notoginseng) and *Niu Bang Zi* (Fructus Arctii).

CAUTIONS / CONTRAINDICATIONS

- *Huo Luo Xiao Ling Dan* is contraindicated during pregnancy and in the absence of blood stasis.¹
- Use of this formula is sometimes associated with nausea, vomiting, and gastrointestinal discomfort. Under these circumstances, the doses of *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) should be reduced to 6g to 9g from 15g.^{2,3}

CLINICAL STUDIES AND RESEARCH

1. **Bizheng (painful obstruction syndrome):** Administration of customized *Huo Luo Xiao Ling Dan* in 123 patients with *bi zheng* (painful obstruction syndrome) was associated with complete recovery in 102 cases, improvement in 17 cases, and no effect in 4 cases. The study stated that most patients began to notice an effect after 5 packs of herbs, improvement after 10 packs of herbs, and recovery between 20-40 packs of herbs.⁴
2. **Heel pain:** One study reported good results using modified *Huo Luo Xiao Ling Dan* to treat 60 patients with heel pain. Modifications to the formula included the addition of *Shi Hu* (Caulis Dendrobii) 15g, *Di Huang* (Radix Rehmanniae) 15g, and *Huang Bo* (Cortex Phellodendri Chinensis) 12g for yin deficiency; and *Dang Shen* (Radix Codonopsis) 12-15g and *Huang Qi* (Radix Astragali) 12-15g for qi deficiency. Of 60 patients, 45 recovered completely (able to resume normal physical activities without any restrictions), 14 experienced significant improvement (slight pain only after prolonged physical activities), and 1 had no benefit.⁵
3. **Sciatica:** *Huo Luo Xiao Ling Dan* has been shown in several studies to effectively treat sciatica. According to one study, 61 patients with sciatica were treated with good results using modified *Huo Luo Xiao Ling Dan*. Modifications to the formula included addition of *Du Huo* (Radix Angelicae Pubescentis) 10g, *Qin Jiao* (Radix

Huo Luo Xiao Ling Dan (Fantastically Effective Pill to Invigorate the Collaterals)

Gentianae Macrophyllae) 10g, and *Fang Feng* (Radix Saposhnikoviae) 10g for wind-cold; *Du Huo* (Radix Angelicae Pubescentis) 10g, *Ze Lan* (Herba Lycopi) 10g, and *Shen Jin Cao* (Herba Lycopodii) 20g for damp-cold; *Huang Bo* (Cortex Phellodendri Chinensis) 15g, *Zhi Mu* (Rhizoma Anemarrhenae) 10g, and *Mu Fang Ji* (Radix Cocculi Trilobi) 12g for damp-heat; and *Ma Qian Zi* (Semen Strychni) 0.3-0.9g and *Bai Zhi* (Radix Angelicae Dahuricae) 10g for severe pain. The treatment protocol was to cook the herbs in water, and administer the decoction in two equally-divided doses with a small amount of grain-based liquor daily, for 5 days per course of treatment, for 3-4 courses total. Of 61 patients, the study reported recovery in 43 cases, significant improvement in 12 cases, moderate improvement in 4 cases, and no effect in 2 cases.⁶

Another study reported 98% effectiveness using modified formulas to treat 119 patients with sciatica. The herbal treatment contained *Huo Luo Xiao Ling Dan* and *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction) as the base formulas. Modifications included the addition of *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) for severe pain; *Zhi Chuan Wu* (Radix Aconiti Praeparata), *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata), and *Cang Zhu* (Rhizoma Atractylodis) for severe pain during cold, rainy days; and *Wei Ling Xian* (Radix et Rhizoma Clematidis) and *Si Gua Luo* (Retinervus Luffae Fructus) for pain in the limbs. Of 119 patients, the study reported complete recovery in 89 cases, improvement in 29 cases, and no effect in 1 case.⁷

4. **Ischemic stroke:** One study reported good results when 77 patients with ischemic stroke were treated with large doses of modified *Huo Luo Xiao Ling Dan*. The herbal treatment contained 24 grams each of *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Dang Gui* (Radix Angelicae Sinensis). The duration of treatment was 10 days per course, for 3-5 courses total. Of 77 patients, the study reported near-complete recovery in 40 cases, significant improvement in 22 cases, moderate improvement in 12 cases, no effect in 2 cases, and fatality in 1 case.⁸

5. **Thromboangiitis obliterans:** Use of *Huo Luo Xiao Ling Dan* plus *Si Miao Yong An Tang* (Four-Valiant Decoction for Well-Being) in 17 patients with thromboangiitis obliterans was associated with complete recovery in 11 cases, significant improvement in 2 cases, and no effect in 4 cases. The treatment protocol was to cook the herbs in decoction, and administer the decoction in three to four equally-divided doses daily.⁹

6. **Cervical spondylosis:** One study reported good results treating cervical spondylosis using both oral and topical applications of herbs. For oral use, the herbal treatment contained *Huo Luo Xiao Ling Dan*, with the addition of *Gui Zhi* (Ramulus Cinnamomi) 5g, *Qiang Huo* (Rhizoma et Radix Notopterygii) 10g, and *Xi Xin* (Radix et Rhizoma Asari) 5g for cold; *Di Long* (Pheretima) 10g, *Ju Hua* (Flos Chrysanthemi) 10g, and *Sheng Ma* (Rhizoma Cimicifugae) 10g for heat; *Bai Jie Zi* (Semen Sinapis) 10g and *Fu Ling* (Poria) 10g for damp and phlegm; and *Qiang Huo* (Rhizoma et Radix Notopterygii) 10g and *Sang Zhi* (Ramulus Mori) 10g for numbness. The herbs were cooked in water, and the decoction was administered in three equally-divided doses, with a small amount of grain-based liquor. The herb residue (from the decoction) was combined with 50g of *Tou Gu Cao* (Caulis Impatiensis) and a small amount of *Hua Jiao* (Pericarpium Zanthoxyli), cooked in water, and the resultant solution applied topically to the affected area. The duration was 5 packs of herbs per course of treatment, for 4-7 courses total. Of 50 patients, the study reported complete recovery in 23 cases, significant improvement in 17 cases, moderate improvement in 8 cases, and no effect in 2 cases.¹⁰

7. **Hysteromyoma:** Administration of modified *Huo Luo Xiao Ling Dan* to 29 patients with hysteromyoma was associated with complete recovery in 17 cases, significant improvement in 6 cases, moderate improvement in 4 cases, and no effect in 2 cases. The herbal treatment contained *Huo Luo Xiao Ling Dan* plus *Da Huang* (Radix et Rhizoma Rhei) and *Niu Xi* (Radix Achyranthis Bidentatae) as the base formula. Modifications were made as follows: *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari) for cold obstruction and blood stagnation; *Chuan Lian Zi* (Fructus Toosendan) and *Pu Huang* (Pollen Typhae) for qi and blood stagnation; *Bai Jiang Cao* (Herba cum Radice Patriniae) and *Pu Gong Ying* (Herba Taraxaci) for accumulation of heat and blood stagnation; *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency and blood stagnation; *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci) for Spleen and Kidney deficiency; and *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae) for obese individuals with dampness and phlegm.¹¹

8. **Ectopic pregnancy:** One study reported marked success in treating ectopic pregnancy using *Huo Luo Xiao Ling Dan* plus *Tian Hua Fen* (Radix Trichosanthis) and *Wu Gong* (Scolopendra) in decoction, two times daily for 7 days per course of treatment, for 2-3 courses. The study reported success in 46 of 50 patients.¹²

Dān Shēn Yīn (Salvia Decoction)

丹參飲

Pinyin Name: *Dan Shen Yin*

Literal Name: Salvia Decoction

Original Source: *Shi Fang Ge Kuo* (Collected Songs about Contemporary Formulas) by Chen Nian-Zi in 1801

COMPOSITION

Dan Shen (Radix et Rhizoma Salviae Miltiorrhizae)

30g

Tan Xiang (Lignum Santali Albi)

3-4.5g

Sha Ren (Fructus Amomi)

3-4.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the herbs with one cup of water until the combination is reduced to 70% of its original volume. Take the strained decoction while it is warm.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and removes blood stasis
2. Activates qi circulation and stops pain

CLINICAL MANIFESTATIONS

Heart [epigastric] and stomach pain due to qi and blood stagnation.

CLINICAL APPLICATIONS

Chronic atrophic gastritis, chronic gastritis, epigastric pain, and ulceration.

EXPLANATION

Dan Shen Yin (Salvia Decoction) is designed to treat heart [epigastric] and stomach pain due to qi and blood stagnation. The actual location of the pain is in the epigastrium, the area slightly below the heart. The pain is in a fixed location, and is worse with pressure upon palpation. Since this formula is slightly on the cold side, it is more suitable for epigastric pain caused by blood stagnation and heat.

Dān Shēn Yīn (Salvia Decoction)

Dan Shen Yin (Salvia Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heart [epigastric] and stomach pain due to qi and blood stagnation	Epigastric pain at a fixed location: qi and blood stagnation	<ul style="list-style-type: none">• Activates blood circulation and removes blood stasis• Activates qi circulation and stops pain	<ul style="list-style-type: none">• <i>Dan Shen</i> (Radix et Rhizoma Salviae Miltiorrhizae) activates blood circulation and removes blood stagnation.• <i>Tan Xiang</i> (Lignum Santali Albi) and <i>Sha Ren</i> (Fructus Amomi) activate qi circulation and relieve pain.

In this formula, a large dose of *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) is used to activate blood circulation and remove blood stagnation. *Tan Xiang* (Lignum Santali Albi) and *Sha Ren* (Fructus Amomi) activate qi circulation and relieve pain. Together, these three herbs activate qi and blood circulation and relieve pain.

MODIFICATIONS

- With nausea and vomiting, add *Ban Xia* (Rhizoma Pinelliae) and *Zhu Ru* (Caulis Bambusae in Taenia).
- With pain characterized by heat, add *Mu Dan Pi* (Cortex Moutan) and *Huang Qin* (Radix Scutellariae).

CAUTIONS / CONTRAINDICATIONS

Dan Shen Yin should be used with caution in patients who have bleeding disorders, because a large dose of *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) is used and may prolong bleeding.

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** *Dan Shen Yin* has been shown to affect the cardiovascular system by dilating the coronary artery, increasing blood perfusion to the cardiac muscles, and reducing blood pressure.¹
2. **Antiplatelet:** According to an *in vitro* study, administration of *Dan Shen Yin* was associated with a marked antiplatelet effect. Researchers noted the effect to be comparable to aspirin.²

CLINICAL STUDIES AND RESEARCH

1. **Ulceration:** According to one study, 106 patients with various types of ulcerations were treated with complete recovery in 70 cases, improvement in 31 cases, and no effect in 5 cases. The overall effectiveness was 95.3%. The herbal treatment included *Dan Shen Yin* plus *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis).³
2. **Chronic atrophic gastritis:** Continuous administration of modified *Dan Shen Yin* for 1-3 months was associated with a 92.7% success rate among 102 patients with chronic

atrophic gastritis characterized by blood stagnation with deficiency and cold.⁴

3. **Chronic gastritis:** Two studies reported marked effects using *Dan Shen Yin* to treat gastritis. One study reported 88.7% effectiveness in 106 patients with chronic gastritis using *Dan Shen Yin* plus *Dang Shen* (Radix Codonopsis), *Hong Hua* (Flos Carthami), and others as necessary.⁵ Another study of 42 patients reported complete recovery in 20 cases and improvement in 22 cases using *Dan Shen Yin* plus *Pu Huang* (Pollen Typhae), vinegar-processed *Yan Hu Suo* (Rhizoma Corydalis), *Pu Gong Ying* (Herba Taraxaci), and others.⁶
4. **Epigastric pain:** One study of 58 patients with epigastric pain reported 98.3% effectiveness using modified *Dan Shen Yin*. The herbal treatment contained *Dan Shen Yin* plus *Fo Shou* (Fructus Citri Sarcodactylis), *Qian Nian Jian* (Rhizoma Homalomenae), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), *Xiang Fu* (Rhizoma Cyperi), *Zi Wan* (Radix et Rhizoma Asteris), dry-fried *Bai Shao* (Radix Paeoniae Alba), processed *Da Huang* (Radix et Rhizoma Rhei), and others, depending on the pattern of disharmony. For severe qi stagnation with hypochondriac fullness and pain, *Yu Jin* (Radix Curcumae) and *Qing Pi* (Pericarpium Citri Reticulatae Viride) were added. For blood stagnation with chronic pain, *Yan Hu Suo* (Rhizoma Corydalis) and *E Zhu* (Rhizoma Curcumae) were added. For acid reflux and belching, *Zuo Jin Wan* (Left Metal Pill) and *Hai Piao Xiao* (Endoconcha Sepiae) were added. For food stagnation, charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), and charred *Mai Ya* (Fructus Hordei Germinatus) were added. For loose stools due to Spleen deficiency, *Dang Shen* (Radix Codonopsis) was added and *Da Huang* (Radix et Rhizoma Rhei) was removed.⁷

Wēn Jīng Tāng (Warm the Channels Decoction)

溫經湯
温经汤

Pinyin Name: *Wen Jing Tang*
Literal Name: Warm the Channels Decoction
Alternate Names: *Wen Ching Tang*, Warm the Menses Decoction, Channel-Warming Decoction, Meridians-Warming Decoction, Tangkuei and Evodia Combination
Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Wu Zhu Yu</i> (Fructus Evodiae)	9g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	6g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	6g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	6g
<i>Bai Shao</i> (Radix Paeoniae Alba)	6g
<i>Mu Dan Pi</i> (Cortex Moutan)	6g
<i>E Jiao</i> (Colla Corii Asini)	6g
<i>Mai Dong</i> (Radix Ophiopogonis)	1 cup [9g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g
<i>Ban Xia</i> (Rhizoma Pinelliae)	0.5 cup [6g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the herbs in 10 cups [2,000 mL] of water until the liquid is reduced to 3 cups [600 mL]. Take the warm, strained decoction in three equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Warms the menses and disperses cold
2. Nourishes the blood and dispels blood stasis

CLINICAL MANIFESTATIONS

Deficiency and cold of the *chong* (thoroughfare) and *ren* (conception) channels with blood stagnation: irregular menstruation (early or delayed, prolonged or skipped menstruation, continuous menstrual bleeding, or amenorrhea), afternoon fever, irritability, hot palms and soles, dry mouth and lips, abdominal fullness, lower abdominal pain, and infertility in women.

CLINICAL APPLICATIONS

Irregular menstruation, dysmenorrhea, amenorrhea, anovulation, uterine bleeding, luteal phase defects, infertility in women, and vaginitis.

EXPLANATION

Wen Jing Tang (Warm the Channels Decoction) treats deficiency and cold of the *chong* (thoroughfare) and *ren* (conception) channels, accompanied by blood stagnation. The *chong* channel is the “sea of blood,” and the *ren* channel dominates the uterus. Both of these channels originate in the lower abdomen, and are closely related to menstruation. Deficiency and cold of the *chong* and *ren* channels lead to qi and blood stagnation, causing irregular menstruation, continuous bleeding, coldness and pain in the lower abdomen, and infertility. Afternoon fever, irritability, hot palms and soles, and dry mouth and lips may occur as a result of blood deficiency and deficiency heat.

Wen Jing Tang (Warm the Channels Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency and cold of the <i>chong</i> (thoroughfare) and <i>ren</i> (conception) channels with blood stagnation	<ul style="list-style-type: none"> Irregular menstruation, continuous bleeding, coldness and pain in the lower abdomen and infertility: deficiency and cold of the <i>chong</i> (thoroughfare) and <i>ren</i> (conception) channels, accompanied by qi and blood stagnation Afternoon fever, irritability, hot palms and soles, and dry mouth and lips: blood deficiency with deficiency heat Abdominal fullness and lower abdominal pain: qi and blood stagnation 	<ul style="list-style-type: none"> Warms the menses and disperses cold Nourishes the blood and dispels blood stasis 	<ul style="list-style-type: none"> <i>Wu Zhu Yu</i> (Fructus Evodiae) and <i>Gui Zhi</i> (Ramulus Cinnamomi) warm the channels, disperse cold, and open the blood vessels. <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong) and <i>Bai Shao</i> (Radix Paeoniae Alba) nourish and activate the blood, dispel blood stasis, and regulate menstruation. <i>Mu Dan Pi</i> (Cortex Moutan) activates blood circulation and relieves deficiency-heat symptoms. <i>E Jiao</i> (Colla Corii Asini) and <i>Mai Dong</i> (Radix Ophiopogonis) nourish yin, moisten dryness and clear deficiency heat. <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify qi and strengthen the Spleen. <i>Ban Xia</i> (Rhizoma Pinelliae) disperses hardness in the body to help remove blood stasis. <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonizes the herbs, warms the Stomach, and promotes digestion of food and absorption of nutrients.

This is a rather complicated syndrome characterized by deficiency and excess, and by heat and cold. Therefore, optimal treatment requires the use of herbs to warm the channels, dispel cold, nourish the blood, and dispel blood stasis. This formula uses *Wu Zhu Yu* (Fructus Evodiae) and *Gui Zhi* (Ramulus Cinnamomi) to warm the channels, disperse cold, and open the blood vessels. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Bai Shao* (Radix Paeoniae Alba) nourish and activate the blood, dispel blood stasis, and regulate menstruation. *Mu Dan Pi* (Cortex Moutan) activates blood circulation and relieves deficiency-heat symptoms, such as afternoon fever and hot palms and soles. *E Jiao* (Colla Corii Asini) and *Mai Dong* (Radix Ophiopogonis) nourish yin, moisten dryness and clear deficiency heat. *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify qi and strengthen the Spleen, which in turn produces blood and controls blood circulation. *Ban Xia* (Rhizoma Pinelliae) disperses any hardness in the body to help remove blood stasis. *Sheng Jiang* (Rhizoma Zingiberis Recens), besides harmonizing the herbs in this formula, also warms the Stomach to promote digestion of food and absorption of nutrients.

- With qi deficiency, remove *Mu Dan Pi* (Cortex Moutan), *Chuan Xiong* (Rhizoma Chuanxiong), and *Wu Zhu Yu* (Fructus Evodiae), and add *Huang Qi* (Radix Astragali).
- With continuous, light-colored uterine bleeding, remove *Mu Dan Pi* (Cortex Moutan), and add *Ai Ye* (Folium Artemisiae Argyi) and *Shu Di Huang* (Radix Rehmanniae Praeparata).
- With *beng lou* (flooding and spotting), add *Ai Ye* (Folium Artemisiae Argyi) and increase the dose of *E Jiao* (Colla Corii Asini).
- With leukorrhea accompanied by itching, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Che Qian Zi* (Semen Plantaginis).
- With painful menstruation, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Xiang Fu* (Rhizoma Cyperi).
- With feeling of coldness and pain in the lower abdomen, remove *Mu Dan Pi* (Cortex Moutan), *Mai Dong* (Radix Ophiopogonis), and add *Ai Ye* (Folium Artemisiae Argyi) and *Rou Gui* (Cortex Cinnamomi).

CAUTIONS / CONTRAINDICATIONS

Wen Jing Tang is contraindicated in cases characterized by excess, heat, and blood stasis.

MODIFICATIONS

- With qi stagnation, add *Xiang Fu* (Rhizoma Cyperi) and *Wu Yao* (Radix Linderae).

PHARMACOLOGICAL EFFECTS

1. **Anti-inflammatory:** One study reported that *Wen Jing Tang* had an anti-inflammatory effect in treating dysmenorrhea,

Wēn Jīng Tāng (Warm the Channels Decoction)

a common gynecological complaint. A preparation of *Wen Jing Tang* in rat uterine smooth muscle *in vitro* suppressed spontaneous contractions and prostaglandins F₂α-induced contractions. *Wen Jing Tang* used in this study was extracted from a 50% alcohol solution and subsequently freeze-dried.¹

2. **Endocrine:** According to an *in vivo* study in women with first- and second-grade amenorrhea, 8 weeks treatment with *Wen Jing Tang* induced a significant increase in plasma follicle-stimulating hormone, luteinizing hormone, and estradiol levels in both hyper- and hypo-functioning patients. The study reported that ovulation occurred in 61.3% and 66.7% of patients with first-grade amenorrhea, and in 27.3% and 22.4% of patients with second-grade amenorrhea, respectively. Based on these results, the study concluded that *Wen Jing Tang* was effective in improving gonadotropin and estradiol secretion in the treatment of either hyper- or hypo-functioning anovulatory women.² According to an *in vitro* study of female rats, administration of *Wen Jing Tang* at 5 or 500 mcg/mL increased luteinizing hormone release (60-95% increase) from the pituitary through hypothalamic LH-RH.³ The study noted that *Wen Jing Tang* stimulated ovarian steroidogenesis and was attributed to stimulation of the hypothalamus-pituitary axis; increased secretion of sex steroid hormones (17-beta-estradiol and progesterone); cytokine-induced neutrophil chemoattractant with interleukin-1β; and tumor necrosis factor α.⁴
3. **Effect on bone density:** According to one study on the prevention and treatment of osteoporosis, *Wen Jing Tang*, *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia), and *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) were administered for 49 days to rats with ovariectomy. In comparison with sham-operated rats, bone mineral density (BMD) of the tibias decreased by 20% in ovariectomized rats, but the BMD was unaffected in rats treated with herbs or 17-beta-estradiol. The study concluded that these three formulas are as effective as 17-beta-estradiol in preventing bone loss induced by ovariectomy by preserving the fine particle surface of the bone.⁵
2. **Infertility:** Administration of modified *Wen Jing Tang* was associated with 88% effectiveness in treating 292 women with infertility. Modifications to the formula were made as follows: for early menstruation, *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) were added, and *Gui Zhi* (Ramulus Cinnamomi) and *Wu Zhu Yu* (Fructus Evodiae) were removed; for late menstruation, *Bu Gu Zhi* (Fructus Psoraleae), *Du Zhong* (Cortex Eucommiae), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami) were added, and *Mu Dan Pi* (Cortex Moutan) and *Mai Dong* (Radix Ophiopogonis) were removed; and for irregular menstruation (early or late), *Chai Hu* (Radix Bupleuri), *Yu Jin* (Radix Curcumae), and *Xiang Fu* (Rhizoma Cyperi) were added. For hypermenorrhea, *Xu Duan* (Radix Dipsaci), *Sang Ji Sheng* (Herba Taxilli), and *Lu Jiao Jiao* (Colla Cornus Cervi) were added; and for hypomenorrhea, *San Leng* (Rhizoma Sparganii), *Chuan Shan Jia* (Squama Manis), and *Yi Mu Cao* (Herba Leonuri) were added. The treatment protocol was to administer the herbs in decoction, starting on the first day of the period, continuously for 5 days.⁷
3. **Amenorrhea:** According to one study, use of *Wen Jing Tang* in 10 women between 20-28 years of age with amenorrhea was associated with complete recovery in 3 cases, improvement in 5 cases, and no effect in 2 cases. The treatment protocol was to administer the herbs starting at 5 g/day. The dosage was increased by 2.5 g/day for 4 weeks, to reach a final dosage of 15 g/day.⁸ The mechanism of *Wen Jing Tang* to treat amenorrhea in anovulatory cycles in young women is attributed either to enhanced pituitary response to Gn-RH, or to improved pulsatile secretion of Gn-RH, which induces normalization of the diencephalon-pituitary-ovarian endocrine system in anovulatory patients.⁹
4. **Anovulation:** One study evaluated the efficacy of *Wen Jing Tang* for treating anovulation in women with high basal levels of luteinizing hormone. The study randomly divided 100 patients (38 with polycystic ovarian syndrome, and 62 with non-polycystic ovarian syndrome) into two groups: 52 were treated with *Wen Jing Tang* and 48 with placebo. The results showed that *Wen Jing Tang* induced significant decreases in plasma luteinizing hormone and significant increases in plasma estradiol levels (43.5%), in 8 weeks of herbal treatment. The rate of menstrual cycle improvement (including successful ovulation) was 50% in the polycystic ovarian syndrome group and 60% in the non-polycystic ovarian syndrome group.¹⁰
5. **Luteal phase defects:** One study evaluated the efficacy of *Wen Jing Tang* in treating luteal phase defects by comparing 103 subjects treated with herbs (7.5 g/day) and 94 control subjects. The study reported a 79.6% rate of correction of luteal phase defects in patients treated

CLINICAL STUDIES AND RESEARCH

1. **Uterine bleeding:** One study reported 96.2% effectiveness using modified *Wen Jing Tang* to treat 104 patients with uterine bleeding. The duration of treatment varied between 2-6 menstrual cycles. Of 104 patients, the study reported complete recovery in 38 cases, significant improvement in 40 cases, moderate improvement in 22 cases, and no effect in 4 cases.⁶

Wēn Jīng Tāng (Warm the Channels Decoction)

with *Wen Jing Tang*, with clinical improvements such as decreased plasma luteinizing hormone, increased 17-beta-estradiol concentration in the follicular phase, increased progesterone (66.7%) in the mid-luteal phase ($P < .05$), development of the dominant follicle ($P < .01$) and endometrium ($P < .001$), and prolongation of the luteal phase (43%, $P < .001$) as measured by basal body temperature. Furthermore, the pregnancy rate in patients desiring pregnancy was 49.5% (41/83). The study concluded *Wen Jing Tang* to be an effective treatment for luteal phase defects.¹¹

6. **Vaginitis:** According to one study, administration of *Wen Jing Tang* at 2.5g, three times daily for 2 weeks, was effective in treating 45 women with vaginitis due to various causes. Improvements included relief of sensations of burning, itching, discomfort, and pain. The study also noted that this formula may be used topically as an herbal wash or vaginal suppository.¹²

HERB-DRUG INTERACTION

Clomiphene citrate: According to one study, 16 infertile women who did not respond to clomiphene citrate alone were successfully treated with a combination of *Wen Jing Tang* and clomiphene citrate. The treatment protocol involved administration of *Wen Jing Tang* at a dose of 5 g/day every day from day 2 of the menstrual cycle, and clomiphene citrate at 150mg a day for 5 days from day 5 of the cycle. The study reported that ovulation occurred in 43.8% of the patients, and 48.6% of the cycles. No cases of ovarian hyperstimulation syndrome were observed. The researchers concluded that the combination of *Wen Jing Tang* and clomiphene citrate is an effective treatment for infertility due to anovulation, and should be used first before therapy with human menopausal gonadotropin.¹³

AUTHORS' COMMENTS

Depending on the context in which it is used, “*jing*” may be translated as “channels” (*jing mai*, channels and collaterals), or “menses” (*yue jing*, monthly menses). Therefore, *Wen Jing Tang* is translated in various texts as either “Warm the Channels Decoction” or “Warm the Menses Decoction.”

Wen Jing Tang is literally known as “Warm the Channels Decoction” because it warms and tonifies cold and

deficiency in the *chong* (thoroughfare) and *ren* (conception) channels to treat disorders such as irregular menstruation, dysmenorrhea, and *beng lou* (flooding and spotting).

Wen Jing Tang is commonly used to treat *beng lou* (flooding and spotting). In this case, it is normal for patients to experience more bleeding initially. However, after the blood stasis is resolved, the bleeding gradually will cease.

Ài Fù Nuǎn Gōng Wán

(Mugwort and Cyperus Pill for Warming the Womb)

艾附暖宫丸

艾附暖宫丸

Pinyin Name: *Ai Fu Nuan Gong Wan*

Literal Name: Mugwort and Cyperus Pill for Warming the Womb

Alternate Name: Mugwort and Cyperus Combination

Original Source: *Ren Zhai Zhi Zhi* (Straight Directions of Benevolent Aid) by Yang Tu-Ying in 1264

COMPOSITION

<i>Ai Ye</i> (Folium Artemisiae Argyi), large leaves without twigs	90g [6g]
<i>Xiang Fu</i> (Rhizoma Cyperi), <i>zhu</i> (boiled) with vinegar, <i>dao</i> (pounded) into paste, and <i>bei</i> (stone baked) till dry in low heat	180g [12g]
<i>Wu Zhu Yu</i> (Fructus Evodiae), without twigs	90g [6g]
<i>Rou Gui</i> (Cortex Cinnamomi)	15g [5g]
<i>Huang Qi</i> (Radix Astragali)	90g [6g]
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>xi</i> (washed) with liquor	90g [6g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	90g [6g]
<i>Bai Shao</i> (Radix Paeoniae Alba), <i>chao</i> (dry-fried) with liquor	90g [6g]
<i>Xu Duan</i> (Radix Dipsaci)	45g [5g]
<i>Di Huang</i> (Radix Rehmanniae), <i>xi</i> (washed) with liquor and <i>bei</i> (stone baked) till dry	30g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all of the ingredients into a fine powder and form into small pills with rice vinegar. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50-70 pills [6g] between meals with water mixed with a small amount of vinegar. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Warms the uterus and the channels
2. Nourishes the blood and activates blood circulation

CLINICAL MANIFESTATIONS

Deficiency and cold of the uterus: leukorrhea, sallow and yellowish facial complexion, painful limbs, lethargy, low energy, decreased food intake, irregular menstruation, occasional lower abdominal pain, and infertility.

CLINICAL APPLICATIONS

Irregular menstruation and female infertility.

EXPLANATION

Ai Fu Nuan Gong Wan (Mugwort and Cyperus Pill for Warming the Womb) warms the uterus and channels [*chong* (thoroughfare) and *ren* (conception) channels], nourishes the blood, and activates blood circulation.

In this formula, *Ai Ye* (Folium Artemisiae Argyi) and *Xiang Fu* (Rhizoma Cyperi) are the chief herbs. *Ai Ye* (Folium Artemisiae Argyi) warms the channels, dispels cold, and relieves pain. *Xiang Fu* (Rhizoma Cyperi) regulates qi and relieves menstrual pain. *Wu Zhu Yu* (Fructus Evodiae) and *Rou Gui* (Cortex Cinnamomi) warm the channels, dispel cold, and activate the blood. *Huang Qi* (Radix Astragali) tonifies qi and lifts yang. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Bai Shao* (Radix Paeoniae Alba) regulate menstruation by activating and nourishing the blood. *Xu Duan* (Radix Dipsaci) stops bleeding with its hemostatic action. *Di Huang* (Radix Rehmanniae) nourishes yin and promotes the secretion of body fluids.

CAUTIONS / CONTRAINDICATIONS

- The source text recommends avoiding raw or cold foods while taking *Ai Fu Nuan Gong Wan*.
- Patients should control their emotions, and avoid becoming angry or irritated.

CLINICAL STUDIES AND RESEARCH

Infertility: Use of modified *Ai Fu Nuan Gong Wan* was shown to have some effectiveness in treating 50 women with infertility. The herbal formula contained the original formula plus *Pu Huang* (Pollen Typhae), *Tu Si Zi* (Semen Cuscutae), and *Yi Mu Cao* (Herba Leonuri). The treatment protocol was to cook the herbs in water, and

Ài Fù Nuǎn Gōng Wán (Mugwort and Cyperus Pill for Warming the Womb)

Ai Fu Nuan Gong Wan (Mugwort and Cyperus Pill for Warming the Womb)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency and cold of the uterus	<ul style="list-style-type: none"> Leukorrhea, sallow and yellowish facial complexion, irregular menstruation and infertility: deficiency and cold of the uterus Lethargy, lack of energy, decreased food intake, and painful limbs: deficiency and cold 	<ul style="list-style-type: none"> Warms the uterus and channels Nourishes and activates blood 	<ul style="list-style-type: none"> <i>Ai Ye</i> (Folium Artemisiae Argyi) warms the channels, dispels cold, and relieves pain. <i>Xiang Fu</i> (Rhizoma Cyperi) regulates qi and relieves menstrual pain. <i>Wu Zhu Yu</i> (Fructus Evodiae) and <i>Rou Gui</i> (Cortex Cinnamomi) warm the channels, dispel cold, and activate the blood. <i>Huang Qi</i> (Radix Astragali) tonifies qi and lifts yang. <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), and <i>Bai Shao</i> (Radix Paeoniae Alba) regulate menstruation, and activate and nourish the blood. <i>Xu Duan</i> (Radix Dipsaci) stops bleeding. <i>Di Huang</i> (Radix Rehmanniae) nourishes yin and promotes the secretion of body fluids.

administer the decoction in three equally-divided doses daily. After 6 months of treatment, the study reported pregnancy in 25 cases, improved regularity of menstrual cycles (but not yet pregnant) in 19 cases, and no effect in 6 cases.¹ In another study, use of modified *Ai Fu Nuan Gong Wan* was effective in treating infertility due to such causes as irregular menstruation, blocked fallopian tubes, and abnormal development of the uterus. Of 72 patients, 65 successfully became pregnant, 4 had marked improvement of lower abdominal pain, and 3 had no benefit. The duration of treatment ranged from 1-12 months.²

AUTHORS’ COMMENTS

- Ai Fu Nuan Gong Wan* and *Wen Jing Tang* (Warm the Channels Decoction) have similar functions in treating deficiency and cold of the uterus:
- Ai Fu Nuan Gong Wan* more strongly nourishes the blood and warms the uterus. It treats conditions characterized by deficiency and cold of the uterus with more blood deficiency.
 - Wen Jing Tang* more strongly removes blood stagnation. It treats conditions characterized by deficiency and cold of the uterus, with both blood deficiency and blood stagnation.

Shēng Huà Tāng (Generation and Transformation Decoction)

生化湯 生化汤

Pinyin Name: *Sheng Hua Tang*

Literal Name: Generation and Transformation Decoction

Alternate Names: Blood-Producing and Clotting-Cleaning Decoction, Blood-Regenerating and Stasis-Resolving Decoction, Tangkuei and Ginger Combination

Original Source: *Fu Qing Zhu Nu Ke* (Women's Diseases According to Fu Qing-Zhu) by Fu Shan in 1827

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	24g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	9g
<i>Tao Ren</i> (Semen Persicae)	14 pieces [6g]
<i>Pao Jiang</i> (Rhizoma Zingiberis Praeparatum), <i>pao</i> (blast-fried) till black	1.5g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction by cooking the herbs in a liquid made of equal amounts of grain-based liquor and *Tong Bian* (Infantis Urina). Today the herbs are usually decocted with water, with or without the addition of a grain-based liquor.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and dispels blood stasis
2. Warms the channels and relieves pain

CLINICAL MANIFESTATIONS

Postpartum blood deficiency with cold: retention of lochia causing bleeding, and a cold sensation with pain in the lower abdomen.

CLINICAL APPLICATIONS

Postpartum care to relieve pain and stop bleeding, end retention of lochia, resolve lower abdominal pain caused

by blood stasis, hysteromyoma or metryptrophia, ectopic pregnancy, and uterine bleeding caused by abortion or miscarriage.

EXPLANATION

Sheng Hua Tang (Generation and Transformation Decoction) is designed to treat postpartum blood deficiency complicated by cold invasion and blood stasis. After delivery, the mother's body is naturally blood deficient. Consequently, the deficient state of the body enables the cold pathogenic factor to invade the body and cause cold stagnation and blood stasis, producing clinical manifestations of continuous bleeding with a cold sensation and pain in the lower abdomen.

To successfully treat this syndrome, herbs need to be prescribed to tonify postpartum blood deficiency and eliminate blood stagnation. These two methods cannot be used separately because use of only blood tonics may

Sheng Hua Tang (Generation and Transformation Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Postpartum blood deficiency with cold	<ul style="list-style-type: none"> • Postpartum bleeding: retention of lochia • Cold sensation with pain in the lower abdomen: cold accumulation and blood stagnation 	<ul style="list-style-type: none"> • Activates blood circulation and dispels blood stasis • Warms the channels and stops pain 	<ul style="list-style-type: none"> • <i>Dang Gui</i> (Radix Angelicae Sinensis) nourishes the blood and activates blood circulation. • <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activates qi and blood circulation. • <i>Tao Ren</i> (Semen Persicae) activates the blood and breaks up blood stagnation. • <i>Pao Jiang</i> (Rhizoma Zingiberis Praeparatum) warms the channels, disperses cold, and relieves pain. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Shēng Huà Tāng (Generation and Transformation Decoction)

create more blood stasis, and use of only blood-invigorating herbs will exacerbate blood deficiency. Therefore, the optimal treatment is to incorporate both methods to generate blood production and transform blood stasis.

This formula has *Dang Gui* (Radix Angelicae Sinensis) to nourish the blood and activate blood circulation. *Chuan Xiong* (Rhizoma Chuanxiong) activates qi and blood circulation. *Tao Ren* (Semen Persicae) activates blood circulation and breaks up blood stagnation. *Pao Jiang* (Rhizoma Zingiberis Praeparatum) warms the channels, disperses cold, and relieves pain. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs in this formula. Lastly, the grain-based liquor warms and opens the channels and blood vessels, and potentiates the effects of the herbs. *Tong Bian* (Infantis Urina) benefits the yang and dissolves blood stasis. Overall, this formula tonifies blood, activates blood circulation, removes blood stasis, warms the channels, and relieves pain.

MODIFICATIONS

- With postpartum abdominal pain due to blood stagnation, add *Hong Hua* (Flos Carthami) and *Bai Shao* (Radix Paeoniae Alba).
- With severe postpartum abdominal pain due to blood stagnation, add *Pu Huang* (Pollen Typhae), *Wu Ling Zhi* (Faeces Troglodyteris), and *Yan Hu Suo* (Rhizoma Corydalis).
- With postpartum lower abdominal coldness and pain, add *Rou Gui* (Cortex Cinnamomi) and *Xiao Hui Xiang* (Fructus Foeniculi).
- If the lower abdominal pain is not severe, remove *Tao Ren* (Semen Persicae).
- With postpartum fever, add *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae).
- With postpartum qi deficiency and increased risk of qi collapse, wait until after all the placental remains have been fully discharged, then add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- For postpartum constipation, add *Rou Cong Rong* (Herba Cistanches) and *Zhi Qiao* (Fructus Aurantii).

CAUTIONS / CONTRAINDICATIONS

- Use of this formula is contraindicated during pregnancy.
- Because many herbs in *Sheng Hua Tang* are warm in nature, this formula is not suitable for patients with blood stagnation accompanied by interior heat.
- Although this formula effectively treats retention of lochia, it is not necessary to use this formula for all postpartum women, as many are able to discharge placental remains smoothly. It should be used only when needed,

in cases of retention of lochia that are characterized by cold and blood stasis.¹

PHARMACOLOGICAL EFFECTS

1. **Effect on the uterus:** According to an *in vitro* study, administration of *Sheng Hua Tang* was associated with increased uterine contractions in mice, especially pregnant ones.²
2. **Anticoagulant:** An *in vitro* study showed *Sheng Hua Tang* to have a marked anticoagulant effect.³

CLINICAL STUDIES AND RESEARCH

1. **Postpartum care:** *Sheng Hua Tang* has been used as the standard herbal therapy for postpartum care in traditional Chinese medicine, with its actions well-documented by clinical studies. It has been shown to effectively treat retention of lochia,⁴ to facilitate return of the uterus to its normal position,⁵ to relieve pain associated with uterine contractions,⁶ and to address many postpartum complications.⁷
2. **Retention of lochia:** Retention of lochia was successfully treated in 32 of 34 patients using *Sheng Hua Tang* plus *Zhi Qiao* (Fructus Aurantii), and others as needed.⁸
3. **Hysteromyoma or metryptrophia:** Hysteromyoma or metryptrophia were treated successfully using *Sheng Hua Tang* plus dry-fried *Jing Jie* (Herba Schizonepetae) and *Yi Mu Cao* (Herba Leonuri) as the base formula, and the addition of *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Rou Gui* (Cortex Cinnamomi) for hardness and nodules. Of 24 patients with hysteromyoma, the study reported complete recovery in 8 cases, improvement in 13 cases, and no effect in 3 cases, after 30 packs of herbs. Of 46 patients with metryptrophia, the study reported complete recovery in 25 cases, improvement in 18 cases, and no effect in 3 cases, after 30 packs of herbs.⁹
4. **Ectopic pregnancy:** One study reported successful treatment in all 21 cases of ectopic pregnancy using modified *Sheng Hua Tang*, with the removal of *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Pao Jiang* (Rhizoma Zingiberis Praeparatum), and the addition of *Gui Zhi* (Ramulus Cinnamomi), *Fu Ling* (Poria), *Chi Shao* (Radix Paeoniae Rubra), *Mu Dan Pi* (Cortex Moutan), and others as needed.¹⁰
5. **Uterine bleeding caused by abortion or miscarriage:** Many studies have reported a marked effect using modified *Sheng Hua Tang* to treat uterine bleeding due to various causes. In one study, use of *Sheng Hua Tang* and *Shi Xiao San* (Sudden Smile Powder) in 80 patients with uterine bleeding was associated with complete recovery in 72 cases, improvement in 6 cases, and no effect in 2 cases.¹¹ According to another report, 90 patients with

Shēng Huà Tāng (Generation and Transformation Decoction)

uterine bleeding associated with abortion, miscarriage, or labor were treated with *Sheng Hua Tang* plus *Yi Mu Cao* (Herba Leonuri), *Pu Huang* (Pollen Typhae), and *Xue Yu Tan* (Crinis Carbonisatus) with good results. The duration of treatment was 5 packs of herbs per course of treatment, with most patients needing only one course of treatment.¹² Lastly, use of *Sheng Hua Tang* plus *Pu Gong Ying* (Herba Taraxaci), *Yi Mu Cao* (Herba Leonuri), and *E Jiao* (Colla Corii Asini) was associated with complete recovery in 31 of 36 patients with uterine bleeding caused by abortion. The duration of treatment ranged from 3-6 packs of herbs.¹³

Wang Bu Liu Xing (Semen Vaccariae)

Yin Yang Huo (Herba Epimedii)

Tong Ru Wan (Unblock the Breast Pill) activates qi and blood circulation and unblocks stagnation in the breast.

Historically, this formula has been used primarily to promote lactation and facilitate nursing. Today, it may also be used to promote optimal growth and development of the breast.

AUTHORS' COMMENTS

Sheng Hua Tang dispels blood stasis and treats retention of lochia with lower abdominal coldness and pain. This widely-used formula is one of the most popular postpartum formulas in China today for clearing blood stasis. In certain parts of China, it is customary to give this formula immediately after delivery to ensure successful discharge of placental remnants.

Guì Zhī Fú Líng Wán (Cinnamon Twig and Poria Pill)

桂枝茯苓丸

Pinyin Name: *Gui Zhi Fu Ling Wan*

Literal Name: Cinnamon Twig and Poria Pill

Alternate Names: *Kuei Chih Fu Ling Wan*, *Qui Zhi Fu Ling Wang*, Cinnamon Twig and Hoelen Pill, Cinnamon and Hoelen Formula

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Gui Zhi</i> (Ramulus Cinnamomi)	[6g]
<i>Fu Ling</i> (Poria)	[6g]
<i>Tao Ren</i> (Semen Persicae)	[6g]
<i>Mu Dan Pi</i> (Cortex Moutan)	[6g]
<i>Chi Shao</i> (Radix Paeoniae Rubra)	[6g]

Note: The source text uses *Shao Yao* (Radix Paeoniae) in this formula, without specifying whether it is *Chi Shao* (Radix Paeoniae Rubra) or *Bai Shao* (Radix Paeoniae Alba). Today, *Chi Shao* (Radix Paeoniae Rubra) is usually used, as it has a better effect than *Bai Shao* (Radix Paeoniae Alba) to invigorate blood circulation and clear heat.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the ingredients into powder and mix with honey to form into pills. The pills should resemble rabbit droppings in size. Take 1 pill before meals. If there is no response, increase to 3 pills per dose. Today this formula may be given in decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Activates blood circulation and breaks up blood stasis
2. Disperses the formation of abnormal masses in the abdomen

CLINICAL MANIFESTATIONS

Blood stasis in the uterus (during pregnancy): instability of the fetus, continuous dripping of purplish-black blood, and abdominal pain that is worse with pressure.

CLINICAL APPLICATIONS

Hysteromyoma, oophoritic cyst, endometriosis, adnexitis, uterine myomas, uterine fibroids, ovarian cysts, lochioschesis, perimenopause with uterine leiomyomas, pelvic inflammatory disease, dysmenorrhea, amenorrhea, irregular menstruation, premenstrual syndrome, ectopic pregnancy, instability of the fetus, stillbirth, postpartum disorders, prostatic hypertrophy, male infertility with varicocele, post-ischemic brain injury, and scleroderma.

EXPLANATION

Gui Zhi Fu Ling Wan (Cinnamon Twig and Poria Pill) treats blood stasis in the womb during pregnancy. In such circumstances, blood stasis causes dripping of blood and instability of the fetus. If the blood stasis is not cleared, then the dripping of blood continues and the pregnancy will be adversely affected. However, blood-invigorating herbs must be used with extreme caution as they increase the risks of miscarriage. This formula is designed to gently and safely eliminate blood stasis and abdominal masses, without injuring the fetus or the mother.

In this formula, *Gui Zhi* (Ramulus Cinnamomi) warms the blood and opens the vessels to facilitate the smooth flow of blood. *Fu Ling* (Poria) has a draining effect, which guides blood stasis downward and eliminates it. *Fu Ling* (Poria) also strengthens the Heart and Spleen with its tonic effect, which helps to stabilize pregnancy and calm the fetus. *Tao Ren* (Semen Persicae) treats the underlying cause of the disorder by activating blood circulation and breaking up blood stasis. Blood stasis or masses in the abdomen may produce heat after an extended period; therefore, *Mu Dan Pi* (Cortex Moutan) and *Chi Shao* (Radix Paeoniae Rubra) are used to both activate blood circulation and clear the heat. The herbs are mixed with honey and administered as pills to moderate their potency and provide a gradual, gentle, and sustained effect over a long period of time.

MODIFICATIONS

- With menstrual pain and cramps, add *Xiang Fu* (Rhizoma Cyperi), *Chen Pi* (Pericarpium Citri Reticulatae), and *Yan Hu Suo* (Rhizoma Corydalis).
- With amenorrhea, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Hong Hua* (Flos Carthami).
- With severe dysmenorrhea, add *Shi Xiao San* (Sudden Smile Powder) and *Yan Hu Suo* (Rhizoma Corydalis).

Guì Zhī Fú Líng Wán (Cinnamon Twig and Poria Pill)

Gui Zhi Fu Ling Wan (Cinnamon Twig and Poria Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood stasis in the uterus (during pregnancy)	Instability of the fetus, continuous uterine bleeding, and abdominal pain that worsens with pressure: blood stasis in the womb during pregnancy	<ul style="list-style-type: none"> • Activates blood circulation and breaks up blood stasis • Disperses abnormal masses formation in the abdomen 	<ul style="list-style-type: none"> • <i>Gui Zhi</i> (Ramulus Cinnamomi) warms the blood and opens the vessels to facilitate blood circulation. • <i>Fu Ling</i> (Poria) eliminates and guides blood stasis downward. It also strengthens the Heart and Spleen to calm the fetus and stabilize pregnancy. • <i>Tao Ren</i> (Semen Persicae) activates blood circulation and breaks up blood stasis. • <i>Mu Dan Pi</i> (Cortex Moutan) and <i>Chi Shao</i> (Radix Paeoniae Rubra) activate blood circulation and clear heat.

- With severe blood stasis, add *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).

CAUTIONS / CONTRAINDICATIONS

- *Gui Zhi Fu Ling Wan* gently treats blood stasis accompanied by minor presentation of heat. This formula is not suitable for serious conditions of blood stagnation, excess heat in the blood, and the absence of blood stasis.
- Patients with blood stasis and a deficient constitution should use *Dang Gui Shao Yao San* (Tangkuai and Peony Powder) instead of *Gui Zhi Fu Ling Wan*.
- Use of this formula has occasionally been associated with side effects such as abdominal distention and mild constipation.¹

PHARMACOLOGICAL EFFECTS

1. **Antiplatelet:** According to clinical studies, administration of *Gui Zhi Fu Ling Wan* was associated with a marked antiplatelet effect, with potency similar to or greater than aspirin.² In addition, use of *Gui Zhi Fu Ling Wan* was associated with reduced blood viscosity. The onset of therapeutic action began 30 minutes after oral ingestion, and lasted up to 180 minutes.³ This formula, however, does not seem to have a significant effect on prothrombin time (PT).⁴
2. **Anti-inflammatory:** A bolus dose of *Gui Zhi Fu Ling Wan* (60 g/kg via oral ingestion or 10 g/kg via intraperitoneal injection) was associated with a marked anti-inflammatory effect in mice. The onset of action began approximately 30 minutes after administration, and lasted for up to 72 hours. It was proposed that the mechanism of this anti-inflammatory action is not related to the adrenal glands or glucocorticoids, because long-term use of this formula did not contribute to increased adrenal glands weight. Furthermore, in subjects whose adrenal glands had been surgically removed, *Gui Zhi Fu Ling Wan* had marked anti-inflammatory effect.⁵

3. **Endocrine:** Administration of *Gui Zhi Fu Ling Wan* to rats at 300 mg/kg for 14 days was associated with a marked reduction of LH and FSH.⁶ *Gui Zhi Fu Ling Wan* has been shown to act as an LH-RH antagonist and/or as a weak anti-estrogen.⁷
4. **Nephroprotective:** One study reported a marked effect in retarding the progression of renal damage by administering *Gui Zhi Fu Ling Wan* to rats with diabetic nephropathy. The mechanism of this nephroprotective effect was attributed to its ability to improve metabolic abnormalities associated with diabetes.⁸
5. **Antioxidative:** Two studies reported that *Gui Zhi Fu Ling Wan* has a dose-dependent antioxidative effect to prevent the progression of atherosclerosis in cholesterol-fed rabbits.^{9,10}
6. **Effect on uterine adenomyosis:** One study reported marked effects using *Gui Zhi Fu Ling Wan* to prevent and treat mice with uterine adenomyosis, a condition characterized by the abnormal growth of glands and stroma into and beyond the smooth muscle layers of the uterus. The study suggested *Gui Zhi Fu Ling Wan* to be a useful tool for the treatment of uterine adenomyosis in humans as well.¹¹

CLINICAL STUDIES AND RESEARCH

1. **Pelvic inflammatory disease:** Administration of modified *Gui Zhi Fu Ling Wan* was associated with marked effectiveness in treating 200 patients with pelvic inflammatory disease. The herbal treatment contained this formula plus *Xiang Fu* (Rhizoma Cyperi), *Yan Hu Suo* (Rhizoma Corydalis), and *Dang Gui* (Radix Angelicae Sinensis).¹²
2. **Hysteromyoma:** One study reported 90% effectiveness using modified *Gui Zhi Fu Ling Wan* to treat hysteromyoma. The herbal formula contained *Gui Zhi Fu Ling Wan* plus *Chuan Shan Jia* (Squama Manis), *Gui Ban* (Plastrum Testudinis), *Bie Jia* (Carapax Trionycis), *E Zhu* (Rhizoma Curcumae), *San Leng* (Rhizoma Sparganii),

Guì Zhī Fú Líng Wán (Cinnamon Twig and Poria Pill)

and others. The treatment protocol was to begin herbal therapy starting three days after the last day of the period. The herbs were first cooked in water and concentrated to yield 100 mL of solution. This 100 mL was used as a rectal instillation. The same herbs were cooked again to yield 300 mL of herbal decoction, which was taken orally in two equally-divided doses, morning and night. Each course of treatment was 30 days. Of 40 patients, the study reported complete recovery in 4 cases, significant improvement in 14 cases, moderate improvement in 18 cases, and no effect in 4 cases.¹³

3. **Oophoritic cysts:** Use of herbs in 300 patients with oophoritic cysts was associated with a 95% rate of effectiveness. The herbal treatment contained *Gui Zhi Fu Ling Wan*, *Huang Yao Zi* (Herba Dioscoreae Bulbiferae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Shui Zhi* (Hirudo), *Li Zhi He* (Semen Litchi), and *Wu Yao* (Radix Linderiae). The herbs were cooked in water, and the decoction was taken in four equally-divided doses daily. Also, *Da Huang Zhe Chong Wan* (Rhubarb and Eupolyphaga Pill) was given twice daily, morning and night. The duration of treatment ranged from 3-6 months. Of 300 patients, the study reported complete recovery in 225 cases, improvement in 30 cases, and no effect in 15 cases. Information was unavailable on 30 patients who did not complete the study.¹⁴
4. **Endometriosis:** One study reported marked success in treating endometriosis in 38 patients using *Gui Zhi Fu Ling Wan* plus *Da Huang* (Radix et Rhizoma Rhei) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Modifications were made by adding *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Chuan Shan Jia* (Squama Manis) in severe cases; *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *Lu Lu Tong* (Fructus Liquidambaris) for severe pain; large doses of *Da Huang* (Radix et Rhizoma Rhei) and *Tao Ren* (Semen Persicae) for constipation; *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for generalized weakness and qi deficiency; and *Dang Gui* (Radix Angelicae Sinensis), *Xiang Fu* (Rhizoma Cyperi), and *Yi Mu Cao* (Herba Leonuri) for irregular menstruation.¹⁵

According to a case report, use of *Gui Zhi Fu Ling Wan* in treating one endometriotic patient controlled the disorder and kept the patient symptom-free for more than 7 months. Furthermore, the study reported a decrease in specific IgM antibody titer without any suppression of serum CA-125 and estradiol levels.¹⁶

5. **Adnexitis:** Twenty patients with chronic adnexitis were treated with 90.3% effectiveness using modified *Gui Zhi Fu Ling Wan*. The duration of treatment ranged from 8-50 packs of herbs. Of 20 patients, the study reported

complete recovery in 6 cases, improvement in 12 cases, and no effect in 2 cases.¹⁷

6. **Uterine myomas:** Of 110 premenopausal patients with uterine myomas, administration of *Gui Zhi Fu Ling Wan* was associated with improving hypermenorrhea and dysmenorrhea in more than 90% of the cases, and shrinking uterine myomas in approximately 60% of the cases. The study proposed that *Gui Zhi Fu Ling Wan* might act as an LH-RH antagonist and a weak anti-estrogen on uterine DNA synthesis.¹⁸
7. **Premenstrual syndrome (PMS):** Administration of *Gui Zhi Fu Ling Wan* in 20 patients with premenstrual syndrome was associated with 80% effectiveness. The herbs were given in powder form, with a dose of 5g per day. Of 20 patients, the study reported marked effectiveness in 6 cases, slight improvement in 10 cases, and no effect in 4 cases. The improvements were primarily associated with relief of pain in the low back and lower abdominal regions.¹⁹
8. **Amenorrhea:** According to one study, administration of *Gui Zhi Fu Ling Wan* was associated with a marked effect in treating amenorrhea in 20 patients with 2 months to 3 years history of illness. The study reported menstruation in 8 cases after 1-3 packs of herbs, in 7 cases after 4-6 packs of herbs, and no change in 5 cases.²⁰
9. **Perimenopause with uterine leiomyomas:** One study investigated the treatment of uterine leiomyomas in 30 perimenopausal women using Chinese herbal medicines and synthetic analogs of gonadotropin-releasing hormone. The Chinese herbs used included *Gui Zhi Fu Ling Wan* and *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction). The drugs used included buserelin and nafarelin given via intranasal administration. The study reported a reduction in leiomyomas (less than 60%), along with decreases in the serum levels of luteinizing hormone, follicle-stimulating hormone, estradiol, and the tumor marker CA-125. Side effects noted included slight bone loss and hypermenorrhea and/or dysmenorrhea. The study concluded that this combination of drugs and herbs could be beneficial in the treatment of uterine leiomyomas in patients a few years before menopause.²¹
10. **Prostatic hypertrophy:** According to one study, 31 patients with prostatic hypertrophy were treated with herbs resulting in recovery in 7 cases, improvement in 21 cases, and no effect in 3 cases. The herbal formula contained *Gui Zhi Fu Ling Wan* plus *Ju He* (Semen Citri Reticulatae), *Niu Xi* (Radix Achyranthis Bidentatae), *Hai Zao* (Sargassum), *Tu Bie Chong* (Eupolyphaga seu Steleophaga), *Huang Qi* (Radix Astragali), and others as needed.²²
11. **Male infertility with varicocele:** According to one study, use of *Gui Zhi Fu Ling Wan* (7.5 g/day) for at least 3

Guì Zhī Fú Líng Wán (Cinnamon Twig and Poria Pill)

months was associated with marked success in treating male infertility with varicocele in 37 patients. The study reported an 80% disappearance rate (40 out of 50 varicoceles) for varicocele, 71.4% improvement in sperm concentration, and 62.1% improvement in sperm motility. The researchers considered *Gui Zhi Fu Ling Wan* to be an effective therapy for circulation disorders in varicocele as well as semen quality.²³

12.RBC (red blood cell) deformability: Deterioration of RBC deformability and viscoelasticity is a condition often associated with the traditional Chinese diagnosis of “blood stasis syndrome.” According to one study, the therapeutic effects of *Gui Zhi Fu Ling Wan* and pentoxifylline were compared in the treatment of multiple lacunar infarctions. Of 30 male patients, 18 were treated with 12g of *Gui Zhi Fu Ling Wan* daily for 4 weeks, and 12 were treated with pentoxifylline 300mg daily for 4 weeks. The study reported that *Gui Zhi Fu Ling Wan* had a significant effect on RBC deformability and increased intracellular ATP content, and was more effective than pentoxifylline for patients with more severe “blood stasis syndrome.”²⁴

13.Post-ischemic brain injury: According to one study, administration of three herbal formulas minimized post-ischemic brain injury by inhibiting free radicals and lipid peroxidation. The formulas that were found to be effective, both *in vitro* and *in vivo*, were *Gui Zhi Fu Ling Wan*, *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), and *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction).²⁵

14.Scleroderma: According to one study that examined fibroblasts from 3 scleroderma patients and 2 normal controls, the use of *Gui Zhi Fu Ling Wan* significantly and selectively inhibited collagen synthesis in a dose-dependent manner, with a tendency for a stronger effect on scleroderma fibroblasts than on control cells.²⁶

HERB-DRUG INTERACTION

Drug-induced menopause: One study evaluated the therapeutic effects of herbal medicines on menopausal symptoms induced by gonadotropin-releasing hormone-agonist therapy in Japanese women with endometriosis, adenomyosis, or leiomyoma. According to this study, menopausal symptoms induced by gonadotropin-releasing hormone-agonist therapy in 13 patients were successfully treated with *Gui Zhi Fu Ling Wan*, *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), *Jia Wei Xiao Yao San* (Augmented Rambling Powder), *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi), or

Gui Zhi Tang (Cinnamon Twig Decoction). Most importantly, there were no significant changes in serum estradiol levels after treatment with these herbal medicines. The researchers concluded that these herbal medicines can be recommended for menopausal symptoms induced by gonadotropin-releasing hormone agonists without a negative effect on serum estradiol levels.²⁷

TOXICOLOGY

Gui Zhi Fu Ling Wan has very little toxicity. Oral ingestion of this formula at 250 g/kg (maximum capacity of the stomach) in mice for one week did not cause any fatalities or abnormal reactions.²⁸

RELATED FORMULAS

Duó Míng Wán (Life-Taking Pill)

Mu Dan Pi (Cortex Moutan)

Tao Ren (Semen Persicae)

Chi Shao (Radix Paeoniae Rubra)

Duo Ming Wan (Life-Taking Pill) has the same ingredients as *Gui Zhi Fu Ling Wan*, but in larger doses. The source text states to prepare this formula in pills, and administer 1 pill the size of a large bullet per dose with vinegar, for two consecutive doses.

This formula is used to treat cases in which a deceased fetus remains in the uterus, and the patient shows “fetus arresting the Heart” syndrome. This acute, serious condition is characterized by an extremely stuffy sensation in the chest, spontaneous cold sweating, and rapid and difficult breathing. This formula is taken with vinegar, which functions to constrict the body to relieve sweating and soften the stagnation to help eliminate the dead fetus.

Cui Sheng Tang (Birth-Hastening Decoction) has the same ingredients as *Guì Zhi Fú Ling Wán*, but is given as a decoction.

This formula induces and facilitates delivery once the amniotic sac has been broken. However, it should be used only in patients with a strong, healthy constitution. It is given in decoction to provide a more immediate onset of action.

AUTHORS' COMMENTS

Guì Zhi Fú Ling Wán is commonly used to treat pregnant women with blood stasis in the uterus or lochia that manifests in dark black blood and low abdominal pain that worsens with pressure. Classic textbooks suggest that the dosage must be strictly followed, starting at one pill per dosage. If there is no response, the dosage may be increased up to three pills per dose. The dosage must never be drastically increased in an attempt to achieve an immediate effect. This condition can only be treated with low doses of herbs to gently dissolve and disperse blood stasis. Furthermore, this formula is prepared in honey pill form, as this dosage form slowly releases the ingredients for absorption to provide a gradual, gentle, and sustained effect for a long period of time.

Guì Zhi Fú Ling Wán treats blood stagnation in the womb, yet it is named after *Guì Zhi* (Ramulus Cinnamomi) and *Fu Ling* (Poria), but not any of the blood-invigorating herbs in this formula, such as *Tao Ren* (Semen Persicae), *Chi Shao* (Radix Paeoniae Rubra) or *Mu Dan Pi* (Cortex Moutan). This signifies that blood stagnation in the womb is a delicate situation that cannot simply be treated with herbs that activate blood circulation. Instead, *Guì Zhi* (Ramulus Cinnamomi) must be used to warm and open the blood vessels to create an “entry” for the blood-invigorating herbs to reach the affected area, and *Fu Ling* (Poria) needs to be used to provide an “exit” to guide and eliminate blood stasis downward. Furthermore, *Guì Zhi* (Ramulus Cinnamomi) and *Fu Ling* (Poria) are very gentle, and will not harm either the mother or the fetus.

In addition to the original clinical application (blood stasis during pregnancy), this formula is now used to treat various disorders characterized by blood stasis:

- This formula can also be used for irregular menstruation, post-menstrual abdominal pain, or continuous spotting

of blood after delivery, with abdominal pain that is worse with pressure.

- This formula also is effective for amenorrhea due to blood stasis in which the patient experiences abdominal fullness and pain that increase with palpation and pressure. Immobile masses in the lower abdomen are indicative of blood stasis, with dark and purplish blood reflecting the same diagnosis. Furthermore, blood stasis is often accompanied by signs and symptoms such as flushed face, abdominal fullness and pain (pain increases with palpation or pressure), headache, shoulder stiffness, dizziness, and cold feet.
- This formula is also effective for dysmenorrhea due to blood stasis in the uterus, with symptoms such as blood stasis, uterine bleeding of dark purplish blood, abdominal fullness and pain (pain increases with pressure or palpation), immobile masses in the lower abdomen with pain and tenderness, and abdominal pain caused by abnormal abdominal masses or previous blood stasis in the uterus.

<i>Tao Ren</i> (Semen Persicae)	3g
<i>Hong Hua</i> (Flos Carthami)	1.5g
<i>Mu Dan Pi</i> (Cortex Moutan)	1.5g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	2.4g
<i>Bai Shao</i> (Radix Paeoniae Alba)	3g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	2.4g
<i>Yan Hu Suo</i> (Rhizoma Corydalis)	1.5g
<i>Chuan Niu Xi</i> (Radix Cyathulae)	2.4g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	0.3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook all ingredients in 2.5 bowls of water until reduced to 1.5 bowls. Take the strained decoction while warm.

CLINICAL MANIFESTATIONS

Blood stagnation in the lower *jiao*: acute or chronic pain in the lower abdominal region and lower back, vertigo, headache, irregular menstruation, dysmenorrhea, and amenorrhea.

CLINICAL APPLICATIONS

Irregular menstruation, dysmenorrhea, inflammation of the uterus or ovaries, endometriosis, and pelvic inflammatory disease.

EXPLANATION

Zhe Chong Yin (Break the Conflict Decoction) treats blood stagnation in the lower *jiao*, that interferes with normal menstruation and causes severe pain. Because of blood stagnation, patients may experience sharp, stabbing

Zhé Chōng Yīn (Break the Conflict Decoction)

Zhe Chong Yin (Break the Conflict Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Blood stagnation in the lower <i>jiao</i>	<ul style="list-style-type: none">• Sharp, stabbing pain in a fixed location: blood stagnation in the lower <i>jiao</i>• Irregular menstruation, dysmenorrhea, and amenorrhea: blood stagnation affecting menstruation	<ul style="list-style-type: none">• Activates blood circulation and dispels blood stasis• Disperses stagnation and clears obstruction	<ul style="list-style-type: none">• <i>Gui Zhi</i> (Ramulus Cinnamomi) promotes circulation of yang qi and dispels stagnation in the lower <i>jiao</i>.• <i>Tao Ren</i> (Semen Persicae) and <i>Hong Hua</i> (Flos Carthami) activate blood, dispel blood stasis, and relieve pain.• <i>Mu Dan Pi</i> (Cortex Moutan) promotes both qi and blood circulation to disperse stagnation.• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Bai Shao</i> (Radix Paeoniae Alba), and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) tonify the blood, move blood circulation, and relieve pain.• <i>Yan Hu Suo</i> (Rhizoma Corydalis) and <i>Chuan Niu Xi</i> (Radix Cyathulae) activate qi and blood circulation and relieve pain.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

pain in a fixed location. In addition, blood stagnation impairs the normal flow of blood, leading to irregular menstruation, dysmenorrhea, and amenorrhea. This formula also can be used to treat blood stagnation in the lower *jiao* following a miscarriage.

This formula contains many herbs that activate blood circulation, eliminate blood stasis, and disperse obstruction. *Gui Zhi* (Ramulus Cinnamomi) promotes the circulation of yang qi and dispels stagnation in the lower *jiao*. *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) activate blood circulation, dispel blood stasis, and relieve pain. *Mu Dan Pi* (Cortex Moutan) promotes both qi and blood circulation to disperse stagnation. *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) tonify the blood, move blood circulation, and relieve pain. *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Niu Xi* (Radix

Cyathulae), in addition to activating qi and blood circulation, also relieve pain. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs. Overall, this is one of the best formulas for treating various obstetric and gynecological disorders characterized by blood stagnation in the lower *jiao*.

MODIFICATIONS

- With blood stagnation during menstruation, add *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- With painful menstruation, add *Xiang Fu* (Rhizoma Cyperi) and *Ai Ye* (Folium Artemisiae Argyi).
- With dizziness and vertigo during menstruation, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- With painful menstruation due to wind and cold, add *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).
- With abdominal pain after delivery, add *Sheng Hua Tang* (Generation and Transformation Decoction).

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to first mix 3kg (3,000 grams) of burnt ash with 10kg (10,000 grams) of grain-based liquor. Then filter out and discard the burnt ash. Add *Bie Jia* (Carapax Trionycis) to the strained liquid and cook it until the mixture becomes a thick paste. The remaining 22 herbs are ground into a fine powder, then mixed with this herbal paste and *Feng Mi* (Mel) to make small pills. Take 3g of pills three times daily.

CHINESE THERAPEUTIC ACTIONS

1. Activates qi and blood circulation
2. Dispels dampness and dissolves phlegm
3. Softens hardness and resolves masses

CLINICAL MANIFESTATIONS

Malaria with splenomegaly: chronic malaria with enlarged spleen, hypochondriac distention, immobile masses in the hypochondrium, abdominal pain, muscle wasting,

decreased food intake, alternation of fever and chills, and amenorrhea.

CLINICAL APPLICATIONS

Splenomegaly, hepatomegaly, hepatitis, liver cirrhosis, and liver cancer.

EXPLANATION

Bie Jia Jian Wan (Soft-Shelled Turtle Shell Pill) historically was used to treat malaria with splenomegaly. Today, it is used to treat abdominal masses. Because of the chronic nature of this illness, there will be signs of qi and yang deficiencies, qi and blood stagnation, and damp and phlegm accumulation. The formation of masses may occur in the abdomen, hypochondrium, or in the form of splenomegaly.

In this formula, *Bie Jia* (Carapax Trionycis) softens nodules and resolves masses. The burnt ash and grain-

Malaria with splenomegaly	<ul style="list-style-type: none"> • Alternation of fever and chills and hypochondriac distention: malaria • Immobile masses in the hypochondrium and abdominal pain: damp and phlegm accumulation • Muscle wasting and decreased food intake: underlying qi and blood deficiencies 	<ul style="list-style-type: none"> • Activates qi and blood circulation • Disperses dampness and dissolves phlegm • Softens hardness and resolves masses 	<ul style="list-style-type: none"> • <i>Bie Jia</i> (Carapax Trionycis) softens nodules and resolves masses. • <i>Da Huang</i> (Radix et Rhizoma Rhei), <i>Mang Xiao</i> (Natrii Sulfas), <i>Tu Bie Chong</i> (Eupolyphaga seu Steleophaga), <i>Qiang Lang</i> (Catharsium Molossus), and <i>Shu Fu</i> (Armadillidium Vulgare) break up blood stasis and resolve masses. • <i>Chai Hu</i> (Radix Bupleuri), <i>Huang Qin</i> (Radix Scutellariae), and <i>Bai Shao</i> (Radix Paeoniae Alba) harmonize the <i>shaoyang</i> and regulate Liver qi circulation. • <i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>She Gan</i> (Rhizoma Belamcandae), <i>Ting Li Zi</i> (Semen Descurainiae seu Lepidii), and <i>Ban Xia</i> (Rhizoma Pinelliae) regulate qi and dispel phlegm. • <i>Gan Jiang</i> (Rhizoma Zingiberis) and <i>Gui Zhi</i> (Ramulus Cinnamomi) warm the body. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>E Jiao</i> (Colla Corii Asini) tonify qi and nourish blood. • <i>Tao Ren</i> (Semen Persicae), <i>Mu Dan Pi</i> (Cortex Moutan), <i>Ling Xiao Hua</i> (Flos Campsis) and <i>Feng Fang</i> (Nidus Vespae) activate blood circulation and remove blood stasis. • <i>Qu Mai</i> (Herba Dianthi) and <i>Shi Wei</i> (Folium Pyrrosiae) regulate water circulation and dispel dampness.

based liquor help *Bie Jia* (Carapax Trionycis) activate blood circulation, remove blood stasis, soften nodules, and resolve masses. *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas), *Tu Bie Chong* (Eupolyphaga seu Steleophaga), *Qiang Lang* (Catharsium Molossus), and *Shu Fu* (Armadillidium Vulgare) break up blood stasis and resolve masses. *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), and *Bai Shao* (Radix Paeoniae Alba) harmonize the *shaoyang* and regulate Liver qi circulation. *Hou Po* (Cortex Magnoliae Officinalis), *She Gan* (Rhizoma Belamcandae), *Ting Li Zi* (Semen Descurainiae seu Lepidii), and *Ban Xia* (Rhizoma Pinelliae) regulate qi and dispel phlegm. *Gan Jiang* (Rhizoma Zingiberis) and *Gui Zhi* (Ramulus Cinnamomi) warm the body. *Ren Shen* (Radix et Rhizoma Ginseng) and *E Jiao* (Colla Corii Asini) tonify qi and nourish the blood. *Tao Ren* (Semen Persicae), *Mu Dan Pi* (Cortex Moutan), *Ling Xiao Hua* (Flos Campsis), and *Feng Fang* (Nidus Vespae) activate blood circulation and remove blood stasis. *Qu Mai* (Herba Dianthi) and

Shi Wei (Folium Pyrrosiae) regulate water circulation and dispel dampness. Overall, this formula has a good balance of warm and cold, tonifying and sedating, and qi- and blood-activating herbs.

MODIFICATIONS

- With general weakness and deficiency, add *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Dang Gui* (Radix Angelicae Sinensis).
- With decreased food intake and indigestion, add *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

CAUTIONS / CONTRAINDICATIONS

Bie Jia Jian Wan contains many herbs that strongly activate qi and blood circulation, dispel dampness, and dissolve phlegm. It should be used with caution in patients with *zheng* (upright) qi deficiency.

Dà Huáng Zhè Chóng Wán (Rhubarb and Eupolyphaga Pill)

大黃蟪蟲丸

大黃蟪虫丸

Pinyin Name: *Da Huang Zhe Chong Wan*

Literal Name: Rhubarb and Eupolyphaga Pill

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-jing in the Eastern Han Dynasty

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei), <i>zheng</i> (steamed)	300g
<i>Tu Bie Chong</i> (Eupolyphaga seu Steleophaga)	0.5 cup [30g]
<i>Tao Ren</i> (Semen Persicae)	1 cup [60g]
<i>Gan Qi</i> (Resina Toxicodendri)	30g
<i>Qi Cao</i> (Holotrichia)	1 cup [60g]
<i>Shui Zhi</i> (Hirudo)	100 pieces [60g]
<i>Meng Chong</i> (Tabanus)	1 cup [60g]
<i>Huang Qin</i> (Radix Scutellariae)	60g
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	1 cup [60g]
<i>Di Huang</i> (Radix Rehmanniae)	300g
<i>Bai Shao</i> (Radix Paeoniae Alba)	120g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	90g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all ingredients into a fine powder and form into pills with honey. The pills should resemble small beans in size. Take 5 pills with grain-based liquor three times daily. Today this formula is usually given in pills, 3g per dose, with warm water.

CHINESE THERAPEUTIC ACTIONS

1. Breaks up and dispels blood stasis
2. Generates new blood

CLINICAL MANIFESTATIONS

Extreme deficiency: emaciation, abdominal distention with an inability to eat, dry, rough and scaly skin, and dark appearance of the eyes with no spirit. These injuries result from the five consumptive lifestyles.

CLINICAL APPLICATIONS

Chronic hepatitis, liver fibrosis, liver cirrhosis, liver cancer, tubercular peritonitis, uterine leiomyoma, and esophageal varices.

EXPLANATION

Da Huang Zhe Chong Wan (Rhubarb and Eupolyphaga Pill) treats individuals with extreme deficiency and debility from the five consumptive lifestyles, including over-eating, extreme hunger, depression, excessive drinking,

and excessive sexual activity. Extreme deficiency and debility cause a condition known as “dried blood,” which is characterized by heat drying up yin and blood leading to blood stasis. The condition is characterized by emaciation and weight loss because of extreme deficiency and debility. The “dried blood” is unable to nourish the skin and eyes; thus, the skin becomes dry, rough and scaly, and the eyes have a dark appearance with no spirit.

This condition requires herbs that break up and dispel blood stasis and promote the generation of new blood. In this formula, *Da Huang* (Radix et Rhizoma Rhei) and *Tu Bie Chong* (Eupolyphaga seu Steleophaga) act as the chief herbs to drain blood stasis, cool the blood, and clear heat. *Tao Ren* (Semen Persicae), *Gan Qi* (Resina Toxicodendri), *Qi Cao* (Holotrichia), *Shui Zhi* (Hirudo), and *Meng Chong* (Tabanus) assist the chief herbs to activate blood circulation and eliminate blood stasis in the channels and collaterals. *Huang Qin* (Radix Scutellariae) is paired with *Da Huang* (Radix et Rhizoma Rhei) to clear heat caused by stagnation. *Ku Xing Ren* (Semen Armeniacae Amarum) is paired with *Tao Ren* (Semen Persicae) to moisten dryness, remove blood stasis, and redirect qi. *Di Huang* (Radix Rehmanniae) and *Bai Shao* (Radix Paeoniae Alba) tonify blood and nourish yin. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs, and prevents the harsh herbs from further damaging the body.

Dà Huáng Zhè Chóng Wán (Rhubarb and Eupolyphaga Pill)

Da Huang Zhe Chong Wan (Rhubarb and Eupolyphaga Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Extreme deficiency due to the five consumptions	Emaciation, abdominal distention with an inability to eat, dry, rough and scaly skin, and dark appearance of the eyes: damages to yin and blood caused by “dried blood” and blood stagnation	<ul style="list-style-type: none">• Breaks up and dispels blood stasis• Generates new blood	<ul style="list-style-type: none">• <i>Da Huang</i> (Radix et Rhizoma Rhei) and <i>Tu Bie Chong</i> (Eupolyphaga seu Steleophaga) eliminate blood stasis, cool the blood, and clear heat.• <i>Tao Ren</i> (Semen Persicae), <i>Gan Qi</i> (Resina Toxicodendri), <i>Qi Cao</i> (Holotrichia), <i>Shui Zhi</i> (Hirudo), and <i>Meng Chong</i> (Tabanus) activate blood and eliminate blood stasis in the channels and collaterals.• <i>Huang Qin</i> (Radix Scutellariae) and <i>Da Huang</i> (Radix et Rhizoma Rhei) clear heat.• <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) and <i>Tao Ren</i> (Semen Persicae) moisten dryness, remove blood stasis, and redirect qi.• <i>Di Huang</i> (Radix Rehmanniae) and <i>Bai Shao</i> (Radix Paeoniae Alba) tonify blood and nourish yin.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs, and prevents the harsh herbs from further damaging the body.

CAUTIONS / CONTRAINDICATIONS

- Use of this formula may be associated with mild diarrhea. This side effect is self-limiting and does not require treatment or discontinuation of this formula. Another side effect associated with this formula is bleeding (mostly of the gums and nose). It may be necessary to discontinue this formula temporarily should bleeding become more profuse or if it lasts for a prolonged period of time.¹
- *Da Huang Zhe Chong Wan* is contraindicated during pregnancy and in women with amenorrhea due to blood deficiency.²

AUTHORS’ COMMENTS

Tu Bie Chong (Eupolyphaga seu Steleophaga) is known also as *Zhe Chong*, which explains the name of the formula, *Da Huang Zhe Chong Wan* (Rhubarb and Eupolyphaga Pill).

Although the condition this formula treats is characterized by both excess (blood stasis) and deficiency (qi and blood), the formula emphasizes eliminating blood stasis. Once this goal is accomplished, it is important to discontinue *Da Huang Zhe Chong Wan*, and treat the underlying deficiencies with a tonic formula.

This formula was originally designed to be given as pills, because blood stasis in an extremely deficient patient should be gradually softened, dispersed, and reduced. Aggressively attacking blood stasis by using potent blood-moving herbs in decoction will only create more deficiency and complications.

Shí Huī Sǎn (Ten Partially-Charred Substances Powder)

十灰散

Pinyin Name: *Shi Hui San***Literal Name:** Ten Partially-Charred Substances Powder**Original Source:** *Shi Yao Shen Shu* (Miraculous Book of Ten Remedies) by Ge Qian-Sun in 1348**COMPOSITION**

<i>Da Ji</i> (Radix Euphorbiae seu Knoxiae)	[9g]
<i>Xiao Ji</i> (Herba Cirsii)	[9g]
<i>He Ye</i> (Folium Nelumbinis)	[9g]
<i>Qian Cao</i> (Radix et Rhizoma Rubiae)	[9g]
<i>Ce Bai Ye</i> (Cacumen Platycladi)	[9g]
<i>Bai Mao Gen</i> (Rhizoma Imperatae)	[9g]
<i>Zong Lu</i> (Petiolus Trachycarpi)	[9g]
<i>Zhi Zi</i> (Fructus Gardeniae)	[9g]
<i>Da Huang</i> (Radix et Rhizoma Rhei)	[9g]
<i>Mu Dan Pi</i> (Cortex Moutan)	[9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to char to ashes equal amounts of the ingredients and grind into a fine powder. Separately pound *Ou Jie* (Nodus Nelumbinis Rhizomatis) or *Lai Fu Zi* (Semen Raphani) to obtain their juice. Take 15g of the powder per dose after meals with half a bowl of juice. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Cools the blood and stops bleeding

CLINICAL MANIFESTATIONS

Bleeding due to heat in the *xue* (blood) level: hematemesis, hemoptysis, and other sudden onset bleeding symptoms.

CLINICAL APPLICATIONS

Hematemesis, hyphema, and gastrointestinal bleeding.

EXPLANATION

Shi Hui San (Ten Partially-Charred Substances Powder) treats bleeding due to heat in the *xue* (blood) level. Interior

heat can invade the blood and force it out of the blood vessels, resulting in reckless movement of blood in various types of bleeding. Because of heat, bleeding is accompanied by bright red blood and a red or deep red tongue body.

In this formula, *Da Ji* (Radix Euphorbiae seu Knoxiae), *Xiao Ji* (Herba Cirsii), *He Ye* (Folium Nelumbinis), *Qian Cao* (Radix et Rhizoma Rubiae), *Ce Bai Ye* (Cacumen Platycladi), and *Bai Mao Gen* (Rhizoma Imperatae) cool the blood and stop bleeding. *Zong Lu* (Petiolus Trachycarpi) astringes the blood and provides immediate effect to stop bleeding. *Zhi Zi* (Fructus Gardeniae) clears heat and purges fire, while *Da Huang* (Radix et Rhizoma Rhei) drains heat and fire downwards. *Mu Dan Pi* (Cortex Moutan) has two functions in this formula: it clears heat to stop bleeding, and it activates blood circulation to prevent blood stasis. Blood activation is vital, because the sole use of stop-bleeding herbs in this case may lead to blood stagnation. The juice of *Ou Jie* (Nodus Nelumbinis Rhizomatis) or *Lai Fu Zi* (Semen Raphani) may be added to enhance the actions of clearing heat, cooling the blood, and stopping the bleeding.

Shí Huī Sǎn (Ten Partially-Charred Substances Powder)

Shi Hui San (Ten Partially-Charred Substances Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Bleeding due to heat in the <i>xue</i> (blood) level	Sudden onset bleeding: heat in the interior forcing blood out of the vessels	Cools the blood and stops bleeding	<ul style="list-style-type: none">• <i>Da Ji</i> (Radix Euphorbiae seu Knoxiae), <i>Xiao Ji</i> (Herba Cirsii), <i>He Ye</i> (Folium Nelumbinis), <i>Qian Cao</i> (Radix et Rhizoma Rubiae), <i>Ce Bai Ye</i> (Cacumen Platycladi), and <i>Bai Mao Gen</i> (Rhizoma Imperatae) cool the blood and stop bleeding.• <i>Zong Lu</i> (Petiolus Trachycarpi) astringes the blood to stop bleeding immediately.• <i>Zhi Zi</i> (Fructus Gardeniae) clears heat and purges fire.• <i>Da Huang</i> (Radix et Rhizoma Rhei) drains heat and fire downwards.• <i>Mu Dan Pi</i> (Cortex Moutan) clears heat to stop bleeding, and activates blood circulation to prevent blood stasis.• <i>Ou Jie</i> (Nodus Nelumbinis Rhizomatis) or <i>Lai Fu Zi</i> (Semen Raphani) enhances the actions of clearing heat, cooling the blood, and stopping bleeding.

All of the herbs are charred to ashes to enhance their hemostatic effect. The formula is prepared and stored in powder form so it can be administered immediately as needed.

MODIFICATION

With acute bleeding due to heat flaring up, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Zhe Shi* (Haematitum), and increase the doses of *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Zi* (Fructus Gardeniae). Administer the formula in decoction form for faster results.

CAUTIONS / CONTRAINDICATIONS

- *Shi Hui San* should be used only as a short-term therapy to stop bleeding. Once the bleeding has stopped, the cause of bleeding must be identified and treated accordingly.
- This formula is designed for bleeding caused by an excess condition of heat in the *xue* (blood) level. It is contraindicated in bleeding conditions caused by deficiency and cold.

PHARMACOLOGICAL EFFECTS

Hemostatic: One study evaluated the hemostatic effect of *Shi Hui San* prepared by various methods. Method I was to char the herbs until the smoke turned from white to yellow in color, with the herbs appearing black on the outside and dark brown on the inside. Loss of herb weight on charring was 20%. Method II was to char the herbs until the smoke turned from white to yellow to bluegreen

in color, with the herbs appearing black on the outside and inside. Loss of herb weight on charring was 40%. Method III was to char the herbs until the smoke turned from white to yellow to bluegreen to clear in color, with the herbs appearing burnt on the outside and black on the inside. Loss of herb weight on charring was 60%. Method IV was to char the herbs until the smoke turned from white to yellow to bluegreen to clear in color, with the herbs appearing completely burnt throughout. Loss of herb weight on charring was 80%. These four preparations were then given to rabbits and their hemostatic effects were evaluated. Of the four preparations, the study concluded that the hemostatic effect was most potent in method I, followed by method II and method III. Method IV had no significant impact.¹

CLINICAL STUDIES AND RESEARCH

1. **Hematemesis in pulmonary tuberculosis:** *Shi Hui San* was used to stop bleeding in pulmonary tuberculosis patients who were coughing blood. Herbal treatment effectively stopped bleeding in most patients within 4-6 days. Overall, the treatment was effective in 22 out of 27 patients.²
2. **Hematemesis in bronchiectasis:** Modified *Shi Hui San* given in decoction was effective in 8 bronchiectasis patients coughing blood. The treatment protocol was to combine *Shi Hui San* with *San Qi* (Radix et Rhizoma Notoginseng), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), and powdered *Bai Ji* (Rhizoma Bletillae).

Shí Huī Sǎn (Ten Partially-Charred Substances Powder)

The herbs were cooked in water, and the decoction given in three equally-divided doses daily. Bleeding stopped in most patients within 1-2 days, with complete recovery between 6-20 days. No recurrence was reported by patients in follow-up evaluations one year after treatment.³

3. **Hyphema:** Modified *Shi Hui San* was used to treat 10 patients with bleeding caused by external injuries to the anterior chamber of the eye. The treatment protocol was to administer *Shi Hui San* with 10g of *Hong Hua* (Flos Carthami) one time daily until the bleeding stopped. The patients were also treated with 1% atropine ophthalmic paste one time daily. The study reported that the bleeding stopped within 3-9 days. Upon discharge, 9 of 10 patients had restored normal visual acuity and all 10 had normal ocular pressure.⁴
4. **Gastrointestinal bleeding:** Administration of *Shi Hui San* and *Zuo Jin Wan* (Left Metal Pill) was shown to effectively treat upper gastrointestinal bleeding resulting from gastric or duodenal ulcers.⁵

Di Yu (Radix Sanguisorbae)

Zhi Xue Tang (Stop Bleeding Decoction) has been used as an empirical formula to stop various types of bleeding, including internal bleeding (upper gastrointestinal, stomach, and/or duodenal bleeding, hemoptysis, hematuria, and excessive or irregular menstrual bleeding) and external bleeding (traumatic injuries). It is important to note that this formula treats only the symptom (bleeding), and not the cause. Therefore, after bleeding is stopped, it is necessary to identify and treat the cause.

AUTHORS' COMMENTS

Shi Hui San is designed to be an emergency herbal formula to quickly stop bleeding. It focuses primarily on treating the symptom (bleeding), and not the cause. Therefore, once the bleeding has stopped, the cause of bleeding should be determined and treated accordingly. *Shi Hui San* should not be taken for a prolonged period of time or in high doses.

In *Shi Hui San*, all ten herbs are partially charred to ash to enhance the astringent and hemostatic effects of the formula. Because of this unique processing, the formula is named appropriately "Ten Partially-Charred Substances Powder."

In contrast to the ten substances that are charred to ashes to stop bleeding, fresh *Ou Jie* (Nodus Nelumbinis Rhizomatis) or *Lai Fu Zi* (Semen Raphani) must be used to effectively clear heat and cool the blood.

Sì Shēng Wán (Four-Fresh Pill)

四生丸

Pinyin Name: Si Sheng Wan
Literal Name: Four-Fresh Pill
Alternate Name: Rehmannia Four Formula
Original Source: *Fu Ren Liang Fang* (Fine Formulas for Women) by Chen Zi-Ming in 1237

COMPOSITION

<i>Ce Bai Ye</i> (Cacumen Platycladi), fresh	[12g]
<i>Di Huang</i> (Radix Rehmanniae), fresh	[15g]
<i>He Ye</i> (Folium Nelumbinis), fresh	[9g]
<i>Ai Ye</i> (Folium Artemisiae Argyi), fresh	[9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the ingredients and form the powder into pills the size of egg yolks. Cook one pill with water and take the decoction. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Cools the blood and stops bleeding

CLINICAL MANIFESTATIONS

Bleeding due to heat in the *xue* (blood) level: hematemesis and epistaxis with bright red blood, dry mouth and throat, red or deep red tongue body, and a wiry, rapid pulse.

CLINICAL APPLICATIONS

Gingivitis, peritonitis, hemoptysis, hematemesis, epistaxis, tuberculosis, and bronchiectasis.

EXPLANATION

Si Sheng Wan (Four-Fresh Pill) treats hematemesis or epistaxis due to heat in the *xue* (blood) level. If the heat factor invades the *xue* (blood) level and forces the blood out of their vessels, then symptoms of bleeding, such as hematemesis or epistaxis with bright red blood, may

occur. Dry mouth and throat are due to heat damaging the yin and body fluids. A red tongue body and a wiry, rapid pulse indicate excess heat in the interior.

This formula uses *Ce Bai Ye* (Cacumen Platycladi) to cool the blood and stop bleeding. *Di Huang* (Radix Rehmanniae) clears heat, cools the blood, and nourishes yin and body fluids. *He Ye* (Folium Nelumbinis) and *Ai Ye* (Folium Artemisiae Argyi) stop bleeding and disperse blood stagnation.

MODIFICATIONS

- With severe bleeding, add *Qian Cao* (Radix et Rhizoma Rubiae), *Mo Han Lian* (Herba Ecliptae), and *Ou Jie* (Nodus Nelumbinis Rhizomatis).
- With excessive uterine bleeding, add *Jiao Ai Tang* (Ass-Hide Gelatin and Mugwort Decoction).
- With bleeding ulcers, add *Huang Qin* (Radix Scutellariae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *E Jiao* (Colla Corii Asini), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With constipation due to excess and heat, add *Qian Niu Zi* (Semen Pharbitidis), *Da Huang* (Radix et Rhizoma Rhei), *Zao Jiao* (Fructus Gleditsiae), and *Mang Xiao* (Natrii Sulfas).

Si Sheng Wan (Four-Fresh Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Bleeding due to heat in the <i>xue</i> (blood) level	<ul style="list-style-type: none">• Hematemesis or epistaxis with bright red blood: heat in the <i>xue</i> (blood) level forcing blood out of the vessels• Dry mouth and throat: heat damaging yin and body fluids• Red tongue and a wiry, rapid pulse: excess heat in the interior	Cools the blood and stops bleeding	<ul style="list-style-type: none">• <i>Ce Bai Ye</i> (Cacumen Platycladi) cools the blood and stops bleeding.• <i>Di Huang</i> (Radix Rehmanniae) clears heat, cools the blood, and nourishes yin and body fluids.• <i>He Ye</i> (Folium Nelumbinis) and <i>Ai Ye</i> (Folium Artemisiae Argyi) stop bleeding and disperse blood stagnation.

Sì Shēng Wán (Four-Fresh Pill)

CAUTIONS / CONTRAINDICATIONS

Si Sheng Wan should be discontinued when the desired effect is achieved. Prolonged use or overdosing will result in cold accumulation, which may further aggravate the blood stasis.

AUTHORS' COMMENTS

For *Si Sheng Wan*, the original text specifically emphasized using the fresh, unprocessed form of all four herbs

to maximize the heat-clearing and blood-cooling effects. Thus, this formula is appropriately named "Four-Fresh Pill." However, the fresh, unprocessed form of these four herbs may not be readily available. In that case, to enhance the hemostatic effect, herbs such as *Xiao Ji* (*Herba Cirsii*), *Bai Mao Gen* (*Rhizoma Imperatae*), *Ou Jie* (*Nodus Nelumbinis Rhizomatis*), and *Xian He Cao* (*Herba Agrimoniae*) can be added.

Ké Xuè Fāng (Coughing of Blood Formula)

咳血方

Pinyin Name: *Ke Xue Fang*

Literal Name: Coughing of Blood Formula

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Qing Dai</i> (Indigo Naturalis), <i>shui fei</i> (refined with water)	[6g]
<i>Zhi Zi</i> (<i>Fructus Gardeniae</i>), <i>chao</i> (dry-fried) to black	[9g]
<i>Gua Lou Zi</i> (<i>Semen Trichosanthis</i>), oil removed	[9g]
<i>Fu Hai Shi</i> (Pumice)	[9g]
<i>He Zi</i> (<i>Fructus Chebulae</i>)	[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder and form into pills with honey and the juice of *Sheng Jiang* (*Rhizoma Zingiberis Recens*). The pills should be dissolved in the mouth and then swallowed. Today, this formula may be prepared as a decoction with the doses suggested in brackets. Note: Original doses of herbs in pill form are unavailable from the source text.

CHINESE THERAPEUTIC ACTIONS

1. Clears fire and dissolves phlegm
2. Astringes the Lung and stops coughing

CLINICAL MANIFESTATIONS

Hemoptysis due to Liver fire invading the Lung: coughing with thick, sticky sputum and streaks of blood, a feeling of difficult-to-expectorate sputum stuck in the throat, irritability, fidgeting, short temper, stabbing pain in the chest and hypochondriac area, constipation, red cheeks, red tongue body with a yellow coating, and a wiry, rapid pulse.

CLINICAL APPLICATIONS

Hemoptysis, bronchiectasis, and pulmonary tuberculosis.

EXPLANATION

Ke Xue Fang (Coughing of Blood Formula) treats hemoptysis caused by Liver fire invading the Lung. As Liver fire rises upward, it dries Lung yin and fluids into a thick sputum, making it difficult to expectorate. Liver fire also affects Lung qi circulation, causing coughing and pain in the chest and hypochondriac area. Liver fire may damage the blood vessels, resulting in coughing with streaks of blood in the sputum. Other indications of excess Liver fire include irritability, fidgeting, constipation, red tongue body with a yellow coating, and a wiry, rapid pulse.

This formula aims to treat the cause (Liver fire invading the Lung), and not the symptom (bleeding), of hemoptysis. Therefore, it primarily uses herbs to clear Liver fire, dissolve phlegm, cool the blood, and stop coughing. The source text states that use of stop-bleeding herbs is not necessary because once the cause has been treated, hemoptysis will stop. In this formula, *Qing Dai* (Indigo Naturalis) and *Zhi Zi* (*Fructus Gardeniae*) sedate Liver fire and cool the blood. *Gua Lou Zi* (*Semen Trichosanthis*) and *Fu Hai Shi* (Pumice) clear heat, moisten dryness, and dissolve sputum. *He Zi* (*Fructus Chebulae*) astringes the Lung to relieve coughing.

Ké Xuè Fāng (Coughing of Blood Formula)

Ke Xue Fang (Coughing of Blood Formula)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Hemoptysis due to Liver fire invading the Lung	<ul style="list-style-type: none">• Coughing: Liver fire affecting the Lung qi circulation• Thick, sticky sputum and streaks of blood, feeling of difficult-to-expectorate sputum stuck in the throat: Liver fire consuming Lung yin and fluids• Irritability and fidgeting: Liver fire disturbing the <i>shen</i> (spirit)• Constipation, red tongue body, yellow tongue coating, and a wiry, rapid pulse: excess Liver fire in the body	<ul style="list-style-type: none">• Clears fire and dissolves phlegm• Astringes the Lung and stops coughing	<ul style="list-style-type: none">• <i>Qing Dai</i> (Indigo Naturalis) and <i>Zhi Zi</i> (Fructus Gardeniae) sedate Liver fire and cool the blood.• <i>Gua Lou Zi</i> (Semen Trichosanthis) and <i>Fu Hai Shi</i> (Pumice) clear heat, moisten dryness, and dissolve the sputum.• <i>He Zi</i> (Fructus Chebulae) astringes the Lung to relieve coughing.

MODIFICATIONS

- With severe cough, add *Ku Xing Ren* (Semen Armeniacae Amarum).
- With coughing of profuse sputum, add *Bei Mu* (Bulbus Fritillariae), *Tian Zhu Huang* (Concretio Silicea Bambusae), and *Pi Pa Ye* (Folium Eriobotryae).
- With sputum and blood, and chest pain, add *Jiang Xiang* (Lignum Dalbergiae Odoriferae) and *Ju Luo* (Vascular Citri Reticulatae).
- With sputum that is scanty and difficult to expectorate due to heat injuring body fluids, add *Bei Sha Shen* (Radix Glehniae), *Mai Dong* (Radix Ophiopogonis), and *Pi Pa Ye* (Folium Eriobotryae).
- With epistaxis, remove *He Zi* (Fructus Chebulae) and *Fu Hai Shi* (Pumice); and add *Qing Hao* (Herba Artemisiae Annuae), *Mu Dan Pi* (Cortex Moutan), and *Bai Mao Gen* (Rhizoma Imperatae).

CAUTIONS / CONTRAINDICATIONS

- *Ke Xue Fang* is contraindicated in patients who have Lung and Kidney yin deficiencies, or Spleen qi deficiency with loose stools.
- This formula is contraindicated in cases of cough caused by Lung cold.

AUTHORS' COMMENTS

This formula is prepared as honey pills, and administered by dissolving the pills in the mouth. The purposes of this preparation and administration is to achieve gradual absorption and sustained effect of the formula. After the bleeding stops, the source text recommends using tonic formulas, such as *Ba Zhen Tang* (Eight-Treasure Decoc-tion), to stabilize the condition and treat the underlying deficiencies.

Huái Huā Sǎn (Sophora Japonica Flower Powder)

槐花散

Pinyin Name: Huai Hua San
Literal Name: Sophora Japonica Flower Powder
Alternate Names: Sophora Flower Powder, Sophora Flower Formula
Original Source: *Pu Ji Ben Shi Fang* (Formulas of Universal Benefit from My Practice) by Xu Shu-Wei in 1132

COMPOSITION

<i>Huai Hua</i> (Flos Sophorae), <i>chao</i> (dry-fried)	[12g]
<i>Ce Bai Ye</i> (Cacumen Platycladi), <i>chu</i> (pestled) and <i>bei</i> (stone baked)	[12g]
<i>Jing Jie Sui</i> (Spica Schizonepetae)	[6g]
<i>Zhi Qiao</i> (Fructus Citri Aurantii), <i>chao</i> (dry-fried) with bran till yellow	[6g]

Huái Huā Sǎn (Sophora Japonica Flower Powder)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the ingredients into a fine powder and take 6g with rice soup on an empty stomach before meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets. Note: Original doses of herbs are unavailable from the source text.

CHINESE THERAPEUTIC ACTIONS

1. Clears the Intestines and stops bleeding
2. Dispels wind and redirects qi

CLINICAL MANIFESTATIONS

Hematochezia due to *chang feng* (intestinal wind) and *zang du* (solid organ toxins): bleeding before or after defecation, blood in the stools, hemorrhoidal bleeding, and frank blood with bright red or dark black color.

CLINICAL APPLICATIONS

Rectal or intestinal bleeding, hemorrhoids, ulcerative colitis, and anal fissure.

EXPLANATION

Huai Hua San (Sophora Japonica Flower Powder) treats *chang feng* (intestinal wind) and *zang du* (solid organ toxins). *Chang feng* (intestinal wind) is caused by wind attacking the Intestines, leading to the discharge of bright red blood before defecation or in the stools. *Zang du* (solid organ toxins) is caused by toxins attacking the organ, leading to dysentery with dark black blood in the stools. Both conditions are characterized by wind, heat, and toxins attacking the Stomach and Intestines.

In this formula, *Huai Hua* (Flos Sophorae) clears damp-heat in the Intestines, cools the blood, and stops bleeding. *Ce Bai Ye* (Cacumen Platycladi) helps *Huai Hua* (Flos Sophorae) cool the blood and stop bleeding. *Jing Jie Sui* (Spica Schizonepetae) disperses wind from the Intestines.

It also enters the *xue* (blood) level and stops bleeding. *Zhi Qiao* (Fructus Aurantii) activates qi circulation in the Intestines to dispel toxins.

MODIFICATIONS

- With excessive bleeding, add *Di Yu* (Radix Sanguisorbae) and *Xiao Ji* (Herba Cirsii).
- With blood in the stools accompanied by abdominal pain, distention, and tenesmus, add *Mu Xiang* (Radix Aucklandiae) and *Hou Po* (Cortex Magnoliae Officinalis).
- With dry, hard stools accompanied by bleeding, add *Mang Xiao* (Natrii Sulfas) and *Huo Ma Ren* (Fructus Cannabis).
- With qi deficiency due to chronic bleeding, add *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), and *Sheng Ma* (Rhizoma Cimicifugae).
- For bleeding hemorrhoids and prolapsed rectum, remove *Ce Bai Ye* (Cacumen Platycladi) and *Jing Jie* (Herba Schizonepetae), and add *Dang Gui* (Radix Angelicae Sinensis), *Huang Qin* (Radix Scutellariae), *Fang Feng* (Radix Saposhnikoviae), and *Di Yu* (Radix Sanguisorbae).
- For continuous and profuse bleeding leading to blood deficiency, add *Di Huang* (Radix Rehmanniae), *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Wu Mei* (Fructus Mume).
- With excess heat in the Intestines, add *Huang Lian* (Rhizoma Coptidis) and *Huang Bo* (Cortex Phellodendri Chinensis).

CAUTIONS / CONTRAINDICATIONS

- *Huai Hua San* is cold and thus is not suitable for long-term use.
- This formula is not suitable for chronic rectal bleeding or for hematochezia with symptoms of qi or yin deficiency.

Huai Hua San (Sophora Japonica Flower Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Hematochezia due to <i>chang feng</i> (intestinal wind) and <i>zang du</i> (solid organ toxins)	<ul style="list-style-type: none">• Bright red blood in the stools: <i>chang feng</i> (intestinal wind) due to wind attacking the Intestines• Dysentery with dark black blood in the stools: <i>zang du</i> (solid organ toxins)	<ul style="list-style-type: none">• Clears the intestines and stops bleeding• Dispels wind and descends qi	<ul style="list-style-type: none">• <i>Huai Hua</i> (Flos Sophorae) clears damp-heat in the Intestines, cools the blood, and stops bleeding.• <i>Ce Bai Ye</i> (Cacumen Platycladi) cools the blood and stops bleeding.• <i>Jing Jie Sui</i> (Spica Schizonepetae) disperses wind and stops bleeding.• <i>Zhi Qiao</i> (Fructus Aurantii) activates qi circulation in the Intestines to dispel toxins.

Huái Huā Sǎn (Sophora Japonica Flower Powder)

RELATED FORMULA

Huái Jiǎo Wán (Sophora Japonica Fruit Pill)

槐角丸

Pinyin Name: *Huai Jiao Wan*

Literal Name: Sophora Japonica Fruit Pill

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

Huai Jiao (Fructus Sophorae), *chao* (dry-fried) 480g

Fang Feng (Radix Saposhnikoviae) 240g

Di Yu (Radix Sanguisorbae) 240g

Dang Gui (Radix Angelicae Sinensis), *jin* (soaked) in liquor for 1 night and *bei* (stone baked) 240g

Huang Qin (Radix Scutellariae) 240g

Zhi Qiao (Fructus Citri Aurantii), *chao* (dry-fried) with bran 240g

The source text states to grind all ingredients into a fine powder and mix it with a grain-based liquor to form pills.

The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 30 pills with rice soup any time during the day. Today, this formula is prepared by grinding the ingredients into a fine powder, then mixing it with water to form pills. Take 9g of pills daily with water.

Huai Jiao Wan (Sophora Japonica Fruit Pill) clears the Intestines to stop bleeding, dispels wind, and regulates qi. Clinically, it may be used to treat hematochezia, hemorrhoids, prolapsed rectum, and *chang feng* (intestinal wind) characterized by wind, heat, toxins, and damp-heat.

Huai Hua San and *Huai Jiao Wan* (Sophora Japonica Fruit Pill) both clear the Intestines and stop bleeding to treat hematochezia due to *chang feng* (intestinal wind).

- *Huai Hua San* has a stronger effect to cool the blood and stop bleeding.
- *Huai Jiao Wan* has a better effect to clear damp-heat, and an additional function to nourish the blood.

Xiǎo Jì Yīn Zǐ (Cirsium Decoction)

小薊飲子

小薊飲子

Pinyin Name: *Xiao Ji Yin Zi*

Literal Name: Cirsium Decoction

Alternate Name: Cephalanoplos Decoction

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Xiao Ji</i> (Herba Cirsii)	15g [15g]
<i>Ou Jie</i> (Nodus Nelumbinis Rhizomatis)	15g [9g]
<i>Pu Huang</i> (Pollen Typhae), <i>chao</i> (dry-fried)	15g [9g]
<i>Hua Shi</i> (Talcum)	15g [15g]
<i>Mu Tong</i> (Caulis Akebiae)	15g [9g]
<i>Dan Zhu Ye</i> (Herba Lophatheri)	15g [9g]
<i>Zhi Zi</i> (Fructus Gardeniae)	15g [9g]
<i>Di Huang</i> (Radix Rehmanniae), <i>xi</i> (washed)	120g [30g]
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>jin</i> (soaked) in liquor	15g [6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to coarsely grind all the ingredients. Cook 12g of the powder with 1.5 bowls of water until the liquid is reduced to 80%. Take the warm, strained

decoction on an empty stomach before meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Xiǎo Jì Yīn Zǐ (Cirsium Decoction)

CHINESE THERAPEUTIC ACTIONS

1. Cools the blood and stops bleeding
2. Promotes urination and treats *lin zheng* (dysuria syndrome)

CLINICAL MANIFESTATIONS

Xue lin (bloody dysuria) caused by heat in the lower *jiao*: hematuria, frequent urination with a burning sensation and pain, red tongue body, and a rapid pulse.

CLINICAL APPLICATIONS

Acute urinary tract infection, proteinuria, hematuria, and acute glomerulonephritis.

EXPLANATION

Xiao Ji Yin Zi (Cirsium Decoction) treats *xue lin* (bloody dysuria) caused by heat in the lower *jiao*. In this syndrome, heat stagnates in the Urinary Bladder and damages the vessels, causing various urinary disorders such as hematuria and frequent urination with burning pain. A red tongue body and rapid pulse indicate heat.

The treatment plan for this syndrome is to cool the blood, stop bleeding, promote urination, and relieve pain. This formula contains *Xiao Ji* (Herba Cirsii) as the chief herb to cool the blood and stop bleeding. *Ou Jie* (Nodus Nelumbinis Rhizomatis) and *Pu Huang* (Pollen Typhae) cool the blood, stop bleeding, and resolve blood stasis. These two herbs effectively stop bleeding without creating blood stasis. *Hua Shi* (Talcum) clears heat and promotes

urination. *Mu Tong* (Caulis Akebiae), *Dan Zhu Ye* (Herba Lophatheri), and *Zhi Zi* (Fructus Gardeniae) drains fire from the Heart, Lung, and *San Jiao*. Since the presence of heat may damage yin and blood, *Di Huang* (Radix Rehmanniae) and *Dang Gui* (Radix Angelicae Sinensis) are added to clear heat, cool the blood, nourish yin and tonify blood. *Dang Gui* (Radix Angelicae Sinensis) also prevents the cold herbs in this formula from injuring the body. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

MODIFICATIONS

- With dysuria characterized by blood stagnation and heat, add *Shi Wei* (Folium Pyrrosiae), *Pu Gong Ying* (Herba Taraxaci) and *Huang Bo* (Cortex Phellodendri Chinensis).
- For chronic *xue lin* (bloody dysuria) with qi and blood deficiencies, reduce the doses of *Hua Shi* (Talcum) and *Mu Tong* (Caulis Akebiae), and add *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), and *E Jiao* (Colla Corii Asini).
- With more heat, replace *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) with *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With severe pain in the penis during urination, add *Hu Po* (Succinum).

CAUTIONS / CONTRAINDICATIONS

- *Xiao Ji Yin Zi* should only be used to treat excess *xue lin* (bloody dysuria), as it contains mostly cold and draining herbs.

Xiao Ji Yin Zi (Cirsium Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Xue lin</i> (bloody dysuria) caused by heat in the lower <i>jiao</i>	<ul style="list-style-type: none">• Hematuria and frequent urination with burning pain: heat stagnates in the Urinary Bladder• Red tongue and rapid pulse: heat condition	<ul style="list-style-type: none">• Cools the blood and stops bleeding• Promotes urination and treats <i>lin zheng</i> (dysuria syndrome)	<ul style="list-style-type: none">• <i>Xiao Ji</i> (Herba Cirsii) cools the blood and stops the bleeding.• <i>Ou Jie</i> (Nodus Nelumbinis Rhizomatis) and <i>Pu Huang</i> (Pollen Typhae) cool the blood, stop bleeding, and resolve blood stasis.• <i>Hua Shi</i> (Talcum) clears heat and promotes urination to relieve pain.• <i>Mu Tong</i> (Caulis Akebiae), <i>Dan Zhu Ye</i> (Herba Lophatheri), and <i>Zhi Zi</i> (Fructus Gardeniae) drains fire from the Heart, Lung, and <i>San Jiao</i>.• <i>Di Huang</i> (Radix Rehmanniae) nourishes yin, cools the blood, and clears heat.• <i>Dang Gui</i> (Radix Angelicae Sinensis) nourishes blood and prevents the cold herbs in this formula from injuring the body.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Xiǎo Jì Yīn Zǐ (Cirsium Decoction)

- Chronic cases of *xue lin* (bloody dysuria) are often accompanied by underlying deficiencies, and must also be treated with tonifying herbs.

CLINICAL STUDIES AND RESEARCH

1. **Proteinuria:** Use of *Xiao Ji Yin Zi* plus *He Di* (Calyx Nelumbinis) in 35 patients with proteinuria was associated with 97% effectiveness (complete recovery in 19 cases, marked improvement in 9 cases, moderate improvement in 6 cases, and no improvement in 1 case). Patients were instructed to take the herbs daily, maintain a low-sodium diet, avoid exposure to wind and cold, and refrain from sexual activity during the treatment period.¹
2. **Hematuria in urinary infection:** *Xiao Ji Yin Zi* and *Ba Zheng San* (Eight-Herb Powder for Rectification) were used to treat hematuria due to acute urinary infection. The treatment strategy was to use *Xiao Ji Yin Zi* as the

main formula for *xue lin* (bloody dysuria), and *Ba Zheng San* (Eight-Herb Powder for Rectification) for *re lin* (heat dysuria). Furthermore, modifications were made by adding *Mu Dan Pi* (Cortex Moutan) and *Bai Mao Gen* (Rhizoma Imperatae) for excessive blood in the urine; and *Qu Mai* (Herba Dianthi) and *Che Qian Zi* (Semen Plantaginis) for burning sensations and pain in the urethra. Of 48 patients, the study reported complete recovery in 28 cases, significant improvement in 4 cases, moderate improvement in 10 cases, and no effect in 6 cases. The overall effectiveness was 87.5%. The duration of treatment ranged from 2-9 days.²

Huáng Tǔ Tāng (Yellow Earth Decoction)

黃土湯
黃土湯

Pinyin Name: *Huang Tu Tang*

Literal Name: Yellow Earth Decoction

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Fu Long Gan</i> (Terra Flava Usta)	24g [30g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	9g
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	9g
<i>Di Huang</i> (Radix Rehmanniae)	9g
<i>E Jiao</i> (Colla Corii Asini)	9g
<i>Huang Qin</i> (Radix Scutellariae)	9g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 8 cups [1,600 mL] of water until the liquid is reduced to 3 cups [600 mL]. Take the warm decoction in two equally-divided doses. Today, it is recommended to cook *Fu Long Gan* (Terra Flava Usta) first, discard the residue, then cook the rest of the herbs in the strained decoction.

CHINESE THERAPEUTIC ACTIONS

1. Warms the yang and strengthens the Spleen
2. Nourishes the blood and stops bleeding

CLINICAL MANIFESTATIONS

Bleeding due to Spleen yang deficiency, accompanied by deficiency and cold in the middle *jiao*: various types of bleeding such as hematochezia, hematemesis, epistaxis, excessive menstrual bleeding, bleeding with pale-red or dull-red blood, cold extremities, sallow facial appearance, a pale tongue body with a white tongue coating, and a deep, fine, and forceless pulse.

Huáng Tǔ Tāng (Yellow Earth Decoction)

CLINICAL APPLICATIONS

Upper gastrointestinal bleeding, epistaxis, hemorrhoidal bleeding, duodenal ulcers, and uterine bleeding.

EXPLANATION

Huang Tu Tang (Yellow Earth Decoction) treats bleeding due to Spleen yang deficiency and cold accumulation in the middle *jiao*. The Spleen keeps blood contained within the blood vessels. If Spleen yang is deficient, blood may leak out of the vessels, causing various types of bleeding. This inability to control the circulation of blood results in aimless movement of blood: hematemesis and epistaxis in the upper body, and hematochezia and excessive menstrual bleeding in the lower body. Cold extremities, sallow facial appearance, a pale tongue, and a deep, fine, and forceless pulse all suggest Spleen yang deficiency. The patient may become progressively weaker due to blood deficiency as blood is lost through gastrointestinal bleeding.

This formula contains *Fu Long Gan* (Terra Flava Usta) to warm the middle *jiao* and stop bleeding. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) tonify and warm Spleen yang. These two acrid and warm herbs, however, tend to be moving and drying in nature and may consume blood in patients who are already deficient from bleeding. Therefore, *Di Huang* (Radix Rehmanniae) and *E Jiao* (Colla Corii Asini) are added to nourish yin, tonify the blood and stop bleeding. Furthermore, the warm property of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and hot property of *Fu Zi* (Radix Aconiti Lateralis Praeparata) are moderated with the cold property of *Huang Qin* (Radix Scutellariae). Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

MODIFICATIONS

- With qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng), *Dang Shen* (Radix Codonopsis), and *Huang Qi* (Radix Astragali).
- With profuse bleeding, add *San Qi* (Radix et Rhizoma Notoginseng) and *Bai Ji* (Rhizoma Bletillae).
- With diarrhea, use charred *Huang Qin* (Radix Scutellariae) and *Pao Jiang* (Rhizoma Zingiberis Praeparatum).
- With palpitations, remove *Huang Qin* (Radix Scutellariae), and add *Long Yan Rou* (Arillus Longan) and *Suan Zao Ren* (Semen Ziziphi Spinosa).

CAUTIONS / CONTRAINDICATIONS

- *Huang Tu Tang* should be used with caution in bleeding due to heat conditions.
- This formula is contraindicated in bleeding with an exterior condition.

CLINICAL STUDIES AND RESEARCH

1. **Upper gastrointestinal bleeding:** Upper gastrointestinal bleeding in 29 patients was treated with 89.6% effectiveness using *Huang Tu Tang* plus *Xian He Cao* (Herba Agrimoniae) and *Bai Ji* (Rhizoma Bletillae).¹
2. **Duodenal bleeding:** One study reported complete recovery in 24 of 36 patients with duodenal ulcers and bleeding using *Huang Tu Tang* plus *Hua Rui Shi* (Ophicalciturum), *Bu Gu Zhi* (Fructus Psoraleae), and *Xian He Cao* (Herba Agrimoniae).²
3. **Hemorrhoidal bleeding:** One study reported successful treatment in all 16 patients with chronic hemorrhoidal bleeding using *Huang Tu Tang*.³

AUTHORS' COMMENTS

Huang Tu Tang is primarily used for hematochezia or *beng lou* (flooding and spotting) caused by Spleen yang

Huang Tu Tang (Yellow Earth Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Bleeding due to Spleen yang deficiency and deficiency and cold in the middle <i>jiao</i>	<ul style="list-style-type: none"> • Hematemesis, epistaxis, hematochezia and menstrual bleeding: bleeding due to inability of yang qi to control the circulation of blood • Cold extremities, sallow facial appearance; cold accumulation and Spleen yang deficiency • Pale tongue and a deep, fine and forceless pulse: yang deficiency 	<ul style="list-style-type: none"> • Warms the yang and strengthens the Spleen • Nourishes the blood and stops bleeding 	<ul style="list-style-type: none"> • <i>Fu Long Gan</i> (Terra Flava Usta) warms the middle <i>jiao</i> and stops bleeding. • <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) warm Spleen yang. • <i>Di Huang</i> (Radix Rehmanniae) and <i>E Jiao</i> (Colla Corii Asini) nourish yin and tonify the blood. • <i>Huang Qin</i> (Radix Scutellariae) controls and balances the warm herbs. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Huáng Tǔ Tāng (Yellow Earth Decoction)

deficiency. The blood is pale red or dull red in color. Patients usually exhibit a pale tongue body with a deep, fine, and forceless pulse. The two diagnostic criteria are “deficiency” and “cold.”

Huang Tu, translated as “Yellow Earth,” and literally describing the soot and ash from an enclosed fire pit, is the alternate or common name for *Fu Long Gan* (Terra Flava Usta). Thus, this formula is called *Huang Tu Tang* (Yellow Earth Decoction) because it contains *Huang Tu* as the chief herb. It is the chief herb because it represents the primary function of the formula to warm the middle *jiao* and stop bleeding.

Fu Long Gan (Terra Flava Usta) is not commonly used today. If it is unavailable, *Chi Shi Zhi* (*Halloysitum Rubrum*) may be used as a substitute.⁴

膠艾湯
胶艾汤

Pinyin Name: *Jiao Ai Tang*

Literal Name: Ass-Hide Gelatin and Mugwort Decoction

Alternate Names: *Chiung Kuei Jiao Ai Tang*, *Qiong Gui Jiao Ai Tang*, *Xiong Gui Jiao Ai Tang*, *Cnidium*, *Tang-kuei*, *Gelatin*, and *Mugwort Leaf Decoction*; *Cnidium*, *Tangkuei*, *Gelatin* and *Artemisia Decoction*

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>E Jiao</i> (Colla Corii Asini)	6g [6-9g]
<i>Ai Ye</i> (Folium Artemisiae Argyi)	9g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g
<i>Di Huang</i> (Radix Rehmanniae)	18g [12-15g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	12g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients, except *E Jiao* (Colla Corii Asini), with 5 cups [1,000 mL] of water and 3 cups [600 mL] of grain-based liquor until the liquid is reduced to 3 cups [600 mL]. Discard the herbal residue. Dissolve *E Jiao* (Colla Corii Asini) into the warm, strained decoction until it melts completely. Take 1 cup [200 mL] of the warm decoction three times daily. The source text recommends taking the formula until the symptoms are resolved. Today, it is prepared as a decoction by cooking the herbs using the doses suggested in brackets in water, with or without a grain-based liquor. *E Jiao* (Colla Corii Asini) is dissolved into the warm, strained decoction immediately before serving.

CHINESE THERAPEUTIC ACTIONS

- 1. Tonifies the blood and stops bleeding
- 2. Regulates menses and calms the fetus

CLINICAL MANIFESTATIONS

Beng lou (flooding and spotting) due to deficiency and damage to the *chong* (thoroughfare) and *ren* (conception) channels in women: menstrual irregularity, menorrhagia, excessive and continuous menstrual bleeding and spotting, pale and thin blood without clots, and abdominal pain. It is also effective for unstable pregnancy with uterine pain and/or bleeding, and continuous bleeding after premature delivery or miscarriage.

Jiāo Ài Tāng (Ass-Hide Gelatin and Mugwort Decoction)

CLINICAL APPLICATIONS

Uterine bleeding, endometriosis, prevention of spontaneous miscarriage, excessive menstrual bleeding, excessive bleeding during pregnancy, excessive postpartum bleeding, rectal bleeding, hemorrhoid bleeding, hematuria, hemoptysis, duodenal ulcers with bleeding, anemia, and thrombocytopenic purpura.

EXPLANATION

Jiao Ai Tang (Ass-Hide Gelatin and Mugwort Decoction) treats *beng lou* (flooding and spotting) due to deficiency and damage to the *chong* (thoroughfare) and *ren* (conception) channels. The *chong* channel is the sea of blood, and the *ren* channel dominates the uterus and fetus. If the *chong* and *ren* channels are damaged and become deficient, excessive and prolonged bleeding may occur. For pregnant women, this condition is characterized by unstable pregnancy, restless fetus, uterine bleeding, and abdominal pain.

The treatment plan for this syndrome is to tonify the blood, stop bleeding, regulate menstruation, and stabilize the fetus. In this formula *E Jiao* (Colla Corii Asini) nourishes the blood and stops bleeding. *Ai Ye* (Folium Artemisiae Argyi) warms the menses and stops bleeding. Combined, these two herbs regulate menstruation, treat *beng lou* (flooding and spotting), and stabilize the fetus. To tonify blood, regulate menstruation and move blood, this formula uses *Dang Gui* (Radix Angelicae Sinensis), *Di Huang* (Radix Rehmanniae), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong), the four herbs in the blood-tonifying formula *Si Wu Tang* (Four-Substance Decoction). *Gan Cao* (Radix et Rhizoma Glycyrrhizae) also tonifies qi and harmonizes all the herbs in the formula. In addition, the combination of *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *E Jiao* (Colla Corii Asini) stops bleeding; and the combination of *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Bai Shao* (Radix

Paeoniae Alba) relieves pain. Lastly, grain-based liquor increases the impact of the herbs and prevents the development of blood stasis.

MODIFICATIONS

- With qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- With pain in the abdomen and lower back, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis).
- With excessive bleeding, add *Xian He Cao* (Herba Agrimoniae) and *Di Yu* (Radix Sanguisorbae).
- With profuse bleeding, add charred *Di Yu* (Radix Sanguisorbae) and charred *Ai Ye* (Folium Artemisiae Argyi).
- With abdominal pain due to blood stagnation, add *Yan Hu Suo* (Rhizoma Corydalis) and *San Qi* (Radix et Rhizoma Notoginseng).
- With unstable pregnancy, add *Bao Chan Wu You Fang* (Preserve Pregnancy and Care-Free Decoction).
- With constant and restless movement of the fetus due to deficiency, add *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), and *Sang Ji Sheng* (Herba Taxilli).

CAUTIONS / CONTRAINDICATIONS

Jiao Ai Tang is contraindicated in cases of hypermenorrhea, or *beng lou* (flooding and spotting) caused by heat.

CLINICAL STUDIES AND RESEARCH

1. **Uterine bleeding:** Administration of *Jiao Ai Tang* effectively treated 25 patients with uterine bleeding due to functional disorders. The herbs were given in decoction once a day, with treatment duration varying from 4 to 8 packs of herbs.¹
2. **Thrombocytopenic purpura:** Administration of modified *Jiao Ai Tang* was associated with 94% effectiveness in treating 17 patients with thrombocytopenic purpura. The herbal treatment contained this formula plus *Xuan Shen*

Jiao Ai Tang (Ass-Hide Gelatin and Mugwort Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Beng lou</i> (flooding and spotting)	Excessive and prolonged menstrual bleeding; deficiency of the <i>chong</i> (thoroughfare) and <i>ren</i> (conception) channels	<ul style="list-style-type: none"> • Tonifies blood and stops bleeding • Regulates menstruation and calms the fetus 	<ul style="list-style-type: none"> • <i>E Jiao</i> (Colla Corii Asini) nourishes the blood and stops bleeding. • <i>Ai Ye</i> (Folium Artemisiae Argyi) warms the menses and stops bleeding. • <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Di Huang</i> (Radix Rehmanniae), <i>Bai Shao</i> (Radix Paeoniae Alba), and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) tonify blood and regulate blood circulation. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonifies qi and harmonizes the herbs.

Jiāo Ài Tāng (Ass-Hide Gelatin and Mugwort Decoction)

(Radix Scrophulariae), *Mai Dong* (Radix Ophiopogonis), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Ren Shen* (Radix et Rhizoma Ginseng). Of 17 patients, the study reported significant improvement in 12 cases, moderate improvement in 4 cases, and no benefit in 1 case.²

3. **Duodenal ulcers and bleeding:** One study reported recovery in 49 of 50 patients with gastrointestinal bleeding caused by duodenal ulcers when treated with modified *Jiao Ai Tang* for 3-7 days. Recovery was confirmed

by absence of blood in the stools and resolution of all symptoms.³

Chapter 13 — Summary

— Blood-Regulating Formulas

SECTION 1: BLOOD-INVIGORATING AND STASIS-REMOVING FORMULAS

Name	Similarities	Differences
Tao He Cheng Qi Tang (Peach Pit Decoction to Order the Qi)	Breaks up blood stasis and drains it downward	Treats blood stagnation in the lower <i>jiao</i>
Tong Qiao Huo Xue Tang (Unblock the Orifices and Invigorate the Blood Decoction)		Opens the sensory orifices in the head and face
Xue Fu Zhu Yu Tang (Drive Out Stasis in the Mansion of Blood Decoction)		Treats blood stagnation in the chest (upper <i>jiao</i>)
Ge Xia Zhu Yu Tang (Drive Out Blood Stasis Below the Diaphragm Decoction)	Activate blood circulation, dispel blood stagnation	Treats blood stagnation below the diaphragm (middle <i>jiao</i>)
Shao Fu Zhu Yu Tang (Drive Out Blood Stasis in the Lower Abdomen Decoction)		Treats blood stagnation in the lower abdomen (lower <i>jiao</i>)
Shen Tong Zhu Yu Tang (Drive Out Blood Stasis from a Painful Body Decoction)		Treats qi and blood stagnation throughout the body (extremities)
Fu Yuan Huo Xue Tang (Revive Health by Invigorating the Blood Decoction)		Traumatic injuries with pain and swelling in the chest and hypochondriac region
Zheng Gu Zi Jin Dan (Purple and Gold Pill for Righteous Bones)	Activate blood circulation, dispel blood stasis, treat traumatic injuries	Traumatic injuries of soft tissues and bones
Qi Li San (Seven-Thousandths of a Tael Powder)		Traumatic injuries of soft tissues and bones, stops bleeding
Bu Yang Huan Wu Tang (Tonify the Yang to Restore Five Decoction)	Activates blood circulation, opens the channels and collaterals	Tonifies qi, treats post-stroke sequelae
Shi Xiao San (Sudden Smile Powder)		Treats pain due to blood stagnation in the Liver channel
Huo Luo Xiao Ling Dan (Fantastically Effective Pill to Invigorate the Collaterals)	Activate blood circulation, remove blood stasis, relieve chest and abdominal pain	Treats swelling and pain due to blood stagnation from trauma
Dan Shen Yin (Salvia Decoction)		Treats pain in the epigastric and abdominal regions due to qi and blood stagnation
Wen Jing Tang (Warm the Channels Decoction)		Warms the <i>chong</i> (thoroughfare) and <i>ren</i> (conception) channels, disperses cold, nourishes the blood
Ai Fu Nuan Gong Wan (Mugwort and Cyperus Pill for Warming the Womb)	Activate blood circulation, warm the channels/uterus, treat gynecological disorders	Warms the uterus, nourishes the blood
Sheng Hua Tang (Generation and Transformation Decoction)		Warms the channels, stops pain
Gui Zhi Fu Ling Wan (Cinnamon Twig and Poria Pill)		Gently activates blood circulation, gradually dissolves blood stagnation
Zhe Chong Yin (Break the Conflict Decoction)	Activate blood circulation, remove blood stasis, treat gynecological disorders	Strongly activates blood circulation, dispels blood stasis, disperses stagnation
Bie Jia Jian Wan (Soft-Shelled Turtle Shell Pill)		Activates qi and blood circulation, dispels dampness and phlegm
Da Huang Zhe Chong Wan (Rhubarb and Eupolyphaga Pill)	Break up and eliminate stagnation, soften hardness and resolve masses	Promotes generation of new blood

Chapter 13 — Summary

Tao He Cheng Qi Tang (Peach Pit Decoction to Order the Qi) clears heat, and breaks up and dispels blood stasis. It is especially indicated for blood stagnation with heat in the lower *jiao* causing acute lower abdominal pain, delirium, irritability, thirst, fever at night, normal urination, or, in severe cases, mania.

There are five formulas that have similar functions to activate blood circulation and dispel blood stagnation. The difference between each of the five formulas is that they treat blood stagnation in different parts of the body.

- **Tong Qiao Huo Xue Tang** (Unblock the Orifices and Invigorate the Blood Decoction) activates blood circulation and opens the sensory orifices. It treats blood stagnation in the head and face, with signs and symptoms such as headache, dizziness, chronic tinnitus and poor hearing, and blue/green/purplish facial appearance.
- **Xue Fu Zhu Yu Tang** (Drive Out Stasis in the Mansion of Blood Decoction) activates qi and blood circulation, removes blood stagnation, and relieves pain. It is used to treat qi and blood stagnation in the chest, with prolonged and fixed stabbing pain in the chest.
- **Ge Xia Zhu Yu Tang** (Drive Out Blood Stasis Below the Diaphragm Decoction) activates qi and blood circulation, dispels blood stagnation, and relieves pain. It is most effective for blood stagnation below the diaphragm that is characterized by symptoms such as fixed abdominal pain, a feeling of an unmovable mass in the abdomen, and fullness and pain in the hypochondriac and abdominal regions.
- **Shao Fu Zhu Yu Tang** (Drive Out Blood Stasis in the Lower Abdomen Decoction) activates blood circulation, dispels blood stagnation, and warms and regulates menstruation. This formula is commonly used to treat blood stagnation in the lower abdomen, with signs and symptoms such as pain and fullness in the lower abdominal region, formation of a mass in the lower abdominal region, multiple cycles of bleeding (between 3-5 times) within one period, menstrual pain, low back pain and abdominal fullness during menstruation, and excessive menstrual bleeding that is black and purplish with blood clots.
- **Shen Tong Zhu Yu Tang** (Drive Out Blood Stasis from a Painful Body Decoction) activates qi and blood circulation, dispels blood stagnation, and opens the channels and collaterals. It is excellent in treating *bi zheng* (painful obstruction syndrome) due to qi and blood stagnation blocking the channels and collaterals. Clinical manifestations include pain in the shoulder, elbow, waist, leg, or the whole body.

Fu Yuan Huo Xue Tang (Revive Health by Invigorating the Blood Decoction), **Zheng Gu Zi Jin Dan** (Purple and Gold Pill for Righteous Bones), and **Qi Li San** (Seven-Thousandths of a Tael Powder) have excellent functions to treat traumatic injuries by activating blood circulation and dispelling blood stasis.

- **Fu Yuan Huo Xue Tang** treats severe stabbing pain in the hypochondriac region due to trauma. This formula activates blood circulation, removes blood stasis, soothes Liver qi, and dredges the collaterals.
- **Zheng Gu Zi Jin Dan** treats many different types of soft tissue and bone injuries, with symptoms such as pain, swelling, inflammation, and bruising. The main actions of this formula are to activate blood circulation, dispel blood stasis, open the channels and collaterals, and reduce swelling and bruises.
- **Qi Li San** treats severe cases of external or traumatic injuries with severe damage to soft tissues and bones, such as muscle sprain, tendon and ligament strain, or bone fracture. It is also very effective in stopping bleeding, reducing swelling, and relieving pain. This formula can be administered both externally and internally.

Chapter 13 — Summary

Bu Yang Huan Wu Tang (Tonify the Yang to Restore Five Decoction) tonifies qi, activates blood circulation, and invigorates the functions of the channels and collaterals. It is designed for post-stroke sequelae due to qi deficiency and blood stagnation, with symptoms such as hemiplegia, deviation of the mouth and eyes, difficulty in speech, involuntary leakage of saliva, atrophy of the lower extremities, and frequent urination or urinary incontinence.

Shi Xiao San (Sudden Smile Powder), **Huo Luo Xiao Ling Dan** (Fantastically Effective Pill to Invigorate the Collaterals), and **Dan Shen Yin** (Salvia Decoction) are formulas with similar functions to activate blood circulation, remove blood stasis, and relieve chest and abdominal pain. However, their clinical applications are rather different.

- **Shi Xiao San** activates blood circulation, removes blood stasis, disperses nodules, and stops pain. It is used mainly for sharp abdominal pain due to blood stagnation in irregular menstruation. It is also effective for postpartum bleeding due to residual placenta in the uterus.
- **Huo Luo Xiao Ling Dan** activates blood circulation, dispels blood stasis, and dredges the collaterals to relieve pain. This formula is effective for various types of pain and disorders due to qi and blood stagnation, such as chest and abdominal pain, pain of the arms and legs, and bruises and swelling due to trauma.
- **Dan Shen Yin** activates qi and blood circulation, removes blood stasis, and stops pain. It is used for heart (epigastric region) and stomach (upper abdominal area) pain due to qi and blood stagnation. The pain is fixed, and is intensified by pressure.

Wen Jing Tang (Warm the Channels Decoction), **Ai Fu Nuan Gong Wan** (Mugwort and Cyperus Pill for Warming the Womb), and **Sheng Hua Tang** (Generation and Transformation Decoction) are three formulas specifically designed for the treatment of gynecological disorders. All three have similar functions to activate blood circulation, remove blood stasis, and warm the channels/uterus.

- **Wen Jing Tang** treats blood stagnation due to deficiency cold in the *ren* (conception) and *chong* (thoroughfare) channels. This formula warms the channels, disperses cold, nourishes blood, and removes blood stasis. Clinical manifestations include irregular menstruation, afternoon fever, irritability, hot palms, dry mouth and lips, abdominal fullness, lower abdominal pain, and possible infertility in women.
- **Ai Fu Nuan Gong Wan** treats deficiency and cold of the uterus. It warms the uterus, nourishes the blood, and activates blood circulation. Clinical manifestations include leukorrhea, yellowish facial complexion, painful extremities, lethargy, lack of energy, low appetite, irregular menstruation, lower abdominal pain, and infertility.
- **Sheng Hua Tang** treats blood stagnation with interior cold and blood deficiency after delivery. It activates blood circulation, removes blood stasis, warms the channels, and stops pain. Clinical manifestations include continuous bleeding due to the placenta remaining in the uterus, and cold sensations with pain in the lower abdomen.

Gui Zhi Fu Ling Wan (Cinnamon Twig and Poria Pill) and **Zhe Chong Yin** (Break the Conflict Decoction) exert similar actions to activate blood circulation and remove blood stasis.

- **Gui Zhi Fu Ling Wan** is used traditionally during pregnancy to treat blood stagnation in the uterus. Clinical manifestations of this condition include instability of the fetus, continuous dripping of purplish black blood, and abdominal pain that is aggravated by pressure. Due to this delicate condition, this formula is composed carefully with herbs to gently activate blood circulation and gradually dissolve blood stagnation.
- **Zhe Chong Yin** treats irregular menstruation, dysmenorrhea, and amenorrhea due to blood stagnation in the lower *jiao* with severe pain in the lower abdominal region. It is potent in activating blood circulation, dispelling blood stasis, dissolving stagnation, and dispersing obstruction.

Chapter 13 — Summary

Bie Jia Jian Wan (Soft-Shelled Turtle Shell Pill) and **Da Huang Zhe Chong Wan** (Rhubarb and Eupolyphaga Pill) break up and eliminate stagnation, soften hardness, and resolve masses.

- **Bie Jia Jian Wan** functions strongly to activate qi and blood circulation, dispel dampness and phlegm, and resolve hardness and masses. It is used primarily to treat chronic malaria with an enlarged spleen. Today, this formula may be used for splenomegaly, hepatomegaly, hepatitis, and liver cirrhosis.
- **Da Huang Zhe Chong Wan** has potent actions to break up and dispel blood stasis, and promote the generation of new blood. Historically, it was used to treat extreme deficiency and debility from consumptive lifestyles. Today, it may be used to treat hepatitis, liver fibrosis or cirrhosis, and uterine leiomyoma.

SECTION 2: STOP-BLEEDING FORMULAS

Name	Similarities	Differences
Shi Hui San (Ten Partially-Charred Substances Powder)		Stops bleeding from the upper parts of the body, such as hematemesis, hemoptysis, and gastrointestinal bleeding
Si Sheng Wan (Four-Fresh Pill)	Cool the blood, stop bleeding	Stops bleeding from the upper parts of the body, such as hematemesis and epistaxis
Ke Xue Fang (Coughing of Blood Formula)		Stops hemoptysis
Huai Hua San (Sophora Japonica Flower Powder)		Stops bleeding from the lower parts of the body, such as hematochezia
Xiao Ji Yin Zi (Cirsium Decoction)		Stops bleeding from the lower parts of the body, such as hematuria
Huang Tu Tang (Yellow Earth Decoction)	Tonify the blood, stop bleeding	Warms the yang and strengthens the Spleen
Jiao Ai Tang (Ass-Hide Gelatin and Mugwort Decoction)		Regulates menstruation and calms the fetus

Shi Hui San (Ten Partially-Charred Substances Powder) cools the blood and stops bleeding. It is used for hematemesis, hemoptysis, and other bleeding symptoms due to blood heat affecting the upper parts of the body. This is the most commonly used hemostatic formula for emergency cases of bleeding. Cease administration of this formula once the desired effect is achieved.

Si Sheng Wan (Four-Fresh Pill) cools the blood and stops bleeding. It is used for hematemesis and epistaxis with bright red blood, and dry mouth and throat due to blood heat affecting the upper parts of the body. Administration of this formula should be stopped once the desired effect is achieved.

Ke Xue Fang (Coughing of Blood Formula) clears fire, dissolves phlegm, astringes the Lung, and stops coughing. It is used for Liver fire invading the Lung, with manifestations such as coughing with thick sputum and streaks of blood.

Huai Hua San (Sophora Japonica Flower Powder) stops rectal bleeding, and clears wind, heat, and toxins in the Intestines. It is used for hematochezia and dysentery, with bleeding prior to or defecation, hemorrhoids, and bright or dark red blood in the stools.

Xiao Ji Yin Zi (Cirsium Decoction) cools the blood, stops bleeding, and promotes urination. It is used for *xue lin* (bloody dysuria) with heat causing hematuria, frequent urination with burning sensations and pain, a red tongue body, and a rapid pulse.

Chapter 13 — Summary

Huang Tu Tang (Yellow Earth Decoction) warms yang, strengthens the Spleen, nourishes blood, and stops bleeding. It is used for deficiency and cold of the middle *jiao* causing bloody stools, hematemesis, epistaxis, excessive menstrual bleeding with pale red blood, cold extremities, and sallow facial appearance.

Jiao Ai Tang (Ass-Hide Gelatin and Mugwort Decoction) tonifies blood, stops bleeding, regulates menstruation, and stabilizes pregnancy. It is used to treat deficiency and damage to the *ren* (conception) and *chong* (thoroughfare) channels with clinical manifestations such as menorrhagia, excessive menstrual bleeding, or excessive bleeding during pregnancy or after delivery.

— Wind-Expelling Formulas

王焘 Wāng Táo

王焘 Wāng Táo, 670 – 755.

王焘 Wāng Táo

外台秘要 *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) in 752.

Wang Tao was born into the Imperial family. Wang was the grandson of 唐太宗 Tang Tai-Zong, one of the most famous emperors in the Tang dynasty. Although Wang and his mother were privileged members of the Imperial family, they were always ill. Because of frequent contact with the best doctors in the entire country, Wang gradually developed an interest in medicine. With easy access to the best physicians in the Imperial Palace and the most comprehensive library in the country, the young scholar was in an excellent position to gain an overview of the field, and a discerning eye for the patterns and details in published works. Wang spent more than 20 years integrating all of the existing medical texts, filling in any omissions, and correcting errors. Published in 752 CE, *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) was the most comprehensive text compiled during that era. It documented over 1,000 medical problems and over 6,900 herbal formulas for use in gynecology, obstetrics, pediatrics, psychiatry, dermatology, ophthalmology, dentistry, and osteopathy. Carefully written and referenced in great detail, this text gave ordinary people a unique opportunity to gain deeper insight and understanding of medicine. Wang was credited as a great scholar of Traditional Chinese Medicine. *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) was regarded by many as 世宝 a World Treasure.

Representative formulas from *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) include:

- *Cong Bai Qi Wei Yin* (Scallion Decoction with Seven Ingredients)
- *Shi Gao Tang* (Gypsum Decoction)
- *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity)
- *Zi Xue Dan* (Purple Snow Pill)
- *Shen Mi Tang* (Mysterious Decoction)
- *Xu Ming Tang* (Prolong Life Decoction)

Chapter 14 — Overview

— Wind-Expelling Formulas

Definition: Wind-expelling formulas treat both external and internal wind. They disperse and release external wind with acrid herbs, and calm and extinguish internal wind with cold herbs.

External wind syndromes are those resulting from invasion of external wind at the exterior of the body, such as the muscles, joints, tendons, ligaments, bones, channels, and collaterals. Because external wind may combine with heat, cold, and damp, external wind syndromes are further classified into wind-heat, wind-cold, and wind-damp syndromes. The main clinical manifestations of external wind syndromes are headache, aversion to wind, itching of the skin, numbness of the extremities, painful joints, deviation of the mouth and eyes, and muscle convulsions.

Internal wind syndromes refer to Liver wind rising, as a manifestation of disorders of the *zang fu* organs. Common causes of internal wind rising include extreme heat, yin deficiency, and blood deficiency. Common clinical manifestations of internal wind syndromes are dizziness, vertigo, trembling, spasms and cramps of the four extremities, dysphasia, sudden unconsciousness, hemiplegia, and deviation of the mouth and eyes.

Proper treatment of wind disorders must begin with accurate differential diagnosis to determine the main characteristics: external or internal wind, deficiency or excess, and cold or hot. External wind must be treated with acrid and dispersing herbs that dispel external wind, and internal wind must be treated with cold herbs that extinguish internal wind. Furthermore, wind is often complicated by heat, cold, dampness, or phlegm, which must be addressed with the addition of appropriate herbs. External and internal wind may engender each other, or occur at the same time, leading to more complications. All these potential complications must be considered to ensure successful treatment.

SUBCATEGORIES OF ACTION

Wind-expelling formulas are thus divided into external-wind releasing formulas and internal-wind extinguishing formulas.

1. External-Wind Releasing Formulas

These formulas are suitable for treating various illnesses caused by external wind attacking the body. The external-wind releasing formulas are suitable for treating the invasion of external wind past the skin layer into the muscles, tendons, ligaments, bones, joints, channels, and collaterals. Commonly seen clinical manifestations include headache, dizziness, rubella, eczema, deviation of the mouth and eyes, dysphasia, joint pain, numbness, and limited movement. Tetanus is considered an external wind disorder, in which external wind enters the body via open wounds on the skin to cause symptoms such as lockjaw, spasms and cramps, and, in severe cases, kyphosis.

Herbs frequently used to disperse wind from the exterior include *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), *Fang Feng* (Radix Saposhnikovia), *Chuan Xiong* (Rhizoma Chuanxiong), *Bai Zhi* (Radix Angelicae Dahuricae), *Jing Jie* (Herba Schizonepetae), and *Bai Fu Zi* (Rhizoma Typhonii). Exemplar formulas include *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea), *Qian Zheng San* (Lead to Symmetry Powder) and *Da Qin Jiao Tang* (Major Gentiana Macrophylla Decoction).

External wind affects superficial aspects of the body, muscle and joints. Internal wind affects the *zang fu* organs in the interior.

Chapter 14 — Overview

Note: Two other chapters discuss formulas that treat external wind. Chapter 1: Exterior-Releasing Formulas, discusses the use of herbs that treat external wind invading only superficial parts of the body (e.g., the skin) causing various exterior symptoms, such as fever and aversion to cold. Chapter 17: Wind-Damp Dispelling Formulas, discusses the use of herbs to address external wind-dampness attacking the muscles and joints, such as found in *bi zheng* (painful obstruction syndrome).

2. Internal-Wind Extinguishing Formulas

These formulas are suitable for treating Liver wind rising associated with excess or deficiency conditions. Excess-type Liver wind is characterized by extreme heat or hyperactive Liver yang causing the wind to rise upward. Deficiency-type Liver wind is characterized by wind rising due to underlying yin and blood deficiencies.

Exterior and internal wind may engender each other, or occur at the same time, leading to more complications.

Internal wind may rise upward as a result of extreme heat or hyperactive Liver yang. If the rising wind is caused by extreme heat, there may be persistent high fever, unconsciousness, and spasms and cramps of the four extremities. If the rising wind is caused by hyperactivity of Liver yang, there may be dizziness, vertigo, burning sensations and pain in the head, a rosy facial appearance (resembling that after alcohol consumption), sudden coma, deviation of the mouth, and hemiplegia.

Rising of wind caused by extreme heat or hyperactive Liver yang is considered an excess syndrome; therefore, the proper treatment plan is to sedate the Liver and extinguish wind. Herbs that sedate the Liver and calm wind include *Gou Teng* (*Ramulus Uncariae cum Uncis*), *Shi Jue Ming* (*Concha Haliotidis*), *Tian Ma* (*Rhizoma Gastrodiae*), *Ju Hua* (*Flos Chrysanthemi*), *Mu Li* (*Concha Ostreae*) and *Ji Li* (*Fructus Tribuli*). Exemplar formulas include *Tian Ma Gou Teng Yin* (*Gastrodia and Uncaria Decoction*), *Ling Jiao Gou Teng Tang* (*Antelope Horn and Uncaria Decoction*) and *Zhen Gan Xi Feng Tang* (*Sedate the Liver and Extinguish Wind Decoction*).

Internal wind may rise when there are underlying deficiencies. In cases of chronic *wen bing* (warm disease) damaging yin and/or blood, the rise of internal wind may lead to symptoms such as muscle spasms and cramps with peristalsis-like involuntary movements of the hands and feet. The proper treatment plan in this case would be to nourish yin and blood and extinguish internal wind. Herbs that nourish yin and blood to subdue rising wind include *Di Huang* (*Radix Rehmanniae*), *Bai Shao* (*Radix Paeoniae Alba*), *E Jiao* (*Colla Corii Asini*), and *Ji Zi Huang* (*Galli Vitellus*). Exemplar formulas include *Da Ding Feng Zhu* (*Major Arrest Wind Pearl*) and *E Jiao Ji Zi Huang Tang* (*Ass-Hide Gelatin and Egg Yolk Decoction*).

CAUTIONS / CONTRAINDICATIONS

- Proper diagnosis is crucial in the treatment of wind disorders. External wind must be released or dispersed outward, while Liver wind should be calmed and extinguished. Incorrect treatment of wind in the interior using external-wind releasing formulas that are acrid and dispersing in nature will worsen the condition by stimulating Liver yang and stirring Liver wind. Similarly, incorrect treatment of wind at the exterior using internal-wind extinguishing formulas will complicate the disorder by deepening the injury.
- Herbs that disperse external wind are often acrid, warm and drying. Therefore, they should be used with caution in individuals with underlying deficiencies of yin and/or body fluids.
- External wind is often accompanied by other pathogenic factors, such as heat, cold, dampness, or phlegm, which should also be addressed.
- External wind also may trigger the rise of Liver wind, leading to a complicated exterior / interior condition. In this case, both exterior and interior conditions must be addressed at the same time.
- Internal wind may be complicated by excess (extreme heat or Liver yang hyperactivity) or deficiency (yin and/or blood deficiencies), and must be diagnosed and treated accordingly.

Chapter 14 — Overview

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Wind is responsible for a wide variety of disorders. Accordingly, wind-expelling formulas are used to treat a broad spectrum of disease and illness.

Exterior wind-releasing formulas are most effective for dermatological and musculoskeletal disorders.

- External-wind releasing formulas** generally treat conditions affecting the exterior of the body, such as the skin, muscles, tendons, ligaments, bones, joints, channels, and collaterals. Common clinical applications include:
 - **Skin disorders:** Pharmacologically, external-wind releasing formulas have mast cell stabilizing and antiallergic effects,^{1,2} and are used to treat skin disorders such as itching,³ urticaria,^{4,5} eczema,⁶ psoriasis,⁷ and neurodermatitis.⁸ *Xiao Feng San* (Eliminate Wind Powder) and *Dang Gui Yin Zi* (Tangkuei Decoction) are representative external-wind releasing formulas that treat dermatological disorders.
 - **Facial paralysis:** *Qian Zheng San* (Lead to Symmetry Powder) and *Yu Zhen San* (True Jade Powder) are external-wind releasing formulas frequently used to treat facial paralysis.^{9,10,11,12}
 - **Pain:** Analgesic and anti-inflammatory effects are well documented among external-wind releasing formulas.^{13,14} Clinically, these formulas treat headache,¹⁵ migraine headache,¹⁶ angioneurotic headache,¹⁷ trigeminal pain,¹⁸ and numbness and paralysis of the peripheral nerves.¹⁹ Exemplar formulas include *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea) and *Qian Zheng San* (Lead to Symmetry Powder).
- Internal-wind extinguishing formulas** usually treat cardiovascular disorders, such as hypertension, stroke, and post-stroke sequelae.
 - **Hypertension:** Internal-wind extinguishing formulas are well-documented for their antihypertensive effects to lower blood pressure.^{20,21,22} Formulas that effectively treat hypertension include *Gou Teng San* (Uncaria Powder),²³ *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction),²⁴ and *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction).²⁵
 - **Stroke and post-stroke sequelae:** Internal-wind extinguishing formulas have been shown to be effective in the prevention and treatment of stroke, and in management of post-stroke sequelae. The mechanisms of action are attributed in part to antiplatelet effects,²⁶ antihypertensive effects,²⁷ and the activation of nitric oxide synthase to improve cerebral circulation.²⁸ Formulas commonly used in the prevention and treatment of stroke include *Gou Teng San* (Uncaria Powder),²⁹ *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction),³⁰ *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction),³¹ and *Di Huang Yin Zi* (Rehmannia Decoction).³² Formulas frequently used to treat post-stroke sequelae include *Da Ding Feng Zhu* (Major Arrest Wind Pearl) and *Di Huang Yin Zi* (Rehmannia Decoction).^{33,34}
 - **Others:** Internal-wind extinguishing formulas may also treat other cardiovascular or circulatory disorders, including but not limited to dizziness,³⁵ vertigo,³⁶ tinnitus,³⁷ Alzheimer's disease,³⁸ vascular dementia,³⁹ and concussion.⁴⁰ Exemplar formulas include *Gou Teng San* (Uncaria Powder) and *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction).

Internal-wind extinguishing formulas are most useful to treat cardiovascular disorders.

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends cooking the ingredients with 2 bowls of water until the liquid is reduced to 80% (1.6 bowls). Take the strained decoction while warm. Today, the decoction can be prepared using the doses given in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Expels wind and nourishes the blood
2. Clears heat and dispels dampness

CLINICAL MANIFESTATIONS

Rashes: eczema and skin rashes with red discoloration affecting a large part of the body, severe itching and leakage of fluids upon scratching, a white or yellow tongue coating, and a superficial, rapid and forceful pulse.

CLINICAL APPLICATIONS

Eczema, urticaria, rashes, rubella, dermatitis, tinea capitis, psoriasis, and balanoposthitis.

EXPLANATION

Xiao Feng San (Eliminate Wind Powder) treats wind-dampness and wind-heat attacking the skin and muscle layers of the body, giving rise to rashes, eczema, severe itching, and leakage of fluids. The treatment approach for this syndrome is to dispel wind and dampness, clear heat, and cool the blood.

Jing Jie (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Chan Tui* (Periostracum Cicadae), and *Niu Bang Zi* (Fructus Arctii) are the chief herbs that dispel wind from the exterior. *Cang Zhu* (Rhizoma Atractylodis)

Xiāo Fēng Sǎn (Eliminate Wind Powder)

Xiao Feng San (Eliminate Wind Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Rashes	<ul style="list-style-type: none">• Rashes or eczema with red discoloration, severe itching and discharge of fluids: wind-dampness and wind-heat attacking the skin and muscle layers of the body• White or yellow tongue coating, and a superficial, rapid and forceful pulse: wind-dampness or wind-heat condition	<ul style="list-style-type: none">• Expels wind and nourishes the blood• Clears heat and dispels dampness	<ul style="list-style-type: none">• <i>Jing Jie</i> (Herba Schizonepetae), <i>Fang Feng</i> (Radix Saposhnikoviae), <i>Chan Tui</i> (Periostracum Cicadae), and <i>Niu Bang Zi</i> (Fructus Arctii) dispel wind from the exterior.• <i>Cang Zhu</i> (Rhizoma Atractylodis) strengthens the Spleen and dries dampness.• <i>Ku Shen</i> (Radix Sophorae Flavescentis) clears heat and dries dampness.• <i>Mu Tong</i> (Caulis Akebiae) eliminates damp-heat through diuresis.• <i>Shi Gao</i> (Gypsum Fibrosum) and <i>Zhi Mu</i> (Rhizoma Anemarrhenae) clear heat and sedate fire.• <i>Di Huang</i> (Radix Rehmanniae), <i>Dang Gui</i> (Radix Angelicae Sinensis), and <i>Hei Zhi Ma</i> (Semen Sesami Nigrum) tonify blood, nourish yin, and moisten dryness.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) clears heat, eliminates toxins, and harmonizes the herbs.

strengthens the Spleen and dries dampness. *Ku Shen* (Radix Sophorae Flavescentis) clears heat and dries dampness. *Mu Tong* (Caulis Akebiae) eliminates damp-heat through diuresis. *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae) clear heat and sedate fire. Since wind-dampness and wind-heat may injure yin and blood, *Di Huang* (Radix Rehmanniae), *Dang Gui* (Radix Angelicae Sinensis), and *Hei Zhi Ma* (Semen Sesami Nigrum) are added to tonify the blood, nourish yin, and moisten dryness. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) clears heat, eliminates toxins, and harmonizes the formula.

MODIFICATIONS

- With more wind-heat, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- With more damp-heat, add *Di Fu Zi* (Fructus Kochiae) and *Che Qian Zi* (Semen Plantaginis).
- With heat in the *xue* (blood) level, add *Chi Shao* (Radix Paeoniae Rubra) and *Zi Cao* (Radix Arnebiae).
- For wet-type eczema with fluids in the lesions, add *Yi Yi Ren* (Semen Coicis).
- For allergic dermatitis with itching, add *Shi Wei Bai Du Tang* (Ten-Ingredient Decoction to Overcome Pathogenic Influences).

CAUTIONS / CONTRAINDICATIONS

- While taking *Xiao Feng San*, the following are contra-indicated: spicy or greasy foods, seafood, cigarette smoking,

alcohol, and tea that is overly concentrated or steeped very long.

- Many herbs in this formula are acrid (exterior-releasing herbs) and drying (damp-dispelling herbs), and may damage yin and blood. Therefore, this formula should be used with caution in patients with qi and blood deficiencies.¹

PHARMACOLOGICAL EFFECTS

1. **Antiallergic and immunosuppressive:** Administration of *Xiao Feng San* was associated with marked action to treat allergy and suppress the immune systems of mice.²
2. **Mast cell stabilizer:** Administration of *Xiao Feng San* and *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) at 4-40 mcg/mL was found to inhibit IgE-dependent histamine released from mouse-cultured mast cells.³

CLINICAL STUDIES AND RESEARCH

1. **Urticaria:** One study reported 97.6% effectiveness using modified *Xiao Feng San* to treat 124 patients with urticaria. Modifications to the formula included the addition of *Jin Yin Hua* (Flos Lonicerae Japonicae), *Wu Gong* (Scolopendra), *Zhi Zi* (Fructus Gardeniae), and *Huang Lian* (Rhizoma Coptidis) for wind-heat; *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi) for wind-cold; and *He Shou Wu* (Radix Polygoni Multiflori), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Wu Mei* (Fructus Mume) for yin deficiency. The herbs were given one time daily in decoction. Of 124 patients, the

Xiao Feng San (Eliminate Wind Powder)

study reported complete recovery in 85 cases, significant improvement in 36 cases, and no effect in 3 cases.⁴

2. **Eczema:** Use of *Xiao Feng San* in 44 patients with eczema was associated with complete recovery in 38 cases and near-complete recovery in 6 cases. The herbs were given on a daily basis, for an average of 20 days (ranging between 5 and 23 days). Those with severe eczema also received topical application of herbs, made by grinding fresh *Ma Chi Xian* (Herba Portulacae) into an herbal paste. In addition to herbal treatment, all patients were instructed to maintain a bland diet and avoid spicy and pungent foods.⁵
3. **Balanoposthitis:** One study reported good results using modified *Xiao Feng San* to treat inflammation of the foreskin and glans in uncircumcised males. The herbal formula contained *Jing Jie* (Herba Schizonepetae) 10g, *Fang Feng* (Radix Saposhnikoviae) 10g, *Tong Cao* (Medulla Tetrapanacis) 10g, *Chan Tui* (Periostracum Cicadae) 10g, *Ku Shen* (Radix Sophorae Flavescentis) 10g, dry-fried *Cang Zhu* (Rhizoma Atractylodis) 10g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Zhi Mu* (Rhizoma Anemarrhenae) 10g, *Di Huang* (Radix Rehmanniae) 15g, *Shi Gao* (Gypsum Fibrosum) 20g, *Jiang Can* (Bombyx Batryticatus) 5g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g. The treatment protocol was to cook the herbs in water, and administer the decoction in two equally-divided doses daily, for 5 days per course of treatment. Of 90 patients who had this condition (with a history of illness ranging from 14 days to 4 months), the study reported complete recovery in 82 cases within 1 course treatment, and 8 cases within 2 courses.⁶
4. **Psoriasis:** One study reported satisfactory results using modified *Xiao Feng San* to treat psoriasis. The herbal treatment contained *Jin Yin Hua* (Flos Lonicerae Japonicae) 15g, *Lian Qiao* (Fructus Forsythiae) 15g, *Fang Feng* (Radix Saposhnikoviae) 15g, *Dang Gui* (Radix Angelicae Sinensis) 8g, *Qing Dai* (Indigo Naturalis) 12g, *Jing Jie* (Herba Schizonepetae) 10g, *Di Huang* (Radix Rehmanniae) 12g, *Niu Bang Zi* (Fructus Arctii) 10g, *Di Fu Zi* (Fructus Kochiae) 10g, *Bai Xian Pi* (Cortex Dictamnii) 12g, *Cang Zhu* (Rhizoma Atractylodis) 8g, *Chan Tui* (Periostracum Cicadae) 10g, *Zi Cao* (Radix Arnebiae) 10g, *Shi Gao* (Gypsum Fibrosum) 12g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. The herbs were given in decoction daily.⁷

HERB-DRUG INTERACTION

Ampicillin-induced rash: Ampicillin-induced allergic rash in 68 patients was treated with herbs with 96% effectiveness, as reported in one study. The herbal treatment contained *Dang Gui* (Radix Angelicae Sinensis) 9g, *Di Huang* (Radix Rehmanniae) 9g, *Hei Zhi Ma*

(Semen Sesami Nigrum) 9g, *Jing Jie* (Herba Schizonepetae) 9g, *Fang Feng* (Radix Saposhnikoviae) 9g, *Niu Bang Zi* (Fructus Arctii) 9g, *Chan Tui* (Periostracum Cicadae) 9g, *Cang Zhu* (Rhizoma Atractylodis) 9g, *Ku Shen* (Radix Sophorae Flavescentis) 9g, *Duan Shi Gao* (Gypsum Fibrosum Praeparatum) 9g, *Zhi Mu* (Rhizoma Anemarrhenae) 9g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 4g, and *Mu Tong* (Caulis Akebiae) 4g as the base formula. Modifications were made when necessary, with the addition of *Lian Qiao* (Fructus Forsythiae) 6g for wind-heat; *Chi Shao* (Radix Paeoniae Rubra) 9g for heat in the blood; *Da Huang* (Radix et Rhizoma Rhei) 6g for heat and toxins; and the addition of *Che Qian Zi* (Semen Plantaginis) 6g and elimination of *Cang Zhu* (Rhizoma Atractylodis) for damp-heat. The study reported complete recovery in 65 of 68 patients within 1-4 packs of herbs given via herbal decoction.⁸

Qu Feng San (Dispel Wind Powder) treats skin disorders by releasing wind, clearing heat, cooling the blood, and draining dampness. Clinical applications include rashes, itching, eczema, dermatitis, and skin allergies secondary to drugs, chemicals, or food.

AUTHORS' COMMENTS

In addition to using *Xiao Feng San* internally to relieve itching, *Ku Shen* (Radix Sophorae Flavescentis) and *She Chuang Zi* (Fructus Cnidii) can be used as an external wash to enhance the overall effects. Furthermore,

Xiāo Fēng Sǎn (Eliminate Wind Powder)

topical application of *Ma Chi Xian* (Herba Portulacae) as an herbal paste also increases the overall effectiveness of *Xiao Feng San*.

From a traditional Chinese medical perspective, *Xiao Feng San* treats dermatological disorders caused by wind-dampness and wind-heat attacking the skin. In terms of anatomy and physiology, such dermatological disorders are similar in location and manifestation to allergic or hypersensitivity reactions.

<i>He Shou Wu</i> (Radix Polygoni Multiflori)	15g [6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	15g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into a coarse powder. Cook 12g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 large bowls of water until the liquid is reduced to 80% (1.2 large bowls). Take the warm, strained decoction any time during the day. Today, this formula may be prepared as a decoction using the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the blood and moistens dryness

2. Dispels wind and relieves itching

CLINICAL MANIFESTATIONS

Skin disorders caused by blood deficiency and exterior wind: anemia, dry and coarse skin, itching, swelling, abscesses, and ulceration.

CLINICAL APPLICATIONS

Eczema, rash, urticaria, neurodermatitis, ichthyosis, psoriasis, alopecia, carbuncles, furuncles, and atrophy of the sebaceous glands and sweat glands and skin tissue.

Dāng Guī Yīn Zǐ (Tangkuei Decoction)

EXPLANATION

Dang Gui Yin Zi (Tangkuei Decoction) treats skin disorders caused by blood deficiency and exterior wind. Blood deficiency can lead to malnourishment of the skin, characterized by dryness, coarseness, lack of moisture, and lack of skin tone. Patients with chronic blood deficiency accompanied by exterior wind and heat usually show more serious signs and symptoms of dermatological disorders, such as eczema and carbuncles, with or without abscesses and ulceration.

Dang Gui Yin Zi follows the principles of *Si Wu Tang* (Four-Substance Decoction) to tonify the blood, with the addition of herbs that treat wind and heat. *Di Huang* (Radix Rehmanniae) nourishes the blood and tonifies the Kidney. *Dang Gui* (Radix Angelicae Sinensis) both tonifies and activates blood circulation. *Bai Shao* (Radix Paeoniae Alba) nourishes the blood and consolidates yin. *Chuan Xiong* (Rhizoma Chuanxiong) activates and regulates blood circulation. *Ji Li* (Fructus Tribuli) dispels both internal and external wind to relieve itching, while *Jing Jie* (Herba Schizonepetae) and *Fang Feng* (Radix Saposhnikoviae) dispel exterior wind and treat various skin disorders. *Huang Qi* (Radix Astragali) tonifies *wei* (defensive) *qi* and strengthens the exterior. *He Shou Wu* (Radix Polygoni Multiflori) nourishes *jing* (essence) and blood. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- For severe blood deficiency, add *Gou Qi Zi* (Fructus Lycii), *Huo Ma Ren* (Fructus Cannabis), and *Ji Xue Teng* (Caulis Spatholobi).
- For qi deficiency, add *Dang Shen* (Radix Codonopsis).
- With dry, scaly skin due to blood stasis, add *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Hong Hua* (Flos Carthami).
- With itchy skin, combine with *Chan Tui* (Periostracum Cicadae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Shou Wu Teng* (Caulis Polygoni Multiflori), and *He Huan Pi* (Cortex Albiziae).
- With dryness and atrophy of the skin due to lack of secretion from sebaceous and sweat glands, add *Shan Zhu Yu* (Fructus Corni) and *Huo Ma Ren* (Fructus Cannabis).
- To nourish the skin and slow the aging process of the skin, combine with *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) or *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).
- For measles, add *Tu Fu Ling* (Rhizoma Smilacis Glabrae) and *Xuan Shen* (Radix Scrophulariae).
- With constipation, combine with *Ma Zi Ren Wan* (Hemp Seed Pill).

CAUTIONS / CONTRAINDICATIONS

While taking *Dang Gui Yin Zi*, patients should avoid alcohol and foods that are greasy, fatty, or deep-fried, as well as foods that are spicy, pungent, or stimulating in nature.

Dang Gui Yin Zi (Tangkuei Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Dāng Guī Yīn Zǐ (Tāngkuēi Decoction)

CLINICAL STUDIES AND RESEARCH

- 1. Itching:** Administration of a modified *Dang Gui Yin Zi* formula was 96.15% effective in treating 78 geriatric patients with constant itching of the skin. The formula contained 12-15g of *Dang Gui* (Radix Angelicae Sinensis); 10-12 grams each of *Shu Di Huang* (Radix Rehmanniae Praeparata), *Huang Qi* (Radix Astragali), *Ji Li* (Fructus Tribuli), *Chuan Xiong* (Rhizoma Chuanxiong), *Jing Jie* (Herba Schizonepetae), and *Bai Shao* (Radix Paeoniae Alba); 30g of *He Shou Wu* (Radix Polygoni Multiflori); and 6g each of *Fang Feng* (Radix Saposhnikoviae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The treatment protocol was to cook the herbs in water, and drink the decoction in two to three equally-divided doses daily. The average duration of treatment was 26.5 packs of herbs. Out of 78 patients, the study reported complete recovery in 36 cases and improvement in 39 cases. Complete recovery was defined as relief of symptoms, with no recurrence 1-2 months after the termination of herbal treatment.¹
- 2. Urticaria:** Administration of *Dang Gui Yin Zi* had marked effectiveness in treating 56 patients with chronic urticaria that did not respond to drug treatment. The herbal treatment used *Dang Gui Yin Zi* as the base, and added *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for qi deficiency; *Mu Dan Pi* (Cortex Moutan) and *Xuan Shen* (Radix Scrophulariae) for yin deficiency; *Huang Qin* (Radix Scutellariae) and *Tu Fu Ling* (Rhizoma Smilacis Glabrae) for damp-heat; *Wu Zhu Yu* (Fructus Evodiae) and *Rou Gui* (Cortex Cinnamomi) for damp-cold; and *Chi Shao* (Radix Paeoniae Rubra) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for blood stagnation. The treatment protocol was to cook the herbs in water, and drink the decoction in two to three equally-divided doses daily. The patients were instructed to discontinue the drugs during herbal treatment. Of 56 patients, the study reported complete recovery in 29 cases and moderate improvement in 16 cases after the first 5-day course of treatment. After the second course of treatment, the study reported complete recovery in 40 cases and moderate improvement in 12 cases. The rate of effectiveness was 80% after the first course, and 92.8% after the second course. The study noted that the group with qi and blood deficiencies was most responsive to the herbal treatment.²
- 3. Neurodermatitis:** One report stated that administration of modified *Dang Gui Yin Zi*, plus topical application of steroids, was more effective (96.5% effectiveness in 86 patients) than topical application of steroids alone (65.4% effectiveness in 52 patients). The herbal formula contained 10g each of *Dang Gui* (Radix Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubra), *Fang Feng* (Radix Saposhnikoviae), *Ji Li* (Fructus Tribuli), *Huang Qi* (Radix Astragali), *Hong Hua* (Flos Carthami), *Chan Tui* (Periostracum Cicadae), and *Di Fu Zi* (Fructus Kochiae); 15g of *Di Huang* (Radix Rehmanniae); 6g of *Chuan Xiong* (Rhizoma Chuanxiong); 30g of *He Shou Wu* (Radix Polygoni Multiflori), and others as deemed necessary.³
- 4. Ichthyosis:** In one case report, a patient with a 10-year history of non-inflammatory scaling of the skin was treated successfully with 50 doses of *Dang Gui Yin Zi*, without recurrence during the 3 years of follow-up.⁴ According to another report, a modified *Dang Gui Yin Zi* formula was found to have good effect in treating ichthyosis with rough, scale-like appearance of the skin all over the extremities, back, and chest. The herbal treatment contained *Dang Gui* (Radix Angelicae Sinensis) 10g, *Chuan Xiong* (Rhizoma Chuanxiong) 10g, *Bai Shao* (Radix Paeoniae Alba) 10g, *Gou Qi Zi* (Fructus Lycii) 10g, *Huang Qi* (Radix Astragali) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Di Fu Zi* (Fructus Kochiae) 10g, *Zi Cao* (Radix Arnebiae) 10g, *Ji Li* (Fructus Tribuli) 10g, *Chi Shao* (Radix Paeoniae Rubra) 6g, *He Shou Wu* (Radix Polygoni Multiflori) 10g, dry-fried *Jing Jie* (Herba Schizonepetae) 5g, *Fang Feng* (Radix Saposhnikoviae) 6g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. The herbs were cooked in water, and the decoction administered in two equally-divided doses daily. The average duration of treatment was slightly over 6 months.⁵
- 5. Alopecia:** Continuous administration of *Dang Gui Yin Zi* for 2-4 months was effective in treating 6 of 7 patients with alopecia. The hair was restored to normal quantity and color. In addition, no further hair loss was reported in these 6 patients upon follow-up, one year after the discontinuation of herbal treatment.⁶

AUTHORS' COMMENTS

From a traditional Chinese medical perspective, *Dang Gui Yin Zi* treats dermatological disorders caused by blood deficiency and exterior wind. In term of anatomy and physiology, such dermatological disorders are similar to atrophy of the skin tissue, sebaceous glands, and sweat glands.

Xiao Feng San (Eliminate Wind Powder) and *Dang Gui Yin Zi* both treat skin disorders characterized by wind at the exterior and blood deficiency in the interior.

- *Xiao Feng San* clears wind-dampness and wind-heat, and nourishes and cools the blood. It mainly treats rashes, eczema, and other skin disorders primarily caused by dampness and heat invading the exterior.
- *Dang Gui Yin Zi* tonifies blood, moistens dryness, and releases wind. It is more effective for eczema, rashes,

Dāng Guī Yīn Zǐ (Tāngkuéi Decoction)

urticaria, and other skin conditions complicated by both exterior (wind) and interior (dryness with blood deficiency) factors.

Chuān Xiōng Chá Tiáo Sǎn

(Ligusticum Chuanxiong Powder to be Taken with Green Tea)

川芎茶調散

川芎茶调散

Pinyin Name: *Chuan Xiong Cha Tiao San*

Literal Name: Ligusticum Chuanxiong Powder to be Taken with Green Tea

Alternate Names: *Chuan Chiung Cha Tiao San*, Chuan Chiung and Tea-Regulating Formula, Tea-Blended Ligusticum Powder, Cnidium and Tea Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	120g [12g]
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	60g [6g]
<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	60g [6g]
<i>Xi Xin</i> (Radix et Rhizoma Asari)	30g [3g]
<i>Bo He</i> (Herba Menthae), do not expose to heat	240g [12g]
<i>Jing Jie</i> (Herba Schizonepetae)	120g [12g]
<i>Fang Feng</i> (Radix Saposhnikoviae)	45g [4.5g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	60g [6g]

Note: There are two variations of this formula according to the source text. One contains 30g of *Xi Xin* (Radix et Rhizoma Asari) as stated above, the other contains instead 240g of dry-fried *Xiang Fu* (Rhizoma Cyperi).

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into a fine powder. Take 6g per dose with green tea after meals. Today, this formula is usually given in powder or decoction form. For powder, take 6g of finely-ground powder with tea made from *Cha Ye* (Folium Camelliae) twice daily. For decoction, use the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Clears wind and stops pain

CLINICAL MANIFESTATIONS

Headache caused by exterior wind attack: headache (frontal, temporal, occipital or vertex), aversion to cold, fever, vertigo, stuffy nose, a thin, white tongue coating, and a superficial pulse. Other key symptoms include nasal obstruction or discharge that is clear or white in color, sneezing, and body aches.

CLINICAL APPLICATIONS

Common cold, influenza, headache, migraine headache, angioneurotic headache, tension headache, neurogenic headache, trigeminal pain, peripheral nerve numbness and paralysis, nasal obstruction, rhinitis, sinusitis, and nasal polyps.

Chuān Xiōng Chá Tiáo Sǎn

(Ligusticum Chuanxiong Powder to be Taken with Green Tea)

EXPLANATION

Chuan Xiong Cha Tiao San (Ligusticum Chuanxiong Powder to be Taken with Green Tea) treats headache caused by exterior wind attack. As the wind attacks the exterior, it travels along the channels to the head, causing headache and vertigo. Because wind is mobile in nature, the headache can manifest in irregular onset of pain, and may affect different parts of the head (frontal, temporal, occipital or vertex). Symptoms such as chills and fever indicate exterior wind affecting the superficial aspects of the body. Others signs and symptoms of exterior wind condition include stuffy nose, a thin, white tongue coating, and a superficial pulse.

This formula has *Chuan Xiong* (Rhizoma Chuanxiong), *Bai Zhi* (Radix Angelicae Dahuricae), and *Qiang Huo* (Rhizoma et Radix Notopterygii) to disperse wind and relieve headache. Among these herbs, *Chuan Xiong* (Rhizoma Chuanxiong) is especially effective in treating *shaoyang* (temporal) and *jueyin* (vertex) headaches; *Qiang Huo* (Rhizoma et Radix Notopterygii) is especially effective in treating *taiyang* (occipital) headaches; and *Bai Zhi* (Radix Angelicae Dahuricae) is effective in treating *yangming* (frontal) headaches. *Xi Xin* (Radix et Rhizoma Asari) dispels cold and relieves pain, especially from *shaoyin* headaches. It also opens sensory orifices to relieve nasal obstruction. *Bo He* (Herba Menthae) dispels wind, opens the orifices, and relieves headache. *Jing Jie* (Herba Schizonepetae) and *Fang Feng* (Radix Saposhnikoviae) are acrid and disperse wind from the upper parts of the

body. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs. Finally, *Cha Ye* (Folium Camelliae), bitter and cold, is used for two main purposes: to clear the sensory orifices, and to prevent the warming, drying, and dispersing herbs from causing side effects.

MODIFICATIONS

- For headache or migraines caused by wind-heat, add *Ju Hua* (Flos Chrysanthemi) and *Jiang Can* (Bombyx Batryticatus).
- For headache caused by wind-cold, add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Zi Su Ye* (Folium Perillae).
- For headache caused by wind and phlegm, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).
- For chronic, stubborn headache, add *Quan Xie* (Scorpio), *Jiang Can* (Bombyx Batryticatus), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami).
- For vertex headache, add *Gao Ben* (Rhizoma et Radix Ligustici).
- For headache with rhinitis and sinusitis, add *Cang Er Zi* (Fructus Xanthii) and *Xin Yi Hua* (Flos Magnoliae).
- For neurogenic headache, add *Man Jing Zi* (Fructus Vitis) and *Ji Li* (Fructus Tribuli).
- For headache from hypertension, remove *Qiang Huo* (Rhizoma et Radix Notopterygii), *Bai Zhi* (Radix Angelicae Dahuricae), and *Cha Ye* (Folium Camelliae); and add *Ju Hua* (Flos Chrysanthemi), *Bai Shao* (Radix Paeoniae Alba), *Ge Gen* (Radix Puerariae Lobatae), and *Gou Teng* (Ramulus Uncariae cum Uncis).

Chuān Xiōng Chá Tiáo Sǎn

(Ligusticum Chuanxiong Powder to be Taken with Green Tea)

CAUTIONS / CONTRAINDICATIONS

- Because many of the herbs in *Chuan Xiong Cha Tiao San* are warm in nature, cold herbs should be added if the headache is caused by wind-heat factors.
- Because this formula contains many acrid, warm, drying, and dispersing herbs, it is contraindicated in headaches caused by qi deficiency, blood deficiency, Kidney yin deficiency, Liver yin deficiency, Liver yang excess, or Liver wind rising.

PHARMACOLOGICAL EFFECTS

1. **Analgesic:** Administration of *Chuan Xiong Cha Tiao San* was associated with a marked analgesic effect in mice, with onset of action starting 15 minutes after oral ingestion, and lasting for approximately 3 hours.¹
2. **Anti-inflammatory:** *Chuan Xiong Cha Tiao San* has been shown to have anti-inflammatory effects in mice and rats. The mechanism of this action is related to the adrenal cortex, as effectiveness was voided in subjects whose adrenal glands had been surgically removed.²
3. **Antipyretic:** Administration of *Chuan Xiong Cha Tiao San* has been shown to reduce fever in rats. The onset of action started approximately 30 minutes after oral ingestion, and duration of action was approximately 2 hours.³

CLINICAL STUDIES AND RESEARCH

1. **Headache:** One study showed that use of modified *Chuan Xiong Cha Tiao San* was very effective in treating headache. The herbal treatment contained this formula plus a higher dose of *Chuan Xiong* (Rhizoma Chuanxiong) as the base formula, with modifications as needed. For wind-heat headache, *Ge Gen* (Radix Puerariae Lobatae), *Ban Xia* (Rhizoma Pinelliae), *Wu Zhu Yu* (Fructus Evodiae), and *Gao Ben* (Rhizoma et Radix Ligustici) were added, and *Cha Ye* (Folium Camelliae) was removed. For wind-heat headache, *Cang Zhu* (Rhizoma Atractylodis) and *Gao Ben* (Rhizoma et Radix Ligustici) were added, and *Cha Ye* (Folium Camelliae) was removed. For Liver yang headache, *He Shou Wu* (Radix Polygoni Multiflori), *Sang Shen* (Fructus Mori), *Shi Jue Ming* (Concha Haliotidis), and *Zhen Zhu Mu* (Concha Margaritiferae) were added. For Kidney deficiency headache, *Gou Qi Zi* (Fructus Lycii), *Da Zao* (Fructus Jujubae), *Dang Gui* (Radix Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Du Zhong* (Cortex Eucommiae) were added. For qi deficiency headache, *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), and *Dang Gui* (Radix Angelicae Sinensis) were added, and *Cha Ye* (Folium Camelliae) was removed. For blood deficiency headache, *Si Wu Tang* (Four-Substance Decoction) was added, and *Cha Ye* (Folium Camelliae) was removed. For headache due to

phlegm accumulation, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Tu Bie Chong* (Eupolyphaga seu Steleophaga), and *Jiang Can* (Bombyx Batryticatus) were added. For blood stagnation headache, *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Dang Gui* (Radix Angelicae Sinensis) were added. Of 150 patients, the study reported complete recovery in 142 cases, improvement in 6 cases, and no effect in 2 cases.⁴

2. **Migraine headache:** According to one clinical study, patients with migraine headache characterized by deficiency were divided into two groups for herbal treatment. In group one, modified *Chuan Xiong Cha Tiao San* was used as the base formula for treatment. *Dang Shen* (Radix Codonopsis) and *Bai Shao* (Radix Paeoniae Alba) were added for qi and blood deficiencies, and *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Gou Qi Zi* (Fructus Lycii) were added for qi and yin deficiencies. In group two, patients were treated according to one of three diagnoses: *Ba Zhen Tang* (Eight-Treasure Decoction) for migraine headache due to qi and blood deficiencies; *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) for migraine headache due to qi and yin deficiencies; and *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill) for migraine headache due to Liver and Kidney yin deficiencies. The treatment protocol for both groups was to cook the herbs and administer the decoction in two equally-divided doses daily, for 7 days per course of treatment, for a total of 3 courses. In group one, the study reported complete recovery in 121 of 168 cases, improvement in 39 cases, and no effect in 8 cases (95.23% effectiveness). In group two involving 48 cases, the study reported complete recovery in 9 cases, improvement in 19 cases, and no effect in 20 cases (58.33% effectiveness).⁵
3. **Angioneurotic headache:** Modified *Chuan Xiong Cha Tiao San* successfully treated 52 patients with angioneurotic headache. In addition to the base formula, *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction) was added for more dampness and phlegm; *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction) was added for blood stagnation; and *Jia Wei Xiao Yao San* (Augmented Rambling Powder) was added for Liver qi stagnation with heat. *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra), and blood-moving herbs were added for those with chronic headache that required long-term treatment. Out of 52 patients, the study reported complete recovery in 16 cases, marked improvement in 19

Chuān Xiōng Chá Tiáo Sǎn

(Ligusticum Chuanxiong Powder to be Taken with Green Tea)

cases, slight improvement in 12 cases, and no effect in 5 cases. The overall rate of effectiveness was 90.4%.⁶

4. **Trigeminal pain:** Use of *Chuan Xiong Cha Tiao San* was shown in one study to effectively treat trigeminal pain. Of 15 patients, the study reported complete recovery in 11 cases, and improvement in 4 cases. The duration of treatment ranged between 4 and 12 packs of herbs. The herbal treatment contained *Chuan Xiong* (Rhizoma Chuanxiong) 15g, *Bai Zhi* (Radix Angelicae Dahuricae) 15g, *Jing Jie* (Herba Schizonepetae) 12g, *Fang Feng* (Radix Saposhnikoviae) 12g, *Jiang Can* (Bombyx Batryticatus) 12g, *Man Jing Zi* (Fructus Viticis) 12g, *Xi Xin* (Radix et Rhizoma Asari) 6g, *Cha Ye* (Folium Camelliae) 6g, *Sheng Ma* (Rhizoma Cimicifugae) 6g, *Ye Ju Hua* (Flos Chrysanthemi Indici) 18g, *Bo He* (Herba Menthae) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 9g, and *Di Huang* (Radix Rehmanniae) 20g. Additional modifications were made as necessary.⁷

5. **Peripheral nerve numbness and paralysis:** Topical application of *Chuan Xiong Cha Tiao San* to acupuncture points was effective in treating numbness and paralysis of the peripheral nerves. The treatment protocol was to mix the powered formula with tea and apply it to the points daily for 5 days per course of treatment, followed by one day of rest, and then repeated with additional courses. The points selected included *Dicang* (ST 4), *Jiache* (ST 6), *Juliao* (ST 3), *Tinggong* (SI 19), and others. Duration of treatment varied between 5 and 36 days. Of 54 patients, the study reported complete recovery in 50 cases, marked improvement in 3 cases, and slight improvement in 1 case.⁸

6. **Sinusitis:** According to one report, 12 patients with sinusitis were treated with modified *Chuan Xiong Cha Tiao San* with complete recovery in 11 patients. The duration of treatment ranged from 3 to 9 doses of herbs, with an average of 6 doses. Herbal treatment was modified by removing *Xi Xin* (Radix et Rhizoma Asari), *Qiang Huo* (Rhizoma et Radix Notopterygii), and *Jing Jie* (Herba Schizonepetae), and adding *Huang Qin* (Radix Scutellariae), *Ju Hua* (Flos Chrysanthemi), *Xin Yi Hua* (Flos Magnoliae), *Cang Er Zi* (Fructus Xanthii), *Jin Yin Hua* (Flos Lonicerae Japonicae), and others if necessary.⁹

7. **Nasal polyps:** Twenty-one out of 23 patients with nasal polyps recovered completely by taking modified *Chuan Xiong Cha Tiao San*. The treatment protocol was to administer 10g of the formula in powder, three times daily for 21 days per course of treatment. The herbal treatment was modified by removing *Bo He* (Herba Menthae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and adding *Xin Yi Hua* (Flos Magnoliae), *Cang Er Zi* (Fructus Xanthii), *Shi Gao* (Gypsum Fibrosum), *Zao*

Jiao (Fructus Gleditsiae), *Zi Su Ye* (Folium Perillae), and others.¹⁰

TOXICOLOGY

In an acute toxicology study, administration of 50 g/kg of *Chuan Xiong Cha Tiao San* via gastric tube twice daily for 3 days was associated with reduced spontaneous activities in mice. In a chronic toxicology study, administration of 17 g/kg of this formula via gastric tube one time daily for 8 days was associated with an accelerated rate of growth and increased weight of the spleen. No other abnormalities were noted. The study concluded that this formula has little toxicity.¹¹

Ju Hua Cha Tiao San (Chrysanthemum Powder to be Taken with Green Tea) is composed of *Chuan Xiong Cha Tiao San* plus *Ju Hua* (Flos Chrysanthemi) and *Jiang Can* (Bombyx Batryticatus). *Ju Hua Cha Tiao San* dispels wind, relieves pain, and clears the eyes and head. Clinically, it treats wind-heat conditions with symptoms such as frontal or temporal headache, dizziness, and vertigo.

Chuan Xiong Cha Tiao San and *Ju Hua Cha Tiao San* both treat headache due to exterior wind.

Chuān Xiōng Chá Tiáo Sǎn

(Ligusticum Chuanxiong Powder to be Taken with Green Tea)

- *Chuan Xiong Cha Tiao San* is more effective for wind-cold.
- *Ju Hua Cha Tiao San* is more effective for wind-heat.

AUTHORS' COMMENTS

Chuan Xiong Cha Tiao San is one of the most commonly used formulas for headache caused by exterior wind-cold invasion. This formula is also effective in treating migraines, vascular headaches, or sinus headaches that are cold in nature.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind
2. Resolves phlegm
3. Stops spasms

CLINICAL MANIFESTATIONS

Zhong feng (wind stroke) characterized by deviation of the eyes and mouth and facial spasms.

CLINICAL APPLICATIONS

Facial paralysis, trigeminal neuralgia, hemiplegia, and migraine headache.

EXPLANATION

According to traditional Chinese medicine, *zhong feng* (wind stroke) can affect either the channels and collaterals, or the *zang fu* organs. *Zhong feng* (wind stroke) affecting the channels and collaterals is characterized by deviation of the face and paralysis of the limbs. *Zhong feng* (wind stroke) affecting the *zang fu* organs involves loss of consciousness, hemiplegia, distortion of the face, dysphagia, and absence of urination and defecation during the attack.

Diagnosis	Signs and Symptoms	Treatment	Herbs
Zhong feng (wind stroke)	Deviation of the eyes and mouth and facial spasms: obstruction of wind and phlegm in the channels and collaterals	<ul style="list-style-type: none">• Dispers wind• Resolves phlegm• Stops spasms	<ul style="list-style-type: none">• <i>Bai Fu Zi</i> (Rhizoma Typhonii) dispels wind and clears phlegm in the head and face.• <i>Jiang Can</i> (Bombyx Batryticatus) and <i>Quan Xie</i> (Scorpio) dispel wind and stop spasms.

Qian Zheng San (Lead to Symmetry Powder) is designed specifically for *zhong feng* (wind stroke) affecting the channels and collaterals, with obstruction of wind and phlegm in the face. The channels affected are foot *yang-ming* [Stomach] which encircles the mouth and lips, and foot *taiyang* [Urinary Bladder] which reaches the inner canthus of the eyes. When these two channels are attacked by wind and obstructed by phlegm, the wind and phlegm factors block the qi and blood circulation and cause malnourishment of the muscles and tendons, producing symptoms such as deviation of the eyes and mouth. Facial spasms may also occur.

To effectively treat this syndrome, wind and phlegm must be dispelled. At the same time, qi and blood circulation in the channels and collaterals have to be restored, and the spasms stopped. This formula uses *Bai Fu Zi* (Rhizoma Typhonii) to dispel wind and clear phlegm in the head. *Jiang Can* (Bombyx Batryticatus) and *Quan Xie* (Scorpio) dispel wind and stop spasms. In addition, *Jiang Can* (Bombyx Batryticatus) resolves phlegm, while *Quan Xie* (Scorpio) opens the channels and collaterals. These three herbs synergistically address the cause of *zhong feng* (wind stroke). Lastly, grain-based liquor enhances blood circulation and distribution of herbs to the affected areas.

MODIFICATIONS

- For facial paralysis caused by wind-cold, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Fang Feng* (Radix Saposhnikoviae).
- For facial paralysis caused by wind-dampness, add *Wu Gong* (Scolopendra).
- For facial twitching, add *Wu Gong* (Scolopendra), *Tian Ma* (Rhizoma Gastrodiae), and *Di Long* (Pheretima).

CAUTIONS / CONTRAINDICATIONS

- *Qian Zheng San* is acrid, warm, and drying in nature, and should be reserved for *zhong feng* (wind stroke) characterized by cold, wind and phlegm.
- Because *Bai Fu Zi* (Rhizoma Typhonii) is acrid, warm, and drying in nature, *Qian Zheng San* is not recommended for treating deviation of the mouth or hemiplegia due to interior Liver wind rising, or due to qi deficiency and

blood stagnation. Modifications (such as listed above) are necessary to address the complications and associated conditions.

- Because *Bai Fu Zi* (Rhizoma Typhonii) and *Quan Xie* (Scorpio) are toxic, doses of these herbs should not exceed 6g when used in decoction.
- Use of this formula is contraindicated during pregnancy.¹

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** According to *in vitro* studies, administration of *Qian Zheng San* was associated with reduced peripheral vascular resistance in both rabbits and rats. The onset of action began approximately 10-20 minutes after administration, and reached maximal effect after 30 minutes.²
2. **Effect on the central nervous system:** Administration of *Qian Zheng San* has been shown to have both sedative and antiepileptic effects. Intraperitoneal injection, intravenous injection, and oral ingestion of this formula were associated with sedation in rabbits. Use of a *Qian Zheng San* preparation was effective in treating mice with artificially-induced seizures.³

CLINICAL STUDIES AND RESEARCH

1. **Facial paralysis:** *Qian Zheng San* has been shown in many studies to effectively treat facial paralysis. According to one study, 60 patients with facial paralysis were treated with integrative treatments (herbs and acupuncture) with complete recovery in 50 cases and significant improvement in 2 cases. The herbal treatment included *Qian Zheng San* plus *Wu Gong* (Scolopendra), *Tian Ma* (Rhizoma Gastrodiae), *Di Long* (Pheretima), and *Fang Feng* (Radix Saposhnikoviae). The treatment protocol consisted of grinding all the substances into a fine powder, and administering 5g of the powder two times daily with grain-based liquor. The patients also received electro-acupuncture treatments. The average duration of treatment to achieve recovery was 2 weeks, ranging from 3 to 30 days.⁴

According to another study, use of modified *Qian Zheng San* in 50 patients with facial paralysis was associated with 98% effectiveness (complete recovery in 44 cases, significant improvement in 3 cases, moderate improvement in 2

Qiān Zhèng Sǎn (Lead to Symmetry Powder)

cases, and no effect in 1 case). The treatment protocol was to cook the herbs in water and administer the decoction in three equally-divided doses daily. The herbal treatment contained *Qian Zheng San* plus *Fang Feng* (Radix Saposhnikoviae), *Wu Gong* (Scolopendra), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Ge Gen* (Radix Puerariae Lobatae), and *Gou Teng* (Ramulus Uncariae cum Uncis) as the base formula. Modifications included the addition of *Dan Nan Xing* (Arisaema cum Bile), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Zhu Ru* (Caulis Bambusae in Taenia), and *Ban Xia* (Rhizoma Pinelliae) for excess conditions characterized by tongue stiffness and tremors with a yellow, greasy tongue coating; *Di Huang Yin Zi* (Rehmannia Decoction) for deficiency conditions characterized by weakness of the tongue with white tongue coating; *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), *Tai Zi Shen* (Radix Pseudostellariae), and *Huang Jing* (Rhizoma Polygonati) for qi deficiency with shortness of breath; *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Chi Shao* (Radix Paeoniae Rubra) for blood stagnation with purplish discoloration of the lips; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) for excessive salivation; *Shi Gao* (Gypsum Fibrosum), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Lian Qiao* (Fructus Forsythiae) for red face and yellow tongue coating; and *Ju Hua* (Flos Chrysanthemi), *Bai Zhi* (Radix Angelicae Dahuricae), *Chai Hu* (Radix Bupleuri), and *Chuan Xiong* (Rhizoma Chuanxiong) for headache.⁵

Lastly, 88 patients with facial paralysis were treated with great success using herbs and/or acupuncture. The herbal treatment contained *Qian Zheng San* plus *Fang Feng* (Radix Saposhnikoviae), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Tao Ren* (Semen Persicae), *Chuan Xiong* (Rhizoma Chuanxiong), *Huang Qin* (Radix Scutellariae), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Chan Tui* (Periostracum Cicadae), *Bai Ji* (Rhizoma Bletillae), *Di Huang* (Radix Rehmanniae), *Wu Gong* (Scolopendra), and others as needed. *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Radix et Rhizoma Asari) were added for exterior wind-cold; *Sang Ye* (Folium Mori) and *Bo He* (Herba Menthae) were added for exterior wind-heat; *Xi Yang Shen* (Radix Panacis Quinquefolii) for qi deficiency; *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba) for blood deficiency; *Tian Ma* (Rhizoma Gastrodiae) and *Meng Shi* (Lapis Micae seu Chloriti) for chronic illness with phlegm obstructing the channels and collaterals; and *Gou Teng* (Ramulus Uncariae cum Uncis), *Di Huang* (Radix Rehmanniae), and *Zhi Chuan Wu* (Radix Aconiti Praeparata) for wind and phlegm obstructing the channels and collaterals. Of 88 patients, 68 received concurrent herbs and acupuncture treatment, and 20 received acupuncture treatment only. The duration of

treatment ranged from 2 days to 1 year. The study reported a 95% rate of recovery.⁶

2. **Migraine headache:** One study reported good results using *Qian Zheng San* to treat patients with stubborn migraine headache. The dose varied depending on the severity of the headache. Furthermore, *Ba Zhen Tang* (Eight-Treasure Decoction) was given in decoction to patients with qi and blood deficiencies. The treatment protocol was to administer the herbs with warm water for 5 days per course of treatment, followed by 3 days of rest, and continuing with the next course of treatment. Of 25 patients, the study reported complete recovery in 8 cases, improvement in 15 cases, and no effect in 2 cases. The overall rate of effectiveness was 92%.⁷
3. **Trigeminal neuralgia:** Use of modified *Qian Zheng San* in 52 patients was associated with 94.2% effectiveness. The herbal treatment contained this formula plus *Dang Gui* (Radix Angelicae Sinensis), *Chan Tui* (Periostracum Cicadae), and others as the base formula. Furthermore, modifications included the addition of *Huang Qin* (Radix Scutellariae), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Shi Gao* (Gypsum Fibrosum) for wind-heat; *Bai Fu Zi* (Rhizoma Typhonii), *Xi Xin* (Radix et Rhizoma Asari), and *Ma Huang* (Herba Ephedrae) for wind-cold; *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Ban Xia* (Rhizoma Pinelliae), and *Dan Nan Xing* (Arisaema cum Bile) for blood stagnation and phlegm obstruction; and *Di Huang* (Radix Rehmanniae), *Mu Dan Pi* (Cortex Moutan), *Gui Ban* (Plastrum Testudinis), and *Nu Zhen Zi* (Fructus Ligustri Lucidi) for yin deficiency with blood heat. Of 52 patients, the study reported significant relief of pain in 32 cases, moderate improvement in 17 cases, and no benefit in 3 cases.⁸

Yan Hu Suo (Rhizoma Corydalis)

Jia Wei Qian Zheng San (Augmented Lead to Symmetry Powder) treats exterior wind attacking the upper parts of the body, leading to obstruction in the channels and collaterals and stagnation of qi and blood. It contains herbs that release exterior wind, open the channels and collaterals, and activate qi and blood circulation. Clinical manifestations include deviation of the eyes and mouth, inability to completely close the eyes and mouth, facial

paralysis, temporomandibular joint pain, and trigeminal neuralgia.

AUTHORS' COMMENTS

Qian Zheng San is the representative formula for treating *zhong feng* (wind stroke) characterized by deviation of the eyes and mouth and facial spasms. However, to obtain optimal results for facial paralysis (deviation of the eyes and mouth), herbs should be used both orally and topically at the same time. A topical formula that has been used successfully, contains *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae), *Wei Ling Xian* (Radix et Rhizoma Clematidis), *Zhi Chuan Wu* (Radix Aconiti Praeparata), *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata), and *Bai Ji* (Rhizoma Bletillae). This formula is prepared by grinding all of the herbs into powder, and making the powder into an herbal paste by mixing 9g of the powder with the juice from *Sheng Jiang* (Rhizoma Zingiberis Recens). The herbal paste is applied to the affected area(s) daily.

Yù Zhēn Sǎn (True Jade Powder)

玉真散

Pinyin Name: Yu Zhen San

Literal Name: True Jade Powder

Original Source: *Wai Ke Zheng Zong* (True Lineage of External Medicine) by Chen Shi-Gong in 1617

COMPOSITION

<i>Bai Fu Zi</i> (Rhizoma Typhonii)	[6g]
<i>Tian Nan Xing</i> (Rhizoma Arisaematis)	[6g]
<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	[6g]
<i>Fang Feng</i> (Radix Saposhnikoviae)	[6g]
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	[6g]
<i>Tian Ma</i> (Rhizoma Gastrodiae)	[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding equal amounts of the ingredients into powder. For internal use, take 6g with hot, grain-based liquor. For topical application, mix the powder with grain-based liquor and apply to the affected area. In cases of lockjaw and kyphosis, the source text advises to administer 9g of the powdered herbs with hot *Tong Bian* (Infantis Urina). The source text states that these methods will resolve cases of internal blood stagnation. In cases of dog bites, wash the wound with clean water and apply the powder to the affected area.

Today, equal amounts of the ingredients are ground into a fine powder, sifted, and taken in 3g doses with hot, grain-based liquor or *Tong Bian* (Infantis Urina). For external treatment, apply the powder to the affected area. This formula may be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind and dissolves phlegm
2. Relieves spasms and stops convulsions

CLINICAL MANIFESTATIONS

Tetanus: lockjaw, tightly-closed mouth and lips, stiff body, muscle spasms, and kyphosis.

CLINICAL APPLICATIONS

Tetanus, facial paralysis, chorea, and external ulcerations.

EXPLANATION

Yu Zhen San (True Jade Powder) can treat tetanus, which according to traditional Chinese medicine theory, is due to wind invading the channels and collaterals through open wounds. The wind attacks the channels and collaterals, causes malnourishment of the muscles and tendons, and leads to spasms, convulsions and kyphosis.

To effectively treat this syndrome, wind must be dispelled and spasms and convulsions relieved. This formula contains *Bai Fu Zi* (Rhizoma Typhonii) and *Tian Nan Xing* (Rhizoma Arisaematis) to dispel wind, resolve phlegm, and relieve spasms and convulsions. *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), and *Bai Zhi* (Radix Angelicae Dahuricae) clear wind from the channels and collaterals. *Tian Ma* (Rhizoma Gastrodiae) extinguishes wind and relieves spasms. Lastly, *Tong Bian* (Infantis Urina) and grain-based liquor open the channels and collaterals, and activate qi and blood circulation.

MODIFICATIONS

- For severe convulsions and kyphosis, add *Quan Xie* (Scorpio), *Jiang Can* (Bombyx Batryticatus) and *Wu Gong* (Scolopendra).

CAUTIONS / CONTRAINDICATIONS

- Do not use this formula at high doses or for an extended period of time, since it contains unprocessed forms of *Bai Fu Zi* (Rhizoma Typhonii) and *Tian Nan Xing* (Rhizoma Arisaematis), which are both toxic.
- Although *Yu Zhen San* is intended to treat the acute phase of tetanus, it should be used with caution in the recovery phase if there is severe consumption of qi and body fluids. This formula is acrid and drying, and may further damage the qi and body fluids.¹
- Use of this formula is contraindicated during pregnancy.²

CLINICAL STUDIES AND RESEARCH

1. **Facial paralysis:** One study reported 90% effectiveness using modified *Yu Zhen San* to treat facial paralysis. The herbal treatment contained 15g each of *Bai Fu Zi* (Rhizoma Typhonii), *Dan Nan Xing* (Arisaema cum Bile), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), *Tian Ma* (Rhizoma Gastrodiae), and *Bai Zhi* (Radix Angelicae Dahuricae) as the base formula. *Huang Qi* (Radix Astragali) 50g was added

Yù Zhēn Sǎn (True Jade Powder)

Yu Zhen San (True Jade Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Tetanus	Lockjaw, tightly closed mouth and lips, stiff body, muscle spasms and kyphosis: wind and phlegm attacking the channels and collaterals	<ul style="list-style-type: none">• Dispers wind and dissolves phlegm• Relieves spasms and stops convulsions	<ul style="list-style-type: none">• <i>Bai Fu Zi</i> (Rhizoma Typhonii) and <i>Tian Nan Xing</i> (Rhizoma Arisaematis) dispel wind, resolve phlegm, and relieve spasms and convulsions.• <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii), <i>Fang Feng</i> (Radix Saposhnikoviae), and <i>Bai Zhi</i> (Radix Angelicae Dahuricae) clear wind from the channels and collaterals.• <i>Tian Ma</i> (Rhizoma Gastrodiae) extinguishes wind and relieves spasms.

for qi deficiency, and *Quan Xie* (Scorpio) 15g and *Jiang Can* (Bombyx Batryticatus) 15g for wind and phlegm obstructing the channels and collaterals. Of 43 patients, the study reported complete recovery in 17 cases, marked improvement in 22 cases, and no benefit in 4 cases.³

2. **Chorea:** One study reported beneficial effects using *Yu Zhen San* and *Ba Zhen Tang* (Eight-Treasure Decoction) to treat 29 patients with spasmodic, uncoordinated movements of the limbs and facial muscles. The herbal treatment contained *Tian Nan Xing* (Rhizoma Arisaematis) 10g, *Bai Fu Zi* (Rhizoma Typhonii) 10g, *Tian Ma* (Rhizoma Gastrodiae) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 10g, *Qiang Huo* (Rhizoma et Radix Notopterygii) 10g, *Fang Feng* (Radix Saposhnikoviae) 10g, *Gou Teng* (Ramulus Uncariae cum Uncis) 20g, *Huang Qi* (Radix Astragali) 30g, *Dang Shen* (Radix Codonopsis) 30g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Dang Gui* (Radix Angelicae Sinensis) 15g, *Chuan Xiong* (Rhizoma Chuanxiong) 15g, *Fu Ling* (Poria) 15g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 6g. Other modifications were made as needed. The duration of treatment ranged from 5 to 18 packs of herbs. Of 29 patients, the study reported significant improvement in 26 patients and no effect in 3 individuals.⁴
3. **External ulcerations:** According to one study, 46 of 50 patients with external ulcers were successfully treated with a topical application of *Yu Zhen San*. The treatment protocol was to cook the herbs in water, filter out the herb residues, and apply the filtered liquid solution to the affected area.⁵

TOXICOLOGY

- Use of this formula has been associated with side effects such as numbness of the mouth and tongue, burning sensations of the throat, ulcerations of the oral cavity, salivation, and edema. These side effects have been attributed to the use of unprocessed *Tian Nan Xing* (Rhizoma Arisaematis).⁶

- According to two reports, gross overdose (9g) of this formula has been associated with symptoms such as numbness of the mouth and lips, nausea, vomiting, burning sensations in the upper abdominal area, dizziness, irritability, restlessness, urinary and bowel incontinence, respiratory depression, and in one case, fatality.^{7,8}

RELATED FORMULA

Wǔ Hǔ Zhūi Fēng Sǎn
(Five-Tiger Powder to Pursue Wind)

五虎追風散
五虎追風散

Literal Name: Five-Tiger Powder to Pursue Wind
Original Source: *Shi Chuan En Jia Chuan Fang* (Family Formulas from Shi Chuan-En), published in *Zhong Yi Za Zhi* (Journal of Chinese Medicine) in 1955

<i>Chan Tui</i> (Periostracum Cicadae)	30g
<i>Tian Nan Xing</i> (Rhizoma Arisaematis), zhi (prepared)	6g
<i>Tian Ma</i> (Rhizoma Gastrodiae)	6g
<i>Quan Xie</i> (Scorpio)	7-9 pieces [3g]
<i>Jiang Can</i> (Bombyx Batryticatus), chao (dry-fried)	7-9 pieces [6g]

The source text states to cook the ingredients in water and take the strained decoction. Separately grind 1.5g of *Zhu Sha* (Cinnabaris) into a fine powder, and take it with 60 mL of grain-based liquor. The source text states that sweating from the palms and soles is an indication that the formula is effective. If sweating does not occur on the first day, the formula should be given again the next day, for a total of three consecutive days.

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have

Yù Zhēn Sǎn (True Jade Powder)

removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

The main actions of this formula are to dispel wind, relieve muscle spasms, and alleviate pain. Clinically, it is often used for tetanus characterized by lockjaw, continuous spasms and cramps in the extremities, convulsions, and kyphosis.

Yu Zhen San and *Wu Hu Zhui Feng San* (Five-Tiger Powder to Pursue Wind) are two formulas commonly used to treat tetanus.

- *Yu Zhen San* has stronger actions to dispel wind and dissolve phlegm.
- *Wu Hu Zhui Feng San* is more potent to dispel wind and relieve muscle spasms, cramps, convulsions, and kyphosis.

AUTHORS' COMMENTS

Though *Yu Zhen San* is formulated specifically to treat tetanus, the standard practice in China today for treatment of tetanus is to integrate Western and traditional

Chinese medicine by coordinated administration of drug, herbal and acupuncture treatments.⁹

Qian Zheng San (Lead to Symmetry Powder) and *Yu Zhen San* are two formulas with similar effect to dispel wind.

- *Qian Zheng San* is most effective at dispelling wind from the face, and is commonly used to treat Bell's palsy with deviation of the eyes and mouth.
- *Yu Zhen San* is best at dispelling wind from the body, and is usually used for tetanus with severe muscle spasms and cramps throughout the body.

<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	30g [9-12g]

Xiǎo Xù Mǐng Tāng (Minor Prolong Life Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into a coarse powder. First cook *Ma Huang* (Herba Ephedrae) in 12 cups of water, and bring it to a boil three times. Remove the foam from the top, add the rest of the herbs, and cook the decoction again until the liquid is reduced to 3 cups. Take the warm, strained decoction in three equally-divided doses. If the condition is not resolved, an additional 3-4 packs of herbs can be administered. Today, this formula may be prepared as a decoction, with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

- 1. Dispers wind and supports *zheng* (upright) *qi*
- 2. Warms the channels and opens yang

CLINICAL MANIFESTATIONS

Post-stroke complications with *zheng* (upright) *qi* deficiency: semi-unconsciousness or unconsciousness, hemiplegia, paralysis, muscle contractions and convulsions, deviation of the eyes and mouth, slurred speech, and low back pain.

CLINICAL APPLICATIONS

Stroke, paralysis, hemiplegia, migraine, arthritis, and post-stroke sequelae.

EXPLANATION

Xiao Xu Ming Tang (Minor Prolong Life Decoction) treats post-stroke complications manifesting in compromised

mental and/or physical functions. Affected mental functions include alteration of consciousness and slurred speech. Affected physical functions include hemiplegia, paralysis, muscle contractions and convulsions, and deviation of the eyes and mouth.

Because stroke is diagnosed as a wind disorder in traditional Chinese medicine, exterior-releasing herbs that dispel wind are used to treat post-stroke complications. As such, this formula employs *Ma Huang* (Herba Ephedrae) and *Fang Feng* (Radix Saposhnikoviae) to dispel wind and release the exterior. *Bai Shao* (Radix Paeoniae Alba) harmonizes the *wei* (defensive) and *ying* (nutritive) levels and prevents the exterior-releasing herbs from inducing excessive perspiration. Because of the underlying *zheng* (upright) *qi* deficiency, *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) are added to tonify *qi*; while *Bai Shao* (Radix Paeoniae Alba) and *Chuan Xiong* (Rhizoma Chuanxiong) tonify blood and regulate blood circulation. In addition, *Sheng Jiang* (Rhizoma Zingiberis Recens) dispels wind, *Fang Ji* (Radix Stephaniae Tetrandrae) dispels dampness, *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gui Xin* (Cortex Rarus Cinnamomi) dispel cold, *Huang Qin* (Radix Scutellariae) clears heat, and *Ku Xing Ren* (Semen Armeniacae Amarum) regulates *qi*.

MODIFICATIONS

- With constipation, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Da Huang* (Radix et Rhizoma Rhei).

***Xiao Xu Ming Tang* (Minor Prolong-Life Decoction)**

Post-stroke complications with <i>zheng</i> (upright) <i>qi</i> deficiency	Hemiplegia, paralysis, muscle contractions and convulsions, deviation of the eyes and mouth, slurred speech and low back pain: <i>zheng</i> (upright) <i>qi</i> deficiency leading to invasion of wind blocking the channels and collaterals	<ul style="list-style-type: none">• Dispers wind and supports the <i>zheng</i> (upright) <i>qi</i>• Warms the channels and opens yang	<ul style="list-style-type: none">• <i>Ma Huang</i> (Herba Ephedrae) and <i>Fang Feng</i> (Radix Saposhnikoviae) dispel wind and release the exterior.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify <i>qi</i>.• <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) tonify and regulate blood circulation.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) dispels wind.• <i>Fang Ji</i> (Radix Stephaniae Tetrandrae) dispels dampness.• <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) and <i>Gui Xin</i> (Cortex Rarus Cinnamomi) dispel cold.• <i>Huang Qin</i> (Radix Scutellariae) clears heat.• <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) regulates <i>qi</i>.

Xiǎo Xù Mìng Tāng (Minor Prolong Life Decoction)

- When there is altered consciousness, add *Fu Ling* (Poria) and *Yuan Zhi* (Radix Polygalae).
- With spasms, pain, and numbness, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Lian Qiao* (Fructus Forsythiae).
- With slurred speech, add *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Zhu Li* (Succus Bambusae).
- With nausea, add *Ban Xia* (Rhizoma Pinelliae).
- With body aches and convulsions, add *Qiang Huo* (Rhizoma et Radix Notopterygii).
- If accompanied by a dry mouth and tongue, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).

PHARMACOLOGICAL EFFECTS

Radioprotective: According to one study in mice, administration of a methanol extract of *Xiao Xu Ming Tang* by intraperitoneal injection was shown to significantly increase the survival rate after a lethal dose of irradiation.¹

Da Zao (Fructus Jujubae) [1.5-3g]

This formula is designed to tonify qi, disperse cold, release wind and dispel dampness. It treats individuals with underlying qi deficiency complicated with wind-cold attacking the channels and collaterals. Clinical manifestations include hemiplegia, deviation of the eyes and mouth, speech difficulties, muscle spasms and cramps, convulsions, stiff muscles and headache.

These two formulas have the same names, and essentially the same ingredients and indications.

- *Xiao Xu Ming Tang* from *Qian Jin Yao Fang* (Thousand Ducat Prescriptions) contains *Gui Xin* (Cortex Rarus Cinnamomi), which has a stronger function to warm the interior.
- *Xiao Xu Ming Tang* from *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) utilizes *Gui Zhi* (Ramulus Cinnamomi), which has a better effect to dispel wind-cold and warm the channels and collaterals.

Xù Mìng Tāng (Prolong Life Decoction)

續命湯 续命汤

Pinyin Name: *Xu Ming Tang*
Literal Name: Prolong Life Decoction
Original Source: *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) by Wang Tao in 752 A.D.

COMPOSITION

<i>Ma Huang</i> (Herba Ephedrae)	9g
<i>Gui Xin</i> (Cortex Rarus Cinnamomi)	9g
<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g
<i>Shi Gao</i> (Gypsum Fibrosum), <i>fen sui</i> (pulverized)	9g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	9g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	4.5g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into a coarse powder, and cook it in 10 cups of water until the liquid is reduced to 4 cups. Take 1 cup of the warm, strained decoction per dose. Continue to administer the decoction until mild perspiration is achieved, then discontinue the formula.

CHINESE THERAPEUTIC ACTIONS

- 1. Dispels wind
- 2. Clears heat
- 3. Regulates qi
- 4. Nourishes the blood

CLINICAL MANIFESTATIONS

Post-stroke sequelae: hemiplegia, muscle paralysis, inability to turn the body, slurred speech, confusion, numbness and pain in the body, muscle stiffness, and cramps.

CLINICAL APPLICATIONS

Stroke sequelae, hemiplegia, paralysis, neuralgia, and arthritis.

EXPLANATION

Xu Ming Tang (Prolong Life Decoction) treats post-stroke complications with both mental and physical impairments. Mental impairments include slurred speech,

Xu Ming Tang (Prolong Life Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Post-stroke sequelae	Hemiplegia, muscle paralysis, inability to turn the body, slurred speech, confusion, numbness and pain in the body, muscle stiffness and cramps: wind attacking the <i>wei</i> (defensive) and <i>ying</i> (nutritive) levels	<ul style="list-style-type: none">• Dispels wind• Clears heat• Regulates qi• Nourishes blood	<ul style="list-style-type: none">• <i>Ma Huang</i> (Herba Ephedrae) releases the exterior and dispels wind.• <i>Gui Xin</i> (Cortex Rarus Cinnamomi) and <i>Gan Jiang</i> (Rhizoma Zingiberis) warm and open the channels and collaterals.• <i>Shi Gao</i> (Gypsum Fibrosum) clears heat.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) tonify qi and regulate qi circulation.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) tonify blood and regulate blood circulation.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Xù Míng Tāng (Prolong Life Decoction)

confusion, and inability to think clearly. Physical impairments include hemiplegia, muscle paralysis, numbness, and pain.

In this formula, *Ma Huang* (Herba Ephedrae) releases the exterior and dispels wind from the *wei* (defensive) level. *Gui Xin* (Cortex Rasus Cinnamomi) and *Gan Jiang* (Rhizoma Zingiberis) warm and open the channels and collaterals. *Shi Gao* (Gypsum Fibrosum) clears heat, and balances the hot nature of *Gui Xin* (Cortex Rasus Cinnamomi) and *Gan Jiang* (Rhizoma Zingiberis). *Ren Shen* (Radix et Rhizoma Ginseng), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Ku Xing Ren* (Semen Armeniacae Amarum) tonify qi and regulate qi circulation. *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) tonify blood and regulate blood circulation. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

MODIFICATIONS

- With speech difficulty, add *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Yuan Zhi* (Radix Polygalae).

- With numbness, add *Huang Qi* (Radix Astragali) and *Niu Xi* (Radix Achyranthis Bidentatae).
- With muscle spasms and cramps, add *Fang Feng* (Radix Saposhnikoviae) and *Fang Ji* (Radix Stephaniae Tetrandrae).

CAUTIONS / CONTRAINDICATIONS

According to the source text, *Hai Zao* (Sargassum) and *Cong Bai* (Herba Allii Fistulosi) should be avoided while taking *Xiao Xu Ming Tang*.

AUTHORS' COMMENTS

Xiao Xu Ming Tang (Minor Prolong-Life Decoction) and *Xu Ming Tang* (Prolong Life Decoction) have similar names and functions. Both formulas may prolong life in patients suffering from post-stroke complications with compromised mental and/or physical functions.

- *Xiao Xu Ming Tang* has stronger actions to warm yang and support *zheng* (upright) *qi*.
- *Xu Ming Tang* is better at dispelling wind and clearing heat.

Dà Qín Jiāo Tāng (Major Gentiana Macrophylla Decoction)

大秦艽湯 大秦艽汤

Pinyin Name: *Da Qin Jiao Tang*

Literal Name: Major Gentiana Macrophylla Decoction

Alternate Name: Major Chin-chiu Combination

Original Source: *Su Wen Bing Ji Qi Yi Bao Ming Ji* (Collection of Writings on the Mechanism of Illness, Suitability of Qi, and the Safeguarding of Life as Discussed in the Basic Questions) by Zhang Yuan-Su in 1186

COMPOSITION

<i>Qin Jiao</i> (Radix Gentianae Macrophyllae)	90g [9g]
<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	30g [3g]
<i>Du Huo</i> (Radix Angelicae Pubescentis)	60g [6g]
<i>Fang Feng</i> (Radix Saposhnikoviae)	30g [3g]
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	30g [3g]
<i>Xi Xin</i> (Radix et Rhizoma Asari)	15g [2g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	60g [6g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	60g [6g]
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	30g [3g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	60g [6g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	30g [3g]
<i>Fu Ling</i> (Poria)	30g [3g]
<i>Huang Qin</i> (Radix Scutellariae)	30g [3g]
<i>Shi Gao</i> (Gypsum Fibrosum)	60g [6g]
<i>Di Huang</i> (Radix Rehmanniae)	30g [3g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	60g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into powder and cooking 30g of the powder in water to make a decoction. Take the warm, strained decoction any time during the day. The source text recommends adding 7 to 8 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) during cloudy days, and 3g of *Zhi Shi* (Fructus Aurantii Immaturus) for epigastric distention. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind and clears heat
2. Nourishes the blood and activates blood circulation

CLINICAL MANIFESTATIONS

Early stage of *zhong feng* (wind stroke) with wind attacking the channels and collaterals: deviation of the eyes and mouth, stiff tongue and speech difficulties, numbness and difficulty in moving the extremities, a white tongue coating, and a superficial pulse.

CLINICAL APPLICATIONS

Cerebral embolism, cerebral hemorrhage, post-stroke

sequelae (facial paralysis, hemiplegia, paralysis, deviation of the eyes and mouth, and speech difficulties), arthritis, fibromyalgia, and muscle atrophy.

EXPLANATION

Da Qin Jiao Tang (Major Gentiana Macrophylla Decoction) treats early-stage *zhong feng* (wind stroke), with wind attacking the channels and collaterals. This condition usually occurs when qi and blood are deficient and the body is vulnerable to attacks from external pathogens, especially wind. Wind is highly mobile and may suddenly attack the body and cause stagnation of qi and blood in the channels and collaterals. As a result of stagnation in the channels and collaterals, other symptoms develop, such as deviation of the eyes and mouth, stiff tongue, speech difficulties, and numbness and difficult movement of the extremities.

Qin Jiao (Radix Gentianae Macrophyllae), the chief herb of this formula, dispels wind and opens the channels and collaterals. The deputies, *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), *Fang Feng* (Radix Saposhnikoviae), *Bai Zhi* (Radix Angelicae Dahuricae), and *Xi Xin* (Radix et Rhizoma

Dà Qín Jiāo Tāng (Major Gentiana Macrophylla Decoction)

Da Qin Jiao Tang (Major Gentiana Macrophylla Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Early stage of <i>zhong feng</i> (wind stroke), with wind attacking the channels and collaterals	Deviation of the eyes and mouth, stiff tongue, speech difficulties, and numbness and difficult movement of the extremities: stagnation of qi and blood in the channels and collaterals due to invasion of wind	<ul style="list-style-type: none"> • Disperses wind and clears heat • Nourishes the blood and activates blood circulation 	<ul style="list-style-type: none"> • <i>Qin Jiao</i> (Radix Gentianae Macrophyllae) dispels wind and opens the channels and collaterals. • <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii), <i>Du Huo</i> (Radix Angelicae Pubescentis), <i>Fang Feng</i> (Radix Saposhnikoviae), <i>Bai Zhi</i> (Radix Angelicae Dahuricae) and <i>Xi Xin</i> (Radix et Rhizoma Asari) dispel wind from the channels and collaterals. • <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Bai Shao</i> (Radix Paeoniae Alba), <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) nourish the blood and activate blood circulation. • <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Fu Ling</i> (Poria) tonify qi and strengthen the Spleen. • <i>Huang Qin</i> (Radix Scutellariae), <i>Shi Gao</i> (Gypsum Fibrosum) and <i>Di Huang</i> (Radix Rehmanniae) clear heat. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Asari), are warm and acrid and dispel wind from the channels and collaterals. More specifically, *Qiang Huo* (Rhizoma et Radix Notopterygii) dispels wind from the upper body, while *Du Huo* (Radix Angelicae Pubescentis) dispels wind from the lower body; *Qiang Huo* (Rhizoma et Radix Notopterygii) dispels wind from the *taiyang* level and *Bai Zhi* (Radix Angelicae Dahuricae) releases wind from the *yangming* level; and *Fang Feng* (Radix Saposhnikoviae) releases wind from the exterior and *Xi Xin* (Radix et Rhizoma Asari) opens the orifices. Together, these five deputy herbs help the chief herb to strongly dispel wind and open the channels and collaterals.

In addition to dispelling wind, *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Chuan Xiong* (Rhizoma Chuanxiong) nourish the blood, activate blood circulation, and neutralize the dryness caused by the wind-dispelling herbs in this formula; also, by nourishing Liver blood, the Liver may then smooth the qi flow to relieve numbness and spasms. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) tonify qi and strengthen the Spleen. Because qi and blood stagnation can easily create heat, heat-clearing herbs such as *Huang Qin* (Radix Scutellariae), *Shi Gao* (Gypsum Fibrosum), and *Di Huang* (Radix Rehmanniae) are also used in this formula. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- With severe deviation of the eyes and mouth, add *Quan Xie* (Scorpio) and *Wu Gong* (Scolopendra).
- With fullness and distention in the epigastrium, add *Zhi Shi* (Fructus Aurantii Immaturus).
- If there is no interior heat, remove *Huang Qin* (Radix Scutellariae), *Shi Gao* (Gypsum Fibrosum), and *Di Huang* (Radix Rehmanniae).
- If there are no prominent wind symptoms, reduce the number of exterior-wind-dispersing herbs in order to reduce the overall acrid nature of this formula.

CAUTIONS / CONTRAINDICATIONS

- *Da Qin Jiao Tang* treats external wind attacking the channels and collaterals, and is contraindicated in patients with internal wind.
- This formula is acrid and drying in nature, and should be used with extreme caution in cases of blood and/or yin deficiency.

CLINICAL STUDIES AND RESEARCH

1. **Cerebral embolism:** Administration of *Da Qin Jiao Tang* has been shown to be effective for treating acute cerebral embolism characterized by wind and phlegm obstructing the channels and collaterals. Of 240 patients, the study reported complete recovery in 98 patients (resolution of symptoms, with restored normal mental and physical functioning), significant improvement in 80 patients

Dà Qín Jiāo Tāng (Major Gentiana Macrophylla Decoction)

(marked improvement of symptoms, with mild residual facial paralysis and speech difficulties), improvement in 56 cases (slight overall improvement of symptoms, but with continued difficulties in speech, swallowing, and physical activities) and no effect in 6 cases. The overall rate of effectiveness was 97.9%.¹

- Cerebral hemorrhage:** Administration of modified *Da Qin Jiao Tang* was beneficial in treating 84 patients with cerebral hemorrhage in one study. The herbal formula contained *Qin Jiao* (Radix Gentianae Macrophyllae) 10g, *Di Huang* (Radix Rehmanniae) 15g, *Dang Gui* (Radix Angelicae Sinensis) 15g, *Chi Shao* (Radix Paeoniae Rubra) 12g, *Chuan Xiong* (Rhizoma Chuanxiong) 10g, *Niu Xi* (Radix Achyranthis Bidentatae) 15g, *Gui Zhi* (Ramulus Cinnamomi) 10g, *Shui Zhi* (Hirudo) 9g, and *Huang Qin* (Radix Scutellariae) 10g. The duration of treatment ranged from 30-50 days, with an average of 38 days. One pack of herbs was given in decoction daily. Of 84 patients, the study reported complete recovery in 40 cases, significant improvement in 16 cases, moderate improvement in 17 cases, and deterioration and eventual fatality in 11 cases.²
- Facial paralysis:** One study reported 94.2% effectiveness using modified *Da Qin Jiao Tang* to treat 52 patients with facial paralysis characterized by wind-cold. The

herbal formula contained *Qin Jiao* (Radix Gentianae Macrophyllae) 12g, *Bai Fu Zi* (Rhizoma Typhonii) 12g, *Chuan Xiong* (Rhizoma Chuanxiong) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Gui Zhi* (Ramulus Cinnamomi) 6g, *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), and *Dang Gui* (Radix Angelicae Sinensis). The dose of the last three herbs varied depending on the history and severity of illness. The herbs were given in decoction twice daily with meals in the morning and at night, for 12 days per course of treatment, for three courses total.³

AUTHORS' COMMENTS

Most of the herbs in this formula are acrid, warm, and dispersing in nature, and are suitable for the initial stages of wind attacking the channels and collaterals. However, because this formula is acrid and drying and may damage blood and body fluids, herbs that tonify the blood and generate body fluids should be used prophylactically.

<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	30g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae), <i>chao</i> (dry-fried)	30g

Wū Yào Shùn Qì Sǎn (Lindera Powder to Smooth the Flow of Qì)

DOSAGE / PREPARATION / ADMINISTRATION EXPLANATION

The source text recommends grinding the ingredients into a fine powder. Cook 9g of the powder with 3 slices of *Sheng Jiang* (*Rhizoma Zingiberis Recens*) and 1 piece of *Da Zao* (*Fructus Jujubae*) in 1 bowl of water until the liquid is reduced to 70%. Take the strained decoction while warm.

Wu Yao Shun Qi San (Lindera Powder to Smooth the Flow of Qi) treats *zhong feng* (wind stroke) and subsequent complications, such as muscle paralysis and limited mobility. In this case, the wind attacks the channels and collaterals in the extremities, causing numbness, stiffness, and pain throughout the body. This formula may also treat individuals with weak legs and difficulty walking. This formula is useful in the treatment of geriatric patients with internal wind and cold, or women with internal wind and blood deficiency. Clinical presentations include stabbing hypochondriac pain, epigastric and abdominal fullness, vomiting, diarrhea, and borborygmus.

CHINESE THERAPEUTIC ACTIONS

- 1. Dispels wind
- 2. Activates qi circulation and relieves pain
- 3. Eliminates phlegm

CLINICAL MANIFESTATIONS

- 1. *Zhong feng* (wind stroke): arthralgia, numbness and pain throughout the body, dysphasia, muscle and tendon stiffness, and paralysis.
- 2. Leg qi with leg weakness and difficulty walking.
- 3. Stabbing pain in the hypochondrium, epigastric and abdominal fullness, vomiting, diarrhea, and borborygmus.

CLINICAL APPLICATIONS

Syncope, cerebrovascular accident, cerebral hemorrhage, hemiplegia, trigeminal neuralgia, and Bell's palsy.

Wu Yao (*Radix Linderae*) dispels wind, promotes qi circulation, and relieves pain. *Chen Pi* (*Pericarpium Citri Reticulatae*) regulates qi flow. *Jiang Can* (*Bombyx Batryticatus*) subdues wind and dispels phlegm. *Ma Huang* (*Herba Ephedrae*) dispels exterior wind-cold and regulates qi circulation. *Chuan Xiong* (*Rhizoma Chuanxiong*) dispels wind and activates blood circulation to relieve pain. *Jie Geng* (*Radix Platycodonis*) opens inhibited Lung qi and eliminates phlegm. *Pao Jiang* (*Rhizoma Zingiberis Praeparatum*) warms the Spleen and Lung to dissolve phlegm. *Zhi Qiao* (*Fructus Aurantii*) activates

Wu Yao Shun Qi San (Lindera Powder to Smooth the Flow of Qi)

qi flow and eliminates phlegm. *Bai Zhi* (Radix Angelicae Dahuricae) dispels wind and activates qi flow to relieve pain. *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae) harmonize the formula.

MODIFICATIONS

- For post-stroke paralysis characterized by qi and blood deficiencies, add *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Mai Dong* (Radix Ophiopogonis).
- If there is pain throughout the entire body, add *Dang Gui* (Radix Angelicae Sinensis), *Rou Gui* (Cortex Cinnamomi), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha).
- With coldness and pain in the extremities, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi).
- With swelling and edema in the legs, add *Niu Xi* (Radix Achyranthis Bidentatae), *Du Huo* (Radix Angelicae Pubescentis), and *Wu Jia Pi* (Cortex Acanthopanax).

- With soreness and pain in the lower back, add *Du Zhong* (Cortex Eucommiae) and *Niu Xi* (Radix Achyranthis Bidentatae).
- With body aches and bone pain, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Sang Ji Sheng* (Herba Taxilli).
- If accompanied by spasms and cramps, add *Mu Gua* (Fructus Chaenomelis) and *Bai Shao* (Radix Paeoniae Alba).
- With numbness and pain in the body, add *Xiao Xu Ming Tang* (Minor Prolong Life Decoction).
- With slurred speech, add *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Yuan Zhi* (Radix Polygalae).
- With severe breast distention, add *Chai Hu* (Radix Bupleuri), *Chuan Xiong* (Rhizoma Chuanxiong), and *Yu Jin* (Radix Curcumae).

CAUTIONS / CONTRAINDICATIONS

Use of *Wu Yao Shun Qi San* is contraindicated during pregnancy, and in patients with amenorrhea caused by blood deficiency.

Section 2

平熄内风剂

— Internal-Wind Extinguishing Formulas

Líng Jiǎo Gōu Téng Tāng (Antelope Horn and Uncaria Decoction)

羚角钩藤汤

羚角钩藤汤

Pinyin Name: *Ling Jiao Gou Teng Tang*

Literal Name: Antelope Horn and Uncaria Decoction

Original Source: *Tong Su Shang Han Lun* (Plain Version of Discussion of Cold-Induced Disorders) by Yu Gen-Chu in the Qing Dynasty

COMPOSITION

<i>Ling Yang Jiao</i> (Cornu Saigae Tataricae), pre-decocted	4.5g
<i>Gou Teng</i> (Ramulus Uncariae cum Uncis), post-decocted	9g
<i>Sang Ye</i> (Folium Mori)	6g
<i>Ju Hua</i> (Flos Chrysanthemi)	9g
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Di Huang</i> (Radix Rehmanniae)	15g
<i>Chuan Bei Mu</i> (Bulbus Fritillariae Cirrhosae)	12g
<i>Zhu Ru</i> (Caulis Bambusae in Taenia), fresh	15g
<i>Fu Shen</i> (Poria Paradicis)	9g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	2.4g

Note: *Ling Yang Jiao* (Cornu Saigae Tataricae) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends cooking *Zhu Ru* (Caulis Bambusae in Taenia) with *Ling Yang Jiao* (Cornu Saigae Tataricae) before adding the rest of the ingredients. *Gou Teng* (Ramulus Uncariae cum Uncis) is to be post-decocted for only a short period of time. Note: If *Ling Yang Jiao* (Cornu Saigae Tataricae) is not available, it may be replaced with 20-30g of *Shan Yang Jiao* (Cornu Naemorhedis) for every 0.5-1.0g of *Ling Yang Jiao* (Cornu Saigae Tataricae) specified.

CHINESE THERAPEUTIC ACTIONS

1. Cools the Liver and extinguishes Liver wind
2. Generates fluids and relaxes tendons

CLINICAL MANIFESTATIONS

Excess heat in the Liver channel accompanied by Liver wind rising: persistent high fever, irritability, restlessness, muscle spasms in the extremities, convulsions, coma, dark red tongue body with a dry tongue coating, and a wiry, rapid pulse.

CLINICAL APPLICATIONS

Shingles, cerebral hemorrhage, stroke, post-stroke sequelae, and encephalitis B.

EXPLANATION

Ling Jiao Gou Teng Tang (Antelope Horn and Uncaria Decoction) treats excess heat in the Liver channel causing Liver wind rising. Due to excess pathogenic heat in the

Líng Jiǎo Gōu Téng Tāng (Antelope Horn and Uncaria Decoction)

Ling Jiao Gou Teng Tang (Antelope Horn and Uncaria Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Excess heat in the Liver channel accompanied by Liver wind rising	<ul style="list-style-type: none">• Persistent high fever: excess heat in the interior• Irritability, restlessness and coma: heat disturbing Heart <i>shen</i> (spirit)• Spasms and convulsions: Liver wind rising with deficiency of yin and fluids• Dark red tongue body with a dry tongue coating and a wiry, rapid pulse: excess Liver heat	<ul style="list-style-type: none">• Cools the Liver and extinguishes Liver wind• Generates fluids and relaxes tendons	<ul style="list-style-type: none">• <i>Ling Yang Jiao</i> (Cornu Saigae Tataricae) and <i>Gou Teng</i> (Ramulus Uncariae cum Uncis) cool the Liver, extinguish Liver wind, and clear heat.• <i>Sang Ye</i> (Folium Mori) and <i>Ju Hua</i> (Flos Chrysanthemi) clear Liver heat and extinguish Liver wind.• <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Di Huang</i> (Radix Rehmanniae) nourish yin and body fluids.• <i>Chuan Bei Mu</i> (Bulbus Fritillariae Cirrhosae) and <i>Zhu Ru</i> (Caulis Bambusae in Taenia) clear heat and resolve phlegm.• <i>Fu Shen</i> (Poria Paradicis) calms the <i>shen</i> (spirit) and stabilizes the Heart.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

interior, persistent high fever occurs. The heat may disturb the *shen* (spirit), causing irritability, restlessness, and in severe cases unconsciousness. The heat may dry the body fluids and affect the muscles, causing spasms and convulsions. A dark red tongue body with a dry tongue coating and a wiry, rapid pulse indicate excess Liver heat and wind.

This formula has *Ling Yang Jiao* (Cornu Saigae Tataricae) and *Gou Teng* (Ramulus Uncariae cum Uncis) to cool the Liver, extinguish Liver wind, clear heat, and relieve spasms and convulsions. *Sang Ye* (Folium Mori) and *Ju Hua* (Flos Chrysanthemi) clear Liver heat and extinguish Liver wind. Because excess heat and wind may injure yin and dry body fluids, *Bai Shao* (Radix Paeoniae Alba) and *Di Huang* (Radix Rehmanniae) are added to nourish yin and body fluids. In addition, they soften the Liver and benefit the tendons. Since excess heat may dry body fluids and turn them into phlegm, *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Zhu Ru* (Caulis Bambusae in Taenia) are employed to clear heat and resolve phlegm. *Fu Shen* (Poria Paradicis) calms the *shen* (spirit) and stabilizes the Heart. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs in this formula. The combination of *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) also relieves muscle spasms and cramps.

MODIFICATIONS

- With more interior heat, add *Da Qing Ye* (Folium Isatidis), *Xia Ku Cao* (Spica Prunellae), and *Jue Ming Zi* (Semen Cassiae).

- When phlegm accumulation alters consciousness, add *Tian Zhu Huang* (Concretio Silicea Bambusae) and *Zhu Li* (Succus Bambusae).
- With severe convulsions, add *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra), and *Jiang Can* (Bombyx Batryticatus).
- When heat affects the *qi* (energy) level, add *Shi Gao* (Gypsum Fibrosum), and *Zhi Mu* (Rhizoma Anemarrhenae).
- When heat affects the *ying* (nutritive) and *xue* (blood) levels, add *Mu Dan Pi* (Cortex Moutan) and *Chi Shao* (Radix Paeoniae Rubra).
- With dizziness, vertigo, and hypertension caused by Liver heat rising, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Ji Li* (Fructus Tribuli).
- For *bi zheng* (closed disorder) or unconsciousness caused by heat, combine with *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone) or *Zi Xue Dan* (Purple Snow Pill).

CLINICAL STUDIES AND RESEARCH

Shingles: Use of modified *Ling Jiao Gou Teng Tang* was associated with good results in treating shingles affecting the face in 50 geriatric patients. Modifications included the addition of *Chai Hu* (Radix Bupleuri) and *Yan Hu Suo* (Rhizoma Corydalis) for severe pain; *Long Dan* (Radix et Rhizoma Gentianae), *Jin Qian Cao* (Herba Lysimachiae), and *Di Huang* (Radix Rehmanniae) for cholecystitis; *Tian Ma* (Rhizoma Gastrodiae), *Shi Jue Ming* (Concha Haliotidis), and *Niu Xi* (Radix Achyranthis Bidentatae) for elevated blood pressure; and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Yu Jin* (Radix Curcumae)

Líng Jiǎo Gōu Téng Tāng (Antelope Horn and Uncaria Decoction)

for coronary artery disease. The duration of treatment ranged from 7 to 14 packs of herbs. Of 50 patients, the study reported complete recovery in 28 patients and improvement in 22 patients.¹

RELATED FORMULA

Gōu Téng Yīn (Uncaria Decoction)

鉤藤飲
钩藤饮

Pinyin Name: *Gou Teng Yin*

Literal Name: Uncaria Decoction

Original Source: *Yi Zong Jin Jian* (Golden Mirror of the Medical Tradition) by Wu Qian in 1742

<i>Gou Teng</i> (Ramulus Uncariae cum Uncis)	9g
<i>Ling Yang Jiao</i> (Cornu Saigae Tataricae), <i>chong fu</i> (taken drenched) in powder	0.3g
<i>Quan Xie</i> (Scorpio), remove toxins	0.9g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	3g
<i>Tian Ma</i> (Rhizoma Gastrodiae)	6g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae <i>Praeparata cum Melle</i>)	1.5g

Note: *Ling Yang Jiao* (Cornu Saigae Tataricae) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the

historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

The source text states to prepare the ingredients as a decoction. This formula clears heat, extinguishes wind, tonifies qi, and relieves muscle spasms. Clinically, it treats infantile convulsions with upturned eyes, lockjaw, muscle spasms and convulsions, high fever, and other qi deficiency symptoms.

Ling Jiao Gou Teng Tang and *Gou Teng Yin* (Uncaria Decoction) both cool the Liver and extinguish Liver wind.

- *Ling Jiao Gou Teng Tang* has many actions, including calming Liver wind, nourishing yin and body fluids, and dispelling phlegm and heat. It treats patients with Liver heat excess and Liver wind rising, accompanied by deficiency of yin and body fluids and accumulation of phlegm.
- *Gou Teng Yin*, on the other hand, focuses on calming Liver wind and tonifying qi. It treats patients with Liver heat excess and Liver wind rising with underlying qi deficiency, as manifested in infantile convulsions.

Gōu Téng Sǎn (Uncaria Powder)

鉤藤散 钩藤散

Pinyin Name: *Gou Teng San*

Literal Name: Uncaria Powder

Alternate Names: *Kou Teng San*, Gambir Formula

Original Source: *Pu Ji Ben Shi Fang* (Formulas of Universal Benefit from My Practice) by Xu Shu-Wei in 1132

COMPOSITION

<i>Gou Teng</i> (Ramulus Uncariae cum Uncis)	15g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	15g
<i>Fu Ling</i> (Poria)	15g
<i>Fu Shen</i> (Poria Paradicis)	15g
<i>Mai Dong</i> (Radix Ophiopogonis)	15g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	15g
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>jin</i> (soaked) in and <i>xi</i> (washed) with liquid	15g
<i>Fang Feng</i> (Radix Saposhnikoviae)	15g
<i>Ju Hua</i> (Flos Chrysanthemi)	15g
<i>Shi Gao</i> (Gypsum Fibrosum)	30g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends grinding the ingredients into powder, and cooking 12g of the powder with 7 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in water. Take the strained decoction while warm.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat from the Liver channel
2. Directs Liver yang downward and extinguishes Liver wind

CLINICAL MANIFESTATIONS

Liver excess: marked changes in emotions and behavior, irritability, feelings of qi rushing upward, feelings of oppression and distention beneath the heart, muscle spasms in the shoulders and back, red eyes, headache, dizziness, vertigo, tinnitus, palpitations, and insomnia. This syndrome is most commonly seen in middle-aged adults.

CLINICAL APPLICATIONS

Hypertension, headache, migraine, vertigo, dizziness, tinnitus, cerebral infarction, arteriosclerosis, atherosclerosis, hardening of the cranial arteries, Alzheimer's disease, dementia, Meniere's disease, neurosis, and chronic nephritis.

EXPLANATION

Gou Teng San (Uncaria Powder) treats Liver excess with severe vertigo. Clinically, patients mainly show excess heat in the Liver channel, Liver qi stagnation, and heat

affecting the Heart. As heat travels upward along the Liver channel, patients experience symptoms such as a feeling of qi rushing upward, irritability, dizziness, vertigo, and headache. Heat in the Liver channel is often complicated by Liver qi stagnation, leading to symptoms such as marked changes in emotions and behavior, and feelings of oppression and distention beneath the heart. When heat travels upward and affects the Heart, patients will experience palpitations and insomnia. Moreover, patients with heat in the Liver channel may have Liver yin deficiency because heat damages yin. This condition often is seen in middle-aged adults who live and/or work in a high-stress, high-pressure environment. One diagnostic symptom is headache early in the morning or after resting, with the headache gradually diminishing upon walking or mild exercise.

Gou Teng (Ramulus Uncariae cum Uncis), the chief herb, regulates Liver qi, clears heat from the Liver channel, calms Liver wind, and relieves spasms. It effectively addresses all of the excess signs and symptoms in this condition. *Ren Shen* (Radix et Rhizoma Ginseng), *Fu Ling* (Poria) and *Fu Shen* (Poria Paradicis) tonify qi and tranquilize the *shen* (spirit). *Mai Dong* (Radix Ophiopogonis) nourishes yin. *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae) smooth the qi flow and direct qi downward. *Fang Feng* (Radix Saposhnikoviae) and *Ju Hua* (Flos Chrysanthemi) clear wind and heat from the eyes and head. *Shi Gao* (Gypsum Fibrosum) clears excess heat. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonize the herbs.

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver excess	<ul style="list-style-type: none"> • Irritability, dizziness, vertigo, headache and feeling of qi rushing upward; heat traveling upwards along the Liver channel • Marked changes in emotions and behavior and feelings of oppression and distention beneath the heart: Liver qi stagnation with heat in the Liver channel • Palpitations and insomnia: Liver heat affecting the Heart 	<ul style="list-style-type: none"> • Clears heat from the Liver channel • Directs Liver yang downward and extinguishes Liver wind 	<ul style="list-style-type: none"> • <i>Gou Teng</i> (Ramulus Uncariae cum Uncis) regulates Liver qi, clears heat from the Liver channel, and calms Liver wind. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Fu Ling</i> (Poria) and <i>Fu Shen</i> (Poria Paradicis) tonify qi and tranquilize the <i>shen</i> (spirit). • <i>Mai Dong</i> (Radix Ophiopogonis) nourishes yin. • <i>Chen Pi</i> (Pericarpium Citri Reticulatae) and <i>Ban Xia</i> (Rhizoma Pinelliae) smooth qi flow and direct qi downward. • <i>Fang Feng</i> (Radix Saposhnikoviae) and <i>Ju Hua</i> (Flos Chrysanthemi) clear wind and heat from the eyes and head. • <i>Shi Gao</i> (Gypsum Fibrosum) clears excess heat. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonize all of the herbs.

MODIFICATION

With headache and vertigo, add *Bai Zhi* (Radix Angelicae Dahuricae) and *Chuan Xiong* (Rhizoma Chuanxiong).

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** Administration of *Gou Teng San* in rats was associated with a dose-dependant reduction of blood pressure and heartbeat.¹ It prevented stroke and prolonged life span in stroke-prone hypertensive rats.² The mechanisms for lowering blood pressure and preventing stroke were attributed to activation of nitric oxide synthase and improvement in cerebral circulation.³
2. **Antiplatelet:** According to *in vitro* studies in rats, *Gou Teng San* was shown to have marked antiplatelet effects. It improved blood circulation to the peripheral parts of the body and reduced mortality caused by embolism.⁴
3. **Neuroprotective:** Administration of *Gou Teng San* was associated with significantly delaying neuronal cell death in the hippocampal CA1 region after ischemia. The mechanism was attributed to its free-radical-scavenging activity.⁵
4. **Antioxidant:** *Gou Teng San* has been shown in several studies to have marked antioxidant and free-radical-scavenging effects, and may be used to treat radical-mediated diseases.^{6,7}
5. **Anticonvulsant:** Administration of *Gou Teng San* was associated with a dose-dependent effect in treating mice with convulsions induced by picrotoxine, strychnine, and electroshock. *Gou Teng* (Ramulus Uncariae cum Uncis) is believed to be the main active ingredient in

this mechanism, as the formula was ineffective without this herb. The active constituents of *Gou Teng* (Ramulus Uncariae cum Uncis) have been isolated and identified as geissoschizine methylether, hirsuteine, hirsutine, and isocorynoxene.⁸

6. **Antidementia:** One study reported *Gou Teng San* to be effective in treating patients with vascular dementia. The antidementia effects were attributed to the anti-hypertensive, free-radical-scavenging, and anti-excitotoxic activities of this formula.⁹ Furthermore, another study in mice reported that long-term administration of *Gou Teng San* could improve, to some extent, the impairment of memory caused by aging.¹⁰
7. **Antiamnestic:** According to one study in mice, administration of *Gou Teng San* was associated with antiamnestic effects based on the stimulation of serotonin 1A receptors.¹¹

CLINICAL STUDIES AND RESEARCH

1. **Hypertension:** One study reported 91.7% effectiveness using modified *Gou Teng San* to treat high blood pressure in 182 patients (64 males, 118 females, mostly over 40 years of age). The herbal formula contained *Gou Teng* (Ramulus Uncariae cum Uncis) 3g, *Shi Gao* (Gypsum Fibrosum) 8g, *Chen Pi* (Pericarpium Citri Reticulatae) 3g, *Ban Xia* (Rhizoma Pinelliae) 4g, *Fu Ling* (Poria) 3.5g, *Ren Shen* (Radix et Rhizoma Ginseng) 2g, *Ju Hua* (Flos Chrysanthemi) 2g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 1g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 1.5g, *Mai Dong* (Radix Ophiopogonis) 4g, and *Fang Feng* (Radix Saposhnikoviae) 4g. The treatment

Gōu Téng Sǎn (Uncaria Powder)

protocol was to give the herbs in decoction, for an average of 7.4 months. Of 182 patients, the study reported a marked effect in 32 patients, moderate improvement in 60 patients, slight improvement in 75 patients, and no effect in 15 patients.¹²

2. **Cerebral infarction:** One study reported beneficial effects using *Gou Teng San* to treat 15 patients with asymptomatic cerebral infarction. Therapeutic benefits included improved microcirculation and decreased serum nitric oxide and lipid peroxides.¹³
3. **Alzheimer's disease:** One hundred and eighty patients with Alzheimer's disease were treated with beneficial effect using *Gou Teng San*. The treatment protocol was to use this formula in powder, at 7.5 g/day, for 8-12 weeks. Improvements included improved cognitive and physical activities, such as short-term memory, sleeping patterns, and speech patterns.¹⁴
4. **Dementia:** *Gou Teng San* was effective in the treatment of vascular dementia in two studies. According to one well-controlled but non-double blind study (60 patients), use of herbs was effective in global improvement rating, utility rating, and improvement of subjective symptoms, psychiatric symptoms, and disturbance in daily living activities. In the other study, a double-blind controlled study (139 patients), use of herbs was effective in global improvement rating, utility rating, and improvement of subjective symptoms, psychiatric symptoms, and disturbance in daily living activities.¹⁵
5. **Tinnitus:** Use of modified *Gou Teng San* was associated with good results in treating chronic tinnitus in 34 patients. The herbal treatment contained *Gou Teng* (*Ramulus Uncariae cum Uncis*), *Shi Gao* (*Gypsum Fibrosum*), *Chen Pi* (*Pericarpium Citri Reticulatae*), *Mai Dong* (*Radix Ophiopogonis*), *Ban Xia* (*Rhizoma Pinelliae*), *Fu Ling* (*Poria*), *Ren Shen* (*Radix et Rhizoma Ginseng*), *Fang Feng* (*Radix Saposhnikoviae*), *Sheng Jiang* (*Rhizoma Zingiberis Recens*), and *Ju Hua* (*Flos Chrysanthemi*). No side effects were noted.¹⁶

AUTHORS' COMMENTS

Gou Teng San (Uncaria Powder) and *Gou Teng Yin* (Uncaria Decoction) have similar names, but are different formulas.

- *Gou Teng San* treats Liver excess, with Liver heat, Liver yang, and Liver fire rising. It is frequently used to treat middle-aged adults with cardiovascular disorders.
- *Gou Teng Yin* treats Liver heat and wind rising with underlying deficiency. It is commonly used to treat infants with seizures and convulsions.

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	4.5g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Sedates the Liver and extinguishes Liver wind
2. Nourishes yin and anchors yang

CLINICAL MANIFESTATIONS

Liver yang and wind rising due to Liver and Kidney yin deficiencies, with disrupted or reversed flow of qi and blood: dizziness, vertigo, headache with a warm sensation in the head, swelling of the eyes, tinnitus, irritability, a red face, gradually increasing difficulty moving the extremities, gradual worsening deviation of the mouth, belching, unconsciousness in some patients, and a wiry, long, forceful pulse.

CLINICAL APPLICATIONS

Stroke, cerebral hemorrhage, cerebral thrombosis, apoplexy, post-stroke sequelae, epilepsy, hypertension, vascular headache, concussion, chloasma (melasma), premenstrual syndrome, menopause, and hyperthyroidism.

EXPLANATION

Zhen Gan Xi Feng Tang (Sedate the Liver and Extinguish Wind Decoction) treats the various symptoms of Liver yang and wind rising, with underlying Kidney and Liver

yin deficiencies. When Liver and Kidney yin are deficient, Liver yang and wind may rise uncontrollably. The hyperactive Liver yang and wind ascend and invade the head, causing dizziness, vertigo, and headache with a warm sensation in the head. Because the Liver and Kidney open to the eyes and ears respectively, hyperactive Liver yang and deficient Kidney yin may lead to swelling of the eyes and tinnitus. Irritability and a red face are due to hyperactivity of Liver yang, while difficulty in moving the extremities and deviation of the mouth are due to hyperactivity of Liver wind. The Liver in a state of excess may overact on the Stomach, causing belching. In severe cases, Liver yang may disturb qi and blood circulation and cause malnourishment, resulting in difficult movement of the extremities, hemiplegia, deviation of the eyes and mouth, and unconsciousness. A wiry, long, forceful pulse is an indication of Liver yang excess.

Niu Xi (Radix Achyranthis Bidentatae) is used as the chief herb in this formula. Bitter and sour, it enters the Liver and Kidney channels and nourishes these two organs. It also directs blood downwards to quickly correct the reversed flow of qi and blood. *Zhe Shi* (Haematitum), *Long Gu* (Os Draconis), and *Mu Li* (Concha Ostreae) sedate hyperactive Liver yang and calm Liver wind. *Gui Ban* (Plastrum Testudinis), *Xuan Shen* (Radix Scrophulariae), *Tian Dong* (Radix Asparagi), and *Bai Shao* (Radix

Paeoniae Alba) nourish yin and body fluids to restrain hyperactive yang. *Yin Chen* (Herba Artemisiae Scopariae), *Chuan Lian Zi* (Fructus Toosendan), and *Mai Ya* (Fructus Hordei Germinatus) smooth Liver qi circulation and prevent Liver qi stagnation. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs. The combination of *Mai Ya* (Fructus Hordei Germinatus) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) regulates Stomach qi and protects the stomach from the harsh mineral substances.

MODIFICATIONS

- If there is severe heat, add *Shi Gao* (Gypsum Fibrosum).
- If there is severe phlegm, add *Dan Nan Xing* (Arisaema cum Bile).
- With an empty or weak pulse upon pressure at the *chi* position, add *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Shan Zhu Yu* (Fructus Corni).
- With headache, add *Xia Ku Cao* (Spica Prunellae), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Ju Hua* (Flos Chrysanthemi).
- For stroke, add *Di Long* (Pheretima), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami).
- For trigeminal neuralgia due to Liver yang or Liver fire rising, add *Long Dan* (Radix et Rhizoma Gentianae).
- For poorly formed stools, remove *Gui Ban* (Plastrum Testudinis) and *Zhe Shi* (Haematitum), and add *Chi Shi Zhi* (Holloysitum Rubrum).

CAUTIONS / CONTRAINDICATIONS

- *Zhen Gan Xi Feng Tang* is not recommended for dizziness and vertigo caused by blood deficiency, qi deficiency,

Kidney deficiency, or accumulation of dampness and phlegm.¹

- This formula is not suitable for hypertension characterized by Kidney yin and yang deficiencies.²
- Occasional skin rashes have been reported following the use of this formula.³

PHARMACOLOGICAL EFFECTS

Antihypertensive: Administration of *Zhen Gan Xi Feng Tang* was associated with a marked reduction in blood pressure in anesthetized cats. The initial onset of action began 20 minutes after oral ingestion, and reduced the blood pressure by 29 mmHg for 40-100 minutes. Moreover, a greater antihypertensive effect was noted when *Zhen Gan Xi Feng Tang* was modified by eliminating *Gui Ban* (Plastrum Testudinis), *Mai Ya* (Fructus Hordei Germinatus), *Yin Chen* (Herba Artemisiae Scopariae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae); and adding *Xia Ku Cao* (Spica Prunellae), *Gou Teng* (Ramulus Uncariae cum Uncis), *He Shou Wu* (Radix Polygoni Multiflora), and *Shou Wu Teng* (Caulis Polygoni Multiflora). This modified *Zhen Gan Xi Feng Tang* was determined to have a more potent effect and a longer duration of action, reducing blood pressure by 43.5 mmHg for 80-110 minutes.⁴

CLINICAL STUDIES AND RESEARCH

1. **Stroke:** *Zhen Gan Xi Feng Tang* has been shown in many studies to effectively treat stroke. According to one study, use of modified *Zhen Gan Xi Feng Tang* was associated with 96% effectiveness in treating 50 patients with stroke.⁵ In another study, use of modified *Zhen Gan Xi Feng Tang*

Zhèn Gān Xí Fēng Tāng

(Sedate the Liver and Extinguish Wind Decoction)

was associated with 92.75% effectiveness in treating 197 patients with stroke (144 caused by cerebral embolism, 42 by cerebral hemorrhage, and 11 by other causes).⁶ Lastly, a study of 100 stroke patients reported 95% effectiveness using *Zhen Gan Xi Feng Tang*.⁷

2. **Cerebral hemorrhage:** Concurrent use of *Zhen Gan Xi Feng Tang* and *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone) was associated with beneficial effects in treating cerebral hemorrhage. Of 84 patients, the study reported complete recovery in 40 patients, significant improvement in 16 patients, moderate improvement in 17 patients, and continued deterioration in 11 patients.⁸
3. **Cerebral thrombosis:** Seventy-one patients with cerebral thrombosis were treated with beneficial results using *Zhen Gan Xi Feng Tang* and *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction). The exact herbal formula contained *Huang Qi* (Radix Astragali) 30g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 30g, *Zhe Shi* (Haematitum) 30g, *Long Gu* (Os Draconis) 15g, *Mu Li* (Concha Ostreae) 15g, *Niu Xi* (Radix Achyranthis Bidentatae) 12g, *Dang Gui* (Radix Angelicae Sinensis) 9g, *Chi Shao* (Radix Paeoniae Rubra) 9g, *Chuan Xiong* (Rhizoma Chuanxiong) 9g, *Di Long* (Pheretima) 9g, *Tian Dong* (Radix Asparagi) 9g, *Tao Ren* (Semen Persicae) 6g, and *Hong Hua* (Flos Carthami) 6g. The treatment protocol was to cook the herbs in water, and administer the decoction in two equally-divided doses in the morning and at night. Of 71 patients, the study reported recovery in 26 patients, improvement in 37 patients, and no benefit in 8 patients. The rate of effectiveness was 88.7%.⁹
4. **Hypertension:** One study reported good results for treatment of primary hypertension characterized by Liver yang rising, using modified *Zhen Gan Xi Feng Tang* or *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction).¹⁰
5. **Vascular headache:** One study reported good results (91.4% effectiveness) using *Zhen Gan Xi Feng Tang* to treat 70 patients with vascular headache. In addition to *Zhen Gan Xi Feng Tang* as the base formula, modifications were made by adding *Gou Teng* (Ramulus Uncariae cum Uncis) and *Bai Zhi* (Radix Angelicae Dahuricae) for acute onset of severe headache; and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Chuan Xiong* (Rhizoma Chuanxiong) for chronic, unrelenting headache. One pack of herbs was given per day, for 15 days per course of treatment. Of 70 patients, the study reported near-complete recovery in 23 patients, improvement in 41 patients, and no change in 6 patients.¹¹

6. **Concussion:** Use of *Zhen Gan Xi Feng Tang* in 23 patients with concussion was associated with complete recovery in 18 patients, improvement in 4 patients, and discontinuation of treatment in 1 patient (reason unknown). In addition to this formula, *Shi Di* (Calyx Kaki) and *Zhu Ru* (Caulis Bambusae in Taenia) were added for nausea and vomiting; *San Qi* (Radix et Rhizoma Notoginseng) was added for subdermal bleeding and bruises; and *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Zhen Zhu Mu* (Concha Margaritiferae) for insomnia and palpitations.¹²
7. **Chloasma (Melasma):** Use of modified *Zhen Gan Xi Feng Tang* in 13 patients with blotchy, brownish pigmentation on the face was associated with complete recovery in 10 patients and significant improvement in 3 patients. The herbal treatment contained the following ingredients: *Niu Xi* (Radix Achyranthis Bidentatae) 30g, *Zhe Shi* (Haematitum) 30g, *Long Gu* (Os Draconis) 15g, *Mu Li* (Concha Ostreae) 15g, *Gui Ban* (Plastrum Testudinis) 15g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Xuan Shen* (Radix Scrophulariae) 15g, *Tian Dong* (Radix Asparagi) 15g, *Chuan Lian Zi* (Fructus Toosendan) 6g, *Mai Ya* (Fructus Hordei Germinatus) 6g, *Yin Chen* (Herba Artemisiae Scopariae) 6g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 4.5g.¹³
8. **Menopause:** One study reported excellent results using modified *Zhen Gan Xi Feng Tang* to treat 32 perimenopausal women with tidal fever and spontaneous perspiration. In addition to the base formula, modifications were made by including *Mo Han Lian* (Herba Ecliptae) and *Sang Ji Sheng* (Herba Taxilli) for tinnitus and low back pain; *Ji Li* (Fructus Tribuli) and *Fo Shou* (Fructus Citri Sarcodactylis) for breast distention; *Shi Hu* (Caulis Dendrobii) and *Mai Dong* (Radix Ophiopogonis) for a dry mouth and dry tongue; and other adjustments as needed. The study reported close to 100% effectiveness.¹⁴

AUTHORS' COMMENTS

Zhen Gan Xi Feng Tang is commonly used to treat stroke characterized by both excess (Liver yang and wind rising) and deficiency (Kidney and Liver yin deficiencies). It may be used before, during, and after stroke incidents. The key signs and symptoms include high blood pressure, dizziness, distended pain in the head, irritability, and a wiry, long, forceful pulse.

Jiàn Líng Tāng (Construct Roof Tiles Decoction)

建瓴湯

建瓴汤

Pinyin Name: *Jian Ling Tang*
Literal Name: Construct Roof Tiles Decoction
Alternate Name: Dioscorea and Achyranthes Combination
Original Source: *Yi Xue Zhong Zhong Can Xi Lu* (Records of Heart-Felt Experiences in Medicine with Reference to the West) by Zhang Xi-Chun in 1918-34

COMPOSITION

<i>Niu Xi</i> (Radix Achyranthis Bidentatae)	30g
<i>Zhe Shi</i> (Haematitum), <i>ya</i> (pressed) into fine particles	24g
<i>Long Gu</i> (Os Draconis), <i>dao</i> (pounded) into fine particles	18g
<i>Mu Li</i> (Concha Ostreae), <i>dao</i> (pounded) into fine particles	18g
<i>Shan Yao</i> (Rhizoma Dioscoreae)	30g
<i>Di Huang</i> (Radix Rehmanniae)	18g
<i>Bai Shao</i> (Radix Paeoniae Alba)	12g
<i>Bai Zi Ren</i> (Semen Platycladi)	12g

DOSAGE / PREPARATION / ADMINISTRATION

The source text advises to prepare the ingredients as a decoction using water filled with iron rust. Today, the use of iron rust is generally omitted.

CHINESE THERAPEUTIC ACTIONS

- 1. Sedates the Liver and extinguishes Liver wind
- 2. Nourishes yin and calms the *shen* (spirit)

CLINICAL MANIFESTATIONS

Liver yang rising: dizziness, vertigo, tinnitus, swelling of the ears, palpitations, forgetfulness, irritability, restlessness, insomnia, excessive dreams, and a wiry, hard, and long pulse

CLINICAL APPLICATIONS

Hypertension, trigeminal neuralgia, headache, tinnitus, aphasia, and apraxia.

EXPLANATION

When Liver yang ascends, it affects the Heart and head. Disturbance of the Heart leads to disturbance of the *shen* (spirit); thus, patients usually experience palpitations, forgetfulness, insomnia, and excessive dreams. When Liver yang ascends to the head, patients exhibit signs and symptoms of dizziness, vertigo, tinnitus, and swelling of the ears. Liver yang excess leads to restlessness and irritability because the Liver controls emotions. A wiry, hard, and long pulse is indicative of Liver yang excess.

Jiàn Líng Tāng (Construct Roof Tiles Decoction)

Jian Ling Tang (Construct Roof Tiles Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver yang rising	<ul style="list-style-type: none"> Palpitations, forgetfulness, insomnia, excessive dreams, fidgeting and irritability: Liver yang affecting the Heart and disturbing the <i>shen</i> (spirit) Dizziness, vertigo, tinnitus and swelling of the ears: Liver yang rising to the head Wiry, hard, long pulse: Liver yang excess 	<ul style="list-style-type: none"> Sedates the Liver and extinguishes Liver wind Nourishes yin and calms the <i>shen</i> (spirit) 	<ul style="list-style-type: none"> <i>Niu Xi</i> (Radix Achyranthis Bidentatae) nourishes the Liver and Kidney to calm wind and yang. <i>Zhe Shi</i> (Haematitum), <i>Long Gu</i> (Os Draconis) and <i>Mu Li</i> (Concha Ostreae) sedate hyperactive Liver yang and calm Liver wind. <i>Shan Yao</i> (Rhizoma Dioscoreae), <i>Di Huang</i> (Radix Rehmanniae) and <i>Bai Shao</i> (Radix Paeoniae Alba) nourish yin and generate fluids. <i>Bai Zi Ren</i> (Semen Platycladi) nourishes the Heart and calms the <i>shen</i> (spirit) to relieve palpitations, insomnia, and excessive dreams.

Therapeutic functions of *Jian Ling Tang* (Construct Roof Tiles Decoction) include calming Liver yang, extinguishing Liver wind, tranquilizing the *shen* (spirit), and nourishing yin. *Niu Xi* (Radix Achyranthis Bidentatae) enters the Liver and Kidney and leads the blood downward to calm hyperactive yang and wind. Moreover, *Niu Xi* (Radix Achyranthis Bidentatae) nourishes the Liver and Kidney to calm the wind and yang. *Zhe Shi* (Haematitum), *Long Gu* (Os Draconis), and *Mu Li* (Concha Ostreae) sedate hyperactive Liver yang and calm Liver wind. *Shan Yao* (Rhizoma Dioscoreae) nourishes yin and strengthens the Spleen and Kidney, which are easily damaged by excess Liver yang. *Di Huang* (Radix Rehmanniae) clears heat, nourishes yin, and promotes generation of body fluids. *Bai Shao* (Radix Paeoniae Alba) nourishes yin and body fluids to restrain hyperactive yang. *Bai Zi Ren* (Semen Platycladi) nourishes the Heart and calms the *shen* to relieve palpitations, insomnia, and excessive dreams.

Tang to be effective in treating hypertension. According to one study, use of modified *Jian Ling Tang* was associated with 88.9% effectiveness in treating 90 patients with primary hypertension.¹ In another study, use of *Jian Ling Tang* was associated with 93.7% effectiveness in treating 66 patients with hypertension.²

AUTHORS' COMMENTS

Zhen Gan Xi Feng Tang (Sedate the Liver and Extinguish Wind Decoction) and *Jian Ling Tang* both treat Liver wind rising and yin deficiency.

- *Zhen Gan Xi Feng Tang* is stronger at extinguishing wind to treat excess conditions, but weaker at nourishing yin. Clinically, this formula is more effective in **treating** cerebral hemorrhage.
- *Jian Ling Tang* moderately sedates Liver yang, but strongly nourishes yin and tranquilizes the mind. Clinically, this formula is more effective in **preventing** cerebral hemorrhage.³

Jian Ling Tang is a contemporary formula specifically formulated to prevent cerebrovascular accident. It is prescribed when the following warning signs and symptoms are present:

- A wiry, hard and long pulse; or an excess pulse at the *cun* position and a deficient pulse at the *chi* position.
- Frequent experience of dizziness, vertigo, headache, forgetfulness, and tinnitus.
- Frequent feelings of qi rushing upwards from the stomach to obstruct eating and swallowing; or feelings of qi rushing upwards from the lower *jiao* to cause hiccups.
- Clinical manifestations of swollen tongue, speech difficulties, deviation of the eyes and mouth, numbness of the limbs, gradual loss of balance with walking difficulties, and feelings of heaviness on top (head) and lightness at the bottom (feet).

MODIFICATIONS

- For poorly formed stools, add *Lian Zi* (Semen Nelumbinis) from which *Lian Zi Xin* (Plumula Nelumbinis) has been removed.
- With aversion to cold, remove *Di Huang* (Radix Rehmanniae) and use *Shu Di Huang* (Radix Rehmanniae Praeparata).
- With trigeminal neuralgia caused by Liver fire and Liver yang, add *Long Dan* (Radix et Rhizoma Gentianae).
- With headache and vertigo, add *Xia Ku Cao* (Spica Prunellae).
- With excessive phlegm, add *Dan Nan Xing* (Arisaema cum Bile).

CLINICAL STUDIES AND RESEARCH

Hypertension: Numerous studies have shown *Jian Ling*

Tiān Má Gōu Téng Yǐn (Gastrodia and Uncaria Decoction)

天麻鉤藤飲

天麻钩藤饮

Pinyin Name: *Tian Ma Gou Teng Yin*

Literal Name: Gastrodia and Uncaria Decoction

Alternate Name: Gambir Combination

Original Source: *Za Bing Zheng Zhi Xin Yi* (New Significance of Patterns and Treatment in Miscellaneous Diseases)

COMPOSITION

<i>Tian Ma</i> (Rhizoma Gastrodiae)	9g
<i>Gou Teng</i> (Ramulus Uncariae cum Uncis), post-decocted	12g
<i>Zhi Zi</i> (Fructus Gardeniae)	9g
<i>Huang Qin</i> (Radix Scutellariae)	9g
<i>Shi Jue Ming</i> (Concha Haliotidis), pre-decocted	18g
<i>Yi Mu Cao</i> (Herba Leonuri)	9g
<i>Chuan Niu Xi</i> (Radix Cyathulae)	12g
<i>Du Zhong</i> (Cortex Eucommiae)	9g
<i>Sang Ji Sheng</i> (Herba Taxilli)	9g
<i>Shou Wu Teng</i> (Caulis Polygoni Multiflori)	9g
<i>Fu Shen</i> (Poria Paradicis), processed with <i>Zhu Sha</i> (Cinnabaris)	9g

Note: The source text directs the herbalist to process *Fu Shen* (Poria Paradicis) with *Zhu Sha* (Cinnabaris) to enhance the effect of calming the *shen* (spirit) and relieving insomnia. However, *Zhu Sha* (Cinnabaris) is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Calms Liver yang and extinguishes Liver wind
2. Clears heat
3. Activates blood circulation
4. Tonifies the Liver and Kidney

CLINICAL MANIFESTATIONS

Hyperactivity of Liver yang and Liver wind: headache, dizziness, vertigo, and insomnia.

CLINICAL APPLICATIONS

Hypertension, headache, trigeminal neuralgia, prevention and treatment of seizures and epilepsy, cerebral hemorrhage, cerebral embolism, stroke, cerebral infarction, ischemic stroke, hemiplegia, dizziness, vertigo, facial spasms, and neurasthenia.

EXPLANATION

Tian Ma Gou Teng Yin (Gastrodia and Uncaria Decoction) treats Liver yang hyperactivity and Liver wind rising. Excess Liver yang may lead to the rise of Liver wind, which then invades the head to cause headache, dizziness, and vertigo. Excess Liver yang may also affect the *shen* (spirit), causing insomnia, sleep disturbances, and excessive dreaming.

This formula contains *Tian Ma* (Rhizoma Gastrodiae) and *Gou Teng* (Ramulus Uncariae cum Uncis) to calm

Tiān Má Gōu Téng Yīn (Gastrodia and Uncaria Decoction)

Tian Ma Gou Teng Yin (Gastrodia and Uncaria Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Hyperactivity of Liver yang and Liver wind	<ul style="list-style-type: none"> Headache, dizziness and vertigo: Liver yang and Liver wind rising Insomnia and sleep disturbances: <i>shen</i> (spirit) disturbance 	<ul style="list-style-type: none"> Calms Liver yang and extinguishes Liver wind Clears heat Activates blood circulation Tonifies the Liver and Kidney 	<ul style="list-style-type: none"> <i>Tian Ma</i> (Rhizoma Gastrodiae) and <i>Gou Teng</i> (Ramulus Uncariae cum Uncis) calm Liver yang and extinguish Liver wind. <i>Zhi Zi</i> (Fructus Gardeniae) and <i>Huang Qin</i> (Radix Scutellariae) clear heat, sedate fire, and prevent Liver yang from rising. <i>Shi Jue Ming</i> (Concha Haliotidis) clears heat and calms Liver yang. <i>Yi Mu Cao</i> (Herba Leonuri) activates blood circulation and regulates water circulation. <i>Chuan Niu Xi</i> (Radix Cyathulae) leads blood downward to calm the Liver. <i>Du Zhong</i> (Cortex Eucommiae) and <i>Sang Ji Sheng</i> (Herba Taxilli) tonify the Liver and Kidney. <i>Shou Wu Teng</i> (Caulis Polygoni Multiflori) and <i>Fu Shen</i> (Poria Paradicis) calm the <i>shen</i> (spirit) and relieve insomnia.

Liver yang and extinguish Liver wind. *Zhi Zi* (Fructus Gardeniae) and *Huang Qin* (Radix Scutellariae) clear heat, sedate fire and prevent Liver yang from rising. *Shi Jue Ming* (Concha Haliotidis) clears heat and calms Liver yang. *Yi Mu Cao* (Herba Leonuri) activates blood circulation and regulates water circulation. *Chuan Niu Xi* (Radix Cyathulae) leads the blood downward to calm the Liver. *Du Zhong* (Cortex Eucommiae) and *Sang Ji Sheng* (Herba Taxilli) tonify the Liver and Kidney. *Shou Wu Teng* (Caulis Polygoni Multiflori) and *Fu Shen* (Poria Paradicis) calm the *shen* and relieve insomnia.

MODIFICATIONS

- With severe Liver yang rising, add *Zhe Shi* (Haematitum), *Long Gu* (Os Draconis), and *Mu Li* (Concha Ostreae).
- With Liver yin deficiency, add *Bai Shao* (Radix Paeoniae Alba) and *Gui Ban* (Plastrum Testudinis).
- When there are post-stroke complications, add *Chi Shao* (Radix Paeoniae Rubra), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami).
- With thirst and phlegm accumulation, add *Bei Mu* (Bulbus Fritillariae) and *Zhu Ru* (Caulis Bambusae in Taenia).
- For arteriosclerosis with hypertension, add *Huai Hua* (Flos Sophorae) and *Hai Zao* (Sargassum).
- For hypertension, add *Xia Ku Cao* (Spica Prunellae), *Jue Ming Zi* (Semen Cassiae) and *Zhen Zhu Mu* (Concha Margaritiferae).

CAUTIONS / CONTRAINDICATIONS

Tian Ma Gou Teng Yin is contraindicated in conditions characterized by Liver wind rising because of yin deficiency, with symptoms such as a red tongue body, and a scanty or mirror-like tongue coating.¹

PHARMACOLOGICAL EFFECTS

Antihypertensive: Use of *Tian Ma Gou Teng Yin* markedly reduced blood pressure in dogs. However, it did not affect subjects with normal blood pressure. Based on this finding, the researchers suggest that this formula has a regulating effect on blood pressure.²

CLINICAL STUDIES AND RESEARCH

1. **Hypertension:** Administration of *Tian Ma Gou Teng Yin* was effective in treating hypertension. In one study with 213 patients with primary hypertension, use of modified *Tian Ma Gou Teng Yin* or *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction) was associated with marked effectiveness in reducing blood pressure in 156 patients, moderately reducing blood pressure in 19 patients, and no effect in 6 patients. The overall rate of effectiveness was 97.18%. Note: Information was unavailable on patients that did not complete the study.³
2. **Headache:** Use of *Tian Ma Gou Teng Yin* was associated with complete recovery in 135 of 150 patients with headache characterized by Liver yang rising.⁴
3. **Epilepsy:** In one study, 15 children with epilepsy were treated with good results using modified *Tian Ma Gou Teng Yin*. The herbal formula contained *Tian Ma*

Tiān Má Gōu Téng Yīn (Gastrodia and Uncaria Decoction)

(Rhizoma Gastrodiae) 9g, *Gou Teng* (Ramulus Uncariae cum Uncis) 12g, *Shi Jue Ming* (Concha Haliotidis) 18g, *Huang Qin* (Radix Scutellariae) 9g, *Fu Ling* (Poria) 12g, *Shi Chang Pu* (Rhizoma Acori Tatarinowii) 8g, *Bai Shao* (Radix Paeoniae Alba) 12g, *Ju Hua* (Flos Chrysanthemi) 12g, *Nu Zhen Zi* (Fructus Ligustri Lucidi) 12g, *Dan Nan Xing* (Arisaema cum Bile) 9g, and others as needed. The herbs were given in decoction daily, for one month per course of treatment, for 1 to 6 courses total (average of 3 courses). Of 15 patients, the study reported significant improvement in 8 patients, moderate improvement in 4 patients, and no effect in 3 patients.⁵

4. **Ischemic stroke:** Use of modified *Tian Ma Gou Teng Yin* was associated with good success treating ischemic stroke in 243 patients. The study reported 68.42% effectiveness in 76 patients with stroke due to Liver fire and obstruction of channels and collaterals using this formula; 70% effectiveness in 150 patients with stroke due to qi deficiency and blood stagnation using this formula plus *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction); and 53% effectiveness in 17 patients with stroke due to rising of yang and wind using this formula plus *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction).⁶
5. **Dizziness:** Concurrent use of *Tian Ma Gou Teng Yin* and *Wen Dan Tang* (Warm the Gallbladder Decoction) was effective in treating all 24 patients with dizziness due to inner ear imbalance. The herbs were given in decoction daily.⁷ According to another study, use of modified *Tian Ma Gou Teng Yin* was associated with 84.6% effectiveness in treating 78 patients with dizziness and vertigo. The herbal formula was based on *Tian Ma Gou Teng Yin*, with the addition of *Zhi Mu* (Rhizoma Anemarrhenae) and *Ju Hua* (Flos Chrysanthemi), and the elimination of *Yi Mu Cao* (Herba Leonuri). Additional modifications were made as needed.⁸
6. **Vertigo:** Use of modified *Tian Ma Gou Teng Yin* was associated with 97.06% effectiveness in treating vertigo. The herbal treatment contained *Tian Ma* (Rhizoma Gastrodiae) 30g, *Gou Teng* (Ramulus Uncariae cum Uncis) 30g, *Shi Jue Ming* (Concha Haliotidis) 40g, *Niu Xi* (Radix Achyranthis Bidentatae) 30g, *Sang Ji Sheng* (Herba Taxilli) 20g, *Du Zhong* (Cortex Eucommiae) 20g, *Zhi Zi* (Fructus Gardeniae) 30g, *Huang Qin* (Radix Scutellariae) 20g, *Fu Shen* (Poria Paradicis) 20g, *Yi Mu Cao* (Herba Leonuri) 30g, and *Shou Wu Teng* (Caulis Polygoni Multiflori) 30g. The herbs were given in decoction twice daily. The duration of treatment ranged from 3 to 4 weeks. Improvements included relief of blurred vision, dizziness, tinnitus, and vertigo. Of 98 patients, the study reported complete recovery in 65 patients, moderate improvement in 31 patients, and no effect in 2 patients.⁹

7. **Facial spasms:** Use of modified *Tian Ma Gou Teng Yin* in decoction daily for 7 to 14 days effectively treated 46 patients with facial spasms (32 with complete recovery, 8 with marked improvement, and 6 with slight improvement). The herbal formula was modified by removing *Shi Jue Ming* (Concha Haliotidis), *Zhi Zi* (Fructus Gardeniae), and *Shou Wu Teng* (Caulis Polygoni Multiflori), and adding *Bai Shao* (Radix Paeoniae Alba), *Dang Gui* (Radix Angelicae Sinensis), and *Gui Zhi* (Ramulus Cinnamomi). Furthermore, *Dang Shen* (Radix Codonopsis) was added for chronic deficiency; *Di Huang* (Radix Rehmanniae) and *Mai Dong* (Radix Ophiopogonis) were added for fluid deficiency; *Jue Ming Zi* (Semen Cassiae) and *Ju Hua* (Flos Chrysanthemi) were added for tinnitus and stuffy head due to Liver yang rising; *Mu Tong* (Caulis Akebiae) and *Che Qian Cao* (Herba Plantaginis) were added for dysuria; and *Da Huang* (Radix et Rhizoma Rhei) and *Feng Mi* (Mel) were added for constipation.¹⁰
8. **Neurasthenia:** Administration of modified *Tian Ma Gou Teng Yin* was associated with 97.2% effectiveness in 500 patients with neurasthenia (296 experienced complete recovery, 127 showed marked improvement, 64 had moderate improvement, and 13 had no effect). In addition to *Tian Ma Gou Teng Yin*, *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity) was added for Heart and Liver fire; *Huang Lian* (Rhizoma Coptidis) and *Wen Dan Tang* (Warm the Gallbladder Decoction) for hot phlegm; and *Tian Dong* (Radix Asparagi), *Bai Shao* (Radix Paeoniae Alba), and *Gui Ban* (Plastrum Testudinis) for yin deficiency.¹¹

TOXICOLOGY

According to one study, administration of *Tian Ma Gou Teng Yin* in 168 adults was associated with thirst in 5 patients. No other abnormalities were noted.¹²

<i>Mu Li</i> (Concha Ostreae), chu (pestled)	12g
<i>Fu Shen</i> (Poria Paradicis)	12g
<i>Luo Shi Teng</i> (Caulis Trachelospermi)	9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends cooking *Ji Zi Huang* (Galli Vitellus) in water first, and use the liquid to prepare the other ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and tonifies blood
2. Softens the Liver and extinguishes Liver wind

Ē Jiāo Jī Zǐ Huáng Tāng (Ass-Hide Gelatin and Egg Yolk Decoction)

CLINICAL MANIFESTATIONS

Liver wind rising due to pathogenic heat damaging yin and blood: muscle spasms and cramps, weakness and paralysis of the hands and feet, dizziness, vertigo, a deep red tongue body with a scanty tongue coating, and a fine, rapid pulse.

CLINICAL APPLICATIONS

Cerebral embolism and post-encephalitis complications.

EXPLANATION

E Jiao Ji Zi Huang Tang (Ass-Hide Gelatin and Egg Yolk Decoction) treats Liver wind rising due to pathogenic heat damaging yin and blood. This syndrome is commonly seen following *wen bing* (warm febrile diseases), in which the heat has damaged and consumed yin and blood. Yin and blood deficiencies cause malnourishment of the muscles and tendons, leading to spasms and cramps, difficulty in movement, and possible weakness and paralysis of the hands and feet. Yin and blood deficiencies may also contribute to Liver wind rising to the head, causing dizziness and vertigo. A deep red tongue body with a scanty tongue coating and a fine, rapid pulse suggest deficiency heat.

E Jiao (Colla Corii Asini) and *Ji Zi Huang* (Galli Vitellus), the chief herbs, nourish yin, tonify the blood, and sedate Liver wind and yang. *Di Huang* (Radix Rehmanniae), *Bai Shao* (Radix Paeoniae Alba), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourish yin and blood, soften the Liver, and extinguish Liver wind. Because yin and blood deficiencies may lead to Liver yang rising, *Gou Teng* (Ramulus Uncariae cum Uncis), *Shi Jue*

Ming (Concha Haliotidis), and *Mu Li* (Concha Ostreae) are added to sedate Liver yang and extinguish Liver wind. *Fu Shen* (Poria Paradicis) calms the *shen* (spirit). *Luo Shi Teng* (Caulis Trachelospermi) helps *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) open the collaterals and relax the muscles and tendons to relieve spasms and cramps.

MODIFICATIONS

- With qi and yin deficiencies, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Mai Dong* (Radix Ophiopogonis).
- If there is spontaneous sweating, add *Fu Xiao Mai* (Fructus Triticis Levis) and *Ma Huang Gen* (Radix et Rhizoma Ephedrae).

CAUTIONS / CONTRAINDICATIONS

E Jiao Ji Zi Huang Tang is contraindicated in cases of excess Liver fire in the absence of yin deficiency.

AUTHORS' COMMENTS

Ling Jiao Gou Teng Tang (Antelope Horn and Uncaria Decoction) and *E Jiao Ji Zi Huang Tang* both treat Liver yang and Liver wind conditions associated with *wen bing* (warm disease), but have the following differences:

- *Ling Jiao Gou Teng Tang* addresses Liver yang and Liver wind rising associated with early stages of *wen bing* (warm disease) in which the excess heat causes the Liver yang and wind to rise upwards. In addition, Liver yang and Liver wind intensify one another's severity, and worsen the condition. Therefore, this formula is composed primarily of herbs that clear heat, calm Liver yang and extinguish Liver wind.

E Jiao Ji Zi Huang Tang (Ass-Hide Gelatin and Egg Yolk Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs

• *E Jiao Ji Zi Huang Tang* treats Liver yang rising and extinguishes Liver wind in chronic cases of *wen bing* (warm disease) in which heat has damaged yin and blood. When yin and blood become deficient, Liver yang and Liver

wind begin to rise upwards. Therefore, this formula is composed of herbs that treat both excess (Liver yang and Liver wind rising) and deficiency (yin and blood deficiencies).

Dà Dìng Fēng Zhū (Major Arrest Wind Pearl)

大定風珠
大定风珠

Pinyin Name: *Da Ding Feng Zhu*

Literal Name: Major Arrest Wind Pearl

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Ji Zi Huang</i> (Galli Vitellus)	2 yolks
<i>E Jiao</i> (Colla Corii Asini)	9g
<i>Di Huang</i> (Radix Rehmanniae)	18g
<i>Mai Dong</i> (Radix Ophiopogonis)	18g
<i>Bai Shao</i> (Radix Paeoniae Alba)	18g
<i>Gui Ban</i> (Plastrum Testudinis)	12g
<i>Bie Jia</i> (Carapax Trionycis)	12g
<i>Mu Li</i> (Concha Ostreae)	12g
<i>Huo Ma Ren</i> (Fructus Cannabis)	6g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	6g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	12g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 8 cups of water until the decoction is reduced to 3 cups. Discard the residue. Blend *Ji Zi Huang* (Galli Vitellus) into the strained decoction, and take the resulting mixture in three equally-divided doses daily.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin
2. Extinguishes Liver wind

CLINICAL MANIFESTATIONS

Severe yin deficiency with Liver wind rising: extreme lack of energy, clonic convulsions, a deep red tongue body with scanty tongue coating, and a deficient pulse.

CLINICAL APPLICATIONS

Stroke, spasms and cramps, convulsions, post-stroke insomnia, post-stroke paralysis, chorea minor, liver fibrosis, and encephalitis.

EXPLANATION

Da Ding Feng Zhu (Major Arrest Wind Pearl) treats severe yin deficiency with Liver wind rising. This condition may be caused by chronic *wen bing* (warm disease) disorders with heat consuming yin and fluids, or inappropriate use of herbs leading to damage of yin and loss of fluids. Severe yin deficiency may lead to depletion of energy and a deep red tongue with little coating. Severe yin deficiency also contributes to Liver wind rising, which may cause clonic convulsions. A deficient pulse suggests severe yin deficiency. Patients with this condition will have a strong tendency to go into shock.

This formula has *Ji Zi Huang* (Galli Vitellus) and *E Jiao* (Colla Corii Asini) to nourish yin and body fluids to extinguish Liver wind. *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis), and *Bai Shao* (Radix Paeoniae Alba) nourish yin and soften the Liver. *Gui Ban* (Plastrum Testudinis), *Bie Jia* (Carapax Trionycis) and *Mu Li* (Concha Ostreae) nourish yin and anchor the

Severe yin deficiency with Liver wind rising	<ul style="list-style-type: none"> • Depletion of energy and a deep red tongue with little coating: severe yin deficiency • Clonic convulsions: Liver wind rising • Deficient pulse: deficiency condition 	<ul style="list-style-type: none"> • Nourishes yin • Extinguishes Liver wind 	<ul style="list-style-type: none"> • <i>Ji Zi Huang</i> (Galli Vitellus) and <i>E Jiao</i> (Colla Corii Asini) nourish yin and body fluids to extinguish Liver wind. • <i>Di Huang</i> (Radix Rehmanniae), <i>Mai Dong</i> (Radix Ophiopogonis) and <i>Bai Shao</i> (Radix Paeoniae Alba) nourish yin and soften the Liver. • <i>Gui Ban</i> (Plastrum Testudinis), <i>Bie Jia</i> (Carapax Trionycis) and <i>Mu Li</i> (Concha Ostreae) nourish yin and anchor the yang. • <i>Huo Ma Ren</i> (Fructus Cannabis) nourishes yin and moistens dryness. • <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) enhance the yin-tonifying action of the other herbs.

yang. *Huo Ma Ren* (Fructus Cannabis) nourishes yin and moistens dryness. *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) are sour and sweet herbs that enhance the yin-tonifying action of the other herbs in this formula.

MODIFICATIONS

- With dyspnea due to qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng).
- With spontaneous sweating, add *Huang Qi* (Radix Astragali), *Long Gu* (Os Draconis), and *Xiao Mai* (Fructus Tritici).
- With palpitations, add *Fu Shen* (Poria Paradicis), *Ren Shen* (Radix et Rhizoma Ginseng), and *Xiao Mai* (Fructus Tritici).
- With phlegm, add *Tian Zhu Huang* (Concretio Silicea Bambusae) and *Bei Mu* (Bulbus Fritillariae).
- With low-grade fever, add *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) and *Di Gu Pi* (Cortex Lycii).

CAUTIONS / CONTRAINDICATIONS

Da Ding Feng Zhu should be used only for severe yin deficiency with no excess heat. It is **not** suitable for those who have both severe yin deficiency and excess interior heat.

CLINICAL STUDIES AND RESEARCH

1. **Post-stroke insomnia:** Thirty-six patients with post-stroke insomnia (an average of 3 months history of illness) were treated with marked effect using *Da Ding Feng Zhu*. The study reported an overall effectiveness of 94.4% (with at least 3 to 4 hours of sleep per night without the use of pharmaceutical drugs).¹
2. **Post-stroke paralysis:** One hundred patients with post-stroke paralysis were treated with 98% effectiveness using both herbs and acupuncture. Herbal treatment varied depending on the diagnosis: modified *Da Ding Feng Zhu* was used for yin deficiency and yang excess; modified *Dao Tan Tang* (Guide Out Phlegm Decoction) was used for phlegm accumulation; modified *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction) was used for qi deficiency and blood stagnation; and modified *Di Huang Yin Zi* (Rehmannia Decoction) was used for deficiency of *yuan* (source) *qi*. Acupuncture treatment included scalp or body acupuncture. The study noted that patients who received scalp acupuncture responded better than those who received body acupuncture.²
3. **Chorea minor:** In one study, modified *Da Ding Feng Zhu* was used in the treatment of chorea minor. The herbal formula contained *Da Ding Feng Zhu* with the removal of *Mai Dong* (Radix Ophiopogonis), *Huo Ma Ren* (Fructus Cannabis), and *Wu Wei Zi* (Fructus Schisandrae Chinensis) and the addition of *Gou Teng* (Ramulus Uncariae cum Uncis), *Jiang Can* (Bombyx Batryticatus), *Shi Jue Ming* (Concha Haliotidis), *Long Gu* (Os Draconis), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae), and others as deemed necessary. Each course of treatment lasted one month. The study reported that most people began to show symptomatic improvement within 2 weeks, with marked improvement or complete recovery within 1-2 courses of treatments. Out of 12 cases, the study reported complete recovery in 4 cases, marked benefits in 6 cases, and no effect in 2 cases.³
4. **Liver fibrosis:** One study reported beneficial effects using *Da Ding Feng Zhu* to treat liver fibrosis. Of 56 patients,

Dà Dīng Fēng Zhū (Major Arrest Wind Pearl)

30 were treated with herbs and 26 were treated with colchicine. After 3 months of treatment, the study reported that the herb group had significantly lowered levels of hyaluronic acid (HA), procollagen III (PC-III), IV collagen (IV-C), and laminin (LN), while the drug group only had lowered levels of HA. The study concluded that *Da Ding Feng Zhu* is effective in lowering serum indices in liver fibrosis.⁴

5. **Encephalitis:** Administration of *Da Ding Feng Zhu* was beneficial in treating complications of encephalitis during recovery in 8 children. Complications of encephalitis included cognitive and speech impairment. The average duration of treatment was approximately one month.⁵

RELATED FORMULAS

Xiǎo Dīng Fēng Zhū (Minor Arrest Wind Pearl)

小定風珠
小定风珠

Pinyin Name: *Xiao Ding Feng Zhu*

Literal Name: Minor Arrest Wind Pearl

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

<i>Ji Zi Huang</i> (Galli Vitellus), fresh	1 yolk
<i>E Jiao</i> (Colla Corii Asini)	6g
<i>Gui Ban</i> (Plastrum Testudinis)	18g
<i>Tong Bian</i> (Infantis Urina)	150 mL
<i>Dan Cai</i> (Mytilus Crassitesta)	9g

The source text states to first cook *Gui Ban* (Plastrum Testudinis) and *Dan Cai* (Mytilus Crassitesta) in 5 cups of water and reduce the decoction to 2 cups. Discard the residue, and dissolve *E Jiao* (Colla Corii Asini) in the strained liquid. Blend in *Ji Zi Huang* (Galli Vitellus), followed by *Tong Bian* (Infantis Urina), before ingestion.

This formula nourishes yin and extinguishes Liver wind. It can be used to treat chronic damp accumulation in the lower *jiao* accompanied by yin deficiency and Liver wind rising. *Xiao Ding Feng Zhu* (Minor Arrest Wind Pearl) has a similar, but milder effect in comparison to *Da Ding Feng Zhu* (Major Arrest Wind Pearl).

Source text instructions are to prepare the ingredients as a decoction. *San Jia Fu Mai Tang* (Three-Shell Decoction to Restore the Pulse) was originally designed to nourish yin, restore the pulse, sedate Liver yang, and extinguish Liver wind. It has been used in the past to treat the late stages of febrile disorders, in which the heat is lodged deep in the lower *jiao*, and there is damage to yin. Clinically, patients may show symptoms such as spasms, altered consciousness, tremor, palpitations, a fine, skipping pulse, and, in severe cases, pain in the heart region.

San Jia An Shen Wan (Three-Shell Pill to Tranquilize the Spirit) nourishes yin, sedates Liver yang, guides Liver wind downward, and calms the *shen* (spirit). It treats individuals with underlying yin deficiency, accompanied by Liver yang and Liver wind rising to disturb the

Dà Dīng Fēng Zhū (Major Arrest Wind Pearl)

shen. Clinical applications of this formula include forgetfulness, hyperactivity, and inability to concentrate.

AUTHORS' COMMENTS

E Jiao Ji Zi Huang Tang (Ass-Hide Gelatin and Egg Yolk Decoction) and *Da Ding Feng Zhu* both act to nourish yin and extinguish wind by utilizing herbs such as *E Jiao* (Colla Corii Asini), *Ji Zi Huang* (Galli Vitellus), *Bai Shao* (Radix Paeoniae Alba), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Mu Li* (Concha Ostreae). Their differences are as follows:

- *E Jiao Ji Zi Huang Tang* also has functions to sedate Liver yang and calm *shen* (spirit), as it contains herbs such as *Shi Jue Ming* (Concha Haliotidis), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Fu Shen* (Poria Paradicis).

- *Da Ding Feng Zhu* has effects to astringe yin and sedate yang, with herbs such as *Bie Jia* (Carapax Trionycis), *Gui Ban* (Plastrum Testudinis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

Chapter 14 — Summary

— Wind-Expelling Formulas

SECTION 1: EXTERNAL-WIND RELEASING FORMULAS

Name	Similarities	Differences
<i>Xiao Feng San</i> (Eliminate Wind Powder)	Expel wind,	Clears wind-dampness, dispels wind-heat
<i>Dang Gui Yin Zi</i> (Tangkuei Decoction)	nourish the blood	Tonifies blood, moistens dryness
<i>Chuan Xiong Cha Tiao San</i> (Ligusticum Chuanxiong Powder to be Taken with Green Tea)	Expels wind, stops pain	Dispels wind from the upper body
<i>Qian Zheng San</i> (Lead to Symmetry Powder)	Dispel wind, dissolve phlegm	Dispels wind from the face, treats spasms, cramps, and deviation of the eyes and mouth
<i>Yu Zhen San</i> (True Jade Powder)		Dispels wind from the body, treats tetanus with spasms and cramps
<i>Xiao Xu Ming Tang</i> (Minor Prolong-Life Decoction)	Dispel wind, treat post-stroke sequelae	Tonifies <i>zheng</i> (upright) <i>qi</i>
<i>Xu Ming Tang</i> (Prolong Life Decoction)		Dispels wind, clears heat
<i>Da Qin Jiao Tang</i> (Major Gentiana Macrophylla Decoction)	Dispel wind, treat <i>zhong feng</i> (wind stroke)	Tonifies <i>qi</i> and blood
<i>Wu Yao Shun Qi San</i> (Lindera Powder to Smooth the Flow of Qi)		Activates <i>qi</i> circulation, relieves pain

Xiao Feng San (Eliminate Wind Powder) and *Dang Gui Yin Zi* (Tangkuei Decoction) treat skin disorders characterized by wind at the exterior and blood deficiency in the interior.

- *Xiao Feng San* treats rashes, eczema, and other skin disorders arising from wind, dampness, and heat invasion. It clears wind-dampness and wind-heat, and nourishes and cools the blood.
- *Dang Gui Yin Zi* treats eczema, rash, urticaria, and other skin conditions due to wind at the exterior and blood deficiency and dryness in the interior. It tonifies the blood, moistens dryness, and releases wind.

Chuan Xiong Cha Tiao San (Ligusticum Chuanxiong Powder to be Taken with Green Tea) dispels wind and stops pain in the head. It is used for headache, dizziness, chills, fever, stuffy nose, a thin, white tongue coating, and a superficial pulse.

Qian Zheng San (Lead to Symmetry Powder) and *Yu Zhen San* (True Jade Powder) both dispel wind and dissolve phlegm.

- *Qian Zheng San* treats wind attacking the face, characterized by facial spasms and deviation of the eyes and mouth. The cause is blockage of the channels and collaterals by wind and phlegm.
- *Yu Zhen San* treats wind attacking the body. It is indicated for tetanus with lockjaw, tightly-closed mouth and lips, a stiff body, muscle spasms, and kyphosis. It dispels wind, dissolves phlegm, relieves spasms, and stops pain.

Xiao Xu Ming Tang (Minor Prolong-Life Decoction) and *Xu Ming Tang* (Prolong Life Decoction) dispel wind and are commonly used to treat post-stroke sequelae.

- *Xiao Xu Ming Tang* dispels wind, warms yang, opens the channels, and supports *zheng* (upright) *qi*. It treats post-stroke complications with *zheng* (upright) *qi* deficiency, characterized by signs and symptoms such as hemiplegia, paralysis, muscle contraction and convulsions, deviation of the eyes and mouth, slurred speech, and low back pain.

Chapter 14 — Summary

- *Xu Ming Tang* dispels wind, clears heat, regulates qi circulation, and nourishes the blood. It treats stroke due to wind attacking the *ying* (nutritive) and *wei* (defensive) levels, with post-stroke sequelae such as hemiplegia, muscle paralysis, inability to rotate the trunk, slurred speech, confusion, numbness and pain of the body, and muscle stiffness and cramps.

Da Qin Jiao Tang (Major Gentiana Macrophylla Decoction) and *Wu Yao Shun Qi San* (Lindera Powder to Smooth the Flow of Qi) dispel wind to treat *zhong feng* (wind stroke).

- *Da Qin Jiao Tang* dispels wind from the exterior and tonifies qi and blood in the interior. It treats early stages of *zhong feng* (wind stroke) with wind attacking the channels and collaterals in individuals with underlying qi and blood deficiencies. Clinical manifestations include deviation of the eyes and mouth, a stiff tongue and difficulty in speech, numbness and difficulty in moving the extremities, a white tongue coating, and a superficial pulse.
- *Wu Yao Shun Qi San* activates qi circulation and opens the channels and collaterals. It treats *zhong feng* (wind stroke) with complications such as arthralgia, numbness and pain throughout the body, dysphasia, stiffness of the muscles and tendons, and paralysis.

SECTION 2: INTERNAL-WIND EXTINGUISHING FORMULAS

Name	Similarities	Differences
<i>Ling Jiao Gou Teng Tang</i> (Antelope Horn and Uncaria Decoction)	Calm the Liver, extinguish Liver wind	Generates fluids, relaxes the tendons
<i>Gou Teng San</i> (Uncaria Powder)		Clears Liver heat, sedates Liver yang, extinguishes Liver wind
<i>Zhen Gan Xi Feng Tang</i> (Sedate the Liver and Extinguish Wind Decoction)		Nourishes Liver and Kidney yin
<i>Jian Ling Tang</i> (Construct Roof Tiles Decoction)		Nourishes yin, calms the <i>shen</i> (spirit)
<i>Tian Ma Gou Teng Yin</i> (Gastrodia and Uncaria Decoction)	Extinguish Liver wind, nourish yin	Tonifies the Liver and Kidney
<i>E Jiao Ji Zi Huang Tang</i> (Ass-Hide Gelatin and Egg Yolk Decoction)		Tonifies yin and blood
<i>Da Ding Feng Zhu</i> (Major Arrest Wind Pearl)		Strongly nourishes yin and tonifies blood

Ling Jiao Gou Teng Tang (Antelope Horn and Uncaria Decoction) is the strongest formula to clear heat and calm Liver wind. It is used for excess heat in the Liver channel accompanied by Liver wind rising. Clinical manifestations include persistent high fever, irritability, muscle spasms of the extremities, convulsions, coma, a dark red tongue with a dry tongue coating, and a wiry, rapid pulse.

Gou Teng San (Uncaria Powder) primarily treats Liver excess conditions characterized by Liver heat, Liver yang, and Liver wind rising. Clinical manifestations include severe vertigo, dizziness, headache, tinnitus, palpitations, a feeling of qi rushing upward, and marked changes in emotions and behavior.

Zhen Gan Xi Feng Tang (Sedate the Liver and Extinguish Wind Decoction) can be used for Liver yang and wind rising due to Liver and Kidney yin deficiencies. Clinical manifestations include dizziness, vertigo, headache with a warm sensation in the head, swelling of the eyes, itching of the skin, tinnitus, irritability, red face, numbness of the extremities, deviation of the mouth, belching, a long, forceful pulse, and in severe cases, unconsciousness.

Chapter 14 — Summary

Jian Ling Tang (Construct Roof Tiles Decoction) treats mild to moderate cases of Liver yang rising with *shen* (spirit) disturbance. Clinical manifestations include dizziness, vertigo, tinnitus, swelling of the ears, palpitations, forgetfulness, irritability, fidgeting, insomnia, excessive dreams, and a wiry, hard, and long pulse.

Tian Ma Gou Teng Yin (Gastrodia and Uncaria Decoction) clears heat, activates the blood, and calms the *shen* (spirit). It is used for Liver yang and wind rising with symptoms such as headache, dizziness, and insomnia.

E Jiao Ji Zi Huang Tang (Ass-Hide Gelatin and Egg Yolk Decoction) calms Liver wind and nourishes yin and blood. Clinical manifestations include twitching of the hands and feet, dizziness, vertigo, a deep red tongue with a scanty tongue coating, and a fine, rapid pulse.

Da Ding Feng Zhu (Major Arrest Wind Pearl) calms Liver wind and nourishes yin and blood. Compared to **E Jiao Ji Zi Huang Tang** (Ass-Hide Gelatin and Egg Yolk Decoction), this formula is stronger at tonifying yin and blood. It is used for severe yin deficiency with Liver wind, and symptoms such as clonic convulsions, lack of energy, a deep red tongue with scanty tongue coating, and a deficient pulse.

Chapter 15

— Dryness-Relieving Formulas

陶弘景 Tǎo Hóng-Jǐng

陶弘景 Tǎo Hóng-Jǐng, 456 – 536.

陶弘景 Tǎo Hóng-Jǐng

The greatest contribution of Tao Hong-Jing to medicine was his revision of the 神农本草经 *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica). A few hundred years after its publication in the second century CE, many parts of this text were missing. While many physicians attempted to restore the text to its original state, some filled the gaps with erroneous information, others inadvertently deleted parts of the original text, and none differentiated their personal input from the materials of the source text. As a result, this classic text became marred by errors, duplications and missing parts.

Tao embarked on a mission to restore and expand upon this classic text. In addition to the 365 medicinal substances listed in the original text, he added another 365 of the most useful medicinal substances of his time. He also expanded the contents to include subjects such as the processing of herbs, treatment of diseases, herbal antidotes for poisoning, cautions and contraindications, and herb-herb interactions. Furthermore, to distinguish the original work from his personal input, he marked the original work in red, and his own in black. Published in 480-498, 本草经集注 *Ben Cao Jing Ji Zhu* (Collection of Commentaries on the Classic of the Materia Medica) is a text of great historical importance. Not only did it restore and preserve one of the most important works in traditional Chinese medicine, it expanded the clinical usefulness of this work and had an incredible influence on later generations of practitioners.

Chapter 15 — Overview

— Dryness-Relieving Formulas

Definition: Dryness-relieving formulas disperse and moisten external dryness, and nourish and moisten internal dryness.

External dryness most often appears during the autumn, as summer dampness vanishes and autumn dryness appears. External dryness may affect the body, and cause the following signs and symptoms: fever, aversion to cold, dry mouth, sore throat, dry coughing, or coughing with scanty sputum. The treatment approach for external dryness is to ventilate and disperse dryness. External dryness is sometimes combined with coolness (which usually appears in late fall and early winter when the environment starts to turn cold) or warmth (which usually is present in late summer and early fall when the environment is still warm). In cases of dryness complicated by coolness or warmth, add herbs accordingly to treat the resultant conditions.

Internal dryness may occur as a result of chronic illness, excessive sexual activity, prolonged vomiting or diarrhea, or inappropriate use of acrid and warm herbs. All of these consume and damage *jing* (essence) and body fluids in the *zang fu* organs. Depending on which *zang fu* organs are most affected, internal dryness is classified as syndromes of: upper, middle, or lower *jiao* dryness. Upper *jiao* dryness affects the Lung and leads to dry coughing. Middle *jiao* dryness affects the Stomach and leads to vomiting and lack of appetite. Lower *jiao* dryness may affect the Kidney and leads to *xiao ke* (wasting and thirsting) syndrome. Lower *jiao* dryness may also affect the Large Intestine, causing dry stools and constipation. The treatment plan for internal dryness is to moisten the affected *zang fu* organ(s) in the affected *jiao*(s).

SUBCATEGORIES OF ACTION

Dryness may affect the exterior and interior of the body. Similarly, dryness-relieving formulas are divided into dispersing and moistening formulas to treat dryness on the exterior, and nourishing and moistening formulas to treat dryness affecting the interior.

1. Dispersing and Moistening Formulas

These formulas are designed to treat dryness on the exterior, which may be complicated by other *liu yin* (six exogenous factors) and become cool-dryness or warm-dryness.

- Exterior cool-dryness is the result of the combination of cold and dry pathogenic factors that usually occur in late fall and early winter as the environment becomes increasingly cold and dry. As cool-dryness dominates the environment, it may attack the Lung and lead to signs and symptoms such as aversion to cold, headache, coughing, nasal congestion, dry mouth, and dry throat. Thus, exterior cool-dryness should be treated with warm herbs that gently disperse and moisten dryness, such as *Zi Su Ye* (Folium Perillae), *Jie Geng* (Radix Platycodonis), *Qian Hu* (Radix Peucedani), and *Xing Ren* (Semen Armeniacae Amarum). An exemplar formula is *Xing Su San* (Apricot Kernel and Perilla Leaf Powder).
- Exterior warm-dryness is the result of the combination of heat and dry pathogenic factors that usually occur in late summer and early fall when the environment is still relatively warm and dry. When these pathogens attack the Lung, they cause signs and symptoms such as feverish sensations in the body, headache, dry coughing, dyspnea, hurried breathing, irritability, and thirst. This condition of warm-dryness should be treated with cold herbs that gently disperse and moisten dryness, such as *Sang Ye* (Folium Mori), *Xing Ren* (Semen Armeniacae Amarum), *Nan Sha Shen*

From traditional Chinese medicine perspectives, these formulas treat dryness affecting the upper *jiao* (Lung), middle *jiao* (Stomach), and lower *jiao* (Large Intestine).

Chapter 15 — Overview

(*Radix Adenophorae*), *Bei Sha Shen* (*Radix Glehniae*), and *Mai Dong* (*Radix Ophiopogonis*). Exemplar formulas include *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction) and *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lung Decoction).

Treatment for external dryness is to ventilate and disperse dryness. Treatment for internal dryness is to moisten the affected *zang fu*.

2. Nourishing and Moistening Formulas

These formulas treat dryness affecting the interior characterized by lack of body fluids in the *zang fu* organs. Clinical manifestations and treatment vary depending on the affected area.

- Upper *jiao* dryness affects the Lung and may cause dry coughing, scanty or no sputum, dry mouth and throat, and wheezing. This condition usually is treated with herbs and formulas that nourish and moisten the Lung, such as *Nan Sha Shen* (*Radix Adenophorae*), *Bei Sha Shen* (*Radix Glehniae*), *Tian Dong* (*Radix Asparagi*), *Mai Dong* (*Radix Ophiopogonis*), *Yang Yin Qing Fei Tang* (Nourish the Yin and Clear the Lung Decoction), and *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal).
- Middle *jiao* dryness affects the Stomach and leads to vomiting, lack of appetite, thirst, dry mouth and throat, and persistent, indeterminate hunger. This condition usually is treated with herbs and formulas that nourish and moisten the Spleen and Stomach, such as *Shi Hu* (*Caulis Dendrobii*), *Yu Zhu* (*Rhizoma Polygonati Odorati*), *Mai Dong* (*Radix Ophiopogonis*), and *Mai Men Dong Tang* (*Ophiopogonis* Decoction).
- Lower *jiao* dryness affects the Kidney and leads to *xiao ke* (wasting and thirsting) syndrome. This condition is usually treated with herbs and formulas that nourish and moisten the Kidney, such as *Di Huang* (*Radix Rehmanniae*), *Shu Di Huang* (*Radix Rehmanniae Praeparata*), *Nu Zhen Zi* (*Fructus Ligustri Lucidi*), and *Yu Ye Tang* (Jade Fluid Decoction).
- Lower *jiao* dryness may also affect the Large Intestine and cause dry stools and constipation. This condition is usually treated with herbs and formulas that nourish and moisten the Large Intestine, such as *Xuan Shen* (*Radix Scrophulariae*) and *Zeng Ye Tang* (Increase the Fluids Decoction).

CAUTIONS / CONTRAINDICATIONS

- When treating dryness disorders, it is important to note that dryness can easily transform into heat and begin to damage yin and consume qi. Therefore, in addition to using dryness-relieving herbs, it is often necessary to add herbs to clear heat, purge fire, tonify qi, and promote generation of body fluids.
- Patients with dryness disorders should not be treated with acrid and aromatic herbs that consume qi, or bitter and drying herbs that injure yin, as the use of these herbs will only further deplete qi and yin.
- Dryness-relieving formulas have nourishing and moistening effects, and as such, are often heavy and greasy in nature. Prolonged or excessive use of these formulas would create internal dampness and stagnation of qi. Therefore, these formulas should be used with caution in the following conditions: Spleen qi deficiency with loose stools, qi stagnation, phlegm stagnation, and damp accumulation.

When treating dryness disorders, it is important to note that dryness can easily transform into heat and begin to damage yin and consume qi.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

In traditional Chinese medicine, dryness-relieving formulas are generally used to treat imbalances of the Lung, Stomach, Kidney, and Large Intestine. From an allopathic medicine perspective, these formulas are most effective in treating chronic respiratory disorders, gastrointestinal (stomach and intestinal) disorders, and metabolic disorders.

- **Respiratory disorders:** Dryness-relieving formulas are very effective for treating chronic cases of respiratory disorders. Clinical indications include cough,^{1,2,3,4} postinfectious cough,^{5,6} dyspnea,⁷ pneumonia,⁸ chronic bronchitis,⁹ bronchiectasis,¹⁰ pneumothorax,¹¹ pulmonary tuberculosis,¹² and lung cancer.¹³ The mechanisms of action for dryness-relieving formulas have been attributed in part to antitussive,¹⁴ mucoactive,¹⁵ and antibiotic effects of the herbs.¹⁶ Exemplar formulas

Chapter 15 — Overview

include *Xing Su San* (Apricot Kernel and Perilla Leaf Powder), *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lung Decoction), *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal), and *Mai Men Dong Tang* (Ophiopogonis Decoction).

From the allopathic perspective, dryness-relieving formulas are most effective in treating chronic respiratory, gastrointestinal and metabolic disorders.

- **Gastrointestinal disorders:** Dryness-relieving formulas are effective in treating chronic gastrointestinal disorders. Indications include, but are not limited to, atrophic gastritis,^{17,18} chronic gastritis,¹⁹ chronic atrophic gastritis,²⁰ chronic peptic ulcer disease,²¹ and constipation.²² Representative formulas include *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction) and *Mai Men Dong Tang* (Ophiopogonis Decoction).
- **Diabetes mellitus:** Administration of certain dryness-relieving herbs and formulas has been shown to have a hypoglycemic effect to lower plasma glucose levels.^{23,24,25,26} Formulas that have been shown to be effective in treating diabetes mellitus include *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction),²⁷ *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal),²⁸ *Yu Ye Tang* (Jade Fluid Decoction),²⁹ and *Zeng Ye Tang* (Increase the Fluids Decoction).³⁰
- **Bleeding:** Dryness-relieving formulas do not have direct or potent action to stop bleeding. Rather, they are generally used to treat chronic cases of lung and stomach disorders accompanied by nosebleeds, and coughing or vomiting of blood. *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lung Decoction) and *Yang Yin Qing Fei Tang* (Nourish the Yin and Clear the Lung Decoction) are commonly used to treat epistaxis, hemoptysis, and hematemesis.^{31, 32, 33}
- **Infection and inflammation:** Some dryness-relieving formulas have antibiotic and anti-inflammatory effects,^{34,35} and have been used for conditions such as sore throat,³⁶ laryngitis,^{37,38} tonsillitis,³⁹ pharyngitis,⁴⁰ and cheilitis.⁴¹ Exemplar formulas include *Yang Yin Qing Fei Tang* (Nourish the Yin and Clear the Lung Decoction) and *Zeng Ye Tang* (Increase the Fluids Decoction).

DOSAGE / PREPARATION / ADMINISTRATION

The source text lists the ingredients of this formula, but does not specify the doses and preparation. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dispels cool-dryness
2. Ventilates the Lung and dissolves phlegm

CLINICAL MANIFESTATIONS

Exterior syndrome of cool-dryness: mild headache, aversion to cold, absence of perspiration, coughing with thin sputum, stuffy nose, dry throat, a white tongue coating, and a wiry pulse.

CLINICAL APPLICATIONS

Influenza, bronchitis, nasal congestion, tracheitis, bronchiectasis, pulmonary emphysema, cough, and dyspnea.

EXPLANATION

Xing Su San (Apricot Kernel and Perilla Leaf Powder) dispels exterior cool-dryness and ventilates Lung qi. If the cool-dryness factors invade the exterior parts of the body, then symptoms such as mild headache and aversion to cold will occur, without perspiration. Cool-dryness factors also may invade the Lung, compromising its function of distributing water. As a result, water accumulates and turns into phlegm and causes symptoms such as coughing, stuffy nose, and dry throat.

In this formula, *Zi Su Ye* (Folium Perillae) and *Qian Hu* (Radix Peucedani) gently induce perspiration to release the exterior cool-dryness factors. *Ku Xing Ren* (Semen Armeniacae Amarum) and *Jie Geng* (Radix Platycodonis) ventilate the Lung and regulate Lung qi to relieve coughing. *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria) eliminate dampness and dissolve phlegm. *Zhi Qiao* (Fructus Aurantii) and *Chen Pi* (Pericarpium Citri Reticulatae) regulate

Xing Sū Sǎn (Apricot Kernel and Perilla Leaf Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior cool-dryness	<ul style="list-style-type: none"> • Aversion to cold and absence of perspiration: exterior cool-dryness • Coughing with thin sputum and stuffy nose: obstructed Lung qi circulation • Mild headache: obstructed qi circulation • White tongue coating: exterior cool-dryness • Wiry pulse: interior phlegm 	<ul style="list-style-type: none"> • Disperses cool-dryness • Ventilates the Lung and regulates Lung qi circulation • Dissolves phlegm 	<ul style="list-style-type: none"> • <i>Zi Su Ye</i> (Folium Perillae) and <i>Qian Hu</i> (Radix Peucedani) release the exterior cool-dryness. • <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) and <i>Jie Geng</i> (Radix Platycodonis) ventilate the Lung and regulate the Lung qi. • <i>Zhi Qiao</i> (Fructus Aurantii) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulate the Lung qi. • <i>Ban Xia</i> (Rhizoma Pinelliae) and <i>Fu Ling</i> (Poria) eliminate dampness and dissolve phlegm. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs.

Lung qi and expand the chest. *Sheng Jiang* (Rhizoma Zingiberis Recens), *Da Zao* (Fructus Jujubae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonize the *ying* (nutritive) and *wei* (defensive) levels.

MODIFICATIONS

- With headache, add *Gao Ben* (Rhizoma et Radix Ligustici) and *Fang Feng* (Radix Saposhnikoviae).
- With frontal headache, add *Bai Zhi* (Radix Angelicae Dahuricae).
- With more heat or fever, add *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae).
- With thirst and dry mouth, add *Huang Qin* (Radix Scutellariae) and *Shi Gao* (Gypsum Fibrosum).
- With wind-cold at the exterior, add *Fang Feng* (Radix Saposhnikoviae) and *Jing Jie* (Herba Schizonepetae).
- For severe cough, add *Zi Wan* (Radix et Rhizoma Asteris) and *Kuan Dong Hua* (Flos Farfarae).
- For constant cough after perspiration, remove *Zi Su Ye* (Folium Perillae) and add *Zi Su Geng* (Caulis Perillae).
- For productive cough with phlegm, add *Er Chen Tang* (Two-Cured Decoction).
- For cough and dyspnea due to wind-cold invasion, add *Ding Chuan Tang* (Arrest Wheezing Decoction).
- With nausea and vomiting, add *Huo Xiang* (Herba Agastaches).
- With diarrhea and abdominal fullness, add *Cang Zhu* (Rhizoma Atractylodis) and *Hou Po* (Cortex Magnoliae Officinalis).

CAUTIONS/CONTRAINDICATIONS

- *Xing Su San* is an acrid and warm formula that treats exterior cool-dryness or wind-cold. It should not be used if the condition is characterized by warm-dryness or wind-heat.
- *Xing Su San* is gentle in nature and potency. It should only be used for mild-to-moderate cases of exterior cool-dryness or wind-cold conditions. Those with severe exterior conditions may require stronger acrid and warm exterior-releasing herbs, such as *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi) and *Qiang Huo* (Rhizoma et Radix Notopterygii).

CLINICAL STUDIES AND RESEARCH

1. **Cough:** Administration of modified *Xing Su San* was shown in numerous studies to effectively treat various types of cough. One study of 560 patients with cough due to an exterior condition reported complete recovery in 478 patients, significant improvement in 47 patients, moderate improvement in 16 patients, and no effect in 19 patients. The herbal formula contained *Ku Xing Ren* (Semen Armeniacae Amarum) 9g, *Zi Su Ye* (Folium Perillae) 9g, *Qian Hu* (Radix Peucedani) 12g, *Ban Xia* (Rhizoma Pinelliae) 9g, *Chen Pi* (Pericarpium Citri Reticulatae) 9g, *Sha Shen* (Radix Glehniae seu Adenophorae) 15g, *Gua Lou* (Fructus Trichosanthis) 12g, *Sang Bai Pi* (Cortex Mori) 12g, *Bei Mu* (Bulbus Fritillariae) 9g, *Jie Geng* (Radix Platycodonis) 9g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g. The herbs were cooked in water, and decoction taken in two equally-divided doses daily.¹

Xìng Sū Sǎn (Apricot Kernel and Perilla Leaf Powder)

2. **Coughing and dyspnea:** Use of modified *Xing Su San* was associated with a 95% rate of effectiveness in treating 57 children with coughing and dyspnea. The herbal formula contained *Ku Xing Ren* (Semen Armeniacae Amarum) 9g, *Qian Hu* (Radix Peucedani) 9g, *Fu Ling* (Poria) 9g, *Huang Qin* (Radix Scutellariae) 9g, *Jie Geng* (Radix Platycodonis) 6g, *Ban Xia* (Rhizoma Pinelliae) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Chen Pi* (Pericarpium Citri Reticulatae) 6g, *Sang Bai Pi* (Cortex Mori) 6g, and *Bai Bu* (Radix Stemonae) 10g. The herbs were cooked in water, and decoction taken in three equally-divided doses daily. Of 57 patients, the study reported complete recovery in 38 patients, improvement in 16 patients, and no benefit in 3 patients. The duration of treatment ranged from 3 to 9 packs of herbs.²

AUTHORS' COMMENTS

Xing Su San is the representative formula for treating cough due to cool-dryness affecting the Lung. This type of cough occurs commonly in areas where the weather is cold and dry.

Xing Su San, *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction), and *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lungs Decoction) all treat dryness attacking the Lung.

- *Xing Su San* is specifically for cool-dryness attacking the Lung, when the chief complaints are cough with thin white sputum, headache, and nasal obstruction.
- *Sang Xing Tang* has moderate action to treat warm-dryness attacking the Lung. It treats mild to moderate cases of warm-dryness with symptoms of slight heat sensations in the body, and cough with scant or no sputum.
- *Qing Zao Jiu Fei Tang* has potent function to treat warm-dryness attacking the Lung. It is used for severe cases of warm-dryness attacking the Lung, with chief manifestations of fever, thirst, cough, dyspnea, and chest and hypochondriac pain.³

Sāng Xìng Tāng (Mulberry Leaf and Apricot Kernel Decoction)

桑杏湯

桑杏汤

Pinyin Name: *Sang Xing Tang*

Literal Name: Mulberry Leaf and Apricot Kernel Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Sang Ye</i> (Folium Mori)	3g
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	3g
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	4.5g
<i>Sha Shen</i> (Radix Glehniae seu Adenophorae)	6g
<i>Zhe Bei Mu</i> (Bulbus Fritillariae Thunbergii)	3g
<i>Li Pi</i> (Pericarpium Pyri)	3g
<i>Zhi Zi Pi</i> (Pericarpium Gardeniae)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with two cups of water until the decoction is reduced to one cup. Take the strained decoction while warm. Repeat this process if the condition is severe. The original source advises to cook *Sang Xing Tang* for only a short period

of time. The rationale is that since this is a mild case of warm-dryness, a light decoction will be sufficient for treatment.

CHINESE THERAPEUTIC ACTIONS

Dispels and ventilates warm-dryness

Sāng Xìng Tāng (Mulberry Leaf and Apricot Kernel Decoction)

CLINICAL MANIFESTATIONS

Exterior warm-dryness affecting the Lung: feverish sensations, dry coughing without sputum, or with scanty, sticky sputum, thirst, dry throat, a red tongue with a thin, white and dry tongue coating, and a rapid, big pulse on the right hand.

CLINICAL APPLICATIONS

Whooping cough and coughing.

EXPLANATION

Sang Xing Tang (Mulberry Leaf and Apricot Kernel Decoction) is designed to treat mild cases of exterior warm-dryness invading the Lung. Warm-dryness is mild in nature and invades only the exterior of the body. Therefore, the patient may feel slightly warm but does not have high fever. Also, the warm-dryness may invade the Lung to disrupt qi circulation, dry up fluids, and cause symptoms such as dry coughing with or without sputum, thirst, dry throat, red tongue body, and a big, rapid pulse.

This formula uses *Sang Ye* (Folium Mori) and *Dan Dou Chi* (Semen Sojae Praeparatum) to ventilate the Lung and dispel warm-dryness. *Ku Xing Ren* (Semen Armeniacae Amarum) ventilates the Lung and regulates Lung qi. *Sha Shen* (Radix Glehniae seu Adenophorae) nourishes yin and moistens the Lung. *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) clears the Lung and dissolves phlegm. *Li Pi* (Pericarpium Pyri) moistens the Lung, generates fluids, and stops coughing. *Zhi Zi Pi* (Pericarpium Gardeniae) clears heat in the Lung and the diaphragm.

MODIFICATIONS

- With cough accompanied by thick, yellow sputum,

add *Tian Hua Fen* (Radix Trichosanthis) and *Gua Lou* (Fructus Trichosanthis).

- With heat and dryness injuring the Lung collaterals, leading to coughing of blood, add *Lu Gen* (Rhizoma Phragmitis), *Bai Mao Gen* (Rhizoma Imperatae), *Qing Dai* (Indigo Naturalis), and *Gua Lou* (Fructus Trichosanthis).
- If there is a dry, sore throat, add *Niu Bang Zi* (Fructus Arctii), *Bo He* (Herba Menthae), *Xuan Shen* (Radix Scrophulariae), and *Mai Dong* (Radix Ophiopogonis).
- With epistaxis, add *Mo Han Lian* (Herba Ecliptae) and *Bai Mao Gen* (Rhizoma Imperatae).
- With severe epistaxis due to heat, add *Qing Dai* (Indigo Naturalis), *Qing Hao* (Herba Artemisiae Annuae), *Mu Dan Pi* (Cortex Moutan), *Di Huang* (Radix Rehmanniae), and *Ce Bai Ye* (Cacumen Platycladi).
- With hemoptysis due to bronchiectasis, remove *Dan Dou Chi* (Semen Sojae Praeparatum), and add *Qing Dai* (Indigo Naturalis), *Gua Lou Pi* (Pericarpium Trichosanthis), and *He Zi* (Fructus Chebulae).

CAUTIONS / CONTRAINDICATIONS

- *Sang Xing Tang* should only be cooked for a short period of time to preserve its efficacy, as many herbs in this formula are aromatic.
- This formula is moderate in potency, and should only be used to treat lung disorders of mild to moderate severity.

<i>Bo He</i> (Herba Menthae)	4.5g
<i>Lian Qiao</i> (Fructus Forsythiae)	4.5g
<i>Zhi Zi Pi</i> (Pericarpium Gardeniae)	4.5g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g
<i>Jie Geng</i> (Radix Platycodonis)	6g
<i>Lu Dou Pi</i> (Pericarpium Phaseoli Radiati)	6g

Cook the ingredients with 2 cups of water and cook until 1 cup of liquid remains. Take the strained decoction while warm. This formula should be given twice daily, and, in severe cases, three times daily.

Qiao He Tang (Forsythia and Mint Decoction) has actions to clear heat and dryness from the *qi* (energy) level in the upper *jiao*. Clinically, it treats tinnitus, red eyes, swollen gums, and sore throat due to heat and dryness attacking the upper parts of the body.

AUTHORS' COMMENTS

Xing Su San (Apricot Kernel and Perilla Leaf Powder) and *Sang Xing Tang* both treat cough caused by Lung dryness.

- *Xing Su San* treats cold-dryness attacking the Lung. Chief

complaints include aversion to cold, absence of perspiration, and cough with thin, white sputum.

- *Sang Xing Tang* treats warm-dryness attacking the Lung. Chief complaints include warm sensations, dry cough with absence of sputum, thirst, and dry mouth and throat.¹

Sang Xing Tang and *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction) both contain *Ku Xing Ren* (Semen Armeniacae Amarum) and *Sang Ye* (Folium Mori) to clear the Lung, relieve cough, and expel exterior factor.

- *Sang Xing Tang* treats dryness with heat attacking the Lung. This formula contains moistening herbs such as *Sha Shen* (Radix Glehniae seu Adenophorae) and *Bei Mu* (Bulbus Fritillariae), to treat dryness symptoms.
- *Sang Ju Yin* treats wind-heat attacking the Lung. It contains heat-clearing herbs such as *Bo He* (Herba Menthae), *Lu Gen* (Rhizoma Phragmitis), and *Lian Qiao* (Fructus Forsythiae).²

Qīng Zào Jiù Fèi Tāng

(Eliminate Dryness and Rescue the Lung Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 1 bowl of water until the liquid is reduced to 60% of the original volume. Take the warm, strained decoction two to three times daily.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears dryness
- 2. Moistens the Lung

CLINICAL MANIFESTATIONS

Warm-dryness injuring the Lung: headache, fever, thirst, dry coughing with no sputum, shortness of breath, dyspnea, chest fullness, hypochondriac pain, irritability, dryness of the nose, mouth and throat; a dry tongue with no coating, and a big, rapid but deficient pulse.

CLINICAL APPLICATIONS

Cough, sore throat, laryngitis, pneumonia, bronchitis, bronchiectasis, pulmonary tuberculosis, influenza, asthma, upper respiratory tract infection, epistaxis, hemoptysis, itching, and alopecia areata.

EXPLANATION

Qing Zao Jiu Fei Tang (Eliminate Dryness and Rescue the Lung Decoction) is designed to treat severe cases of warm-dryness injuring the Lung. Warm-dryness may invade the exterior, causing headache and fever. If the warm-dryness invades the Lung and reverses the normal flow of Lung qi, then coughing, shortness of breath, dyspnea, chest and hypochondriac fullness and pain may occur. Because warm-dryness may easily damage Lung

yin and body fluids, symptoms such as coughing with no sputum, dry nose and mouth, and thirst may be expected. The dry tongue with no coating and a big, rapid but deficient pulse indicate the presence of dryness and heat, and damage of qi and yin.

This formula contains *Sang Ye* (Folium Mori) to ventilate and moisten dryness and release pathogenic factors from the Lung. *Shi Gao* (Gypsum Fibrosum) and *Mai Dong* (Radix Ophiopogonis) clear the Lung heat and moisten the dryness. These three herbs form a good balance as they function to release the exterior, clear the warmth, and moisten the dryness. Furthermore, though *Shi Gao* (Gypsum Fibrosum) is heavy, sinking and cold in nature, prescribing it at a lower dose will not interfere with the releasing effect of *Sang Ye* (Folium Mori). *Ku Xing Ren* (Semen Armeniacae Amarum) and *Pi Pa Ye* (Folium Eriobotryae) benefit the Lung and regulate the flow of Lung qi. *E Jiao* (Colla Corii Asini) and *Hei Zhi Ma* (Semen Sesami Nigrum) moisten the Lung and nourish Lung yin. *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify qi and the middle *jiao*, which, in turn, enhance the production of Lung qi.

MODIFICATIONS

- With profuse, difficult to expectorate sputum, add *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Gua Lou Pi* (Pericarpium Trichosanthis).
- With thirst and high fever due to excess heat, add *Ling Yang Jiao* (Cornu Saigae Tataricae) or *Shui Niu Jiao* (Cornu Bubali).

Qing Zao Jiu Fei Tang (Eliminate Dryness and Rescue the Lung Decoction)

Qīng Zào Jiù Fèi Tāng

(Eliminate Dryness and Rescue the Lung Decoction)

- With coughing of blood, add *Ce Bai Ye* (Cacumen Platycladi), *Xian He Cao* (Herba Agrimoniae) and *Bai Ji* (Rhizoma Bletillae).
- With hoarseness or loss of voice, add *He Zi* (Fructus Chebulae) and *Mu Hu Die* (Semen Oroxyli).
- For constipation, add *Huo Ma Ren* (Fructus Cannabis), *Rou Cong Rong* (Herba Cistanches), and *Tao Ren* (Semen Persicae).

CAUTIONS / CONTRAINDICATIONS

- *Qing Zao Jiu Fei Tang* contains many greasy tonics, and should be used with caution in cases of Spleen and Stomach deficiencies.
- Patients with warm-dryness injuring the Lung often have underlying deficiencies. Therefore, foods and herbs that are acrid, aromatic, bitter and drying should be avoided, as they will further damage qi and yin.

CLINICAL STUDIES AND RESEARCH

1. **Cough:** Administration of *Qing Zao Jiu Fei Tang* in 100 patients with cough due to Lung heat was associated with complete recovery in 50 patients, significant improvement in 40 patients, and moderate improvement in 10 patients. The patients were instructed to discontinue antibiotic drugs during herbal treatment.¹ In another study, 67 patients with a dry, non-productive cough refractory to antibiotic drug therapy were treated with good results using modified *Qing Zao Jiu Fei Tang*. The study reported that most patients began to feel improvement after 4 days of herbal therapy.²
2. **Sore throat:** One study reported good effect for treatment of sore throat using *Qing Zao Jiu Fei Tang* plus *Chan Tui* (Periostracum Cicadae), *Zi Wan* (Radix et Rhizoma Asteris), and *Bai Bu* (Radix Stemonae). Of 73 patients, the study reported complete recovery in 59 patients, improvement in 12 patients, and no improvement in 2 patients. The overall rate of effectiveness was 97.25%.³
3. **Laryngitis:** Administration of modified *Qing Zao Jiu Fei Tang* was reported in one study to be effective in treating 84 of 85 patients with loss of voice due to laryngitis. Modifications to the base formula included addition of *Jing Jie* (Herba Schizonepetae) and *Fang Feng* (Radix Saposhnikoviae) for wind-cold; *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Jie Geng* (Radix Platycodonis) for phlegm and heat; *Shi Gao* (Gypsum Fibrosum) for excess heat; and *Da Huang* (Radix et Rhizoma Rhei) for constipation. For individuals with Lung and Kidney deficiencies, *He Zi* (Fructus Chebulae) and *Huang Qi* (Radix Astragali) were added, *Sha Shen* (Radix Glehniae seu Adenophorae) was used in place of *Ren Shen* (Radix

et Rhizoma Ginseng), and *Shi Hu* (Caulis Dendrobii) was used in place of *Shi Gao* (Gypsum Fibrosum).⁴

4. **Pneumonia:** Administration of modified *Qing Zao Jiu Fei Tang* was associated with 85% effectiveness in treating 26 patients with pneumonia with symptoms such as frequent coughing, and scant sticky sputum that is difficult to expectorate. Modifications to the base formula included addition of *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Su Zi* (Fructus Perillae) for severe cough and dyspnea; *Di Huang* (Radix Rehmanniae) and charred *Zhi Zi* (Fructus Gardeniae) for constipation; and *Bai Shao* (Radix Paeoniae Alba) and *Yan Hu Suo* (Rhizoma Corydalis) for chest pain caused by cough. Of 26 patients, the study reported significant effects in 5 patients, moderate improvement in 17 patients, and no help in 4 patients.⁵
5. **Epistaxis:** One study reported successful termination of nosebleeds within 3 days in all of 24 patients using *Qing Zao Jiu Fei Tang* plus *Bai Mao Gen* (Rhizoma Imperatae), *Qian Cao* (Radix et Rhizoma Rubiae), and charred *Ou Jie* (Nodus Nelumbinis Rhizomatis).⁶
6. **Hemoptysis:** According to one study, use of modified *Qing Zao Jiu Fei Tang* was associated with good results to treat 38 patients with coughing of blood.⁷
7. **Itching:** Administration of modified *Qing Zao Jiu Fei Tang* was found to be effective in treating 18 geriatric patients with simple itching skin without other complications. Of 18 patients, the study reported complete recovery in 9 patients, improvement in 7 patients, and no benefit in 2 patients.⁸
8. **Alopecia areata:** Use of modified *Qing Zao Jiu Fei Tang* was associated with marked effect to treat 38 patients with alopecia areata. In addition to the base formula, modifications included the addition of *Ju Hua* (Flos Chrysanthemi) for headache; the removal of *Hei Zhi Ma* (Semen Sesami Nigrum) and the addition of *Huo Ma Ren* (Fructus Cannabis) and *Yu Li Ren* (Semen Pruni) for constipation. The study reported increased hair growth and resolution of other symptoms among 31 of 38 patients.⁹

AUTHORS' COMMENTS

Warm-dryness attacking the Lung is often accompanied by underlying deficiencies of qi, yin, and body fluids. Thus, to properly treat this syndrome, the warm-dryness must be cleared and the Lung must be moistened. It is important to note that this formula achieves this goal with the use of sweet and cold heat-clearing herbs such as *Shi Gao* (Gypsum Fibrosum), and not with bitter, cold and drying heat-clearing herbs such as *Huang Qin* (Radix Scutellariae).

Qīng Zào Jiù Fèi Tāng

(Eliminate Dryness and Rescue the Lung Decoction)

Qing Zao Jiu Fei Tang and *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction) both effectively treat warm-dryness affecting the Lung.

- *Qing Zao Jiu Fei Tang* is generally reserved for severe cases of warm-dryness injuring the Lung, with such symptoms as high fever, cough, dyspnea, chest and hypochondriac fullness and pain, irritability, thirst, and dry mouth and throat.
- *Sang Xing Tang* is typically used for mild cases of warm-dryness affecting the Lung, with such symptoms as mild fever and mild cough.

Qing Zao Jiu Fei Tang and *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal) both nourish yin and moisten dryness to treat dry cough with scanty sputum.

- *Qing Zao Jiu Fei Tang* treats dry cough due to exterior warm-dryness attacking the body with other symptoms of headache, fever, and dry throat and mouth.
- *Bai He Gu Jin Tang* treats dry cough from Kidney and Lung yin deficiencies with deficiency-heat rising. Besides

the dry cough, there are other yin-deficient symptoms such as night sweats, dry nose and throat, blood-streaked sputum, red tongue body, a scanty coating, and a fine, rapid pulse.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Nourishes yin and clears the Lung

CLINICAL MANIFESTATIONS

Diphtheria: white curd-like spots that are hard to scrape off in the throat, swelling and pain in the throat, with or without fever, dry nose and lips, with or without coughing, and a wheezing sound when breathing.

CLINICAL APPLICATIONS

Diphtheria, chronic laryngitis, tuberculosis, tonsillitis, and epistaxis.

EXPLANATION

According to principles of traditional Chinese medicine,

diphtheria is caused by interior yin deficiency with heat, and is usually triggered by the attack of exterior epidemic toxins. According to the source text, this condition often affects individuals with underlying Lung and Kidney deficiencies, when they are exposed to dryness in the environment or consume acrid or spicy food. Because the Kidney channel passes through the throat and the throat connects the Lung with the exterior, Kidney and Lung yin deficiencies may contribute to yin-deficient heat. Furthermore, when yin-deficient heat is accompanied by attack of exterior epidemic toxins, the patient will experience swelling and pain in the throat, and dry nose and lips.

To treat this syndrome, it is most important to nourish yin, clear the Lung, and dispel toxins. In this formula, *Di Huang* (Radix Rehmanniae) nourishes Kidney yin, while *Mai Dong* (Radix Ophiopogonis) nourishes Lung yin. *Xuan Shen* (Radix Scrophulariae) clears deficiency fire and eliminates heat and toxins. *Mu Dan Pi* (Cortex Moutan) cools the blood and reduces swelling. *Bei Mu* (Bulbus

Fritillariae) moistens the Lung and dissolves phlegm. *Bai Shao* (Radix Paeoniae Alba) nourishes the yin and sedates the heat. *Bo He* (Herba Menthae) disperses dry heat and benefits the throat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs and eliminates toxins.

MODIFICATIONS

- With severe dryness, add *Tian Dong* (Radix Asparagi) and *Shi Hu* (Caulis Dendrobii).
- For the initial stage of diphtheria, when exterior symptoms are still present, add *Sang Ye* (Folium Mori) and *Ge Gen* (Radix Puerariae Lobatae).
- When exterior signs and symptoms are prevalent, add *Sang Ye* (Folium Mori) and *Jin Yin Hua* (Flos Lonicerae Japonicae).
- With severe yin deficiency, add *Shu Di Huang* (Radix Rehmanniae Praeparata).

CAUTIONS / CONTRAINDICATIONS

Yang Yin Qing Fei Tang should be used with caution in patients who have loose stools due to Spleen deficiency.

PHARMACOLOGICAL EFFECTS

1. **Antibiotic:** *Yang Yin Qing Fei Tang* was shown to have marked effectiveness to suppress and kill *Corynebacterium diphtheriae*. The alcohol extract of the formula was shown to have a better antibiotic effect than water extract.¹
2. **Immunostimulant:** Administration of *Yang Yin Qing Fei Tang* was shown to stimulate and increase the immune

system in both normal and immune-compromised subjects.²

CLINICAL STUDIES AND RESEARCH

1. **Tonsillitis:** Use of modified *Yang Yin Qing Fei Tang* was effective in treating 50 patients with acute tonsillitis. Modifications included the addition of *Che Qian Zi* (Semen Plantaginis) for dysuria; and the addition of *Tian Hua Fen* (Radix Trichosanthis) for thirst. Most patients responded within 1 or 2 packs of herbs, with up to 4 packs in some patients. Of 50 patients, the study reported complete recovery in 45 patients, improvement in 3 patients, and no effect in 2 patients.³ Another study evaluated the effectiveness of various modalities for treatment of acute tonsillitis. The rate of effectiveness and recovery are as follows: 94.1% and 90.3% in 104 patients for *Yang Yin Qing Fei Tang*, 91.8% and 51.3% in 74 patients for penicillin, and 70% and 45% in 40 patients for sulfonamide.⁴
2. **Laryngitis:** One study reported benefits using modified *Yang Yin Qing Fei Tang* to treat 345 patients with chronic laryngitis. Of 345 patients, the study reported complete recovery in 310 patients, improvement in 29 patients, and no change in 6 patients.⁵
3. **Epistaxis:** One study reported good results using modified *Yang Yin Qing Fei Tang* to treat 14 patients with nosebleeds. The herbal treatment contained *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis), *Xuan Shen* (Radix Scrophulariae), *Mu Dan Pi* (Cortex

Yǎng Yīn Qīng Fèi Tāng

(Nourish the Yin and Clear the Lung Decoction)

Moutan), *Bei Mu* (Bulbus Fritillariae), *Bo He* (Herba Menthae), *Bai Shao* (Radix Paeoniae Alba), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Furthermore, *Shi Gao* (Gypsum Fibrosum), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Lian Qiao* (Fructus Forsythiae) were added for heat; *San Qi* (Radix et Rhizoma Notoginseng) for continuous and profuse bleeding; *Tian Hua Fen* (Radix Trichosanthis), *Sha Shen* (Radix Glehniae seu Adenophorae), *Shi Hu* (Caulis Dendrobii), and *Yu Zhu* (Rhizoma Polygonati Odorati) for dry mouth and throat; and *Huang Qi* (Radix Astragali) and *Dang Gui* (Radix Angelicae Sinensis) for qi and blood deficiencies. The patients were instructed to clean the nasal cavity with normal saline two to three times daily. The study reported complete recovery in all 14 patients. The duration of treatment was between 3 and 6 months. No recurrences were reported in follow-ups 6 to 12 months later.⁶

AUTHORS' COMMENTS

Yang Yin Qing Fei Tang and *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal) both treat Lung and Kidney yin deficiencies. Both formulas contain *Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Mai Dong* (Radix Ophiopogonis), and *Bai Shao* (Radix Paeoniae Alba) to nourish Lung and Kidney yin. However, their differences are as follows:

- *Yang Yin Qing Fei Tang* also treats exterior invasion of heat and toxins manifesting in white curd-like spots that

are hard to scrape off in the throat, swelling and pain of the throat, dry nose and lips, and wheezing sounds when breathing. *Yang Yin Qing Fei Tang* also contains *Bo He* (Herba Menthae), *Bei Mu* (Bulbus Fritillariae), and *Mu Dan Pi* (Cortex Moutan) to expel pathogenic factors, resolve phlegm, and benefit the throat.

- *Bai He Gu Jin Tang* treats deficiency-heat rising and manifesting in cough with blood; sore, dry and painful throat, *wu xin re* (five-center heat), steaming bones sensations, night sweats, a red tongue body with scanty coating, and a fine and rapid pulse. *Bai He Gu Jin Tang* also contains *Bai He* (Bulbus Lilii), *Bei Mu* (Bulbus Fritillariae), and *Jie Geng* (Radix Platycodonis) to arrest cough and expel phlegm.⁷

Original Source: *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682

COMPOSITION

<i>Di Huang</i> (Radix Rehmanniae)	6g
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	9g
<i>Mai Dong</i> (Radix Ophiopogonis)	4.5g
<i>Bai He</i> (Bulbus Lilii)	3g
<i>Bei Mu</i> (Bulbus Fritillariae)	3g
<i>Xuan Shen</i> (Radix Scrophulariae)	2.4g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	3g
<i>Bai Shao</i> (Radix Paeoniae Alba), <i>chao</i> (dry-fried)	3g
<i>Jie Geng</i> (Radix Platycodonis)	2.4g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction.

night sweats, and fine, rapid pulse are all typical signs of yin-deficient heat.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and moistens the Lung
2. Dissolves phlegm and stops coughing

CLINICAL MANIFESTATIONS

Yin deficiency of the Lung and Kidney: coughing with streaks of blood in the sputum, dry and sore throat, warm sensations in the palms and soles, steaming bones sensations, night sweats, red tongue body with little coating, and a fine, rapid pulse.

CLINICAL APPLICATIONS

Cough, bronchiectasis, chronic bronchitis, cor pulmonale, pneumothorax, pulmonary tuberculosis, lung cancer, pharyngitis, hemoptysis, coughing, asthma, and diabetes mellitus.

Di Huang (Radix Rehmanniae) and *Shu Di Huang* (Radix Rehmanniae Praeparata) nourish yin and clear the deficiency fire. *Di Huang* (Radix Rehmanniae) further cools the blood and stops bleeding. *Mai Dong* (Radix Ophiopogonis), *Bai He* (Bulbus Lilii), and *Bei Mu* (Bulbus Fritillariae) nourish the yin, moisten the Lung, dissolve phlegm, and stop coughing. *Xuan Shen* (Radix Scrophulariae) cools the blood, clears the deficiency fire, and moistens dryness. *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba) nourish the yin and blood. *Jie Geng* (Radix Platycodonis) smoothes the Lung qi, relieves coughing, and dissolves phlegm. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all the herbs in the formula. Lastly, the combination of *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Jie Geng* (Radix Platycodonis) helps to relieve the sore throat.

EXPLANATION

Bai He Gu Jin Tang (Lily Bulb Decoction to Preserve the Metal) is designed to treat Lung and Kidney yin deficiencies. Yin deficiency of the Lung and Kidney may lead to deficiency heat and injury of the blood vessels. Injury of the lung capillaries may lead to bleeding and coughing with streaks of blood. Dry and sore throat are due to deficiency heat drying up the body fluids. Warm palms and soles, steaming bones sensations,

MODIFICATIONS

- With fullness and distention of the chest and hypochondriac region, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Chai Hu* (Radix Bupleuri).
- With sore throat and hoarse voice, add *Tian Dong* (Radix Asparagi) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With more severe cough and dyspnea, add *Ku Xing Ren* (Semen Armeniacae Amarum), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Kuan Dong Hua* (Flos Farfarae).

Diagnosis	Signs and Symptoms	Treatment	Herbs
Lung and Kidney yin deficiencies	<ul style="list-style-type: none"> • Coughing with streaks of blood in the sputum: deficiency heat injuring the blood vessels • Dry and sore throat: deficiency heat consuming body fluids • Warm sensation in the palms and soles, steaming bones sensation, and night sweats: yin-deficient heat rising upward • Red tongue body with little coating and a fine, rapid pulse: yin-deficient heat 	<ul style="list-style-type: none"> • Nourishes yin and moistens the Lung • Dissolves phlegm and stops coughing 	<ul style="list-style-type: none"> • <i>Di Huang</i> (Radix Rehmanniae) and <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) nourish yin and clear deficiency fire. • <i>Di Huang</i> (Radix Rehmanniae) and <i>Xuan Shen</i> (Radix Scrophulariae) cool the blood, clear deficiency fire, and stops bleeding. • <i>Mai Dong</i> (Radix Ophiopogonis), <i>Bai He</i> (Bulbus Lilii) and <i>Bei Mu</i> (Bulbus Fritillariae) nourish yin, moisten the Lung, dissolve phlegm, and stop coughing. • <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Bai Shao</i> (Radix Paeoniae Alba) nourish yin and tonify blood. • <i>Jie Geng</i> (Radix Platycodonis) smoothes Lung qi, relieves coughing, and dissolves phlegm. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs.

- With thick, yellow sputum, add *Gua Lou* (Fructus Trichosanthis) and *Zhu Ru* (Caulis Bambusae in Taenia).
- With coughing of blood, remove *Jie Geng* (Radix Platycodonis), and add *Bai Mao Gen* (Rhizoma Imperatae), *Ce Bai Ye* (Cacumen Platycladi) and *Xian He Cao* (Herba Agrimoniae).
- With wheezing and dyspnea due to profuse phlegm, add *Xie Bai San* (Drain the White Powder).
- With wheezing and dyspnea due to heat, add *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium).
- If there are more heat signs, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Yu Xing Cao* (Herba Houttuyniae).
- With severe night sweats, add *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Fu Xiao Mai* (Fructus Tritici Levis), calcined *Mu Li* (Concha Ostreae), and *Ma Huang Gen* (Radix et Rhizoma Ephedrae).
- For pulmonary tuberculosis, add *Bai Ji* (Rhizoma Bletillae), *Bai Bu* (Radix Stemonae), and *Xia Ku Cao* (Spica Prunellae).

CAUTIONS / CONTRAINDICATIONS

- *Bai He Gu Jin Tang* is contraindicated in patients in whom coughing is characterized by excess conditions.
- Many herbs in this formula are hard to digest since they are cold, sweet, and heavy in nature. Therefore, patients with Spleen deficiency, characterized by loose stools, abdominal fullness and pain, and poor appetite, should use this formula with caution.

CLINICAL STUDIES AND RESEARCH

1. **Cough:** One study reported 90% effectiveness using modified *Bai He Gu Jin Tang* to treat 30 patients with cough characterized by dryness and heat. Modifications included addition of *Jin Yin Hua* (Flos Lonicerae Japonicae), *Ban Lan Gen* (Radix Isatidis), and *Niu Bang Zi* (Fructus Arctii) for sore throat; *Zi Su Ye* (Folium Perillae), *Huang Lian* (Rhizoma Coptidis), and *Gua Lou* (Fructus Trichosanthis) for feelings of oppression and pain in the chest; *Tian Zhu Huang* (Concretio Silicea Bambusae) for insomnia; and *Gua Lou Zi* (Semen Trichosanthis) for constipation.¹ Another study reported 97.6% effectiveness using *Bai He Gu Jin Tang* to treat 42 children with chronic cough.²
2. **Bronchiectasis:** One study reported good results using herbs to treat 50 patients with hemoptysis associated with bronchiectasis. The herbal formula contained *Di Huang* (Radix Rehmanniae) 15g, *Mai Dong* (Radix Ophiopogonis) 15g, *Bai He* (Bulbus Lilii) 15g, *Xian He Cao* (Herba Agrimoniae) 15g, *Bai Shao* (Radix Paeoniae Alba) 12g, *Dang Gui* (Radix Angelicae Sinensis) 12g, *Xuan Shen* (Radix Scrophulariae) 12g, *Bai Mao Gen* (Rhizoma Imperatae) 30g, *Bei Mu* (Bulbus Fritillariae) 6g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g. Additional modifications were made as needed. The treatment protocol was to administer one pack of herbs daily, for 15 to 20 packs continuously. The study reported marked improvements in most patients, with relief of symptoms such as cough and hemoptysis, and reduction of phlegm.³

Bǎi Hé Gù Jīn Tāng (Lily Bulb Decoction to Preserve the Metal)

3. **Pneumothorax:** In one study, 30 patients with pneumothorax were divided into two groups and treated accordingly. Group one received *Bai He Gu Jin Tang*, one pack of herbs per day via decoction for 10 days per course, for a total of 3 to 4 courses of treatment. Group two received standard allopathic medical treatment (details of treatment were unavailable at the time of publication). The study noted that both treatments were effective. However, the average length of hospitalization was only 18.93 days for patients in the herb group, while the average was 27.85 days for the allopathic medicine group.⁴ Another study reported marked success using the following formula to treat pneumothorax: *Bai He Gu Jin Tang* with the removal of *Dang Gui* (Radix Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Praeparata) and the addition of *Sha Shen* (Radix Glehniae seu Adenophorae), *Pi Pa Ye* (Folium Eriobotryae), and *Gua Lou Pi* (Pericarpium Trichosanthis). Pneumothorax was resolved after an average of 11 days, with a range of 2 to 20 days.⁵
4. **Pulmonary tuberculosis:** In one study, 26 of 30 patients with pulmonary tuberculosis were treated with marked improvement using herbal medicine. The herbal treatment was *Bai He Gu Jin Tang* for yin deficiency, and *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) for qi deficiency.⁶
5. **Lung cancer:** According to one study, administration of *Bai He Gu Jin Tang* was associated with symptomatic improvement in 22 of 38 patients with lung cancer characterized by Lung yin deficiency.⁷
6. **Diabetes mellitus:** Diabetes mellitus was treated effectively using modified *Bai He Gu Jin Tang* daily in decoction, for 20 days per course of treatment, for 4 courses total. Of 46 patients, the study reported improvement in 38 cases and no effect in 8 cases.⁸

AUTHORS' COMMENTS

Bai He Gu Jin Tang treats cough with blood-streaked sputum, yet it purposely excludes herbs that stop bleeding in its formulation. Bleeding in this case is caused by Kidney and Lung yin deficiencies with deficiency fire flaring upward and injuring the channels and collaterals, leading to symptoms such as dry and painful throat, *wu xin re* (five-center heat), steaming bones sensations, night sweats, and a red tongue with a scanty coating. The herbs used in this formula focus on nourishing yin and cooling deficiency fire. By treating the cause of the bleeding, there is no need to add additional herbs to stop bleeding. When yin is nourished, the bleeding will stop automatically.⁹

Bai He Gu Jin Tang and *Bu Fei E Jiao Tang* (Tonify the Lung Decoction with Ass-Hide Gelatin) both treat cough with blood-streaked sputum, a condition characterized by Lung yin deficiency with fire. Both formulas also nourish Lung yin and treat sore and dry throat, a red tongue body with a scanty coating, and a fine, rapid pulse.

- *Bai He Gu Jin Tang* treats Lung and Kidney yin deficiencies with deficiency-heat rising, and accompanying signs such as *wu xin re* (five-center heat), steaming bones sensations, and night sweats.
- *Bu Fei E Jiao Tang* is designed for Lung yin deficiency with fire, with chief complaints of cough with dyspnea and sputum that is not profuse in amount, and a superficial, fine and rapid pulse.¹⁰

Bai He Gu Jin Tang, *Qiong Yu Gao* (Beautiful Jade Paste), and *Mai Men Dong Tang* (Ophiopogonis Decoction) have similar effects to nourish yin and moisten the Lung. Their differences are as follows:

- *Bai He Gu Jin Tang* tonifies Lung and Kidney yin, and clears deficiency heat. It is most effective for cough with streaks of blood in the sputum.
- *Qiong Yu Gao* nourishes Lung yin and tonifies Spleen qi. It is primarily used to treat dry, non-productive cough caused by chronic deficiency and debility.
- *Mai Men Dong Tang* tonifies Lung and Stomach yin, and redirects abnormally rising qi downward. It is used to treat cough with difficult-to-expectorate sputum, and vomiting with lack of appetite.

Bǔ Fèi Ē Jiāo Tāng (Tonify the Lung Decoction with Ass-Hide Gelatin)

補肺阿膠湯

补肺阿胶汤

Pinyin Name: *Bu Fei E Jiao Tang*

Literal Name: Tonify the Lung Decoction with Ass-Hide Gelatin

Alternate Names: *Bu Fei E Jiao San* (Tonify the Lung Powder with Ass-Hide Gelatin), *E Jiao San* (Ass-Hide Gelatin Powder), *Bu Fei San* (Tonify the Lung Powder)

Original Source: *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns) by Qian Yi in 1119

COMPOSITION

<i>E Jiao</i> (Colla Corii Asini), <i>chao</i> (dry-fried) with bran	45g [9g]
<i>Niu Bang Zi</i> (Fructus Arctii), <i>chao</i> (dry-fried) till aromatic	7.5g [3g]
<i>Ma Dou Ling</i> (Fructus Aristolochiae), <i>bei</i> (stone-baked)	15g [6g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum), <i>chao</i> (dry-fried)	7 kernels [6g]
<i>Nuo Mi</i> (Oryza Glutinosa), <i>chao</i> (dry-fried)	30g [6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	7.5g [1.5g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to dry-fry *E Jiao* (Colla Corii Asini) with bran, pound it into fine particles, and blend it with *Nuo Mi* (Oryza Glutinosa). This mixture is dry-fried again. Grind the other ingredients into powder, and mix everything together. Cook 3-6g of the powder in 1 large bowl of water until the liquid is reduced to 60% of the original volume. Take the warm decoction after meals.

Today, it is usually prepared as a decoction by cooking all of the herbs in water (using the suggested doses in brackets), except for *E Jiao* (Colla Corii Asini). Separately dissolve *E Jiao* (Colla Corii Asini) in boiling water, and mix it with the strained decoction before ingestion.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and tonifies the Lung
2. Arrests coughing and stops bleeding

CLINICAL MANIFESTATIONS

Lung yin deficiency further injured by excess heat invasion: coughing, wheezing, dry throat, scanty sputum, streaks of blood in the sputum, red tongue body with little coating, and a superficial, fine and rapid pulse.

CLINICAL APPLICATIONS

Pulmonary tuberculosis, pneumonia, bronchitis, asthma, bronchial asthma, tonsillitis, and coughing.

EXPLANATION

Bu Fei E Jiao Tang (Tonify the Lung Decoction with Ass-Hide Gelatin) treats excess heat invading a deficient Lung. Lung deficiency makes the body more vulnerable to attack by exterior pathogenic factors. Once these

exterior pathogenic factors progress to the Lung and the interior and become stagnant, they can transform into excess heat. Excess heat disrupts the normal qi flow of the Lung, causing coughing and wheezing. Dry throat and coughing with bloody sputum indicate that the excess heat has injured the yin and body fluids, as well as the blood vessels. A red tongue body with little coating and a superficial, fine and rapid pulse indicate Lung heat and deficiency.

E Jiao (Colla Corii Asini) tonifies Lung yin, nourishes the blood, and stops bleeding. *Niu Bang Zi* (Fructus Arctii) disperses heat and relieves dry, sore throat. *Ma Dou Ling* (Fructus Aristolochiae) clears Lung heat, stops coughing, and dissolves phlegm. *Ku Xing Ren* (Semen Armeniacae Amarum) redirects the rising qi of the Lung downward to relieve coughing and wheezing. *Nuo Mi* (Oryza Glutinosa) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourish the Spleen.

MODIFICATIONS

- With a dry mouth, add *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), *Tian Dong* (Radix Asparagi), *Lu Gen* (Rhizoma Phragmitis), and *Bai He* (Bulbus Lilii).
- With sensations of chest oppression, add *Zhi Qiao* (Fructus Aurantii), *Gua Lou Pi* (Pericarpium Trichosanthis), and *Yu Jin* (Radix Curcumae).
- With sore throat, add *Jie Geng* (Radix Platycodonis) and *She Gan* (Rhizoma Belamcandae).
- With chest and hypochondriac pain during coughing, add *Zhi Shi* (Fructus Aurantii Immaturus), *Fo Shou* (Fructus Citri Sarcodactylis), and *Yu Jin* (Radix Curcumae).

Bǔ Fèi Ē Jiāo Tāng (Tonify the Lung Decoction with Ass-Hide Gelatin)

Bu Fei E Jiao Tang (Tonify the Lung Decoction with Ass-Hide Gelatin)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Lung yin deficiency further injured by excess heat invasion	<ul style="list-style-type: none">• Coughing and wheezing: excess heat disturbing Lung qi circulation• Dry throat, and scanty, blood-streaked sputum: excess heat consuming yin, drying body fluids, and damaging blood vessels• Red tongue body with little coating and a superficial, fine and rapid pulse: presence of heat and underlying deficiency	<ul style="list-style-type: none">• Nourishes yin and tonifies the Lung• Arrests coughing and stops bleeding	<ul style="list-style-type: none">• <i>E Jiao</i> (Colla Corii Asini) tonifies Lung yin, nourishes the blood, and stops bleeding.• <i>Niu Bang Zi</i> (Fructus Arctii) disperses heat and relieves the dry, sore throat.• <i>Ma Dou Ling</i> (Fructus Aristolochiae) clears Lung heat, stops coughing, and dissolves phlegm.• <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) redirects Lung qi downward to relieve coughing and wheezing.• <i>Nuo Mi</i> (Oryza Glutinosa) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourish the Spleen and harmonize the herbs.

- With wheezing and dyspnea, add *Zi Su Zi* (Fructus Perillae) and *Qian Hu* (Radix Peucedani).
- If there is blood in the sputum, add *Bai Mao Gen* (Rhizoma Imperatae), *Bai Ji* (Rhizoma Bletillae), and *Bai He* (Bulbus Lilii).

CAUTIONS / CONTRAINDICATIONS

- *Bu Fei E Jiao Tang* contains many heavy tonics that are hard to digest, and is not recommended in cases of phlegm accumulation or Spleen and Stomach deficiencies.
- This formula is not appropriate for individuals with cough caused by wind-cold, or cough with profuse amounts of blood.

CLINICAL STUDIES AND RESEARCH

Cough: In one study, 84 patients with cough characterized by Lung yin deficiency due to various causes (bronchitis, bronchial asthma, bronchiectasis, pulmonary tuberculosis, and whooping cough) were treated with modified *Bu Fei E Jiao Tang* with good results. The formula included *E Jiao* (Colla Corii Asini) 15g, *Ma Dou Ling* (Fructus Aristolochiae) 10g, *Ku Xing Ren* (Semen Armeniacae Amarum) 10g, *Niu Bang Zi* (Fructus Arctii) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Nuo Mi* (Oryza Glutinosa) 30g and other herbs if deemed necessary. Out of 84 patients, the study reported recovery in 65 cases, improvement in 17 cases, and no benefit in 2 cases.¹

The source text states to cook and condense the herbs, except *E Jiao* (Colla Corii Asini), into an herbal paste. Then dissolve *E Jiao* (Colla Corii Asini) in the herbal paste, and mix the paste with honey to form pills. Each pill should weigh 15g. Take 1 pill three times daily by dissolving it under the tongue before swallowing the resultant liquid.

Yue Hua Wan (Moonlight Pill) tonifies the Lung, nourishes yin, arrests coughing, and stops bleeding. Clinically, it is often used for patients with Lung and Kidney yin

Bǔ Fèi Ē Jiāo Tāng (Tonify the Lung Decoction with Ass-Hide Gelatin)

deficiencies characterized by chronic coughing with sputum that may contain streaks of blood.

It may also be used in the middle or late stages of chronic tuberculosis, with symptoms such as tidal fever, dysphoria with feverish sensations in the chest, palms, and soles, emaciated complexion, dry coughing or productive coughing with streaks of blood in the phlegm, dry mouth, chest stuffiness, lack of appetite, lack of energy, obstructed bowel movements, and scanty urine.

AUTHORS' COMMENTS

Bu Fei E Jiao Tang and *Ren Shen Ge Jie San* (Ginseng and Gecko Powder) both treat coughing and relieve wheezing. Furthermore, both formulas have dual effects to tonify Lung deficiency and clear Lung heat. Their differences are as follows:

- *Bu Fei E Jiao Tang* mainly tonifies Lung yin to disperse heat. It is most suitable for patients with Lung yin-deficiency who suffer from heat invasion manifesting in cough, dyspnea, and wheezing. In comparison with *Ren Shen Ge Jie San*, *Bu Fei E Jiao Tang* is stronger for stopping bleeding, but does not assist the Kidney in grasping qi downward.
- *Ren Shen Ge Jie San* tonifies Lung qi deficiency, with additional functions of tonifying the Spleen, nourishing the Kidney, and helping the Kidney grasp the qi. It is most suitable for chronic cough with Kidney deficiency, resulting from an inability to grasp the qi and Spleen qi deficiency

producing dampness. In comparison with *Bu Fei E Jiao Tang*, *Ren Shen Ge Jie San* more strongly nourishes the Lung, but does not disperse wind-heat invasion.²

Bu Fei E Jiao Tang, *Da Bu Yin Wan* (Great Tonify the Yin Pill), and *Sheng Mai San* (Generate the Pulse Powder) all treat cough due to Lung deficiency. Their differences are as follows:

- *Bu Fei E Jiao Tang* treats Lung deficiency with excess heat. It is best for nourishing Lung yin, arresting cough, and stopping bleeding for patients with cough with dry throat, scanty sputum, red tongue body with scanty coating, and a superficial, fine and rapid pulse.
- *Da Bu Yin Wan* treats Lung and Kidney yin deficiencies with deficiency fire flaring. The symptoms include steaming bones sensation, tidal fever, red tongue body with scanty coating, and a rapid, forceful pulse.
- *Sheng Mai San* is best for Lung qi and yin deficiencies, as it benefits qi, generates body fluids, astringes yin, and stops sweating. It is best for patients with a weak constitution, who manifest shortness of breath, profuse sweating, thirst, and a deficient pulse.³

Qióng Yù Gāo (Beautiful Jade Paste)

瓊玉膏

琼玉膏

Pinyin Name: *Qiong Yu Gao*

Literal Name: Beautiful Jade Paste

Original Source: *Hong Shi Ji Yan Fang* (Time-Tested Formulas of the Hong Family)

COMPOSITION

<i>Di Huang</i> (Radix Rehmanniae)	8,000g
<i>Feng Mi</i> (Mel)	5,000g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	750g
<i>Fu Ling</i> (Poria)	1,500g

DOSAGE / PREPARATION / ADMINISTRATION

Grind *Ren Shen* (Radix et Rhizoma Ginseng) and *Fu Ling* (Poria) into a fine powder. Filter *Feng Mi* (Mel) to remove

impurities. Simmer *Di Huang* (Radix Rehmanniae) to obtain its juice and discard the herbal residue. Mix the powder, the honey and the juice, and cook them

Qióng Yù Gāo (Beautiful Jade Paste)

together continuously over low heat for 3 days, until it is reduced to a thick paste. Store the paste in a container made from silver, stone, or porcelain. Avoid using iron during the processing or storage of this formula. Take 2 spoonfuls [6-9g] in the morning with hot water or warm, grain-based liquor.

CHINESE THERAPEUTIC ACTIONS

- 1. Nourishes yin and moistens the Lung
- 2. Tonifies qi and strengthens the Spleen

CLINICAL MANIFESTATIONS

Lung yin and Spleen qi deficiencies: generalized deficiency and debility, dry coughing with streaks of blood, dry throat, muscle wasting, shortness of breath, and fatigue.

CLINICAL APPLICATIONS

Diabetes mellitus, dermatitis, compromised immune system, and drug-induced cough.

EXPLANATION

Qiong Yu Gao (Beautiful Jade Paste) is designed to treat Lung disorders due to over-exertion, characterized by such symptoms as chronic, non-productive cough, dry mouth and throat, shortness of breath, and fatigue. This condition is characterized by Lung yin and Spleen qi deficiencies. Over-exertion and the chronic nature of the illness consume yin and qi, causing underlying deficiencies. Furthermore, deficiency of yin and qi contributes to rising of deficiency fire. As a result, the clinical manifestations of this condition include symptoms such as dry, non-productive cough with streaks of blood, dry throat, muscle wasting, shortness of breath, and fatigue.

In this formula, *Di Huang* (Radix Rehmanniae) nourishes yin, supplements body fluids, and clears deficiency fire. *Feng Mi* (Mel) nourishes the Lung and moistens dryness. *Ren Shen* (Radix et Rhizoma Ginseng) and *Fu Ling* (Poria) tonify Spleen qi and eliminate dampness and phlegm that accumulate in the Lung.

CAUTIONS / CONTRAINDICATIONS

Qiong Yu Gao is contraindicated in cases of coughing with blood caused by exterior conditions.

CLINICAL STUDIES AND RESEARCH

- 1. **Compromised immune system:** In one study of 16 geriatric patients with compromised immunity, administration of *Qiong Yu Gao* was associated with a general improvement in energy, appetite, and immunity. The treatment protocol was to administer 20-30 grams of the formula twice daily with meals. The herbal formula contained *Di Huang* (Radix Rehmanniae), *Ren Shen* (Radix et Rhizoma Ginseng), *Fu Ling* (Poria), *Mai Dong* (Radix Ophiopogonis), *Tian Dong* (Radix Asparagi), *Di Gu Pi* (Cortex Lycii), and *Feng Mi* (Mel).¹
- 2. **Others:** *Qiong Yu Gao* has also been used to treat diabetes mellitus and dermatitis.

HERB-DRUG INTERACTION

Angiotensin-converting enzyme (ACE) inhibitors-induced cough: Administration of *Qiong Yu Gao* was found to be effective in preventing dry cough associated with ACE inhibitors.²

Mài Mén Dōng Tāng (Ophiopogonis Decoction)

麥門冬湯

麦门冬汤

Pinyin Name: *Mai Men Dong Tang*

Literal Name: Ophiopogonis Decoction

Alternate Name: Ophiopogon Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Mai Dong</i> (Radix Ophiopogonis)	7 cups [60-70g]
<i>Ban Xia</i> (Rhizoma Pinelliae)	1 cup [10-18g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g [6-9g]
<i>Geng Mi</i> (Semen Oryzae)	0.3 cup [6g]
<i>Da Zao</i> (Fructus Jujubae)	12 pieces [3-4 pieces]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 12 cups [2,400 mL] of water until the liquid is reduced to 6 cups [1,200 mL]. Take 1 cup [200 mL] of the warm, strained decoction three times during the day and once at night. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Lung and Stomach yin
2. Redirects reversed flow of qi and harmonizes the middle *jiao*

CLINICAL MANIFESTATIONS

1. Lung yin deficiency: coughing with difficult-to-expectorate sputum, coughing or spitting of saliva, dry mouth and throat, feelings of heat in the palms and soles, a red tongue body with scanty tongue coating, and a deficient, rapid pulse.

2. Stomach yin deficiency: nausea, vomiting, thirst, dry throat, a red tongue body with scanty tongue coating, and a deficient, rapid pulse.

CLINICAL APPLICATIONS

Nausea, vomiting, morning sickness, dry mouth and throat, stomach cramps, gastritis, peptic ulcer disease, chronic atrophic gastritis, bronchitis, cough, cough from interstitial pneumonia, postinfectious cough, and Sjogren's syndrome.

EXPLANATION

Mai Men Dong Tang (Ophiopogonis Decoction) is designed to treat Lung and/or Stomach yin deficiencies with deficiency fire rising. The deficiency fire disrupts normal flow of Lung qi, and causes it to move upward instead of downward, which produces cough. Moreover, deficiency fire damages body fluids, and as a result, patients experience sputum that cannot be easily expectorated, thirst

Mai Men Dong Tang (Ophiopogonis Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Lung and/or Stomach yin deficiencies	<ul style="list-style-type: none">• Coughing: reversed flow of Lung qi• Nausea and vomiting: reversed flow of Stomach qi• Difficult-to-expectorate sputum, thirst, dry mouth and throat, and sensations of heat in the palms and soles: deficiency fire• Red tongue with scanty tongue coating, and a deficient, rapid pulse: yin-deficient fire	<ul style="list-style-type: none">• Nourishes Lung and Stomach yin• Corrects reversed flow of qi and harmonizes the middle <i>jiao</i>	<ul style="list-style-type: none">• <i>Mai Dong</i> (Radix Ophiopogonis) nourishes yin and clears deficiency fire.• <i>Ban Xia</i> (Rhizoma Pinelliae) corrects the reversed flow of qi and dissolves phlegm.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies qi and generates body fluids.• <i>Geng Mi</i> (Semen Oryzae), <i>Da Zao</i> (Fructus Jujubae), and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) nourish the Spleen and Stomach.

Mài Mén Dōng Tāng (Ophiopogonis Decoction)

and dry mouth and throat. Stomach yin deficiency may lead to reversed flow of qi upwards, causing nausea and vomiting. Sensations of heat in the palms and soles, a red tongue with a scanty tongue coating, and deficient, rapid pulse are typical signs of yin-deficient fire.

This formula contains *Mai Dong* (Radix Ophiopogonis) to nourish Lung and Stomach yin and clear deficiency fire. *Ban Xia* (Rhizoma Pinelliae) corrects the reversed flow of qi and dissolves phlegm. These two herbs also provide mutual checks and balances, as *Mai Dong* (Radix Ophiopogonis) controls the drying nature of *Ban Xia* (Rhizoma Pinelliae), while *Ban Xia* (Rhizoma Pinelliae) checks the cloying nature of *Mai Dong* (Radix Ophiopogonis). *Ren Shen* (Radix et Rhizoma Ginseng) combines with *Mai Dong* (Radix Ophiopogonis) to tonify the qi and generate body fluids. *Geng Mi* (Semen Oryzae), *Da Zao* (Fructus Jujubae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) nourish the Spleen and Stomach and tonify zhong (central) qi.

MODIFICATIONS

- With tidal fever, add *Yin Chai Hu* (Radix Stellariae) and *Di Gu Pi* (Cortex Lycii).
- When there is severe damage to the body fluids, add *Bei Sha Shen* (Radix Glehniae) and *Yu Zhu* (Rhizoma Polygonati Odorati).
- With thirst and irritability, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With burning epigastric pain or dry heaves caused by Stomach yin deficiency, add *Bai He* (Bulbus Lilii).

CAUTIONS / CONTRAINDICATIONS

Mai Men Dong Tang is not suitable for atrophy of the Lung characterized by deficiency and cold.¹

PHARMACOLOGICAL EFFECTS

1. **Antitussive:** According to various *in vitro* studies, administration of *Mai Men Dong Tang* was associated with antitussive effects to stop cough.² The mechanism of this antitussive effect was attributed in part to *Gan Cao* (Radix et Rhizoma Glycyrrhizae), which contain a potent antitussive compound, liquiritin apioside.³
2. **Respiratory:** *Mai Men Dong Tang* has been shown to have mucoactive effect on the production or composition of airway secretions, resulting in increased effectiveness of mucociliary clearance. In addition, *Mai Men Dong Tang* also reduced airway hyper-responsiveness by inhibiting the release of acetylcholine from vagus nerve terminals. Clinically, it has been used with success to treat bronchitis and pharyngitis accompanying severe dry cough.^{4,5}

3. **Hypoglycemic:** Administration of a water extract of *Mai Men Dong Tang* at 500 mg/kg given via intraperitoneal injection was shown to decrease blood glucose in mice with hereditary diabetes mellitus.⁶
4. **Beta-adrenergic:** According to a study in canines, administration of *Mai Men Dong Tang* potentiated beta-adrenergic functioning in airway smooth muscle, which reflects the efficacy of this formula to treat asthma and airway hyper-responsiveness.⁷

CLINICAL STUDIES AND RESEARCH

1. **Nausea and vomiting:** One study reported 92.8% effectiveness using modified *Mai Men Dong Tang* to treat stubborn nausea and vomiting characterized by Stomach yin deficiency. The duration of treatment ranged from 3 to 9 packs of herbs. The herbal formula contained *Mai Dong* (Radix Ophiopogonis), *Ban Xia* (Rhizoma Pinelliae), *Ren Shen* (Radix et Rhizoma Ginseng), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), *Geng Mi* (Semen Oryzae), *Da Zao* (Fructus Jujubae), *Zhu Ru* (Caulis Bambusae in Taenia), *Shi Hu* (Caulis Dendrobii), and *Pi Pa Ye* (Folium Eriobotryae). Of 42 patients, the study reported complete recovery in 20 cases, significant improvement in 15 cases, moderate improvement in 4 cases, and no effect in 3 cases.⁸
2. **Morning sickness:** One study reported marked effectiveness in the treatment of nausea and vomiting in 20 women using *Mai Men Dong Tang* plus *Gou Qi Zi* (Fructus Lycii), *Zhu Ru* (Caulis Bambusae in Taenia), and *Sheng Jiang* (Rhizoma Zingiberis Recens). The herbs were given in decoction daily.⁹
